THE Boston Chamber of Commerce has made a complaint to the Commission against the Lake Shore, New York Central, and Boston & Albany Railroads, that the charge from Chicago to Boston upon flour, grain and provisions is thirty cents per hundred, or \$90 per car, whereas the rates to New York have been only twenty-five cents a hundred, or \$75 a car. This, the complainants aver, constitutes an unjust discrimination to the disadvantage of Boston. It is also charged that a rebate is allowed upon goods consigned from Chicago to Boston and designed for shipment abroad. This, it is averred, is a discrimination against one class of Boston dealers and in favor of another.

George RICE

v.

LOUISVILLE & NASHVILLE R. R. Co.
et al.

GEORGE RICE, of Marietta, Ohio, an oil manufacturer and dealer, has filed a series of complaints against the Louisville & Nashville; Illinois Central; Mobile & Ohio; Newport News & Mississippi Valley; Louisville, New Orleans & Texas; Texas Pacific & Alabama; Great Southern; Mississippi & Tennessee; East Tennessee, Virginia & Georgia; and the St. Louis, Iron Mountain & Southern Railroad Companies, charging the imposition of rates which are unjust and unreasonable in themselves; the imposition of rates upon his products greater than is put upon those of the Standard Oil Company under similar circumstances and conditions; discrimination in favor of the Standard Oil Company in having its cars and charging for less than actual weight, while complainant's cars are always charged at full actual weights, and discrimination in favor of the Standard Oil Company in furnishing oil cars when the same are refused to complainant. These alleged discriminations, complainant declares, have had, and were designed to have, the effect to give the Oil Company an almost complete monopoly of the traffic in oils.

DEPARTMENT OF STATISTICS.

THE Commission has created a Bureau to be styled its Department of Statistics, the head of which will be denominated the Auditor.

G. C. McCain has been appointed Auditor and will enter upon his duties August 1. Mr. McCain is a native of Minnesota and has held for several years a responsible position in the office of Albert Fink, Ttrunk Line Commissioner in New York City.

(July 23, 1887.)

William H. COUNCIL

v.

WESTERN & ATLANTIC R. R. Co. *

THE Commission gave a hearing in the case of William H. Council against the Western & Atlantic Railroad Company. Council is the colored man who, having purchased a first class ticket, charges that he was refused permission to ride in a first class car, and was forced to go into the smoking car. The Railroad Company was represented by Julius L. Brown, of Atlanta, and the complainant by John D. Brandon and Oscar R. Hundley, of Huntsville. Mr. Brown interposed some objections to the admission of certain depositions, and during a brief discussion which ensued Mr. Brown stated his purpose to enter a motion to throw out the complaint, upon the ground of lack of jurisdiction, this being, he asserted, merely a claim for damages. The Chairman in reply said the Commission would not sit here to try any mere question of damages, but that this was much more. Here were charges of unjust discrimination against a class of citizens. If there were such a case, it ought to arise upon facts which are open, public and notorious, and there ought to be no difficulty in regard to them.

The objection being overruled the charges and response were read. The gist of the Railroad's reply is that the complainant went into a ladies' car in defiance of the rules of the Company and refused to go into the other car, and that it was the passengers and not the train men who assaulted him. The answer admits the duty of the Company to furnish equal accommodations for all first class passengers, but it claims the right to classify passengers, either by the color line or otherwise.

After the reading of a number of depositions Mr. Council was sworn. He is an intelligent colored man, well dressed, self possessed and of good address. He is a minister and principal of the State Normal School at Huntsville. He told the story of his ejection from the car in which he had taken a seat. He entered the car without objection on the part of anyone. He was told by some one, whom he did not recognize as a train man, that he must go forward, to which he paid no attention. He was finally approached by two men, one of whom carried a lantern and the other had his hand upon his hip pocket. The man with the lantern seized witness, hit him over the head several times with the lantern, cutting his head badly and breaking the glass. Witness appealed to the passengers but without avail. His assailants then seized and carried him into the forward car. This car was filthy and was full of smoke. As he was being pushed from one car to the other, the brakeman told him this was what he got for not moving when requested.

*See ante, 202.

INTER 8.

Counsel for the respondent opened his side of the case by reading a series of depositions. From one by a passenger named Whitsett, the following appears to have been the style of Mr. Council's invitation to change cars:

"I walked forward to the front end of the car and told Mr. Bivins, the flagman, that I wanted his lantern a minute. I took it out of his hand, then turned and walked back to where Council was sitting and told him there was to be no more foolishness, that I did not want to hurt him, but he had to go. He replied very insolently that he would not go, and then I grabbed him in the collar and struck him over the head with the lantern. I knocked him out of his seat and pulled him out. He fell to the floor and as he raised up he came toward me, and I let him have it again with the lantern. I hit him several times before I conquered him and then rushed him right out of the car into the darkies' car. He was willing to go by the time I got through with him."

Mr. Brown submitted a motion to dismiss the case. Both sides submitted printed briefs and the hearing ended. The defendants' briefs are two in number: the first maintaining the right of a railroad to classify its passengers on the color line; the second discussing the question of jurisdiction. The complainant's brief, admitting the right of classification, maintains that it is the duty of the railroad to furnish equal facilities and conveniences for the two races.

RECESS IN PUBLIC SESSIONS.

The Interstate Commerce Commission has now cleared its docket of cases assigned for hearing in the present month. It is the purpose of the members of the Commission to take a recess in the month of August, and to resume public duties on September 1, at which date they have assigned a hearing at Rutland, Vt.

(July 29, 1887.)

Re EXPRESS COMPANIES*

T. C. PLATT, President of the United States Express Company, informs the Interstate Commerce Commission that that company will avail itself of the permission of the Commission to present the reasons why it conceives that express companies are not subject to the provisions of the Interstate Commerce Law.

William H. Chandler, General Manager of the Erie Express, notifies the Commission that his company voluntarily comes under the rulings of the Commission and that its schedules are in process of preparation.

(July 30, 1887.)

Re CLASSIFICATION OF RAILROAD FREIGHTS. †

A COMPLAINT has been received by the Commission, signed by Thomas L. Green, Manager of the Merchants' Freight Bureau, of

*See ante, 22, 317.

See ante, 317.

shall furnish such equipment, whether by building, leasing or buying from others, is not a matter for any court's decision.

That a railroad company cannot be compelled to buy or hire from any one particular person or company, nor from every person or company.

That if it fails to furnish suitable and proper equipment, it can be punished.

That in case of such failure the court might, on a proper presentation of the case, have power to order that the company furnish suitable and proper equipment, but could not direct in what manner it procure the same; could not order that it purchase or hire from any particular person or company, or from every one generally.

That the duty of so furnishing the equipment would be imposed on the railroad company, and it must see, at its peril, that it does it properly.

That the method of furnishing the equipment is a matter as fully within the judgment and decision of the company as the kind of oil it uses on its locomotives, or the kind of grease on its car wheels.

And it is submitted that your honorable Commission, even granting that the question of the quality and fitness of the equipment of railroads is within the powers granted to you, and that you have the full powers of a court of equity could go no further.

That if, under those circumstances, you were satisfied that any railroad named in this complaint was not supplied with proper and suitable stock cars, you might order that it supply itself; but that the question of what cars the company got, and whether by hiring from the Burton Company or the Street Company, or by building or buying, must be left to the decision of the railroad company.

The case of *Pullman's Palace Car Co. v. Missouri Pac. R. Co.* 115 U. S. 587 (Bk. 29, L. ed. 499), seems clearly to support this view.

Here it was claimed that the car company, under a certain contract, had a right to have its cars run over the railroad of the defendant, but the court held that the contract did not apply. It was also argued for the car company that the defendant was obliged to haul its cars, aside from any obligation under the contract, and the court said: "It may be, as is also alleged, that it has 'become indispensable, in the conduct of the business of a railroad company, to run on passenger trains, sleeping and drawing room cars, with the conveniences usually afforded by such cars for night travel'; but it by no means follows that the railway is, in law, obliged to arrange with the Pullman Company for such accommodations. According to the bill itself, two such car companies cannot successfully carry on a competing business on the same road, and the custom has been for the Pullman Company, if possible, to contract for the exclusive right. The business is always done under special contracts. These contracts must necessarily vary, according to the special circumstances of each particular case. Certainly it cannot be claimed that a court of chancery is competent to require these companies to enter into such a contract for the furnishing and hauling of Pullman cars, as the court may deem reasonable.

A mere statement of the proposition is sufficient to show that it is untenable."

The case is exactly like other cases of a railroad company hiring cars. A railroad company not having sleeping cars of its own hires such cars from such other person or company and on such terms as it sees fit. As a matter of fact, it generally does so by paying to the lessor a mileage on the cars used. It also hires, as appears by the evidence in this case, such refrigerator, coal, oil, freight, lumber or cattle cars as it may need, usually paying a mileage; but there is nothing to prevent its paying a yearly or monthly rental; and it is not in the power of the courts to say with whom it shall contract, or what kind of a contract it shall make.

By the statutes of the various States by which the companies are chartered, they are required to furnish proper and suitable equipment; and shippers have their full remedy in case of failure or neglect to do so.

The principles laid down and the reasoning in the so-called *Express Cases*, 117 U. S. 1-29 (Bk. 29, L. ed. 791-803), seem to fully sustain this view; and as they say, speaking of the decision in the lower court, and referring to business arrangements between the express companies and the railroad companies, and as can be equally well said as to contracts between railroad companies and other parties for hiring cars, "The court has made an arrangement for the business intercourse of these companies, such as, in its opinion, they ought to have made for themselves, and that we said—in *Atchison etc. R. R. Co. v. Denver etc. R. R. Co.* 110 U. S. 667 (Bk. 28, L. ed. 291), followed at this term in *Pullman's Palace Car Co. v. Missouri Pac. R. Co.* 115 U. S. 587 (Bk. 29, L. ed. 499)—could not be done. The regulation of matters of this kind is legislative in its character, not judicial."

There is no legislative requirement—congressional or State—making it the duty of railroad companies to enter into such contracts with particular parties, or with anyone making a demand for such a contract.

The counsel for the complainant takes the ground that it does not ask that railroads should hire its cars to be used by them for transporting freight over their roads, but simply makes a tender to them of a package of freight to be transported like any other freight package. His proposition is: "I now hold, as a general proposition, that the car is our package, in which shippers who buy it, after we have made it, desire their merchandise to be carried by weight, as everybody else's is carried. And unless it is claimed that there is something inside that is detrimental to the public business of railroads, the railroad has no more right to look into that package for the purpose of rejecting it, and preventing it from passing over the railroad, than they have to look into any other package. What is inside my package, assuming it to be lawful merchandise within, is substantially and exactly none of their business, when they are to carry it at so much a ton."

Let us look at the proposition carefully.

According to this, the car is, by itself, simply a wrapper or crate in which goods are transported. On this basis, let us see what are

the facts in a particular case. A shipper comes to the Chicago, Burlington & Quincy Railroad Company with a load of cattle in his crate, and says: "I want this crate load of cattle sent to Council Bluffs. I want the crate delivered to the Burton Company here again at Chicago, and you must pay that company a rental of so much a mile for each mile, out and back, that the crate is carried."

Or he comes with the crate empty, and says: "I want this crate sent to Council Bluffs, where I will load it with cattle, and send it back to Chicago; You can collect from me the usual freight on a crate of cattle from Council Bluffs to Chicago; and you must pay to the Burton Company a rental for each mile, out and back, that the crate is carried."

We answer: "We have crates enough of our own. We do not want your crate, and can neither afford to pay you for the use of it, nor carry it both ways for one freight."

He answers: "You take the crates of the Lake Shore Railroad Company over your road, and pay them a rental for their use."

We answer: "We do, when we need crates in our business, but we prefer their crates to yours. They are better suited to our business, will carry more than one kind of goods, and yours will not; and so we can get freight on the loads in the crates both ways."

It should be kept clearly in mind that the railroad company gets payment for hauling the freight in the car, not for hauling the car. On the contrary, it is claimed that it should pay the owner for the use of the car.

No matter how you put it, it gets back to the simple demand: "You must haul our car (or use our crate) whenever asked to do so. You must not charge the owner of the freight in such car (or crate) any higher rate than you charge the owner of freight in any other car (or crate); and you must pay us for the use of the car (or crate)."

It is therefore, respectfully submitted that it all turns on the question: Is a railroad company bound to accept, use and pay for all cars and other instrumentalities of railroad traffic offered to it?

If a railroad hires crates for the transportation of pigs, fruits, or baggage from A, and pays him by way of mileage, must it also take B's and pay him a mileage? And if not crates for those purposes, why crates or cars for other purposes?

It should be kept in mind that the additional charge in the tariff is put on instead of making a charge for hauling the empty cars. If the cars are offered to us as so much freight to be carried, we certainly have a right to make a reasonable charge.

The second question is: Has Congress granted, or attempted to grant, by the Interstate Commerce Act, to this Commission, any power to consider or decide upon the quality or fitness of the equipment of railroad companies?

It is respectfully submitted that the only powers of this honorable Commission are those specially granted by this Act, and that the Act must be strictly construed. The Act contains no reference to or suggestion of any power in the Commission to consider or decide upon the quality or fitness of the equipment of railroad companies. If they have it in regard to cars,

they must equally have it as to locomotives, terminal facilities, road bed, brakes, couplers, grease, fuel, and every detail of railroad property and management, and the act would amount to the appointment of a commission to run and manage all the railroads in the United States which do an interstate business, the taking, the spending of the company's money, and the management of its property, out of the hands of the company. Congress has made no attempt to grant such an authority to the Commission, and it may well be doubted whether it could do so.

The next question is: Has not Congress, by the terms of the Act, specifically limited the power of this Commission, so that it cannot give to the cars of others the use of the track of any railroad company, and has no power to make any order in regard to the same?

It is respectfully submitted that it has. By the last clause of the third section of the Act it is provided "That this shall not be construed as requiring any such common carrier to give the use of its tracks or terminal facilities to another carrier engaged in like business."

It was suggested that the Burton Stock Car Company did not come under the terms of this clause, as it was not a "common carrier." As was also suggested before the Commission, this is true, so long as the Burton Company confines its business to the manufacture and selling or leasing of cars; but when it comes to a railroad with its cars loaded or unloaded, and requests that they be carried over such railroad—not as so much freight to be carried—but as a car or vehicle for the transportation of freight over such road, it comes as a common carrier, within the meaning of this section, just as much as a railroad company would which had hired the cars from the Burton Company.

How can it be held otherwise? Take an example: the Lake Shore Company buys ten stock cars from the Burton Company. A train comes over the Lake Shore Road made up of the ten cars of the Burton patent belonging to the Lake Shore Company, and ten cars of the Burton patent belonging to the Burton Company, all twenty cars being loaded with cattle. The Commission clearly cannot order that the Chicago, Burlington & Quincy Railroad Company accept and run over its line the ten cars belonging to the Lake Shore Road. Can they order the Chicago, Burlington & Quincy to take and run over its line the ten cars belonging to the Burton Company? A mere statement of the proposition is sufficient to show that it is untenable.

The fourth question is: Assuming that the Commission has full power to make the order asked for, could it properly do so, having due regard to the whole question? It must be kept in mind that a railroad, considered as a machine for transportation purposes, is a great and delicate machine, requiring the most careful and exact management, in order to do its business in such a way as to satisfy its patrons, and do the business successfully, safely, and profitably; that any interference which will take the management in any of its details out of the hands of the men trained and appointed for that purpose will have a tendency to make the whole machine go wrong; that an order that railroad companies must accept, run, and

pay for all cars mechanically correct and properly constructed, might and would have a tendency to so interfere with the management as to prevent the safe, prompt, proper, and profitable doing of the business railroad companies are called upon to do. It would interfere with the proper discharge of their duties to the public, by requiring the company to haul over its road trains of empty cars which could not be used for the transportation of other freight, and so using up its motive power, and leaving the companies without proper cars at proper places to attend to its necessary traffic, and in a thousand ways taking out of their hands the management of their own business. If, on the other hand, it is ordered that cars of a certain kind and pattern be taken when offered, it should be borne in mind that the car is only a part of the whole great machine; that the car is no more an essential part the safe, speedy, and proper transportation of merchandise or cattle, than the locomotives, signals, road bed, rails, interlocking switches, and many other things used in connection with a railroad; and the Commission must, if it undertakes to determine upon the value or propriety of using a car, also determine upon the value of all other portions of the great machine called a railroad.

In fact, if the Commission can and should order either that all cars offered, or that cars of any particular kind or kinds should be taken, it would work greatly to the injury of both the public and the railroads, and railroads could no more be run on satisfactory bases under such an order than a cotton mill could, were it required to take portions of its machinery for manufacturing from anyone who had, or thought he had, or whom a commission thought had, a piece of machinery fitted for such manufacturing.

The fifth question is: Has the complainant proved any discrimination? The evidence offered showed the following facts:

That railroad companies receive from other companies, and pay mileage for, such cars, freight, cattle, oil, refrigerator, coal, etc., as they need in the transaction of their own business, and such cars only; that when they have cars of their own ready for use, they tranship from cars of others into their own cars, unless the expense of such transhipment is greater than the expense of taking cars of such other person or company; that they never take cars simply on the demand or request of others, but simply when it is to their own advantage, and then under special agreement; that refrigerator, coal, and other special classes of cars are taken from others only when the company has not enough of the same to do their business; that the companies complained of were abundantly supplied with cars to do their cattle business.

Further, the evidence showed that the cars of the complainant were of such construction that they could not be loaded with lumber or steel rails; that the compartments in the Burton car were only sixteen feet long, and that what is called sixteen foot lumber is generally a little over that; that, moreover, the doors of the Burton cars were in the side, so that it would practically be impossible to put the lumber in, even if the compartment was

fully long enough. It was stated that Mr. Stone said that the length of the car was twenty-eight feet, and next that it was thirty feet, and that was the standard, and they do not want any on their road longer than thirty feet.

Mr. Stone made no such statements. His statement in answer to questions on cross examination, was as follows:

Q. State whether the tendency is not to increase the length of stock cars lately.

A. It is, up to thirty-four feet. It used to be twenty-eight.

Q. The needs of commerce and the comfort of the stock have, I suppose, called for that?

A. No sir; two things called for it: the first to make cars more available for general use. The twenty-eight and thirty foot cars were both too short to take in two lengths of sixteen foot lumber, and too short to take in thirty foot steel rails, and in order to get the benefit of return loads of lumber and rails, there were strong reasons for making the car thirty-four feet long, so that it would take two lengths of sixteen foot lumber without going above the 40,000 pounds capacity of the car. Otherwise it was impossible to load it full with lumber and rails.

The evidence further was that a very small percentage of cattle were carried west, and that a very small percentage of these cars could consequently be carried west loaded, but must be taken empty; that, so far as the Chicago, Burlington & Quincy Railroad Company is concerned the western freight consisted mainly of lumber and steel rails, with a good many railroad ties; that of the whole mileage on the Chicago, Burlington & Quincy Railroad, 80 per cent of cars went loaded, and 20 per cent empty, and that of the west bound cars probably 70 to 75 per cent went loaded. Now, taking a case on the Chicago, Burlington & Quincy Railroad; do the facts show discrimination in any form on the present ratio?

A. Burton car is wanted at Council Bluffs, 500 miles from Chicago, for a load of cattle. The car is procured in Chicago and hauled to Council Bluffs empty, the company receiving no pay for such hauling. It is hauled back loaded, and the shipper is charged the tax rate \$70 plus 20 per cent additional, making \$84, which the Chicago, Burlington & Quincy Railroad Company receives for having hauled the car 1,000 miles—500 empty, 500 loaded.

A. Lake Shore Railroad car is hauled from Chicago to Council Bluffs. The rate for that haul on a load of lumber or steel rails is about \$40, but as, say only, 70 per cent of the cars go west loaded, we get an average of \$28 per car. That car is loaded back with cattle, and we get the tariff rate, \$70, making for our total trip \$98. Out of this the Chicago, Burlington & Quincy Railroad Company pays the Lake Shore Company mileage of three fourths of a cent per mile, or, on 1,000 miles, \$7.50, leaving net to the Chicago, Burlington & Quincy Railroad Company, \$90.50, or \$6.50 more than we get on the Burton car.

If, on the contrary, we haul the car, paying the mileage and charging the freight which the complainant requests, we should receive \$70, and should pay out for mileage \$7.50, leaving net on the haul \$62.50, against about \$90 on the common car.

But it is submitted that the tariff rate is not extortionate nor in any sense a discrimination, but is made with the intent of being and is fair and reasonable, and not more than is charged to other persons for doing a like service in transportation, under substantially similar circumstances and conditions; and it is further submitted as a restatement, that:

1. a railroad company is not, in law, bound to use upon its line the cars of another person or company, and pay rent for the same; and that the fact that it does so hire from one or more persons or companies in no way obligates it to hire from others; 2, that under the Interstate Commerce Act, your honorable Commission is in no way authorized to consider or determine upon the quality or fitness of the equipment of railroads; 3, that by and under said Act, your honorable Commission is specifically restricted from ordering that a railroad company give to any common carrier or to this complainant the use of its tracks; 4, that even if full power existed, it would be very unwise and very injurious to the people, as well as to the railroads, to make the order asked for; 5, that on the evidence given, the rate charged to the Burton Stock Car Company and shippers, by its cars, is reasonable and not extortionate, and in no sense a discrimination under the Interstate Act.

In regard to the Chicago, Burlington & Northern Railroad Company, it may be pointed out that no particular case was made, that no evidence was offered that the Burton Company had ever applied to that company to haul any of its cars, loaded or empty; but this point we do not press, as this Company is a party to the classification; and the real question is the general one, as to whether any such order as is asked can or should be made.

Messrs. Samuel Shellabarger, John S. Blair, and John F. Dillon, for the Union Pacific and Missouri Pacific Railway Companies, respondents:

The exact point and substance of the petition of complainant in this case is that the complainant is the owner of certain cars suited to the transportation of cattle and live stock over railroads; that such cars are better adapted for such transportation than the ordinary cars, and their use is sought for and desired by the public; that they are lighter and of easier haul than the ordinary cattle cars; and 100 or more railroad companies allow them to be put upon their lines for said transportation purposes on the usual terms, under which railroads receive and allow three fourths of a cent per mile to the owner of the car, but that the defendant, The Union Pacific, and other companies, have refused to accept the cars of complainant, except upon payment of extortionate terms, unjust to complainant and detrimental to the public.

And the petition expressly relies upon sections 1, 2, and 3 of the Interstate Commerce Act as the ones containing the provisions which defendant is alleged to have violated.

The substance of the provisions bearing on this alleged unjust demand and refusal found in these sections are as follows:

1. Section 1 requires charges, by common carriers subject to the Act, to be "reasonable and just," and declares unlawful all which are "unjust and unreasonable."

INTER S.

2. Section 2 prohibits carriers from charging or receiving "greater or less" compensation for any service from one person than is charged for a like contemporaneous service to "any other person."

3. Section 3 declares it unlawful for the carrier to give "undue or unreasonable preference or advantage to any particular person," etc., "or locality," "or any particular description of traffic," "or to subject any particular person, company, firm, corporation or locality, or any particular description of traffic, to any undue or unreasonable prejudice or disadvantage in any respect whatsoever."

Section 4 requires all such carriers, "according to their respective powers," to "afford all reasonable, proper and equal facilities for the interchange of traffic between their respective lines, and for the receiving, forwarding, and delivering of passengers and property to and from their several lines and those connecting therewith, and shall not discriminate, in their rates and charges, between such connecting lines; but this shall not be construed as requiring any such common carrier to give the use of its tracts or terminal facilities to another carrier engaged in like business."

The exact legal question presented by the present issue and considered in the light of the facts, either conceded or which may be admitted for the sake of the legal point, may be condensed thus:

Do the provisions of the Interstate Commerce Act in sections 1, 2, and 3, or the principles of the common law, oblige these companies to accept from the complainant corporation, a private car manufacturing company and not a common carrier, its manufactures in the shape of cars, and to transport the same over their lines as rolling stock (as distinguished from freight) upon any terms whatever?

Points in reply to this question:

We insist that the answer to this question must be in the negative for the following reasons:

I. The strongest possible view in favor of complainant's contention is that which presents the claim in this light, to wit: that its cars are received on other railroads as part of their trains, and which cars, in process of transportation from State to State, reach connections with the Union Pacific, or some other defendant company, and there demand that complainant's cars shall be received by such company on its line as part of its trains, the same as other cars of like kind are received.

Under this state of facts and conditions of making the demand it is claimed that the position of the complainant is different from that of a manufacturer making cars and taking them to a railroad company and demanding their adoption as part of the lines of the defendant, in this: that in the latter case complainant's cars have become, and is, at the time of the demand, a part of the actual interstate commerce of the country, owing to its coming to the defendant's line in the shape of being part of a train of interstate commerce; and, being thus embodied in such interstate commerce, it cannot be discriminated against.

As already remarked, there is no possible view in favor of the contention of complainant.

stronger than the one just stated; and this contention of complainant is squarely met and overthrown by the express words of section 8 of the Interstate Commerce Act.

This is so because the concluding paragraph of section 8, which is the strongest provision in favor of complainant, is devoted to the requirement, as against carriers subject to the Act, that they shall "afford all reasonable, proper, and equal facilities for the interchange of traffic between their respective lines, and for the receiving, forwarding, and delivering of passengers and property to and from their several lines, and those connecting therewith, and shall not discriminate in their rates and charges between such connecting lines."

It must be carefully observed that this clause is one dealing with "connecting lines," as such, and it is a mandatory prescription of the rule regulating reciprocal facilities and interchanges between such "connecting lines."

After having made this provision commanding reasonable facilities for interchange of traffic between connecting lines, and after prohibiting discriminations in rates and charges between such connecting lines, an express limitation is put upon the character and extent of the rule defining these facilities and interchanges by the controlling words which conclude the section and which are:

"But this shall not be construed as requiring any such common carrier to give the use of its track or terminal facilities to another carrier engaged in like business."

Thus the Statute itself makes it plain and literal, to a demonstration, that no carrier is required "to give the use of its track or terminal facilities to another carrier engaged in like business."

In other words, this clause protects all connecting lines in their right to use their own cars for the purposes of transportation. Of course this right to use its own cars is subject to all the provisions and conditions of the common law and of the statutes requiring the carrier to furnish reasonable facilities for all descriptions of transportation of persons and property. Subject to that general obligation every carrier is, by the last clause of section 8, left in the absolute possession of the right to furnish its own cars for its own lines.

The effect of this provision is to leave all carriers subject to this Law at liberty to make contracts regarding what cars from other lines shall be transported over their lines. Because of the unmistakable character of this last clause of section 8 it would be useless to analyze other provisions of this statute bearing on this point, because, since this closing provision of section 8 cannot be misunderstood, it limits, according to its plain words, and qualifies every other provision in the Law, were there any, favoring the contention of complainant;

II. Owing to the vital importance of this matter, it is proper, however, to present other considerations leading to the same result.

One of these considerations may be stated thus:

These companies, although owing certain duties to the public, are, strictly and to all intents and purposes, private corporations, and as such possess the same dominion over their own property as other like private corporations.

Although this proposition seems quite self evident, yet the supreme court has had repeated occasion to announce this law as applicable to the Union Pacific.

In the case of the *United States v. Union Pac. R. R. Co.* 98 U. S. 618, 619, (Bk. 25, L. ed. 156) this is explicitly and repeatedly laid down by that court. It says, speaking of the Union Pacific:

"It is still a private corporation, the same as other railroad companies, and, like them, subject to the laws of taxation and other laws of the State in which the road lies."

In *Union Pac. R. R. Co. v. Peniston*, 18 Wall. 89 (85 U. S. bk. 21, L. ed. 792), the court is still more emphatic on this point. After stating that the Union Pacific has certain agencies to perform under the laws of its creation, on behalf of the government, the court adds these words regarding the nature of the property rights of the Union Pacific.

"Notwithstanding this the railroad and telegraph lines are neither in whole nor in part, the property of the government. The ownership is in the complainants, a private corporation, though existing for the performance of public duties. The government owns none of its stocks," etc.

III. This brings us, then to the question: What obligations are imposed by the general principles of law upon connecting common carriers touching the matter of receiving the cars of other people upon their lines?

The question here is not whether the railroad lines of this country, generally, including the Union Pacific and Missouri Pacific, are regarded by the Law as public highways in the sense that they should be open to the trains of other connecting railroads, and there was no right in the respective roads to exclude such other trains from their lines.

This is so because the demand here of the complainant is not to be permitted, by its own locomotives, to run its cars over our lines. This demand is, in law, radically different from that. Its demand is that we shall take upon our lines and transport with our own locomotives the cars of other lines, leaving our own cars idle.

We are, therefore, here not troubled with this question (were there any question) as to the right of other companies to occupy our lines with their trains and locomotives.

On the contrary, the exact question is whether, on general principles, there is an obligation, as against the "connecting lines" of railroad, to become the common carriers of other common carriers, they taking up and transporting, in the shapes in which they are tendered to us, the lines of cars brought to us.

IV. The answer to this last question; stated in paragraph III, is explicitly and unmistakably found in the *Express Company Cases*, 117 U. S. 1 (see Bk. 29, L. ed. 793).

The syllabus of those cases is an excellent synopsis of what is decided, and is in these words:

"Railroad companies are not required by usage or by the common law to transport the traffic of independent express companies over their lines in the manner in which such traffic is usually carried and handled.

"Railroad companies are not obliged, either

by the common law or by usage, to do more as express carriers than to provide the public at large with reasonable express accommodations; and they need not, in the absence of a statute, furnish to all independent express companies equal facilities for doing an express business upon their passenger trains."

It will be observed in this case, foot of page 6 (795), that the demand made against the railroad companies was that, in the absence of contracts, the defendant railroads should be decreed by the courts to "transport at all times the express matter, safes, and messengers of the said Southern Express Company by the same trains and with the same accommodations thereon and its depots and stations as it may transport its own express matter or as it may accord to itself."

This was the pith of the contention and the one repudiated by the court.

In that case the court, on page 20 (800), says:

"The controversy in each case is not with the public, but with a single express company. And the real question is not whether the railroad companies are authorized by law to do an express business themselves, nor whether they must carry express matter for the public on their passenger trains in the immediate charge of some person specially appointed for that purpose, nor whether they shall carry express freights for express companies as they carry like freights for the general public, but whether it is their duty to furnish the Adams Company or the Southern Company, facilities for doing an express business upon their roads, the same in all respects as those they provide for themselves or afford to any other express company."

On page 21 (800), the court, in repudiating the contention of the express companies, says:

"It is neither averred in the bill nor shown by the testimony that any railroad company in the United States has ever held itself out as a common carrier of express companies—that is to say, as a common carrier of common carriers."

Again the court says, page 24 (801):

"So long as the public are served to their reasonable satisfaction it is a matter of no importance who serves them. The railroad company performs its whole duty to the public at large and to each individual, when it affords the public all reasonable express accommodations. If this is done, the railroad company owes no duty to the public as to the particular agencies it shall select for that purpose. The public require the carriage, but the company may choose its own appropriate means of carriage, always provided they are such as to insure reasonable promptness and security."

On page 26 (802):

"The exact question, then, is whether these express companies can now demand as a right what they have heretofore had only as by permission. That depends, as is conceded, on whether all railroad companies are now by law charged with the duty of carrying all express companies in the way that express carriers, when taken, are usually carried, just as they are with the duty of carrying all passengers and freights when offered in the way that passengers and freights are carried. The contracts which these companies once had are now out of the way, and the companies at this time possess no other right than such as belong to

any other company or person wishing to do an express business upon these roads. If they are entitled to the relief they ask, it is because it is the duty of the railroad companies to furnish express facilities to all alike who demand them."

Such is the body and effect of this decision, and it is, we submit in legal principle, conclusive against the demand of the complainant in this case, that we shall be obliged to receive in the shapes in which complainant may choose to bring the same to us its lines of cars upon our lines.

To the same point is the case in 115 U. S. 587 (499), where the Pullman Palace Car Company asserted an obligation on the part of the Missouri Pacific Railway Company to haul the cars of the Pullman Company because of the nature of the business in which the latter company was engaged, which consisted "of hiring or otherwise arranging with railway companies to use its cars" under written contracts for a term of years.

The court says, page 597 (502):

"It may be, as is also alleged, that it has become indispensable in the conduct of the business of a railroad company to run on passenger trains sleeping and drawing room cars, with the conveniences usually afforded by such cars for night travel; but it by no means follows that the railway is in law obliged to arrange with the Pullman Company for such accommodations. According to the bill itself, two such car companies cannot successfully carry on a competing business on the same road; and the custom has been for the Pullman Company, if possible, to contract for the exclusive right. The business is always done under special written contracts. These contracts must necessarily vary, according to the special circumstances of each particular case. Certainly, it cannot be claimed that a court of chancery is competent to require these companies to enter into such a contract for the furnishing and hauling of Pullman cars, as the court may deem reasonable. A mere statement of the proposition is sufficient to show that it is untenable."

In the *Atchison etc. R. R. Co. v. Denver etc. R. R. Co.* 110 U. S. 667 (Bk. 28, L. ed. 291), the sections (4 and 6 of article 15) of the Constitution of Colorado, under consideration, were as follows:

"Sec. 4. All railroads shall be public highways and all railroad companies shall be common carriers. Any association or corporation organized for the purpose shall have the right to construct and operate a railroad between any designated points within this State, and connect at the state line with railroads of other States or Territories. Every railroad company shall have the right with its road to intersect, connect with, or cross any other railroad.

"Sec. 6. All individuals, associations, and corporations shall have equal rights to have persons and property transported over any railroad in this State, and no undue or unreasonable discrimination shall be made in charges or facilities for transportation of freight or passengers within this State, and no railroad company, nor any lessee, manager, or employee thereof, shall give any preference to individu-

Cleveland, Columbus, Cincinnati and Indianapolis Railroad Company are members, in which the following rule appears:

"Live Stock in car loads, carriers risk, class 2. Note.—Live stock transported in special or palace live stock cars, not the property of railway companies, will be charged as follows: in cars not exceeding 30 ft. in length internal measurement, 120 per cent of tariff rate. For each additional foot or fraction thereof in excess of 30 feet in length, internal measurement, an additional charge of 8 per cent per foot, or fraction thereof, will be made. For example: live stock in a palace car, 36 ft. in length, internal measurement, will be charged 188 per cent of tariff rate. Live stock in a palace car 40 feet in length, internal measurement, will be charged 150 per cent of tariff rate, it being optional with any railway company to receive cars exceeding 34 feet in length."

This rule is still in force. The Chicago and Alton Railroad Company did not accept the western classification in this respect, but provided by a circular dated May 30, 1887, for a charge of five cents per mile on empty cars, and for ordinary tariff rates on cattle in special cars of 30 feet in length; over 30 and not exceeding 33 feet, 10 per cent additional; and a further charge of 8 per cent for each foot or fraction thereof above 33 feet.

The extra charge to shippers in the western classification above quoted was intended to be in lieu of the former charge of five cents per mile for hauling back empty cars, and was adopted after a suggestion of one of the officials of complainant, to the effect that the public objected to paying tariff rates and five cents additional for the empty cars, and that it would be better to put it in the form of a percentage on the tariff. The Commission does not understand however that complainant thereby acceded to the justice of either charge, but merely that it preferred the one method to the other in case an additional charge was to be enforced.

The traffic in live stock upon the roads leading from the West to Kansas City, Chicago and St. Louis is almost wholly east bound, the west bound shipments being chiefly of fine stock for breeding purposes. It is a matter of material importance to the railroads to be able to get return loads upon cattle cars going back from those cities to the West. The chief opportunities for back loading are found in lumber, steel rails and ties. Lumber cannot conveniently be loaded in the Burton cars. Steel rails also cannot be taken upon those cars, but are at times loaded in ordinary cattle cars through doors placed at the ends for that purpose. Practically the special stock cars are not available for back loading to any considerable extent, upon the roads of the defendant companies.

Upon the foregoing facts one question largely discussed by counsel was as to whether a railroad company is by law required to accept for transportation the cars of complainant, and whether the Commission has authority to direct such cars to be so accepted when tendered in good order, properly constructed, mechanically correct and loaded with live stock.

It was argued by defendants that a railroad company is not bound to accept all cars and other instrumentalities of traffic offered to it,

but on the other hand, is required by the law to provide for itself all equipment necessary for the transaction of its business, and having done this, has performed its duty to the public; and also that the Act to Regulate Commerce contains no suggestion of a power in the Commission to decide upon the quality or fitness of the equipment of railroad companies. It is apparently conceded that the general subject of the safe and proper operation of railroads is within the power of State Legislatures, and of Congress, to regulate within their respective spheres of jurisdiction; a large part of the duties conferred upon some of the existing state railroad commissions is in the supervision of such matters, extending to the safety of bridges and railway, as well as of rolling stock and other instrumentalities and conveniences used in transporting persons and property. But it is claimed that the supervision of interstate commerce in these respects was not contemplated by Congress in the Act under which the Commission is organized, and that no powers have been conferred upon the Commission in that behalf; that the Act regulates the transportation of property, which is called commerce; but that the subject of procuring the adequate means for the transaction of the business of transportation is not commerce, and is not within the jurisdiction of the Commission.

On the other hand the complainant insists that the only way to regulate commerce is by regulating the instrumentalities of commerce; which necessarily includes power to regulate the cars, bridges, heating apparatus, and all other means and appliances by the use of which the interstate commerce is carried on.

The complaint however does not allege a refusal by the defendants or any of them to accept and haul complainant's cars, and the evidence does not disclose any such refusal. On the contrary the evidence clearly shows that most of the defendants publicly announce the terms on which live stock offered for transportation in special cars will be received and transported. For these reasons it is apparent that the question whether defendants are bound to receive complainant's cars is not presented; nor the question whether the Act confers jurisdiction upon the Commission over the instrumentalities of commerce; and no opinion is expressed upon those questions.

In view of the general demand among intelligent shippers for more satisfactory, although more expensive, conveniences for the safe and rapid transportation of live stock, it is scarcely conceivable that any railroad company will deliberately exclude from its lines the improved stock cars which modern invention has introduced, and which are recognized in the official tariffs and classifications of the carriers.

The question presented by the complaint, and the only question properly to be decided here is whether the terms upon which the defendants take the special stock cars are just and reasonable. This question divides itself into two branches:

First, Should the defendants be required to pay three fourths of a cent per mile run to complainant by way of car service?

Second, Is the tariff rate charged shippers for transportation of live stock in special cars a just and reasonable rate?

Upon the first question it is admitted that the defendant carriers refuse to pay to the complainant mileage upon the distance run by complainant's cars over their roads. This refusal is claimed to be an unjust discrimination against the complainant.

As is well known, freight cars belonging to the different railroad companies throughout the land are to a large extent used interchangeably. A record of their mileage when away from home is made the basis of the payment of "car service" at the rate of three fourths of a cent per mile. Of course if the cars of a carrier are used as much away from home as it uses the cars of other roads on its line, the monthly payment for car service will be offset by the amounts received. This is theoretically the nature of the transaction, a matter of mutual convenience which costs neither party anything. The payments and receipts in any one month could not be expected to exactly balance, but if each road has cars sufficient for its use, the result in the long will be very nearly equalized. In view of this fact it is obvious that no great importance attends the making this payment an exact compensation for the use of the cars, and it would not be fair to make it the measure of payment required to be made for the use of cars hired from other persons.

The Burton Stock Car Company does not receive and use the cars belonging to other carriers and there is no possible mutuality in this respect such as exist between carriers exchanging cars in the ordinary way. The Burton Stock Car Company is in no sense a "connecting line," entitled to equal facilities for interchange of traffic under the provisions of the second paragraph of section 3 of the Act to Regulate Commerce. Its counsel insists that it is not a common carrier. When freight is tendered to defendants in loaded cars by other carriers, they have the option to take the car or to reload the freight into their own cars; and the latter course is often pursued when the cost of unloading is less than the car service for the proposed trip. The fact that carriers interchange cars with one another in the manner and on the terms above stated does not entitle the complainant to claim that it is unjustly discriminated against by a refusal to pay it the same rate which carriers adopt as a basis in adjusting their car service accounts with each other. The claim of the Burton Car Company for payment by the railroad companies for the use of its cars is matter of contract and agreement between the parties so far as the proofs before us show, which does not present the feature of unjust discrimination. It seems that some carriers find the use of Burton cars, or of other improved stock cars, to be a service desired and demanded by the public, and are willing to concede to the complainant a reasonable payment for such use. So long as the carriers have no like cars in their own equipment, upon which live stock can be watered and fed without unloading, there is apparent justice in making such compensation. But complainant, which charges and receives from the public two and a half cents per mile for the use of its cars, is not in a position which entitles it to demand an additional three fourths of a cent per mile from the

carrier, upon the ground that the carriers pay that sum to each other upon exchanging cars under the circumstances above stated, and that their refusal to pay the same sum to complainant is an unjust discrimination. Nor is any ground apparent upon which such a payment can be ordered by this Commission.

The other ground of complaint is that the charge made to shippers of live stock is too high.

The extra charge provided for in the western classification is justified by the carriers, upon the ground that the cars have to be taken empty to the point where they ought to be loaded, or returned empty from the point where they are unloaded, while ordinary cars are more susceptible of being loaded in both directions and are often so loaded in fact. This was explained in detail in respect to the Chicago, Burlington & Quincy Railroad, upon which a large proportion of the Company's cattle cars are used in both directions.

It appears to the Commission that the expense of hauling complainant's cars in one direction unloaded, as compared with the greater ability to load back the ordinary cattle cars in use by the defendants, and the fact that a large percentage of the ordinary cattle cars are so back loaded upon the long hauls of the western roads, are considerations which justify a difference in charge against shippers who prefer to hire the improved stock cars for the transportation of their live stock.

The fact that cattle are transported in better condition and with less shrinkage in the special cars, and on that account are worth more at the end of the journey, is not a reason which the carriers can properly make use of as justifying an increased charge; it is in view of this fact that the shippers pay two and a half cents per mile to complainant for the use of its cars; and the legal duties of carriers in respect to all property which they accept for transportation cannot be forgotten.

Nor is the fact that these special stock cars are chiefly used for higher grades of stock a proper ground for additional charge, based upon the kind of car employed in the service. The car is the same whether used for Morgan horses or Texas steers. Any addition to the transportation based upon the value of the article carried is, in part at least, in the nature of an insurance premium paid for the risk, and should be applied to the articles themselves, and not to the vehicles in which they are transported. This is recognized in the amended classification recently filed with the Commission by the joint committee of the trunk lines, in which a maximum value is given upon which the tariff rates are based, and the terms upon which added liability will be assumed for live stock of more than ordinary value are stated in detail. To place an additional burden upon all live stock carried in special stock cars, upon the ground that such cars are often used for fine stock having high value, is obviously unreasonable.

But the question remains whether the additional percentages provided for in the classification constitute a just and reasonable charge to shippers, in consideration of the single fact that the special stock cars usually hauled empty in one direction. The effect of this charge

New York, on behalf of 281 merchants of Michigan, Illinois, Indiana, Ohio, Pennsylvania, and Delaware, that the present classification in use for west bound traffic by the New York Central, Delaware, Lackawanna & Western, Pennsylvania, Baltimore & Ohio, and Erie Railroad Companies, "as regards the unjust differences now made in classification and freight charges between car loads and less than car loads on the same articles between the same points, is in violation of the sections of the Interstate Commerce Law forbidding undue preferences to individuals or localities." The complainants ask for a restoration of the principle of uniform rates without regard to quantity which was in force from the seaboard for twenty years.

Complaints have also been received from Francis H. Leggett & Co., of New York City, against the trunk lines, charging that the present classification in respect of the higher rates charged upon less than car load shipments is in violation of the provisions of the Interstate Commerce Law and petitioning for relief.

Ralph W. THATCHER

v.

FITCHBURG R. R. CO. *et al.**

The complainant, the owner of a grain elevator at Schenectady, N. Y., ships grain from his elevator to Boston, over the roads of the defendant companies. Prior to the Act to Regulate Commerce, the defendants carried complainant's shipments at the proportion of through rates from Chicago to Boston allowed to the lines from Schenectady to Boston, but since the Act took effect they have refused to accept this proportion, on the ground that it would violate the fourth section of the Act, since the rates from other points nearer Boston than Schenectady is, are greater than such proportion would be. The complainant asks that the defendants be compelled to accept such proportion of the through rate. *Held,*

(a) That the complaint, in effect asks from the Commission an order that shall require the defendant roads to receive freights at Schenectady for transportation to Boston, at rates less than are now charged by the same roads for the transportation of like freights to Boston from stations nearer Boston, under substantially similar circumstances and conditions.

(b) That such order, if issued, would require the roads to depart from the general rule laid down in the fourth section of the Act.

(c) That while the Act authorizes the Commission to permit exceptions, it does not authorize it to require exceptions.

(d) That the Commission has not power to make rates generally, but

only to determine whether rates imposed by the railroads are in conflict with the Statute.

(e) That the question whether the rates now charged complainant are excessive is not raised by the complaint.

(f) That the complaint must be dismissed.

(Decided July 25, 1887.)

REPORT AND OPINION OF THE COMMISSION.

Schoonmaker, Commissioner:

The complaint in this case charges, in substance, that the various railroad companies named as defendants, unjustly discriminate against the complainant by refusing to carry grain and flour for the complainant from Schenectady, New York, to Boston and other New England points, at the proportion of all rail rates from Chicago to Boston and the other points reached by through shipments, allowed from Schenectady by the joint tariffs for such through shipments, and demands that all the railroads which participate in the traffic of through lines, which pass Schenectady eastward over the tracks of the Delaware & Hudson Canal Company, shall be required to receive and forward from the Schenectady elevator, possessed and used by complainant, all grain and other merchandise received at said elevator, either by canal or railroad, and shipped to said elevator for the purpose of being forwarded further east over the routes of the defendants and to furnish cars and all needed facilities for transportation of grain, feed, and flour from the Schenectady Elevator & Steam Mills to eastern points, and that they accept as compensation therefor the same amounts of money they severally accept and receive for similar service as parts of the through lines from Chicago.

The answers, in substance, deny the charge of discrimination, and aver that the shipments east from the Schenectady elevator of the complainant are local shipments, and that the defendants have the right and that it is their duty under the Statute, in order to avoid a violation of the long and short haul provision of the fourth section, to charge local rates or rates not less than from Mechanicsville, Greenfield, and other local and more eastern points to Boston.

The Commission finds the facts material to the disposition of the case to be as follows:

The complainant is the proprietor of a valuable elevator and flour mills, at Schenectady, conveniently located adjacent to the Erie Canal, and to the tracks of the Rensselaer & Saratoga Railroad, leased to and operated by the Delaware & Hudson Canal Company, and has for several years, under contract with the Rensselaer & Saratoga Company continued with the Delaware & Hudson Company, had a privilege which has been practically the privilege of shipping grain, feed, and flour from his elevator over the said railroad to and over its connecting roads leading to Boston and other eastern points.

The complainant receives the bulk of his grain from the West transported by water over the lakes and Erie Canal and consigned to him

*See ante, 24, 317, sub nom. *Re Thatcher and Thatcher v. Delaware & Hudson Canal Co.*

at Schenectady, where it is taken into his elevator and retained until he finds a market for it in New England. He also purchases grain locally at and near Schenectady, which is taken indiscriminately like all the other grain received into the same elevator, and for the same purposes. The elevator is also open to the public, and is used to some extent by other persons than complainant, for the transshipment and storage of grain.

Prior to the time the Act to Regulate Commerce took effect the defendant roads all carried complainant's grain, feed, and flour at the proportion of through rates from Chicago to Boston allowed to the lines from Schenectady to Boston. The percentage of those through rates was twenty per cent of the Chicago rate of thirty cents per hundred pounds, or practically six cents per hundred. The subdivision of the Fitchburg Road from Mechanicsville to Boston of this proportion was five cents and seven hundred and seventy eight one thousandths. Since the Act to Regulate Commerce took effect the several roads have refused to accept this proportion from complainant, giving as the reason therefor that it would violate the fourth section of that Act, since the rates from Albany, Troy, Mechanicsville, and North Adams, which are further east and nearer Boston than Schenectady, on the Fitchburg line, are greater than such proportion would be.

The principal shipments from complainant's elevator have been over the Delaware & Hudson Road to Mechanicsville, and thence over the Fitchburg lines to Boston. He makes no shipments by way of Albany over the New York Central and Boston & Albany Roads. The Fitchburg Road now controls the Troy & Boston line and the Boston, Hoosac Tunnel & Western Road. Since the change above stated, the complainant has made no shipments over these lines, on account of the rates.

Upon this statement of facts it is seen that what the complainant asks from the Commission is an order that shall require the several defendant roads to receive freights at his elevator at Schenectady for transportation to Boston and Boston points at rates less than are now charged by the same roads for the transportation of like freights to Boston and Boston points, from stations on the same lines nearer to the points of destination, and the transportation of which freights would, so far as we can now see, be under substantially similar circumstances and conditions. Such an order, if issued, would require the roads to depart from the general rule laid down in the fourth section of the Act to Regulate Commerce. While that Act authorizes the Commission to permit exceptions under some circumstances and conditions indicated by the law, it does not empower the Commission to require exceptions.

This is the only question which is so presented by the complaint that the Commission can pass upon it. It may be truthfully said that the several defendants might avoid any conflict with the fourth section of the Act by reducing their charges to Boston and Boston points from the stations east of Schenectady; but this complaint does not ask the Commission to compel such reduction, nor has any evidence been given or offered which would

enable us to determine what would be proper and just rates from any such stations. It is therefore impossible to fix them in this case, even if the Commission had power to make rates generally, which it has not. Its power in respect to rates is to determine whether those which the roads impose are for any reason in conflict with the statute.

The rates with which complainant finds fault it is not claimed are in conflict with the statute, unless the conflict is found in the fact that they exceed what the roads accept on the through business as their proportion of the rates fixed at distant points. If that is in any sense contrary to the Law, the illegality would not be corrected by compelling the roads to accept upon shipments from Schenectady rates less than are charged from the stations further east. We cannot correct one alleged violation of law by compelling another.

If complainant thinks the rates from Schenectady and intermediate points to Boston and Boston points are excessive, he can raise that question directly and distinctly, and the Commission can then enter upon a full investigation of the facts bearing upon it. But the question is not made here.

It is proper to state that the question whether a proportion of through rates less than the local rates over the same line can lawfully be accepted, is involved in a pending case, and is awaiting further evidence and argument.

The complaint must be dismissed.

In this opinion all concur.

CHICAGO & ALTON R. R. CO.

PENNSYLVANIA CO.*

CHICAGO & ALTON R. R. CO.

PENNSYLVANIA R. R. CO.

CHICAGO, ROCK ISLAND & PACIFIC
R. R. CO.

NEW YORK CENTRAL & HUDSON
RIVER R. R. CO.

1. In the absence of statutory authority one railroad company can sell tickets and check baggage over the road of another company only by agreement; and the Act to Regulate Commerce does not in terms require one railroad company to sell through tickets over the road of another company.
2. Railroad companies may, under their right to control the official conduct of their own agents, forbid their agents to receive commissions from other companies for the sale of tickets over such other companies' roads, and may direct them not to sell tickets over roads of companies which refuse to recognize this corporate authority but which insist on subsidizing such agents. One person or corporation has no right to interfere

with the employees of another, and the Act does not disturb this principle.

3. The practice of one company's paying the agents of another company a commission for selling tickets over the former's road is not reasonable or proper.
4. Hence, held, that the defendant companies, in prohibiting their agents from receiving commissions and in refusing to sell through tickets over the roads of complainants while the latter insist on paying commissions to defendant's agents, have not contravened the provisions of the third section of the Act, which require that railroad companies shall "afford all reasonable, proper and equal facilities" to connecting lines, etc.

(Morrison, C., dissents.)

(Decided July 14, 1887.)

REPORT OF THE COMMISSION.

Schoonmaker, Commissioner:

The complaints in these cases are founded upon the third section of the Act to Regulate Commerce, and charge violations of that section by the defendant companies in refusing certain facilities for receiving, forwarding, and delivering passengers to complainants' lines, consisting of through or coupon tickets, which, being afforded to other and competing companies, give, the complainants allege, undue and unreasonable preference to those companies. The questions involved in these three cases are so similar that they can properly be considered and disposed of together.

The material facts found by the Commission are as follows:

The Pennsylvania Companies, defendants herein, own or control connecting lines of railroad from New York and Philadelphia to Chicago and St. Louis. The New York Central Company, defendant, owns or controls connecting lines from New York to Chicago. Through passenger tickets are sold by the defendants over the routes they control to the terminal points reached by their respective lines. At Chicago the roads of the complainants have their eastern terminus in proximity to the terminus of the defendants' lines, and from there extend westerly to Kansas City and other points. Several other roads, competitors of complainants, also lead from Chicago to Kansas City and other western points, and have substantially similar means of connection with the defendants' lines for the transfer of passengers and baggage.

By mutual arrangement between the various companies whose roads form continuous lines from New York, Philadelphia, and other places on the routes of defendants' roads in New York and Pennsylvania to Kansas City, through or coupon passenger tickets have been sold by the defendant companies at their stations in New York and Pennsylvania, over their own respective lines, to Chicago, and thence to Kansas City, over the roads of the complainants or other such connecting roads as passengers might prefer. For passengers from the West to the East through tickets of a like character have been sold by the complainants and

other companies from Kansas City to points on the roads of the defendants desired to be reached by travelers, in New York, Pennsylvania, or other States. Through tickets of this character with corresponding checking of baggage are a manifest accommodation to travelers and afford material facilities in making long journeys. In the sale of these tickets the company selling them was understood to act as the agent of the other roads over which the traveler might pass on his journey, and each company was deemed responsible to the traveler for its own acts in conveying the holder of the ticket.

For several years prior to the 5th of April, 1887, when the Act to Regulate Commerce took effect, substantially all the railroad companies of the country, including the complainants and defendants, paid commissions varying in amount from two dollars to five dollars a ticket, to the ticket agents of other companies by whom the through tickets were sold. These commissions sometimes aggregated as much as the salaries paid the ticket agents by the companies that employed them. The commissions paid by complainants and some other companies since the first of April last have been fixed by agreement at one dollar a ticket from Chicago to Kansas City.

The defendant companies and some others for about two years have made earnest efforts to abate the practice of paying commissions. The testimony shows that the commissions paid on through tickets have usually amounted to from 20 to 25 per cent of the receipts from such sales, and that the official reports of the companies have concealed this expense and only showed the net receipts from passenger tickets after deducting the commissions.

About a month before the Act to Regulate Commerce became operative the defendant companies took steps to procure agreements with their connecting companies to abolish the commission business altogether.

With this end in view they sent printed circulars, on or about the 15th of March last, to their connecting companies, expressing their willingness to continue to act as agents in the sale of through tickets and stating the nature of the agreement required. The circular of the Pennsylvania Company stated as follows:

"In view of the severe penalties for infractions of the Law neither of these companies can consent to act as agents for your company (if you should desire it to do so) in the issuance and sale of through tickets except upon the following conditions:

"First, your authority to so act.

"Second, your agreement that the proposed joint tariffs will be satisfactory.

"Third, your agreement not to issue or cause to be issued any new forms of through tickets over any of our lines without our formal consent thereto.

"Fourth, your promise not to pay, either directly or indirectly, a commission or any consideration whatsoever to agents or employees of these companies, or to any other person or persons, on account of the purchase or sale of tickets issued by either of these companies at its regular ticket offices or at other places in the territory adjacent thereto.

"Fifth, your agreement to confine your own

issue of tickets and orders for tickets or transportation exclusively to offices immediately on the line of railroad controlled by your own company, thereby permitting us to ticket all passengers over your line or lines, at lawful rates, from all points where either of these companies has a line of railroad and you have none.

If it be your desire, these companies will cheerfully continue to act as agents for your company on and after April 1, 1887, upon similar premises and conditions to those above cited."

The circular of the Pennsylvania Railroad Company was identical in this respect with that of the New York Central Company herein after set forth.

The complainant, the Chicago & Alton Railroad Company, received these circulars signed by the general passenger agents of the Pennsylvania Company, and the Pennsylvania Railroad Company, respectively, and refused to enter into the agreement proposed, claiming the right to continue to pay commissions to the agents of the Pennsylvania Companies, upon their sales of through tickets.

The circular sent by the New York Central Company and the Pennsylvania Railroad Company contained the following statement:

"In view of the severe penalties to be inflicted in cases of violations of the Law, this company cannot consent to act as agent for any other company in the issuance of through tickets, unless notified that it is authorized to so act that the proposed joint tariff will be satisfactory for the time, and that the companies whose authority is thus obtained will refrain from the payment of a commission, drawback, rebate, or any form of consideration to the agents or employees of this company, or to any other person or persons on account of the purchase or sale of this company's issue of tickets in the territory adjacent to our lines."

The complainant, the Chicago, Rock Island & Pacific Railroad Company, received a copy of the circular of the New York Central Company, containing this statement, and refused to consent thereto, claiming the right to continue to pay commissions.

A large preponderance of the companies to which these circulars were addressed, assented to the propositions they contained, and signed agreements to make them effective.

From 70 to 80 per cent of the companies having connections with the Pennsylvania systems agreed to discontinue commissions. Of 234 companies to which the circulars of the New York Central Company were addressed, 215 assented, and only nineteen refused. A large number of other companies in the territory east of the Mississippi and Illinois Rivers and the eastern shore of Lake Michigan, and twenty-nine southern companies, 110 in all, entered into similar agreements. Sixteen companies in the territory named, and three southern companies refused. It also appeared by the complainants' testimony that of 236 roads with which they do business, including all of the New England Roads, all except twelve agree to allow commissions. On account of the refusal of the complainant companies to discontinue the payment of commissions to the agents of the defendant companies, and to

agree to refrain from that practice, the defendants, after the 4th of April last, refused to sell through tickets over the complainants' roads from Chicago and St. Louis to Kansas City, and still refuse, solely for those reasons. They express their willingness to sell through tickets over the complainants' roads whenever they will agree to discontinue commissions upon the defendants' issue of tickets. The defendants continue to sell through tickets over the connecting roads of companies that have assented to the agreements. The testimony does not show that the defendants have knowingly sold through tickets since the 4th of April, over the roads of companies that have refused to enter into the agreements.

On these facts the complainants aver that the defendants refuse to afford to them reasonable, proper, and equal facilities for receiving, forwarding, and delivering passengers, and give undue preference to competing roads, in contravention of the provisions of the Act to Regulate Commerce.

The defendants deny that they have violated the provisions of the Act, and claim that they have the exclusive right to control their own agents, to fix the amount of their compensation and to pay it themselves; that the payment of commissions by other companies is demoralizing to their agents, and often leads to discriminations to passengers for roads paying large commissions, by division of the commission between the agent and the passenger; that commissions consume a considerable percentage of the revenue from the sale of through tickets; that without commissions all connecting roads stand on a basis of equality, and passengers select their own routes uninfluenced by agents having an interest in the form of commissions in persuading them to choose some particular route.

The thirteenth section of the Act to Regulate Commerce provides that for anything done or omitted to be done by any common carrier subject to the provisions of the Act, in contravention of the provisions thereof, application may be made to the Commission by petition, which shall briefly state the facts, and the further proceedings to be taken by the Commission are then specified. This indicates the jurisdiction of the Commission in respect to complaints by persons or corporations for the causes described. The offenses of which the Commission has cognizance are anything done or omitted to be done in contravention of the provisions of the Act.

In the cases under consideration it is necessary that it should reasonably appear that the acts of the defendants of which complaint is made are in contravention of the provisions of the Act. This involves the question whether the Act makes it the duty of the defendants without any agreement or arrangement for the purpose to sell through tickets over the roads of the complainants, and also whether the complainants can insist on paying commissions to the agents of the defendants notwithstanding the opposition of the defendants thereto.

Railroad corporations in the States are creations of the State Governments, and their powers and duties are defined by their charters or by general laws. In the Territories, which

are subject to the exclusive jurisdiction of Congress, railroads may be chartered by the Federal Government or by its authority. The Act to Regulate Commerce does not make it the duty of state railroads to organize and operate through lines of transportation consisting of separate roads owned by different companies. The organization of such lines is left under the Act to the voluntary action of railroad companies, as it existed previously. But when railroad companies associate to constitute through lines for interstate traffic they become agencies of commerce as the courts have adjudged, and in the conduct of the business so assumed, voluntarily subject themselves to the control of Congress under the power contained in the Constitution, "To regulate commerce with foreign Nations and among the several States and with the Indian Tribes." Congressional regulation is necessarily exercised by laws enacted for the purpose, and the extent of the regulation intended is measured by the terms of the law. The law in this instance does not in terms require one railroad company to sell through tickets over the road of another company. It is substantially a reproduction of the corresponding provision of the English Railway and Canal Traffic Act of 1864, under which the English companies claim they were not authorized to sell through tickets over other roads.

In the absence of statutory authority one railroad company can only sell tickets and check baggage over the road of another company by agreement. The English Statute of 1873 amending the Act of 1864 was enacted to give this authority and to make its performance a duty.

That statute so far as material is as follows: "The said facilities to be so afforded are hereby declared to and shall include the due and reasonable receiving, forwarding, and delivering by every railway company and canal company, and railway and canal company, at the request of any other such company, of through traffic to and from the railway or canal of any other such company at through rates, tolls, or fares." As no such provision exists in our statute the decisions of the English Commission and courts relating to through booking, founded on a statute declaring in terms the duty of "through rates, tolls, and fares," under which through booking is mandatory, are not applicable.

By agreement between companies, however, through tickets very properly are sold and used over connecting roads as a convenience of passenger traffic and an inducement for patronage. Such tickets very evidently are a great convenience to travelers, and perhaps to connecting roads, but they are a part of the voluntary arrangements for business purposes, like joint tariffs, interchange of cars, and common use of depots. It being, therefore, under our statute, matter of mutual agreement whether coupon or through tickets shall be sold by a railroad company over roads of other companies, it follows that the form of such tickets and the manner of their sale are also matters of agreement by the companies interested. If companies can agree upon their tariffs, the form of their tickets, and how they

should be sold, they have the right to do so, and by such agreement become interstate carriers; but if they cannot agree the Act does not undertake to coerce them to do business together upon terms that may be justly objectionable or injurious.

It is true as urged by complainants that the third section of the Act requires that "Every common carrier subject to the provisions of the Act shall, according to their respective powers, afford all reasonable proper, and equal facilities for the interchange of traffic between their respective lines, and for the receiving, forwarding, and delivering of passengers and property to and from their several lines, and those connecting therewith, and shall not discriminate in their rates and charges between such connecting lines."

Through tickets are not indispensable for these purposes; but assuming for the sake of the argument that they may be deemed "facilities" for the receiving, forwarding, and delivering of passengers to connecting lines, carriers are only required to afford reasonable, proper and equal facilities. They are not required to afford special, unreasonable, improper, or unequal facilities.

This presents the question whether the payment of commissions is in itself, or as incidental to the enjoyment of a facility, reasonable and proper within the purview of the Statute. The facility of through tickets is equally offered to all and may be enjoyed without commissions. If the company selling the tickets should charge a commission, it would doubtless be regarded as an imposition, and therefore unreasonable and improper. These commissions are gratuities to induce special efforts for the company paying them. If the statute does not give one company authority to subsidize the agents of another company, and if the practice is injurious in its effects, it certainly cannot be reasonable and proper.

The statute does not devote a railroad company of the exclusive right to control its own internal affairs, to employ its own agents, to regulate its own duties, and to pay them such compensation as it may deem proper. The right of ownership of railroad property, with the power to control over employees and management of the property, is as absolutely under the Act as before its passage. The regulation of commerce between the States, which is all that the Act contemplates, does not involve community of property, or joint control of subordinates among the several companies that honor through tickets. The corporate powers of every company, for all administrative and governing purposes within its prescribed sphere, remain unimpaired. With the legitimate exercise of these powers another company has no concern, and no right to interfere.

For the proper government of their own subordinates the defendant companies have forbidden their agents to receive commissions from other companies, and directed them not to sell tickets over roads of companies that refuse to recognize this corporate authority, but insist on subsidizing the agents. In these directions the defendants have not transcended their reasonable rights. One person or corporation

has no right to interfere with the employees of another, and the statute does not disturb this old and sound principle.

The defendants might rest upon their right to control the official conduct of their own agents. But they go further and show by evidence the practical effects of commissions, and that their natural and usual tendencies are to a variety of abuses. A witness of experience and large opportunities for observation testified as follows:

"It is in the articles of the organization of the Pennsylvania Company, and I believe in the organization of the Pennsylvania Railroad, that any officer, no matter who, from president down, shall not be permitted to receive any compensation from any other corporation without a resolution of the board of directors to that effect; and all the salaries and compensation so received are required to be covered into the treasury of the Pennsylvania Company and accounted for. This is done simply for the reason that we do not believe any railroad company can properly conduct its affairs when it permits its agents and employees to receive compensation for doing the same service for other companies. We know we had in our examination of this matter found that some of our ticket agents were receiving a greater amount of commissions from foreign railroad companies than we were paying them salaries, and instead of being our employees they were the employees of the other railroad companies, and so far as our company was concerned we lost control of them entirely."

He further testified that the commissions were paid for two purposes: one was for the purpose of inducing the agent to sell tickets over lines which paid the commission, by paying him a sum of money for so doing, and so large a sum as would enable him to pay a portion of it to the party whose traffic he wished to obtain.

Another witness testified that he had personal knowledge of a great many cases too numerous to be cited where ticket agents had divided the commission with the passenger, thereby constituting a different fare for the same ticket for the same company; that connecting lines give agents of initial companies orders to divide these commissions, contrary, in a great many cases, to the orders of the company by which the agents were employed; that these commissions had been for base purposes and to demoralize the agents.

A practice capable of producing and having a tendency to produce results thus described, cannot be reasonable or proper, and a railroad company is fully justified in the use of all lawful precautions to protect itself and its agents against such invasions of its corporate authority and of its business morality. According to the testimony the defendants are supported in their position on this question by a very large majority of connecting roads showing a decided preponderance of opinion against the practice.

The complainants insist that the payment of commissions is only additional compensation for services rendered by the agents, and that they have the right to pay them.

An officer of one of the complainants in answer to the question, What object is to be ac-

complished by paying an agent commissions by different companies if he has already a full salary from the company which employs him? testified: "I should say to induce him to sell their tickets in the first place, and the next place to explain the routes which lead from one city to another, and that he may be able to make himself advantageous to the passenger who is in New York City who is not posted on the routes west of Chicago."

The claim of the complainants was stated by their counsel as follows: "We simply claim that we have the right to pay anybody for services rendered, and that we have the right to determine whether it shall be by salary or commissions."

The scope of the complainants' position is clearly presented by these statements. It is the distinct assertion of a right of one corporation to employ and pay, for its own interests, an official servant of another corporation to which his service is primarily and exclusively due. A theory of this character ought not to be and is not recognized in business affairs, or in official life. A divided service between many masters cannot be satisfactory to any, and as a rule is injurious to the person so employed.

It follows from these views that the defendant companies, in prohibiting their agents from receiving commissions and in refusing to sell through tickets over the roads of complainants, while they insist on paying commissions to defendants' agents, have not contravened the provisions of the Act. The defendants reasonably and fairly offered to afford all reasonable, proper, and equal facilities for the receiving and delivering of passengers to and from their several lines and those connecting therewith, and did not discriminate in any respect between such connecting lines. In requiring the cessation of commissions to their agents, when entering into business arrangements with connecting roads, the defendants only demanded what was reasonable and proper; and the complainants, by their refusal to refrain from paying commissions on tickets issued by defendants, voluntarily excluded themselves from the reasonable, proper, and equal facilities offered to them in common with all other connecting lines.

The complaints in these several proceedings must therefore be dismissed.

All concur except **Morrison**, Commissioner, who delivered the following dissenting opinion:

The same question is made in these several cases which, for convenience, may be considered as presented in the case of the Chicago & Alton Railroad Company against the Pennsylvania Company.

At Chicago these companies, complainant and defendant, occupy the same depot with the Chicago, Burlington & Quincy Railroad Company, a competitor of the Chicago & Alton Road for Chicago and Kansas City business.

Before the "Act to Regulate Commerce" was passed, the Pennsylvania Company was accustomed to sell through tickets over its line, and the lines of both the Chicago & Alton and Chicago, Burlington & Quincy Railroad Companies. Up to that time it had been the custom of railroad companies, including the par-

ties to this suit, and the said Chicago, Burlington & Quincy Company, to offer and to pay commissions for the sale of tickets over their lines. After the enactment of the said Law, the defendant, assuming the payment of such commissions to be in conflict therewith, refused to continue the sale of tickets over such of its connecting lines (including the complainant's), as might continue to pay or offer to pay commissions. These conditions, upon which the defendant would continue the sale of complainant's tickets, appear above in the circular letter of March 15, 1887, clauses 4 and 5, and to which defendant made its request for prompt reply, "to prevent inconvenience to the traveling public."

The Chicago & Alton Company refused compliance with these conditions and continued to offer commissions to the agents of other companies, including the agents of the defendant. The defendant continued in its refusal to sell through tickets over complainant's line. The Chicago, Burlington & Quincy Company, while continuing to offer commissions to the agents of other companies than the defendant, assented to the conditions of the defendant, and the defendant continued the sale of through tickets over the line of the Chicago, Burlington & Quincy Company.

These facts are undisputed and they present the simple question, whether a common carrier, subject to the provisions of said Act, may withhold from a railroad company and those who wish to use it, the same equal facilities for the "interchange of traffic," and "forwarding and delivery of passengers and property," afforded to a competing line and those who use it, until the prescribed line shall promise not to offer or pay commissions to the agents of the company exacting such promise.

The provision in the third section of the Interstate Law, fixing the duties of companies operating connecting lines, says:

"Every common carrier subject to the provisions of this Act shall, according to their respective powers, afford all reasonable, proper, and equal facilities for the interchange of traffic between their respective lines, and for the receiving, forwarding, and delivery of passengers and property to and from their several lines and those connecting therewith."

By this provision, the operation of through lines with through ticketing and checking of baggage would seem to be, not a matter of agency or agreement dependent on the voluntary action of, or contract between railroad companies, but a public duty imposed by law. So the English Statute on the same subject is construed, and our statute is substantially the English Statute of 1854, as amended in 1873, cited in the report of the Commission above. With the English statutes the English interpretation of their meaning becomes important by a familiar rule of construction. And this view is supported by the 7th section of the Act to Regulate Commerce, the obvious meaning of which is that connecting lines are to be treated as continuous or through lines for the purposes of commerce "among the several States."

The answer of the defendant avers that "It is ready, and has been since the 5th of April, 1887, to instruct its agents to sell tickets over complainant's railway, and to afford the com-

plainant equal facilities with other railway companies in this respect, provided the complainant will cease, as other companies have ceased (including the Chicago, Burlington & Quincy Railroad Company), to offer and to pay commissions, bribes or gratuities to respondent's agents for the sale of tickets." The defendant here virtually admits its refusal to sell tickets over complainant's line to be a refusal of equal facilities, and has admitted it by conceding it to others. It should not, therefore, be allowed to deny the same equal facilities to complainant.

But, waiving the question whether, under the above clause of section 8 of said Act, it is the duty of carriers subject to the provisions of said Act, to furnish to the traveler who demands and is ready to pay for it a through ticket as a "reasonable facility," yet it can hardly be questioned that if the carriers of the country choose to do so as to one connecting line, it must do so as to others. A common carrier may not make discriminations whereby it will afford A a facility if he will take the Chicago, Burlington & Quincy Road, and deny it to B because he will take the Chicago & Alton Road. And this is precisely what the defendant insists it may lawfully do.

The defendant rests the refusal to afford the same equal facilities to the complainant and to those who travel over complainant's line which defendant affords to the Chicago, Burlington & Quincy Company and those who travel over its line, on the refusal of complainant to discontinue payment or the offer of payment of commissions to the agents of other lines, including defendant's, which defendant condemns as an objectionable and demoralizing practice, and which it characterizes as bribes disguised in the form of commissions. It already appears that the defendant, with other common carriers, has long participated in this practice, which is yet very general. In the said Act, pooling, rebates, drawbacks, and all unjust discriminations are declared to be illegal. The paying or offering to pay commissions on the sale of tickets is not. In the ten or more years of the interstate congressional contests these commissions were not mentioned in any bill presented or report made to the House or Senate. But, independent of the legality, or any question of domestic policy as to payment of commissions between the companies whose roads make connecting lines, the public, or so much of the public as may desire to travel over complainant's line, is entitled to that reasonable and equal facility afforded to those who seek the competing line. It is no answer to the public desirous of using railways as a continuous line that there are differences as to the rights of companies among themselves. And so the law is declared in the case of *Hamman v. G. W. R. & Can. Traf. Cases*, 181.

In any view of the case it seems to me that the defendant must sell through tickets to those who want them over the Chicago & Alton Road, as it does over the Chicago, Burlington & Quincy. And I dissent from the views of my associates with greater diffidence, for the reason that this question is presented both as a question of law and of railroad ethics or morals. I would not willingly delay any re-

form in railroad administration, nor hinder the defendant in any well meant effort to reform itself, which is the measure of its present effort, for it only exacts from companies with connecting lines that they shall discontinue the offer of commissions to its own, while they offer them to the agents of all other companies. The payment of commissions may be subject to such abuses as to demand discontinuance; but until declared illegal, they should not be made to excuse common carriers from the performance of obligations to the public, to enforce which obligations was the object of the law creating this Commission.

PROVIDENCE COAL CO.

PROVIDENCE & WORCESTER R. CO.*

1. Defendant railway company published a tariff containing the following: "For the purpose of facilitating quick dispatch of the coal cars of this company, a discount of 10 per cent will be made from the following rates, to any person, firm or company, who shall receive consignments of coal, in any one year, amounting to 30,000 tons or upwards, at any one station on the line of this road. Quick dispatch to be construed as immediate unloading of coal on its arrival at destination." Defendant claimed that this discount was offered to secure, and was conditioned upon, quick dispatch in unloading its coal cars, and that it was a reasonable regulation for the proper conduct of its business.

Held,

(a) That, by the wording of the offer, "quick dispatch" was not made a condition of the offer, and, therefore, it cannot be supported on that ground.

(b) That even if "quick dispatch" were made a condition of the discount, such offer would have neither justice nor reason to support it, as its limitation to consignees receiving a specified number of tons would be an unjust discrimination.

(c) That the offer of discount cannot be supported on the consideration of quantity, on the analogy of the distinction usually made in ordinary business transactions, between wholesale and retail dealers.

2. Defendant railway company has two lines of nearly equal length, one starting from Providence and the other from East Providence, which unite at Valley Falls, whence the main line runs into Massachusetts. The rate charged by defendant on coal shipped at Providence is the same as on coal shipped at East Providence as far as Valley Falls and the next station, but beyond that point the rate on coal from Providence is ten cents per gross ton more than on coal from East Providence.

Held,

*See ante, 316.

(a) That this is an unjust discrimination; that if it is fair and reasonable for the defendant to make the charge to Valley Falls from the two termini the same, there can be no justification for making different rates to stations beyond, based on the fact that the coal comes from one terminus rather than from the other.

(b) That the evidence fails to support the contention of defendant that the extra rate upon coal received at Providence is only a fair equivalent for the additional cost of handling it there.

(c) That under all the circumstances it is not admissible for defendant to impose upon its patrons at Providence, whose investments were made before the East Providence line was constructed, an additional charge because of the inconvenience attending the transaction of its business at that station and for which they are in no way responsible.

3. The defendant railway company had for some time paid the cost of hauling coal shipped by complainant, from complainant's wharf to defendant's freight station in Providence, without any contract obligation to that effect, but now refuses so to do. *Held*, that defendant can not be compelled to continue paying for such hauling; that what defendant did for a time as a favor or by way of encouragement, it might discontinue at pleasure, and that there is nothing in the nature of a binding usage about it.

(Decided July 23, 1887.)

REPORT AND OPINION OF THE COMMISSION.

Cooley, Chairman:

The complainant in this case is a copartnership composed of Henry C. Clark and another, doing business as dealers in coal at Providence, Rhode Island.

The petition by which this proceeding was commenced avers that complainant has its coal yards and wharves and place of business upon what is known as the Dorrance Street Wharf estate upon the westerly side of the Providence River, and lying between said River and Dyer Street, which estate is owned by Henry C. Clark, and in the purchase and improvement of which he has expended large sums of money for the purpose of said business.

That the main line of defendant's road extends from Providence to Worcester, Massachusetts, but it has also a branch road extending from its tide water pier and wharf estate in East Providence, Rhode Island, and connecting with its main line at Valley Falls, and also a branch road extending from its main line at or near its freight depot in Providence across the bridges and through and upon Dyer Street to and connecting with complainant's wharf estate, and with other wharf estates upon the westerly side of the said river, and another branch road extending from the main line at or near its said freight depot across the bridges and through and upon South Water Street in Providence, and connecting with the

wharf estates there, upon the easterly side of the river.

That said Henry C. Clark, when the Dyer Street line of said Railroad was first laid, acting in co-operation with defendant, expended large sums of money in laying rails upon his wharf estate and in making switch tracks connecting the same with said street line, and has also made further expenditures since in maintaining the same, to accommodate and facilitate the transportation of coal and other merchandise to and from said wharf estate over the roads of defendant.

That complainant has thus the facilities for selling coal for shipment over said roads, and for delivery at the various stations thereon, if transportation can be obtained therefor at the same rates of freight that coal is transported at for other parties; but defendant in contravention of complainant's rights and of the provisions of the Act to Regulate Commerce, has issued a tariff of freight rates for coal over its road which practically excludes complainant and many others from selling and delivering coal over and upon the line of its roads, in that, besides making unjust discrimination in favor of shipments consigned to its East Providence wharf by receiving such shipments free of wharfage there, it also gives undue and unreasonable preferences and advantages in making a discount or rebate of 10 per cent to any person, firm or corporation who shall receive consignments of coal in any one year amounting to 30,000 tons or upwards at any one station on the line of the road; it being, as complainant avers, well understood and known that there is but one person on the whole line of the road who, under the unjust discrimination made by the defendant in his favor, has ever received, or in future, under the unjust discrimination made by the published tariff, can receive 30,000 tons of coal in any one year at any one station upon the road, namely: a dealer at Worcester in whose favor, as complainant avers, large and unjust discriminations and undue advantages in rates of freight, drawbacks, allowances and other privileges have for many years past been made by defendant, to the great injury and loss of trade over the road, not only by complainant but other dealers, and at times almost to their entire exclusion therefrom.

That the tariff of published rates is also in contravention of said Act, in that although the distance from the East Providence wharf of defendant to Valley Falls, and to all stations on the line of its road above Valley Falls, is greater than the distance from Providence to the same stations, yet the rates of freight to all of said stations which are above Lonsdale are greater from Providence than from East Providence.

Moreover, all persons, including complainant, shipping coal over said street lines are obliged to pay further sums for street hauling, so-called; that is, for hauling for the distance between their wharves and the freight stations of defendant in Providence, which street hauling was formerly, and as complainant claims should now be, furnished by defendant.

The petition then avers the making of applications to the defendant to modify and cor-

rect its tariffs and the failure of complainant's efforts in that direction; and it prays that defendant may be required to cease and desist from its unlawful, unjust and unreasonable discriminations, preferences and advantages aforesaid, and to make due and proper reparation to complainant for damages sustained.

The answer admits the facts stated in the petition regarding the business of complainant, and proceeds to say that as to the branch railroad on Dyer Street and South Water Street in Providence, defendant owns and has for many years maintained railroad tracks on said streets for the benefit of complainant and other owners and dealers thereon, but that it owns no right of way on either of said streets; that said tracks were laid by permission of the City Council of Providence which controls the mode of maintaining and using the same, and claims the right to cause the tracks to be removed upon reasonable notice without compensation, and that defendant is unable to use steam as a motive power on said tracks, and cars can only be moved thereon by horse power, the tracks constituting what is known as a street or horse railroad. Defendant admits the establishment of a freight tariff as charged, but denies that any unjust discrimination is thereby established or provided for, and further denies that only one person can receive the benefit of the discount offered to a consignee receiving 30,000 tons of coal within a year at any one station, and says it has reason to believe that within the present year not less than three persons will be entitled to such benefit.

Defendant further denies that the tariff makes any unjust discrimination in rates as between the coal taken from Providence and that taken from East Providence to points above Lonsdale, and says that its road was built almost wholly for carrying coal, and defendant was compelled by the City of Providence to build a branch to East Providence by threats to compel the defendant to remove its street tracks and so prevent it from receiving coal at tide water, and that the lower price for carrying coal over said branch railroad is rightful and just, and in no way involves discrimination in favor of one consignee and against another; that owing to the want of proper facilities at its station in Providence, which it is unable to enlarge without the permission of the city—which refuses to grant the same—coal cannot be received at and carried from that station at the same price as from East Providence, and that the difference in the rates given in said tariff is not sufficient to cover the additional expense and risk incurred by defendant in taking coal in Providence instead of taking it at East Providence.

And defendant avers that all its charges are just and reasonable, and that the 30,000 ton provision is so, because it says that the benefit thereof is reciprocal, inasmuch as the consignee entitled to a rebate on the said provision must have supplied all the best facilities for the speedy handling of coal, and thereby enabled defendant to save expense of handling, hauling and delivering his coal, equal to the amount of the rebate, and further that complainant by selling coal to the consignees may

entitle itself to such rebate and therefore is not in any sense injured or discriminated against by said provision.

The case was heard on evidence taken in the main orally at the hearing, and we find the facts to be that Mr. Henry C. Clark, the senior member of the complaining firm, many years ago established a coal yard and wharf in the City of Providence and on Providence River, to be used in connection with the transportation of coal over the road of defendant; that the cost of real estate and improvements for that purpose has been a quarter of a million of dollars; that the complaining firm is now in the possession and occupancy of all of the said real estate and improvements for the purpose of its said business; that the said coal yards and wharf are a considerable distance from the freight station of defendant, and could only be reached by cars over rails laid by defendant along the streets with the co-operation of said Henry C. Clark, and by the consent of the said city authorities; that the city authorities have allowed cars to be drawn through the streets only by horse power, and that for many years defendant paid the expense of the handling of cars from complainant's yard and wharf to defendant's freight station in Providence but never contracted to do so; that the facilities of defendant for transacting its freight business in Providence have long been unsatisfactory and limited, and that defendant, to obtain better facilities, has now constructed a branch road connecting with its main line at Valley Falls six miles from the Providence Station and extending from Valley Falls seven miles to a terminus in East Providence on Providence River across from a little below the wharf of complainant; that defendant since the construction of said branch road had been desirous as far as possible to do its coal business over such branch road, and that it now refuses any longer to be at the expense of handling coal from complainant's wharf through the streets to its Providence Station. Defendant has been in the practice of offering a discount of 10 per cent on the freight paid by consignees receiving some specified quantity at any one station within a year, beginning with a quantity of 5,000 tons, which was increased in 1886 to 20,000 tons, at which quantity only one dealer, whose place of business was Worcester, earned and received the discount. The offer in the tariff taking effect April 4, 1887, was changed as to quantity and reads as follows:

"For the purpose of facilitating quick dispatch of the coal cars of this Company, a discount of 10 per cent will be made from the following rates, to any person, firm or corporation, who shall receive consignments of coal, in any one year, amounting to 80,000 tons or upwards, at any one station on the line of this road.

"Quick dispatch to be construed an immediate unloading of coal on its arrival at destination."

There was no reasonable probability when this tariff was put out that 80,000 tons would be received by any one consignee at more than three places on defendant's road; and it was doubtful if the quantity would be received by any other station than at Worcester, and it

would probably be received by only one dealer there.

In the tariff of rates so put out the charge per gross ton of coal from Providence and East Providence respectively to Valley Falls was made sixty cents; to Lonsdale the first station above it was sixty-five cents; but to the stations further on a difference was made in favor of the coal shipped from East Providence, which difference to all towns beyond the Rhode Island Line was made ten cents per gross ton. The rate for Worcester by the East Providence Line was fixed at \$1 a ton. Complainant endeavored without avail to secure a change in this tariff which should place Providence and East Providence on the same footing, and also to have the offer of discount withdrawn; that offer being thought to give the dealer at Worcester, who had the benefit of the offer in 1886, an advantage which would preclude complainant doing a profitable business. The margin for profit in wholesale dealings in coal is now very small, and may be stated at from ten to fifteen cents per ton.

From the facts as here found the first question of importance that arises concerns the offer by defendant of a 10 per cent discount to any person, firm or corporation who within any one year shall receive consignments of coal aggregating 80,000 tons at any one station. The complainant insists that this is unreasonable discrimination, while defendant, on the other hand, justifies the offer as a reasonable measure of policy in its business.

We have seen above that the published tariff undertakes to state the ground or consideration on which the offer is made. It is "for the purpose of making quick dispatch of the coal cars" of defendant; and the public is told that "quick dispatch" is to be construed an immediate unloading of coal on its arrival at destination. The defendant gave evidence that this immediate unloading of cars was important, but this is so obvious that the evidence was scarcely necessary. It was entirely admissible, therefore, that the defendant should make some regulation or adopt some decisive measures to insure the quick dispatch which seems to have been in mind in making the offer.

When, however, we look at the terms of the offer, we perceive immediately that although the purpose may be to facilitate quick dispatch, the offer is neither expressly nor by any necessary implication made conditional on the quick dispatch being facilitated. It seems to be expected that the parties who accept the offer will be prompt in unloading the coal; but they are put under no obligation to do so by the terms of the offer, and their legal duty in that regard will therefore be no greater than that of any other consignee receiving coal over the road. No promise of quick dispatch is exacted; no performance is made imperative. The authorities of the road, in making the offer, appear to have expected and assumed that any customer of the road, to the extent indicated, would, as a matter of course, and in his own interest, make quick dispatch, and that the attaching to the offer of any condition to that effect would be altogether unnecessary. They therefore attach none. Such being the case, it follows that any customer of the road who should become consignee to the extent

specified would thereby perform the only condition on which the offer is based, so that whether the expectation of quick dispatch was or was not realized, he would be entitled to claim the rebate. No failure in immediate unloading would be an answer to a claim for the discount, when the discount had been offered upon another and distinct condition which had been fully performed.

The answer of the defendant, no more than the published tariff, shows an understanding on the part of the railroad officials that the offer of discount is conditional on quick dispatch. By that pleading we are told that "The consignee entitled to a rebate, under said provision, must have supplied all the best facilities for speedy handling of coal;" but it is not pretended or intimated that the offer requires this, or that anything more than the interest of the consignee, and the requirements of convenience in his business are relied upon to secure this result. Whether the result is secured or not the promise is left to stand on the single condition of quantity; and when the quantity is reached, the promised discount is, by the terms of the offer, due. And this very remarkable consequence might possibly follow if several persons should endeavor to earn the discount, namely: that while a consignee who had received the necessary quantity, but had been blamably negligent in unloading, might then demand and receive the rebate, another who had endeavored to reach the quantity, but had fallen somewhat short, but who all the year had been prompt and punctilious in making quick dispatch, could have no benefit whatever in complying with the only consideration on which the rebate is professedly supported, and for which it purports to be offered.

It is very manifest from this statement, and from the illustration of what might naturally happen, that the pretended consideration is purely imaginary, and that the promise of a discount, so far as regards the consideration on which it purports to be based, is deceptive and misleading. The published tariff is calculated and intended to lead the public to suppose that the offer is based upon a consideration of quick dispatch. But in fact the quick dispatch has no necessary connection with the offer; it is put forth as something confidently expected because of the offer, but it is not required or insisted upon. The defendant has therefore failed, both in its published tariff and in its answer, to show any ground on which its offer can be supported; the mere expectation of a quick dispatch while at the same time such dispatch is not required, being no ground whatever.

If we look into the evidence with a view to satisfy ourselves whether any such offer of discount could reasonably and lawfully have been made on an express condition of quick dispatch, we shall have no difficulty in perceiving that any such conditional offer would have had neither justice nor reason in support of it. The evidence in the case shows beyond question what indeed common observation would teach us without other proof: that a party receiving a much smaller quantity than 30,000 tons, can comply with a condition of quick dispatch as promptly, fully and completely as can any larger dealer. If therefore a discount

were to be offered in order to insure quick dispatch, a discrimination which should so limit the offer that a part of those who could and might desire to accept it would be excluded from its benefits, would for that very reason be unjust and indefensible. The discount in this case must consequently be held supportable neither on the published offer, nor on the statement in the answer, nor, so far as the consideration is concerned, on the evidence; and unless some other support can be found for it, it must be adjudged illegal.

On the argument an effort was made to uphold the discrimination on a consideration of quantity merely; the consignee who should receive more than 30,000 tons in a year at any one station, being likened to a purchaser of goods at wholesale, and the consignee who received a lesser amount being compared to a purchaser at retail. It was said that a distinction in price is universally made as between these two classes of customers, and that distinction would be as reasonable in the case of purchasers of railroad service as in that of purchasers of cloths or lumber.

One difficulty with this argument is that it is an afterthought. The defendant has publicly selected the ground on which it will base the discrimination proposed, and has published it in a paper required of it by law for the purposes of general information. It would be entirely admissible for defendant to change its ground in making a new offer; but the offer now under consideration must stand or fall, on the ground selected for it.

But if this defendant should attempt to make a new offer based upon quantity merely, the analogy between the case and that of wholesale and retail purchasers of merchandise would not be found to be very close. The wholesale dealer is allowed concessions in prices because his transactions in proportion to the amount purchased are fewer in number, they take less of the time and attention of the seller, and it costs him very much less to make them. It is perfectly reasonable that these facts should be taken into account in making bargains. But there is no certainty, and scarcely any probability that the dealer who receives 30,000 tons of coal at some one station within a year will make his business cost less to the railroad company in proportion to quantity than the dealer who receives 35,000 tons only, or 20,000, or half that quantity. Indeed, the selection of 30,000 tons as the test of what should be considered wholesale business would obviously be purely arbitrary, as also would be the naming of any other considerable quantity, say 5,000, or 15,000, or 50,000. The selection of any one of these quantities could be defended on a distinction between wholesale and retail dealings as logically, if not as plausibly, as that of any other; and the evidence in this case shows that defendant in years past has based its offer of discount on a receipt of consignments much below the 30,000 tons now required. The quantity named last year was 20,000 tons; so that on the argument now advanced what was wholesale last year is retail this.

A distinction in rates as between car loads and smaller quantities is readily understood and appreciated; but no such distinction is made in this offer, and a customer of the road

who should receive all his coal by car load or even by train load would be excluded if he fell short in quantity. And some possible results of the offer might be utterly inconsistent with considerations acted upon in wholesale trade. If a consignee, for example, earns the rebate by receiving 30,000 tons at a station to which the freight is a dollar a ton, he pays but \$27,000 for the transportation; but his rival at the same place who reaches to 29,000 tons only, must pay for a less service presumptively accomplished at less cost, and which is of less value to him, \$2,000 more. Such a result could not possibly be defended. The one consignee would be a wholesale dealer as much as the other, and common sense would pronounce unhesitatingly that if the larger charge for carrying the smaller quantity was reasonable, the discount to the other dealer must be without any just or reasonable support.

But when a question of rebates or discounts is under consideration, it might be misleading to consider them in the light of the principles which merchants act upon in the case of wholesale and retail transactions. There is a very manifest difficulty in applying those principles to the conveniences which common carriers furnish to the public, a difficulty which springs from the nature of the duty which such carriers owe to the public. That duty is one of entire partiality of service. The merchant is under no corresponding duty, and may make his rules to suit his own interest, and discriminate as he pleases. There is no occasion to enlarge upon this now.

A discrimination, such as the offer and its acceptance by one or more dealers would create, must have a necessary tendency to destroy the business of small dealers. Under the evidence in the case it appears almost certain that this destruction must result, the margin for profit on wholesale dealings in coal being very small. The discrimination is therefore necessarily unjust within the meaning of the Law. It cannot be supported by the circumstance that the offer is open to all; for although made to all, it is not possible that all should accept. Moreover, in testing such a discrimination we must consider the principle by which it must be supported; and the principle which would support a 30,000 ton limitation would support one of 50,000 or 100,000 equally well; the quantity named would be arbitrary in any case. It might easily be so high as practicably to be open to the largest dealer only. A railroad company, if allowed to do so, might in this way hand over the whole trade on its road in some necessary article of commerce to a single dealer; for it might at will make the discount equal to or greater than the ordinary profit in the trade; and competition by those who could not get the discount would obviously be then out of the question. So extreme a case would not, however, be needful to show the inadmissibility of such a discount as is here offered; the injustice would be equally manifest if several dealers instead of one were able to accept the offer. A railroad company has no right, by any discrimination not grounded in reason, to put any single dealer, whether a large dealer or a small dealer, to any such destructive disadvantage.

In what is said above we do not mean to be

understood as intimating that defendant is not saved something in cost and in labor by having the coal carried by it received in large quantities by single consignees. On the contrary, we readily agree that its service for large dealers is somewhat less in proportion to quantity of freight transported than is the like service performed for small dealers. We also agree that defendant may therefore seem to have an interest in restricting its dealings so far as possible to large dealers. But this is an interest that can only be consulted and acted upon in strict subordination to the rules of law; and one of the most important of those rules is that in any discrimination between dealers justice, if not a paramount consideration, shall at least be kept in view. The carrier cannot regard its own interests exclusively—if it could, it might at pleasure, by methods easily available, drive all small dealers off its line, and center the whole trade in a few hands. The state of things that would result might be altogether for its interest and convenience, since it would then have fewer customers to deal with and fewer transactions for the same aggregate trade; but the wrong would be flagrant. The case suggested is more extreme than the one before us, but the wrong is sufficiently palpable here. And without further comment on this branch of the case it will be sufficient to repeat that when the defendant makes an offer of discount or rebate based on the 30,000 ton limit, the limitation is unreasonable and unlawful, because necessarily resulting in unjust discrimination. There is nothing in the showing in this case to justify the fixing of a limitation as the ground of rebate at any specified quantity; and therefore if the discount is paid to one dealer, the payment will be evidence of the right of all other dealers to a like and proportionate discount.

A further question of importance concerns the difference in defendant's rates on coal shipped to stations on its main line from Providence and East Providence respectively. The facts important to an understanding of this question are that defendant's road was first constructed from Providence through Valley Falls to Worcester, and that complainant, at very great expense to its members, provided itself with land and all necessary requirements for carrying on extensive dealings in coal near the terminus of defendant's road in Providence, and by co-operation with it secured tracks into its yards and to its dock. But defendant's accommodations at Providence were limited and could not be enlarged unless at great expense; the city authorities it is said were disposed to interpose obstacles to such use of the city streets for railroad service as was essential, and defendant found it necessary to construct a new line from Valley Falls to East Providence, where ample accommodations were secured, and where its business could be more conveniently and cheaply conducted. The distance from Providence to Valley Falls is six miles and from East Providence seven. Coal trains are made up at Valley Falls of loaded cars brought from Providence and East Providence without distinction. By the published tariff the rate upon coal from Providence and from East Providence respectively to Valley

are subject to the exclusive jurisdiction of Congress, railroads may be chartered by the Federal Government or by its authority. The Act to Regulate Commerce does not make it the duty of state railroads to organize and operate through lines of transportation consisting of separate roads owned by different companies. The organization of such lines is left under the Act to the voluntary action of railroad companies, as it existed previously. But when railroad companies associate to constitute through lines for interstate traffic they become agencies of commerce as the courts have adjudged, and in the conduct of the business so assumed, voluntarily subject themselves to the control of Congress under the power contained in the Constitution, "To regulate commerce with foreign Nations and among the several States and with the Indian Tribes." Congressional regulation is necessarily exercised by laws enacted for the purpose, and the extent of the regulation intended is measured by the terms of the law. The law in this instance does not in terms require one railroad company to sell through tickets over the road of another company. It is substantially a reproduction of the corresponding provision of the English Railway and Canal Traffic Act of 1854, under which the English companies claim they were not authorized to sell through tickets over other roads.

In the absence of statutory authority one railroad company can only sell tickets and check baggage over the road of another company by agreement. The English Statute of 1873 amending the Act of 1854 was enacted to give this authority and to make its performance a duty.

That statute so far as material is as follows: "The said facilities to be so afforded are hereby declared to and shall include the due and reasonable receiving, forwarding, and delivering by every railway company and canal company, and railway and canal company, at the request of any other such company, of through traffic to and from the railway or canal of any other such company at through rates, tolls, or fares." As no such provision exists in our statute the decisions of the English Commission and courts relating to through booking, founded on a statute declaring in terms the duty of "through rates, tolls, and fares," under which through booking is mandatory, are not applicable.

By agreement between companies, however, through tickets very properly are sold and used over connecting roads as a convenience of passenger traffic and an inducement for patronage. Such tickets very evidently are a great convenience to travelers, and perhaps to connecting roads, but they are a part of the voluntary arrangements for business purposes like joint tariffs, interchange of cars, and common use of depots. It being, therefore, under our statute, matter of mutual agreement whether coupon or through tickets shall be sold by a railroad company over roads of other companies, it follows that the form of such tickets and the manner of their sale are also matters of agreement by the companies interested. If companies can agree upon their tariffs, the form of their tickets, and how they

should be sold, they have the right to do so, and by such agreement become interstate carriers; but if they cannot agree the Act does not undertake to coerce them to do business together upon terms that may be justly objectionable or injurious.

It is true as urged by complainants that the third section of the Act requires that "Every common carrier subject to the provisions of the Act shall, according to their respective powers, afford all reasonable proper, and equal facilities for the interchange of traffic between their respective lines, and for the receiving, forwarding, and delivering of passengers and property to and from their several lines, and those connecting therewith, and shall not discriminate in their rates and charges between such connecting lines."

Through tickets are not indispensable for these purposes; but assuming for the sake of the argument that they may be deemed "facilities" for the receiving, forwarding, and delivering of passengers to connecting lines, carriers are only required to afford reasonable, proper and equal facilities. They are not required to afford special, unreasonable, improper, or unequal facilities.

This presents the question whether the payment of commissions is in itself, or as incidental to the enjoyment of a facility, reasonable and proper within the purview of the Statute. The facility of through tickets is equally offered to all and may be enjoyed without commissions. If the company selling the tickets should charge a commission, it would doubtless be regarded as an imposition, and therefore unreasonable and improper. These commissions are gratuities to induce special efforts for the company paying them. If the statute does not give one company authority to subsidize the agents of another company, and if the practice is injurious in its effects, it certainly cannot be reasonable and proper.

The statute does not deplete a railroad company of the exclusive right to control its own internal affairs, to employ its own agents, to regulate its own duties, and to pay them such compensation as it may deem proper. The right of ownership of railroad property, with the power to control over employees and management of the property, is as absolutely under the Act as before its passage. The regulation of commerce between the States, which is all that the Act contemplates, does not involve community of property, or joint control of subordinates among the several companies that honor through tickets. The corporate powers of every company, for all administrative and governing purposes within its prescribed sphere, remain unimpaired. With the legitimate exercise of these powers another company has no concern, and no right to interfere.

For the proper government of their own subordinates the defendant companies have forbidden their agents to receive commissions from other companies, and directed them not to sell tickets over roads of companies that refuse to recognize this corporate authority, but insist on subsidizing the agents. In these directions the defendants have not transcended their reasonable rights. One person or corporation

has no right to interfere with the employees of another, and the statute does not disturb this old and sound principle.

The defendants might rest upon their right to control the official conduct of their own agents. But they go further and show by evidence the practical effects of commissions, and that their natural and usual tendencies are to a variety of abuses. A witness of experience and large opportunities for observation testified as follows:

"It is in the articles of the organization of the Pennsylvania Company, and I believe in the organization of the Pennsylvania Railroad, that any officer, no matter who, from president down, shall not be permitted to receive any compensation from any other corporation without a resolution of the board of directors to that effect; and all the salaries and compensation so received are required to be covered into the treasury of the Pennsylvania Company and accounted for. This is done simply for the reason that we do not believe any railroad company can properly conduct its affairs when it permits its agents and employees to receive compensation for doing the same service for other companies. We know we had in our examination of this matter found that some of our ticket agents were receiving a greater amount of commissions from foreign railroad companies than we were paying them salaries, and instead of being our employees they were the employees of the other railroad companies, and so far as our company was concerned we lost control of them entirely."

He further testified that the commissions were paid for two purposes: one was for the purpose of inducing the agent to sell tickets over lines which paid the commission, by paying him a sum of money for so doing, and so large a sum as would enable him to pay a portion of it to the party whose traffic he wished to obtain.

Another witness testified that he had personal knowledge of a great many cases too numerous to be cited where ticket agents had divided the commission with the passenger, thereby constituting a different fare for the same ticket for the same company; that connecting lines give agents of initial companies orders to divide these commissions, contrary, in a great many cases, to the orders of the company by which the agents were employed; that these commissions had been for base purposes and to demoralize the agents.

A practice capable of producing and having a tendency to produce results thus described, cannot be reasonable or proper, and a railroad company is fully justified in the use of all lawful precautions to protect itself and its agents against such invasions of its corporate authority and of its business morality. According to the testimony the defendants are supported in their position on this question by a very large majority of connecting roads showing a decided preponderance of opinion against the practice.

The complainants insist that the payment of commissions is only additional compensation for services rendered by the agents, and that they have the right to pay them.

An officer of one of the complainants in answer to the question, What object is to be ac-

complished by paying an agent commissions by different companies if he has already a full salary from the company which employs him? testified: "I should say to induce him to sell their tickets in the first place, and the next place to explain the routes which lead from one city to another, and that he may be able to make himself advantageous to the passenger who is in New York City who is not posted on the routes west of Chicago."

The claim of the complainants was stated by their counsel as follows: "We simply claim that we have the right to pay anybody for services rendered, and that we have the right to determine whether it shall be by salary or commissions."

The scope of the complainants' position is clearly presented by these statements. It is the distinct assertion of a right of one corporation to employ and pay, for its own interests, an official servant of another corporation to which his service is primarily and exclusively due. A theory of this character ought not to be and is not recognized in business affairs, or in official life. A divided service between many masters cannot be satisfactory to any, and as a rule is injurious to the person so employed.

It follows from these views that the defendant companies, in prohibiting their agents from receiving commissions and in refusing to sell through tickets over the roads of complainants, while they insist on paying commissions to defendants' agents, have not contravened the provisions of the Act. The defendants reasonably and fairly offered to afford all reasonable, proper, and equal facilities for the receiving and delivering of passengers to and from their several lines and those connecting therewith, and did not discriminate in any respect between such connecting lines. In requiring the cessation of commissions to their agents, when entering into business arrangements with connecting roads, the defendants only demanded what was reasonable and proper; and the complainants, by their refusal to refrain from paying commissions on tickets issued by defendants, voluntarily excluded themselves from the reasonable, proper, and equal facilities offered to them in common with all other connecting lines.

The complaints in these several proceedings must therefore be dismissed.

All concur except **Morrison, Commissioner**, who delivered the following dissenting opinion:

The same question is made in these several cases which, for convenience, may be considered as presented in the case of the Chicago & Alton Railroad Company against the Pennsylvania Company.

At Chicago these companies, complainant and defendant, occupy the same depot with the Chicago, Burlington & Quincy Railroad Company, a competitor of the Chicago & Alton Road for Chicago and Kansas City business.

Before the "Act to Regulate Commerce" was passed, the Pennsylvania Company was accustomed to sell through tickets over its line, and the lines of both the Chicago & Alton and Chicago, Burlington & Quincy Railroad Companies. Up to that time it had been the custom of railroad companies, including the par-

ties to this suit, and the said Chicago, Burlington & Quincy Company, to offer and to pay commissions for the sale of tickets over their lines. After the enactment of the said Law, the defendant, assuming the payment of such commissions to be in conflict therewith, refused to continue the sale of tickets over such of its connecting lines (including the complainant's), as might continue to pay or offer to pay commissions. These conditions, upon which the defendant would continue the sale of complainant's tickets, appear above in the circular letter of March 15, 1887, clauses 4 and 5, and to which defendant made its request for prompt reply, "to prevent inconvenience to the traveling public."

The Chicago & Alton Company refused compliance with these conditions and continued to offer commissions to the agents of other companies, including the agents of the defendant. The defendant continued in its refusal to sell through tickets over complainant's line. The Chicago, Burlington & Quincy Company, while continuing to offer commissions to the agents of other companies than the defendant, assented to the conditions of the defendant, and the defendant continued the sale of through tickets over the line of the Chicago, Burlington & Quincy Company.

These facts are undisputed and they present the simple question, whether a common carrier, subject to the provisions of said Act, may withhold from a railroad company and those who wish to use it, the same equal facilities for the "interchange of traffic," and "forwarding and delivery of passengers and property," afforded to a competing line and those who use it, until the prescribed line shall promise not to offer or pay commissions to the agents of the company exacting such promise.

The provision in the third section of the Interstate Law, fixing the duties of companies operating connecting lines, says:

"Every common carrier subject to the provisions of this Act shall, according to their respective powers, afford all reasonable, proper, and equal facilities for the interchange of traffic between their respective lines, and for the receiving, forwarding, and delivery of passengers and property to and from their several lines and those connecting therewith."

By this provision, the operation of through lines with through ticketing and checking of baggage would seem to be, not a matter of agency or agreement dependent on the voluntary action of, or contract between railroad companies, but a public duty imposed by law. So the English Statute on the same subject is construed, and our statute is substantially the English Statute of 1854, as amended in 1873, cited in the report of the Commission above. With the English statutes the English interpretation of their meaning becomes important by a familiar rule of construction. And this view is supported by the 7th section of the Act to Regulate Commerce, the obvious meaning of which is that connecting lines are to be treated as continuous or through lines for the purposes of commerce "among the several States."

The answer of the defendant avers that "It is ready, and has been since the 5th of April, 1887, to instruct its agents to sell tickets over complainant's railway, and to afford the com-

plainant equal facilities with other railway companies in this respect, provided the complainant will cease, as other companies have ceased (including the Chicago, Burlington & Quincy Railroad Company), to offer and to pay commissions, bribes or gratuities to respondent's agents for the sale of tickets." The defendant here virtually admits its refusal to sell tickets over complainant's line to be a refusal of equal facilities, and has admitted it by conceding it to others. It should not, therefore, be allowed to deny the same equal facilities to complainant.

But, waiving the question whether, under the above clause of section 8 of said Act, it is the duty of carriers subject to the provisions of said Act, to furnish to the traveler who demands and is ready to pay for it a through ticket as a "reasonable facility," yet it can hardly be questioned that if the carriers of the country choose to do so as to one connecting line, it must do so as to others. A common carrier may not make discriminations whereby it will afford A a facility if he will take the Chicago, Burlington & Quincy Road, and deny it to B because he will take the Chicago & Alton Road. And this is precisely what the defendant insists it may lawfully do.

The defendant rests the refusal to afford the same equal facilities to the complainant and to those who travel over complainant's line which defendant affords to the Chicago, Burlington & Quincy Company and those who travel over its line, on the refusal of complainant to discontinue payment or the offer of payment of commissions to the agents of other lines, including defendant's, which defendant condemns as an objectionable and demoralizing practice, and which it characterizes as bribes disguised in the form of commissions. It already appears that the defendant, with other common carriers, has long participated in this practice, which is yet very general. In the said Act, pooling, rebates, drawbacks, and all unjust discriminations are declared to be illegal. The paying or offering to pay commissions on the sale of tickets is not. In the ten or more years of the interstate congressional contests these commissions were not mentioned in any bill presented or report made to the House or Senate. But, independent of the legality, or any question of domestic policy as to payment of commissions between the companies whose roads make connecting lines, the public, or so much of the public as may desire to travel over complainant's line, is entitled to that reasonable and equal facility afforded to those who seek the competing line. It is no answer to the public desirous of using railways as a continuous line that there are differences as to the rights of companies among themselves. And so the law is declared in the case of *Hammons v. G. W. R. & Can. Traf. Cases*, 181.

In any view of the case it seems to me that the defendant must sell through tickets to those who want them over the Chicago & Alton Road, as it does over the Chicago, Burlington & Quincy. And I dissent from the views of my associates with greater diffidence, for the reason that this question is presented both as a question of law and of railroad ethics or morals. I would not willingly delay any re-

form in railroad administration, nor hinder the defendant in any well meant effort to reform itself, which is the measure of its present effort, for it only exacts from companies with connecting lines that they shall discontinue the offer of commissions to its own, while they offer them to the agents of all other companies. The payment of commissions may be subject to such abuses as to demand discontinuance; but until declared illegal, they should not be made to excuse common carriers from the performance of obligations to the public, to enforce which obligations was the object of the law creating this Commission.

PROVIDENCE COAL CO.

PROVIDENCE & WORCESTER R. CO.*

1. Defendant railway company published a tariff containing the following: "For the purpose of facilitating quick dispatch of the coal cars of this company, a discount of 10 per cent will be made from the following rates, to any person, firm or company, who shall receive consignments of coal, in any one year, amounting to 30,000 tons or upwards, at any one station on the line of this road. Quick dispatch to be construed as immediate unloading of coal on its arrival at destination." Defendant claimed that this discount was offered to secure, and was conditioned upon, quick dispatch in unloading its coal cars, and that it was a reasonable regulation for the proper conduct of its business. *Held,*

(a) That, by the wording of the offer, "quick dispatch" was not made a condition of the offer, and, therefore, it cannot be supported on that ground.

(b) That even if "quick dispatch" were made a condition of the discount, such offer would have neither justice nor reason to support it, as its limitation to consignees receiving a specified number of tons would be an unjust discrimination.

(c) That the offer of discount cannot be supported on the consideration of quantity, on the analogy of the distinction usually made in ordinary business transactions, between wholesale and retail dealers.

2. Defendant railway company has two lines of nearly equal length, one starting from Providence and the other from East Providence, which unite at Valley Falls, whence the main line runs into Massachusetts. The rate charged by defendant on coal shipped at Providence is the same as on coal shipped at East Providence as far as Valley Falls and the next station, but beyond that point the rate on coal from Providence is ten cents per gross ton more than on coal from East Providence. *Held,*

*See ante, 316.

(a) That this is an unjust discrimination; that if it is fair and reasonable for the defendant to make the charge to Valley Falls from the two termini the same, there can be no justification for making different rates to stations beyond, based on the fact that the coal comes from one terminus rather than from the other.

(b) That the evidence fails to support the contention of defendant that the extra rate upon coal received at Providence is only a fair equivalent for the additional cost of handling it there.

(c) That under all the circumstances it is not admissible for defendant to impose upon its patrons at Providence, whose investments were made before the East Providence line was constructed, an additional charge because of the inconvenience attending the transaction of its business at that station and for which they are in no way responsible.

3. The defendant railway company had for some time paid the cost of hauling coal shipped by complainant, from complainant's wharf to defendant's freight station in Providence, without any contract obligation to that effect, but now refuses so to do. *Held,* that defendant can not be compelled to continue paying for such hauling; that what defendant did for a time as a favor or by way of encouragement, it might discontinue at pleasure, and that there is nothing in the nature of a binding usage about it.

(Decided July 23, 1887.)

REPORT AND OPINION OF THE COMMISSION.

Coeley, Chairman:

The complainant in this case is a copartnership composed of Henry C. Clark and another, doing business as dealers in coal at Providence, Rhode Island.

The petition by which this proceeding was commenced avers that complainant has its coal yards and wharves and place of business upon what is known as the Dorrance Street Wharf estate upon the westerly side of the Providence River, and lying between said River and Dyer Street, which estate is owned by Henry C. Clark, and in the purchase and improvement of which he has expended large sums of money for the purpose of said business.

That the main line of defendant's road extends from Providence to Worcester, Massachusetts, but it has also a branch road extending from its tide water pier and wharf estate in East Providence, Rhode Island, and connecting with its main line at Valley Falls, and also a branch road extending from its main line at or near its freight depot in Providence across the bridges and through and upon Dyer Street to and connecting with complainant's wharf estate, and with other wharf estates upon the westerly side of the said river, and another branch road extending from the main line at or near its said freight depot across the bridges and through and upon South Water Street in Providence, and connecting with the

wharf estates there, upon the easterly side of the river.

That said Henry C. Clark, when the Dyer Street line of said Railroad was first laid, acting in co-operation with defendant, expended large sums of money in laying rails upon his wharf estate and in making switch tracks connecting the same with said street line, and has also made further expenditures since in maintaining the same, to accommodate and facilitate the transportation of coal and other merchandise to and from said wharf estate over the roads of defendant.

That complainant has thus the facilities for selling coal for shipment over said roads, and for delivery at the various stations thereon, if transportation can be obtained therefor at the same rates of freight that coal is transported at for other parties; but defendant in contravention of complainant's rights and of the provisions of the Act to Regulate Commerce, has issued a tariff of freight rates for coal over its road which practically excludes complainant and many others from selling and delivering coal over and upon the line of its roads, in that, besides making unjust discrimination in favor of shipments consigned to its East Providence wharf by receiving such shipments free of wharfage there, it also gives undue and unreasonable preferences and advantages in making a discount or rebate of 10 per cent to any person, firm or corporation who shall receive consignments of coal in any one year amounting to 30,000 tons or upwards at any one station on the line of the road; it being, as complainant avers, well understood and known that there is but one person on the whole line of the road who, under the unjust discrimination made by the defendant in his favor, has ever received, or in future, under the unjust discrimination made by the published tariff, can receive 30,000 tons of coal in any one year at any one station upon the road, namely: a dealer at Worcester in whose favor, as complainant avers, large and unjust discriminations and undue advantages in rates of freight, drawbacks, allowances and other privileges have for many years past been made by defendant, to the great injury and loss of trade over the road, not only by complainant but other dealers, and at times almost to their entire exclusion therefrom.

That the tariff of published rates is also in contravention of said Act, in that although the distance from the East Providence wharf of defendant to Valley Falls, and to all stations on the line of its road above Valley Falls, is greater than the distance from Providence to the same stations, yet the rates of freight to all of said stations which are above Lonsdale are greater from Providence than from East Providence.

Moreover, all persons, including complainant, shipping coal over said street lines are obliged to pay further sums for street hauling, so-called; that is, for hauling for the distance between their wharves and the freight stations of defendant in Providence, which street hauling was formerly, and as complainant claims should now be, furnished by defendant.

The petition then avers the making of applications to the defendant to modify and cor-

rect its tariffs and the failure of complainant's efforts in that direction; and it prays that defendant may be required to cease and desist from its unlawful, unjust and unreasonable discriminations, preferences and advantages aforesaid, and to make due and proper reparation to complainant for damages sustained.

The answer admits the facts stated in the petition regarding the business of complainant, and proceeds to say that as to the branch railroad on Dyer Street and South Water Street in Providence, defendant owns and has for many years maintained railroad tracks on said streets for the benefit of complainant and other owners and dealers thereon, but that it owns no right of way on either of said streets; that said tracks were laid by permission of the City Council of Providence which controls the mode of maintaining and using the same, and claims the right to cause the tracks to be removed upon reasonable notice without compensation, and that defendant is unable to use steam as a motive power on said tracks, and cars can only be moved thereon by horse power, the tracks constituting what is known as a street or horse railroad. Defendant admits the establishment of a freight tariff as charged, but denies that any unjust discrimination is thereby established or provided for, and further denies that only one person can receive the benefit of the discount offered to a consignee receiving 30,000 tons of coal within a year at any one station, and says it has reason to believe that within the present year not less than three persons will be entitled to such benefit.

Defendant further denies that the tariff makes any unjust discrimination in rates as between the coal taken from Providence and that taken from East Providence to points above Lonsdale, and says that its road was built almost wholly for carrying coal, and defendant was compelled by the City of Providence to build a branch to East Providence by threats to compel the defendant to remove its street tracks and so prevent it from receiving coal at tide water, and that the lower price for carrying coal over said branch railroad is rightful and just, and in no way involves discrimination in favor of one consignee and against another; that owing to the want of proper facilities at its station in Providence, which it is unable to enlarge without the permission of the city—which refuses to grant the same—coal cannot be received at and carried from that station at the same price as from East Providence, and that the difference in the rates given in said tariff is not sufficient to cover the additional expense and risk incurred by defendant in taking coal in Providence instead of taking it at East Providence.

And defendant avers that all its charges are just and reasonable, and that the 30,000 ton provision is so, because it says that the benefit thereof is reciprocal, inasmuch as the consignee entitled to a rebate on the said provision must have supplied all the best facilities for the speedy handling of coal, and thereby enabled defendant to save expense of handling, hauling and delivering his coal, equal to the amount of the rebate, and further that complainant by selling coal to the consignees may

entitle itself to such rebate and therefore is not in any sense injured or discriminated against by said provision.

The case was heard on evidence taken in the main orally at the hearing, and we find the facts to be that Mr. Henry C. Clark, the senior member of the complaining firm, many years ago established a coal yard and wharf in the City of Providence and on Providence River, to be used in connection with the transportation of coal over the road of defendant; that the cost of real estate and improvements for that purpose has been a quarter of a million of dollars; that the complaining firm is now in the possession and occupancy of all of the said real estate and improvements for the purpose of its said business; that the said coal yards and wharf are a considerable distance from the freight station of defendant, and could only be reached by cars over rails laid by defendant along the streets with the co-operation of said Henry C. Clark, and by the consent of the said city authorities; that the city authorities have allowed cars to be drawn through the streets only by horse power, and that for many years defendant paid the expense of the handling of cars from complainant's yard and wharf to defendant's freight station in Providence but never contracted to do so; that the facilities of defendant for transacting its freight business in Providence have long been unsatisfactory and limited, and that defendant, to obtain better facilities, has now constructed a branch road connecting with its main line at Valley Falls six miles from the Providence Station and extending from Valley Falls seven miles to a terminus in East Providence on Providence River across from a little below the wharf of complainant; that defendant since the construction of said branch road had been desirous as far as possible to do its coal business over such branch road, and that it now refuses any longer to bear the expense of handling coal from complainant's wharf through the streets to its Providence Station. Defendant has been in the practice of offering a discount of 10 per cent on the freight paid by consignees receiving some specified quantity at any one station within a year, beginning with a quantity of 5,000 tons, which was increased in 1886 to 20,000 tons, at which quantity only one dealer, whose place of business was Worcester, earned and received the discount. The offer in the tariff taking effect April 4, 1887, was changed as to quantity and reads as follows:

"For the purpose of facilitating quick dispatch of the coal cars of this Company, a discount of 10 per cent will be made from the following rates, to any person, firm or corporation, who shall receive consignments of coal, in any one year, amounting to 30,000 tons or upwards, at any one station on the line of this road.

"Quick dispatch to be construed an immediate unloading of coal on its arrival at destination."

There was no reasonable probability when this tariff was put out that 30,000 tons would be received by any one consignee at more than three places on defendant's road; and it was doubtful if the quantity would be received by any other station than at Worcester, and it

LESTER S.

would probably be received by only one dealer there.

In the tariff of rates so put out the charge per gross ton of coal from Providence and East Providence respectively to Valley Falls was made sixty cents; to Lonsdale the first station above it was sixty-five cents; but to the stations further on a difference was made in favor of the coal shipped from East Providence, which difference to all towns beyond the Rhode Island Line was made ten cents per gross ton. The rate for Worcester by the East Providence Line was fixed at \$1 a ton. Complainant endeavored without avail to secure a change in this tariff which should place Providence and East Providence on the same footing, and also to have the offer of discount withdrawn; that offer being thought to give the dealer at Worcester, who had the benefit of the offer in 1886, an advantage which would preclude complainant doing a profitable business. The margin for profit in wholesale dealings in coal is now very small, and may be stated at from ten to fifteen cents per ton.

From the facts as here found the first question of importance that arises concerns the offer by defendant of a 10 per cent discount to any person, firm or corporation who within any one year shall receive consignments of coal aggregating 30,000 tons at any one station. The complainant insists that this is unreasonable discrimination, while defendant, on the other hand, justifies the offer as a reasonable measure of policy in its business.

We have seen above that the published tariff undertakes to state the ground or consideration on which the offer is made. It is "for the purpose of making quick dispatch of the coal cars" of defendant; and the public is told that "quick dispatch" is to be construed an immediate unloading of coal on its arrival at destination. The defendant gave evidence that this immediate unloading of cars was important, but this is so obvious that the evidence was scarcely necessary. It was entirely admissible, therefore, that the defendant should make some regulation or adopt some decisive measures to insure the quick dispatch which seems to have been in mind in making the offer.

When, however, we look at the terms of the offer, we perceive immediately that although the purpose may be to facilitate quick dispatch, the offer is neither expressly nor by any necessary implication made conditional on the quick dispatch being facilitated. It seems to be expected that the parties who accept the offer will be prompt in unloading the coal; but they are put under no obligation to do so by the terms of the offer, and their legal duty in that regard will therefore be no greater than that of any other consignee receiving coal over the road. No promise of quick dispatch is exacted; no performance is made imperative. The authorities of the road, in making the offer, appear to have expected and assumed that any customer of the road, to the extent indicated, would, as a matter of course, and in his own interest, make quick dispatch, and that the attaching to the offer of any condition to that effect would be altogether unnecessary. They therefore attach none. Such being the case, it follows that any customer of the road who should become consignee to the extent

specified would thereby perform the only condition on which the offer is based, so that whether the expectation of quick dispatch was or was not realized, he would be entitled to claim the rebate. No failure in immediate unloading would be an answer to a claim for the discount, when the discount had been offered upon another and distinct condition which had been fully performed.

The answer of the defendant, no more than the published tariff, shows an understanding on the part of the railroad officials that the offer of discount is conditional on quick dispatch. By that pleading we are told that "The consignee entitled to a rebate, under said provision, must have supplied all the best facilities for speedy handling of coal;" but it is not pretended or intimated that the offer requires this, or that anything more than the interest of the consignee, and the requirements of convenience in his business are relied upon to secure this result. Whether the result is secured or not the promise is left to stand on the single condition of quantity; and when the quantity is reached, the promised discount is, by the terms of the offer, due. And this very remarkable consequence might possibly follow if several persons should endeavor to earn the discount, namely: that while a consignee who had received the necessary quantity, but had been blamably negligent in unloading, might then demand and receive the rebate, another who had endeavored to reach the quantity, but had fallen somewhat short, but who all the year had been prompt and punctilious in making quick dispatch, could have no benefit whatever in complying with the only consideration on which the rebate is professedly supported, and for which it purports to be offered.

It is very manifest from this statement, and from the illustration of what might naturally happen, that the pretended consideration is purely imaginary, and that the promise of a discount, so far as regards the consideration on which it purports to be based, is deceptive and misleading. The published tariff is calculated and intended to lead the public to suppose that the offer is based upon a consideration of quick dispatch. But in fact the quick dispatch has no necessary connection with the offer; it is put forth as something confidently expected because of the offer, but it is not required or insisted upon. The defendant has therefore failed, both in its published tariff and in its answer, to show any ground on which its offer can be supported; the mere expectation of a quick dispatch while at the same time such dispatch is not required, being no ground whatever.

If we look into the evidence with a view to satisfy ourselves whether any such offer of discount could reasonably and lawfully have been made on an express condition of quick dispatch, we shall have no difficulty in perceiving that any such conditional offer would have had neither justice nor reason in support of it. The evidence in the case shows beyond question what indeed common observation would teach us without other proof: that a party receiving a much smaller quantity than 80,000 tons, can comply with a condition of quick dispatch as promptly, fully and completely as can any larger dealer. If therefore a discount

were to be offered in order to insure quick dispatch, a discrimination which should so limit the offer that a part of those who could and might desire to accept it would be excluded from its benefits, would for that very reason be unjust and indefensible. The discount in this case must consequently be held supportable neither on the published offer, nor on the statement in the answer, nor, so far as the consideration is concerned, on the evidence; and unless some other support can be found for it, it must be adjudged illegal.

On the argument an effort was made to uphold the discrimination on a consideration of quantity merely; the consignee who should receive more than 80,000 tons in a year at any one station, being likened to a purchaser of goods at wholesale, and the consignee who received a lesser amount being compared to a purchaser at retail. It was said that a distinction in price is universally made as between these two classes of customers, and that distinction would be as reasonable in the case of purchasers of railroad service as in that of purchasers of cloths or lumber.

One difficulty with this argument is that it is an afterthought. The defendant has publicly selected the ground on which it will base the discrimination proposed, and has published it in a paper required of it by law for the purposes of general information. It would be entirely admissible for defendant to change its ground in making a new offer; but the offer now under consideration must stand or fall, on the ground selected for it.

But if this defendant should attempt to make a new offer based upon quantity merely, the analogy between the case and that of wholesale and retail purchasers of merchandise would not be found to be very close. The wholesale dealer is allowed concessions in prices because his transactions in proportion to the amount purchased are fewer in number, they take less of the time and attention of the seller, and it costs him very much less to make them. It is perfectly reasonable that these facts should be taken into account in making bargains. But there is no certainty, and scarcely any probability that the dealer who receives 80,000 tons of coal at some one station within a year will make his business cost less to the railroad company in proportion to quantity than the dealer who receives 35,000 tons only, or 20,000, or half that quantity. Indeed, the selection of 80,000 tons as the test of what should be considered wholesale business would obviously be purely arbitrary, as also would be the naming of any other considerable quantity, say 5,000, or 15,000, or 50,000. The selection of any one of these quantities could be defended on a distinction between wholesale and retail dealings as logically, if not as plausibly, as that of any other; and the evidence in this case shows that defendant in years past has based its offer of discount on a receipt of consignments much below the 80,000 tons now required. The quantity named last year was 20,000 tons; so that on the argument now advanced what was wholesale last year is retail this.

A distinction in rates as between car loads and smaller quantities is readily understood and appreciated; but no such distinction is made in this offer, and a customer of the road

who should receive all his coal by car load or even by train load would be excluded if he fell short in quantity. And some possible results of the offer might be utterly inconsistent with considerations acted upon in wholesale trade. If a consignee, for example, earns the rebate by receiving 30,000 tons at a station to which the freight is a dollar a ton, he pays but \$27,000 for the transportation; but his rival at the same place who reaches to 29,000 tons only, must pay for a less service presumptively accomplished at less cost, and which is of less value to him, \$2,000 more. Such a result could not possibly be defended. The one consignee would be a wholesale dealer as much as the other, and common sense would pronounce unhesitatingly that if the larger charge for carrying the smaller quantity was reasonable, the discount to the other dealer must be without any just or reasonable support.

But when a question of rebates or discounts is under consideration, it might be misleading to consider them in the light of the principles which merchants act upon in the case of wholesale and retail transactions. There is a very manifest difficulty in applying those principles to the conveniences which common carriers furnish to the public, a difficulty which springs from the nature of the duty which such carriers owe to the public. That duty is one of entire partiality of service. The merchant is under no corresponding duty, and may make his rules to suit his own interest, and discriminate as he pleases. There is no occasion to enlarge upon this now.

A discrimination, such as the offer and its acceptance by one or more dealers would create, must have a necessary tendency to destroy the business of small dealers. Under the evidence in the case it appears almost certain that this destruction must result, the margin for profit on wholesale dealings in coal being very small. The discrimination is therefore necessarily unjust within the meaning of the Law. It cannot be supported by the circumstance that the offer is open to all; for although made to all, it is not possible that all should accept. Moreover, in testing such a discrimination we must consider the principle by which it must be supported; and the principle which would support a 30,000 ton limitation would support one of 50,000 or 100,000 equally well; the quantity named would be arbitrary in any case. It might easily be so high as practicably to be open to the largest dealer only. A railroad company, if allowed to do so, might in this way hand over the whole trade on its road in some necessary article of commerce to a single dealer; for it might at will make the discount equal to or greater than the ordinary profit in the trade; and competition by those who could not get the discount would obviously be then out of the question. So extreme a case would not, however, be needful to show the inadmissibility of such a discount as is here offered; the injustice would be equally manifest if several dealers instead of one were able to accept the offer. A railroad company has no right, by any discrimination not grounded in reason, to put any single dealer, whether a large dealer or a small dealer, to any such destructive disadvantage.

In what is said above we do not mean to be
INTER S.

understood as intimating that defendant is not saved something in cost and in labor by having the coal carried by it received in large quantities by single consignees. On the contrary, we readily agree that its service for large dealers is somewhat less in proportion to quantity of freight transported than is the like service performed for small dealers. We also agree that defendant may therefore seem to have an interest in restricting its dealings so far as possible to large dealers. But this is an interest that can only be consulted and acted upon in strict subordination to the rules of law; and one of the most important of those rules is that in any discrimination between dealers justice, if not a paramount consideration, shall at least be kept in view. The carrier cannot regard its own interests exclusively—if it could, it might at pleasure, by methods easily available, drive all small dealers off its line, and center the whole trade in a few hands. The state of things that would result might be altogether for its interest and convenience, since it would then have fewer customers to deal with and fewer transactions for the same aggregate trade; but the wrong would be flagrant. The case suggested is more extreme than the one before us, but the wrong is sufficiently palpable here. And without further comment on this branch of the case it will be sufficient to repeat that when the defendant makes an offer of discount or rebate based on the 30,000 ton limit, the limitation is unreasonable and unlawful, because necessarily resulting in unjust discrimination. There is nothing in the showing in this case to justify the fixing of a limitation as the ground of rebate at any specified quantity; and therefore if the discount is paid to one dealer, the payment will be evidence of the right of all other dealers to a like and proportionate discount.

A further question of importance concerns the difference in defendant's rates on coal shipped to stations on its main line from Providence and East Providence respectively. The facts important to an understanding of this question are that defendant's road was first constructed from Providence through Valley Falls to Worcester, and that complainant, at very great expense to its members, provided itself with land and all necessary requirements for carrying on extensive dealings in coal near the terminus of defendant's road in Providence, and by co-operation with it secured tracks into its yards and to its dock. But defendant's accommodations at Providence were limited and could not be enlarged unless at great expense; the city authorities it is said were disposed to interpose obstacles to such use of the city streets for railroad service as was essential, and defendant found it necessary to construct a new line from Valley Falls to East Providence, where ample accommodations were secured, and where its business could be more conveniently and cheaply conducted. The distance from Providence to Valley Falls is six miles and from East Providence seven. Coal trains are made up at Valley Falls of loaded cars brought from Providence and East Providence without distinction. By the published tariff the rate upon coal from Providence and from East Providence respectively to Valley

Falls is the same; sixty cents per gross ton; and it is also made the same to Lonsdale which is the first station above. But to all stations above Lonsdale a higher charge is made from Providence than from East Providence, the difference after the state line is crossed being in every case ten cents per gross ton. This difference is very important to complainant, and necessarily very prejudicial.

It is very evident that if it is fair and reasonable for defendant to make the charge on coal to Valley Falls from the two termini the same, there can be no justification for making different rates to the station beyond, based on the fact that the coal comes from one terminus rather than from the other. The fact that a part of the coal taken from Valley Falls to Worcester was first received by defendant at Providence and another part at East Providence does not in any degree affect the cost or the value of its service in transporting it from Valley Falls on; and a discrimination in rates from Valley Falls based upon the fact that the coal had come from the one terminus instead of the other would have no reason and no justice to support it. The defendant might as well discriminate on the ground of the coal having come from different mines or different dealers. The discrimination made by the defendant's published tariff is therefore presumptively at least without justification.

It is claimed by defendant, however, that the additional cost of doing its business at Providence over the cost at East Providence is fully sufficient to support the difference made in rates, and that the fact of defendant making no difference at Valley Falls and Lonsdale cannot preclude its making them at other points. Passing over this last point for the present as not being one necessarily requiring a decision at this time, we are of opinion that defendant does not justify the making of the additional charge at any station.

The Providence line was first built, and complainant, at very large expense and in co-operation with the defendant, has put itself in position to transact its business there. Defendant because of inconvenience which it will escape has constructed a new line and established a new station where the inconveniences will be less. Its policy now is to force the whole business as much as possible over the new line. We have no doubt its own convenience will thereby be consulted, and the cost of its business somewhat reduced; but there is no evidence before us which would justify us in finding that the additional charge upon the coal received at Providence is only a fair equivalent for the additional cost. On the contrary, we think the increased rate is imposed more from policy than out of regard to additional cost.

But we think also that under all the circumstances it is not admissible for defendant to impose upon its patrons at Providence, whose investments for business with it were made before the East Providence line was constructed, an additional charge because of the inconveniences attending the transaction of its business at that station, and for which they are in no way responsible. These inconveniences are incident to a situation which it is unfortunate the defendant is unable to relieve; but they

cannot justify differences in rates which will force or tend to force the Providence dealers out of business.

As regards the Providence business we think the obligation of defendant is not different now from what it would have been had it constructed for its own convenience a branch road into some other part of the same city. If, for example, it had established a new freight station in Providence, in order that it might have more ample yards, and thus secure greater facilities for its business, it would not have been admissible that upon its shipments to points which were practically the same distance from each station and accessible from each, a difference in rates should be charged when the service was worth no more to its customers and when the reasons for having the two stations concerned its own convenience exclusively. But the establishment of a second station in this case, although in another municipality, and requiring several miles of new line to reach it, was also in the nature of a local convenience in its own business, and should be so considered in the making of rates to points reached from both stations.

Complainant insists that defendant should pay the cost of hauling the coal from the wharf to defendant's freight station in Providence. But we do not think this can be required. It seems that defendant did this formerly, but without any contract obligation to that effect; and probably only by way of encouraging complainant in building up a considerable trade. But what it did for a time as a favor or by way of encouragement, it might discontinue at pleasure. There could be nothing in the nature of a binding usage about it.

Our general conclusion is that complainant is entitled to the relief indicated on the first two grounds of complaint above considered, but not on the third. Order will be entered accordingly.

In this opinion all concur.

ORDER.

This case being at issue upon complaint and answer on file, and having been duly assigned for hearing on the day of _____, 1887, and a hearing having been had upon the pleadings, proofs and arguments of counsel, and the report and opinion of the Commission having been made and filed—wherein the Commission has found as facts that the defendant corporation offers a discount or rebate of 10 per cent from its published rates for the transportation of coal, to all persons who shall receive consignments of coal in any one year amounting to 30,000 tons or upward, at any one station on the line of defendant's road; and also that the charge for the transportation of coal from Providence to stations on defendant's line above Lonsdale is greater than for the transportation of coal from East Providence to such stations respectively; and the Commission having adjudged that the giving or offering to give such discount or rebate is, under the circumstances of this case, in contravention of the provisions of sections 2 and 3 of the Act to Regulate Commerce, unless a like discount or rebate is made to all persons; and that the making of such greater charge for the transportation of coal from Providence is also, under the circumstances of this case, in contravention of the

provisions of said sections of said Act, in so far as it applies to interstate commerce,

Now, It is ordered and adjudged that so much of the prayer of the petition as prays that the complainant be required to cease and desist from the acts above recited be, and the same hereby is, granted; and that the defendant corporation be, and it hereby is, required to cease and desist from said unlawful acts of discrimination, and, within ten days from the date hereof, to modify and correct its published schedules of rates and charges accordingly; and it is further ordered that a notice embodying this order be forthwith sent to the defendant corporation, together with a copy of the report and opinion of the Commission herein, in conformity with the provisions of the fifteenth section of the Act to Regulate Commerce.

Louis LARRISON

CHICAGO & GRAND TRUNK R. CO.

MICHIGAN CENTRAL R. R. CO.

CHICAGO & GRAND TRUNK R. CO.

1. The proviso in section 22 of the Interstate Commerce Act "That nothing in this Act shall apply to * * * the issuance of **milage** * * * **passenger tickets**," applies only to the act of issuing or giving out such tickets; the terms, conditions and circumstances upon which the sale of such tickets is made are subject to and must be in accordance with the Act in its general provision.
2. A sale of **milage tickets** to **commercial travelers** at a certain rate, and refusal to sell to other passengers except at a higher rate, is an **unjust discrimination**, within the meaning of the Act.
3. A **release of liability** by commercial travelers to the railroad company does not constitute a **good and sufficient consideration** for such **discrimination**; nor does the fact that they may influence business in favor of the road, etc.
4. **Common carriers** may continue the issuance of **milage passenger tickets**, the charges for which must be reasonable and just and free from unjust discrimination or unreasonable preference.
5. Persons belonging to the class known as **commercial travelers** are not **privileged to ride over railroads at lower rates than other persons**, and to make a difference in this respect is unjust discrimination; this is true whether tickets issued are **milage tickets** or in some other form.
6. **Neglect on the part of a railroad company to publish rates** for **milage tickets**, is a violation of the Act.

(Decided July 25, 1887.)

15728 8.

REPORT AND OPINION OF THE COMMISSION.

Morrison, Commissioner:

In one of these cases the complainant, Louis Larrison, alleges unjust discrimination and neglect to publish fares, rates and charges for milage tickets; in the other, unjust discrimination is alleged. The two cases were, with consent of the parties, heard together, and, after investigation, the facts are found to be as follows:

The defendant, being the same in both cases, is and was, on the 21st of May, 1887, a common carrier of passengers on its railroad from Port Huron, in the State of Michigan, into and through the State of Indiana to the City of Chicago, in the State of Illinois, and was then offering to sell and selling, for \$20, to the class of persons known as commercial travelers, milage tickets, entitling the holder to transportation to the extent of 1,000 miles over its road between said States.

The complainant, Larrison, having occasion to travel on defendant's road between said States, applied on the 21st of May, 1887, at the proper office of the defendant in the City of Detroit, to purchase one of said "thousand mile tickets," offering in payment therefor the sum of \$20. The defendant refused to sell this complainant such ticket for less than \$25, alleging as a reason therefor, as was the fact, that complainant, Larrison, did not belong to the class of persons known as commercial travelers, to which alone defendant sold said tickets for the price of \$20.

The schedule of defendant, kept in its office in said City of Detroit, purporting to show the rates, fares and charges it had established and which were in force May 21, 1887, did not show the rates, fares and charges which it had established and were in force for carrying passengers who purchased milage tickets which it then kept and was offering for sale; but since this complaint was made defendant has caused its schedules of rates, fares and charges to be so amended as to show the rates at which it sells milage tickets.

The other complainant, the Michigan Central Railroad Company, owns and operates a railroad extending from the City of Detroit, in the State of Michigan, into and through the State of Indiana, to Chicago, in the State of Illinois, and is a common carrier of passengers between said States; and, while the defendant was offering to sell and selling to commercial travelers thousand mile tickets for \$20 and refusing to sell for less than \$25 like tickets to persons not commercial travelers, this complainant was selling such thousand mile tickets for \$25 to the public generally, without discrimination in favor of any person or class of persons. And as such common carrier of passengers between said States, this complainant and the defendant are competitors.

The answer of defendant admits the facts as found above, but avers that nothing alleged against the defendant company is in conflict with the Act to Regulate Commerce, because at the date of the passage of said Act the railway companies of the country generally, including the defendant and the complainant companies, were and for many years prior thereto had been doing the things now complained of;

New York, on behalf of 281 merchants of Michigan, Illinois, Indiana, Ohio, Pennsylvania, and Delaware, that the present classification in use for west bound traffic by the New York Central, Delaware, Lackawanna & Western, Pennsylvania, Baltimore & Ohio, and Erie Railroad Companies, "as regards the unjust differences now made in classification and freight charges between car loads and less than car loads on the same articles between the same points, is in violation of the sections of the Interstate Commerce Law forbidding undue preferences to individuals or localities." The complainants ask for a restoration of the principle of uniform rates without regard to quantity which was in force from the seaboard for twenty years.

Complaints have also been received from Francis H. Leggett & Co., of New York City, against the trunk lines, charging that the present classification in respect of the higher rates charged upon less than car load shipments is in violation of the provisions of the Interstate Commerce Law and petitioning for relief.

Ralph W. THATCHER

v.

FITCHBURG R. R. CO. *et al.**

The complainant, the owner of a grain elevator at Schenectady, N. Y., ships grain from his elevator to Boston, over the roads of the defendant companies. Prior to the Act to Regulate Commerce, the defendants carried complainant's shipments at the proportion of through rates from Chicago to Boston allowed to the lines from Schenectady to Boston, but since the Act took effect they have refused to accept this proportion, on the ground that it would violate the fourth section of the Act, since the rates from other points nearer Boston than Schenectady is, are greater than such proportion would be. The complaint asks that the defendants be compelled to accept such proportion of the through rate. *Held,*

(a) That the complaint, in effect asks from the Commission an order that shall require the defendant roads to receive freights at Schenectady for transportation to Boston, at rates less than are now charged by the same roads for the transportation of like freights to Boston from stations nearer Boston, under substantially similar circumstances and conditions.

(b) That such order, if issued, would require the roads to depart from the general rule laid down in the fourth section of the Act.

(c) That while the Act authorizes the Commission to permit exceptions, it does not authorize it to require exceptions.

(d) That the Commission has not power to make rates generally, but

only to determine whether rates imposed by the railroads are in conflict with the Statute.

(e) That the question whether the rates now charged complainant are excessive is not raised by the complaint.

(f) That the complaint must be dismissed.

(Decided July 25, 1887.)

REPORT AND OPINION OF THE COMMISSION.

Schoonmaker, Commissioner:

The complaint in this case charges, in substance, that the various railroad companies named as defendants, unjustly discriminate against the complainant by refusing to carry grain and flour for the complainant from Schenectady, New York, to Boston and other New England points, at the proportion of all rail rates from Chicago to Boston and the other points reached by through shipments, allowed from Schenectady by the joint tariffs for such through shipments, and demands that all the railroads which participate in the traffic of through lines, which pass Schenectady eastward over the tracks of the Delaware & Hudson Canal Company, shall be required to receive and forward from the Schenectady elevator, possessed and used by complainant, all grain and other merchandise received at said elevator, either by canal or railroad, and shipped to said elevator for the purpose of being forwarded further east over the routes of the defendants and to furnish cars and all needed facilities for transportation of grain, feed, and flour from the Schenectady Elevator & Steam Mills to eastern points, and that they accept as compensation therefor the same amounts of money they severally accept and receive for similar service as parts of the through lines from Chicago.

The answers, in substance, deny the charge of discrimination, and aver that the shipments east from the Schenectady elevator of the complainant are local shipments, and that the defendants have the right and that it is their duty under the Statute, in order to avoid a violation of the long and short haul provision of the fourth section, to charge local rates or rates not less than from Mechanicsville, Greenfield, and other local and more eastern points to Boston.

The Commission finds the facts material to the disposition of the case to be as follows:

The complainant is the proprietor of a valuable elevator and flour mills, at Schenectady, conveniently located adjacent to the Erie Canal, and to the tracks of the Rensselaer & Saratoga Railroad, leased to and operated by the Delaware & Hudson Canal Company, and has for several years, under contract with the Rensselaer & Saratoga Company continued with the Delaware & Hudson Company, had a privilege which has been practically the privilege of shipping grain, feed, and flour from his elevator over the said railroad to and over its connecting roads leading to Boston and other eastern points.

The complainant receives the bulk of his grain from the West transported by water over the lakes and Erie Canal and consigned to him

*See ante, 24, 317, sub nom. *Re Thatcher and Thatcher v. Delaware & Hudson Canal Co.*

at Schenectady, where it is taken into his elevator and retained until he finds a market for it in New England. He also purchases grain locally at and near Schenectady, which is taken indiscriminately like all the other grain received into the same elevator, and for the same purposes. The elevator is also open to the public, and is used to some extent by other persons than complainant, for the transshipment and storage of grain.

Prior to the time the Act to Regulate Commerce took effect the defendant roads all carried complainant's grain, feed, and flour at the proportion of through rates from Chicago to Boston allowed to the lines from Schenectady to Boston. The percentage of those through rates was twenty per cent of the Chicago rate of thirty cents per hundred pounds, or practically six cents per hundred. The subdivision of the Fitchburg Road from Mechanicsville to Boston of this proportion was five cents and seven hundred and seventy eight one thousandths. Since the Act to Regulate Commerce took effect the several roads have refused to accept this proportion from complainant, giving as the reason therefor that it would violate the fourth section of that Act, since the rates from Albany, Troy, Mechanicsville, and North Adams, which are further east and nearer Boston than Schenectady, on the Fitchburg line, are greater than such proportion would be.

The principal shipments from complainant's elevator have been over the Delaware & Hudson Road to Mechanicsville, and thence over the Fitchburg lines to Boston. He makes no shipments by way of Albany over the New York Central and Boston & Albany Roads. The Fitchburg Road now controls the Troy & Boston line and the Boston, Hoosac Tunnel & Western Road. Since the change above stated, the complainant has made no shipments over these lines, on account of the rates.

Upon this statement of facts it is seen that what the complainant asks from the Commission is an order that shall require the several defendant roads to receive freights at his elevator at Schenectady for transportation to Boston and Boston points at rates less than are now charged by the same roads for the transportation of like freights to Boston and Boston points, from stations on the same lines nearer to the points of destination, and the transportation of which freights would, so far as we can now see, be under substantially similar circumstances and conditions. Such an order, if issued, would require the roads to depart from the general rule laid down in the fourth section of the Act to Regulate Commerce. While that Act authorizes the Commission to permit exceptions under some circumstances and conditions indicated by the law, it does not empower the Commission to require exceptions.

This is the only question which is so presented by the complaint that the Commission can pass upon it. It may be truthfully said that the several defendants might avoid any conflict with the fourth section of the Act by reducing their charges to Boston and Boston points from the stations east of Schenectady; but this complaint does not ask the Commission to compel such reduction, nor has any evidence been given or offered which would

EXTRA 8.

enable us to determine what would be proper and just rates from any such stations. It is therefore impossible to fix them in this case, even if the Commission had power to make rates generally, which it has not. Its power in respect to rates is to determine whether those which the roads impose are for any reason in conflict with the statute.

The rates with which complainant finds fault it is not claimed are in conflict with the statute, unless the conflict is found in the fact that they exceed what the roads accept on the through business as their proportion of the rates fixed at distant points. If that is in any sense contrary to the Law, the illegality would not be corrected by compelling the roads to accept upon shipments from Schenectady rates less than are charged from the stations further east. We cannot correct one alleged violation of law by compelling another.

If complainant thinks the rates from Schenectady and intermediate points to Boston and Boston points are excessive, he can raise that question directly and distinctly, and the Commission can then enter upon a full investigation of the facts bearing upon it. But the question is not made here.

It is proper to state that the question whether a proportion of through rates less than the local rates over the same line can lawfully be accepted, is involved in a pending case, and is awaiting further evidence and argument.

The complaint must be dismissed.

In this opinion all concur.

CHICAGO & ALTON R. R. CO.

PENNSYLVANIA CO.*

CHICAGO & ALTON R. R. CO.

PENNSYLVANIA R. R. CO.

CHICAGO, ROCK ISLAND & PACIFIC
R. R. CO.

NEW YORK CENTRAL & HUDSON
RIVER R. R. CO.

1. In the absence of statutory authority one railroad company can sell tickets and check baggage over the road of another company only by agreement; and the Act to Regulate Commerce does not in terms require one railroad company to sell through tickets over the road of another company.
2. Railroad companies may, under their right to control the official conduct of their own agents, forbid their agents to receive commissions from other companies for the sale of tickets over such other companies' roads, and may direct them not to sell tickets over roads of companies which refuse to recognize this corporate authority but which insist on subsidizing such agents. One person or corporation has no right to interfere

with the employees of another, and the Act does not disturb this principle.

3. The practice of one company's paying the agents of another company a commission for selling tickets over the former's road is not reasonable or proper.
4. Hence, *held*, that the defendant companies, in prohibiting their agents from receiving commissions and in refusing to sell through tickets over the roads of complainants while the latter insist on paying commissions to defendant's agents, have not contravened the provisions of the third section of the Act, which require that railroad companies shall "afford all reasonable, proper and equal facilities" to connecting lines, etc.

(*Morrison, C., dissents.*)

(Decided July 14, 1887.)

REPORT OF THE COMMISSION.

Schoonmaker, Commissioner:

The complaints in these cases are founded upon the third section of the Act to Regulate Commerce, and charge violations of that section by the defendant companies in refusing certain facilities for receiving, forwarding, and delivering passengers to complainants' lines, consisting of through or coupon tickets, which, being afforded to other and competing companies, give, the complainants allege, undue and unreasonable preference to those companies. The questions involved in these three cases are so similar that they can properly be considered and disposed of together.

The material facts found by the Commission are as follows:

The Pennsylvania Companies, defendants herein, own or control connecting lines of railroad from New York and Philadelphia to Chicago and St. Louis. The New York Central Company, defendant, owns or controls connecting lines from New York to Chicago. Through passenger tickets are sold by the defendants over the routes they control to the terminal points reached by their respective lines. At Chicago the roads of the complainants have their eastern termini in proximity to the termini of the defendants' lines, and from there extend westerly to Kansas City and other points. Several other roads, competitors of complainants, also lead from Chicago to Kansas City and other western points, and have substantially similar means of connection with the defendants' lines for the transfer of passengers and baggage.

By mutual arrangement between the various companies whose roads form continuous lines from New York, Philadelphia, and other places on the routes of defendants' roads in New York and Pennsylvania to Kansas City, through or coupon passenger tickets have been sold by the defendant companies at their stations in New York and Pennsylvania, over their own respective lines, to Chicago, and thence to Kansas City, over the roads of the complainants or other such connecting roads as passengers might prefer. For passengers from the West to the East through tickets of a like character have been sold by the complainants and

other companies from Kansas City to points on the roads of the defendants desired to be reached by travelers, in New York, Pennsylvania, or other States. Through tickets of this character with corresponding checking of baggage are a manifest accommodation to travelers and afford material facilities in making long journeys. In the sale of these tickets the company selling them was understood to act as the agent of the other roads over which the traveler might pass on his journey, and each company was deemed responsible to the traveler for its own acts in conveying the holder of the ticket.

For several years prior to the 5th of April, 1887, when the Act to Regulate Commerce took effect, substantially all the railroad companies of the country, including the complainants and defendants, paid commissions varying in amount from two dollars to five dollars a ticket, to the ticket agents of other companies by whom the through tickets were sold. These commissions sometimes aggregated as much as the salaries paid the ticket agents by the companies that employed them. The commissions paid by complainants and some other companies since the first of April last have been fixed by agreement at one dollar a ticket from Chicago to Kansas City.

The defendant companies and some others for about two years have made earnest efforts to abate the practice of paying commissions. The testimony shows that the commissions paid on through tickets have usually amounted to from 20 to 25 per cent of the receipts from such sales, and that the official reports of the companies have concealed this expense and only showed the net receipts from passenger tickets after deducting the commissions.

About a month before the Act to Regulate Commerce became operative the defendant companies took steps to procure agreements with their connecting companies to abolish the commission business altogether.

With this end in view they sent printed circulars, on or about the 15th of March last, to their connecting companies, expressing their willingness to continue to act as agents in the sale of through tickets and stating the nature of the agreement required. The circular of the Pennsylvania Company stated as follows:

"In view of the severe penalties for infractions of the Law neither of these companies can consent to act as agents for your company (if you should desire it to do so) in the issuance and sale of through tickets except upon the following conditions:

"*First*, your authority to so act.

"*Second*, your agreement that the proposed joint tariffs will be satisfactory.

"*Third*, your agreement not to issue or cause to be issued any new forms of through tickets over any of our lines without our formal consent thereto.

"*Fourth*, your promise not to pay, either directly or indirectly, a commission or any consideration whatsoever to agents or employees of these companies, or to any other person or persons, on account of the purchase or sale of tickets issued by either of these companies at its regular ticket offices or at other places in the territory adjacent thereto.

"*Fifth*, your agreement to confine your own

issue of tickets and orders for tickets or transportation exclusively to offices immediately on the line of railroad controlled by your own company, thereby permitting us to ticket all passengers over your line or lines, at lawful rates, from all points where either of these companies has a line of railroad and you have none.

If it be your desire, these companies will cheerfully continue to act as agents for your company on and after April 1, 1887, upon similar promises and conditions to those above cited."

The circular of the Pennsylvania Railroad Company was identical in this respect with that of the New York Central Company herein after set forth.

The complainant, the Chicago & Alton Railroad Company, received these circulars signed by the general passenger agents of the Pennsylvania Company, and the Pennsylvania Railroad Company, respectively, and refused to enter into the agreement proposed, claiming the right to continue to pay commissions to the agents of the Pennsylvania Companies, upon their sales of through tickets.

The circular sent by the New York Central Company and the Pennsylvania Railroad Company contained the following statement:

"In view of the severe penalties to be inflicted in cases of violations of the Law, this company cannot consent to act as agent for any other company in the issuance of through tickets, unless notified that it is authorized to so act that the proposed joint tariff will be satisfactory for the time, and that the companies whose authority is thus obtained will refrain from the payment of a commission, drawback, rebate, or any form of consideration to the agents or employees of this company, or to any other person or persons on account of the purchase or sale of this company's issue of tickets in the territory adjacent to our lines."

The complainant, the Chicago, Rock Island & Pacific Railroad Company, received a copy of the circular of the New York Central Company, containing this statement, and refused to consent thereto, claiming the right to continue to pay commissions.

A large preponderance of the companies to which these circulars were addressed, assented to the propositions they contained, and signed agreements to make them effective.

From 70 to 80 per cent of the companies having connections with the Pennsylvania systems agreed to discontinue commissions. Of 284 companies to which the circulars of the New York Central Company were addressed, 215 assented, and only nineteen refused. A large number of other companies in the territory east of the Mississippi and Illinois Rivers and the eastern shore of Lake Michigan, and twenty-nine southern companies, 110 in all, entered into similar agreements. Sixteen companies in the territory named, and three southern companies refused. It also appeared by the complainants' testimony that of 236 roads with which they do business, including all of the New England Roads, all except twelve agree to allow commissions. On account of the refusal of the complainant companies to discontinue the payment of commissions to the agents of the defendant companies, and to

agree to refrain from that practice, the defendants, after the 4th of April last, refused to sell through tickets over the complainants' roads from Chicago and St. Louis to Kansas City, and still refuse, solely for those reasons. They express their willingness to sell through tickets over the complainants' roads whenever they will agree to discontinue commissions upon the defendants' issue of tickets. The defendants continue to sell through tickets over the connecting roads of companies that have assented to the agreements. The testimony does not show that the defendants have knowingly sold through tickets since the 4th of April, over the roads of companies that have refused to enter into the agreements.

On these facts the complainants aver that the defendants refuse to afford to them reasonable, proper, and equal facilities for receiving, forwarding, and delivering passengers, and give undue preference to competing roads, in contravention of the provisions of the Act to Regulate Commerce.

The defendants deny that they have violated the provisions of the Act, and claim that they have the exclusive right to control their own agents, to fix the amount of their compensation and to pay it themselves; that the payment of commissions by other companies is demoralizing to their agents, and often leads to discriminations to passengers for roads paying large commissions, by division of the commission between the agent and the passenger, that commissions consume a considerable percentage of the revenue from the sale of through tickets; that without commissions all connecting roads stand on a basis of equality, and passengers select their own routes uninfluenced by agents having an interest in the form of commissions in persuading them to choose some particular route.

The thirteenth section of the Act to Regulate Commerce provides that for anything done or omitted to be done by any common carrier subject to the provisions of the Act, in contravention of the provisions thereof, application may be made to the Commission by petition, which shall briefly state the facts, and the further proceedings to be taken by the Commission are then specified. This indicates the jurisdiction of the Commission in respect to complaints by persons or corporations for the causes described. The offenses of which the Commission has cognizance are anything done or omitted to be done in contravention of the provisions of the Act.

In the cases under consideration it is necessary that it should reasonably appear that the acts of the defendants of which complaint is made are in contravention of the provisions of the Act. This involves the question whether the Act makes it the duty of the defendants without any agreement or arrangement for the purpose to sell through tickets over the roads of the complainants, and also whether the complainants can insist on paying commissions to the agents of the defendants notwithstanding the opposition of the defendants thereto.

Railroad corporations in the States are creations of the State Governments, and their powers and duties are defined by their charters or by general laws. In the Territories, which

are subject to the exclusive jurisdiction of Congress, railroads may be chartered by the Federal Government or by its authority. The Act to Regulate Commerce does not make it the duty of state railroads to organize and operate through lines of transportation consisting of separate roads owned by different companies. The organization of such lines is left under the Act to the voluntary action of railroad companies, as it existed previously. But when railroad companies associate to constitute through lines for interstate traffic they become agencies of commerce as the courts have adjudged, and in the conduct of the business so assumed, voluntarily subject themselves to the control of Congress under the power contained in the Constitution, "To regulate commerce with foreign Nations and among the several States and with the Indian Tribes." Congressional regulation is necessarily exercised by laws enacted for the purpose, and the extent of the regulation intended is measured by the terms of the law. The law in this instance does not in terms require one railroad company to sell through tickets over the road of another company. It is substantially a reproduction of the corresponding provision of the English Railway and Canal Traffic Act of 1854, under which the English companies claim they were not authorized to sell through tickets over other roads.

In the absence of statutory authority one railroad company can only sell tickets and check baggage over the road of another company by agreement. The English Statute of 1873 amending the Act of 1854 was enacted to give this authority and to make its performance a duty.

That statute so far as material is as follows: "The said facilities to be so afforded are hereby declared to and shall include the due and reasonable receiving, forwarding, and delivering by every railway company and canal company, and railway and canal company, at the request of any other such company, of through traffic to and from the railway or canal of any other such company at through rates, tolls, or fares." As no such provision exists in our statute the decisions of the English Commission and courts relating to through booking, founded on a statute declaring in terms the duty of "through rates, tolls, and fares," under which through booking is mandatory, are not applicable.

By agreement between companies, however, through tickets very properly are sold and used over connecting roads as a convenience of passenger traffic and an inducement for patronage. Such tickets very evidently are a great convenience to travelers, and perhaps to connecting roads, but they are a part of the voluntary arrangements for business purposes like joint tariffs, interchange of cars, and common use of depots. It being, therefore, under our statute, matter of mutual agreement whether coupon or through tickets shall be sold by a railroad company over roads of other companies, it follows that the form of such tickets and the manner of their sale are also matters of agreement by the companies interested. If companies can agree upon their tariffs, the form of their tickets, and how they

should be sold, they have the right to do so, and by such agreement become interstate carriers; but if they cannot agree the Act does not undertake to coerce them to do business together upon terms that may be justly objectionable or injurious.

It is true as urged by complainants that the third section of the Act requires that "Every common carrier subject to the provisions of the Act shall, according to their respective powers, afford all reasonable proper, and equal facilities for the interchange of traffic between their respective lines, and for the receiving, forwarding, and delivering of passengers and property to and from their several lines, and those connecting therewith, and shall not discriminate in their rates and charges between such connecting lines."

Through tickets are not indispensable for these purposes; but assuming for the sake of the argument that they may be deemed "facilities" for the receiving, forwarding, and delivering of passengers to connecting lines, carriers are only required to afford reasonable, proper and equal facilities. They are not required to afford special, unreasonable, improper, or unequal facilities.

This presents the question whether the payment of commissions is in itself, or as incidental to the enjoyment of a facility, reasonable and proper within the purview of the Statute. The facility of through tickets is equally offered to all and may be enjoyed without commissions. If the company selling the tickets should charge a commission, it would doubtless be regarded as an imposition, and therefore unreasonable and improper. These commissions are gratuities to induce special efforts for the company paying them. If the statute does not give one company authority to subsidize the agents of another company, and if the practice is injurious in its effects, it certainly cannot be reasonable and proper.

The statute does not divest a railroad company of the exclusive right to control its own internal affairs, to employ its own agents, to regulate its own duties, and to pay them such compensation as it may deem proper. The right of ownership of railroad property, with the power to control over employees and management of the property, is as absolutely under the Act as before is passage. The regulation of commerce between the States, which is all that the Act contemplates, does not involve community of property, or joint control of subordinates among the several companies that honor through tickets. The corporate powers of every company, for all administrative and governing purposes within its prescribed sphere, remain unimpaired. With the legitimate exercise of these powers another company has no concern, and no right to intermeddle.

For the proper government of their own subordinates the defendant companies have forbidden their agents to receive commissions from other companies, and directed them not to sell tickets over roads of companies that refuse to recognize this corporate authority, but insist on subsidizing the agents. In these directions the defendants have not transcended their reasonable rights. One person or corporation

has no right to interfere with the employees of another, and the statute does not disturb this old and sound principle.

The defendants might rest upon their right to control the official conduct of their own agents. But they go further and show by evidence the practical effects of commissions, and that their natural and usual tendencies are to a variety of abuses. A witness of experience and large opportunities for observation testified as follows:

"It is in the articles of the organization of the Pennsylvania Company, and I believe in the organization of the Pennsylvania Railroad, that any officer, no matter who, from president down, shall not be permitted to receive any compensation from any other corporation without a resolution of the board of directors to that effect; and all the salaries and compensation so received are required to be covered into the treasury of the Pennsylvania Company and accounted for. This is done simply for the reason that we do not believe any railroad company can properly conduct its affairs when it permits its agents and employees to receive compensation for doing the same service for other companies. We know we had in our examination of this matter found that some of our ticket agents were receiving a greater amount of commissions from foreign railroad companies than we were paying them salaries, and instead of being our employees they were the employees of the other railroad companies, and so far as our company was concerned we lost control of them entirely."

He further testified that the commissions were paid for two purposes: one was for the purpose of inducing the agent to sell tickets over lines which paid the commission, by paying him a sum of money for so doing, and so large a sum as would enable him to pay a portion of it to the party whose traffic he wished to obtain.

Another witness testified that he had personal knowledge of a great many cases too numerous to be cited where ticket agents had divided the commission with the passenger, thereby constituting a different fare for the same ticket for the same company; that connecting lines give agents of initial companies orders to divide these commissions, contrary, in a great many cases, to the orders of the company by which the agents were employed; that these commissions had been for base purposes and to demoralize the agents.

A practice capable of producing and having a tendency to produce results thus described, cannot be reasonable or proper, and a railroad company is fully justified in the use of all lawful precautions to protect itself and its agents against such invasions of its corporate authority and of its business morality. According to the testimony the defendants are supported in their position on this question by a very large majority of connecting roads showing a decided preponderance of opinion against the practice.

The complainants insist that the payment of commissions is only additional compensation for services rendered by the agents, and that they have the right to pay them.

An officer of one of the complainants in answer to the question, What object is to be ac-

complished by paying an agent commissions by different companies if he has already a full salary from the company which employs him? testified: "I should say to induce him to sell their tickets in the first place, and the next place to explain the routes which lead from one city to another, and that he may be able to make himself advantageous to the passenger who is in New York City who is not posted on the routes west of Chicago."

The claim of the complainants was stated by their counsel as follows: "We simply claim that we have the right to pay anybody for services rendered, and that we have the right to determine whether it shall be by salary or commissions."

The scope of the complainants' position is clearly presented by these statements. It is the distinct assertion of a right of one corporation to employ and pay, for its own interests, an official servant of another corporation to which his service is primarily and exclusively due. A theory of this character ought not to be and is not recognized in business affairs, or in official life. A divided service between many masters cannot be satisfactory to any, and as a rule is injurious to the person so employed.

It follows from these views that the defendant companies, in prohibiting their agents from receiving commissions and in refusing to sell through tickets over the roads of complainants, while they insist on paying commissions to defendants' agents, have not contravened the provisions of the Act. The defendants reasonably and fairly offered to afford all reasonable, proper, and equal facilities for the receiving and delivering of passengers to and from their several lines and those connecting therewith, and did not discriminate in any respect between such connecting lines. In requiring the cessation of commissions to their agents, when entering into business arrangements with connecting roads, the defendants only demanded what was reasonable and proper; and the complainants, by their refusal to refrain from paying commissions on tickets issued by defendants, voluntarily excluded themselves from the reasonable, proper, and equal facilities offered to them in common with all other connecting lines.

The complaints in these several proceedings must therefore be dismissed.

All concur except **Morrison, Commissioner**, who delivered the following dissenting opinion:

The same question is made in these several cases which, for convenience, may be considered as presented in the case of the Chicago & Alton Railroad Company against the Pennsylvania Company.

At Chicago these companies, complainant and defendant, occupy the same depot with the Chicago, Burlington & Quincy Railroad Company, a competitor of the Chicago & Alton Road for Chicago and Kansas City business.

Before the "Act to Regulate Commerce" was passed, the Pennsylvania Company was accustomed to sell through tickets over its line, and the lines of both the Chicago & Alton and Chicago, Burlington & Quincy Railroad Companies. Up to that time it had been the custom of railroad companies, including the per-

ties to this suit, and the said Chicago, Burlington & Quincy Company, to offer and to pay commissions for the sale of tickets over their lines. After the enactment of the said Law, the defendant, assuming the payment of such commissions to be in conflict therewith, refused to continue the sale of tickets over such of its connecting lines (including the complainant's), as might continue to pay or offer to pay commissions. These conditions, upon which the defendant would continue the sale of complainant's tickets, appear above in the circular letter of March 15, 1887, clauses 4 and 5, and to which defendant made its request for prompt reply, "to prevent inconvenience to the traveling public."

The Chicago & Alton Company refused compliance with these conditions and continued to offer commissions to the agents of other companies, including the agents of the defendant. The defendant continued in its refusal to sell through tickets over complainant's line. The Chicago, Burlington & Quincy Company, while continuing to offer commissions to the agents of other companies than the defendant, assented to the conditions of the defendant, and the defendant continued the sale of through tickets over the line of the Chicago, Burlington & Quincy Company.

These facts are undisputed and they present the simple question, whether a common carrier, subject to the provisions of said Act, may withhold from a railroad company and those who wish to use it, the same equal facilities for the "interchange of traffic," and "forwarding and delivery of passengers and property," afforded to a competing line and those who use it, until the prescribed line shall promise not to offer or pay commissions to the agents of the company exacting such promise.

The provision in the third section of the Interstate Law, fixing the duties of companies operating connecting lines, says:

"Every common carrier subject to the provisions of this Act shall, according to their respective powers, afford all reasonable, proper, and equal facilities for the interchange of traffic between their respective lines, and for the receiving, forwarding, and delivery of passengers and property to and from their several lines and those connecting therewith."

By this provision, the operation of through lines with through ticketing and checking of baggage would seem to be, not a matter of agency or agreement dependent on the voluntary action of, or contract between railroad companies, but a public duty imposed by law. So the English Statute on the same subject is construed, and our statute is substantially the English Statute of 1854, as amended in 1878, cited in the report of the Commission above. With the English statutes the English interpretation of their meaning becomes important by a familiar rule of construction. And this view is supported by the 7th section of the Act to Regulate Commerce, the obvious meaning of which is that connecting lines are to be treated as continuous or through lines for the purposes of commerce "among the several States."

The answer of the defendant avers that "It is ready, and has been since the 6th of April, 1887, to instruct its agents to sell tickets over complainant's railway, and to afford the com-

plainant equal facilities with other railway companies in this respect, provided the complainant will cease, as other companies have ceased (including the Chicago, Burlington & Quincy Railroad Company), to offer and to pay commissions, bribes or gratuities to respondent's agents for the sale of tickets." The defendant here virtually admits its refusal to sell tickets over complainant's line to be a refusal of equal facilities, and has admitted it by conceding it to others. It should not, therefore, be allowed to deny the same equal facilities to complainant.

But, waiving the question whether, under the above clause of section 3 of said Act, it is the duty of carriers subject to the provisions of said Act, to furnish to the traveler who demands and is ready to pay for it a through ticket as a "reasonable facility," yet it can hardly be questioned that if the carriers of the country choose to do so as to one connecting line, it must do so as to others. A common carrier may not make discriminations whereby it will afford A a facility if he will take the Chicago, Burlington & Quincy Road, and deny it to B because he will take the Chicago & Alton Road. And this is precisely what the defendant insists it may lawfully do.

The defendant rests the refusal to afford the same equal facilities to the complainant and to those who travel over complainant's line which defendant affords to the Chicago, Burlington & Quincy Company and those who travel over its line, on the refusal of complainant to discontinue payment or the offer of payment of commissions to the agents of other lines, including defendant's, which defendant condemns as an objectionable and demoralizing practice, and which it characterizes as bribes disguised in the form of commissions. It already appears that the defendant, with other common carriers, has long participated in this practice, which is yet very general. In the said Act, pooling, rebates, drawbacks, and all unjust discriminations are declared to be illegal. The paying or offering to pay commissions on the sale of tickets is not. In the ten or more years of the interstate congressional contests these commissions were not mentioned in any bill presented or report made to the House or Senate. But, independent of the legality, or any question of domestic policy as to payment of commissions between the companies whose roads make connecting lines, the public, or so much of the public as may desire to travel over complainant's line, is entitled to that reasonable and equal facility afforded to those who seek the competing line. It is no answer to the public desirous of using railways as a continuous line that there are differences as to the rights of companies among themselves. And so the law is declared in the case of *Hammons v. G. W. R. & Can. Traf. Cases*, 181.

In any view of the case it seems to me that the defendant must sell through tickets to those who want them over the Chicago & Alton Road, as it does over the Chicago, Burlington & Quincy. And I dissent from the views of my associates with greater diffidence, for the reason that this question is presented both as a question of law and of railroad ethics or morals. I would not willingly delay any re-

form in railroad administration, nor hinder the defendant in any well meant effort to reform itself, which is the measure of its present effort, for it only exacts from companies with connecting lines that they shall discontinue the offer of commissions to its own, while they offer them to the agents of all other companies. The payment of commissions may be subject to such abuses as to demand discontinuance; but until declared illegal, they should not be made to excuse common carriers from the performance of obligations to the public, to enforce which obligations was the object of the law creating this Commission.

PROVIDENCE & WORCESTER R. CO.*

1. Defendant railway company published a tariff containing the following: "For the purpose of facilitating quick dispatch of the coal cars of this company, a discount of 10 per cent will be made from the following rates, to any person, firm or company, who shall receive consignments of coal, in any one year, amounting to 30,000 tons or upwards, at any one station on the line of this road. Quick dispatch to be construed as immediate unloading of coal on its arrival at destination." Defendant claimed that this discount was offered to secure, and was conditioned upon, quick dispatch in unloading its coal cars, and that it was a reasonable regulation for the proper conduct of its business.

Held,

(a) That, by the wording of the offer, "quick dispatch" was not made a condition of the offer, and, therefore, it cannot be supported on that ground.

(b) That even if "quick dispatch" were made a condition of the discount, such offer would have neither justice nor reason to support it, as its limitation to consignees receiving a specified number of tons would be an unjust discrimination.

(c) That the offer of discount cannot be supported on the consideration of quantity, on the analogy of the distinction usually made in ordinary business transactions, between wholesale and retail dealers.

2. Defendant railway company has two lines of nearly equal length, one starting from Providence and the other from East Providence, which unite at Valley Falls, whence the main line runs into Massachusetts. The rate charged by defendant on coal shipped at Providence is the same as on coal shipped at East Providence as far as Valley Falls and the next station, but beyond that point the rate on coal from Providence is ten cents per gross ton more than on coal from East Providence.

Held,

*See ante, 216.

(a) That this is an unjust discrimination; that if it is fair and reasonable for the defendant to make the charge to Valley Falls from the two termini the same, there can be no justification for making different rates to stations beyond, based on the fact that the coal comes from one terminus rather than from the other.

(b) That the evidence fails to support the contention of defendant that the extra rate upon coal received at Providence is only a fair equivalent for the additional cost of handling it there.

(c) That under all the circumstances it is not admissible for defendant to impose upon its patrons at Providence, whose investments were made before the East Providence line was constructed, an additional charge because of the inconvenience attending the transaction of its business at that station and for which they are in no way responsible.

3. The defendant railway company had for some time paid the cost of hauling coal shipped by complainant, from complainant's wharf to defendant's freight station in Providence, without any contract obligation to that effect, but now refuses so to do. *Held*, that defendant can not be compelled to continue paying for such hauling; that what defendant did for a time as a favor or by way of encouragement, it might discontinue at pleasure, and that there is nothing in the nature of a binding usage about it.

(Decided July 23, 1887.)

REPORT AND OPINION OF THE COMMISSION.

Cooley, Chairman:

The complainant in this case is a copartnership composed of Henry C. Clark and another, doing business as dealers in coal at Providence, Rhode Island.

The petition by which this proceeding was commenced avers that complainant has its coal yards and wharves and place of business upon what is known as the Dorrance Street Wharf estate upon the westerly side of the Providence River, and lying between said River and Dyer Street, which estate is owned by Henry C. Clark, and in the purchase and improvement of which he has expended large sums of money for the purpose of said business.

That the main line of defendant's road extends from Providence to Worcester, Massachusetts, but it has also a branch road extending from its tide water pier and wharf estate in East Providence, Rhode Island, and connecting with its main line at Valley Falls, and also a branch road extending from its main line at or near its freight depot in Providence across the bridges and through and upon Dyer Street to and connecting with complainant's wharf estate, and with other wharf estates upon the westerly side of the said river, and another branch road extending from the main line at or near its said freight depot across the bridges and through and upon South Water Street in Providence, and connecting with the

wharf estates there, upon the easterly side of the river.

That said Henry C. Clark, when the Dyer Street line of said Railroad was first laid, acting in co-operation with defendant, expended large sums of money in laying rails upon his wharf estate and in making switch tracks connecting the same with said street line, and has also made further expenditures since in maintaining the same, to accommodate and facilitate the transportation of coal and other merchandise to and from said wharf estate over the roads of defendant.

That complainant has thus the facilities for selling coal for shipment over said roads, and for delivery at the various stations thereon, if transportation can be obtained therefor at the same rates of freight that coal is transported at for other parties; but defendant in contravention of complainant's rights and of the provisions of the Act to Regulate Commerce, has issued a tariff of freight rates for coal over its road which practically excludes complainant and many others from selling and delivering coal over and upon the line of its roads, in that, besides making unjust discrimination in favor of shipments consigned to its East Providence wharf by receiving such shipments free of wharfage there, it also gives undue and unreasonable preferences and advantages in making a discount or rebate of 10 per cent to any person, firm or corporation who shall receive consignments of coal in any one year amounting to 80,000 tons or upwards at any one station on the line of the road; it being, as complainant avers, well understood and known that there is but one person on the whole line of the road who, under the unjust discrimination made by the defendant in his favor, has ever received, or in future, under the unjust discrimination made by the published tariff, can receive 80,000 tons of coal in any one year at any one station upon the road, namely: a dealer at Worcester in whose favor, as complainant avers, large and unjust discriminations and undue advantages in rates of freight, drawbacks, allowances and other privileges have for many years past been made by defendant, to the great injury and loss of trade over the road, not only by complainant but other dealers, and at times almost to their entire exclusion therefrom.

That the tariff of published rates is also in contravention of said Act, in that although the distance from the East Providence wharf of defendant to Valley Falls, and to all stations on the line of its road above Valley Falls, is greater than the distance from Providence to the same stations, yet the rates of freight to all of said stations which are above Lonsdale are greater from Providence than from East Providence.

Moreover, all persons, including complainant, shipping coal over said street lines are obliged to pay further sums for street hauling, so-called; that is, for hauling for the distance between their wharves and the freight stations of defendant in Providence, which street hauling was formerly, and as complainant claims should now be, furnished by defendant.

The petition then avers the making of applications to the defendant to modify and cor-

rect its tariffs and the failure of complainant's efforts in that direction; and it prays that defendant may be required to cease and desist from its unlawful, unjust and unreasonable discriminations, preferences and advantages aforesaid, and to make due and proper reparation to complainant for damages sustained.

The answer admits the facts stated in the petition regarding the business of complainant, and proceeds to say that as to the branch railroad on Dyer Street and South Water Street in Providence, defendant owns and has for many years maintained railroad tracks on said streets for the benefit of complainant and other owners and dealers thereon, but that it owns no right of way on either of said streets; that said tracks were laid by permission of the City Council of Providence which controls the mode of maintaining and using the same, and claims the right to cause the tracks to be removed upon reasonable notice without compensation, and that defendant is unable to use steam as a motive power on said tracks, and cars can only be moved thereon by horse power, the tracks constituting what is known as a street or horse railroad. Defendant admits the establishment of a freight tariff as charged, but denies that any unjust discrimination is thereby established or provided for, and further denies that only one person can receive the benefit of the discount offered to a consignee receiving 80,000 tons of coal within a year at any one station, and says it has reason to believe that within the present year not less than three persons will be entitled to such benefit.

Defendant further denies that the tariff makes any unjust discrimination in rates as between the coal taken from Providence and that taken from East Providence to points above Lonsdale, and says that its road was built almost wholly for carrying coal, and defendant was compelled by the City of Providence to build a branch to East Providence by threats to compel the defendant to remove its street tracks and so prevent it from receiving coal at tide water, and that the lower price for carrying coal over said branch railroad is rightful and just, and in no way involves discrimination in favor of one consignee and against another; that owing to the want of proper facilities at its station in Providence, which it is unable to enlarge without the permission of the city—which refuses to grant the same—coal cannot be received at and carried from that station at the same price as from East Providence, and that the difference in the rates given in said tariff is not sufficient to cover the additional expense and risk incurred by defendant in taking coal in Providence instead of taking it at East Providence.

And defendant avers that all its charges are just and reasonable, and that the 80,000 ton provision is so, because it says that the benefit thereof is reciprocal, inasmuch as the consignee entitled to a rebate on the said provision must have supplied all the best facilities for the speedy handling of coal, and thereby enabled defendant to save expense of handling, hauling and delivering his coal, equal to the amount of the rebate, and further that complainant by selling coal to the consignees may

entitle itself to such rebate and therefore is not in any sense injured or discriminated against by said provision.

The case was heard on evidence taken in the main orally at the hearing, and we find the facts to be that Mr. Henry C. Clark, the senior member of the complaining firm, many years ago established a coal yard and wharf in the City of Providence and on Providence River, to be used in connection with the transportation of coal over the road of defendant; that the cost of real estate and improvements for that purpose has been a quarter of a million of dollars; that the complaining firm is now in the possession and occupancy of all of the said real estate and improvements for the purpose of its said business; that the said coal yards and wharf are a considerable distance from the freight station of defendant, and could only be reached by cars over rails laid by defendant along the streets with the co-operation of said Henry C. Clark, and by the consent of the said city authorities; that the city authorities have allowed cars to be drawn through the streets only by horse power, and that for many years defendant paid the expense of the handling of cars from complainant's yard and wharf to defendant's freight station in Providence but never contracted to do so; that the facilities of defendant for transacting its freight business in Providence have long been unsatisfactory and limited, and that defendant, to obtain better facilities, has now constructed a branch road connecting with its main line at Valley Falls six miles from the Providence Station and extending from Valley Falls seven miles to a terminus in East Providence on Providence River across from a little below the wharf of complainant; that defendant since the construction of said branch road had been desirous as far as possible to do its coal business over such branch road, and that it now refuses any longer to be at the expense of handling coal from complainant's wharf through the streets to its Providence Station. Defendant has been in the practice of offering a discount of 10 per cent on the freight paid by consignees receiving some specified quantity at any one station within a year, beginning with a quantity of 5,000 tons, which was increased in 1886 to 20,000 tons, at which quantity only one dealer, whose place of business was Worcester, earned and received the discount. The offer in the tariff taking effect April 4, 1887, was changed as to quantity and reads as follows:

"For the purpose of facilitating quick dispatch of the coal cars of this Company, a discount of 10 per cent will be made from the following rates, to any person, firm or corporation, who shall receive consignments of coal, in any one year, amounting to 30,000 tons or upwards, at any one station on the line of this road.

"Quick dispatch to be construed an immediate unloading of coal on its arrival at destination."

There was no reasonable probability when this tariff was put out that 30,000 tons would be received by any one consignee at more than three places on defendant's road; and it was doubtful if the quantity would be received by any other station than at Worcester, and it

would probably be received by only one dealer there.

In the tariff of rates so put out the charge per gross ton of coal from Providence and East Providence respectively to Valley Falls was made sixty cents; to Lonsdale the first station above it was sixty-five cents; but to the stations further on a difference was made in favor of the coal shipped from East Providence, which difference to all towns beyond the Rhode Island Line was made ten cents per gross ton. The rate for Worcester by the East Providence Line was fixed at \$1 a ton. Complainant endeavored without avail to secure a change in this tariff which should place Providence and East Providence on the same footing, and also to have the offer of discount withdrawn; that offer being thought to give the dealer at Worcester, who had the benefit of the offer in 1886, an advantage which would preclude complainant doing a profitable business. The margin for profit in wholesale dealings in coal is now very small, and may be stated at from ten to fifteen cents per ton.

From the facts as here found the first question of importance that arises concerns the offer by defendant of a 10 per cent discount to any person, firm or corporation who within any one year shall receive consignments of coal aggregating 30,000 tons at any one station. The complainant insists that this is unreasonable discrimination, while defendant, on the other hand, justifies the offer as a reasonable measure of policy in its business.

We have seen above that the published tariff undertakes to state the ground or consideration on which the offer is made. It is "for the purpose of making quick dispatch of the coal cars" of defendant; and the public is told that "quick dispatch" is to be construed an immediate unloading of coal on its arrival at destination. The defendant gave evidence that this immediate unloading of cars was important, but this is so obvious that the evidence was scarcely necessary. It was entirely admissible, therefore, that the defendant should make some regulation or adopt some decisive measures to insure the quick dispatch which seems to have been in mind in making the offer.

When, however, we look at the terms of the offer, we perceive immediately that although the purpose may be to facilitate quick dispatch, the offer is neither expressly nor by any necessary implication made conditional on the quick dispatch being facilitated. It seems to be expected that the parties who accept the offer will be prompt in unloading the coal; but they are put under no obligation to do so by the terms of the offer, and their legal duty in that regard will therefore be no greater than that of any other consignee receiving coal over the road. No promise of quick dispatch is exacted; no performance is made imperative. The authorities of the road, in making the offer, appear to have expected and assumed that any customer of the road, to the extent indicated, would, as a matter of course, and in his own interest, make quick dispatch, and that the attaching to the offer of any condition to that effect would be altogether unnecessary. They therefore attach none. Such being the case, it follows that any customer of the road who should become consignee to the extent

specified would thereby perform the only condition on which the offer is based, so that whether the expectation of quick dispatch was or was not realized, he would be entitled to claim the rebate. No failure in immediate unloading would be an answer to a claim for the discount, when the discount had been offered upon another and distinct condition which had been fully performed.

The answer of the defendant, no more than the published tariff, shows an understanding on the part of the railroad officials that the offer of discount is conditional on quick dispatch. By that pleading we are told that "The consignee entitled to a rebate, under said provision, must have supplied all the best facilities for speedy handling of coal," but it is not pretended or intimated that the offer requires this, or that anything more than the interest of the consignee, and the requirements of convenience in his business are relied upon to secure this result. Whether the result is secured or not the promise is left to stand on the single condition of quantity; and when the quantity is reached, the promised discount is, by the terms of the offer, due. And this very remarkable consequence might possibly follow if several persons should endeavor to earn the discount, namely: that while a consignee who had received the necessary quantity, but had been blamably negligent in unloading, might then demand and receive the rebate, another who had endeavored to reach the quantity, but had fallen somewhat short, but who all the year had been prompt and punctilious in making quick dispatch, could have no benefit whatever in complying with the only consideration on which the rebate is professedly supported, and for which it purports to be offered.

It is very manifest from this statement, and from the illustration of what might naturally happen, that the pretended consideration is purely imaginary, and that the promise of a discount, so far as regards the consideration on which it purports to be based, is deceptive and misleading. The published tariff is calculated and intended to lead the public to suppose that the offer is based upon a consideration of quick dispatch. But in fact the quick dispatch has no necessary connection with the offer; it is put forth as something confidently expected because of the offer, but it is not required or insisted upon. The defendant has therefore failed, both in its published tariff and in its answer, to show any ground on which its offer can be supported; the mere expectation of a quick dispatch while at the same time such dispatch is not required, being no ground whatever.

If we look into the evidence with a view to satisfy ourselves whether any such offer of discount could reasonably and lawfully have been made on an express condition of quick dispatch, we shall have no difficulty in perceiving that any such conditional offer would have had neither justice nor reason in support of it. The evidence in the case shows beyond question what indeed common observation would teach us without other proof: that a party receiving a much smaller quantity than 80,000 tons, can comply with a condition of quick dispatch as promptly, fully and completely as can any larger dealer. If therefore a discount

were to be offered in order to insure quick dispatch, a discrimination which should so limit the offer that a part of those who could and might desire to accept it would be excluded from its benefits, would for that very reason be unjust and indefensible. The discount in this case must consequently be held supportable neither on the published offer, nor on the statement in the answer, nor, so far as the consideration is concerned, on the evidence; and unless some other support can be found for it, it must be adjudged illegal.

On the argument an effort was made to uphold the discrimination on a consideration of quantity merely; the consignee who should receive more than 80,000 tons in a year at any one station, being likened to a purchaser of goods at wholesale, and the consignee who received a lesser amount being compared to a purchaser at retail. It was said that a distinction in price is universally made as between these two classes of customers, and that distinction would be as reasonable in the case of purchasers of railroad service as in that of purchasers of cloths or lumber.

One difficulty with this argument is that it is an afterthought. The defendant has publicly selected the ground on which it will base the discrimination proposed, and has published it in a paper required of it by law for the purposes of general information. It would be entirely admissible for defendant to change its ground in making a new offer; but the offer now under consideration must stand or fall, on the ground selected for it.

But if this defendant should attempt to make a new offer based upon quantity merely, the analogy between the case and that of wholesale and retail purchasers of merchandise would not be found to be very close. The wholesale dealer is allowed concessions in prices because his transactions in proportion to the amount purchased are fewer in number, they take less of the time and attention of the seller, and it costs him very much less to make them. It is perfectly reasonable that these facts should be taken into account in making bargains. But there is no certainty, and scarcely any probability that the dealer who receives 80,000 tons of coal at some one station within a year will make his business cost less to the railroad company in proportion to quantity than the dealer who receives 25,000 tons only, or 20,000, or half that quantity. Indeed, the selection of 80,000 tons as the test of what should be considered wholesale business would obviously be purely arbitrary, as also would be the naming of any other considerable quantity, say 5,000, or 15,000, or 50,000. The selection of any one of these quantities could be defended on a distinction between wholesale and retail dealings as logically, if not as plausibly, as that of any other; and the evidence in this case shows that defendant in years past has based its offer of discount on a receipt of consignments much below the 80,000 tons now required. The quantity named last year was 20,000 tons; so that on the argument now advanced what was wholesale last year is retail this.

A distinction in rates as between car loads and smaller quantities is readily understood and appreciated; but no such distinction is made in this offer, and a customer of the road

who should receive all his coal by car load or even by train load would be excluded if he fell short in quantity. And some possible results of the offer might be utterly inconsistent with considerations acted upon in wholesale trade. If a consignee, for example, earns the rebate by receiving 30,000 tons at a station to which the freight is a dollar a ton, he pays but \$27,000 for the transportation; but his rival at the same place who reaches to 29,000 tons only, must pay for a less service presumptively accomplished at less cost, and which is of less value to him, \$2,000 more. Such a result could not possibly be defended. The one consignee would be a wholesale dealer as much as the other, and common sense would pronounce unhesitatingly that if the larger charge for carrying the smaller quantity was reasonable, the discount to the other dealer must be without any just or reasonable support.

But when a question of rebates or discounts is under consideration, it might be misleading to consider them in the light of the principles which merchants act upon in the case of wholesale and retail transactions. There is a very manifest difficulty in applying those principles to the conveniences which common carriers furnish to the public, a difficulty which springs from the nature of the duty which such carriers owe to the public. That duty is one of entire partiality of service. The merchant is under no corresponding duty, and may make his rules to suit his own interest, and discriminate as he pleases. There is no occasion to enlarge upon this now.

A discrimination, such as the offer and its acceptance by one or more dealers would create, must have a necessary tendency to destroy the business of small dealers. Under the evidence in the case it appears almost certain that this destruction must result, the margin for profit on wholesale dealings in coal being very small. The discrimination is therefore necessarily unjust within the meaning of the Law. It cannot be supported by the circumstance that the offer is open to all; for although made to all, it is not possible that all should accept. Moreover, in testing such a discrimination we must consider the principle by which it must be supported; and the principle which would support a 30,000 ton limitation would support one of 50,000 or 100,000 equally well; the quantity named would be arbitrary in any case. It might easily be so high as practicably to be open to the largest dealer only. A rail road company, if allowed to do so, might in this way hand over the whole trade on its road in some necessary article of commerce to a single dealer; for it might at will make the discount equal to or greater than the ordinary profit in the trade; and competition by those who could not get the discount would obviously be then out of the question. So extreme a case would not, however, be needful to show the inadmissibility of such a discount as is here offered; the injustice would be equally manifest if several dealers instead of one were able to accept the offer. A railroad company has no right, by any discrimination not grounded in reason, to put any single dealer, whether a large dealer or a small dealer, to any such destructive disadvantage.

In what is said above we do not mean to be

understood as intimating that defendant is not saved something in cost and in labor by having the coal carried by it received in large quantities by single consignees. On the contrary, we readily agree that its service for large dealers is somewhat less in proportion to quantity of freight transported than is the like service performed for small dealers. We also agree that defendant may therefore seem to have an interest in restricting its dealings so far as possible to large dealers. But this is an interest that can only be consulted and acted upon in strict subordination to the rules of law; and one of the most important of those rules is that in any discrimination between dealers justice, if not a paramount consideration, shall at least be kept in view. The carrier cannot regard its own interests exclusively—if it could, it might at pleasure, by methods easily available, drive all small dealers off its line, and center the whole trade in a few hands. The state of things that would result might be altogether for its interest and convenience, since it would then have fewer customers to deal with and fewer transactions for the same aggregate trade; but the wrong would be flagrant. The case suggested is more extreme than the one before us, but the wrong is sufficiently palpable here. And without further comment on this branch of the case it will be sufficient to repeat that when the defendant makes an offer of discount or rebate based on the 30,000 ton limit, the limitation is unreasonable and unlawful, because necessarily resulting in unjust discrimination. There is nothing in the showing in this case to justify the fixing of a limitation as the ground of rebate at any specified quantity; and therefore if the discount is paid to one dealer, the payment will be evidence of the right of all other dealers to a like and proportionate discount.

A further question of importance concerns the difference in defendant's rates on coal shipped to stations on its main line from Providence and East Providence respectively. The facts important to an understanding of this question are that defendant's road was first constructed from Providence through Valley Falls to Worcester, and that complainant, at very great expense to its members, provided itself with land and all necessary requirements for carrying on extensive dealings in coal near the terminus of defendant's road in Providence, and by co-operation with it secured tracks into its yards and to its dock. But defendant's accommodations at Providence were limited and could not be enlarged unless at great expense; the city authorities it is said were disposed to interpose obstacles to such use of the city streets for railroad service as was essential, and defendant found it necessary to construct a new line from Valley Falls to East Providence, where ample accommodations were secured, and where its business could be more conveniently and cheaply conducted. The distance from Providence to Valley Falls is six miles and from East Providence seven. Coal trains are made up at Valley Falls of loaded cars brought from Providence and East Providence without distinction. By the published tariff the rate upon coal from Providence and from East Providence respectively to Valley

Falls is the same; sixty cents per gross ton; and it is also made the same to Lonsdale which is the first station above. But to all stations above Lonsdale a higher charge is made from Providence than from East Providence, the difference after the state line is crossed being in every case ten cents per gross ton. This difference is very important to complainant, and necessarily very prejudicial.

It is very evident that if it is fair and reasonable for defendant to make the charge on coal to Valley Falls from the two termini the same, there can be no justification for making different rates to the station beyond, based on the fact that the coal comes from one terminus rather than from the other. The fact that a part of the coal taken from Valley Falls to Worcester was first received by defendant at Providence and another part at East Providence does not in any degree affect the cost or the value of its service in transporting it from Valley Falls on; and a discrimination in rates from Valley Falls based upon the fact that the coal had come from the one terminus instead of the other would have no reason and no justice to support it. The defendant might as well discriminate on the ground of the coal having come from different mines or different dealers. The discrimination made by the defendant's published tariff is therefore presumptively at least without justification.

It is claimed by defendant, however, that the additional cost of doing its business at Providence over the cost at East Providence is fully sufficient to support the difference made in rates, and that the fact of defendant making no difference at Valley Falls and Lonsdale cannot preclude its making them at other points. Passing over this last point for the present as not being one necessarily requiring a decision at this time, we are of opinion that defendant does not justify the making of the additional charge at any station.

The Providence line was first built, and complainant, at very large expense and in co-operation with the defendant, has put itself in position to transact its business there. Defendant because of inconvenience which it will escape has constructed a new line and established a new station where the inconveniences will be less. Its policy now is to force the whole business as much as possible over the new line. We have no doubt its own convenience will thereby be consulted, and the cost of its business somewhat reduced; but there is no evidence before us which would justify us in finding that the additional charge upon the coal received at Providence is only a fair equivalent for the additional cost. On the contrary, we think the increased rate is imposed more from policy than out of regard to additional cost.

But we think also that under all the circumstances it is not admissible for defendant to impose upon its patrons at Providence, whose investments for business with it were made before the East Providence line was constructed, an additional charge because of the inconveniences attending the transaction of its business at that station, and for which they are in no way responsible. These inconveniences are incident to a situation which it is unfortunate the defendant is unable to relieve; but they

cannot justify differences in rates which will force or tend to force the Providence dealers out of business.

As regards the Providence business we think the obligation of defendant is not different now from what it would have been had it constructed for its own convenience a branch road into some other part of the same city. If, for example, it had established a new freight station in Providence, in order that it might have more ample yards, and thus secure greater facilities for its business, it would not have been admissible that upon its shipments to points which were practicably the same distance from each station and accessible from each, a difference in rates should be charged when the service was worth no more to its customers and when the reasons for having the two stations concerned its own convenience exclusively. But the establishment of a second station in this case, although in another municipality, and requiring several miles of new line to reach it, was also in the nature of a local convenience in its own business, and should be so considered in the making of rates to points reached from both stations.

Complainant insists that defendant should pay the cost of hauling the coal from the wharf to defendant's freight station in Providence. But we do not think this can be required. It seems that defendant did this formerly, but without any contract obligation to that effect; and probably only by way of encouraging complainant in building up a considerable trade. But what it did for a time as a favor or by way of encouragement, it might discontinue at pleasure. There could be nothing in the nature of a binding usage about it.

Our general conclusion is that complainant is entitled to the relief indicated on the first two grounds of complaint above considered, but not on the third. Order will be entered accordingly.

In this opinion all concur.

ORDER.

This case being at issue upon complaint and answer on file, and having been duly assigned for hearing on the day of _____, 1887, and a hearing having been had upon the pleadings, proofs and arguments of counsel, and the report and opinion of the Commission having been made and filed—wherein the Commission has found as facts that the defendant corporation offers a discount or rebate of 10 per cent from its published rates for the transportation of coal, to all persons who shall receive consignments of coal in any one year amounting to 30,000 tons or upward, at any one station on the line of defendant's road; and also that the charge for the transportation of coal from Providence to stations on defendant's line above Lonsdale is greater than for the transportation of coal from East Providence to such stations respectively; and the Commission having adjudged that the giving or offering to give such discount or rebate is, under the circumstances of this case, in contravention of the provisions of sections 2 and 8 of the Act to Regulate Commerce, unless a like discount or rebate is made to all persons; and that the making of such greater charge for the transportation of coal from Providence is also, under the circumstances of this case, in contravention of the

provisions of said sections of said Act, in so far as it applies to interstate commerce.

Now, It is ordered and adjudged that so much of the prayer of the petition as prays that the complainant be required to cease and desist from the acts above recited be, and the same hereby is, granted; and that the defendant corporation be, and it hereby is, required to cease and desist from said unlawful acts of discrimination, and, within ten days from the date hereof, to modify and correct its published schedules of rates and charges accordingly; and it is further ordered that a notice embodying this order be forthwith sent to the defendant corporation, together with a copy of the report and opinion of the Commission herein, in conformity with the provisions of the fifteenth section of the Act to Regulate Commerce.

Louis LARRISON

v.

CHICAGO & GRAND TRUNK R. CO.

MICHIGAN CENTRAL R. R. CO.

v.

CHICAGO & GRAND TRUNK R. CO.

1. The proviso in section 22 of the Interstate Commerce Act "That nothing in this Act shall apply to * * * the issuance of **milage** * * * **passenger tickets**," applies only to the act of issuing or giving out such tickets; the terms, conditions and circumstances upon which the sale of such tickets is made are subject to and must be in accordance with the Act in its general provision.
2. A sale of **milage tickets** to **commercial travelers** at a certain rate, and refusal to sell to other passengers except at a higher rate, is an **unjust discrimination**, within the meaning of the Act.
3. A **release of liability** by commercial travelers to the railroad company does **not** constitute a **good and sufficient consideration** for such **discrimination**; nor does the fact that they may influence business in favor of the road, etc.
4. **Common carriers** may continue the issuance of **milage passenger tickets**, the charges for which must be reasonable and just and free from unjust discrimination or unreasonable preference.
5. Persons belonging to the class known as **commercial travelers** are **not privileged** to ride over railroads at **lower rates** than other persons, and to make a difference in this respect is **unjust discrimination**; this is true whether tickets issued are **milage tickets** or in some other form.
6. **Neglect** on the part of a railroad company to **publish rates** for **milage tickets**, is a violation of the Act.

(Decided July 25, 1887.)

ENTER 8.

REPORT AND OPINION OF THE COMMISSION.

Morrison, Commissioner.

In one of these cases the complainant, Louis Larrison, alleges unjust discrimination and neglect to publish fares, rates and charges for milage tickets; in the other, unjust discrimination is alleged. The two cases were, with consent of the parties, heard together, and, after investigation, the facts are found to be as follows:

The defendant, being the same in both cases, is and was, on the 21st of May, 1887, a common carrier of passengers on its railroad from Port Huron, in the State of Michigan, into and through the State of Indiana to the City of Chicago, in the State of Illinois, and was then offering to sell and selling, for \$20, to the class of persons known as commercial travelers, milage tickets, entitling the holder to transportation to the extent of 1,000 miles over its road between said States.

The complainant, Larrison, having occasion to travel on defendant's road between said States, applied on the 21st of May, 1887, at the proper office of the defendant in the City of Detroit, to purchase one of said "thousand mile tickets," offering in payment therefor the sum of \$20. The defendant refused to sell this complainant such ticket for less than \$25, alleging as a reason therefor, as was the fact, that complainant, Larrison, did not belong to the class of persons known as commercial travelers, to which alone defendant sold said tickets for the price of \$20.

The schedule of defendant, kept in its office in said City of Detroit, purporting to show the rates, fares and charges it had established and which were in force May 21, 1887, did not show the rates, fares and charges which it had established and were in force for carrying passengers who purchased milage tickets which it then kept and was offering for sale; but since this complaint was made defendant has caused its schedules of rates, fares and charges to be so amended as to show the rates at which it sells milage tickets.

The other complainant, the Michigan Central Railroad Company, owns and operates a railroad extending from the City of Detroit, in the State of Michigan, into and through the State of Indiana, to Chicago, in the State of Illinois, and is a common carrier of passengers between said States; and, while the defendant was offering to sell and selling to commercial travelers thousand mile tickets for \$20 and refusing to sell for less than \$25 like tickets to persons not commercial travelers, this complainant was selling such thousand mile tickets for \$25 to the public generally, without discrimination in favor of any person or class of persons. And as such common carrier of passengers between said States, this complainant and the defendant are competitors.

The answer of defendant admits the facts as found above, but avers that nothing alleged against the defendant company is in conflict with the Act to Regulate Commerce, because at the date of the passage of said Act the railway companies of the country generally, including the defendant and the complainant companies, were and for many years prior thereto had been doing the things now complained of;

and further because, as defendant alleges, "The provisions of the Interstate Commerce Law do not apply to such mileage tickets, nor, in any respect, affect the sale thereof."

The sale of mileage tickets, at lower rates to one person than to another, by railroad companies generally, might well have been lawful before, and be unlawful after the passage of said Law. Nor is the fact that discriminations in the sale of tickets were so made, conclusive testimony that they had the sanction of law. Most of the provisions of the Interstate Act but re-enact the common law and supply some new, while saving all the old, remedies. For unlawful discriminations or other wrongs done by common carriers now subject to the recent Act, the courts, before the Act, afforded the only remedy. In view of remedies so to be obtained and necessarily with much cost, great inconvenience and some vexatious delays, it could be, and no doubt is true, that discriminations against travelers, to the extent now complained of, might then have been illegal and yet go unchallenged.

It is not important whether, in any view of this case, it might be necessary to pass upon the state of the law before the passage of the Act, which is not material, as the case is presented.

It was made apparent in the argument that the defendant, in averring "the provisions of the Interstate Commerce Law do not apply to such mileage tickets, nor in any respect, affect the sale thereof," intended to and did question the jurisdiction of this Commission, resting the averment on the twenty-second section of the Act.

That section is in the nature of a proviso, saving out or excepting some things not intended to be embraced in the provisions of the Act, and qualifying or restraining its generality as to others.

The language of so much of the section as the defendant relies upon to include mileage tickets among the things taken out of the Act, is "that nothing in this Act shall apply to the issuance of mileage, excursion, or commutation passenger tickets," and includes excursion and commutation with mileage tickets.

The most usual form of mileage tickets is the one thousand mile ticket; but the custom has been to issue them in other and various forms, and they may be issued for any given number of miles. There is no uniform usage fixing the form of excursion or commutation tickets, or prescribing the extent to which they may be issued. The extent to which traveling may be done on these three forms of tickets is without limit. They can be used in and extended to the entire passenger traffic, or nearly one third of the railroad business of the country. The first three sections of the Act require all passengers to be carried for reasonable rates of fare, without undue preference or unjust discrimination. The construction contended for by the defendant would take out of these sections all that relates to passengers, because all may ride on tickets to which, defendant insists, the Act does not apply. In effect this would be saying that, so far as the Act to Regulate Commerce provides, charges for carrying passengers need not be reasonable and just, nor without unreasonable preference, nor

free from unjust discrimination. Certainly nothing so contradictory as such interpretation leads to was intended by Congress. The body or enacting part of the statute is generally considered as more clearly expressing what is intended than the saving clause. The language of so much of the twenty-second section as relates to mileage tickets is perfectly satisfied by confining its operation to the issuance, or the act of issuing, or giving out such tickets. It is to this issuing or giving out that the Act to Regulate Commerce does not apply or prevent, while the terms, conditions and circumstances, upon which the sale is made, are subject to, and must be in accordance with the Act in its general provision. Thus understood, the several sections of the Law are consistent with each other and in harmony with its general purposes, while the other construction renders useless many of its provisions affecting the carrying of all passengers.

Copies of the two forms of mileage tickets sold are given as part of defendant's answer, in which answer it is claimed that the form of ticket which defendant now sells to such commercial travelers constitutes a special contract between defendant and the holders of such tickets, by which defendant, in the transportation of such commercial travelers, is relieved from some part of the liability under and subject to which it transports all other passengers on its line of road; which limitation of liability, defendant submits and claims, constitutes a good and sufficient reason for the discrimination it makes in favor of commercial travelers.

It might be questioned to what extent such an agreement is binding on the parties and relieves the company from common-law liabilities. Any traveler with any baggage might make such an agreement. Putting aside any question of the validity of such a contract, no reason is assigned nor is any believed to exist, why only commercial travelers should be permitted to enter into such an agreement. The copies of mileage tickets show that none others were permitted to enter into it. The alleged release of liability so made does not constitute a good and sufficient consideration for the discrimination made in favor of commercial travelers, but is another evidence of discrimination against the general public.

It is further claimed that commercial travelers, as salesmen, represent wholesale merchants and manufacturers, for whom they sell goods, thereby creating a large freight traffic for the roads over which they ride. And further they constitute a distinct class of the traveling public, generally riding short distances at a time and traveling very much more than other people.

The principle of cheaper rates at wholesale, practiced by merchants who, in their sales, but consult their own interest, is subject to much modification when applied to railroads, which owe a duty to the public which requires them to treat their customers alike. Besides, it is not quite apparent how one person can travel "very much more" than another on a thousand mile ticket.

Riding short distances between, and stopping off at stations is an accommodation which makes the ticket more, not less, valuable.

To increase the quantity of railroad business in the manner alleged, traveling salesmen must stimulate consumption and add to the demand for the necessities and comforts of life. Commercial travelers are usually men of such energy and superior intelligence that they introduce into some communities articles useful and desirable earlier than such articles might otherwise reach them. Yet the general intelligence of the people is equal to providing themselves with such luxuries and comforts as their means will justify. And the representatives of merchants are not likely to sell, nor railroads to carry, more goods than customers can pay for.

Common carriers may continue the issuance of mileage passenger tickets, the charges for which must be reasonable and just and free from unjust discrimination or unreasonable preference.

Persons belonging to the class known as commercial travelers are not privileged to ride over railroads at lower rates than are paid by other persons. Whatever reasonable rates commercial travelers are made to pay, other travelers may be made to pay. To charge one more than the other is unjust discrimination. And this is true whether the tickets issued are mileage tickets or in some other form.

The refusal of the defendant, The Chicago & Grand Trunk Railway Company, to sell the complainant, Larrison, a thousand mile ticket for \$20, the price at which said Company was selling such tickets to commercial travelers, and the neglect to publish rates at which defendant was offering to sell mileage tickets, were alike in conflict with the Act to Regulate Commerce.

In this opinion all concur.

ORDER.

This case being at issue upon complaint and answer on file, and having been duly assigned for hearing on the 15th day of June, 1887, and hearing having been had upon the pleadings, proofs and arguments of counsel, and the report and opinion of the Commission having been made and filed, wherein the Commission has found as facts that the defendant corporation is a common carrier of passengers upon its railroad from Port Huron in the State of Michigan, through the State of Indiana, to the City of Chicago in the State of Illinois; that the complainant corporation owns and operates a railroad extending from the City of Detroit in the State of Michigan, into and through the State of Indiana, to Chicago in the State of Illinois, and as such common carrier of passengers between said States is a competitor with complainant; that, while the defendant was selling and offering to sell, to the class of persons known as commercial travelers, mileage tickets entitling the holder to transportation to the extent of 1,000 miles over its road between said States for \$20, and refusing to sell for less than \$25 like tickets to persons not commercial travelers, this complainant was selling such thousand mile tickets for \$25 to the public generally, without discrimination in favor of any person or class of persons.

And the Commission having adjudged that to refuse to sell such mileage tickets to the

public generally at as low a rate as to persons belonging to the class of commercial travelers, and that to charge one person more than another were acts of unjust discrimination within the meaning of the provisions of sections 2 and 3 of the Act to Regulate Commerce, and were in contravention of the provisions of said sections of said Act.

Now, It is ordered that so much of the prayer of the petition as prays that the defendant be required to cease and desist from the acts above recited be, and the same is hereby, granted; and that the defendant be, and it hereby is, required to cease and desist from the said unlawful acts of discrimination.

It is further ordered that a notice embodying this order be forthwith sent to the defendant corporation, together with a copy of the report and opinion of the Commission herein, in conformity with the provisions of the fifteenth section of the Act to Regulate Commerce.

TRADERS & TRAVELERS UNION

v.

PHILADELPHIA & READING R. R. CO
and Lehigh Valley R. R. Co.*

On a petition by the Traders & Travelers Union, alleging that the defendant railroads had, prior to the time when the Interstate Commerce Act went into effect, entered into an arrangement with petitioner to allow 150 pounds of **extra free baggage** to passengers presenting the "**baggage indemnity certificate**" issued by petitioner, and that the defendants now refuse to make such allowance of extra free baggage,—*Held*,

(a) That there is **nothing** in the facts disclosed by the evidence which involves any question of unjust discrimination or extortion, or any other matter over which the Commission has jurisdiction.

(b) That the **power to enforce contracts** has not been **confided to the Commission**, nor has it any general power or authority to manage the business of carriers, but only a limited power, expressly defined by the Act, to interfere to prevent wrong and oppression in specified cases.

(c) That the petition must be **dismissed**.

(Decided July 26, 1887.)

REPORT AND OPINION OF THE COMMISSION.

Bragg, Commissioner:

The petition in this proceeding was filed on the 21st day of May, 1887. It avers that the petitioner was incorporated under the general laws of the State of New York in the year 1884. That the object and purpose of the corporation is to provide for the loss or injury to baggage by creating a contingent fund for that purpose, known as the Traders & Travelers Indemnity Fund, and by means of registration to prevent the loss of baggage, or in case of

*See ante, 18, 62, 315.

its loss to provide means for tracing it more quickly and with less difficulty than exists under the system commonly in use among the railroads. It avers that the petitioner contracted with the International Baggage Register Company for the purpose of providing for a certain protection against loss of baggage covered by said indemnity fund, and that this registry system is of great value to the railroads of the United States.

It avers that the railroads have been asked to grant an additional allowance of 150 pounds of free baggage for passengers covering their baggage with a registry and indemnity certificate issued by the Traders & Travelers Union, which releases the railroads from all liability for loss or injury to such baggage; that the benefits to railroads from such registration are the release from all responsibility for loss or injury to baggage covered by the indemnity insurance, as secured for the railroads through a contract made by the railroads with the petitioner and the increase of their business; that such an arrangement was made in January, 1886, between the Lehigh Valley Railroad Company and the Philadelphia & Reading Railroad Company; that in consequence of these arrangements, many travelers have covered their baggage with indemnity certificates of the petitioner, in order to secure the additional allowance of free baggage; that the issue of these indemnity certificates is not, and has not been, confined to any one or more classes of travelers, but is, and has been, open to all who desire to avail themselves of their advantages; that on March 26, 1887, the Philadelphia & Reading Railroad Company notified petitioner that it would refuse to honor any indemnity certificates issued after April 1, 1887; but that all certificates issued prior to receipt of the notice would be honored until they expired; that the issuance of such notice was caused by the Philadelphia & Reading Railroad Company's interpretation of the Act entitled The Act to Regulate Commerce; that the Philadelphia & Reading Railroad Company intended to honor the certificates issued prior to April 1, 1887, and instructed its baggage men so to do; that the Lehigh Valley Railroad Company has discontinued its arrangement with the petitioner and has instructed its baggage men not to honor indemnity certificates issued prior to April 1, 1887; that the Lehigh Valley Railroad Company discontinued this arrangement in consequence of the belief that its continuance is prohibited by the Act entitled the Act to Regulate Commerce; that on April 11, 1887, the petitioner requested the Interstate Commerce Commission to interpret the Law on this subject; that on or about April 30, 1887, the Lehigh Valley Railroad Company filed a petition against the Philadelphia & Reading Railroad Company for the purpose of securing an interpretation of the law on this point; that on May 11, 1887, petitioner was notified by the Philadelphia & Reading Railroad Company that it would refuse to recognize the indemnity certificates issued prior to April 1, 1887; that this action taken by the Philadelphia & Reading Railroad Company was to induce the Lehigh Valley Railroad Company to withdraw its complaint against the Philadelphia & Reading Railroad Company so

as to prevent an interpretation of the Law by the Interstate Commerce Commission.

That the Philadelphia & Reading Railroad Company requested the Lehigh Valley Railroad Company to withdraw this complaint; that such withdrawal would still leave the question in suspense; and that such withdrawal will prove injurious to the interests of the petitioner and others; that there are now in existence a number of baggage indemnity certificates that will expire at various dates between now and March 24, 1888, and that the result of the refusal to recognize such certificates on the part of the Philadelphia & Reading Railroad Company and of the Lehigh Valley Railroad Company will cause serious injury to holders of such certificates and to the interests of your petitioner.

On June 10, 1887, each of the defendants filed its answer to the complaint.

In its answer the Philadelphia & Reading Railroad Company admits the incorporation of the petitioner and the objects of that incorporation as stated in the petition; and that the petitioner has created a contingent fund known as the Traders & Travelers Baggage Indemnity Fund; and that on or about November, 1885, petitioner entered into a contract with the National Baggage Registry & Manufacturing Company, mentioned in its petition, to act as its agent; and also that the railroads of the United States had been requested by the petitioner to cooperate with it and to grant an additional free allowance of 150 pounds of baggage to each passenger who participated in the indemnity fund, provided for loss or injury to baggage, and who should file with the petitioner power of attorney granting a release to all railroads and transportation lines, contracting with petitioner for free baggage to the extent of 150 pounds over the ordinary allowance on the presentation of the baggage indemnity certificate of the Traders & Travelers Union.

It further admits that the consideration for such action on the part of the railroads was the continuance of the registration and release of the responsibility for the loss or injury to such baggage through the contract thus made. It does not admit that the registry system, mentioned in the petitioner's complaint, is one that is of great value to the railroads of the United States, and that it enables them to identify the passenger with his baggage, and in various ways prevents irregularities, and increases the efficiency and revenue of their baggage department. It does not admit that in consequence of the alleged arrangement between petitioner and defendants many travelers in various parts of the country have availed themselves of its advantages and have covered their baggage with the indemnity certificates of the petitioner, in order to secure the additional free allowance of 150 pounds of baggage. It does not admit that the advantages claimed by the petitioner have not been confined or restricted to any one class of travelers, or to the members of any one or more organizations, or that they have been open to all who desired to avail themselves of the same. It does not admit that on April 11, 1887, petitioner addressed a communication to the Interstate Commerce Commission requesting an

interpretation of the Law, and that the Commission replied that no decision could be given without an actual case in controversy.

It admits that the arrangement claimed in the petition was made by the petitioner with the Lehigh Valley Railroad Company, by its leased lines in January, 1886, and it admits that the Lehigh Valley Railroad Company issued a circular dated April 1, 1887, in which its agents were instructed to allow but 150 pounds of free baggage under any conditions. It does not admit that the Lehigh Valley Railroad Company claims that its discontinuance of that arrangement is caused entirely by the belief that its continuance is prohibited by the Act entitled an Act to Regulate Commerce. It admits that the arrangement claimed to have been made in the petition by and between the petitioner and the Philadelphia & Reading Railroad Company and its leased lines, as stated in Circular 40, dated January 18, 1886, was made by or with the Philadelphia & Reading Railroad Company, but avers that it was made by the receivers of that Company, and further avers that it was never consummated by any contract or agreement in writing between the parties thereto, but also avers that its continuance for any definite period of time was never agreed upon.

It denies that the Philadelphia & Reading Railroad Company, on the 26th day of March, 1887, notified petitioner that it would refuse to honor any indemnity certificate issued after April 1, 1887, but that all certificates issued prior to the receipt of such notice should be honored until they expired, but states that this notice was issued by the Receiver of the Philadelphia & Reading Railroad Company, and that it believes that this was due to the belief of such receivers that the honoring of indemnity certificates was contrary to the provisions of the Act of Congress referred to, known as the Interstate Commerce Law. It admits the filing of a petition to the Interstate Commerce Commission by the Lehigh Valley Railroad Company, as charged in the complaint. It admits that the Philadelphia & Reading Railroad Company requested the Lehigh Valley Railroad Company to withdraw its petition from before the Interstate Commerce Commission, but says that it was not notified as to what the object of the petition was, and denies that in making such request of the Lehigh Valley Railroad Company to withdraw said petition from before the Interstate Commerce Commission, it intended to prevent an interpretation of the Law upon the point raised by that complaint.

It admits that the withdrawal of the petition of the Lehigh Valley Railroad Company will still leave in suspense the question to be determined. It does not admit that such withdrawal of the petition of the Lehigh Valley Railroad Company from before the Interstate Commerce Commission would prove injurious to the interests of the petitioner, or injurious to the interests of the general public concerned in the question, and it does not admit that there are now in existence a number of baggage indemnity certificates that will not expire until various dates between now and March 24, 1888, and that the result of a refusal to recognize these certificates on the part of the Philadel-

phia & Reading Railroad Company and the Lehigh Valley Railroad Company, will be the cause of serious injury to the interests of those holding such certificates as well as to the interests of the petitioner, and may render petitioner liable to action and litigation by the holders of such certificates claiming breach of performance of the conditions thereof.

The answer of the Lehigh Valley Railroad Company admits the incorporation of the petitioner as alleged in the petition, the objects of its incorporation, the creation of the contingent fund known as the Traders & Travelers Baggage Indemnity Fund, and the contract between the petitioner and the National Registry & Manufacturing Company to act as its agents, made about November, 1885, as alleged in the petition.

It further admits, as alleged in the petition, that the railroads of the United States have been requested by the petitioner to co-operate with it, and to induce the registration and indemnification of baggage and granting an additional free allowance of 150 pounds of baggage to each passenger as alleged in the petition.

It further admits that the consideration for such action on the part of the railroads is the registration and release of responsibility for the loss or injury to such baggage through the contract made with the petitioner. It neither admits nor denies the averments of the petition in relation to the great value of the registry system to the railroads of the United States; or that many travelers in various parts of the country have availed themselves of its advantages and covered their baggage with the indemnity certificates of the petitioner, in order to secure the additional free allowance of 150 pounds of baggage; or that such advantages as are afforded by it have not been confined or restricted to any one or more classes of travelers, or to members of any one or more organizations, but are and have been open to all who desired to avail themselves of the same. It admits that on January 18, 1886, it issued Circular No. 14 of that date, which among other things recognized the certificates of the petitioner for free baggage to the extent of 300 pounds, but says that the arrangement with petitioner in consequence of which the circular was issued, was a verbal one between certain officers or agents of that Company, and was not for any specific duration or term, and denies that the alleged printed contract marked "D," attached to the petition, was executed by the defendant.

It admits that on March 26, 1887, the Philadelphia & Reading Railroad Company notified petitioner that it would refuse to honor any indemnity certificates issued after April 1, 1887, but would honor all certificates issued prior to the receipt of such notice until they expired, but does not admit that this action was taken on the part of the Philadelphia & Reading Railroad Company on account alone of its interpretation of the statute entitled "An Act to Regulate Commerce."

It admits that the Lehigh Valley Railroad Company issued the circular mentioned in the petition, instructing its agents to allow any passenger but 150 pounds of free baggage under any conditions, and says that it discontin-

ued that arrangement with petitioner because it was advised that such arrangement should be discontinued in view of the Act of Congress approved February 4, 1887, entitled "An Act to Regulate Commerce."

It admits the filing of the petition of April 11, 1887, to the Interstate Commerce Commission by the petitioner as averred in the complaint, the filing of the petition of the Lehigh Valley Railroad Company to the Interstate Commerce Commission; and avers that after the filing of the petition the Philadelphia & Reading Railroad Company withdrew the privileges of holders of the indemnity certificates of the petitioner; that no answer was filed to said petition, and that it was withdrawn by E. B. Byington, the General Passenger Agent, by whom it was filed.

It does not admit that such withdrawal of the petition would leave the question to be determined still in suspense, or that it will prove injurious to the interests of the petitioner in this complaint, and injurious to the interests of the general public concerned, or that there are in existence a number of baggage indemnity certificates of petitioner that will expire at various dates between now and March 24, 1888, or that the result of the refusal of the defendant to recognize the certificates will cause serious injury to those holding such certificates, as well as to the interests of the petitioner, and may render petitioner liable to action and litigation by holders of such certificates, claiming breach of performance of the conditions thereof. It asserts that the case stated by the petitioner does not come within the provisions of the Act of Congress entitled "An Act to Regulate Commerce," nor within the jurisdiction of the Commission thereby established; and prays that as to it said petition may be dismissed.

From admissions in the pleadings and from proofs before us, we find the facts material to the determination of this complaint to be, in substance, as follows:

In the year 1884 the Traders & Travelers Union (co-operative) of New York was incorporated under the Laws of the State of New York. One object of its incorporation, as specified in its charter, is to provide for injury to or loss of baggage; and for that purpose it has created a contingent fund, known as the Traders & Travelers Baggage Indemnity Fund. On or about November, 1885, it entered into a contract with the National Registry & Manufacturing Company to act as its agents, and for the purpose of providing protection against loss of baggage covered by the said baggage indemnity fund. This registry system is of value to railroads in enabling them to identify the passenger with his baggage, and in various ways to prevent irregularities, and to trace the baggage in case of loss; and it also holds the railroad company harmless for the loss of the baggage by means of the indemnity fund mentioned. Many of the railroads of the United States, prior to the passage of the Interstate Commerce Law, entered into this arrangement with the Traders & Travelers Union. Among these were the Philadelphia & Reading Railroad Company, and Lehigh Valley Railroad Company, each of which entered into such an

arrangement in January, 1886. The terms of the arrangement provide that it is open to all who desire to avail themselves of it, and is not confined merely to classes of travelers, or to commercial men, or to members of any one or more organizations. By this arrangement, and in consideration of it, the railroad companies which very generally allowed, prior to that time, baggage free of charge to the amount of 150 pounds to each passenger, increased this allowance to 800 pounds of free baggage to each passenger availing himself of this arrangement.

After the enactment of the Interstate Commerce Law the Philadelphia & Reading Railroad Company, and the Lehigh Valley Railroad Company, each discontinued this arrangement, on the ground that it was in conflict with the provisions of the Law. Since the first of April, 1887, none of the railroad companies of the country have any arrangement with the Traders & Travelers Union for the allowance of 800 pounds of free baggage, as provided in these certificates, but have abandoned that arrangement, and now allow only 150 pounds of baggage free to each passenger. The certificates mentioned provide for the transportation of baggage over the railroads, upon the terms and conditions above indicated. A charge was made of \$3.20 per annum to each customer of the Traders & Travelers Union. Two dollars of that amount went to the indemnity fund, and the item of 20 cents was for the rental of the plates used in the registration of the baggage. The Traders & Travelers Union, under that system, gave insurance on property to the estimated value of \$200 on each trunk; and in case of loss the passenger would have to prove his loss, the same as with any other insurance company, and could recover the amount actually lost not exceeding \$200 on each trunk. This insurance covers loss by fire, collision, theft and, in fact, loss of every character, and releases the railroad company from all liability absolutely. The trunk thus registered has a plate riveted to it, and there is another trunk plate with a like number which certifies that this trunk belongs to the passenger. Checks or cards are given for these trunks, and a report of the trunks thus registered and checked is made by the baggage master.

In all these facts, which we have carefully considered, there is nothing that involves any question of unjust discrimination or extortion, or any other matter over which we have any jurisdiction. If petitioner has contracts or business arrangements with defendants or others, by which large numbers of its certificates are outstanding in the hands of holders, and if in any of the matters related in this evidence it has been injured and wronged by the defendants, there are courts provided by law having jurisdiction to hear and determine controversies of that character. The power to enforce contracts is not one which has been confided to us. Nor have we any general power or authority to manage the business of carriers, but only a limited power, expressly defined by the Statute, to interfere to prevent wrong and oppression in specified cases. Every ground of our jurisdiction, as defined by the Statute, relates directly or indi-

rectly to the transportation of persons and freight by carriers at fair and reasonable rates, and with absolute impartiality as to facilities and accommodations.

In this proceeding, as in all others, we shall refrain from expressing opinions upon matters that are outside of our jurisdiction, and from entering into any discussion of them. As the evidence shows a case that is not within our jurisdiction, and upon which we can give no relief, *the petition is dismissed.*

In this opinion all concur.

M. A. FULTON

v.

CHICAGO, ST. PAUL, MINNEAPOLIS
& OMAHA R. R. CO.

1. The Interstate Commerce Act contemplates that when a complaint is made against a carrier on the ground of exorbitant rates, the carrier may change its rates before a hearing is had, so as to remedy the matter complained of, if it shall see proper so to do.
2. Hence, petition dismissed without prejudice, where it appeared from a reply filed by the complainant to the defendant's answer, that the rates originally complained of had been reduced, and no complaint was made against such reduced rates.

(Decided July 20, 1887.)

REPORT AND OPINION OF THE COMMISSION.

Bragg, Commissioner:

The complaint in this proceeding was filed on the 26th day of April, 1887. It avers, in substance, that during February and March, 1887, the defendant carried a very large amount of freight from Chicago to St. Paul and Minneapolis at less than half the rates it charged at the time of the filing of this complaint. It further charges that in 1886 the rate complainant paid on first class freight from Chicago to Hudson was forty cents per 100 pounds, and that at the time the complaint was filed it was seventy-five cents per 100 pounds. It also avers that in 1886 the net traffic earnings of the defendant, at its then rates, were sufficient during that year to pay interest on its bonds, dividends on preferred stock, and to leave remaining in its treasury a surplus. The complaint relates to the rates between Chicago and Hudson, a distance of 882 miles; but it also charges in general that the rates at intermediate stations between these points are exorbitant. No damages are claimed.

To this complaint, on the 16th day of May, 1887, the defendant filed an answer which states, in substance, that the complaint shows on its face that the complainant has sustained no injury or damage. It further states that the rates fixed for carrying freights from Chicago to Hudson and other points between Chicago and Hudson, by defendant over its line, are just and unreasonable. A sworn copy of the tariff rates of the defendant in force on and after April 5, 1887, between Chicago and

Hudson and intermediate points, is made a part of the answer, as is also a sworn copy of the tariff rates in force on six trunk lines in the territory north and west of Chicago for distances substantially similar to that between Chicago and Hudson; also a sworn comparative statement of the tariff rates of defendant between Chicago and Hudson, and all intermediate points before and after April 5, 1887. It further avers that the railroads between Chicago and Hudson are owned by two companies, namely: the Chicago and Northwestern Railway Company, owning and operating the line from Chicago to Elroy, a distance of 212 miles, while that portion of the line between Elroy and Hudson, a distance of 170 miles, is owned and operated by the defendant; and that the tariff complained of is the joint tariff made by the said two companies.

To this answer of the defendant, the complainant on July 11, 1887, filed a sworn reply in which he states, in substance, that in June, 1887, the defendant reduced its rates, of which he had complained, from 5 per cent to 100 per cent, thereby confessing that his complaint was well founded.

Neither party has offered any evidence. The burden of proof is on the petitioner to sustain the charges set forth in his petition by evidence which shows with reasonable certainty that they are, in substance, true; and this he has not done. It further appears from the sworn reply of the petitioner to the answer of the defendant that while he admits that the rates against which he complained have been reduced by the defendant from 5 per cent to 100 per cent since his complaint was filed, yet he does not make any complaint against these reduced rates. The law contemplates that when complaint is made a carrier may change its rates before a hearing is had, so as to remedy the matter complained of, if it shall see proper so to do.

As there is no evidence before us that the rates of the defendant now in force are unreasonable, and, in fact, no complaint against them, *the petition is dismissed without prejudice.*

In this opinion all concur.

F. D. HARDING

v.

CHICAGO, ST. PAUL, MINNEAPOLIS
& OMAHA R. R. CO.

1. On a petition charging the exaction of unreasonable rates, the burden of proof is on the petitioner to sustain the charges by evidence which shows with reasonable certainty that they are in substance true.
2. Hence, petition charging that the rates on twine for harvesters, from Chicago to Hudson, was unreasonable, dismissed without prejudice, where the answer denied that the rate was unreasonable, and showed that it had been reduced, and neither party offered any evidence.

(Decided July 20, 1887.)

REPORT AND OPINION OF COMMISSION.

Bragg, Commissioner.

The complaint in this proceeding was filed on the 18th day of May, 1887, and charges, in substance, that during the months of June, July and August, in the year 1886, the defendant charged complainant on twine from Chicago to Hudson for the "McCormick Harvesters," fifteen cents per hundred pounds; and that in May, 1887, the defendant charged freight at twenty-nine cents per hundred pounds on the same kind of shipments and between the same points. The complaint avers that the last named rate is unreasonable and unjust, but no damages are claimed.

To this complaint the defendant filed an answer on the 8th of June, 1887, in which, in substance, it admits that during the months of June, July, and August in the year 1886 it charged fifteen cents per hundred pounds on twine from Chicago to Hudson, but avers that it was forced to do so by its competitors who charged that rate from Chicago to St. Paul, and that this rate was compulsory upon the defendant, and was the result of a war of rates, and was a rate that was unreasonably low. It further states that from November 1, 1886, to April 5, 1887, after this war of rates had ended, the defendant charged twenty-six cents per hundred pounds on such shipments from Chicago to Hudson; that from April 5, 1887, to May 16, 1887, the defendant charged twenty-nine cents per hundred pounds on such shipments from Chicago to Hudson, and that on the 16th of May, 1887, and since that time, the defendant has charged, and is now charging, twenty-five cents per hundred pounds on such shipments from Chicago to Hudson. The defendant avers that each of these charges, namely: twenty-six cents per hundred pounds, twenty-nine cents per hundred pounds and twenty-five cents per hundred pounds, were, and are, each of them, just and reasonable charges for the service rendered.

Neither party has offered any evidence. The burden of proof is on the petitioner to sustain the charges averred in his petition by evidence which shows with reasonable certainty that they are in substance true—and as he has not done this his *petition is dismissed without prejudice*.

In this opinion all concur.

George RICE

v.

LOUISVILLE & NASHVILLE R. R. CO.

THE following petition is one of those recently filed by George Rice, of Marietta, Ohio, based upon alleged discriminations in favor of the Standard Oil Company, in the transportation of oil. See *ante*, 354.

The other petitions are based on the same general grounds.

PETITION.

To the Honorable, The Interstate Commerce Commission of the United States of America.

Your complainant, George Rice, who is a resident and citizen of the City of Marietta,

and State of Ohio, files his petition against the Louisville & Nashville Railroad Company, which is a corporation organized and existing in and under the laws of the State of Kentucky and is a citizen of that State, and is a common carrier, engaged in the transportation, for hire, of passengers and property by a continuous carriage or shipment wholly by means of lines of railroad owned, leased and operated by said carrier from the City of Cincinnati in the State of Ohio, to the Cities of Louisville, Lexington, Frankfort, Bloomfield and Bardstown in the State of Kentucky; Nashville, Guthrie and Memphis in the State of Tennessee; Mobile, Montgomery and Selma in the State of Alabama; New Orleans in the State of Louisiana; Evansville in the State of Indiana, and thence across the State of Illinois to St. Louis, in the State of Missouri; and from said Cincinnati and said Louisville to all points on said carriers' said lines of railroad between said Cincinnati and said Louisville and the other aforementioned towns and cities.

Your complainant further states that one of the important duties of said Louisville & Nashville Railroad Company is the transportation of refined illuminating petroleum oil (mostly produced and manufactured in the States of Pennsylvania and Ohio), from Cincinnati, Ohio and Louisville, Kentucky, to the aforementioned cities and other points on the said carriers' said lines of railroad in the said several States, and other States into and through which said carriers' railroad lines pass.

That such oil is an article of extensive commerce and of prime necessity to the people reached by said carriers' railroad lines, and that in the transportation of such oil by said carrier two prevailing methods are employed: one by means of box cars, carrying the oil in barrel packages, and the other by iron tank cars, generally holding 100 barrels and upwards, built and used for that express purpose.

And said complainant further says that he is engaged at Marietta, Ohio, and in that vicinity, in the business of producing, manufacturing and dealing in, such petroleum oils, and shipping the same to various markets in the Southern and Western States of this country; and that he has large capital invested in such business, and extensive facilities therefor, and, but for the acts of said carrier hereinafter complained of, would produce and sell many thousands more barrels of such oil than now; that many of his principal markets for his said manufacture are in the territory reached and traversed by said carriers' system of railways; that it is absolutely essential to the continued existence and success of his said business that he should have rates and facilities, both reasonable in themselves, and equally as favorable as those accorded his competitors for the transportation of said products to such markets, many of which can only be reached by said carriers' roads, and none of which can be reached as conveniently or cheaply by any other means if said complainant is accorded reasonable and just rates by said carrier.

Complainant further states that, the Standard Oil Company, a corporation organized and existing in, under the laws of, the State of Kentucky, is a very extensive dealer in, and shipper of, such petroleum oils, and is his chief

and almost sole competitor for the sale thereof in the aforesaid markets.

And said complainant further states that said carrier has been guilty of violations of the provisions of the Act of Congress of the United States of America, entitled "An Act to Regulate Commerce," approved February 4, 1887, and which took effect April 5, 1887, in the following particulars, to wit:

First Charge: By making charges for services to be rendered by said carrier in the transportation of such as aforesaid from Cincinnati, Ohio, and said Louisville, Kentucky, to points on the said carrier's said railroad lines in the said States other than Ohio and Kentucky, which were in themselves unjust and unreasonably high.

Under this charge the complainant makes the following specifications, each and all of which are rates per 100 lbs. charged by said Railroad Company on May 9, 1887, and as complainant is informed and believes, and so alleges, ever since that day, for services to be rendered by said Company in the transportation, in barrel packages, in car load shipments, of such oils from said Louisville, Kentucky, to the respective destinations named, each and all of which destinations are points reached by the lines of railroad owned, leased and operated by said Railroad Company, and each and all of which rates complainant alleges to be unreasonable and unjust.

1. Mobile, Ala.	-	30	cents
2. New Orleans, La.	-	30	"
3. Montgomery, Ala.	-	45 7-10	"
4. Selma, Ala.	-	45 7-10	"
5. Birmingham, Ala.	-	45 7-10	"
6. Nashville, Tenn.	-	18 3-4	"
7. Memphis, Tenn.	-	15	"
8. Clarksville, Tenn.	-	16 8-10	"

All other points reached by said lines of railroad, located in States other than Kentucky, the rates of which appear in the statement of rates required by said Act of Congress and on file with said Commission, and each and all of which rates complainant alleges to be unreasonable and unjust. Complainant under said charges also makes the following specifications, each and all of which are the rates per 100 lbs. charged by said Railroad Company for the transportation of such oils, in barrel packages, in car load shipments, from Cincinnati, Ohio, to the respective destinations named, each and all of which are points reached by the lines of the railroad owned, leased and operated by defendants, and are in States other than the State of Ohio, which rates appear on the tariff sheets of defendant furnished by it to complainant May 9, 1887, as showing its rates then in force, and which rates complainant is informed and believes, and alleges, have ever since been in force, each and all of which rates complainant alleges to be unreasonably high and unjust:

10. Nashville, Tenn.	-	25	cents.
11. Decatur, Ala.	-	50	"
12. Birmingham, Ala.	-	59	"
13. Calera, Ala.	-	59	"
14. Montgomery, Ala.	-	59	"
15. Selma, Ala.	-	59	"
16. Pensacola, Fla.	-	45	"
17. Mobile, Ala.	-	39	"
18. New Orleans, La.	-	39	"

Second Charge: Complainant, for a second charge against defendant, alleges that defendant has, ever since April 5, 1887, charged complainant for services to be rendered by the defendant in the transportation of such oils for complainant from said Cincinnati, Ohio, to points in States other than Ohio reached by the lines of railroad owned, operated and leased by defendant, and from Louisville, Kentucky, to points in States other than Kentucky reached by said lines of railroad, a greater compensation than it charged said Standard Oil Company of Kentucky for like and contemporaneous services rendered and to be rendered by defendant for said company in the transportation of such oils for said company, said company being sometimes consignee thereof, and sometimes consignor thereof, and sometimes both consignee and consignor thereof, from said Cincinnati, Ohio, to said points in States other than Ohio, and from said Louisville, Kentucky, to said points in States other than Kentucky, all of said transportation, both for complainant and said Standard Oil Company, being under substantially similar circumstances and conditions.

Under the above charge complainant makes the following specifications:

1. The following is a statement of the rate per 100 lbs. charged by defendant on May 9, 1887, and ever since, to complainant and to said Standard Oil Company, of Kentucky, for the transportation of such oils from Louisville, Kentucky, to the respective destinations named.

Destination.	To Geo. Rice.	To Standard Oil Co.
Montgomery, Ala.	45 7-8 cts.	30 cts.
Selma, Ala.	45 7-10 "	30 "
Birmingham, Ala.	45 7-10 "	30 "
Nashville, Tenn.	18 3-4 "	15 "
Memphis, Tenn.	15 "	15 1-2 "

2. The following is a statement of the rate per 100 lbs. charged by defendant on May 9, 1887, and ever since, to complainant and said Standard Oil Company, of Kentucky, respectively, for the transportation of such oils from Cincinnati, Ohio, to the respective destinations named:

Destination.	To Geo. Rice.	To Standard Oil Co.
Decatur, Ala.	50 cts.	46 cts.
Birmingham, Ala.	59 "	47 "
Calera, Ala.	59 "	47 "
Montgomery, Ala.	59 "	47 "
Selma, Ala.	59 "	47 "
Pensacola, Fla.	45 "	40 "
Mobile, Ala.	39 "	34 "
New Orleans, La.	39 "	34 "

3. Defendant has, in all its charges to complainant, for services rendered and to be rendered by it in the transportation of oils for him over its said lines of railroad, charged him for the entire actual weight of such oils, while defendant has, in many instances too numerous to mention without unduly encumbering the record, since April 5, 1887, charged said Standard Oil Company, for services rendered it or to be rendered by it for said Standard Oil Company, in transportation of oils over its said lines of railroad, for much less than the actual weight of such oils.

4. The freight rate charged by defendant to complainant ever since April 5, 1887, for the transportation of such oils in barrel packages,

REPORT AND OPINION OF COMMISSION.

Bragg, Commissioner:

The complaint in this proceeding was filed on the 18th day of May, 1887, and charges, in substance, that during the months of June, July and August, in the year 1886, the defendant charged complainant on twine from Chicago to Hudson for the "McCormick Harvesters," fifteen cents per hundred pounds; and that in May, 1887, the defendant charged freight at twenty-nine cents per hundred pounds on the same kind of shipments and between the same points. The complaint avers that the last named rate is unreasonable and unjust, but no damages are claimed.

To this complaint the defendant filed an answer on the 8th of June, 1887, in which, in substance, it admits that during the months of June, July, and August in the year 1886 it charged fifteen cents per hundred pounds on twine from Chicago to Hudson, but avers that it was forced to do so by its competitors who charged that rate from Chicago to St. Paul, and that this rate was compulsory upon the defendant, and was the result of a war of rates, and was a rate that was unreasonably low. It further states that from November 1, 1886, to April 5, 1887, after this war of rates had ended, the defendant charged twenty-six cents per hundred pounds on such shipments from Chicago to Hudson; that from April 5, 1887, to May 16, 1887, the defendant charged twenty-nine cents per hundred pounds on such shipments from Chicago to Hudson, and that on the 16th of May, 1887, and since that time, the defendant has charged, and is now charging, twenty-five cents per hundred pounds on such shipments from Chicago to Hudson. The defendant avers that each of these charges, namely: twenty-six cents per hundred pounds, twenty-nine cents per hundred pounds and twenty-five cents per hundred pounds, were, and are, each of them, just and reasonable charges for the service rendered.

Neither party has offered any evidence. The burden of proof is on the petitioner to sustain the charges averred in his petition by evidence which shows with reasonable certainty that they are in substance true—and as he has not done this his *petition is dismissed without prejudice*.

In this opinion all concur.

George RICE

LOUISVILLE & NASHVILLE R. R. CO.

THE following petition is one of those recently filed by George Rice, of Marietta, Ohio, based upon alleged discriminations in favor of the Standard Oil Company, in the transportation of oil. See *ante*, 354.

The other petitions are based on the same general grounds.

PETITION.

To the Honorable, The Interstate Commerce Commission of the United States of America.

Your complainant, George Rice, who is a resident and citizen of the City of Marietta,

and State of Ohio, files his petition against the Louisville & Nashville Railroad Company, which is a corporation organized and existing in and under the laws of the State of Kentucky and is a citizen of that State, and is a common carrier, engaged in the transportation, for hire, of passengers and property by a continuous carriage or shipment wholly by means of lines of railroad owned, leased and operated by said carrier from the City of Cincinnati in the State of Ohio, to the Cities of Louisville, Lexington, Frankfort, Bloomfield and Bardstown in the State of Kentucky; Nashville, Guthrie and Memphis in the State of Tennessee; Mobile, Montgomery and Selma in the State of Alabama; New Orleans in the State of Louisiana; Evansville in the State of Indiana, and thence across the State of Illinois to St. Louis, in the State of Missouri; and from said Cincinnati and said Louisville to all points on said carriers' said lines of railroad between said Cincinnati and said Louisville and the other aforementioned towns and cities.

Your complainant further states that one of the important duties of said Louisville & Nashville Railroad Company is the transportation of refined illuminating petroleum oil (mostly produced and manufactured in the States of Pennsylvania and Ohio), from Cincinnati, Ohio and Louisville, Kentucky, to the aforementioned cities and other points on the said carriers' said lines of railroad in the said several States, and other States into and through which said carriers' railroad lines pass.

That such oil is an article of extensive commerce and of prime necessity to the people reached by said carriers' railroad lines, and that in the transportation of such oil by said carrier two prevailing methods are employed: one by means of box cars, carrying the oil in barrel packages, and the other by iron tank cars, generally holding 100 barrels and upwards, built and used for that express purpose.

And said complainant further says that he is engaged at Marietta, Ohio, and in that vicinity, in the business of producing, manufacturing and dealing in, such petroleum oils, and shipping the same to various markets in the Southern and Western States of this country; and that he has large capital invested in such business, and extensive facilities therefor, and, but for the acts of said carrier hereinafter complained of, would produce and sell many thousands more barrels of such oil than now; that many of his principal markets for his said manufacture are in the territory reached and traversed by said carriers' system of railways; that it is absolutely essential to the continued existence and success of his said business that he should have rates and facilities, both reasonable in themselves, and equally as favorable as those accorded his competitors for the transportation of said products to such markets, many of which can only be reached by said carriers' roads, and none of which can be reached as conveniently or cheaply by any other means if said complainant is accorded reasonable and just rates by said carrier.

Complainant further states that, the Standard Oil Company, a corporation organized and existing in, under the laws of, the State of Kentucky, is a very extensive dealer in, and shipper of, such petroleum oils, and is his chief

and almost sole competitor for the sale thereof in the aforesaid markets.

And said complainant further states that said carrier has been guilty of violations of the provisions of the Act of Congress of the United States of America, entitled "An Act to Regulate Commerce," approved February 4, 1887, and which took effect April 5, 1887, in the following particulars, to wit:

First Charge: By making charges for services to be rendered by said carrier in the transportation of such as aforesaid from Cincinnati, Ohio, and said Louisville, Kentucky, to points on the said carrier's said railroad lines in the said States other than Ohio and Kentucky, which were in themselves unjust and unreasonably high.

Under this charge the complainant makes the following specifications, each and all of which are rates per 100 lbs. charged by said Railroad Company on May 9, 1887, and as complainant is informed and believes, and so alleges, ever since that day, for services to be rendered by said Company in the transportation, in barrel packages, in car load shipments, of such oils from said Louisville, Kentucky, to the respective destinations named, each and all of which destinations are points reached by the lines of railroad owned, leased and operated by said Railroad Company, and each and all of which rates complainant alleges to be unreasonable and unjust.

1. Mobile, Ala. -	30	cents
2. New Orleans, La. -	30	"
3. Montgomery, Ala. -	45 7-10	"
4. Selma, Ala. -	45 7-10	"
5. Birmingham, Ala. -	45 7-10	"
6. Nashville, Tenn. -	18 3-4	"
7. Memphis, Tenn. -	15	"
8. Clarksville, Tenn. -	16 3-10	"

All other points reached by said lines of railroad, located in States other than Kentucky, the rates of which appear in the statement of rates required by said Act of Congress and on file with said Commission, and each and all of which rates complainant alleges to be unreasonable and unjust. Complainant under said charges also makes the following specifications, each and all of which are the rates per 100 lbs. charged by said Railroad Company for the transportation of such oils, in barrel packages, in car load shipments, from Cincinnati, Ohio, to the respective destinations named, each and all of which are points reached by the lines of the railroad owned, leased and operated by defendants, and are in States other than the State of Ohio, which rates appear on the tariff sheets of defendant furnished by it to complainant May 9, 1887, as showing its rates then in force, and which rates complainant is informed and believes, and alleges, have ever since been in force, each and all of which rates complainant alleges to be unreasonably high and unjust:

10. Nashville, Tenn. -	25	cents.
11. Decatur, Ala. -	50	"
12. Birmingham, Ala. -	59	"
13. Calera, Ala. -	59	"
14. Montgomery, Ala. -	59	"
15. Selma, Ala. -	59	"
16. Pensacola, Fla. -	45	"
17. Mobile, Ala. -	39	"
18. New Orleans, La. -	39	"

Second Charge: Complainant, for a second charge against defendant, alleges that defendant has, ever since April 5, 1887, charged complainant for services to be rendered by the defendant in the transportation of such oils for complainant from said Cincinnati, Ohio, to points in States other than Ohio reached by the lines of railroad owned, operated and leased by defendant, and from Louisville, Kentucky, to points in States other than Kentucky reached by said lines of railroad, a greater compensation than it charged said Standard Oil Company of Kentucky for like and contemporaneous services rendered and to be rendered by defendant for said company in the transportation of such oils for said company, said company being sometimes consignee thereof, and sometimes consignor thereof, and sometimes both consignee and consignor thereof, from said Cincinnati, Ohio, to said points in States other than Ohio, and from said Louisville, Kentucky, to said points in States other than Kentucky, all of said transportation, both for complainant and said Standard Oil Company, being under substantially similar circumstances and conditions.

Under the above charge complainant makes the following specifications:

1. The following is a statement of the rate per 100 lbs. charged by defendant on May 9, 1887, and ever since, to complainant and to said Standard Oil Company, of Kentucky, for the transportation of such oils from Louisville, Kentucky, to the respective destinations named.

Destination.	To Geo. Rice.	To Standard Oil Co.
Montgomery, Ala.	45 7-8 cts.	30 cts.
Selma, Ala.	45 7-10 "	30 "
Birmingham, Ala.	45 7-10 "	30 "
Nashville, Tenn.	18 3-4 "	15 "
Memphis, Tenn.	15 "	15 1-2 "

2. The following is a statement of the rate per 100 lbs. charged by defendant on May 9, 1887, and ever since, to complainant and said Standard Oil Company, of Kentucky, respectively, for the transportation of such oils from Cincinnati, Ohio, to the respective destinations named:

Destination.	To Geo. Rice.	To Standard Oil Co.
Decatur, Ala.	50 cts.	46 cts.
Birmingham, Ala.	59 "	47 "
Calera, Ala.	59 "	47 "
Montgomery, Ala.	59 "	47 "
Selma, Ala.	59 "	47 "
Pensacola, Fla.	45 "	40 "
Mobile, Ala.	39 "	34 "
New Orleans, La.	39 "	34 "

3. Defendant has, in all its charges to complainant, for services rendered and to be rendered by it in the transportation of oils for him over its said lines of railroad, charged him for the entire actual weight of such oils, while defendant has, in many instances too numerous to mention without unduly encumbering the record, since April 5, 1887, charged said Standard Oil Company, for services rendered it or to be rendered by it for said Standard Oil Company, in transportation of oils over its said lines of railroad, for much less than the actual weight of such oils.

4. The freight rate charged by defendant to complainant ever since April 5, 1887, for the transportation of such oils in barrel packages,

carload shipments, owner's risk, from Louisville, Kentucky, to Huntsville, Alabama, is 87 cents per hundred pounds including the weight of barrels which is the rate for such transportation appearing in the tariff sheet of defendant in force ever since April 5, 1887, yet, about May 1, 1887, a carload of oil containing 66 barrels of oil weighing, including barrels, 24,750 lbs. was delivered by said Standard Oil Company, to defendant at Louisville, Kentucky, to be transported to Huntsville, Alabama; said oils were consigned to Halsey Bros. at Huntsville, Alabama, who were the agents at said place, of said Standard Oil Company, and competitors in business at said point, with complainant; said oils were transported from Louisville, Kentucky, to Huntsville, Alabama, and the charge made by defendant for such transportation was \$68.07 or 27½ cents per 100 lbs.

Third Charge: Complainant for a third charge against defendant says that the defendant, in its rates charged by it for services rendered and to be rendered by it for the transportation of said oils for complainant and said Standard Oil Company, from Cincinnati, Ohio, to points reached by defendant's said lines of railroad in States other than Kentucky, has, since April 5, 1887, uniformly made and given undue and unreasonable preferences and advantages to said Standard Oil Company, of Kentucky, and to certain localities on its lines of railroad, and had subjected complainant, and certain localities on its lines of railroad, to undue and unreasonable prejudices and disadvantages.

Under the above charge complainant makes the following specifications:

1. Complainant here repeats under this charge specification No. 1, under the second charge of his complaint; and alleges that the differences in the circumstances surrounding the shipments of said George Rice, and said Standard Oil Company, and that any differences to defendant in the cost and expense and convenience of transportation of said oils of said George Rice and said company respectively, and any differences between the circumstances under which said Rice and said company respectively ship their oils justifying any differences in rate, if there be any, are small and insignificant in comparison with the differences in the rates so charged them respectively.

Complainant here repeats under this charge specification No. 2, under the second charge of his complaint; and alleges that the differences in rates therein appearing are not measured by any differences in the circumstances surrounding the shipments of said George Rice and said Standard Oil Company, and that any differences to defendant in the cost and expense and convenience, of transporting such oils for said Rice and said company respectively, and any differences between the circumstances under which said Rice and said company respectively shipped their oils justifying any difference in rate, if there be any, are small and insignificant in comparison with the differences in the rates charged them respectively.

Complainant is informed and believes and therefore states that—

3. Defendant owns a number of tank cars

as hereinbefore described, and furnishes the same to said Standard Oil Company for its use in transporting oil shipped by said Company from Cincinnati, Ohio, to points reached by defendant's said lines of railroad in States other than Ohio, and from Louisville, Kentucky, to points reached by defendant's said lines of railroad in States other than Kentucky, but refuses to furnish the same to said George Rice for his use in transporting oil from said Cincinnati, Ohio, and Louisville, Kentucky, to such points in States other than Ohio and Kentucky.

4. Defendant in its freight rates for the transportation of such oils from Cincinnati, Ohio, to points reached by defendant's said lines of railroad in States other than Ohio, and from Louisville, Kentucky, to points reached by defendant's said lines of railroad in States other than Kentucky, almost uniformly since April 5, 1887, has charged a higher rate per 100 lbs. for oil transported by it in barrel packages, in car load shipments, owner's risk, than it charged per 100 lbs. for such oils transported by it at the same time between the same points, contained in tank cars, owner's risk; while at no time has there been any difference between the cost, expense and convenience of transporting said oils by said two methods, or any circumstances justifying a difference of rate between said two methods of transportation, which even approximated the differences in defendant's freight rates for transportation by said two methods, any differences between the cost, expense and convenience to defendant of transportation by said two methods or any circumstances justifying a difference in rate between said two methods being slight and insignificant compared with the differences in rate between said two methods actually made by defendant. Complainant ships his oils over defendant's lines of railroad exclusively in barrel packages, while said Standard Oil Company ships its oil over defendant's lines of railroad almost exclusively in tank cars.

5. Defendant's freight rates per 100 lbs. for the transportation of such oils from Louisville, Kentucky, to the following destinations are the same whether the oil is carried in barrel packages or in tank cars.

Mobile, Ala.	Jackson, Miss.
New Orleans, La.	Jackson, Tenn.
Meridian, Miss.	Vicksburg, Miss.

while defendant's freight rates per 100 lbs. for the transportation of such oils from Louisville, Kentucky, to nearly all, if not all, the other points reached by defendant's lines of railroad in States other than Kentucky, are much higher for oils carried in barrel packages than for oils carried in tank cars.

6. Defendant's freight rates per 100 lbs. for the transportation of such oils from Cincinnati, Ohio, to Nashville, Tenn., and Mobile, Ala., are the same whether the oil is carried in barrel packages or in tank cars, while the defendant's freight rates per 100 lbs. for the transportation of such oils from Cincinnati, Ohio, to nearly all, if not all, the other points reached by defendant's lines of railroad in States other than Ohio, are much higher when the oils are carried in barrel packages than when the oils are carried in tank cars.

7. Defendant has since April 5, 1887.

charged for the transportation of oils from Cincinnati, Ohio, and from Louisville, Kentucky, to Birmingham, Alabama, Calera, Alabama, Montgomery, Alabama, and Selma, Alabama, the same freight rates in all case to each of said localities, although by defendant's line of road said Calera is 83 miles farther from said Cincinnati and said Louisville than said Birmingham, and said Montgomery is 63 miles farther from said Cincinnati and said Louisville than said Calera, and said Selma is 50 miles farther from said Cincinnati and said Louisville than said Montgomery; and oils transported by defendant from Cincinnati, Ohio, or Louisville, Kentucky, to said Selma are necessarily carried by it through said Birmingham, said Calera and said Montgomery; and the distance from said Cincinnati to said Selma over defendant's line of road is 650 miles, and the distance from said Louisville to said Selma over defendant's line of road is 540 miles.

Fourth Charge: Complainant for a fourth charge against defendant says that defendant has since April 5, 1887, charged and received for the transportation by it of such oils from Cincinnati, Ohio, and Louisville, Kentucky, to points reached by defendant's said lines of railroad in States other than Ohio and Kentucky, a greater compensation in the aggregate, for a shorter than for a longer distance the same line in the same distance, the shorter being included within the longer distance, such oils being a light kind of property in all cases, and such transportation being under substantially the same circumstances and conditions.

Under the above charge complainant makes the following specification: the rate charged by defendant for the transportation of such oils in barrel packages, in car load shipments, from Cincinnati, Ohio, to and from Louisville, Kentucky, to destination named below, with the distances of each destination from the place of shipment over defendant's said line of railroad are as follows:

From Cincinnati, Ohio:		
Destination.	Distance.	Rate per 100 lbs.
New Orleans, La.	921 miles,	89 cents.
Birmingham, Ala.	504 "	59 "

Mobile, Ala.	780 miles	32 cents
From Louisville, Kentucky:		
Destination.	Distance.	Rate per 100 lbs.
New Orleans, La.	811 miles.	35 cents.
Birmingham, Ala.	394 "	52 "
Mobile, Ala.	780 "	35 "

Said complainant further alleges that the aforesaid discriminations against him in rates, and the aforesaid unreasonably high and unjust rates charged him, have had, and as he believes, were designed to have, the effect to give the Standard Oil Company, an almost complete monopoly of the traffic in such oils at the points reached by said defendant's lines of railroad and to exclude said complainant's products from nearly all of said points; and that such discriminations and charges, as complainant is informed and believes, and therefore states, have been made by said defendant at the dictation of said Standard Oil Company; and he states that by reason of the premises he has been largely injured in his business and has lost large profits that he otherwise would have realized; that his facilities in all other respects than for said transportations during all the time since April 5, 1887, have been ample for the transaction of a large and profitable business in the sale of said oils in said markets, and that but for the premises, he would have prosecuted such business to the limits of his facilities with great profit to himself.

Your said complainant therefore prays that your honorable Commission will proceed to inquire into the matters hereinbefore complained of and ascertain, and find, the facts with respect to the alleged violation of said Act of Congress, and the extent to which said complainant has been injured and is entitled to reparation, and report the same, with your conclusions and recommendations according to law; and further that your honorable Commission will notify said defendant to cease and desist from such violations and make such reparation, and will take such further action as is lawful and proper in the premises.

George Rice, complainant,
By Wm. B. Loomis and
A. D. Follet, his counsel.

UNITED STATES SUPREME COURT.

OUACHITA & MISSISSIPPI RIVER
PACKET CO., William T. Scovell *et al.*,
Appts.,

v.

CATHERINE M. AIKEN, Admr. of
JOSEPH A. AIKEN, Deceased, John H.
Menge *et al.*, Copartners, as Joseph A. Aiken
& Co., AND CITY OF NEW ORLEANS.

(From Lawyers' ed. U. S. Reports, Bk. 80.)

1. In the absence of interference by Congress, a State may establish, manage and carry on works and improvements of a local character, though they necessarily more or less affect interstate commerce.
2. Wharfage is subject to local state laws, Congress having passed no Act

to regulate it; and by those laws its reasonableness must be determined.

3. Charges for wharfage, graduated by tonnage of vessels using a wharf, are not open to the objection that they are duties on tonnage within the meaning of the Constitution.
4. Where wharfage charges are reasonable, it in no way concerns those who pay them, what application is made of the proceeds. Their appropriation to maintain, extend, light and police the wharves is unobjectionable, although a profit may be realized by lessees from the city which owns them.

(Argued Jan. 5, 1887. Decided April 25, 1887.)

APPEAL from the Circuit Court of the United States for the Eastern District of Loui-

INTER 8.

siana. Reported below, 4 Woods, 208. *Affirmed.*

The history and facts of the case appear in the opinion of the court.

Messrs. John H. Kennard and William W. Howe, for appellants.

Messrs. William S. Benedict, George Denégre and Thomas L. Bayne, for appellees.

Mr. Justice Bradley delivered the opinion of the court:

The bill in this case was filed in the Circuit Court of the United States by the appellants, for themselves and all others in like interest who should come in and contribute to the expenses of the suit, against Catherine M. Aiken, administratrix of Joseph A. Aiken, and others, residents of New Orleans, doing business under the firm name of Joseph A. Aiken & Co., and against the City of New Orleans. The complainants are owners of steamboats plying between New Orleans and other ports and places on the Mississippi River and its branches in other States than Louisiana; and the burden of their complaint is that the rates of wharfage which they are compelled to pay for their vessels at New Orleans are unreasonable and excessive, are really duties of tonnage, and imposed in violation of the Constitution of the United States. The defendants, Joseph A. Aiken & Co., at the time of filing the bill, were lessees of the public wharves belonging to the City of New Orleans, under a lease from the City made in May, 1881, for the term of five years; and, as such lessees, charged and collected the wharfage complained of. The object of the bill, as shown by its prayer, was to obtain an injunction to prevent the defendants from exacting the excessive charges referred to, the complainants expressing a willingness to pay all reasonable wharfage.

The bill alleges that on the 17th of January, 1875, the council of the City of New Orleans adopted an ordinance, "fixing and regulating charges for wharfage, levee, and other facilities afforded by the City of New Orleans to commerce," by which ordinance, among other matters and things, it was ordained that the wharfage dues on all steamboats shall be fixed as follows: "Not over five days, ten cents per ton, and each day thereafter, five dollars per day; boats arriving and departing more than once a week, five cents per ton each trip; boats lying up for repairs during the summer months to occupy such wharves as may not be required for shipping, for thirty days or under, one dollar per day." The entire ordinance was filed with the bill as an exhibit, showing the rates of wharfage to be charged for vessels of every kind.

The bill then states that on the 17th of May, 1881, the council of the City adopted an ordinance directing the administrator of commerce to advertise for sealed proposals for the sale of the revenues of the wharves and levees for the term of five years, upon certain conditions specified, among which were the following; viz.: to keep the wharves and levees in good repair; to construct such new wharves as might be necessary, not exceeding the expenditure, in any one year, of \$25,000; to light the wharves with electric lights; and to pay the City annually the sum of \$40,000, of which \$30,000

should be devoted to the maintenance of a harbor police for the protection of commerce, and the remaining \$10,000 should be devoted exclusively to the payment of salaries of wharfingers, signal officers, and other employees on the levees. The sale was to be adjudicated to the persons who should agree to charge the lowest rates of wharfage. Joseph A. Aiken put in a proposal to take the lease on the conditions specified, at the rates of wharfage named in the Ordinance of 1875, with certain reductions which he agreed to make from time to time; and this proposal was accepted by the council.

The power to construct and maintain levees and wharves, and to prescribe and collect rates of levee dues and wharfage, had been conferred upon the city council by its charter (Act of March 16, 1870, No. 7, § 12); and by the Act of March 18, 1871, it was authorized to lease the wharves, upon adjudication, for any term not to exceed ten years at a time. Laws of 1871, No. 48, § 7.

The point raised by the complainants is that the rates of wharfage proposed by the lessees were necessarily enhanced by the condition requiring them to erect new wharves, to maintain electric lights, and to pay the City \$40,000 per annum for the maintenance of a harbor police, and the payment of salaries to wharfingers, etc. They argue, therefore, that the rates agreed to be charged were intended, not merely as compensation for the use of wharves already constructed, but as a tax to raise money for the use of the City, to enable it to do those things the expense of which should be defrayed from its general resources; it being contended that wharfage cannot be charged for the purpose of raising money to build wharves, but only for the use of them when built. The complainants contend that the charges are unreasonable and excessive as wharfage, and therefore unauthorized as such, and, in effect, a direct duty, or burden, upon commerce. They offered a good deal of evidence to show that the rates of wharfage charged are onerous and excessive, and that, without the conditions referred to, the lessees could have offered to take much lower rates; or, at all events, that much lower rates would have been a reasonable and sufficient compensation. On the other hand, the defendants offered evidence to show that the rates were reasonable, and that, with the same or even higher rates, the City itself, before leasing out its wharves, lost every year a large amount of money in their administration. The court below declared "that the exactions of wharfage are substantially expended for the benefit of those using the wharves, and that the proof does not satisfy us that the rates are exorbitant or excessive." *Ouachita Packet Co. v. Aiken*, 4 Woods, 208, 213. We do not think it necessary to scrutinize the evidence very closely. With the circuit court, we see nothing in the purposes for which the lessees were required to expend or pay money, at all foreign to the general object of keeping up and maintaining proper wharves, and providing for the security and convenience of those using them. The case is clearly within the principle of the former decisions of this court, which affirm the right of a State, in the absence of regulation by Congress, to establish, manage and carry on

works and improvements of a local character, though necessarily more or less affecting interstate and foreign commerce. We may particularly refer to the recent cases of *Trans. Co. v. Parkersburg*, 107 U. S. 691 [27:584]; *Morgan v. Louisiana*, 118 U. S. 455 [ante, 237]; and *Huse v. Glover*, 119 U. S. 543 [ante, 487], in which most of the former decisions involving the same principle are cited and referred to. The first of these was a case of wharfage; the second, one of quarantine; and the third, that of a lock in Illinois River constructed by the State of Illinois in aid of navigation. The same principle was applied and enforced in the cases of *Cooley v. Board of Wardens*, 53 U. S. 12 How. 299 [13:996], on the subject of pilotage; in *Mobile Co. v. Kimball*, 102 U. S. 691 [26:238], where a state law provided for the improvement of the river and harbor of Mobile; in the various cases of bridges over navigable rivers which have come before this court, and which are reviewed and approved in *Escanaba Co. v. Chicago*, 107 U. S. 678 [27:442]; and in *Turner v. Maryland*, Id. 38 [27:370], which related to the inspection of tobacco. The same principle was reaffirmed, with the limitations to which its application is subject, in the recent case of *Robbins v. Shelby Co. Taring Dist.* 120 U. S. 489, 493 [ante, 694]. In all such cases of local concern, though incidentally affecting commerce, we have held that the Courts of the United States cannot, as such, interfere with the regulations made by the State, nor sit in judgment on the charges imposed for the use of improvements or facilities afforded, or for the services rendered under state authority. It is for Congress alone, under its power to regulate commerce with foreign Nations and among the several States, to correct any abuses that may arise, or to assume to itself the regulation of the subject. If, in any case of this character, the Courts of the United States can interfere in advance of Congressional legislation, it is (as was said in *Morgan v. Louisiana*, *qua supra*), where there is a manifest purpose, "by roundabout means, to invade the dominion of federal authority."

Wharfage, the matter now under consideration, is governed by the local state laws; no Act of Congress has been passed to regulate it. By the state laws it is generally required to be reasonable; and by those laws its reasonableness must be judged. If it does not violate them, as before said, the United States Courts cannot interfere to prevent its exaction. Of course, neither the State, nor any municipal corporation acting under its authority, can lay duties of tonnage; for that is expressly forbidden by the Constitution; but charges for wharfage may be graduated by the tonnage of vessels using a wharf; and that this is not a duty of tonnage, within the meaning of the Constitution, has been distinctly held in several cases; among others, in those of *Packet Co. v. Keokuk*, 95 U. S. 80 [24:377]; *Packet Co. v. St. Louis*, 100 U. S. 423 [25:688]; *Packet Co. v. Catlettsburg*, 105 U. S. 559 [26:1169]; and *Trans. Co. v. Parkersburg*, 107 U. S. 691 [*supra*].

The charges in the present case are professedly for wharfage, and we see nothing in the ordinance fixing the rates inconsistent with the idea that they are such. The City, by its charter, had the power to fix the rates of wharfage, and it established those now complained

of. We do not see the slightest pretext for calling the manything else than wharfage. The manner in which the receipts are to be appropriated does not change the character of the charges made. In the case of *Huse v. Glover*, 119 U. S. 543, 549 [Bk. 30, L. ed. 487, 490], it was said: "By the terms tax, impost, duty, mentioned in the ordinance [the Ordinance of 1787], is meant a charge for the use of the government, not compensation for improvements. The fact that if any surplus remains from the tolls, over what is used to keep the locks in repair, and for their collection, it is to be paid into the state treasury as a part of the revenue of the State, does not change the character of the toll or impost. In prescribing the rates it would be impossible to state in advance what the tolls would amount to in the aggregate. That would depend upon the extent of business done; that is, the number of vessels and amount of freight which may pass through the locks. Some disposition of the surplus is necessary until its use shall be required, and it may as well be placed in the state treasury, and probably better, than anywhere else." And in the case of *Transportation Co. v. Parkersburg*, we said: "It is also obvious that since a wharf is property, and wharfage is a charge or rent for its temporary use, the question whether the owner derives more or less revenue from it, or whether more or less than the cost of building and maintaining it, or what disposition he makes of such revenue, can in no way concern those who make use of the wharf and are required to pay the regular charges therefor; provided, always, that the charges are reasonable and not exorbitant."

In the present case, however, as already indicated, the appropriation actually made of the receipts, namely: to the objects of keeping the wharves in repair, of gradually extending them as additions may be needed, and of maintaining a police for their protection, and lights for their better enjoyment, is entirely germane to the purpose of wharfage facilities. It is what any prudent proprietor would do; it is what the City itself would do if it managed the wharves on its own account. But even if it were otherwise, if a profit should happen to be realized by the City, or the lessees, beyond the amount of expenditures made, this would not make the charges any the less wharfage. And being wharfage, and nothing else, if the charges are unreasonable, remedy must be sought by invoking the laws of the State, which cannot be done in this suit, inasmuch as the jurisdiction of the court is rested on the supposed unconstitutionality of the charges for wharfage, and not on the citizenship of the parties. If the state laws furnish no remedy (in other words, if the charges are sanctioned by them), then, as before stated, it is for Congress, and not the United States Courts, to regulate the matter, and provide a proper remedy. Such an interposition may become necessary; for although the imposition of unreasonable wharfage by a city or a State is always the dictate of a suicidal policy, the temptation of immediate advantage under stringent pressure will often lead to its adoption.

What measures Congress might adopt for the purpose of preventing abuses in this and like matters, it is not for us to determine. It is possible that a law declaring that wharfage shall

be reasonable, and not oppressive, would answer the purpose. It would then be in the power of the federal courts to inquire and determine as to the reasonableness of the charges actually imposed. That no such inquiry, except in the administration of the state law, can be instituted, as the law now stands, is shown in some of the cases to which we have referred. In *Transportation Co. v. Parkersburg*, 107 U.S. 691, 699 [27:584, 587], we said: "It is an undoubted rule of universal application, that wharfage for the use of all public wharves must be reasonable. But then the question arises, By what law is this rule established, and by what law can it be enforced? By what law is it to be decided whether the charges imposed are, or are not, exorbitant? There can be but one answer to these questions: Clearly it must be by the local municipal law, at least until some superior or paramount law has been prescribed. * * * The Courts of the United States do not enforce the common law in municipal matters in the State because it is federal law, but because it is the law of the State."

As the only question determinable in this suit is whether the charges of wharfage complained of were, or were not, contrary to the Constitution or any law of the United States, and as it is clear that they were not, *the decree of the Circuit Court must be affirmed.*

GLOUCESTER FERRY COMPANY, *Piff.*
in Err.,
v.

COMMONWEALTH OF PENNSYLVANIA.

(From Lawyers' ed. U. S. Reports, Bk. 20.)

1. **Commerce among the States** consists of intercourse and traffic between their citizens and includes the transportation

of persons and property, and the navigation of public waters for that purpose, as well as the purchase, sale and exchange of commodities.

2. **The power to regulate interstate and foreign commerce vested in Congress** is the power to prescribe the rules by which it shall be governed—that is, the conditions upon which it shall be conducted; to determine when it shall be free from, and when subject to, duties or other exactions.
3. With reference to the subjects of commerce which are local and limited in their nature or sphere of operation the **States may prescribe regulations** until Congress intervenes and assumes control.
4. When the subjects of commerce are national in character and require uniformity of regulation affecting alike all of the States, the **power of Congress is exclusive.**
5. The commerce with foreign nations and between the States, which consists in the transportation of persons and property between them, is a subject of national character and requires uniformity of regulation. **Congress alone can deal with such transportation**, and its non-action is a declaration that it shall remain free from burdens imposed by state legislation.
6. **Freedom of transportation** implies exemption from charges other than such as are imposed by way of compensation for the use of the property employed, or for facilities afforded for its use, or as ordinary taxes upon the value of the property within the jurisdiction of the State.
7. **Receiving and landing passengers and freight** is incident to their trans-

NOTE.—Constitutional law—interstate commerce; regulation of—power of Congress—how far exclusive.

The power to regulate interstate commerce vested in Congress is the power to prescribe the rules by which it shall be conducted, to determine when it shall be free from, and when subject to, duties or other exactions.

When the subjects of commerce are national in character and require uniformity of regulation, the power of Congress is exclusive. In addition to the above case of *Gloucester Ferry Co. v. Pa.*, see *Welton v. Mo.* 91 U.S. (bk. 23, 847, 849); *Glman v. Philadelphia*, 70 U.S. (3 Wall.), 713, (bk. 18, 96); *Henderson v. Mayor*, 92 U.S. 259, (bk. 23, 548); *Mobile Co. v. Kimball*, 102 U.S. 691, (bk. 26, 241); *Brown v. Houston*, 114 U.S. 622, *post*.

In general, when exercised by Congress, the power is exclusive of all state interference. *Gibbons v. Ogden*, 22 U.S. (9 Wh.), 1; *Sinnot v. Davenport*, 66 U.S. (22 How.) 227, bk. 16, 243; *Hall v. De Cuir*, 93 U.S. 485, bk. 24, L. ed. 547.

Inaction by Congress amounts to a declaration that all commerce within its exclusive control shall remain free and untrammelled. In addition to the above case of *Gloucester Ferry Co. v. Pa.* see *Welton v. Mo.* 91 U.S. 876, bk. 23, 847; *Escanaba Co. v. Chicago*, 107 U.S. 879, bk. 27, 442; *Henderson v. Mayor*, 92 U.S. 259, bk. 23, 543; *Brown v. Houston*, *supra*.

The power vested in Congress covers navigation. *Gibbons v. Ogden*, 22 U.S. (9 Wh.), 1; *Passenger Cases*, 48 U.S. (7 How.) 282.

"Commerce is a term of the largest import. * * * The power to regulate it embraces all the instruments by which such commerce may be conducted." *Welton v. Mo. supra*.

It includes control of the telegraph as an agency of commerce. *Pensacola Tel. Co. v. West*, U. Tel. Co. 96 U.S. 1, bk. 24, 708.

Transportation is essential to commerce, and every obstacle to it or burden laid upon it by legislative authority is regulation. *H. & St. J. R. Co. v. Husen*, 95 U.S. 486, bk. 24, 527, and authorities cited.

Legislation may in a great variety of ways affect commerce and persons engaged in it, without constituting a regulation of it within the meaning of the Constitution." *Hall v. De Cuir*, 93 U.S. 485, *supra*; *Sherlock v. Ailing*, 93 U.S. 169, bk. 23, 820; *State Tax on R. Gross Receipts*, 82 U.S. (15 Wall.) 284, bk. 21, 164; *Munn v. Illinois*, 94 U.S. 113, bk. 24, 77.

The power of Congress does not extend to contracts not designed to create impediments to commerce. A contract by an elevator company to handle all grain brought by a railroad company at a certain price is not repugnant to the power of Congress. *Dubuque etc. R. Co. v. Richmond*, 96 U.S. (19 Wall.) 584, bk. 22, 178.

The paramount authority to regulate bridges, and other structures that affect the navigation of the navigable waters of the United States, is in Congress. *Newport & Cin. Bridge Co. v. U. S.* 105 U.S. 470, bk. 26, 1142, and authorities cited.

But in the absence of legislation by Congress, the States may authorize and regulate bridges and other obstructions to navigation within their limits. *Cardwell v. Bridge Co.* 113 U.S. 205, bk. 23, and authorities cited.

Congress may improve harbors and rivers. *S. Car. v. Ga.* 93 U.S. 4, bk. 23, 782.

The States may also improve the navigable waters within their limits, subject to the control of Congress. *Mobile Co. v. Kimball*, 102 U.S. 691, bk. 26, 238.

portation. All restraints by exactions in the form of taxes upon such transportation or upon acts necessary to its completion, are invasions of the exclusive power of Congress.

8. The only state interference with the landing and receiving of passengers and freight which is permissible is confined to such measures as will prevent confusion among the vessels and collision between them, insure their safety and convenience, and facilitate the discharge or receipt of their passengers and freight.
9. A ferry is a means—and a necessary means—of commercial intercourse between States bordering on dividing waters; and it must therefore be conducted without the imposition by the States of taxes or other burdens upon the commerce between them.
10. The capital stock of the Gloucester Ferry Company, a New Jersey corporation engaged in the transportation of persons and property between Gloucester in that State, and Philadelphia, in Pennsylvania, is not subject to taxation by the State of Pennsylvania.
11. No State can impose a tax on that portion of interstate commerce which is involved in the transportation of persons and property, whatever be the instrumentality by which it is carried on.

(Argued Mar. 12, 1885. Decided Apr. 13, 1885.)

IN ERROR to the Supreme Court of the State of Pennsylvania.

The history and facts appear in the

Statement of the case by Mr. Justice Field:

In March, 1865, the Gloucester Ferry Company, the plaintiff in error here, was incorporated by the Legislature of New Jersey to es-

tablish a steamboat ferry from the Town of Gloucester, in that State, to the City of Philadelphia in Pennsylvania, with a capital stock of \$50,000, divided into shares of \$50 each. During that year it established, and has ever since maintained, a ferry between those places across the river Delaware, leasing or owning steam ferry boats for that purpose. At each place it has a slip or dock on which passengers and freight are received and landed; the one in Gloucester it owns, the one in Philadelphia it leases. Its entire business consists in ferrying passengers and freight across the river between those places. It has never transacted any other business. It does not own, and never has owned, any property, real or personal, in the City of Philadelphia other than the lease of the slip or dock mentioned. All its other property consists of certain real estate in the County of Camden, New Jersey, needed for its business, and steamboats engaged in ferriage. These boats are registered at the Port of Camden, New Jersey. It has never owned any boats registered at a port of Pennsylvania; and its boats are never allowed to remain in that State, except so long as may be necessary to discharge and receive passengers and freight.

In July, 1880, the auditor-general and the treasurer of the State of Pennsylvania stated an account against the Company of taxes on its capital stock, based upon its appraised value, for the years 1865 to 1879, both inclusive, finding the amount of \$2,593.96 to be due the Commonwealth. From this finding an appeal was taken to the Court of Common Pleas of Philadelphia, and was there heard upon a case stated, in which it was stipulated that if the court were of opinion that the Company was liable for the tax, judgment against it in favor of the Commonwealth should be entered for the above amount; but if the court were of opinion that the Company was not liable, judgment should be entered in its favor.

A Statute of Pennsylvania, passed June 7, 1879, "to provide revenue by taxation," in its

The States may regulate subjects of commerce which are local and limited in their nature or sphere of operation until Congress intervenes. In addition to the above case of Gloucester Ferry Co. v. Pa. see Welton v. Mo. supra; Brown v. Houston, supra; Cooley v. Port Wardens, 53 U. S. (12 How.) 299, bk. 13, Pound v. Turok, 95 U. S. 459, bk. 24, 525; Gilman v. Philadelphia, 70 U. S. (3 Wall.) 713, bk. 18, 92; Wilson v. Blackbird Creek M. Co. 27 U. S. (3 Pet.) 245; Escanaba Co. v. Chicago, supra; Miller v. Mayor etc. 100 U. S. 385, bk. 27, 971; Cardwell v. Am. Bridge Co. supra.

The power of Congress to regulate navigation does not interfere with the power of the States to protect and regulate the fisheries within their limits. McCready v. Va. 94 U. S. 391, bk. 24, 248; Smith v. Md. 98 U. S. (18 How.) 71, bk. 15, 269; Green v. The Helen, 1 Fed. Rep. 916.

The power of Congress does not interfere with the police powers of the States. H. & St. J. R. Co. v. Husen, supra; Webber v. Va. 103 U. S. 844, bk. 26, 565.

A statute which prevents the introduction of all Texas, Mexican, and Indian cattle into the State during eight months in the year, and which makes no distinction between those which are diseased and such as are not, is void, not being a proper exercise of the police power. H. & St. J. R. Co. v. Husen, supra.

The States cannot so exercise the police power as to work a practical assumption of the power vested in Congress. H. & St. J. R. Co. v. Husen, supra.

The internal commerce of a State is not within the

power of Congress. The Daniel Ball v. U. S. 77 U. S. (10 Wall.) 557, bk. 19, L. ed. 999; U. S. v. De Witt, 78 U. S. (9 Wall.) 41, bk. 19, L. ed. 593; Veazie v. Moore, 55 U. S. (14 How.) 583.

Taxation of a chattel used in interstate commerce is not necessarily a regulation of such commerce within the meaning of the Constitution. Wiggins Ferry Co. v. East St. Louis, 107 U. S. 365, bk. 27, 419; Transp. Co. v. Wheeling, 99 U. S. 273, bk. 25, 412.

A license tax on persons dealing in merchandise not the growth, produce, or manufacture of the State, conflicts with the power of Congress. Tiernan v. Rinker, 102 U. S. 123, bk. 26, 103; Cook v. Pa. 97 U. S. 568, bk. 24, 1015; Guy v. Baltimore, 100 U. S. 434, bk. 25, 743, and authorities cited and reviewed.

"No State can, consistently with the Federal Constitution, impose upon the products of other States brought therein for sale or use, or upon citizens because engaged in the sale therein, or the transportation thereto of the products of other States, more onerous public burdens or taxes than it imposes upon the like products of its own territory." Guy v. Baltimore, supra. See also Moran v. New Orleans, 112 U. S. 69, bk. 28, 663, and authorities cited.

Reasonable charges for the use of property or for additional facilities, whether imposed as a tax or otherwise, do not interfere with the power of Congress. See the above case of Gloucester Ferry Co. v. Pa. and the authorities cited in the opinion of the court.

See, generally, Gibbons v. Ogden, 22 U. S. (9 Wh.) 1, note; Brown v. Md. 26 U. S. (12 Wh.) 519, note.

fourth section enacted as follows: "That every company or association whatever, now or hereafter incorporated by or under any law of this Commonwealth, or now or hereafter incorporated by any other State or Territory of the United States or foreign government, and doing business in this Commonwealth or having capital employed in this Commonwealth in the name of any other company or corporation, association or associations, person or persons, or in any other manner, except foreign insurance companies, banks and savings institutions, shall be subject to and pay into the treasury of the Commonwealth annually a tax to be computed as follows, namely: If the dividend or dividends made or declared by such company or association as aforesaid, during any year ending with the first Monday of November, amount to 6 or more than 6 per centum upon the par value of its capital stock, then the tax to be at the rate of one half mill upon the capital stock for each one per centum of dividend so made or declared; if no dividend be made or declared, or if the dividend or dividends made or declared do not amount to 6 per centum upon the par value of said capital stock, then the tax to be at the rate of three mills upon each dollar of a valuation of the said capital stock," made in accordance with the provisions of another section of the Act.

It was under the authority of this Act that the taxes in question were stated against the Company by the auditor-general and the state treasurer.

The court of common pleas held that the taxes could not be lawfully levied, for there was no other business carried on by the Company in Pennsylvania except the landing and receiving of passengers and freight, which is a part of the commerce of the country and protected by the Constitution from the imposition of burdens by state legislation. It therefore gave judgment in favor of the Company. The case being carried on a writ of error to the Supreme Court of the State, the judgment was reversed and judgment ordered in favor of the Commonwealth for the amount mentioned. To review this latter judgment the case is brought here.

Messrs. John G. Johnson, Morton P. Henry, Geo. M. Dallas, M. E. Olmstead and Samuel Dickson, for plaintiff in error:

The business in which the plaintiff in error was engaged was interstate transportation of freight and passengers, and was therefore within the protection of the Constitution of the United States.

Guy v. Baltimore, 100 U. S. 494 (bk. 25, L. ed. 743).

A foreign corporation has the same right as an individual to conduct everywhere the business of interstate transportation.

Paul v. Virginia, 8 Wall. 168 (75 U. S. bk. 19, L. ed. 857); *Pensacola Tel. Co. v. W. U. Tel. Co.* 96 U. S. 12 (bk. 24, L. ed. 711); *Doyle v. Ins. Co.* 94 U. S. 544 (bk. 24, L. ed. 152); *Tel. Co. v. Texas*, 105 U. S. 460 (bk. 26, L. ed. 1067).

It is not competent for the State to tax directly either the transportation or the goods of persons in transit.

State Freight Tax, 15 Wall. 262 (82 U. S. bk. 21, L. ed. 146); *State Tax on Railway Gross Receipts*, 15 Wall. 284 (82 U. S. bk. 21, L. ed. 164); *Passenger Cases*, 7 How. 263 (48 U. S. bk. 12, L. ed. 702); *Crandall v. Nevada*, 6 Wall. 35 (73 U. S. bk. 18, L. ed. 745); *Henderson v. Mayor of N. Y.* 92 U. S. 259 (bk. 23, L. ed. 543); *Guy v. Baltimore*, *supra*; *R. R. Co. v. Husen*, 95 U. S. 465 (bk. 24, L. ed. 527); *Cook v. Pennsylvania*, 97 U. S. 566 (bk. 24, L. ed. 1015); *Sweatt v. R. R. Co.* 3 Cliff. 389; *Tel. Co. v. Texas*, *supra*; *Wellton v. Missouri*, 91 U. S. 275 (bk. 23, L. ed. 347); *Car Co. v. Nolan*, 22 Fed. Rep. 279; *Woodruff v. Parham*, 8 Wall. 188 (75 U. S. bk. 19, L. ed. 386); *Cannon v. New Orleans*, 20 Wall. 577 (87 U. S. bk. 22, L. ed. 417).

Commercial intercourse is guaranteed by the Constitution of the United States. It cannot be forbidden by any State of the Union. All individuals and corporations are entitled to do everything which is necessary to facilitate this intercourse. They do not derive their rights thus to facilitate it from any of the States, and are therefore not subject to a tax because they exercise it.

Shook v. Mfg. Co. 61 Ind. 520; *Ex parte Robinson*, 2 Biss. 309; *Council Bluffs v. R. R. Co.* 45 Iowa, 388; *Coal Co. v. Carrigan*, 39 N. J. 35; *Hays v. Steamship Co.* 17 How. 597 (58 U. S. bk. 15, L. ed. 254); *Gibbons v. Ogden*, 9 Wheat. 1; *Brown v. Maryland*, 12 Wheat. 419 (25 U. S. bk. 6, L. ed. 678).

Messrs. Robert Snodgrass, Deputy Atty-Gen. of Pennsylvania, and Lewis O. Cassidy, Atty-Gen. of Pennsylvania, for defendant in error:

The right of a State to impose a tax upon the capital stock of a foreign railroad, canal, express, and other corporations, graduated by the extent to which their franchises are exercised within the State, cannot at this day be successfully controverted.

Minot v. R. R. Co. 18 Wall. 206 (85 U. S. bk. 21, L. ed. 888).

"A public ferry is a public highway of a special description, and its termini must be in places where the public have rights, as towns or *villes*, or highways leading to towns or *villes*."

Charles River Bridge v. Warren Bridge, 11 Pet. 622 (36 U. S. bk. 9, L. ed. 853).

The business of a ferryage is not "commerce," within the meaning of the Federal Constitution, in the sense that it must be free from state or local authority and control.

A ferry may be an instrument of commerce. It is as much so, and perhaps in the same sense, as a bridge, but in any case it is at most no more than a local aid or instrument, which Congress has never undertaken to regulate or control.

The distinction was forcibly recognized by *Mr. Justice Field*, in *County of Mobile v. Kimball*, 102 U. S. 702 (bk. 26, L. ed. 241).

That the power to establish and regulate ferries as well as other local aids to commerce rests in the State Legislatures and not in Congress, is well settled.

Conway v. Taylor's Ex. 1 Black, 603 (66 U. S. bk. 17, L. ed. 191); *People v. Babcock*, 11 Wend. 586; *Gibbons v. Ogden*, 9 Wheat. 1 (22 U. S. bk. 6, L. ed.); *State v. Frecholders of Hudson*, 3

(87 U. S. bk. 14, L. ed. 1049); *Ferry Co. v. U. S.* 107 U. S. 805 (bk. 27, L. ed. 419).

Ferries are established by the legislative authority of the several States. Without such authority no one, although he may own both banks of a navigable river, has the right to establish the ferry.

Charles River Bridge v. Warren Bridge, 11 Pet. 421 (36 U. S. bk. 9, L. ed. 774), *Mark v. Miller*, 3 Mo. 470, *Trustee v. Tufman*, 18 Ill. 27.

As a geographical fact, as each ferrriage of persons and property is made across the entire stream, this Company is "doing business in this Commonwealth" and is manifestly within the class of corporations intended to be taxed by our laws. But it is not merely within the taxing intention; it is plainly within the taxing power of the State. It is a foreign corporation, not strictly engaged in interstate commerce, and it is sufficient to say that never, since the decision of *Bank of Augusta v. Earle*, 13 Pet. 819 (38 U. S. bk. 10, L. ed. 274), has it been denied that where a State can restrict or control the business of a corporation when transacted within her limits, she can tax such business so far as it is done within her jurisdiction or can exclude the corporation altogether if she so desires.

See also *St. Louis v. Ferry Co.* 11 Wall. 498 (78 U. S. bk. 20, L. ed. 109).

It is moreover to be observed that the tax here sought to be imposed is not a tax upon the specific property of the corporation in which its capital may be invested. It is not an attempt to tax the ferry boats of this Company, nor is it an effort to tax a corporation in proportion to the number of ferry boats it owns. The tax is not imposed either directly or indirectly upon them; it is not measured in amount by their numbers, it is the same whether the Company owns few or many of them, and is unaffected by the frequency of their use. It therefore clashes with none of the following decisions which form part of the judicial argument against its validity:

Cannon v. New Orleans, 20 Wall. 577 (87 U. S. bk. 23, L. ed. 417), *Transportation Co. v. Washington*, 90 U. S. 278 (bk. 26, L. ed. 412); *Morgan v. Parham*, 16 Wall. 471 (83 U. S. bk. 21, L. ed. 303), *Hays v. Steamship Co.* 17 How. 506 (38 U. S. bk. 15, L. ed. 254), *Hoyt v. Commissioners*, 26 N. Y. 237; *Passenger Cases*, 7 How. 283 (48 U. S. bk. 12, L. ed. 702), *Almy v. People*, 24 How. 109 (43 U. S. bk. 16, L. ed. 644), *Crandall v. Nevada*, 6 Wall. 35 (78 U. S. bk. 15, L. ed. 745).

It is rather a tax upon the capital stock of the corporation, "not in separate parcels, as representing distinct properties, but as a homogeneous unit, partaking of the nature of personality," and taxable where its corporate functions are exercised or its business done.

If the business of ferrriage is commerce, as defined by Chief Justice Marshall, we concede that any tax laid upon such business which comes within the ruling of the *Passenger Cases* or the *State Freight Tax Case* or the many other cases involving the same principle, is an interference with commerce, and for that reason, unconstitutional.

Mr. Justice Field delivered the opinion of the court:

LEARN 8.

Its decision, stated that the single question presented for consideration was whether the Company did business within the State of Pennsylvania during the period for which the taxes were imposed; and it held that it did do business there because it landed and received passengers and freight at its wharf in Philadelphia, observing that its whole income was derived from the transportation of freight and passengers from its wharf at Gloucester to its wharf at Philadelphia, and from its wharf at Philadelphia to its wharf at Gloucester; that at each of these points its main business—namely: the receipt and landing of freight and passengers—was transacted; that for such business it was dependent as much upon the one place as upon the other; that, as it could hold the wharf at Gloucester, which it owned in fee, only by purchase by virtue of the statutory will of the Legislature of New Jersey, so it could hold by lease the one in Philadelphia only by the implied consent of the Legislature of the Commonwealth; and that therefore it "was dependent equally, not only for its business, but its power to do that business, upon both States, and might therefore be taxed by both." 98 Pa. St. 105, 116.

As to the first reason thus expressed, it may be answered that the business of landing and receiving passengers and freight at the wharf in Philadelphia is a necessary incident to—indeed, is a part of—their transportation across the Delaware River from New Jersey. Without it that transportation would be impossible. Transportation implies the taking up of persons or property at some point and putting them down at another. A tax, therefore, upon such receiving and landing of passengers and freight is a tax upon their transportation, that is, upon the commerce between the two States involved in such transportation.

It matters not that the transportation is made in ferry boats which pass between the States every hour of the day. The means of transportation of persons and freight between the States does not change the character of the business as one of commerce, nor does the time within which the distance between the States may be traversed. Commerce among the States consists of intercourse and traffic between their citizens, and includes the transportation of persons and property and the navigation of public waters for that purpose as well as the purchase, sale and exchange of commodities. The power to regulate that commerce, as well as commerce with foreign Nations, vested in Congress is the power to prescribe the rules by which it shall be governed—that is, the conditions upon which it shall be conducted; to determine when it shall be free, and when subject to duties or other exactions. The power also embraces within its control all the instrumentalities by which that commerce may be carried on and the means by which it may be aided and encouraged. The subjects, therefore, upon which the power may be exerted are of infinite variety. While with reference to some of them, which are local and limited in their nature or sphere of operation, the States may prescribe regulations until Congress intervenes and assumes control of them, yet, when they are national in their character and

require uniformity of regulation affecting alike all the States, the power of Congress is exclusive. Necessarily that power alone can prescribe regulations which are to govern the whole country. And it needs no argument to show that the commerce with foreign Nations and between the States, which consists in the transportation of persons and property between them is a subject of national character and requires uniformity of regulation. Congress alone, therefore, can deal with such transportation; its nonaction is a declaration that it shall remain free from burdens imposed by state legislation. Otherwise there would be no protection against conflicting regulations of different States, each legislating in favor of its own citizens and products and against those of other States. It was from apprehension of such conflicting and discriminating state legislation, and to secure uniformity of regulation, that the power to regulate commerce with foreign Nations and among the States was vested in Congress.

Nor does it make any difference whether such commerce is carried on by individuals or by corporations. *Wells v. Missouri*, 91 U. S. 275 [Bk. 23 L. ed. 347]; *Mobile Co. v. Kimball*, 102 U. S. 691 [Bk. 26, L. ed. 238]. As was said in *Paul v. Virginia*, at the time of the formation of the Constitution a large part of the commerce of the world was carried on by corporations; and the East India Company, the Hudson's Bay Company, the Hamburg Company, the Levant Company, and the Virginia Company were mentioned as among the corporations which, from the extent of their operations, had become celebrated throughout the commercial world. 8 Wall. 168 [75 U. S. bk. 19, L. ed. 357]. The grant of power is general in its terms, making no reference to the agencies by which commerce may be carried on. It includes commerce by whomsoever conducted, whether by individuals or by corporations. At the present day nearly all enterprises of a commercial character requiring for their successful management large expenditures of money are conducted by corporations. The usual means of transportation on the public waters where expedition is desired are vessels propelled by steam; and the ownership of a line of such vessels generally requires an expenditure exceeding the resources of single individuals. Except in rare instances it is only by associated capital, furnished by persons united in corporations, that the requisite means are provided for such expenditures.

As to the second reason given to the decision below—that the Company could not lease its wharf in Philadelphia except by the implied consent of the Legislature of the Commonwealth, and thus is dependent upon the Commonwealth to do its business, and therefore can be taxed there—it may be answered that no foreign or interstate commerce can be carried on with the citizens of a State without the use of a wharf or other place within its limits on which passengers and freight can be landed and received; and the existence of power in a State to impose a tax upon the capital of all corporations engaged in foreign or interstate commerce for the use of such places would be inconsistent with and entirely sub-

versive of the power vested in Congress over such commerce. Nearly all the lines of steamships and of sailing vessels between the United States and England, France, Germany and other countries of Europe, and between the United States and South America, are owned by corporations; and, if by reason of landing or receiving passengers and freight at wharves or other places in a State, they can be taxed by the State on their capital stock on the ground that they are thereby doing business within her limits the taxes which may be imposed may embarrass, impede and even destroy such commerce with the citizens of the State. If such a tax can be levied at all its amount will rest in the discretion of the State. It is idle to say that the interests of the State would prevent oppressive taxation. Those engaged in foreign and interstate commerce are not bound to trust to its moderation in that respect; they require security. And they may rely on the power of Congress to prevent any interference by the State until the act of commerce—the transportation of passengers and freight—is completed. The only interference of the State with the landing and receiving of passengers and freight which is permissible is confined to such measures as will prevent confusion among the vessels, and collision between them, insure the safety and convenience, and facilitate the discharge or receipt of their passengers and freight, which fall under the general head of port regulations, of which we shall presently speak.

It is true that the property of corporations engaged in foreign or interstate commerce, as well as the property of corporations engaged in other business, is subject to state taxation, provided always it be within the jurisdiction of the State. As said by Chief Justice Marshall in *McCulloch v. Maryland*, 4 Wheat. 429 (17 U. S. bk. 4, L. ed. 607), "All subjects over which the sovereign power of a State extends are objects of taxation; but those over which it does not extend are, upon the soundest principles, exempt from taxation. This proposition may also be pronounced self evident."

In *Huys v. Pacific Mail Steamship Co.* 17 How. 596 [58 U. S. bk. 15, L. ed. 254], the defendant, a corporation of New York, owned steam vessels employed in the transportation of passengers and freight between New York and San Francisco and between New York and different ports in Oregon, which were registered in New York. The principal office of the company for transacting its business was also in New York, though for its better management agencies were established in Panama and in San Francisco. It had a naval dock and ship yard at Benicia, in California, for furnishing and repairing its steamers. On their arrival at the Port of San Francisco they remained only long enough to land their passengers, mail and freight, which was usually done in a day, and then proceeded to Benicia, where they remained for repairs and refitting until the commencement of the next voyage, which was generally some ten or twelve days. It was held that the vessels were not subject to taxation in California, as they were only temporarily there while engaged in lawful trade and commerce; that their situs was at their home port, where their owners were liable to be taxed for the capital

invested. The court, in giving its decision, said that the ships are "engaged in the business and commerce of the country, upon the highway of nations, touching at such ports and places as these great interests demand, and which hold out to the owners sufficient inducements by the profits realized or expected to be realized. And so far as respects the ports and harbors within the United States they are entered and cargoes discharged or laden on board independently of any control over them, except as it respects such municipal and sanitary regulations of the local authorities as are not inconsistent with the Constitution and laws of the General Government, to which belongs the regulation of commerce with foreign Nations and between the States. Now it is quite apparent that if the State of California possessed the authority to impose the tax in question, any other State in the Union into the ports of which the vessels entered in the prosecution of their trade and business, might also impose a like tax."

In *Morgan v. Parham*, 16 Wall. 471 [83 U. S. bk. 21, L. ed. 803], it was held that a vessel registered in New York was not subject to taxation in Alabama, though engaged in commerce as one of a regular line of steamers between Mobile in that State and New Orleans in Louisiana. In rendering the decision it was said: "It is the opinion of the court that the State of Alabama had no jurisdiction over this vessel for the purpose of taxation, for the reason that it had not become incorporated into the personal property of that State, but was there temporarily only and that it was engaged in lawful commerce between the States, with its situs at the home port of New York, where it belonged and where its owner was liable to be taxed for its value," referring to the case of *Hays v. Pacific Mail Steamship Co.*, as decisive of the case; and adding: "The jurisdiction of this court over the present case, as in the case of *Hays v. The Pacific Mail Steamship Company*, arises from the facts, first, that the property had not become blended with the business and commerce of Alabama, but remained legally of and as in New York; and secondly, that the vessel was lawfully engaged in the interstate trade over the public waters. It is in law as if the vessel had never before been within the Port of Mobile, but, touching there on a single occasion when engaged in the interstate trade, had been subjected to a tax as personal property of that city. Within the authorities it is an interference with the commerce of the country not permitted to the States."

In *St. Louis v. Ferry Co.* 11 Wall. 423 [78 U. S. bk. 20, L. ed. 192], the company was incorporated by Illinois to run a ferry from a place opposite St. Louis to that city across the Mississippi. It had its principal place of business in St. Louis, in which its chief officers resided, and there the business meetings of its directors were held. Its engineers and subordinate officers resided in Illinois, where its real estate was situated. Its ferry boats when not in use were laid up in Illinois and forbidden to remain at the wharf in St. Louis. It paid a ferry license to St. Louis and a wharfage tax for the use of its wharf there. In addition to these charges the city authorities assessed a tax on the company for the value of the boats as property

within the city, all property within it being taxable under a statute of the State. The court held that the tax was illegally levied, as the boats were not property within the city, and said: "Where there is jurisdiction neither as to person nor property the imposition of a tax would be *ultra vires* and void. If the Legislature of a State should enact that the citizens or property of another State or country should be taxed in the same manner as the persons or property within its own limits and subject to its authority, or in any other manner whatsoever, such a law would be as much a nullity as if in conflict with the most explicit constitutional inhibition. Jurisdiction is as necessary to valid legislative as to valid judicial action."

In *R. R. Co. v. Pennsylvania*, 15 Wall. 300 [82 U. S. bk. 21, L. ed. 179], sometimes called *Case of State Tax on Foreign-held Bonds*, which was brought here on a writ of error to the Supreme Court of the State, this court said that "The power of taxation, however vast and searching in its extent, is necessarily limited to subjects within the jurisdiction of the State. These subjects are persons, property and business." This proposition would seem, as stated by Chief Justice Marshall, to be self-evident, and no force of expression could add to its manifest truth.

In the recent case of *Pennsylvania v. Standard Oil Co.* 101 Pa. 119, the liability of foreign corporations doing business within that State is elaborately considered by its Supreme Court. The corporation was doing business there, and it was contended on the part of the Commonwealth that the tax should be imposed upon all of the capital stock of the company; while on the other side it was urged that only so much of the stock was intended by the statute to be taxed, as was represented by property of the company invested and used in the State. In giving its decision the court said that it had been repeatedly decided and was settled law that a tax upon the capital stock of a company is a tax upon its property and assets (citing to that effect a large number of decisions); that it was undoubtedly competent for the Legislature to lay a franchise or license tax upon foreign corporations for the privilege of doing business within the State, but that the tax in that case was in no sense a license tax; that the State had never granted a license to the Standard Oil Company to do business there, but merely taxed its property—that is, its capital stock—to the extent that it brought such property within its borders in the transaction of its business; that the position of the Commonwealth—that a foreign corporation entering the State to do business brought its entire capital—was ingenious but unsound; that it was a fundamental principal that in order to be taxed the person must have a domicile in the State, and the State must have a situs therein; that persons and property *in transitu* could not be taxed; that the domicile of a corporation was in the State of its origin, and it could not emigrate to another sovereignty; that the domicile of the Standard Oil Company was in Ohio, and when it sent its agents into the State to transact business it no more entered the State in point of fact than any other foreign corporation, firm or individual who sent an agent there to open an office or branch house, nor

brought its capital there constructively, that it would be as reasonable to assume that a business firm in Ohio brought its entire capital there because it sent its agent to establish a branch of its business, as to hold that the Standard Oil Company by employing certain persons in the State to transact a portion of its business thereby brought all its property or capital stock within the jurisdiction of the State; that there was neither reason nor authority for such a proposition; that the company was taxable only to the extent that it brought its property within the State; and that its capital stock, as mentioned in the Act of the Legislature, must be construed to mean so much of the capital stock as was measured by the property actually brought within the State by the company in the transaction of its business. The justice who delivered the opinion of the court added, speaking for himself, that he conceded the power of the Commonwealth to exclude foreign corporations altogether from her borders, or to impose a license tax so heavy as to amount to the same thing; but he denied, great and searching as her taxing power is, that she could tax either persons or property not within her jurisdiction. "A foreign corporation," he said, "has no domicile here and can have none; hence, it cannot be said to draw to itself the constructive possession of its property located elsewhere. There are a large number of foreign insurance companies doing business here under license from the State. Some of them have a very large capital. It is usually invested at the domicile of the company. If the position of the Commonwealth is correct, she can tax the entire property of the Royal Insurance Company, although the same is located almost wholly in England, or the assets of the New York Mutual, located in New York."

Under this decision there is no property held by the Gloucester Ferry Company which can be the subject of taxation in Pennsylvania, except the lease of the wharf in that State. Whether that wharf is taxed to the owner or to the lessee it matters not, for no question here is involved in such taxation. It is admitted that it could be taxed by the State according to its appraised value. The ferry boats of the Company are registered at the Port of Camden in New Jersey, and according to the decisions in *Hays v. Steamship Co.* and in *Morgan v. Parham* [supra], they can be taxed only at their home port. According to the decision in the *Standard Oil Company Case*, and by the general law on the subject the Company has no domicile in Pennsylvania, and its capital stock representing its property is held outside of its limits. It is solely, therefore, for the business of the Company in landing and receiving passengers at the wharf in Philadelphia that the tax is laid; and that business, as already said, is an essential part of the transportation between the States of New Jersey and Pennsylvania, which is itself interstate commerce. While it is conceded that the property in a State belonging to a foreign corporation engaged in foreign or interstate commerce may be taxed equally with like property of a domestic corporation engaged in that business, we are clear that a tax or other burden imposed on the property of either corpora-

tion because it is used to carry on that commerce, or upon the transportation of persons or property, or for the navigation of the public waters over which the transportation is made, is invalid and void as an interference with and an obstruction of the power of Congress in the regulation of such commerce. This proposition is supported by many adjudications. Thus, in *Gibbons v. Ogden*, the earliest and leading case upon the commercial power of Congress, it was held that the Acts of New York giving to Livingston and Fulton the exclusive right, for a certain number of years, to navigate all the waters within its jurisdiction with vessels propelled by steam, were unconstitutional and void. Making the navigation of those waters subject to a license of the grantee of the State—that is, to such a tax or other burden as they might levy—was an obstruction to commerce between the States and in conflict with the laws of Congress respecting the coasting trade. 9 Wheat. 1. Although the sole point in judgment was whether the State could regulate commerce on her waters in the face of such legislation by Congress, yet the argument of the court was that such attempted control of the navigable waters of the State was an encroachment upon the power of Congress independently of that legislation.

In *Steamship Co. v. Port Wardens*, 6 Wall. 81 [73 U. S. bk. 18, L. ed. 749], it was held that a Statute of Louisiana declaring that the master and wardens of the Port of New Orleans should be entitled to demand and receive, in addition to other fees, the sum of \$5 for every vessel arriving at that port, whether called on to perform any service or not, was unconstitutional and void, as imposing a burden upon commerce, both interstate and foreign. The exaction was in effect a tax for entering the port—that is, for the navigation of its waters. The control of the navigable waters of the port, and of all public waters constituting channels of communication between the States and foreign countries, is embraced within the commercial power of Congress, and equally beyond the interference of the States. It was claimed that the tax was for compensation to the master and wardens for the performance of certain duties required of them, and that the law for its collection stood, therefore, on the same constitutional grounds as the laws authorizing the collection of pilotage; but the court answered that no Acts of Congress recognize such laws as that of Louisiana as proper and beneficial regulations, while state laws in respect to pilotage are thus recognized. The court also added that the right to recover pilotage and half pilotage prescribed by State legislation rested not only upon state laws but upon contract, observing that pilotage was compensation for services performed, and half pilotage was compensation for services which a pilot had put himself in readiness to perform by labor, risk and cost, and had offered to perform; while in the case in Louisiana the state law subjected the vessel to the demand of the master and wardens whether called upon to perform any service or not. The case therefore was simply one of a tax imposed upon the vessel for the navigation of the public waters of the State, and as such was a regulation

of commerce, and

Commerce
the ship-

tent ground shall be covered by those directions, the exercise of state power is excluded. Congress may establish police regulations, as well as the States confining their operations to the subjects over which it is given control by the Constitution; but as the general police power can better be exercised under the provisions of the local authority, and mischiefs are not likely to spring therefrom so long as the power to arrest collision resides in the National Congress, the regulations which are made by Congress do not often exclude the establishment of others by the State covering very many particulars." *Cooley, Const. Lim.* 782.

The power of the States to regulate matters of internal police includes the establishment of ferries as well as the construction of roads and bridges. In *Gibbons v. Ogden* [9 Wheat. 203], Chief Justice Marshall said that laws respecting ferries, as well as inspection laws, quarantine laws, health laws, regulating the internal commerce of the States, are component parts of an immense mass of legislation, embracing everything within the limits of a State not surrendered to the General Government; but in this language he plainly refers to ferries entirely within the State, and not to ferries transporting passengers and freight between the States and a foreign country; for the power vested in Congress, he says, comprehends every species of commercial intercourse between the United States and foreign countries. No sort of trade, he adds, can be carried on between this country and another to which the power does not extend; and what is true of foreign commerce is also true of commerce between States over the waters separating them. Ferries between one of the States and a foreign country cannot be deemed, therefore, beyond the control of Congress under the commercial power. They are necessarily governed by its legislation on the importation and exportation of merchandise and immigration of foreigners—that is, are subject to its regulation in that respect; and if they are not beyond the control of the commercial power of Congress, neither are ferries over waters separating States. Congress has passed various laws respecting such international and interstate ferries, the validity of which is not open to question. It has provided that vessels used exclusively as ferry boats, carrying passengers, baggage and merchandise, shall not be required to enter and clear, nor shall their masters be required to present manifests, or to pay entrance or clearance fees, or fees for receiving or certifying manifests; "but they shall, upon arrival in the United States, be required to report such baggage and merchandise to the proper officer of the customs, according to law"; R. S. § 2792; that the lights for ferry boats shall be regulated by such rules as the board of supervising inspectors of steam vessels shall prescribe; R. S. § 4233, Rule 7; that any foreign railroad company or corporation whose road enters the United States by means of a ferry or tug boat, may own such boat, and that it shall be subject to no other or different restrictions or regulations in such employment than if owned by a citizen of the United States (R. S. § 4870); that the hull and boilers of every ferry boat propelled by steam shall be inspected, and

provisions of law for the better security of life, which may be applicable to them, shall, by regulations of the supervising inspectors, be required to be complied with before a certificate of inspection be granted; and that they shall not be navigated without a licensed engineer and a licensed pilot. R. S. § 4426.

It is true that from the earliest period in the history of the government the States have authorized and regulated ferries not only over waters entirely within their limits, but over waters separating them; and it may be conceded that in many respects the States can more advantageously manage such interstate ferries than the General Government; and that the privilege of keeping a ferry, with a right to take toll for passengers and freight, is a franchise grantable by the State, to be exercised within such limits and under such regulations as may be required for the safety, comfort and convenience of the public. Still, the fact remains that such a ferry is a means—and a necessary means—of commercial intercourse between the States bordering on their dividing waters; and it must therefore be conducted without the imposition by the States of taxes or other burdens upon the commerce between them. Freedom from such imposition does not of course imply exemption from reasonable charges as compensation for the carriage of persons, in the way of tolls or fares, or from the ordinary taxation to which other property is subjected, any more than like freedom of transportation on land implies such exemption. Reasonable charges for the use of property either on water or land are not an interference with the freedom of transportation between the States secured under the commercial power of Congress. *Packet Co. v. Keokuk*, 95 U. S. 80 [Bk. 24, L. ed. 377]; *Packet Co. v. St. Louis*, 100 U. S. 433 [Bk. 25, L. ed. 688]; *Vicksburg v. Tobin*, Id. 430 [Id. 690]; *Packet Co. v. Catlettburg*, 105 U. S. 559 [Bk. 26, L. ed. 1170]; *Transportation Co. v. Parkersburg*, 107 U. S. 691 [Bk. 27, L. ed. 584].

That freedom implies exemption from charges other than such as are imposed by way of compensation for the use of the property employed, or for facilities afforded for its use, or as ordinary taxes upon the value of the property. How conflicting legislation of the two States on the subject of ferries on waters dividing them is to be met and treated is not a question before us for consideration. Pennsylvania has never attempted to exercise its power of establishing and regulating ferries across the Delaware River. Anyone, so far as her laws are concerned, is free, as we are informed, to establish such ferries as he may choose. No license fee is exacted from ferry keepers. She merely exercises the right to designate the places of landing as she does the places of landing for all vessels engaged in commerce. The question, therefore, respecting the tax in the present case is not complicated by any action of that State concerning ferries. However great her power, no legislation on her part can impose a tax on that portion of interstate commerce which is involved in the transportation of persons and freight, whatever be the instrumentality by which it is carried on.

It follows that upon the case stated the tax imposed upon the Ferry Company was illegal and void. *The judgment of the Supreme Court*

of the State of Pennsylvania must therefore be reversed, and the cause remanded for further proceedings in conformity with this opinion.

THE INTERSTATE COMMERCE COMMISSION.

BOSTON CHAMBER OF COMMERCE

v.

LAKE SHORE & MICHIGAN SOUTHERN R. CO.; New York Central & Hudson River R. R. Co.; and Boston & Albany R. R. Co.*

(Filed July 22, 1887.)

PETITION charging discrimination against Boston in favor of New York, in rates from Chicago.

To the Honorable, The Interstate Commerce Commission:

Respectfully represents your petitioner as follows:

1. That it is a corporation duly established under the laws of the Commonwealth of Massachusetts, and is a mercantile society or association located at Boston, in said Commonwealth, and that its membership consists of merchants engaged in carrying on the flour, grain, provision, produce, and other branches of business in said Boston.

2. That the respondent, the Lake Shore & Michigan Southern Railway Company, is a railway company duly incorporated under the laws of the State of Illinois, Indiana, Ohio, Pennsylvania, and New York; and owning and operating a railroad which runs through the said several States, from its western terminus at Chicago, in the State of Illinois, to its eastern terminus at Buffalo, in the State of New York.

That the respondent, the New York Central & Hudson River Railroad Company, is a railroad company duly incorporated under the laws of the State of New York, and owning and operating a railroad which runs through said State, from its western terminus in Buffalo (where it connects with the said first named respondent, the said Lake Shore & Michigan Southern Railway Company) to Albany, in said State of New York, on the Hudson River, and thence to its southern terminus at the City of New York.

That the respondent, the Boston & Albany Railroad Company, is a railroad corporation duly established under the laws of the State of New York and the Commonwealth of Massachusetts, and owning and operating a railroad which runs through both said States, from its western terminus at Albany (where it connects with the said second named respondent, the said New York Central & Hudson River Railroad Company) to its eastern terminus at Boston, in the Commonwealth of Massachusetts.

That the said several respondent railroads thus form, by connection with each other, a through railroad line from Chicago to Boston; and the said first two named respondents also a through line from Chicago to New York.

3. That from the 5th day of April, 1887, down to the date of this petition, the said several respondent companies have, as common car-

riers, been largely engaged, in connection with each other, in the transportation of flour, grain, provisions, and produce wholly by railroad, as aforesaid, from Chicago to Boston, and from Chicago to New York, through the said several States; the said transportation being made under a common control, management, and arrangement for a continuous carriage from Chicago to Boston, and from Chicago to New York, respectively; and that the said respondent railroads have, therefore, as to said transportation, come within the provisions of the Interstate Commerce Act of February 4, 1887, and within the jurisdiction of your honorable Commission.

Your petitioner further says that those goods intended for carriage to Boston, and those intended for carriage to New York, have been, during said period, carried by the two first named respondents at the same amount of expense to themselves, over precisely the same lines of rail, from Chicago as far as Albany, in the State of New York; that goods intended for the City of New York have thence been carried from Albany by said New York Central Road to New York, a distance of 144 miles; while those intended for Boston have been carried from Albany by the said Boston & Albany Railroad to Boston, a distance of 200 miles; the haul from Albany to Boston being, therefore, about fifty-six miles longer than from Albany to New York; that the whole distance over said line from Chicago to New York City is substantially 984 miles; and from Chicago to Boston substantially 1040 miles; and that the cost to said respondent roads of transporting said goods from Chicago to Boston is not only not greater than for transporting the same goods to New York, but that, on the contrary, if the tariff over the respondent roads from Chicago to Boston and to New York were fixed at the same rate, the *pro rata* share thereof received, under the existing arrangement between the roads, by the Lake Shore Railway and the New York Central Railroad, would (by reason of certain terminal expenses in New York which do not, in the case of local trade, exist in Boston at all, and in the case of export trade only to a much smaller amount) be greater for goods carried to Boston than for goods carried to New York; and your petitioner says that the transportations of said goods made by said roads from Chicago to New York, and those made to Boston, have, during said period, been and were a like and contemporaneous service in the transportation of a like kind of traffic, under circumstances and conditions permitting, as above set forth, a lower traffic rate to Boston than to New York, but otherwise substantially similar.

4. That, notwithstanding the premises, the said respondent railroads, since the 5th day of April, 1887, have, as to the flour, grain, provisions, and produce, so carried to Boston, violated the provisions of the said Interstate Commerce Act in this: that they have charged the ship-

*See ante, 354.

pers, owners or consignees of such goods, for the transportation thereof from Chicago to Boston, unjust and unreasonable, unequal and unjustly discriminating and unduly preferential rates; and in support of this allegation your petitioner avers and sets forth the following facts:

(a) That the said railroads have, for transportation of flour, grain, and provisions, from Chicago to Boston, charged at the rate of thirty cents per 100 pounds, or \$90 per car of 30,000 pounds; whereas, for such transportation from Chicago to New York they have, during the same period, charged only twenty-five cents per 100 pounds, or \$75 per car; being an excess of charge for Boston flour, grain, and provisions over New York flour, grain, and provisions of five cents per 100 pounds, or \$15 per car; thus making an unjust discrimination against Boston owners and consignees and in favor of New York owners and consignees; and making an unduly preferential rate in favor of the locality of New York and to the disadvantage of the locality of Boston; and your petitioner shows that said additional rate against Boston is purely artificial, and without justice or proper reason; that for many years hitherto the same sum of five cents extra per 100 over New York rates has been always charged against Boston traffic, when rates from Chicago to New York were fifty cents as well as when they were fifteen cents per 100; and, although the New York rate has, from time to time, been altered until the present rate of twenty-five cents was attained, nevertheless the Boston rate has invariably been still kept at the same artificial advance of five cents over the New York rate, without other reason or excuse than the inability of Boston merchants, prior to the formation of your honorable Commission, to make any effectual remonstrance or complaint. And your petitioner in like manner shows, that since the said 5th day of April, 1887, the respondent roads, for the transportation of produce (eggs, butter, cheese, etc.) from Chicago to Boston, have charged at the rate of seventy-five cents per 100 pounds; whereas, for such transportation from Chicago to New York they have, during the same period, charged only sixty-five cents per 100 pounds; thus in like manner making an unjust discrimination and an unduly preferential rate in favor of New York and New York owners and consignees, and against Boston and Boston owners and consignees.

And your petitioner further in this connection shows that, although the said roads have, as above set forth, during the said period, charged more for transportation of goods from Chicago to Boston than from Chicago to New York, they have at the same time on the other hand charged precisely the same rates on return or west bound freight from Boston to Chicago as from New York to Chicago, thus showing the oppressive and artificial character of the Boston rates and charges so made by the respondents as aforesaid on east bound freight.

(b). That not only have said railroads during said period from April 5, 1887, to the date of this petition arbitrarily charged in the case of flour, grain and provisions five cents more per 100 for transportation from Chicago to Boston than from Chicago to New York and in

the case of produce ten cents more per 100; but upon the other hand when the flour, grain, provisions and produce so carried to Boston have not, upon their arrival, remained in Boston for local sale and disposition but have thence been transported by continuous shipment, under a through bill of lading from Chicago, to Liverpool or other foreign port, then in such case the respondent railroads have made a special rate for such transportation from Chicago to Boston of twenty-five instead of thirty cents per 100 in the case of flour, grain and provisions and sixty-five instead of seventy-five cents per 100 in the case of produce, thus putting in this special case the Boston and New York rates on an equality, although goods so intended for export from Boston are nominally carried by said roads twenty miles further than goods intended for Boston local consumption and disposition; thereby making an unjust discrimination in their charges for precisely the same service, in favor of Boston export trade and against Boston local trade.

(c). That in like manner when flour, grain, provisions and produce have been originally billed and transported by said railroads from Chicago to Boston as aforesaid at the said regular rate of thirty cents and seventy-five cents per 100 respectively, but have after their arrival in Boston by subsequent act and determination of the consignee or owner, been reshipped to Liverpool or other foreign ports, then, in such case, the said railroads have made a rebate or allowance, upon the said charges, of five cents per 100, in the case of flour, grain and provisions, and of ten cents per 100 in the case of produce, or in other words have in this special case also made the Boston rate the same as the New York rate, thereby in like manner making an unjust discrimination in favor of Boston exporters and against local consumers and dealers.

(d). And that finally when flour, grain, provisions and produce have been so billed and transported as aforesaid to Boston and have thence by subsequent shipment been transported by water to any ports in the State of Maine east of Portland, similar special rates or rebates have been allowed by said railroads on their charges for transportation,—thus making in such special cases the Boston and New York rates the same; but on the other hand, if said goods after their said arrival in Boston have thence been sent to such points east of Portland by rail or have thence been sent either by water or rail to Portland or points on the coast (such as Salem or Lynn) west of Portland, or to any other points in the United States, whether on the coast or in the interior and whether by rail or water; then in such cases no such special rates and rebates have been allowed, thus making unjust discriminations and unduly preferential rates as between localities on the Maine coast east of Portland, and other localities, and between one class of Boston shippers and dealers and all other classes of such shippers and dealers.

And your petitioner further shows that while it has in the foregoing petition, for the sake of avoiding confusion, confined its complaints to the transportation of said goods by said respondent railroads from Chicago to Boston, as aforesaid, it nevertheless desires to represent,

and does hereby represent, to your honorable Commission that the said respondent roads have likewise during said period from the 5th of April, 1887, to the date of this petition been engaged in the like transportation of flour, grain, produce and provisions to New York and Boston respectively, from the following named points west of Buffalo on the said Lake Shore Railway between Chicago and Buffalo; namely: Elkhart, in the State of Indiana, Toledo, Cleveland, Painesville and Ash-tabula all in the State of Ohio, Girard and Erie in the State of Pennsylvania, and Dunkirk in the State of New York. And as to this transportation by said respondent roads of said flour, grain, provisions and produce from said several points above named to Boston and New York respectively, your petitioner makes the same general complaints and allegations against the said respondents, of charging unjust and unreasonable, unjustly discriminating, and unduly preferential rates which it has hereinbefore made concerning the transportation of said goods from Chicago to New York and Boston as aforesaid; that is to say that the said respondents have, under similar circumstances and conditions, charged more per 100 pounds for the transportation of said goods from said several points to Boston than to New York; and that of goods so transported to Boston they have in the case of goods thence by continuous shipment exported to foreign ports or *hereafter* reshipped to such foreign ports, allowed special rates and rebates (making the rates to Boston from said several named points the same as to New York); which rebates and special rates they have not allowed on goods retained in Boston for local consumption or disposition; and have in like manner made the same discrimination as above set forth, between goods transported to Boston and thence shipped by water to ports in Maine east of Portland, and goods which after such transportation to Boston have been thence sent either by rail or water to other points,—all as more specially set forth in the foregoing paragraphs of this petition.

And your petitioner says that it appears by the premises that the said respondent railroads make their charges for transportation from Chicago and points west of Buffalo to Boston as aforesaid, dependent not on the cost to themselves of such transportation or upon other data which may properly determine such charges, but upon an arbitrary rule to add at all times, irrespective of other circumstances, five cents in the case of flour, grain, and provisions, and ten cents in the case of produce per 100 pounds, to the rate charged to New York—no matter what the latter rate may be; and that such charges, so artificially made up and determined, are unjust and unreasonable, unjustly discriminating and unduly preferential; and that whether the said artificial rate so made to Boston shall or shall not be maintained is made by said railroads to depend upon whether after the goods arrive in Boston they are to remain there for local consumption and disposition, or go elsewhere; and if they go elsewhere upon whether they go to foreign markets and to ports in the United States east of Portland or to other ports and localities in the United States.

INTER 8.

And your petitioner says that the foregoing acts of the respondent railroads are contrary to the provisions of the said Interstate Commerce Act; and more especially in contravention of the first, second and third sections thereof.

Wherefore, your petitioner prays that an investigation may be made by your honorable Commission in the matter of the foregoing complaint; that the said railroad companies may be notified and directed to abstain from the foregoing violation of the Statute; to charge no greater rates respectively for the transportation of flour, grain, provisions and produce, from Chicago and points west of Buffalo, to Boston, than from Chicago and said several points respectively to New York; but to charge therefor just and reasonable rates; to charge the same respective rates from Chicago and said points west of Buffalo to Boston for flour, grain, provisions and produce intended and used for Boston local consumption and disposition as for like goods which after their arrival in Boston are thence exported; and to make the same respective rates from Chicago and said several points to Boston for said goods when, after their arrival at Boston, they are shipped or carried either by water or rail from Boston to Portland or any other points in the United States whether on the coast or in the interior, as for like goods so shipped by water to ports east of Portland; and for such other and further relief as justice and equity may require and the powers of your honorable Commission permit.

ASSOCIATED WHOLESALE GROCERS OF ST. LOUIS

v.

MISSOURI PACIFIC R. CO.*

1. The fact that **excursion or commutation tickets** are put on sale at a given rate, does not entitle the purchaser of a **mileage ticket** (each class of tickets being issued for distinct purposes and the form of contract in each case being different) to complain of unjust **discrimination** if charged a higher rate.
2. *Held*, that upon the evidence offered,

*See pleadings and opinion refusing to entertain motion to dismiss, *ante*, 321.

NOTE.—*Mileage Tickets:* In connection with the subject of mileage tickets, the following statement and decision of the Massachusetts Railroad Commissioners, rendered on August 9, 1887, in the case of *Wilmington v. Boston & Maine R. R. Co.*, is of interest:

The hearing was given July 23, and the complaint read as follows:

"The undersigned respectfully represents that upon the 27th day of June last he purchased of the Bos-

the Commission cannot find that \$25 per 1,000 miles is an unreasonable rate for mileage tickets.

3. **Commercial travelers** are not entitled to mileage tickets at lower prices than they are sold to the public generally.

(Decided July 26, 1887.)

REPORT AND OPINION OF THE COMMISSION

Walker, Commissioner:

The facts found in this case are as follows: Prior to April 5, 1887, the defendant sold mileage tickets over its road to the general public for \$25 per 1,000 miles and to commercial travelers for \$20 per 1000 miles. Since the Interstate Law became operative it charges \$25 to all alike. It also now sells excursion tickets and commutation tickets at rates which are less per mile than are charged for mileage tickets, and which, in some instances, would amount to no more than \$15 per 1000 miles. These excursion and commutation tickets are open to all purchasers on the same terms.

Upon these facts complainants claim that their commercial travelers are unjustly discriminated against; and also that any sum over \$15 for a 1000 mile ticket to commercial travelers is unjust and unreasonable.

The issuance of these three classes of tickets, called mileage, excursion and commutation tickets, is permitted by section 23 of the Act to Regulate Commerce. They are each issued for distinct purposes and the form of the contract in each case is different.

In establishing the price upon each, different considerations obviously arise. The Commission does not regard the fact that excursion or commutation tickets are put on sale

at a given rate, to be one that entitles the purchaser of a mileage ticket to complain of unjust discrimination if charged a higher rate. The "circumstances and conditions," to use the phraseology of the second section of the Act, are not the same.

Upon the question whether \$25 per 1000 miles is more than a just and reasonable rate for the sale of mileage tickets to commercial travelers, the only evidence offered was that above stated, that excursion and commutation tickets are sold at rates which are the equivalent of a less sum per mile than that rate produces, and that the former rate to commercial travelers was \$20. Upon this evidence alone the Commission cannot find the established price to be unreasonable.

The complainants also desire to have mileage tickets sold to their commercial travelers at a lower price than they are sold to the public generally, and insist that such a discrimination would not be unjust, in view of the peculiar character of their business. They claim that the consideration that commercial travelers are continually upon the road, and their labors result in great benefit to the freight traffic of the carriers, entitles them to the lowest rate of fare offered to or enjoyed by any portion of the traveling public, and that a special rate on mileage tickets should be given them.

In other words the Commission is asked to order and direct that a discrimination be made in favor of commercial travelers in the sale of mileage tickets, as was done by defendant prior to the passage of the law.

The Commission would hardly be willing to make such an order in any case, however urgent the circumstances might appear to be. But in respect to this matter we are agreed that

ton & Maine Railroad Company a mileage ticket, so called, which ticket contained 1,000 coupons, and entitled the undersigned to travel as many miles on said railroad as were represented by coupons attached. That the aforesaid railroad refused to carry out its said contract with the undersigned and with numerous others who have purchased said tickets, and unlawfully and without right demands and has taken from the undersigned and many others, as a condition of riding on the eastern division of said road between Newburyport, a station on said division, and other stations on said division, a number of coupons in excess of the number of miles traveled, in particular between Boston and Newburyport 40 coupons, the distance being 37.8 miles by the official schedule, and between Salem and Newburyport, 23 coupons, the distance being 21 miles, and in numerous other instances, demanding more coupons than the number of miles traveled. The undersigned respectfully represents that these acts of said corporation are in derogation of its said contract, and are an unjust discrimination against the citizens of said Newburyport and travelers to and from said place. Wherefore, he prays that your honorable board may examine into said matter, in accordance with the provisions of the statutes of this Commonwealth."

At the hearing it appeared that the Boston & Maine Railroad Company has issued mileage tickets for 1,000 miles, with various conditions printed thereon. The condition which relates to the matter covered by this complaint was at first in the following form:

"That one coupon shall be detached by conductor for each mile traveled, except that for distances less than three miles, three coupons shall be surrendered, and that all fractions of a mile shall be computed a mile, in calculating distance traveled."

After about 1,000 of these tickets had been issued, the condition was altered to read as follows:

"That one coupon shall be detached by conductor for each mile traveled, in accordance with mileage table dated June 1, 1887, except that for distance

less than three miles, three coupons shall be surrendered, and that all fractions of a mile shall be computed a mile in calculating distance traveled."

It appeared that the mileage table dated June 1, 1887, and in accordance with which coupons have been detached by the Company from mileage tickets in each of the forms above specified, is not a mileage table which in all cases states the actual distances. For instance, the distance to Newburyport over the eastern division is stated at 40 miles, whereas, in fact, it is but 37 miles and a fraction, and the distance to Portland is stated as 115 miles, which is the distance to Portland by the western division, whereas the actual distance by the eastern division is only 108 miles and a fraction. In other words, the Company has tried to equalize mileage to points reached by its eastern and western divisions, by forcing the distances on the shorter line up, so that they will correspond with the distances on the longer line, and this attempt has resulted in several instances in a material increase of mileage as fixed by the mileage table over the actual mileage. The mileage table thus prepared by the road is not correct and true, but is an arbitrary table. It is clear that those who bought the mileage tickets originally issued are entitled to have only such coupons detached therefrom as will cover the distance actually traveled by them. Moreover, under the new form, in which the phrase "in accordance with mileage table dated June 1, 1887," is used, the public has a right to assume that that mileage table is an honest statement of actual distances, and that it is not a table in which the distances are arbitrarily increased. The board, therefore, adjudge that it is the duty of the road, with reference to both classes of tickets heretofore issued, to detach only such coupons as will cover the actual distance traveled, except that three coupons shall be surrendered for distances less than three miles, and that fractions of a mile be considered as a mile, as set forth in the printed conditions. For the Board,

George G. Crocker, *Chairman.*

the entire policy and spirit of the Law are against it, and that when mileage tickets, as distinguished from trip tickets, are issued, they should be sold to all impartially and on the same terms, and we have so decided in the cases of Larrison against the Chicago and Grand Trunk Railway Co. [*ante*, 369], and of Michigan Central Railroad Company against the same [*Id.*].

The petition is therefore dismissed.

In this opinion all concur.

McCLAIN, WADE & Co.

OREGON RAILWAY & NAVIGATION CO.

(Filed July 22, 1887.)

COMPLAINT alleging unjust charges for the transportation of wheat.

Colfax, Washington Territory,
July 8, 1887.

To the Honorable Interstate Commerce Commissioners:

Your petitioners complain of the Oregon Railway & Navigation Company and respectfully represent: that on the 18th day of June, A. D. 1887, your petitioners shipped from the City of Colfax, in the Territory of Washington, to the City of Portland, in the State of Oregon, two car loads of wheat, to wit: 162 sacks of wheat of the weight of 20,000 pounds on one car, and 230 sacks of wheat of the weight of 30,000 pounds on the other car. That the said two car loads of wheat were loaded on said cars at your petitioners' sole expense, and were delivered to said Oregon Railway & Navigation Company for transportation to Portland, Oregon, as aforesaid, on said 30th day of June, A. D. 1887. That the distance from the said City of Colfax, in Washington Territory, to Portland, Oregon, does not exceed 320 miles. That the said Oregon Railway & Navigation Company, against the protest of your petitioners, have charged your petitioners for transporting the said two car loads of wheat the said 320 miles, the full sum of \$175, or at the rate of \$7 for each ton of 2000 pounds.

Your petitioners further aver that it is stated in the annual report of the said Oregon Railway & Navigation Company for 1886, that the total cost of all property of every description owned by said Company, including ocean steamers, river and sound boats, barges and wharves, is \$32,924,433.72; while its net income from railroad earnings alone was, as appears by the same report, \$2,256,539.78, or 6.87 per cent on the whole nominal investment of that Company, without counting its earnings from other sources. That during the same year that Company transported over its railroad lines 123,418,669 tons of freight and merchandise, and that the average price it received for transporting merchandise from Portland, Oregon, to Colfax, Washington Territory, was in excess of \$30 per ton.

Your petitioners further allege that the rates recommended by the railroad commissioners of the State of Oregon, for the transportation of

wheat from points in the State of Oregon, equidistant from said Portland, Oregon, with the City of Colfax, in Washington Territory, and reached by the line of the Oregon Railway & Navigation Company, is \$4 per ton, or \$3 per ton less than the said Company has charged your petitioners.

Your petitioners further allege that the said Oregon Railway & Navigation Company has agreed to make a rate from points in Columbia County, Washington Territory, as far from Portland, Oregon, as is the City of Colfax, for the transportation of wheat and other grains over the line of said railroad to said Portland, Oregon, of \$5 per ton, while still continuing the rate from said Colfax at \$7 per ton, thus charging your petitioners, and all other handlers of grain in Colfax, \$2 per ton more for transporting their wheat the same distance than is charged the wheat raisers and buyers shipping from said points in Columbia County.

And your petitioners further allege that the sum of \$7 per ton for the transportation of wheat as aforesaid from Colfax, Washington Territory, to Portland, Oregon, is unjust and unreasonable; and that a just and reasonable charge for such transportation is \$3.50 per ton, which is approximately the rate fixed for a haul of the same distance by the Illinois State Law.

Wherefore, your petitioners pray that you may direct the said Oregon Railway & Navigation Company to reimburse to your petitioners the sum of \$87.50, the sum paid by your petitioners to the said Oregon Railway & Navigation Company for the transportation of said two car loads of wheat to Portland, Oregon, in excess of a just and reasonable freight charge. And your petitioners further pray that the said Oregon Railway & Navigation Company may be required to establish a rate for the transportation of grain from Colfax, Washington Territory, to Portland, Oregon, not in excess of \$3.50 per ton.

McClaine, Wade & Co., by
Alfred Coolidge,
Member of Firm.

Protest.

To the Oregon Railway & Navigation Company.

That, whereas, we have this day and do now offer to ship by the railway lines of said Oregon Railway & Navigation Company, 162 sacks of wheat, weight 20,000 pounds, and 230 sacks of wheat, weight 30,000 pounds, to the Portland Flouring Mills, Portland, Oregon, as consignees; and, whereas, we desire to advance the freight charged on the said goods from this point—Colfax, Washington Territory—to said Portland, Oregon; and whereas, the said Company demands as freight for the shipment of said wheat the sum of \$7 per ton for each and every ton of said wheat, so to be shipped; and whereas, these consignors firmly believe that \$4 per ton is a reasonable charge for the shipment of the said wheat, and that any charge exceeding \$4 per ton for each and every ton, is excessive and unreasonable; and whereas, there are no other modes of transit from Colfax, Washington Territory, to said Portland, Oregon, whereby grain can be shipped,

you will hereby take notice that we most earnestly protest against the payment to you as freight charges or otherwise of any larger or greater sum than \$4 per ton for each and every ton shipped as aforesaid, and all sums exacted by you as freight on said wheat or otherwise exceeding the said amount of \$4 per ton, we will take the necessary legal steps to recover from you. And we herewith tender you \$4 per ton for each and every ton shipped.

The wheat above referred to being the identical wheat for which you have issued a shipping receipt dated June 30, 1887, to us and which described the said wheat as
162 aks of wheat car No. 243, weight 20,000 lbs.
230 " " " " " 1962, " " " " " 30,000 lbs.

Dated at Colfax, W. T. this 1st day of July, 1887.

McClaine, Wade & Co. by
Alfred Coolidge,
Member of Firm.

Francis H. LEGGETT & Co. of the City of New York

v.
BALTIMORE & OHIO R. R. Co. *et al.**

(Filed July 30, 1887.)

COMPLAINT against the "Trunk Lines" in reference to car load classifications.

To the Honorable, the Board of Interstate Commerce Commissioners:

Your petitioners respectfully complain and allege as follows:

First: That the railroad companies commonly known as the "Trunk Lines," which have their eastern termini in the City of New York, namely: the Baltimore & Ohio, the Pennsylvania, the Delaware, Lackawanna & Western, the New York, Lake Erie & Western and the New York Central & Hudson River Railroads, and their connections, have violated the provisions of the Interstate Commerce Act, as follows:

Second: That the said railroad companies have published, established and issued a classification of property in common use among them.

Said classification declares their intention and purpose to transport property in full car loads with a minimum weight of 20,000 pounds upon the first three classes, and the minimum of 24,000 pounds for the last three classes. That property in a less quantity than said minimum weights is to be charged for in a class higher, and at a higher rate of charges than property in car loads of their respective minimum weights.

Your petitioners complain that the said railroad companies, by reason of affixing charges by the said classification, discriminate in favor of shippers who forward a minimum car load against a smaller shipper; that by so doing they give an undue preference, and that, therefore, the said railroad companies are acting in violation of section 2 of the Interstate Commerce Act, which is, "That if any common carrier * * * shall, directly or indirectly, by any special rate, rebate, drawback or other

device, charge, demand, collect or receive from any person or persons, a greater or less compensation for any service rendered, or to be rendered, in the transportation of passengers or property than it charges any other person or persons for doing for him or them a like and contemporaneous service * * * under substantially similar circumstances and conditions," etc.

And in violation of section 3, namely: "That it shall be unlawful for any common carrier subject to the provisions of this Act to make or give any undue or unreasonable preference or advantage to any particular person, company, firm, corporation or locality, or any particular description of traffic, in any respect whatsoever, or to subject any particular person, company, firm, corporation or locality, or any particular description of traffic, to any undue or unreasonable prejudice or disadvantage in any respect whatsoever."

Your petitioners therefore pray that your honorable body issue a decree requiring said common carriers to cease and desist from such violation of said Act, and for such other and further relief as in your judgment may be just and proper.

And your petitioners will ever pray, etc., all of which we respectfully submit.

Francis H. Leggett & Co.

GRIFFITH, OWEN & CO.

v.

DELAWARE & HUDSON CANAL CO.

(Filed August 8, 1887.)

COMPLAINT alleging unjust charges for carrying coal and lumber.

To the Honorable, the Interstate Commerce Commission:

The undersigned citizens, residing and doing business in Fair Haven, in the County of Rutland and State of Vermont, respectfully represent: that the said Town of Fair Haven is situated upon a line of railroad running from Albany and Troy, in the State of New York, to Rutland, in the County of Rutland, and State of Vermont. That the said line of railroad is leased and operated by the president and directors of the Delaware & Hudson Canal Company.

That Whitehall, in the County of Washington and State of New York, is the nearest point of water communication; that large quantities of coal, lumber, etc., are shipped there by Lake Champlain and the canal; that Whitehall is nine miles distance from said Fair Haven, and that the only line of railroad running from Whitehall to Fair Haven is the above described road; that the said president and directors of the Delaware & Hudson Canal Company have heretofore and do now charge the sum of \$12 for hauling a car load of coal from said Whitehall to Fair Haven, which said charges are unreasonable and unjust, and contrary to the provisions of the Interstate Commerce Act.

And your petitioners further saying, say that the rate per cars for lumber from said Whitehall to Fair Haven is \$12, which said charge is unreasonable and unjust, and con-

*See ante, 356.

trary to the provisions of the Interstate Commerce Act.

Wherefore, your petitioners pray that you will grant them a hearing in the premises, and will therein grant such relief in the matter as to Your Honors shall seem meet.

F. B. THURBER *et al.*, Representing the
New York Board of Trade & Transportation,

NEW YORK CENTRAL & HUDSON
RIVER R. R. CO., *et al.**

(Filed August 1, 1887.)

COMPLAINT charging unjust discrimination through car load classifications of freight.

To the Honorable, the Board of Interstate Commerce Commissioners:

The undersigned, representing the New York Board of Trade & Transportation, comprising in its membership upwards of 1,000 firms and individuals, respectfully submit the following complaint against the New York Central & Hudson River Railroad, New York, Lake Erie & Western Railroad, Delaware, Lackawanna & Western Railroad, Pennsylvania Railroad, and Baltimore & Ohio Railroad, for unjustly discriminating against small shippers of some varieties of goods by placing less than car load quantities in a higher class than car loads, by which small shippers are forced to pay from 16 per cent to 60 per cent more for their transportation than large shippers who ship the same goods in car loads.

We claim that this action violates provisions in sections 1 and 3 of the Interstate Commerce Law, and virtually continues, under the guise of classification, the unjust discriminations both against localities and individuals formerly practiced by means of rebates and drawbacks, which the Interstate Commerce Law designs to prevent. This question as affecting the Eastern Trunk Lines embodies important points not heretofore presented to your honorable body by the complaint of the merchants of St. Louis against the Missouri Pacific Road.†

The west bound classification of the Eastern Trunk Lines in force prior to the enactment of the Interstate Commerce Law made but few and unimportant car load differentials (about 107), but the new classification adds about 1,000 articles to this number, some of which are very important, and the differences in rates made between small and large quantities are excessive. This was the more unnecessary and unreasonable on the part of the Eastern Trunk Lines, because more than half of their west bound cars go empty, and the volume of miscellaneous freight transported by them be-

ing large, it enables them to a very great extent, if they so desire, to fill their cars with full loads of assorted freight. The principle is the same as in the coal cases‡ which have been brought to your attention, and which, if carried to its logical end, would concentrate the business of the roads in the hands of but one shipper or a few shippers in every place. If this principle is to be tolerated, it should be made as uniform as possible. At present it is not applied to some of the most important branches of trade, the others thus being discriminated against as well as individuals. The classification of freight touches the principles upon which rates of transportation are based at almost every point, and is worthy of your fullest and most careful consideration. As at present practiced, although there are two parties in interest, shippers and carriers, the latter dictates absolutely to the former, in secret session, no publicity being allowed to their deliberations, and no opportunity being allowed the other party in interest to be heard. We believe a full investigation of this question will show that the present classification of the trunk lines is unjust, against public policy, and against even the interests of the railroads themselves, which, although generally taking the position that their business is an intricate one, beyond the comprehension of the ordinary business man or citizen, and that their methods should not be questioned nor interfered with by law makers, have frequently admitted that regulations imposed upon them by law in the interest of the public were not only right, but unexpectedly beneficial.

We respectfully petition for a hearing upon this complaint against the before mentioned lines at such time as will be convenient to your honorable board, and such relief as may appear, after investigation, to be reasonable and just; and as we understand that your Board will give certain hearings in Vermont and elsewhere during the month of September, it has occurred to us that possibly it would be convenient for you to give a hearing at that time (or other convenient time to you) on this question in New York, which would greatly accommodate both the representatives of the trunk lines concerned and the merchants of this city who would like to appear before you.

With much respect, we remain, Yours Truly,
F. B. Thurber, M. N. Day,
E. A. Doty, H. K. Miller,
W. B. Timms, B. F. Shores,
Committee.

Thomas W. Ayres and Theron E. Fell, doing
business at Castle Rock, Oregon, under the
firm name of AYRES & FELL

UNION PACIFIC R. R. CO. and Oregon
Railway & Navigation Co.

(Filed August 9, 1887.)

COMPLAINT alleging the exaction of unjust charges, etc., for the transportation of wool.

The above named petitioners, said Ayres and

* See *Re Classification of Railroad Freights*, ante, 317.

† See *Associated Wholesale Grocers of St. Louis v. Missouri Pac. R. Co.* ante, 321.

INTER 8.

‡ See *Providence Coal Co. v. Providence & Worcester R. Co.* ante, 363.

Fell, for cause of complaint against the said defendants, said Union Pacific Railroad Company and said Oregon Railway & Navigation Company, respectfully set forth and allege the following facts, to wit:

1. That said Thomas W. Ayres and Theron E. Fell are, and at all times hereinafter mentioned were, partners doing business as such, as wool commission merchants, doing business at Castle Rock and at Arlington, Oregon.

2. That the defendants are the owners or the lessees of, and operate a line of railroad through said Towns of Castle Rock and Arlington, Oregon, from Portland, in said State of Oregon, to Wallula, in Washington Territory, and other points; and especially through all the points hereinafter named to Portland, Oregon, and to Wallula, in Washington Territory.

3. That said Wallula, in Washington Territory, is the eastern terminus of the said Oregon Railway & Navigation Company's branch of the Union Pacific Railroad, and is the western terminus of the Northern Pacific Railroad's Columbia River Branch, being the station at which freight is transferred from one road to the other; and that all the other points hereinafter mentioned are in the State of Oregon, on said Oregon Railway & Navigation Company's line, now leased to the Union Pacific Railroad Company, either on the main line running from Wallula to Portland down the Columbia River, or on the branch line running from Umatilla Junction to Huntington, Oregon.

4. That the wool clip of Eastern Oregon for the season of 1887 amounted to about 10,000,000 pounds and was produced in sections from which shipment can only be made upon and over said Oregon Railway & Navigation Company's line, or said branch of the Union Pacific Railroad. That the natural, proper, and ultimate destination of all said wool is to eastern markets, to reach which it must pass over said railroad to Wallula, thence east over the Northern Pacific Railroad to Duluth or St. Paul, or via Huntington to Omaha.

5. That about seven eighths of the wool of the State of Oregon is raised in Eastern Oregon, and that heretofore, in consequence of great and unjust discriminations in favor of Portland, Oregon, and San Francisco, California, said wool has been shipped over the said Oregon Railway and Navigation Company's line to Portland, thence back over the same line east, or via the Oregon Railway and Navigation Company's line of steamships to San Francisco.

6. That this year (1887), upon the going into effect of the Interstate Commerce Law, the rate east from Portland to Chicago was put at \$3.25 per 100 pounds, on baled wool; but later, under the suspension of section 4 of said Act, a rate of \$1.50 per 100 pounds from Portland to Chicago was named, which rate did not apply to interior points.

7. That on April 25, 1887, the Northern Pacific announced a rate of \$1.60 per 100 pounds on baled wool from Wallula, Washington Territory, to Duluth, Minnesota; or a rate of \$1.75 per 100 pounds upon wool in sacks; shipped in car load lots of 20,000 pounds baled, or 10,000 pounds sacked.

8. That under these circumstances wool buyers from Duluth, Minnesota, Hartford, Con-

necticut, and other eastern points, including Messrs. Cutler & Gilbert, of Duluth, began to buy large quantities of wool through said firm of Ayres & Fell, and their traveling representative, Mr. A. B. Blair, purchasing and contracting for immediate and future delivery at points along the said Oregon Railway & Navigation Company's line in Eastern Oregon, direct eastern shipment via Wallula, and payment of the already exorbitant local charges to that point, being intended.

9. That about June 1, 1887, shippers were suddenly confronted with advanced rates upon wool from all points in Eastern Oregon along said Oregon Railway and Navigation Company's line to Wallula, Washington Territory, and were then for the first time shown and made aware of a new local distance tariff, and also a change in classification.

The rate upon wool was by this new tariff raised as follows:

From Dalles to Wallula, from 88 cents to 94 cents per 100 lbs.

From Arlington to Wallula, from 49 cents to 65 cents per 100 lbs.

From Castle Rock to Wallula, from 36 cents to 68 cents per 100 lbs.

From Echo to Wallula, from 29 cents to 50 cents per 100 lbs.

From Yoakum to Wallula, from 36 cents to 68 cents per 100 lbs.

From Pendleton to Wallula, from 49 cents to 65 cents per 100 lbs.

10. That the former local tariff of April 1, 1887, made a difference on wool in bales and wool in sacks, the first column of the above figures being for wool in bales; the wool in sacks being classed higher, namely ninety-four cents, fifty-six cents, forty-one cents, thirty-four cents, forty-one cents, and fifty-six cents respectively from the points above named; but the new tariff makes no distinction between wool in sacks and wool in bales, which operates as an unjust discrimination against your petitioners' wool presses.

11. That the new tariff bears date May 14, 1887, and purports to go into effect May 25, 1887; but as a matter of fact said tariff was not actually printed until the 28d day of May, 1887, and hence under the law could not take effect until June 3, 1887. That said tariff was not posted nor in any manner published, or in any way whatever made known to shippers until June 1, 1887, or thereabouts; that it was not sent to said Company's agents along said line until about May 25, 1887, and then with no instructions to advise wool shippers of its contents.

12. That on June 1, 1887, said firm of Ayres & Fell shipped from Castle Rock to Wallula fifteen bales of wool, marked "'C. & G.' care of A. & G. Cummings, Wallula," in a car which left Castle Rock at 7:30 P. M. of said day, intending to forward other lots in a day or two to complete "a car load lot." The lot was billed at thirty-six cents at Castle Rock, but this was corrected at Wallula to correspond with the advanced rate.

The above lot of wool was at once transferred and went east over the Northern Pacific, and on June 2 another lot of twenty-seven bales was forwarded from Arlington, taking the new rate under protest. Said twenty-

seven bales, weighing 16,965 pounds, arrived in Wallula June 4, 1887, and were detained there, contrary to instructions, till June 9, 1887, and then were forwarded only upon our going personally and demanding that the same be forwarded, Mr. Cummings, the consignee, having been repeatedly informed by said Company's agent that no such wool was there; all of which caused great expense and damage to the petitioners.

13. That prior to said shipments, and up to June 1, 1887, said Ayres & Fell made frequent inquiries as to the rate on wool, and whether any different or greater rates from said points in Oregon to Wallula would be made; and was in all cases advised by said Company's agents, up to and including said June 1, that there were no new or higher rates.

14. That said firm of Cutler & Gilbert, of Duluth, Minnesota, had instructed their agents at the above named points to purchase for them 1,000,000 pounds of wool, which said Ayres & Fell were to grade, bale and ship for a commission; that said Ayres & Fell between May 25 and June 2, 1887, received wool purchased and made payment for same, and were under obligations to deliver the same to said Cutler & Gilbert at Duluth, at a stipulated expense per pound; that in consequence of said sudden, secret and unlawful increase of rates they have been unable to fulfil their contracts, and said Ayres & Fell have made purchases at prices which would not have been paid if there had been legal notice of said advance of rates, and that said Ayres & Fell were thus discouraged and prevented at all times after said June 1 from purchasing any further quantities of wool for said firm of Cutler & Gilbert, probable purchases which they were thus prevented from making for this firm being estimated at 1,000,000 pounds of wool. That in consequence of said increase of rates, the wool presses of said Ayres & Fell became idle, and their workmen, five in number, were thrown out of employment, and an expert wool grader employed at a high salary was left on expense with only slight employment.

15. That the business of said Ayres & Fell by this unlawful increase and discrimination has been greatly injured, and partially destroyed; that they have been put to great expense and suffered great loss in traveling, ascertaining facts, employing legal and other assistance, and their patrons have been disappointed and aggrieved; that their business has by said unlawful increase and discrimination been greatly injured, not only with said firm of Cutler & Gilbert, but also in their business with other dealers, notably Fenner Bros. & Childs, of Boston, Mass., and T. W. Hall & Co. of Chicago, Illinois.

16. Said petitioners therefore allege that the defendants have been guilty of a violation of the Interstate Commerce Law in the following particulars, namely:

1. A violation of section 6 of said Law in not printing, publishing or keeping for public inspection a schedule showing the rates charged upon wool shipped from Castle Rock, Arlington, Pendleton and other points in Oregon to Wallula, in Washington Territory, for ten full days prior to June 1, 1887.

2. A violation of said section 6 in advancing the rates upon wool from said points in Oregon to said Wallula, on or about June 1, 1887, without printing or in any manner publishing ten days' notice thereof, or giving shippers any notice whatever until large quantities of wool contracted for under the old rates were ready for shipment.

3. A violation of section 1 of said Law, on or about June 1, 1887, in making and giving said advanced rates upon wool, for the purpose of subjecting certain persons, companies and localities, and said whole wool traffic of Eastern Oregon to undue, unreasonable and unlawful disadvantages.

4. A violation of section 1 of said Law by charging an unjust and unreasonable rate of freight upon wool from said points in Oregon to said Wallula, namely: Castle Rock, fifty-two miles, fifty three cents per 100 pounds; Arlington, seventy-two miles, sixty-five cents per 100 pounds; Echo, forty-five miles, fifty cents per 100 pounds; Pendleton, seventy-one miles, sixty-five cents per 100 pounds and from other places in the same proportion.

17. That your petitioners are not the only ones damaged by this unlawful increase and discrimination, and these unjust rates, but that all the wool growers of Eastern Oregon are interested in a greater or less degree, in common with them, as will appear from a petition filed herewith, and marked "Exhibit A."

18. That the direct, immediate and consequential damage to your petitioners, said firm of Ayres & Fell, is as follows:

1. Unlawful overcharge on shipment of fifteen bales of wool from Castle Rock to Wallula, June 1, 1887, 9,226 pounds, at seventeen cents overcharge per cwt. \$15.68.

2. Unlawful overcharge on shipment of twenty-seven bales of wool from Arlington to Wallula, June 2, 1887, 16,965 pounds at sixteen cents per cwt. overcharge, \$27.14.

3. Direct loss and damage upon said petitioners' business with said Cutler & Gilbert, by reason of the detention of shipment and cancellation of contracts in consequence of unlawful increase of rates to Wallula, \$2,500.

4. Damage to wool commission business of Ayres & Fell as commission and forwarding agents at Arlington and Castle Rock, because of discrimination in favor of Portland and San Francisco packers, — \$2,500.

Based upon the foregoing, your petitioners claim and demand said several sums to be paid by said Oregon Railway & Navigation Company, and said Union Pacific Railroad Company, to wit:

The sum of \$15.68 direct overcharge, the further sum of \$27.14, direct overcharge, and the further sum of \$5,000 damages. We also demand a deduction of said Company's rates on wool from all said points in Oregon to Wallula, Washington Territory, of 50 per cent of present rates, as above set forth, and as appears in the tariff number 228, dated May 14, 1887.

For which your petitioners will ever pray.

Ayres & Fell,
by J. P. Wager,
Their Attorney.

BOSTON & ALBANY R. R. CO.

BOSTON & LOWELL R. R. CO. *et al.**

(Two Cases, Nos. 14 and 15.)

PLEADINGS in proceedings based upon allegations of the maintenance of higher rates for the short haul than for the long haul.

COMPLAINT IN No. 14.

(Filed May 24, 1887.)

Boston, Mass. May 21, 1887.

To the Honorable, the Interstate Commerce Commission:

Respectfully represents the Boston and Albany Railroad Company, a corporation established in the States of Massachusetts and New York, that the Boston and Lowell Railroad Company, a Massachusetts corporation; the Concord Railroad Company, a New Hampshire corporation; the Northern Railroad Company, a New Hampshire corporation; the Central Vermont Railroad Company, a Vermont corporation, and the Grand Trunk Railway Company, established by the laws of Canada, have issued schedules of joint rates under the name of the National Despatch Line, and under these schedules the rates from Boston to Detroit, Michigan are:

51-45-35-24-20-18 for the six classes of freight respectively; and to Montreal, Canada, 45-40-30-23-20-18 for the six classes of freight respectively; while at the same time the Boston and Lowell, Concord, Northern, and Central Vermont Railroad Companies, a part of the roads included in the National Despatch Line, have made and maintained rates from Boston to St. Albans, Vermont, a station on the Central Vermont Railroad, a less distance from Boston than either Detroit or Montreal, in the same direction over the same line as follows: 60-50-40-27-24-17 for the six classes of freight respectively.

The National Despatch Line comes into competition with the Boston and Albany Railroad Company and its connections at Detroit and other western points.

The grievance which this Company and its connections have is that the National Despatch Line makes rates to Detroit and other points in the West less than the Boston and Albany Railroad Company and its connections make to the same points; while at the same time a certain combination of roads, including a part of the roads in the National Despatch Line, viz.: the Boston and Lowell, Concord, Northern, and Central Vermont Railroad Companies maintain higher rates to St. Albans and other intermediate points; that is higher rates for the short haul than for the long haul on the same line in the same direction, on the five upper classes of freight; whereas, if the rates to Detroit and other western points were made the same—no higher and no lower—than to any intermediate point on the same line in the same direction, your petitioner would have no reason to complain.

With this petition and as a part of it, are

*See *ante*, 291. These cases have been set down by the Commission for hearing at Rutland, Vt., on September 1, 1887.

sent a copy of the tariff of the National Despatch Line, No. 4, dated April 5, 1887, a copy of the affidavit of H. B. Tindall, the original of which is filed as a part of the petition of this petitioner against the Ogdensburgh and Lake Champlain route, and a copy of the Boston and Albany Railroad and New York Central and Hudson River Railroad, joint west bound interstate freight tariff No. 1.

Boston & Albany Railroad Company

COMPLAINT IN No. 15.

(Filed May 24, 1887.)

Boston, Mass. May 21, 1887.

To the Honorable, the Interstate Commerce Commission:

Respectfully represents the Boston and Albany Railroad Company, a corporation established in the States of Massachusetts and New York, that the Boston and Lowell Railroad Company, a Massachusetts corporation; the Concord Railroad Company, a New Hampshire corporation; the Northern Railroad Company, a New Hampshire corporation; the Central Vermont Railroad Company, a Vermont corporation; and the Ogdensburgh and Lake Champlain Railroad Company, a New York corporation, have made an arrangement by which the Steamship Company operated by the Ogdensburgh and Lake Champlain Railroad Company has issued a tariff from Boston to lake ports in the United States at a less rate than is charged at the same time from Boston to Ogdensburgh and other points on the same line at a shorter distance from Boston in the same direction. The rates are as follows:

From Boston to
Cleveland, O. }
Detroit, Mich. } 41-36-29-20-17-14
Port Huron, } for the six classes of freight
respectively.

To
Milwaukee, } 44-39-31-23-19-16
Chicago, } for the six classes respectively,
and from Boston to

Ogdensburgh, 60-50-45-30-25-17 for the six classes of freight respectively.

This line via Ogdensburgh comes into competition with the Boston and Albany Railroad Company and its connections at Cleveland, Detroit, Port Huron, Milwaukee, Chicago and other western points.

The grievance which the Boston and Albany Railroad Company and its connections have is that the line via Ogdensburgh makes rates to the above places less than the Boston and Albany Railroad Company and its connections make to the same points, while at the same time the above named roads, viz.: the Boston and Lowell, Concord, Northern, Central Vermont, and Ogdensburgh and Lake Champlain Railroad Companies maintain higher rates to Ogdensburgh and other intermediate points; that is, higher rates for the short haul than for

the long haul on the same line, at the same time in the same direction; whereas, if the rates to Cleveland, Detroit, Port Huron, Milwaukee and Chicago were made the same, no higher and no lower than to intermediate points on the same line, in the same direction, your petitioner would have no reason to complain.

Herewith, and as a part of this petition, are sent a copy of the Central Vermont Line of Steamers west bound freight tariff No. 2, taking effect April 18, 1887, circular signed by the New England agent of the Central Vermont Line of Steamers dated April 20, 1887, the affidavit of H. B. Tindall, and a copy of the Boston & Albany Railroad Company, New York Central & Hudson River Railroad Company, and Western Transit Company's joint west bound interstate freight tariff No. 1 (A.)

Boston & Albany Railroad Company,

Justice of the Peace.

EXHIBIT TO COMPLAINTS.

I, H. B. Tindall, of Boston, Massachusetts, on oath depose and say that I am in the employ of the Boston & Albany Railroad Company, and that on the 20th day of April, 1887, I went to the local freight office of the Boston & Lowell Railroad in Boston and requested the clerk in charge to show me the rates from Boston to points on the Central Vermont Railroad; whereupon, he showed me a set of tariffs numbered 8, purporting to give the rates from Boston to the stations named on the Central Vermont Railroad, which rates I copied and which are as shown on the sheet hereto annexed marked at the bottom thereof No. 1.

On the second day of May, 1887, I went to the general freight office of the Boston & Lowell Railroad and asked of the clerk in charge the rates from Boston to points on the Ogdensburgh & Lake Champlain Railroad; whereupon, he read to me from tariffs the following, shown on sheet hereto annexed marked at the bottom No. 2.

H. B. Tindall.

ANSWER OF BOSTON & LOWELL R. R. Co.
IN No. 14.

The answer of the Boston and Lowell Railroad Corporation to the petition of the Boston and Albany Railroad Company:

This defendant, saving to itself all benefit of exception to be taken to the petition of the Boston and Albany Railroad Company, for an answer thereto, says: that it admits that the several corporations therein named exist and are established as alleged; and denies that they have issued joint rates under the name of the National Despatch Company, as therein averred, and further denies that the line of railroads or the railroad which established and maintains any joint rates or any rates for the carriage of freight between Boston and St. Al-

bans and intermediate points, is the same line or railroad corporation as the line which establishes and maintains the rates of freight between Boston and Detroit, and other western points, as alleged in said petition, and further denies that the same carrier or line of railroads or this defendant charge higher rates for a short haul than for a long haul, over the same line in the same direction, for the like kind of property in the manner set out in said petition, and further alleges that the transportation of freight between the points named in said petition has not been and is not under substantially similar circumstances and conditions within the true intent and meaning of the Act of Congress, entitled "An Act to Regulate Commerce," approved February 4, 1887.

And this defendant further says that the Boston and Lowell Railroad, the Nashua and Lowell, the Concord, the Northern and the Central Vermont Railroads are connecting railroads so far as trackage is concerned, from Boston, Mass. to St. Albans, Vt. These roads are not managed or controlled by each other, except that the Nashua and Lowell and the Northern are in fact operated by the Boston and Lowell; nor is there between them an arrangement for a continuous carriage or shipment of property over the same, although it is true that they sometimes make joint tariffs of rates between Boston and St. Albans, aforesaid, and interchange cars. At the time of filing the petitioners' complaint the rate fixed by said joint tariff from Boston to St. Albans was and is as stated in said petition.

National Despatch Line.

These defendants further say that the National Despatch Line, referred to in the said petition, is a line of cars running from Boston, Mass., to all large points in Canada and in the Western States west of St. Johns in Canada via the Grand Trunk Line. They consist of 3,750 freight cars, marked "National Despatch Line," and they are owned as follows:

The National Car Company, a corporation chartered and organized under the laws of Vermont, owns 3,000 of said cars. The Grand Trunk Railway Company of Canada, owns 700, and the Chicago, Pekin, and the South Western Railroad owns fifty. The roads over which the National Despatch Line sends freight, and which use these cars, are as follows:

Boston and Lowell; Boston and Maine (Worcester and Nashua Division); Central Vermont; Cheshire; Chicago and Alton; Chicago and Eastern Illinois; Chicago and Grand Trunk; Chicago, Milwaukee and St. Paul; Chicago, Rock Island and Pacific; Cincinnati, Hamilton and Dayton; Concord, Connecticut River; Detroit, Grand Haven and Milwaukee; Detroit, Lansing and Northern; Evansville and Terra Haute; Fitchburg; Flint and Pere Marquette; Grand Trunk; Louisville, New Albany and Chicago; New London and Northern; Providence and Worcester; Toledo, Ann Arbor and Northern Michigan; Wabash, St. Louis and Pacific.

The National Despatch Line have their principal office in Boston, Mass. They solicit freight at Boston and other places in New England for transportation to all prominent points

in Canada and the Western States west of St. Johns. They have agencies in Boston and other eastern points and in Chicago and other western points. They do not receive or solicit freight at Boston or other New England points, the destination of which is south of St. Johns, for west bound freight. They issue their own bills of lading, according to the form hereto attached, marked "B," and they also issue and publish their tariff for transportation from New England points to points in the Western States and Canada west of St. Johns. The one now in force, and which has been in force since April 5, 1887, is hereto attached, marked "C." They do not issue bills of lading for west bound freight from New England points to points south of St. Johns, nor do they make a tariff nor profess to be carriers between those points in respect to west bound freight destined south of St. Johns. St. Albans, Vt., is south of St. Johns, and is not embraced in the tariff made by the National Despatch Line for west bound freight. The rates made to points west of St. Johns, where there is competition with complainants' line, are made under this tariff by the National Despatch Line.

And this defendant denies that the joint tariff aforesaid constitutes an arrangement for a continuous carriage within the meaning of the first section of the Interstate Commerce Law; but if it does, then it alleges that the joint tariff from Boston to St. Albans makes a wholly different line from the one made by the joint tariff of the National Despatch Line, within the meaning of the fourth section of said Law.

Rates at St. Albans, Vermont.

And this defendant further says that the rates from Boston and intermediate points to St. Albans are reasonable; that nobody along the line is dissatisfied with the rates made; that the Boston and Albany Line is not a competitor for traffic for west bound freight from Boston or intermediate points to St. Albans, and is in no way interested in the rates that are made thereto. It further says that the Central Vermont Road runs through a sparsely settled country; that the local traffic thereon is small, and that it was constructed at a great expense through an uneven country with high grades; that the road has been foreclosed and reorganized, and the original capital put into the construction of the same has been lost; that if said road was compelled to depend on local traffic, it could not pay its expenses and interest on its bonded debt, to say nothing of the stocks of the road as it has been reorganized. And this defendant further says that the additional expense of doing through traffic, as compared with local traffic, is small in degree; that its road is the same whether the traffic is local and small or large by reason of through business; that the profit which it makes out of the through business is quite as important to it as the profit on the local business, by reason of the volume of the through traffic as compared with the local traffic; that the volume of business from Boston to St. Albans is not one twentieth part of what it is to points beyond there, westward. That it has been to very large expense for terminal facilities, among other things, to accommodate such through

traffic, and this expense amounts to more than \$3,000,000.

Through Rates. Dissimilar Conditions and Circumstances.

And these defendants further say that the Central Vermont Road extends northerly from St. Albans to the state line, a distance of about ten miles; that it there connects with the Montreal and Vermont Junction Railroad, a Canada corporation which extends about twenty-two miles northerly to St. Johns, in Canada, where it connects with the Grand Trunk Railroad, which extends through Canada to Windsor, opposite Detroit.

It is over this line that the National Despatch cars principally run. And this defendant further says that the rate made by the National Despatch Line from Boston to Montreal is, and was at the time of the filing of the petitioner's complaint, the same as stated in said complaint, and for the following reasons: there are many competitors at Boston for traffic to Montreal; there are none for traffic to St. Albans. Boston traffic is taken by ocean steamers to Halifax, Nova Scotia, and St. Johns, New Brunswick, and thence by Canadian railways to Montreal. It is also taken via Passumpsic and Southeastern Railway to Montreal, the latter railroad being a foreign corporation. Traffic is also taken from New York to Montreal, by the Delaware and Hudson River Canal Company, which extends from New York City to Rouse's Point, within fifty miles of Montreal, and is a railroad entirely within the State of New York. Halifax and St. John, N. B., are foreign cities, and together with New York are competitors with Boston for the sale of goods to the merchants of Montreal. Unless the rate of freight is as low from Boston to Montreal as from the aforesaid cities to Montreal, the traffic will not go over the roads used, as the National Despatch Line, the Grand Trunk via Portland, is the strongest competitor for traffic from Boston to Montreal, and is a foreign corporation. The National Despatch Line makes the rates they do from Boston to Montreal from necessity and by reason of competition, and for no other reason.

And these defendants further say that the rate made by the National Despatch Line from Boston to Detroit is and was as stated in said petition, at the time of filing thereof. There are many competing lines for Boston traffic to the West, and especially to Detroit. The Baltimore and Ohio takes traffic at Boston by ocean steamers to Philadelphia and Baltimore and thence over their line to all large points in the West. The Boston and Albany Line via the New York Central, and Michigan Central Railroads and steamships from Buffalo, takes freight westward to all lake points, and more especially Detroit. The Grand Trunk Line via Portland is still another line in competition for west bound traffic to Detroit, and all other large points in the West. The Grand Trunk Railway Company is a foreign corporation, and their line runs principally through Canada to Windsor, Ontario, opposite Detroit, and Point Edward, Ontario, opposite Port Huron, Mich. The defendant's line from Boston to St. Albans, in connection with the Ogdensburg and Lake Champlain Railroad, and the

INTER 8.

line of boats on the Great Lakes, called the Central Vermont Line of Steamers, constitute still another line, which comes in competition with the National Despatch Line at Detroit and other western points. The Canadian Pacific, another foreign corporation, is in competition for this same traffic. Many others might be named, and especially the New York and New England and its connections, also the Fitchburg and Hoosac Tunnel Line.

And this defendant further says that these competing lines largely dictate the rates from Boston to Detroit, and other competing points in the West; that the defendant's lines must make as low rates to these points of competition as the other lines, or go out of the business. That the through business to competing points is important to this defendant and the other connecting roads, and is a source of large profits to this defendant. That the amount of traffic from Boston to St. Albans and intermediate points is not one twentieth part of what it is to points west of St. Albans. And this defendant further says that the circumstances and conditions under which freight traffic is taken and transported from Boston to St. Albans is wholly dissimilar to what it is in respect to freight traffic which they take and transport west of there to points of competition, and more especially Montreal and Detroit. That the rates made from Boston to Montreal and Detroit respectively are made from necessity and for no other reason. That the petitioner is in no wise interested in the rates from Boston to St. Albans; that its motive in filing its petition is to break down one of its principal competitors for through business from Boston to Detroit, and other points in the West, and from no other motive. And these defendants further say that they have acted in good faith in the premises; that they have given the best construction they could to the Interstate Commerce Law, and under the advice of counsel; and if they have erred, they will ask leave to file their petition to be relieved from the operation of the fourth section of said Act—without this that the facts set forth in said petition are true, except as herein confessed avoided or denied.

Boston and Lowell Railroad Corporation.

By Edwin Morey.

A. A. Strout,
Solicitor of the Boston and Lowell Railroad Corporation.

Commonwealth of Massachusetts, } ss.
Suffolk,

June 24, A. D. 1887.

Personally appeared before me Edwin Morey above named, and made oath that he is the President of said defendant corporation, and that the allegations of the above answer are true, according to his knowledge and belief.

MEMORANDUM BY CONCORD R. R. CORPORATION.

(Filed June 15, 1887.)

Concord Railroad.
Superintendent's Office.

Concord, N. H. June 14, 1887.

To the Honorable, the Interstate Commerce Commission:

Washington, D. C.

Sir:—In the matter of your communication of the 26th ult. enclosing copy of petition and complaint of the Boston & Albany Railroad Company against the Boston & Lowell Railroad Company, the Concord Railroad Company and others, filed with the Commission May 24, 1887, the Concord Railroad Corporation respectfully represents that although its roads form a small part of the through lines between Boston, Mass., and Detroit, Mich., via St. Albans, Vt., and Montreal, P. Q., and between said Boston, Mass., and western lake ports via said St. Albans, Vt., and Ogdensburgh, N. Y., and shares proportionately in the receipts from business passing over said lines between said Boston and said western points, the said Concord Railroad Corporation does not make and never has made rates for the transportation of passengers or freight, over said lines, between said Boston and said points; that all such rates are, and heretofore have been made by the managers of said lines; that said Concord Railroad Corporation has, by agreement, accepted its proportion of such through rates as were so made, stipulating only that such rates should be reasonable and within the requirements of the law.

The Concord Railroad Corporation is advised that the other railroads interested and the managers of the said lines will file with the Commission full and definite answers to said complaint.

Respectfully,
The Concord Railroad Corporation,
By S. E. Chamberlin,
Superintendent.

ANSWER OF GRAND TRUNK R. CO. IN NO. 14.

The answer of the Grand Trunk Railway Company of Canada to the petition of the Boston and Albany Railroad Company.

This defendant, saving to itself all benefit of exception which can be taken to the petitioner's complaint, for answer thereto says: that it admits that the several corporations therein named exist and are established as alleged, but denies that they have issued joint rates under the name of the National Despatch Line, as therein stated, and further denies that the line of railroads, or the railroad, which established and maintains any joint or other rates for the transportation of freight between Boston and St. Albans and intermediate points, is the same line, or railroad, as the line which establishes and maintains the rates of freight between Boston and Detroit and other western points, as named in said petition; and further denies that the same carrier, or line of railroads, or that this defendant, charges higher rates for a short haul than for a long haul, over the same line, in the same direction, for the like kind of property, in the manner set out in said petition; and further alleges that the transportation of freight between the points named in said petition has not been, and is not done under substantially similar circumstances and conditions within the true intent and meaning of the Act of Congress, entitled "An Act to Regulate Commerce," ap-

proved February 4, A. D. 1887. And this defendant further says that the Boston and Lowell Railroad, the Nashua and Lowell, the Concord, the Northern and Central Vermont Railroads are connecting railroads so far as trackage is concerned, from Boston, Mass. to St. Albans, Vt. These roads are not managed or controlled by each other, except that the Nashua and Lowell and the Northern are, in fact, operated by the Boston and Lowell; nor is there an arrangement for a continuous carriage or shipment of property over the same, although it is true that they sometimes make joint tariff of rates between Boston and St. Albans aforesaid. At the time of filing the petitioners' complaint the rate fixed by said joint tariff from Boston to St. Albans was and is as stated in said petition.

National Despatch Line.

This defendant further says that the National Despatch Line referred to in the said petition, is a line of cars running from Boston, Mass., to all large points in Canada and in the Western States west of St. Johns in Canada via the Grand Trunk Line. They consist of 3,750 freight cars, marked "National Despatch Line," and they are owned as follows:

The National Car Company, a corporation chartered and organized under the laws of Vermont, owns 3,000 of said cars, the Grand Trunk Railway Company of Canada, owns 700, and the Chicago, Pekin and Southwestern Railroad owns fifty. The roads over which the National Despatch Line sends freight, and which use these cars, are as follows:

Boston and Lowell; Boston and Maine (Worcester and Nashua Division); Central Vermont; Cheshire; Chicago and Alton; Chicago and Eastern Illinois; Chicago and Grand Trunk; Chicago, Milwaukee and St. Paul; Chicago, Rock Island and Pacific; Cincinnati, Hamilton and Dayton; Concord; Connecticut River; Detroit, Grand Haven and Milwaukee; Detroit, Lansing and Northern; Evansville and Terre Haute; Fitchburg; Flint and Pere Marquette; Grand Trunk; Louisville, New Albany and Chicago; New London and Northern; Providence and Worcester; Toledo, Ann Arbor and Northern Michigan; Wabash, St. Louis and Pacific.

The National Despatch Line have their principal office in Boston, Mass. They solicit freight at Boston and other places in New England for transportation to all prominent points in Canada and the Western States west of St. Johns. They have agencies in Boston and other eastern points and in Chicago and other western points. They do not receive or solicit freight at Boston or other New England points, the destination of which is south of St. Johns for western bound freight. They issue their own bills of lading, according to the form hereto attached, marked "B;" and they also issue and publish their tariff for transportation from New England points to points in the Western States and Canada, west of St. Johns. The one now in force, and which has been in force since April 5, 1887, is hereunto attached, marked "C." They do not issue bills of lading for west bound freight from New England points to points south of St. Johns,

nor do they make a tariff nor profess to be carriers between these points in respect to west bound freight destined south of St. Johns. St. Albans, Vt. is south of St. Johns, and is not embraced in the tariff made by the National Despatch Line for west bound freight. The rates made to points west of St. Johns, where there is competition with complainants' line, are made under this tariff by the National Despatch Line.

And this defendant denied that the joint tariff aforesaid constitutes an arrangement for a continuous carriage within the meaning of the first section of the Interstate Commerce Law; but if it does, then it alleges that the joint tariff from Boston to St. Albans makes a wholly different line from the one made by the joint tariff of the National Despatch Line, within the meaning of the fourth section of said Law.

Rates at St. Albans, Vermont.

And this defendant further says that the rates from Boston and intermediate points to St. Albans are reasonable; that nobody along the line is dissatisfied with the rates made; that the Boston and Albany Line is not a competitor for traffic for west bound freight from Boston or intermediate points to St. Albans, and are in no way interested in the rates that are made thereto. It further says that the Central Vermont Road runs through a sparsely settled country; that the local traffic thereon is small, and that it was constructed at a great expense through an uneven country, with high grades; that the road has been foreclosed and reorganized, and the original capital put into the construction of the same has been lost; that if the said road was compelled to depend upon local traffic, it could not pay its expenses and interest on its bonded debt, to say nothing of the stocks of the road, as it has been reorganized; that this defendant's road has been brought into a high state of efficiency with a view of doing such through traffic; that the additional expense of doing through traffic as compared with local traffic is small in degree; that its road is the same whether the traffic is local and small, or large by reason of through business; that the profit which it makes out of the through business is very important to it, by reason of the volume of through traffic as compared with the local traffic; that the volume of business from Boston to St. Albans is not one twentieth part of what it is to points beyond these westward.

Through Rates.

Dissimilar conditions and circumstances.

And this defendant further says that the Central Vermont Road extends northerly from St. Albans to the state line, a distance of about ten miles; that it there connects with the Montreal & Vermont Junction Railroad, a Canadian corporation, which extends about twenty-two miles northerly to St. Johns, in Canada, where it connects with this defendant's road, which extends through Canada to Windsor, opposite to Detroit.

It is over this line that the National Despatch cars principally run. And this defendant further says that the rate made by the National Despatch Line from Boston to Montreal is, and was at the time of the filing of the petitioner's

complaint, the same as stated in said complaint, and for the following reasons: there are many competitors at Boston for traffic to Montreal; there are none for traffic to St. Albans. Boston traffic is taken by ocean steamers to Halifax, Nova Scotia, and St. Johns, New Brunswick, and thence by Canadian railways to Montreal. It is also taken via Passumpsic & Southeastern Railway to Montreal, the latter being a foreign corporation. Traffic is also taken from New York to Montreal by the Delaware & Hudson River Canal Company, which extends from New York City to Rouse's Point, within fifty miles of Montreal, and is a railroad wholly within the State of New York. Halifax and St. Johns are foreign cities, and, together with New York, are competitors with Boston for the sale of goods to merchants of Montreal. Unless the rate of freight is as low from Boston to Montreal as from the aforesaid cities to Montreal, the traffic will not go over the roads used by the National Despatch Line, and this defendant would be injured thereby.

The National Despatch Line make the rate they do from Boston to Montreal from necessity, and for no other reason.

And these defendants further say that the rate made by the National Despatch Line from Boston to Detroit is and was as stated in said petition at the time of filing thereof. There are many competing lines for Boston traffic to the West, and especially to Detroit. The Baltimore & Ohio takes traffic at Boston by ocean steamers to Philadelphia and Baltimore, and thence over their line to all large points in the West. The Boston and Albany Line via the New York Central and Michigan Central Railroads and steamships from Buffalo take freight westward to all lake points, and more especially Detroit. This defendant's line runs principally through Canada, to Windsor, Canada, opposite Detroit, and Point Edward, opposite Port Huron, Michigan. The roads from Boston to St. Albans, in connection with the Ogdensburgh & Lake Champlain Railroad, and the line of boats on the great lakes, called the Central Vermont line of steamers, constitutes still another competitor with the National Despatch Line at Detroit and other western points. The Canadian Pacific, another foreign corporation, is in competition for this same traffic. Many others might be named, especially the New York & New England, and its connections; also the Fitchburg & Hoosac Tunnel.

And this defendant further says that these competing lines largely dictate the rates from Boston to Detroit, and other competing points in the West; that the defendant's lines must make as low rates to these points of competition as the other lines, or go out of the business; that the through business to competing points is important to this defendant and the other connecting roads, and is a source of large profit to this defendant; that the amount of traffic from Boston to St. Albans and intermediate points is not the one twentieth part what it is to points west of St. Albans. And this defendant further says that the circumstances and conditions under which traffic is taken from Boston and transported to St. Albans is wholly dissimilar from what it is in respect to traffic which they take and transport west of

there to points of competition, and more especially Montreal and Detroit; that the rates made from Boston to Montreal and Detroit respectively are made from necessity, and for no other reason; that the petitioner is in nowise interested in the rates from Boston to St. Albans; that its motive in filing its petition is to break down one of its principal competitors for through business from Boston to Detroit and other points in the West, and from no other motive. And these defendants further say that they have acted in good faith in the premises; that they have given the best construction they could to the Interstate Commerce Law, and under the advice of counsel; and if they have erred, they will ask leave to file their petition to be relieved from the operation of the fourth section of said Act, without this, that the facts set forth in said petition are true except as herein confessed, avoided, or denied.

ANSWER OF NORTHERN R. R. CO. IN BOTH CASES.

In the matter of the petition of the Boston and Albany Railroad Company against the Boston & Lowell Railroad Corporation and others, dated May 21, 1887.

The Northern Railroad, named in said petition as the Northern Railroad Company, for answer to such petition says:

First: That its road is now, and has been since the 31st day of May, A. D. 1884, in the possession of and operated by the Boston & Lowell Railroad Corporation under a lease, and that the Northern Railroad during that time has not made and issued, or joined in making or issuing with the other railroad corporations named in said petition, joint rates, as set forth in the petition.

Second: The respondent corporation has not sufficient knowledge to admit or deny the other matters and things named in said petition, but

it requires the same to be proved if, and so far as material, for any purpose against it.

Northern Railroad.

By J. H. Benton, Jr., Atty.

Commonwealth of Massachusetts.

Suffolk ss. June 27, 1887.

Then personally appeared J. H. Benton, Jr., and made oath that he is the attorney of the Northern Railroad, by which the foregoing answer is made, and that the same is true.

Before me,

Arthur A. Maxwell,
Justice of the Peace.

ANSWER OF CENTRAL VERMONT R. R. CO. AND OGDENSBURG & LAKE CHAMPLAIN R. R. CO. IN NO. 15.

(Filed July 2, 1887.)

The joint and several answer of the Central Vermont R. R. Co. and the Ogdensburgh & Lake Champlain R. R. Co.:

These defendants, saving to themselves all benefit of exception which can be taken to said petition for answer thereto, say the Boston and Lowell, the Nashua and Lowell, the Concord, the Northern, the Central Vermont, and the Ogdensburgh and Lake Champlain Railroads, form a connecting line of railroads, so far as trackage is concerned, from Boston to Ogdensburgh, N. Y. These roads are not managed or controlled by each other, except the Nashua and Lowell and the Northern are under lease to the Boston and Lowell, and the Ogdensburgh and Lake Champlain is under lease to the Central Vermont Railroad; nor is there between them an arrangement for a continuous carriage or shipment, unless it may be implied from the making of joint tariffs and the interchange of cars. At the time complained of in the petition there was and still is a joint tariff for west bound traffic from Boston to Ogdensburgh over the aforesaid roads, at the rates stated in the petition, that is to say: 1, 2, 3, 4, 5, 6 classes 60, 50, 45, 30, 25, 17, cents per hundred pounds. Said tariff is hereto attached, marked "A."

From Ogdensburgh there is a line of eight steamers which run between there and Chicago and touch at various points on the Great Lakes, and more especially at Cleveland, Detroit, Port Huron, Milwaukee and Chicago. This line of steamers is controlled by the Central Vermont Railroad Company, and they have a joint tariff with the roads aforesaid, entirely different and independent from the one between the roads themselves, as before stated, from Boston to Ogdensburgh.

This line is called the Central Vermont Line of steamers. They take no traffic for points between Boston and Ogdensburgh, but only for points west of Ogdensburgh, for westward bound freight. Their joint tariff is hereto attached, and they make the rates from Boston to lake points as stated in the petition.

The defendants insist that the aforesaid joint tariffs do not constitute an arrangement for a continuous carriage or shipment within the meaning of the first section of the Interstate Commerce Law; but if they do, then they do not constitute the same lines within the meaning of the fourth section of said Law.

Ogdensburgh Rates.

And these defendants further say that the rates from Boston to Ogdensburgh referred to in said petition are entirely reasonable; that shippers do not complain, nor do the public at Ogdensburgh. There is no competition with the defendants' line at Ogdensburgh for traffic from Boston to Ogdensburgh. The Ogdensburgh and Lake Champlain and Central Vermont Roads embrace more than half the distance from Ogdensburgh to Boston. They run through a sparsely settled country with high grades, and are operated at unusually large expense, especially in the winter by reason of heavy drifts of snow and excessive frosts.

They have both been foreclosed and reorganized, and the original capital put into the construction has been lost; and if they were compelled to depend upon local traffic alone, they could not pay their expenses and interest on their bonded debt, to say nothing of the various stocks of the roads as now reorganized. These roads have been brought up to a high state of efficiency for the purpose of doing a through business from the seaboard to the West, and if the rates from Boston to points on the Great Lakes made by the Central Vermont line of steamers aforesaid were raised to the same rates as the tariff from Boston to Ogdensburgh, no traffic would go by this line to points on the Great Lakes by reason of competition with other lines, and more especially the Boston and Albany Line hereinafter referred to.

On the other hand, if the rates from Boston to Ogdensburgh were reduced to the same rates as from Boston to points on the Great Lakes, it would seriously cripple these defendants' roads and would weaken them as competitors for through business by the Boston and Albany Line without affording any relief to Ogdensburgh, but it would probably result in a large increase in the rates from Boston to Ogdensburgh in order to maintain the roads, if the through business is given up.

*Through Rates.**Different Circumstances and Conditions.*

And these defendants further say that there are many competing lines for Boston traffic to the West. The Baltimore and Ohio takes traffic at Boston by ocean steamers to Philadelphia and Baltimore, and thence over their line to all large points in the West. The New York and New England Line via New York City and Pennsylvania Central Railroad, and also via the Erie Railroad at Newburgh; the complainants' line via the New York Central, and a steamship line. These lines have generally been called the trunk lines. There is still another, the Grand Trunk Line via Portland, Maine, over the Boston and Maine, and also via St. Johns in Canada over the National Despatch Line. The Grand Trunk Company is a foreign corporation, and owns or controls nearly 4,500 miles of railway, and extends from Portland, Maine, to Windsor, opposite Detroit, Mich. through Canada.

They compete for Boston traffic destined to all large points in the West, and more especially at Port Huron, Detroit, Milwaukee and

Chicago, referred to in the petitioner's complaint. The Canada Pacific Railway, a foreign corporation controlling more than 4,600 miles of railway, also competes for this traffic to Detroit and west thereof; also the Fitchburg and Hoosac Tunnel line over the West Shore, Erie and Lackawanna Railroads.

And these defendants further say that these various lines compete with the defendant's line at the various lake points referred to in the petitioner's complaint and dictate the rates that shall be charged thereto; that the defendant's line must make as low rates to these points of competition as the other lines, or go out of the business; that this through business to competing points is quite as important to these defendants as their local traffic; that the amount of traffic from Boston to Ogdensburgh and intermediate points is not one twentieth part of what it is to points west of Ogdensburgh; that they make money on their through business, and without it they could not secure any adequate return for the capital invested in defendants' roads.

And these defendants further say that the circumstances and conditions under which they take traffic from Boston to Ogdensburgh is wholly dissimilar from what it is in respect to traffic which they take west of there to points of competition on the Great Lakes; that the cost of service is relatively small for the water carriage west of Ogdensburgh as compared with the railroad carriage between Boston and Ogdensburgh; but the rates made from Boston to lake points on this line are made from necessity, and for no other reason; that the petitioners are in no wise interested in the rates from Boston to Ogdensburgh; that their motive in filing their petition is to break down one of their principal competitors for through business from Boston to lake points aforesaid. And these defendants further say that they have acted in good faith in the premises, that they have given as good construction as they could to the Interstate Commerce Law, and under the advice of counsel; and if they have erred, they will ask leave to file their petition to be relieved from the operation of the fourth section of said Act, without this, that the facts set forth in said petition are true except as herein confessed, avoided or denied.

Frank Owen,
General Freight Agent.

F. W. Baldwin,
Superintendent.
General offices, Ogdensburgh, N. Y.

I, B. F. Fifield, on oath say that I am solicitor for the Central Vermont R. R. Co., on this 25th day of June, 1887. I enclosed a copy of the foregoing answer in a letter addressed to Arthur Mills, general traffic agent of the Boston & Albany R. R. Co., Boston, Mass., which letter duly stamped, I deposited in the post-office at Montpelier, Vt., on the day aforesaid.
B. F. Fifield.

At Montpelier, in Saul County, this 20th day of June, 1887.

State of Vermont, }
Washington County, }

Then personally appeared B. F. Fifield, and made oath to the truth of the above statement subscribed by him, before me.

R. G. Brown,
Notary Public.

INTERVENING COMPLAINT OF VERMONT STATE GRANGE OF PATRONS OF HUSBANDRY, IN BOTH CASES.

(Filed August 5, 1887.)

To the Honorable Interstate Commerce Commission:

Comes the Vermont State Grange of the Patrons of Husbandry, an association of farmers and business men organized and located within the State of Vermont, and respectfully represent that in response to the invitation of your honorable Commission, as contained in

the citation issued and ordered published in the above entitled causes now depending before you and set down for hearing at Rutland, in the State of Vermont, Thursday, September 1, 1887, and ask leave to intervene and be heard upon the questions presented in and by said proceedings.

And these complainants allege that the tariff rates and charges made by the defendants for the transportation of property from Boston in the State of Massachusetts and points near said Boston to St. Albans, Burlington, Middlebury and other places in the said State of Vermont, and from said places in Vermont to Boston and places near thereto, are higher than the charges made by the said defendants and said National Despatch Line from said Boston to Montreal, in the Province of Quebec, Detroit, in the State of Michigan, and other points beyond and northerly and westerly of the said State of Vermont, and from said northern and western points to said Boston, which said charges so made by them are in contravention of the provisions of the fourth section of the Act of Congress entitled An Act to Regulate Commerce, approved February 4, 1887.

And they also allege that said charges for transportation of property from Boston aforesaid to said points in Vermont, and from said Vermont points to Boston and other places in the vicinity thereof, so made by the defendants are exorbitant in fact and are not reasonable or just, which is in contravention of first section of said Act.

Wherefore, your petitioners ask that notice of this complaint and intervention be at once issued to the defendants, and that said charges above complained of be diminished and made to conform with the requirements of said Act; and for such other, further, or different relief as to Your Honors may seem meet.

The Vermont State Grange of the Patrons of Husbandry.

By Haskins & Stoddard,
Their Attorneys.

United States of America, }
District of Vermont, }

At Brattleboro, in said District, on the 4th day of August, A. D. 1887, personally appeared Kittredge Haskins, one of the attorneys above named, and made oath that the allegations of the foregoing petition, or complaint and intervention, are true according to his best knowledge, information and belief.

Before me,

Royall Tyler,
U. S. Commissioner.

POWERS AND PROCEDURE OF THE COMMISSION.

LETTER of *Chairman Cooley*, to a merchant who had sent a communication to the Commission complaining of a railroad rate.

Ann Arbor, August 15, 1887.

Dear Sir:—A communication from you complaining of a rate which has been imposed on merchandise transported by railroad for you, has been forwarded to me from Washington for answer. I incline to think from the wording of your letter that you suppose

one article of merchandise almost necessarily prejudices any other that to any extent is competitive; so that it is unsafe to answer without careful investigation that any proposed change will have injurious results to one unless it be the roads themselves.

I have made this statement that you might fully understand the necessity the Commission is under of requiring that complaints intended for its action be made responsibly, and with sufficient fullness, so that the statements fairly put the railroad on its defense. The Commission cannot assume from a mere statement of what has been paid for transportation that the amount is excessive. It may seem to be so, and yet an explanation which makes it reasonable be possible. At any rate, to make an explanation is as much a matter of right in these cases as to make defense when sued at law.

It is the desire of the Commission that complaints be made in the form of petition, but they may be perfectly simple and without technicality. If the petition states the facts, making out an apparent case of wrong which the Commission has jurisdiction to redress, it will be sufficient.

If after this statement of our course of procedure you desire to make complaint for the action of the Commission, the rules* which are herewith sent you will be a sufficient guide, and on the receipt of your petition it will have immediate attention. But the facts should be stated more fully than they were given in your letter, which, you will remember, was very meager in statement.

Very Respectfully Yours,
T. M. Cooley.

LETTER of the Commission replying to inquiries as to mode of procedure.

June 15, 1887.

Dear Sir: Yours of June 14 received. The rules of the Commission do not require a replication. It is intended that all its proceedings shall be in the simplest form consistent with a reasonable degree of certainty. Cases are considered as at issue when the answer is filed and copies served. If issues of fact are raised upon the answer by denials, or by allegations of new matter, it is the understanding of the Commission that the case stands for trial upon the questions of fact as well as of law; a day for hearing will be assigned on request of either party; witnesses can then be examined, if necessary, and argument made upon the law as applicable to the facts established by proof. The case can be presented by written or printed arguments if parties prefer to take that course. It is the desire of the Commission that parties agree upon facts relating to questions presented, so far as possible; and for this purpose stipulations in writing may be filed or oral concessions made on the hearing. In case parties cannot agree upon the facts and desire to avoid the expense of bringing witnesses to Washington, depositions for use before the Commission may be taken on notice to the other side, in the manner provided by sections 863 and 864 of the Revised Statutes of the United States. Such depositions when taken should be transmitted to the Secretary of the Commission, who will open and file the same. If the tak-

*See Appendix I. to this volume.

ing of depositions is deemed necessary, it should be entered upon as soon as practicable after the service of the answer.

For the Commission:

Yours Truly,
Edw. A. Moseley,
Secretary.

Sections 863 and 864, referred to above:

Sec. 863. The testimony of any witness may be taken in any civil cause depending in a district or circuit court by deposition *de bene esse*, when the witness lives at a greater distance from the place of trial than one hundred miles, or is bound on a voyage to sea, or is about to go out of the United States, or out of the district in which the case is to be tried, and to a greater distance than one hundred miles from the place of trial, before the time of trial, or when he is ancient and infirm. The deposition may be taken before any judge of any court of the United States, or any commissioner of a circuit court, or any clerk of a district or circuit court, or any chancellor, justice, or judge of a supreme or superior court, mayor or chief magistrate of a city, judge of a county court or court of common pleas of any of the United States, or any notary public, not being of counsel or attorney to either of the parties, nor interested in the event of the cause. Reasonable notice must first be given in writing by the party or his attorney proposing to take such deposition, to the opposite party or his attorney of record, as either may be nearest, which notice shall state the name of the witness and the time and place of the taking of his deposition; and in all cases *in rem* the person having the agency or possession of the property at the time of seizure shall be deemed the adverse party, until a claim shall have been put in; and whenever, by reason of the absence from the district and want of an attorney of record or other reason, the giving of the notice herein required shall be impracticable, it shall be lawful to take such depositions as there shall be urgent necessity for taking, upon such notice as any judge authorized to hold courts in such circuit or district shall think reasonable and direct. Any person may be compelled to appear and depose as provided by this section, in the same manner as witnesses may be compelled to appear and testify in court.

Sec. 864. Every person deposing as provided in the preceding section shall be cautioned and sworn to testify the whole truth, and carefully examined. His testimony shall be reduced to writing by the magistrate taking the deposition, or by himself in the magistrate's presence, and by no other person, and shall, after it has been reduced to writing, be subscribed by the deponent.

NEW YORK, PHILADELPHIA & NORFOLK R. R. CO.

v.

SEABOARD LINE and Atlantic Coast Line.

(August 12, 1887.)

A PETITION has been filed by the New York, Philadelphia & Norfolk Railroad

Company against the "Seaboard Line" and "Atlantic Coast Line," complaining of unjust preferences on the part of the defendant carriers to other companies (in making through

rates, prorating, etc.), which it denies to complainant. It also complains of the refusal to furnish "reasonable, proper, and equal facilities for the interchange of traffic."

UNITED STATES CIRCUIT COURT FOR THE DISTRICT OF NEW JERSEY.

John P. STOCKTON, *Attorney-General of New Jersey,*

v.

BALTIMORE & NEW YORK R. R. CO.,
Staten Island Rapid Transit R. R. Co. *et al.*

1. The Act of Congress, approved June 16, 1886, entitled "An Act to Authorize the Construction of a Bridge across the Staten Island Sound, known as Arthur Kill," etc., is valid and constitutional under the power of Congress to regulate commerce among the States.
2. Said Act is not permissive merely, but gives authority and power to build such bridge, without reference to any authority or consent from the State on whose land under navigable water the bridge is to rest, and without compensation to the State.
3. In the pursuit of business authorized by the Government of the United States, and under its protection, corporations of other States cannot be prohibited or obstructed by any State.
4. In carrying on foreign and interstate commerce, corporations, equally with individuals, are within the protection of the commercial power of Congress, and cannot be molested in another State by state burdens or impediments.
5. Congress can confer upon a state corporation powers not contained in its original charter.
6. The power of Congress is supreme over

the whole subject of interstate commerce, unimpeded and unembarrassed by state lines or state laws.

7. The United States, when it does not seek to acquire exclusive jurisdiction over land within a State, may condemn such land for its purposes without the consent of the State.
8. The power to regulate commerce between the States extends not only to the control of the navigable waters of the country and the lands under them for the purpose of navigation, but for the purpose of erecting piers, bridges, and all other instrumentalities of commerce which in the judgment of Congress may be necessary or expedient.
9. The provision of the Fifth Amendment to the Federal Constitution: "Nor shall private property be taken for public use without just compensation;" does not apply to the use of the land of a State under navigable waters, for the support of a bridge erected under the authority of Congress in aid of interstate commerce.

(Decided August 1, 1887.)

INFORMATION by the Attorney-General of New Jersey, in the nature of a bill for an injunction. *Information dismissed and preliminary injunction dissolved.*

Before Hon. Joseph P. Bradley, Justice of the Supreme Court, sitting as Circuit Judge, and Hon. John T. Nixon, District Judge.

The facts and case are stated in the opinion.

NOTE.—*Power of the General Government in relation to interstate commerce.* The fundamental principle upon which the existing Interstate Commerce Law stands, that of the supreme power of the Federal Government over commerce both by land and water between two or more States, has been strikingly fortified by the recent decision of Justice Bradley of the United States Supreme Court in the case of the Arthur Kill Bridge. The Baltimore & Ohio and Staten Island Railroad Companies obtained specific authority from Congress to build a bridge over the navigable water between New Jersey and Staten Island known as the Arthur Kill. The Baltimore & Ohio had been for a long time fighting its way toward New York against the powerful opposition of the Pennsylvania and the Philadelphia & Reading interests, and these interests and others were brought to bear to secure the passage by the New Jersey Legislature of a law requiring the consent of that State to the construction of the proposed bridge. That consent was not obtained and an injunction was issued by the Chancery Court of New Jersey restraining the proposed construction. The case was taken to the higher tribunal, and Justice Bradley, in a written opinion concurred in by Judge Nixon, has overruled the injunction and left the railways free to proceed with their work.

It was claimed on behalf of the State that the land covered by the water which the bridge would cross belongs for one half the distance to New Jersey, and that the railway company holds its rights subject to the State's power of eminent domain. But Justice Bradley rules that where interstate commerce is concerned state authority does not exist. He declares that the power given to Congress is supreme

in all respects affecting commercial communication by land and water between the different States, and that it cannot depend on the consent of the States. If the claim of New Jersey that she has riparian rights which even the national government cannot override without her consent is admitted, then any State can interpose a barrier to commerce between the States. But the judge claims that the relinquishment by the State of its jurisdiction is not necessary to the use of the land by the United States for public purposes. "The law of eminent domain," he says, "cannot be invoked to frustrate the supreme power of the United States, especially where the regulation of interstate commerce is concerned."

While this decision, which it is to be assumed the full Bench of the supreme court will sustain, strikes very deep at the root of the States' rights doctrine, it must be admitted that the outcome is a logical one. If the Federal Government has been given power to regulate interstate commerce, it must not be prevented from doing so by the independent action of a State. Carried still farther the decision would seem to deny the right of a State to prevent the construction of a bridge over a navigable stream lying wholly within its own limits, if the general government should consider the structure necessary for the purpose of interstate commerce.

It is evident from this and many other decisions that the trend of the courts, as well as of public opinion, is in the direction of greater centralization of power over commercial and industrial interests, and we may be prepared to expect the passage by Congress of still more rigid and comprehensive regulations of railway traffic than those so recently put in force. [From *The Railway Age*.]

Mr. John P. Stockton, Atty-Gen, informant, pro se:

I. The State of New Jersey is seised and possessed of and entitled to an estate in fee simple absolute in the soil covered by the waters of the Arthur Kill and being within the boundaries of said State, subject only to the easement of navigation and the power of regulating such navigation ceded by the State to the general government by the Constitution of the United States.

Co. Litt. 107, 260 b; Colles, 17; 3 Leo. 75, 2 Molloy, 375; *Royal Fishery in the Banne*, Davies' Rep. 149; *Attorney-General v. Chambers*, 11 De G. M. & G. 206; *Stevens v. Paterson etc. R. R. Co.* 5 Vroom, 540; *Martin v. Waddell*, 16 Pet. 367-415 (41 U. S. bk. 10, L. ed. 997); *Arnold v. Mundy*, 1 Halst. Law, 191; *Den, Russell, v. Jersey Co.* 15 How. 432 (56 U. S. bk. 14, L. ed. 760); *Smith v. Maryland*, 18 How. 71-74; (59 U. S. bk. 15, L. ed. 269); *McCready v. Virginia*, 94 U. S. 391-394 (Bk. 24, L. ed. 248); *VanBroeklin v. Anderson*, 117 U. S. 151 (Bk. 29, L. ed. 845). See also as to Treaty with New York: *People v. Central R. R. Co.* 42 N. Y. 288; *People v. Central R. R. Co.* 12 Wall. 455 (79 U. S. bk. 20, L. ed. 458).

II. The power to regulate the public right of navigation is given to the general government for the preservation of the public right of way, and does not authorize the imposition of any additional servitude on the soil, or any interference with the possession of the owner thereof, except so far as it may be necessary for the purpose for which the right exists.

The owner of the soil has the exclusive right to all above and under the ground, except only the right of passage for the public.

The ownership of the Crown in the soil is subservient to the public right of navigation and cannot be used in any way so as to derogate from and interfere with such right. The grantees of the Crown take subject to this right, and any grant to a subject so as to be detrimental to a public right is void. Any injury to the public right is a nuisance. All such nuisances may be abated upon information. The right of navigation extends over every part of a navigable river and *a fortiori* of the sea, and includes the right to anchor without paying toll. As a necessary part of the right it is essential for its full enjoyment. It has been held that the right of navigation includes all such rights as are necessary for the full enjoyment, not only of the right of passage, but of the rights of trade and commerce; and that the private property of the Crown and its grantees is subservient to this public right.

Rez v. Russell, 6 Barn. & C. 566; *Original Hartlepool Collieries v. Gibb*, 5 L. R. Ch. Div. 718.

Lord Denman, delivering the opinion of the Court of Queen's Bench in the case of the *Mayor of Colchester v. Brooke*, said the right of soil in arms of the sea and public navigable rivers which the Crown *prima facie* has, independently of any ownership in the adjoining land, must be in all cases considered as subject to the public right of passage.

See Coulston & Forbes, *Law of Waters*, 34, 85.

It is beyond question that the same public

right which exists in this country over the public navigable waters was a part of the civil law as well as the common law of England. It existed before the Constitution; it was not ceded to the general government; but it exists as a public right, belonging to every individual. Its regulation was committed to Congress, but the right itself is not a power granted to the general government, but a reserved public right; a way over which Congress is the overseer.

Justice McLean said, in the *Wheeling Bridge Case*, 18 How. 442 (59 U. S. bk. 15, L. ed. 442), that the power to regulate commerce among the several States did not necessarily include the power to construct bridges which may obstruct commerce, but can never increase its facilities on a navigable water.

Justice Field, in the case of *Miller v. Mayor of New York*, says, whatever, therefore, may be necessary to preserve or improve its navigation, the general government may direct, and to that end it can determine what shall and what shall not be deemed an interference with or an obstruction with such navigation.

Chief Justice Savage says, in the case of *The People v. Rensselaer*, after ascertaining that the power to erect bridges existed in the State Legislature before the adoption of the Federal Constitution: It is not pretended that such power has been delegated to the general government, or that it is conveyed under the power to regulate commerce and navigation. It remains, then, in the State Legislature, or it exists nowhere. It does exist, because it has not been surrendered any further than such surrender may be qualifiedly implied; that is, the power to erect bridges over navigable streams must be considered so far surrendered as may be necessary for a free navigation upon those streams.

The extent of the public right was well expressed by Platt, Justice, delivering the opinion of the Supreme Court of New York in *Jackson v. Hathaway*, 15 Johns. 447. Highways, he remarks, are regarded in our law as easements. The public acquire no more than the right of way, with the powers and privileges incident to that right, such as digging the soil and using the timber and other materials found within the space of the road in a reasonable manner, for the purpose of making and repairing the road and its bridges. The proprietor retains his exclusive rights in all mines, quarries, springs of water, timber, and earth, for every purpose not incompatible with the public right of way. The owner of the fee may maintain trespass against one who builds on a highway; *Peck v. Smith*, 1 Conn. 108; *Cortelyou v. Van Brundt*, 2 Johns. 357; or one who digs up and removes the soil; *Gidney v. Earl*, 12 Wend. 98; *Willoughby v. Jenks*, 20 Wend. 96; *Tucker v. Eldred*, 6 R. I. 404; or cuts down trees or timber growing thereon. And though a surveyor may, as the agent of the town, cut such trees to be used in the repair of the way, or in order to improve it, yet, if he cuts them for his own use, he is a trespasser.

Babcock v. Lamb, 1 Cow. 238; *Makopess v. Worden*, 1 N. H. 16; *Tucker v. Eldred*, 6 R. I. 404.

The discussion which has taken place in re

gard to grants or concurrent use of streets by railroads and the public, or for its exclusive use by a railroad company, without compensation to the owner of the fee, have thrown much light on the determination of the limits of the public right of passage. The question has been discussed in every State of the Union and the decisions are innumerable. The general current of the later American decisions is in accordance with the English law and the doctrine of *Williams v. New York Central Railroad Co.* It is now well established that the use of streets for railways with cars propelled by horse power is not to be regarded as imposing a new servitude which will entitle the land owner to additional compensation, but that the use of streets for steam railroads is to be so regarded, and is so far different in its nature that it ought not to be regarded as within the contemplation of the parties in the laying out of an ordinary highway. The discussion has turned upon the kind of motive power used, and a distinction is generally made between the two classes of railroads.

In *Morris & Essex R. R. Co. v. Newark* a distinction is suggested between the exclusive occupation of the highway by the railroad and a concurrent use by the railroad and the public traveling in the ordinary mode, and it is said that the land owner is entitled to additional compensation only where the newly granted franchise, either from the kind of structure or the character of the extent of the use authorized, is inconsistent with the public use of a highway in the ordinary mode. The same question arises as to the establishment of telegraph and telephone lines upon the highway, with similar results as to uniformity of decisions. The use of streets for the use of sewers, gas, and water pipes, raises the same inquiry. The right to use the highway for these purposes is generally admitted, upon the ground that these uses are incidental to the purpose of a highway for which the land was originally taken. But there are also cases in which it is held that the use of the highway for these purposes puts an additional servitude upon the land.

Glasby v. Morris, 8 C. E. Green, 73; *Morrison v. Hinkson*, 87 Ill. 587. See Angell, Highways, 8d ed. § 91.

During the whole of this discussion it was conceded that the servitude could not be increased in extent or in character without compensating the owner of the fee for the additional burden imposed upon his land.

Whatever be the lawful purpose for which Congress desires to take any lands of the State of New Jersey, it can only accomplish such taking by providing just compensation therefor.

III. The permanent erections contemplated by the plan constitute a taking of private property within the Fifth Amendment of the Constitution of the United States; and whatever power Congress may have under the right to regulate commerce is held subject to the restriction of that amendment.

The defendants contend that the erection of piers upon the lands of the State under the Arthur Kill, is not a technical "taking" of such lands.

LITTE R. S.

The defendants undoubtedly do mean to take physical and exclusive possession of the lands described in the information, and it is difficult to conceive of any more effectual and actual "taking." They argue that as the "taking" is of lands under navigable water, any damage resulting therefrom is the consequence of a lawful use by the government of a navigable stream. But this matter is *res judicata*.

In *Pumpelly v. Green Bay etc. Canal Co.* 18 Wall. 166 (80 U. S. bk. 20, L. ed. 557), the Federal Supreme Court, speaking by Mr. Justice Miller, says:

"The argument of the defendant is, that there is no taking of the land within the meaning of the constitutional provision, and that the damage is a consequential result of such use of a navigable stream as the government had a right to for the improvement of its navigation. * * * It remains true that where real estate is actually invaded by superinduced additions of water, earth, sand or other materials, or by having any artificial structure placed on it, so as to effectually destroy or impair its usefulness, it is a "taking" within the meaning of the Constitution."

Sinnickson v. Johnson, 3 Harr. 126; *Gardner v. Newburgh*, 2 Johns. Ch. 162; Angell, Water Courses, 165.

Any serious interruption to the common and necessary use of property may be equivalent to the taking of it under the constitutional provision; it is not necessary that the land be absolutely taken.

Angell, Water Courses, § 85a; *Hooker v. New Haven & Northampton Co.* 14 Conn. 146; *Rowe v. Granite Bridge Corp.* 21 Pick. 844; *Canal Appraisers v. People*, 17 Wend. 604; *Lackland v. North Missouri R. Co.* 31 Mo. 180; *Stevens v. Proprietors of Middlesex Canal*, 12 Mass. 466.

The corporate body of the State itself can claim amends for its private property when taken for public use. Thus, suppose an Act of the Legislature, by which a railroad corporation is established in the usual manner, and with the ordinary powers and privileges of such corporations, authorizes the corporation to locate their road so that the same may pass over certain land which belongs to, and is held by, the State as a body politic, for a particular purpose, but without any expression in the Act of a design on the part of the Legislature to aid the corporation in their undertaking. In such a case it cannot be considered to be the intention of the Legislature to grant the land of the State, or any easement therein without compensation, and the State, accordingly, may institute proceedings and prosecute a claim for damages before an appropriate tribunal, in the same manner as an ordinary individual proprietor.

Commonwealth v. Boston & Maine Railroad, 8 Cush. 25; Angell, Highways, 8d ed. § 111.

Puffendorf, Grotius, Vattel and all eminent publicists insist that it is a rule founded in equity that a provision for compensation is a necessary attendant on the due exercise of the power of the lawgiver to deprive an individual of his property without his consent.

A statute to promote any work for a public use, which makes no provision for indemnifying the owner, of property proposed to be

taken, is entirely void as being unconstitutional, and an injunction may be obtained to prevent the taking.

Angell, Highways, 8d ed. § 106, and cases cited.

It has been held that by the law of eminent domain a State has not the right, without making compensation, to destroy the property of individuals situated upon a water course in making it navigable, or in appropriating such water courses for the public use by artificial erections and improvements.

Opinion of Chancellor Bland in *Binney's Case*, 2 Bland, 158; Angell, Highways, § 60, Title, *Navigable Rivers*; *Walker v. Board of Public Works*, 16 Ohio, 540; *Moore v. Veazie*, 2 Redf. 343; *Bell v. Gough*, 3 Zab. 624.

Judge Wallace, in the case of *Decker v. Balto. & N. Y. Railroad Company* (post, —), said: "It is not intended to intimate that Congress can authorize the appropriation of private property for the purposes of such a bridge. It was at one time doubtful whether the Government of the United States could exercise the right of eminent domain within the States." The question was settled in *Kohl v. United States*, 91 U. S. 376 (Bk. 23, L. ed. 453), where it was held that the government, if such property cannot be obtained by purchase, may appropriate it upon making just compensation to the owner. It is not necessary to consider whether Congress could enable the defendants to condemn property in New Jersey for the purposes of their bridge. This has not been attempted by the Act under consideration. All that is now necessary to decide is that if the defendants acquire the right from the owners of the land under the waters and on the shores, the Act of Congress gives them lawful authority to build and maintain their bridge without the consent of the State of New Jersey.

It seems, then, to be clear: That the State of New Jersey owns the fee. That the only servitude to which it is subject is the public right of navigation, subject to the regulation of Congress. That any interference with the soil for any other purpose but the preservation of the way and its use is a trespass. That any permanent erection on the soil deprives the owner of his possession and enjoyment, and amounts to a taking within the Fifth Amendment. That the government may take private property of individuals for its own use upon making compensation,—but it has not done so by the Act in question.

IV. The right to build bridges between States over navigable streams has never been held a part of the power to regulate commerce; but the authorities all agree that it requires both the authority of the States and the consent of Congress to bridge a navigable river.

In *Gilman v. Phila.* 3 Wall. 718 (70 U. S. bk. 18, L. ed. 96), the court said: "We will now turn our attention to the rights and powers of the States which are to be considered. The national government possesses no powers but such as have been delegated to it; the States have all but such as they have surrendered. The power to authorize the building of bridges is not to be found in the Federal Constitution. It has not been taken from the States. It must reside somewhere. They had it before the Constitution was adopted, and they have

it still. In *Wright v. Nagle*, 101 U. S. 791, (Bk. 25, L. ed. 921), Chief Justice Waite says: "The Legislature of a State alone has authority to make such grants."

Mr. Justice McLean said, in the *Wheeling Bridge Case*, 18 How. 442 (59 U. S. bk. 15, L. ed. 442): "Any power which Congress may have in regard to such a structure is indirect, and results from a commercial regulation. It may, under this power, declare that no bridge shall be built which shall be an obstruction to the use of a navigable water. And this it would seem is as far as the commercial power by Congress can be exercised."

Mr. Justice McKinley said, in *Pollard v. Hagan*, 8 How. 212 (44 U. S. bk. 11, L. ed. 565): "To give to the United States the right to transfer to a citizen the title to the shore and the soils under the navigable waters, would be placing in their hands a weapon which might be wielded greatly to the injury of state sovereignty, and deprive the States of the power to exercise a numerous and important class of police powers."

See also *Weber v. State Harbor Comrs.* 18 Wall. 57 (85 U. S. bk. 21, L. ed. 798).

In all the cases it will be found that the court simply asserts the power of Congress to regulate and preserve the public right of navigation as an incident to its constitutional power to regulate commerce.

In the *Wheeling Bridge Case* the Legislature of Virginia authorized the construction of a bridge across the Ohio River, which it was alleged was an obstruction to the navigation of the river. The supreme court adjudged the bridge to be a nuisance, because it obstructed the navigation of the Ohio River. The court said, however: "We have already said, and the principle is undoubted, that the Act of the Legislature of Virginia conferred full authority to erect and maintain the bridge, subject to the exercise of the power of Congress to regulate the navigation of the river. So in *Miss. R. R. Co. v. Ward*, the power to erect the bridge was granted by the laws of the respective States, and there is no intimation in the case that Congress had power to make such a grant."

In the case of the *Olinton Bridge*, 10 Wall. 454 (77 U. S. bk. 19, L. ed. 969), it was held that the power to erect a bridge having been granted by the States of Illinois and Iowa, and the obstruction to navigation having been legalized by the Act of Congress, the bridge was a lawful structure and not a nuisance.

In the case of *Newport etc. Bridge Co. v. United States*, 105 U. S. 470 (Bk. 26, L. ed. 1143), the States of Kentucky and Ohio granted the power of erecting a bridge across the Ohio River, and Congress passed an Act permitting the erection of the bridge upon certain plans.

In *Escanaba Co. v. Chicago*, 107 U. S. 678 (Bk. 27, L. ed. 442), Mr. Justice Field delivered the opinion of the court, and cites the case of *Gilman v. Phila.* with approval. He says that Congress, in the exercise of its commercial power, may exercise control to the extent necessary to protect, preserve and improve free navigation.

In *Miller v. Mayor of N. Y.* 109 U. S. 335 (Bk. 27, L. ed. 971), the bridge was being constructed under a grant from the Legislature of

the State of New York, and an Act of Congress prescribing the manner of its erection. Mr. Justice Field delivered the opinion of the court, and again declared that the power vested in Congress to regulate commerce includes the control of the navigable waters of the United States so far as may be necessary to insure their free navigation.

The same doctrine was clearly declared in the cases *United States v. Railroad Bridge Co.* 6 McLean, 64; *Silliman v. Hudson River Bridge Co.* 4 Blatchf. 414.

It was held in those cases that "Although, under its general power to regulate commerce, Congress may declare what shall constitute a nuisance or obstruction by general regulation, and provide proceedings for its abatement, yet it seems that neither under this power nor under the power to establish post roads can Congress construct a bridge over a navigable river. This belongs to the local or state authorities within which the work is to be done; and this authority must be so exercised as not materially to conflict with the paramount authority to regulate commerce."

V. The Act of Congress entitled "An Act to Authorize the Construction of a Bridge across the Staten Island Sound, Known as Arthur Kill, and to Establish the Same as a Post Road," is, as its title imports, nothing more than a license to obstruct navigation to the extent which the plans approved of permit.

It is submitted that the true intent and meaning of the Act in question can only be properly obtained by a legal construction thereof, and that no known rule of construction can construe the Act as anything more than a license.

1. It is to be observed, in the first place, that the words used both in the title and the body of the bill are precisely such words as would naturally be used to authorize and make lawful any obstruction to the free navigation of the sound on account of said bridge.

2. As this was all the power that Congress possessed, it is not to be inferred against the plain meaning of the words that Congress intended to make a grant beyond its power and such as had never been made before.

3. To give the Act any other construction would make it unconstitutional, and would therefore violate an accepted rule of judicial construction.

4. A grant from a State to a corporation to make a railroad between two given points, without containing express power to exercise the right of eminent domain, would be a mere license to make the road when they acquired the land, and would convey no power to take land against the consent of the owner, and it must be presumed that Congress knew this settled rule of construction.

5. By authorizing any litigation concerning any alleged obstruction to the free navigation of said sound on account of said bridge, to be tried before the Circuit Court of the United States, or either of said States, Congress manifested its intention to create a forum with jurisdiction competent to sustain the grant it had made of power to maintain as a lawful structure what would otherwise have been a nuisance. It is only in this point of view that the clause is proper.

6. The building of the bridge without the

consent of the State by the defendant corporation is an invasion of the State's control over its own citizens in municipal matters as well as a violation of her rights of property; and for this reason the Act is unconstitutional if construed to be operative without the consent of the State.

Chancellor Kent says: "It is admitted that the grant to Congress to regulate commerce on the navigable waters of the several States contains no cession of territory or of public or private property."

1 Kent, Com. 439; *Corfield v. Corjell*, 4 Wash. C. C. 371.

Mr. Cortlandt Parker, also for informant:

According to the claim of defendants, this case is a contest between sovereignty. New Jersey is, beyond question, a sovereignty—a lesser one, it is true, of narrower scope than the United States Government, but within that scope as sovereign as the Union within its special and larger field. Both are restricted sovereignties, but every maxim and rule in regard to sovereignties applies to New Jersey.

It is confessedly, undeniably true that as sovereign, and because she is sovereign, the State owns the bed of the waters which bound her shores *usque ad flum*; that she owns it in the same way that individuals ordinarily own property; that it can be leased, aye, even granted in fee, so long as the easement or right of navigation of the waters belonging to others, either by the law of nations or by compact, is not harmed; or indeed, subject only to the veto of Congress, whether or no. (See *Judge Grier in the Passaic Bridge Cases*). And yet the defendants claim that the United States, a State no more, no less, sovereign than New Jersey, only sovereign for other things and in certain directions, can take and occupy this property, can build over it, can maintain this building over it forever, at its pleasure; can do this in face of statutes expressive of her will interdicting the Act; nay, can authorize and justify her own citizens in breaking her laws, can add to the rights of a corporation which she creates; stranger still, can increase the rights and franchises of a foreign corporation; can actually justify such a corporation in disregarding her laws, and enforce their immunity in doing so.

If there is anything settled in the law of corporations, it is that, being artificial persons, they cannot exercise their functions outside of the State which creates them, except by its consent. The defendants abrogate that law, and insist that they, the Staten Island Rapid Transit Company, have the right, against our expressed will, to come into our State and do what our own citizens dare not do, or at least are forbidden to do.

If there is anything which distinguishes a sovereignty, it is that it has supreme control over its domain—its property; that it cannot be deprived of it by another sovereignty without its consent by grant, or by superior strength. There can be no eminent domain between sovereignties. There can be submission to conquest. There can be grants and treaties. There can be purchase, payment and release. But there can be no power in one

sovereignty by force of law to take the property of another.

It was understood and clearly apprehended when the Constitution of the United States was formed, that the National Government would need land within the States, and belonging to the States, for its public purposes. Every bay, every river, every headland, suggested the necessity of its being required in time for the purposes of the Union. How was it contemplated that such land should be acquired? Two provisions of the Constitution show: One is paragraph 17, of section 8, of article I; that gives Congress power to exercise "exclusive legislation * * * over all places purchased by the consent of the Legislature of the State in which the same shall be, for the erection of forts, magazines, arsenals, dock yards, and other needful buildings;" the other is in article V. of the Amendments to the Constitution: "Nor shall private property be taken for public use without just compensation." How, then, did the people and the States who made this Constitution contemplate that the government it created should acquire land which it needed? It was to get land, or words fail, by purchase; which purchase was to have the consent of the Legislature, else the general government was, in some sort, the subject of the State. Private property only could be taken, and that only for public use, and only upon compensation. Such language, by all rules, imports that public property, the property of the State, cannot be taken. *Expressio unius est exclusio alterius*. Public corporations, vested with the right of exerting the State's right of eminent domain, cannot take the land of the State for any purpose. Certainly not, if in use, like the bed of a navigable stream, for the public purpose of navigation. *A fortiori* is this true when one sovereignty seeks to take the land of another. New York cannot take the bed of the Arthur Kill beyond her own line. Nor could New Jersey beyond her's. Why not? Because each is a different sovereignty.

What a strange proposition is advanced by the defendants. This property, if it belonged to private persons, could not be taken for even so public a use without just compensation. But inasmuch as it belongs to a State, and is public every way in its character—it may be taken. Compensation has nothing to do with it.

That such land as this could not, in the judgment of the fathers, be taken even for the public use of improving navigation without the consent of the sovereignty that owned it, and its cession for that purpose, is evident from the action of Congress, at the date of the Constitution, and ever since.

The first Congress was held March 4, 1789, and ended September 29, in that year.

August 7, 1789, an Act was passed for the establishment and support of light houses, beacons, buoys and public piers. It provided that all expenses which should thereafter accrue in the necessary support, maintenance and repairs of all such structures already then erected, placed or sunk at the entrance of or within any bay, inlet, harbor or port for rendering the navigation thereof easy or safe, should be defrayed out of the United

States Treasury, provided that this expense should not continue over a year, unless the edifices should in the mean time be ceded to and vested in the United States by the States in which they may be, with the lands thereto belonging and the jurisdiction of the same. The second section provided for a light house near the entrance of Chesapeake Bay, at such place, when ceded to the United States, as the President should direct.

1 Story, Laws, p. 32.

The States were slow in making these cessions. The time was year by year extended.

See 1 Story, Laws, pp. 107, 232, 316, 364, 391, 393; 3 *Id.* 1797, 1999, and the Acts establishing light houses, *passim*.

Not once, we venture to say, did the United States ever think of occupying the soil of a State, without obtaining cession by the State—never once under proceedings of condemnation.

The action of the United States jointly with the State of New Jersey in relation to the acquisition by the one of lands within the other, is directly in consonance with the views herein expressed. The general government never took any lands, even of private citizens. It always bought them. The State by statute agreed to the purchase and also ceded jurisdiction. If the lands were under tidal waters, they were granted by the State, either by special Act or by the Governor under an Act giving him such general power. If private owners would not sell their lands, the State appointed commissioners, exercised its power of eminent domain, condemned the property and vested the title in the general government.

In 1790 an Act was passed ceding to the United States jurisdiction over a lot of land at Sandy Hook. Sess. L. p. 669. In 1804 consent was given to the purchase by the United States of a lot at Sandy Hook, to erect a beacon, etc. Sess. L. p. 352. In 1846 a second Act was passed, vesting jurisdiction, etc., over Sandy Hook by designated boundaries. Sess. L. p. 124. In 1822 jurisdiction was ceded over land at Cape May for a light house. Sess. L. p. 37. In 1826 a like Act was passed as to land in Monmouth. Sess. L. p. 42. In 1848 another was passed as to Tucker's or Short Beach. Sess. L. p. 42. In 1871 an Act gave consent to the erection of defenses at Finn's Point. Pamph. L. p. 110. In 1853 an Act ceded jurisdiction over so much land as might be necessary for the construction and maintenance of light houses and keepers' dwellings within the State, at several places mentioned, among them for two beacons or range lights for the main Gedney's Channel—noticeable as in waters near the *locus in quo* now in dispute. Pamph. L. p. 384. In 1873 a general Act was passed, giving the consent of New Jersey to the purchase by the Government of the United States, or under its authority, from any individual or body corporate within the boundaries of the State, "For the purpose of erecting thereon light houses and all other needful buildings, to be used for light house purposes and life saving stations only." And the Act says: "The consent herein and hereby given being in accordance with the seventeenth clause of the eighth section of the first article of the Constitution of the United States, and

with the Acts of Congress in such cases made and provided."

This Act was deficient in making no cession of jurisdiction. It only consented to a purchase. Therefore, apparently, an Act in 1875 (Pamph. L. p. 28), providing that whenever the United States desires to acquire title to land belonging to this State and covered by tidal waters, for the site of a light house beacon or other aid to navigation, and application is made by a duly authorized agent of the United States describing the site required for one of the purposes aforesaid, then the Governor is authorized to procure a survey by the riparian commissioners, etc., and he shall convey the title of said lands to the United States upon such terms and conditions as may be agreed upon, and shall cede to the United States jurisdiction over the same. Pamph. L. p. 28.

These acts of permission, grant and cession, do they not show, convincingly, a practice beginning with the Constitution and continuing, unbrokenly, down, utterly inconsistent with the contention now made, that all the general government has to do when it wishes to occupy tide covered lands, is to take possession and construct such buildings as it desires? Is not such practice explanatory of the Constitution?

If this contention be law, why has the government sought, and the State given, these permissions to purchase, and these grants of its own property?

And the reason, what is it? Just this: no sovereignty can peaceably, and without at least legal violence, acquire the land of another sovereignty without its grant. Taking the property of a sovereign State without her permission, even when States are united by such a Constitution as ours, is making war upon it, whether or not the Act be so intended.

An Act of 1844 (Pamph. L. 106) is noticeable, if not useful, as exhibiting the method whereby the power of eminent domain is invoked on behalf of the State. It is entitled "An Act to Authorize the United States to Build a Dock on the Shore of the Navisink River and to Construct a Road therefrom to the Light Houses on the Highlands." Its first section authorizes such a road. Its second provides, in case of disagreement between owners of land and the government, that the agents of the latter or the former may apply to a judge of the supreme court, who shall appoint commissioners to appraise. Their report shall be final.

It is not intended to be argued that this course was necessary, nor to deny that the United States itself possessed the power of eminent domain. This has been settled as to the property of private persons, although for eighty years but one case of condemnation seems to have occurred. It was pertinently argued by *Mr. Justice Strong* in *Kohl v. United States*, 91 U. S. 867 (Bk. 28, L. ed. 449), that when the Amendment to the Constitution said that private property should not be taken for public use without just compensation, it implied that it might be taken with just compensation. And the same argument proves that only private property may be taken at all, and certainly that if public property, the property of another sovereignty, be taken, it must not

be forcibly nor without such just compensation.

We insist that our position is incontrovertible. One sovereignty cannot, by force of law, take the property of another. There must be cession. That remains true of the States, under the Constitution. It is so because "The powers not delegated to the United States by the Constitution, * * * are reserved to the States respectively." And no power was given to take. It is so because the instrument expresses that the general government must trust to the obtaining consent of the Legislatures of the States to all occupation and purchase even of private property sought for use for "needful buildings." It is so because the provision as to taking property refers only to private property—that of private persons—not that of sister, say, rather, parental sovereignties—least of all, to such property already devoted to a public use, yet susceptible of conversion to profit in its nature similar to that of a private person. The view is corroborated by the laws of the first and early Congresses, by which the practice under the Constitution was established not to "take even private property, but to buy it—to buy with the consent of the States, and to make action in behalf of navigation the price of cession both of title and jurisdiction." And the corroboration is increased by the practice, especially in New Jersey, presumably sought, at least accepted, by the Government of the United States, whereby tide covered lands were always, when wanted, the subject of grant by statute, and then only upon condition of use only for light houses, beacons and the like, with provisions to revert when the specified uses ceased.

The construction of the clause "by the consent of the Legislature of the State" may be aided by the history of its introduction. See *Madison Papers*, pp. 510-511. The provision for exclusive legislation, etc., over all places purchased for forts, etc., being under consideration. "Mr. Gerry contended that the power might be made use of to enslave any particular State by buying up its territory, and that the strongholds proposed would be a means of awing the State into an undue obedience to the general government. Mr. King himself thought the provision unnecessary, the power being already involved; but would move to insert, after the word 'purchased,' the words 'by the consent of the Legislature of the State.' This would certainly make the power safe. Mr. Gouverneur Morris seconded the motion, which was agreed to *nem. con.*, as was then the residue of the clause as amended."

See also, *The Federalist*, No. 48 (Dawson's ed.), vol. 1, p. 299, where Madison says: "All objections and scruples are here also obviated by requiring the concurrence of the States concerned, in every such establishment."

Here the argument would stop but for the insistence of the projectors of this proposed bridge.

They say that the power to regulate commerce with foreign Nations, and among the several States, implies the power to build bridges as a means of commerce, and that therefore the adoption of the Constitution invested the general government with the right to take the land

of New Jersey under her tidal waters to carry out this project.

Their conclusion does not follow. We have seen that if land is needed for the erection of forts, magazines, arsenals, dockyards and other needful buildings, it must be purchased (whether or not that word includes acquired by condemnation), but purchased by the consent of the Legislature of the State in which the same shall be; that this is true of simple private property, but that it is not true, even, of property belonging to a sovereignty, which is not within the right of purchase mentioned. We say, therefore, that the right to bridge, if it is possessed by Congress, is subject to the right of the State, since bridging here is taking the land of the State; taking it, first, so far as necessary, for piers and supports; taking it, secondly, by occupying it to the width of the bridge from high water mark to the line of boundary at the middle of the kill or sound.

But we follow our adversaries in the argument, and insist that the power to regulate commerce does not confer upon the United States Government the power to build or authorize the building of bridges.

The power conferred is preventive and corrective, not creative or constructive. Bridges over navigable waters require authority from two sources: first, the right to build at all, which must be given by the State; second, the right to build as proposed in place, direction to the current and mode of structure, especially as to its draw. This last must come from Congress. The defendants stand upon no right coming from the State. They have no authority to build anything. The authority they have obtained is therefore valueless. It does not come from a source which can give the right of construction itself.

To estimate the claim let us state it and some circumstances which attend it. It is made for the first time, now, after nearly a century since the formation of the Constitution, and if it be true, then the United States Government has power almost illimitable. The power to regulate commerce has been expounded to place all navigable waters in the custody of the government, whether they be boundaries or whether they have no flow except within the borders of the States themselves, if they can be reached by commerce from other States. Therefore, if this claim be lawful, all the great tidal rivers of the Eastern States, and through other construction, all the great navigable pathways of the continent, can be bridged, anywhere, at the will of Congress.

Nor is this all. The claim is that the power to regulate commerce is not simply to protect it, preserve it from injury, and leave it to advance according to the energy of the people, seeing to it that natural highways are kept clear, and that passage across is not unduly obstructed, but that Congress has the right (and if so, the duty) to inaugurate and put into execution all means of travel. Turnpike roads, railroads, canals, come within the asserted authority.

The argument against the asserted power is *reductio ad absurdum*. But even a stronger one naturally occurs. What becomes of state sovereignty, of the wonderful invention, if, indeed, it was an invention of the fathers, should

such a power be carried out? If Congress can do all this, Congress can do it, as in this case, by agents. Congress then becomes the great corporation factory, and either thus, indirectly, or if it please directly, the creative source of methods or means of commercial intercourse. The character of our composite government, if this doctrine be admitted, will undergo either change.

It is useless to multiply words on either side of this most important question. The meaning of the clause giving commercial power to Congress has been so often discussed and decided that it would seem impossible that it should be questionable. There is this fact worthy of remark: that all the great judges who took liberal and national views upon the meaning of the clause—Marshall, and with him Washington, Story, Thompson, Todd, Duvall, who concurred in the great opinion delivered in *Gibbons v. Ogden*, 9 Wheat. 203, (22 U. S. bk. 6, L. ed. 71), (McLean dissenting), in the *Wheeling Bridge Case*, expressing what was implied or expressed by all the judges who united in originally declaring the bridge a nuisance—and every Judge of the Supreme Court of the United States who has expressed opinions according, in the main question, with the rulings in *Gibbons v. Ogden*, either say directly that the power to build a bridge belongs only to the State, or, refraining from direct utterance upon that point, set forth views as to the power of Congress which advance no farther than that it has the right to say whether or not a bridge built directly or indirectly by a State shall or shall not stand; or, if it stand, whether it shall be altered so as to allow of free navigation.

There are two opinions worthy of veneration, which have not been emphasized, if they have been mentioned in my associate's brief. One is that of *Chief Justice Marshall*, rightly termed by high authority, the father of our constitutional law, delivered in *Gibbons v. Ogden*. The other, that of *Chief Justice Savage*, of New York, given just fifty years ago, in the case of *The People v. The Saratoga & Rensselaer R. R. Co.*, respecting a proposed bridge at Troy. It was argued for the people by Samuel Stevens, for the railroad company by Benj. F. Butler, then Attorney-General of the United States. 15 Wend. 114. I mention this not only to show that it was a case gravely considered, but also because of the opinions which the Attorney-General then expressed on the question mooted here, and as evidence of views then generally held by all good lawyers. He says (p. 128): "The object of the Act in question was to facilitate intercommunication. * * * It is an internal improvement for a local purpose, to which the power of the general government does not extend and which exclusively belongs to the state government. The general government cannot authorize the erection of such a bridge, nor can it prohibit its erection. The right of a State to establish ferries has never been questioned, and bridges are but substitutes for ferries. The law provides that the bridge in question shall not interfere with navigation by requiring that the river shall be restored to its former usefulness, and the defendants have averred that they have constructed their works so as to leave, over the main or principal part of the channel, an open-

ing for a convenient and suitable draw to enable vessels navigating the river to pass and repass."

The court (*Savage, C. J., Samuel Nelson and Greene C. Bronson, JJ.*), by the Chief Justice, said (page 191): "The information charges that the Hudson River, from the ocean to the City of Troy, and above it to the Villages of Lansingburg and Waterford, is an arm of the sea in which the tide ebbs and flows, and for forty years has been used in carrying on commerce in pursuance of the laws of the United States."

The place, therefore, where the bridge is to be built, is one which coasting vessels have a right to pass, and where any obstruction entirely preventing or essentially impeding the navigation would be unlawful. It is, however, a proposition not disputed that but for the power granted by the Constitution to Congress, the State Legislatures would have as full and entire control over the waters of their several States as they have over the land. It follows, therefore, without the declaratory amendment to that effect, that the States reserve all power not granted to Congress. The entire sovereignty over the waters of the States, then, vests in Congress and the several State Legislatures. If this entire sovereignty rested in one government, it could not be doubted that such government might authorize the erection of a bridge across navigable waters, if the business and intercourse of society required such an accommodation. The only objection to the exercise of such a power might be that the injury to navigation might exceed the benefits to be derived to society otherwise than from such an accommodation, and on that point the sovereign power must be judge. It is for the Legislature, and the Legislature alone, to judge of the expediency of exercising any of its acknowledged powers in any given case.

I think I may safely say that a power exists somewhere to erect bridges over waters which are navigable, if the wants of society require them, provided such bridges do not essentially injure the navigation of the waters which they cross. Such power certainly did exist in the State Legislatures before the delegation of power to the Federal Government by the Federal Constitution. It is not pretended that such a power has been delegated to the general government, or is conveyed under the power to regulate commerce and navigation; it remains, then, in the State Legislatures, or it exists nowhere. It does exist, because it has not been surrendered any farther than such surrender may be qualifiedly implied,—that is, the power to erect bridges over navigable streams, must be considered so far surrendered as may be necessary for a free navigation upon those streams. By a free navigation must not be understood a navigation free from such partial obstacles and impediments as the best interests of society may render necessary. For example, a vessel arrives at the Port of New York from a foreign port; Congress has the exclusive power to regulate commerce and navigation with foreign Nations; the vessel arrived has sailed under the authority of the laws of Congress, but she is met at the quarantine

ground, not by a bridge with a draw which she may pass in half an hour, but by a mandate from the state authorities stating in substance that the conveniences or necessities of the people of the port which the ship is approaching, require that she shall remain at quarantine one, ten or twenty days, according to circumstances. Is such a detention unconstitutional?

It has never been pretended. The contrary has been expressly adjudged, as far as that point could be adjudicated, in the case of *Gibbons v. Ogden*. Chief Justice Marshall says (9 Wheat. 208); (23 U. S. bk. 6, L. ed. 71): "Inspection laws, quarantine laws, health laws of every description, as well as laws for regulating the internal commerce of a State, and those which respect turnpike roads, ferries, etc., are component parts of this mass."

He had just spoken of "that immense mass of legislation which embraces everything within the territory of a State not surrendered to the general government, all which can be most advantageously exercised by the States themselves." It is here conceded that inspection laws, quarantine laws, laws regulating internal commerce, laws which respect turnpike roads and ferries, are constitutional, and are, of course, no infringement of the powers granted to the general government. The Chief Justice adds an "etc.," after the word "ferries," implying that there were other subjects of a similar nature in his mind that it was unnecessary to specify; and what is more analogous to a ferry than a bridge, for which a ferry is but a substitute? I have already stated that the general government and the state government, between them, possess the sovereign power, and the sovereign power may doubtless build bridges where necessary. It has been correctly said that the Federal Constitution is a grant of power, while the State Constitutions are limitations of power. There is in our State Constitution no limitation of the power to build bridges, and there is in the Federal Constitution no grant of such a power. There can be no question, therefore, that the State Legislature has the power to build bridges, when they shall be necessary for the convenience of its citizens. The right must be so exercised, however, as not to interfere with the right to regulate and control the navigation of navigable streams. Both governments have rights which they may exercise over and upon navigable waters; and it is the duty of both so to exercise their several portions of the sovereign power that the greatest good may result to the citizens at large. It is the right and the duty of the general government to adopt such measures that the commerce and navigation of the country shall not be improperly obstructed, and it is the duty of the State Governments to afford their citizens all the facilities of intercourse which are consistent with the interest of the community, and which shall not obstruct the powers granted to the general government.

The language of Chief Justice Marshall being here quoted, it need not be repeated.

Chief Justice Savage says: "It is not pretended that such a power (to erect bridges) has been delegated to the general government, or is conveyed under the power to regulate com-

merce and navigation." Now, fifty years farther away from the founders of the Constitution, this is pretended.

Let us consider the authoritative construction of the language said to convey this power, and see with what reason the pretense is made:

"To regulate commerce with foreign Nations and among the several States."

"Commerce," says *Chief Justice Marshall* "is intercourse," and includes intercourse by navigation. 9 Wheat. 189 (22 U. S. bk. 6, L. ed. 68), *et seq.* "A power to regulate navigation is as expressly granted as if that term had been added to the word 'commerce.'" P. 198.

What is this power? P. 196. It is the power to regulate; that is, to prescribe the rule by which commerce is to be governed.

The *gravamen* in *Gibbons v. Ogden* was that the State of New York had by law interdicted steam vessels, having a United States license, from navigating its waters. The court held this to be regulation of commercial intercourse by the State, opposed to the law of Congress which by licensing coasters declared navigation free, and so held the law of New York void.

So, when the States of Ohio and Virginia authorized a bridge over the waters of the river which was their boundary, constructed in such a way that some vessels already used in its navigation could not pass, the supreme court held this law a regulation of commercial intercourse by the States, opposed to the freedom of navigation insured by Congress, and held that law and the bridge itself unlawful. But when Congress enacted that the bridge, as constructed or agreed to be constructed, was not an obstruction to navigation the bridge was suffered to stand.

This was the *Wheeling Bridge Case*. Later, the Schuylkill, a river entirely within Pennsylvania, was bridged at Philadelphia, without a draw. The supreme court held such a bridge, one over such a river rather, not unlawful till Congress said it was, holding that something beside a license to a coaster was necessary to show the will of Congress that the regulation by state law embodied in the bridge was an interference with the power of Congress in an inland river.

This was the case of *Gilman v. Philadelphia*, in which *Mr. Justice Swayne* gave the opinion quoted in my associate's brief, declaring that the power to build a bridge was solely with the State, the power to pull them down, alter them, or declare in what manner they shall be constructed, remaining with Congress.

It is the misconception of the action taken by Congress with respect to the *Wheeling Bridge*, and the obedience to it by the supreme court, which was only negative action—action simply forbidding the pulling down of a bridge already erected, out of which possibly has grown this new idea that the right of building a bridge is vested in Congress by the power to regulate commerce.

These cases are all consistent with *Chief Justice Marshall's* definition of the word "regulate." They are illustrations of "prescribing the rules by which commerce is governed." One rule was and is that navigation shall be free. Therefore the law of New York exclud-

ing certain steam vessels from her waters was declared inoperative and void. The same rule, enforced, made the *Wheeling Bridge* unlawful. But when Congress said it did not obstruct navigation, then the higher power, the power to give the rule, let it stand.

But how does this power "to prescribe the rule by which commerce (commercial intercourse) is to be governed" give power to Congress to create a new physical highway for commerce, or to authorize it, or to create and convey the franchise for its construction and its maintenance? How can such a right be tortured out of the power to "regulate commerce."

How do these words authorize Congress to foster one class of commerce at the expense of another; to say there shall not be so much navigation, but there shall be more railroad travel, and especially to seek this object, not only by framing and enforcing rules, but by constructing material appliances, in order to the bringing it about?

It would increase commercial intercourse with foreign Nations were Congress to build an improved line of swift and safe merchant steamships, or to authorize their being constructed. Yet, will anyone pretend that Congress, at least under the power to regulate commerce, can do this?

And yet, what are ships but floating bridges?

That such an attempt as this has never been made throughout the century during which the Constitution has well nigh lasted, is the strongest of arguments why it cannot be within congressional power. The scheme of building this particular bridge has been agitated for many years. New York has exhausted every effort to induce New Jersey to consent to this act of self destruction for certainly a quarter of a century past.

Congress does a new thing when it creates a bridge building, or any other manufacturing, corporation.

It does a still stranger thing when it confers the right of such manufacture in New Jersey upon a corporation of New York; and especially when the law of New Jersey says that it shall not do it.

But it is contended that the question of right involved in this case is *res judicata*—that the supreme court, in the case of *South Carolina* against *Georgia* has really decided it.

That was an effort on the part of South Carolina to enforce an agreement between herself, before the Constitution, and Georgia, whereby the free navigation of the Savannah River by the citizens of both States was stipulated. The prayer of the bill was to restrain the obstructing or interrupting the navigation of the river. The argument of counsel shows that "The property rights of South Carolina were not involved, and there was no pretense of any apprehended damage to them by reason of a pretended obstruction. The only ground of complaint was that the interests of her citizens might be thereby injuriously affected" (98 U. S. 8, bk. 23, L. ed. 783), unless there was, additionally, the giving preference to the ports of Georgia over those of South Carolina.

The alleged obstruction or wrong was the action of United States officers in improving the navigation of the river. This was effected

by obstructing one of two water ways so as to compel all the water to seek the other. But all had the use of the greater depth thus produced.

Says the court: "This is, in no just or legal sense, destroying or impeding the navigation." P. 11. And the court was undoubtedly right. The suit was most unfounded. It did not appear that the land of South Carolina was invaded. Her contract, upon which her claim rested, was evidently abrogated by the adoption of the constitution. By that instrument she invited the Union to increase the facilities of navigation in this her boundary river. She alleged no damage to herself, only possible inconvenience or injury to some of her citizens. And what was done was improving, not obstructing, navigation; bettering what was, not supplying a new highway; facilitating interstate commerce as it existed from the beginning, not endeavoring to inaugurate a new and different highway.

All the doctrine upon this subject originated with Marshall in that great authoritative constitutional dissertation, the opinion in *Gibbons v. Ogden*.

His words are: "Commerce includes navigation. The power to regulate commerce comprehends the control for that purpose (that is, for navigation), and to the extent necessary of all the navigable waters of the United States which are accessible from a State other than those in which they lie."

Control for purposes of navigation—regulation of its use for that purpose, including in the word "use," improvement of these waters as means of navigation, are vested in the United States under its power to regulate commerce; hence, the doctrine of the *Savannah* case is not disputed. The United States can improve these means of navigation for that purpose, for that is but control of them for the very purpose for which the United States was given control of them.

But the United States cannot divert these waters to another purpose, or use them, or that land under them which is necessary to them, for another purpose, namely: to build bridges, or make filled ground for wharves or the like. If it can, why has it not the right thus to use our entire water front?

Control and ownership for all purposes other than for purposes of navigation, of which the waters were then an instrument by nature and use, was retained by the State; and the United States cannot seize this property and ownership and convert the property adversely into an instrument of commerce of another kind, any more than the State can convert a canal into a railroad without compensation to the original owner of the soil.

The force and effect of the Act of Congress under which the defendants assume to act, the intention of the lawmakers, is a part of this case of the highest importance. The defendants, confessedly, have no standing or right except what that statute may be held to give them.

If the bridge were in course of construction when the Act was passed, under authority given on the one part by the State of New York, and, on the other, by the State of New Jersey, then the Act would seem to be entirely within the power and the usage of Congress.

INTER S.

Shall the Act, then, have the construction of a grant of the franchise to build, or merely that of permitting a franchise already bestowed by lawful authority to be exercised?

Is it a grant or a license?

As a grant, it is subject to exceptions already taken and argued, and to others still to be stated.

As a license necessary to the exercise of a grant, just as if New Jersey had authorized it with the consent of New York anterior to the Constitution, the words used are exactly appropriate.

It is to be observed that nothing in the Act exhibits any knowledge on the part of Congress as to whether this franchise had been granted, or even that the bridge was not actually begun. Indeed, the last clause in the Act (excepting the section reserving power to amend or repeal) would seem to imply that Congress thought the power obtained and the bridge in course of construction. It says: "If said bridge shall not be finished within two years from the passage of this Act, the rights and privileges hereby granted shall determine and cease."

What, then, according to legal rules, is the meaning and intent of the Act in question?

Says *Morawetz on Corporations*, § 323, after stating that provisions indicating in detail some of the kinds of transactions in which companies may engage: "The rule of, construction stated has no application to a grant of special privileges in derogation of common right, or of an exemption from the operation of general laws governing other persons. It should always be presumed that the Legislature does not intend to confer franchises of this character, unless a contrary intention be expressed in unambiguous terms." The author proceeds: "The distinction here pointed out is not an arbitrary one, but is founded on evident reasons. Accordingly, it has been held that a law or charter granting a right to exercise the power of eminent domain or to create a nuisance, or to hold a lottery, or to do any other act not lawful to the members of the community generally, should be strictly construed. Every presumption will be made against the existence * * * of a right to a monopoly or special privilege, to the exclusion of others or at the public expense."

These are familiar rules, expressed or implied, in all decided cases.

What, then, do we find in this Act? The same language, or language substantially the same, with that employed when the object and intent of the Legislature was simply to give license for the exercise of an otherwise derived franchise, to withhold objection which they might make to structures under state authority. There are no words of grant; none of incorporation for a purpose; none inconsistent with the ordinary action pursued in obtaining the right to erect bridges over navigable streams, viz.: to get the right to build from the State, and the permission to exert the right from Congress. We confidently ask who, looking at this statute alone, without knowledge of any circumstances precedent or subsequent, can say that Congress meant to do any more than it was accustomed to do? Who can say that it meant to do a thing entirely new; that is to say, to assume and execute a power always hitherto de-

nied it, of bridging a State's waters against its will?

This Act is valueless unless it achieves the novelty of increasing the franchises of a state corporation, unless it achieves the greater novelty of enabling this Corporation to exercise franchises within the State of New Jersey against its consent and in disobedience to its law, unless it achieves the equally great novelty of enabling this foreign Corporation to settle itself without even making compensation upon New Jersey soil, and the novelty, finally, of building and running a railroad within the State of New Jersey. If an individual within that State should attempt to exert such a franchise, he would be forced by its law to quit. Can it be possible that Congress intended such authorization? Can it be possible that this court will so hold, when, as shown, it may hold otherwise, in perfect consonance with a century of judicial action?

See what implications the construction of this Act insisted upon, calls for:

1. A grant of New Jersey's lands to a New York Corporation.

2. A repeal of New Jersey's Law as to the use of riparian property.

3. A repeal of the Statute of New Jersey authorizing the formation of railroad corporations so far as it imposes conditions upon the use of lands of the State.

4. A repeal or immunity from disobedience to the Acts of 1878 and 1886 inhibiting any such bridge.

5. The exercise of the power of eminent domain, without compensation, and when there exists no way through any legislative provision of carrying out that right.

Summing up the argument as to construction, there is, in this case, an allegation of the greatest advance in congressional assumption, made since the formation of the government, alleged to be made by the exact language in which heretofore the necessary provision by Congress for the protection of navigation from injury by a bridge has been made. And this court is invited to give this novel, if not arrogant, construction to a law susceptible of one altogether beyond objection.

It would scarcely be respectful for me to fail to allude to the case of *Decker v. The Baltimore & New York Railroad Co.*, decided April 27, 1887, the opinion wherein is found reported in the *New Jersey Law Journal* for July (*post*, —) as if on purpose to be ready for the argument now in hand. That suit is a remarkable one. It has seemed to us something of a fishing suit, where, really there was but one party and that party the corporation defendant here, the Baltimore & New York Railroad Co., which here declares that it has nothing to do with building the bridge, while in that case, by its demurrer, it confessed that it intended to erect it. Jurisdiction in the New York Circuit was obtained by suing the Baltimore & New York R. R. Co., a corporation created under the general Railroad Law of New Jersey, but up to this day not organized. Who the plaintiff in it was; how he came to be plaintiff; whether the enterprising party that has originated this bridge scheme, and thus all this litigation and contention, or some one in that interest, did not employ coun-

sel on both sides; whether the bill of complaint, before it was filed, did not have revision, at least, from the parties defendant or their counsel—are interesting questions, the answer to which may or may not be pertinent.

As I read the case, the decision is with us; much of the reasoning of the learned judge directly so; some of it that is against us (I say it with much respect) apparently not carefully considered; and the main point of the controversy here is passed over with disrespect to the State of New Jersey far more common than it is praiseworthy.

The learned judge well states the question. He rightly decides that the clause in the Constitution authorizing the establishment of post roads has nothing to do with the contest. He rightly says that the Act of Congress now under discussion is the first attempt on the part of Congress to grant such a right as is asserted by the defendants. And all he says as to the power of Congress to erect bridges or vest in others the franchise of doing so, all his citations from learned jurists, without exception negating it, can safely be adopted into our argument. Until, in his review, he strikes the case of *South Carolina v. Georgia*, the opinion, except upon the construction of the Act, is wholly with us.

When remarking upon that case, he fails to say that if the words of *Mr. Justice Strong*, which he quotes, are to be regarded as to the contrary of the other opinions which he cites—they are also as open as the others to the criticism of being *obiter dicta*, or unnecessary to the decision. He fails to notice that, so far as appears by the report, the property rights of South Carolina were not involved, that she made no complaint of injury to herself, and only of possible damage to some of her citizens. He leaps, we submit, very far, in saying that Congress can close a river, and further still when he adds that "If Congress can close a river, it can certainly bridge one." He fails to notice the generic difference between the proposition (if true) that Congress can use the bed of a stream in order to preserve its navigation, and the other that Congress can use it in order to construct a new instrumentality of commerce, either to take the place of such navigation or to obstruct it.

And when the learned judge avers that "Both the language and the history of the Act preclude the doubt whether it can be construed as intended to grant a privilege which is to become operative when concurrent authority to build the bridge is obtained from the States of New Jersey and New York," we submit that his attention could not have been called to the considerations suggested in the argument before the court at this time upon the right judicial construction of that Act.

The party really interested, the State of New Jersey, had no knowledge of that suit, no part or lot in the hearing; nor ought it to be set up against her. If, as we suppose, a *deus ex machina* may have to do with the suit, its institution ought rather to bear against the parties defendant here.

There is one remark of the learned judge in that opinion to which I must be permitted, though at some risk of departure from the path of simply legal discussion, to make respectfu-

reply. Noticing himself that New Jersey had protested against this Act, that she had passed two statutes embodying that protest in absolute inhibition of the erection of any bridge over the kill, he nevertheless says that "The argument that the rights of the State of New Jersey are ignored or invaded by permitting such a bridge to be built without her consent is purely a sentimental one."

The course of New Jersey in this matter is anything but sentimental. It is the assertion of her rights for the benefit of her citizens, and of herself as a community for her material, pecuniary benefit. Good policy has demanded, and does demand that the boundary navigable waters between her and her neighboring States should not be bridged. She would be untrue to the interests of her citizens if she did not do all she could to maintain her geographical situation as nature, original grants, and subsequent treaties have made it.

But the material, pecuniary interest of New Jersey in this litigation is of small comparative consequence. Its great importance lies in the danger to our national system, involved in this denial to her, and the assumption by Congress, of such power as is claimed to reside in this Act. Ours is a government of distributive sovereignty. Sovereignty in the States is as necessary to the greatness of the American Union as sovereignty in the national government. Supremacy in the Federal Government is necessary to our being a Nation. Sovereignty in the States is necessary to our continuance, to our remaining forever the free Nation we are. Our civil war did not destroy state rights. If it had, it would have destroyed, not saved, the Constitution. But out of the contest has unhappily sprung the great danger of this day, that, namely: of centralization. Men have forgotten that ours is a government of distributive sovereignty. And yet it seems to me plain that if this Nation is to be saved from the fate of Rome; if its greatness is not to be the occasion of its fall, it will be through the existence of the States as sovereignties. This was one great reason why the fathers were so jealous of state rights; and experience has thoroughly shown their wisdom. And our wonderful success in internal improvements, the magnificence of each State as a separate community, is the direct consequence of state sovereignty and of the doctrine that to each State belongs the exclusive right of benefiting her citizens by local, otherwise called police, regulation.

It was New Jersey who led in the formation of the Constitution. It was a citizen of New Jersey whose assertion of his rights under the Constitution produced those definitions of the rights of the general and the state governments which have ever since made navigation free. It is New Jersey now, who, on this occasion when it is claimed that Congress has overruled and has the right to overrule her views of her rights and of her policy, stands forth in assertion of her sovereignty, and says that if the navigation of her waters is not to remain free, if her long determined and pursued policy is to be obstructed and changed, and her property is to be used for her injury, her assent should first be given.

INTER 8.

Mr. Barker Gummere also appeared for the informant.

Messrs. A. Q. Keasbey, William W. MacFarland, and John K. Cowen, for defendants:

Before examining the specific grounds for the interference of the state court set up in the information, it is proposed to state certain general propositions which we suppose to be established firmly by the judicial decisions on the subject of the power of Congress over navigable waters of the United States, whether flowing wholly within the State and accessible from other States, or forming the boundaries between the States.

It will be convenient in the first place to give a list of the most important cases in which the subject in some of its aspects has been considered in the United States Courts.

In the Supreme Court of the United States:

Gibbons v. Ogden, 9 Wheat. 1, and *Brown v. Md.* 12 Wheat. 419 (22 and 25 U. S. bk. 6, L. ed. 23, 678); *Wilson v. Blackbird Creek Marsh Co.* 2 Pet. 245 (27 U. S. bk. 7, L. ed. 412); *U. S. v. Coombs*, 12 Pet. 72 (37 U. S. bk. 9, L. ed. 1004); *Pollard v. Hagan*, 3 How. 280 (44 U. S. bk. 11, L. ed. 574); *License Cases*, 5 How. 504, and *Passenger Cases*, 7 How. 282 (46 and 48 U. S. bk. 12, L. ed. 256, 702); *Cooley v. Board of Wardens*, 12 How. 299 (53 U. S. bk. 18, L. ed. 996); *Pa. v. Wheeling etc. Bridge Co.* 18 How. 421 (59 U. S. bk. 14, L. ed. 435); *Gilman v. Phila.* 3 Wall. 718 (70 U. S. bk. 18, L. ed. 96); *Paul v. Va.* 8 Wall. 168, and *Clinton Bridge Case*, 10 Wall. 454 (75 and 77 U. S. bk. 19, L. ed. 867, 969); *Ward v. Md.* 12 Wall. 418 (79 U. S. bk. 20, L. ed. 449); *State Tax on Railway Receipts*, 15 Wall. 284, and *Chicago etc. R. Co. v. Fuller*, 17 Wall. 560 (82 and 84 U. S. bk. 21, L. ed. 164, 710); *The Mohler*, 21 Wall. 250, *Balt. etc. R. R. Co. v. Md.* 21 Wall. 450 and *The Lottowana*, 21 Wall. 558 (88 U. S. bk. 22, L. ed. 485, 678, 654); *Welton v. Mo. and Union Pac. R. R. Co. v. Hall*, 91 U. S. 282, 343 (Bk. 28, L. ed. 850, 428); *Henderson v. Wickham*, 92 U. S. 259 (Bk. 28, L. ed. 549); *South Carolina v. Ga. and Sherlock v. Alling*, 93 U. S. 4, 99 (Bk. 28, L. ed. 782, 819); *Hannibal etc. R. R. Co. v. Husen*, *Hall v. DeCuir*, and *Pound v. Truck*, 95 U. S. 465, 485, 459 (Bk. 24, L. ed. 527, 547, 525); *Wisconsin v. Duluth*, 96 U. S. 879, and *Cook v. Pa.* 97 U. S. 566 (Bk. 24, L. ed. 668, 1015); *Miss. etc. Boom Co. v. Patterson*, 98 U. S. 403, and *Guy v. Baltimore*, 100 U. S. 484 (Bk. 25, L. ed. 206, 748); *Tieman v. Rinker*, and *Mobile Co. v. Kimball*, 102 U. S. 128, 691, *Newport etc. Bridge Co. v. U. S.* and *Cincinnati etc. Packet Co. v. Callettsburg*, 105 U. S. 470, 559 (Bk. 26, L. ed. 103, 238, 1143, 1169); *Escanaba Co. v. Chicago*, and *Parkersburgh etc. Transportation Co. v. Parkersburgh*, 107 U. S. 678, 691; *Miller v. Mayor of N. Y.* 109 U. S. 385 (Bk. 27, L. ed. 442, 584, 971); *Moran v. New Orleans*, 112 U. S. 69, and *Cardwell v. American Bridge Co.* 118 U. S. 205 (Bk. 28, L. ed. 653, 959); *Gloucester Ferry Co. v. Pennsylvania*, 114 U. S. 190 (Bk. 29, L. ed. 158, ante, 882); *Brown v. Houston*, 114 U. S. 622, *Pacific R. R. Removal Cases*, *New Orleans Gas Co. v. Louisiana Light Co.* 115 U. S. 2, 650-652, *Stone v. Farmers Loan & Trust Co.* and *Walling v. Michigan*, 116 U. S. 807, 446; *Pickard v. Pullman Southern Car Co.* 117

U. S. 84 (Bk. 29, L. ed. 257, 319, 517, 686, 691, 785); *Morgan's R. R. etc. Co. v. Louisiana Bd. of Health*, 118 U. S. 455 (Bk. 80, L. ed. 237); *Wabash etc. R. Co. v. Ill.* 118 U. S. 557 (Bk. 80, L. ed. 244, ante, 33); *Huss v. Glover*, 119 U. S. 543 (Bk. 80, L. ed. 487); *Robbins v. Tasing Dist. of Shelby Co.* 120 U. S. 489 (Bk. 80, L. ed. 694, ante, 45); *Barron v. Burnside*, 121 U. S. 186 (Bk. 80, L. ed. 915, ante, 295); *Fargo v. Stephens*, 121 U. S. 230 (Bk. 80, L. ed. 888, ante, 51); *Ouachita etc. Packet Co. v. Aiken*, 121 U. S. 444 (Bk. 80, L. ed. 979, ante, 379); *Phila. etc. Mail S. S. Co. v. Pa. and Western Union Tel. Co. v. Pendleton*, 122 U. S. 326, 347 (Bk. 80, L. ed. —, ante, 808, 806).

Circuit Court Cases: *Clinton Bridge Case*, 1 Woolw. 150; *U. S. v. Duluth*, 1 Dill. 469; *Hatch v. Wallamet Iron Bridge Co.* (Deady, J.) 6 Fed. Rep. 326; *Wallamet Iron Bridge Co. v. Hatch*, 19 Fed. Rep. 847; *Silliman v. Hudson River Bridge Co.* (Nelson, J.) 4 Blatchf. 74; *S. C. 4 Blatchf.* 408 (Hall, J.); *Easton v. N. Y. & Long Branch R. R. Co.* (McKenna, J.) 9 Phila. 475; *U. S. v. Rum River etc. Boom Co.* 1 McCrary, 397; *Atty.-Gen. of New Jersey v. American Dredging Co.* (injunction from state court preventing United States work in the Delaware, stopping channel on New Jersey side; removed to U. S. Circuit Court; heard before McKenna and Nixon, JJ.; injunction dissolved, October 17, 1885.) *Decker v. Balto. & N. Y. R. R. Co. and Staten Island Rapid Transit Co.*, post.—

All of these cases, increasing in frequency with the expanding interstate commerce of the country, relate to some of the aspects of the question of the paramount and exclusive power of the Congress of the United States to regulate and control commerce and all its instrumentalities. The result of them is to establish the following general propositions:

1. That the United States has paramount control of all the navigable waters of the country for any purpose whatever which has relation to commerce, whether it is carried on by navigating the waters themselves, or by railroads or other instrumentalities which require the use of the bed or soil of such waters, for the support of bridges, or other structures.

2. That this control extends to authorizing bridges, railway viaducts, docks, wharfs, dams, jetties, light houses, buoys, or any other fixed structures pertaining to commerce, over or in such waters, as well as to prohibiting obstructions to navigation therein.

3. That it is entirely within the discretion of Congress to determine in each case what action with respect to any navigable stream the interests of commerce require, and how far such action shall be exclusive of state authority.

4. That whenever such action is taken, and is designed to be exclusive, it is wholly independent of state authority, legislative or judicial.

5. That while these propositions are true with respect to all the navigable waters of the United States, whether within or between States, they are especially true as to interstate streams, which in their very nature must be used as channels for commerce between the States, or as obstacles to be surmounted by it in order to render such commerce possible. As to them, at least, it is true, in the language of Judge Field, quoted by Mr Justice Bradley,

that the mere failure of Congress to act "is equivalent to a declaration that such commerce shall be free and untrammelled" or in Judge Bradley's own words: "Where Congress has failed to restrict such commerce, it must necessarily be free."

6. That it follows conclusively *a fortiori* that when the will of Congress is manifested by definite legislation, its expression must, in the words of Chief Justice Waite, "override all that the States can do," by legislative, judicial or executive action. To admit the contrary would be to abandon the national power to regulate commerce, by surrendering control over its most important instrumentalities.

If these propositions are definitely established, it follows that the exercise of the national power over this important interstate stream cannot be arrested by judicial authority on the grounds specified in the information, or on any grounds whatever.

But it is claimed that if all these propositions be granted and the supreme and exclusive power of Congress over commerce and all its instrumentalities be admitted, and if it be also granted that railroads and their bridges crossing interstate streams are such instrumentalities, and also that Congress in this Act to authorize a bridge over Staten Island Sound, did intend to exercise its paramount power, yet with all this, the specific grounds stated in this information are sufficient to arrest the power, and to stop this work at the line of New Jersey in the middle of the stream. And this the Court of Chancery of New Jersey held, without notice or argument, and granted an injunction stopping the contractors in their operations.

I. As to the first ground, that New Jersey owns the bed of this stream, and, that therefore it cannot be taken without compensation by the United States for this public purpose relating to commerce, without violating the Constitution, which requires that private property shall not be taken for public use without just compensation:

The answer to this is twofold: *first*, New Jersey is not the absolute owner of this property; and *second*, it is not private property.

New Jersey may have owned it absolutely in fee simple before she entered the Union; but even then she held it for her people *publici juris*. But on ratifying the National Constitution she surrendered this entire navigable stream, with its waters and all its bed to high water mark on either shore, to the United States, also to hold *publici juris* for the benefit of the whole people of the United States, including the people of New Jersey and of all States that shall ever exist in the Union, for all purposes of every nature connected with foreign or interstate commerce, or adapted to promote in any way the transportation of the subjects of commerce among the States or to foreign countries. From that time the United States was the owner of all of the navigable waters of the State of New Jersey for all the purposes of national commerce, and had the same power to dispose of them that the State itself had before the Constitution was adopted. This was distinctly settled in *South Carolina v. Ga.* 93 U. S. 4 (Bk. 28, L. ed. 782); *New Hampshire v. La.* 109 U. S. 76-90 (Bk. 27, L. ed. 656:

Pensacola Tel. Co. v. Western Union Tel. Co. 96 U. S. 1 (Bk. 24, L. ed. 708).

See also *McCready v. Virginia*, 94 U. S. 891 (Bk. 24, L. ed. 248); *American Dock Improvement Co. v. Trustees*, 12 Stew. Eq. 409; *Ormerod v. New York etc. R. Co.* 18 Fed. Rep. 370; *People v. Humphrey*, 28 Mich. 471 (1871).

It follows therefore that the State has no such property in the two pieces of land described in the information as requires compensation for its use as a United States post road crossing the stream on a bridge.

Again; it is not "private" property. The words of the Fifth Amendment of the Constitution are "nor shall private property be taken for public use without just compensation." This provision refers to private property alone—to the property of the individual as distinguished from property held by the Sovereign for the common benefit of the people. It was intended to guard the rights of the individual citizen against the encroachments of the sovereign power. It declared a common-law right acknowledged in every civilized country. Its familiar mode of assertion was that the King or the State could not take the land of A and give it to B without compensation, by an act of power. The provision had no relation to the property held by any organized governmental body for the public use of its citizens. This is shown by the language of the various state constitutions, most of which contain a like provision. Most speak of "private property." Some use what are deemed equivalent expressions.

In the Texas Constitution the words are "no person's property."

In that of Vermont, "no part of any person's property."

In New Hampshire, "no part of a man's property."

In Connecticut, "the property of no person."

In Delaware, "nor shall any man's property be taken without the consent of his representatives and without compensation."

In Indiana and Tennessee, "no man's particular services and no man's property."

In Massachusetts, "no part of the property of any individual."

All this shows that the design of the constitutional provision, wherever it appears, is to protect the man, the individual, the person, against the State or the sovereign power. It has no application to the case of lands in the bed of a stream whose bed and waters are under the control of the national power, though held in some bare and fruitless ownership by the State. These are not such private and individual property as the Fifth Amendment to the Constitution was designed to protect. The stream is a national highway of commerce which may be used to float ships upon, to carry, if necessary, a floating bridge so that it may be crossed, to build a floating dock where vessels to navigate other streams may be repaired, or to sustain a permanent bridge so constructed that the rights of navigation along the river and transportation across the river may be conducted in harmony and for the largest public benefit.

It is like the case of a city street, where the city holds the fee subject to its uses as a highway and in trust for all the people and not as

corporate or municipal property, such as court houses, jails, hospitals, etc. In this case the Legislature may grant the use of the street to a private company for a street railroad or gas pipes or telephones, without making compensation to any one.

Potter, Dwar. 377 note. See also *People v. Kerr*, 27 N. Y. 188; *Albany Northern R. R. Co. v. Brownell*, 24 N. Y. 345; *Transportation Co. v. Chicago*, 99 U. S. 635 (Bk. 25, L. ed. 336).

II. As to Riparian Acts.

It is not perceived how the riparian laws of New Jersey affect the question at all.

The object of those laws is simply to provide a board to dispose of, for the benefit of the school fund, the title of the State in the shores, declared to exist and to be capable of sale, by the court of errors, in *Stephens v. Paterson etc. R. R. Co.* 5 Vroom, 682.

Every grant made under these laws admits the paramount authority of the United States, and provides that the grantee shall claim no damages of the State in case the United States authorities shall change the lines established.

This assumes that the grant, which is only a license to fill in to a certain line, may be nullified by action of the United States pushing back that line.

It gives only a right in the sufferance of the general government.

As to the land under water the State has not assumed to give the riparian commissioners the power to grant it even in this restricted way to any but the land owner. It is stated in the information that the Arthur Kill is a part of Kill von Kull, and that the Riparian Act of 1869 provides that no one shall fill in or reclaim any lands under water in New York Bay, Hudson River, or Kill von Kull, without the consent of the riparian commissioners. This is not correct. The Act does so provide, but Arthur Kill is not part of Kill von Kull. The Act of 1864, in the first section creating the board, provides for the survey of the lands under the waters of the Bay of New York, the Hudson River, the Kill von Kull, Arthur Kill, the Raritan Bay and the Delaware. And the provisions of the Act of 1869 against filling in are directed only to the New York Bay, Hudson River and Kill von Kull—and not to Arthur Kill.

The answer in this case shows that the owner of the shore who has put the defendants in possession and authorized the use of his land for this bridge, has made his application for a grant of all the State has to give in these waters in front of it.

The price has been fixed as the law provides.

Grants at that price have been made to both adjoining owners. This owner is ready to pay the price. The Act of 1869, § 8, provides that upon due application and upon payment of the fixed price, "the commissioners shall, in the name of the State and under the great seal, grant the lands," etc.

The Act of 1871 says that any riparian owner elsewhere may apply to the commissioners who may make the lease, grant or conveyance with due regard to the interests of navigation, and upon such compensation as they shall determine, which lease, conveyance or grant shall be executed as directed in the former Act.

The application has not yet been granted, but it must be assumed that the board will do its duty within a reasonable time, and then the riparian owner of the land on which this bridge is to rest will own all that the State has to give him in the lands of Arthur Kill beneath the bridge, subject to the paramount rights of the United States.

How then can the State now claim to arrest this work authorized by the United States, and permitted by the riparian owner, by reason of anything arising out of the riparian laws?

III. As to the Consent of the State.

Not only has no such consent been given to the building of this bridge, but the State, by the Act of April 6, 1886, has declared in a preamble "that it reserves to itself the right to determine in each case whether the navigable boundary waters of this State shall be crossed or occupied by bridges, viaducts, or other fixed structure, and if so, when, where and in what manner;" and has forbidden any bridge, viaduct or fixed structure in any navigable waters separating New Jersey from other States, without express permission by statute. The only exception in this statute, is, that it shall not be construed to forbid the construction of docks or wharves. Both the preamble and the body of the Act assume that New Jersey has the power to declare when, where and how any fixed structure whatever shall be placed in the Delaware, New York Bay, the Hudson River or Arthur Kill. It includes lighthouses, buoys, jetties, and indeed everything which can come within the meaning of the term "fixed structures." This claim is asserted and this power assumed in the year 1886, after the long line of decisions on the subject of the power of Congress over navigable waters had been made.

The position assumed by New Jersey in this Act was well known to the Congress of the United States and fully considered.

In fact a concurrent resolution, passed by the House of Assembly January 27, 1886, and by the Senate February 8, 1886, was forwarded to the senators and representatives of New Jersey for presentation to Congress, and they were requested to use their utmost endeavors to defeat the bill to authorize this bridge. Those resolutions made the same claim as to the title of the State in these waters, and solemnly protested that any action of Congress to authorize the bridge would be unconstitutional and the usurpation of a power belonging to New Jersey. They asserted that the bridge could only be authorized by the States of New York and New Jersey. They alleged "that the attempt to legalize such a bridge in advance of its construction by enacting that it shall be a post road is an evident subterfuge and should be rejected as an attempt to establish a precedent under which all exclusive powers of the States may be set at naught."

And the fourth resolution declared "that in aid of this protest New Jersey invoked the sympathy of all her sister States in the maintenance of the doctrine of established and acknowledged state rights."

Notwithstanding these resolutions and the Act of the Legislature subsequently passed, Congress afterwards passed a law to authorize the construction of this bridge over Arthur Kill

and to establish it as a post road without requiring the consent of the State. It undoubtedly considered the doctrine that consent of the State is not needed to give power to the United States to build any fixed structure in and across any of the navigable waters of the country for the promotion of interstate commerce, was too fully established for further discussion or legislation.

More than twenty years before it had passed a law authorizing such a bridge, anything in the laws of either of the States between which the river ran to the contrary notwithstanding.

In *Wallamet Iron Bridge Co. v. Halsey*, 19 Fed. Rep. 347, Judge Dundy said, that the theory that Congress can only legislate concerning navigable waters so as to limit or affect the power of each State equally, so as to preserve its equal footing with the others, was founded on a total misapprehension of the relation of the national and state governments to the subject and to one another. He said:

"For the purposes of commerce and the exercise of the power of Congress over that subject, every navigable water in the Union which, of itself or by means of its connections, forms a continuous highway for interstate or foreign commerce, is primarily the navigable water of the United States, over which it has the same power for the purposes of such commerce as if it was wholly in a Territory or the District of Columbia."

See also *Miss. etc. Boom Co. v. Patterson*, 98 U. S. 408 (Bk. 25, L. ed. 206); *People v. Humphrey*, *supra*.

IV. As to Authorizing a Foreign Corporation to Build a Bridge.

This same Congress authorized thirty-three railroad corporations to build bridges. Many of these were corporations foreign to the States where the bridges were to be built.

Ever since the Telegraph Act of 1866, foreign companies of one State have extended their lines over the highways and post roads of other States under the authority of that Act.

In the *Pensacola Case*, *supra*, the corporation seeking to set aside the excluding Act of the State of Florida, was not a corporation of that State. In that case the court, admitting the general proposition that a corporation of one State exercises its business and franchises in another by comity, and that it is strictly in the power of a State to withdraw or refuse such comity, nevertheless clearly manifests its view that if the subject matter of the business or the franchise supposed to be carried on or enjoyed by a corporation of one State within the limits of another be national in its nature, and relate to the commercial dealings of the country as a whole, the power of the United States is sufficient to prevent the interference of the State, and the interruption of commerce, through motives of state pride, jealousy or self interest.

Chief Justice Waite said that the court was aware that in *Paul v. Virginia*, 8 Wall. 168 (75 U. S. bk. 19, L. ed. 357), they had held that a State might exclude a corporation of another State from its jurisdiction and that the corporations were not within section 2, article 4 of the Constitution.

But he added:

"This was not, however, the case of a corpo-

ration engaged in interstate commerce; and enough was said by the court to show that, if it had been, very different questions would have been presented."

Enough has been said in recent cases to show that it will never be held that any State can bar out from its soil at its will, or its caprice, any corporation existing under the laws of another, and desiring to cross that State for the purpose of commerce with another.

V. As to What the Act of Congress Means.

It is strongly insisted in the information that the Act does not purport to, nor does it authorize and empower the defendants to build a bridge, but that its true meaning is merely to permit and to license them to do so when they have acquired the lands from the State on which they place the pier and have obtained the consent of the State that any bridge at all shall be erected. It seems unnecessary to argue this point. There is no hint of any kind in the Act that any conveyance from the State or consent of the State were deemed necessary.

Notwithstanding the solemn protest of New Jersey and the invocation to her sister States solemnly presented to Congress, and in spite of the Act of April 6, 1886, declaring the rights in the navigable boundary which the State had reserved to itself and enacting that no fixed structure should be built over it by any person or corporation without its permission by statute, this Act of Congress was passed after several months' consideration of the action of New Jersey.

It is by its very title an Act to authorize the bridge and to establish it as a post road. It declares that its construction shall be lawful, provided the work is done as prescribed in the statute and approved by the secretary of war. It declares that when that approval is obtained, the companies or either of them may proceed to build it. Nowhere in the Act is there a suggestion of any other condition or limitation, nor any hint that the protests of the State, so urgently made, were to be considered, or anything to be done in pursuance of such protests as a preliminary to the work.

The Act of Congress rests upon the paramount power of the United States over the subject, and upon that basis the defendants stand.

It is to be observed that this is not the first time that New Jersey has attempted, through its courts, to put a stop to the work of the Federal Government in the bed of its navigable waters.

Although such work has been eagerly invited in the Passaic, the Raritan, Chessequakes Creek and Arthur Kill itself—yet in 1885 the same Attorney-General filed an information in the court of chancery to restrain the agents of the United States from work in the bed of the Delaware, on the Camden shore.

It made the same assumptions of *jura regalia* regularly acquired by the State, and of oyster and riparian laws passed and acted upon.

It alleged the same invasion of state rights, on a more ruinous scale. It charged the actual taking of the shores to high water mark between Petty's Island—Jersey soil—and the Camden shore for the purpose of a dyke, stopping the entire eastern channel, to the injury of

health, the destruction of the navigation interests of Jersey Creek, and the ruin of the Camden water supply.

The injunction was granted, as in this case, but upon an answer simply saying that the work was going on under the authority of a few lines in an appropriation bill for the improvement of the Delaware, and on the removal of the cause to this court, *Judges* Mc Kennan and Nixon promptly dissolved the injunction, and the work went on.

This court thought it unnecessary to write an opinion, and the case is not reported.

Finally, This very case has been decided by *Judge* Wallace in the Southern District of New York in the case of *Decker v. The Baltimore & New York Railroad Co. and the Staten Island Rapid Transit Railroad Co.*, two of the defendants in this cause, 30 Fed. Rep. 723, *post*,—

The bill was for an injunction to restrain the building of this bridge. It alleged that the defendants were about to build the bridge under the Act of Congress and with the approval of the secretary of war. That the construction of the bridge would greatly injure navigation. That the Legislature of New Jersey, January, 1886, passed a concurrent resolution against it, and that on the 6th of April, 1886, in order more effectually to prevent it, the Legislature passed a law requiring express permission. That the State had granted no such permission and also that no such permission had been granted by the State of New York. A copy of the Act of Congress, the concurrent resolution of the Legislature and the Act of April 6, 1886, was appended to the bill. The motion for injunction was argued upon a demurrer to the bill. *Judge* Wallace discussed the subject fully, citing the most important cases and denied the injunction.

It is insisted, therefore, that the injunction which is now arresting this work, undertaken under the authority of the United States, ought to be dissolved so that it can go on without delay.

Bradley, C. J., delivered the opinion of the court:

This case was commenced by information filed by the Attorney-General of New Jersey in the Court of Chancery of that State, praying for an injunction to restrain the defendants from erecting a bridge across Arthur Kill, between New Jersey and Staten Island in the State of New York, upon the lands of the State situated on the shore and under the waters of said Kill.

The chancellor granted a preliminary injunction upon the bill and affidavits. The defendants have removed the case to this court, as one arising under the Constitution and laws of the United States, and have filed an answer.

Motion was then made to dissolve the injunction; but after argument, the parties stipulated to submit the case as upon final hearing on bill and answer. There are no controverted facts in the case.

The Staten Island Rapid Transit Railroad Company, a corporation of New York, one of the defendants, claims the right to build the bridge in question, and to occupy the lands under water, necessary for the support of its piers,

under an Act of Congress, approved June 16, 1886, entitled "An Act to Authorize the Construction of a Bridge Across the Staten Island Sound, Known as Arthur Kill, and to Establish the Same as a Post Road."

This Act declares: "Sec. 1. That it shall be lawful for the Staten Island Rapid Transit Railroad Company, a corporation existing under the laws of the State of New York, and the Baltimore and New York Railroad Company, a corporation existing under the laws of the State of New Jersey, or either of said companies, to build and maintain a bridge across the Staten Island Sound, or Arthur Kill, from New Jersey to Richmond County, New York, for the passage of railroad trains, engines, and cars thereon, and to lay on and over said bridge railway tracks for the more perfect connection of any railroads that are or shall be constructed to the said sound at or opposite said point; and in a case of any litigation concerning any alleged obstruction to the free navigation of said sound on account of said bridge, the cause may be tried before the Circuit Court of the United States of either of said States in which any portion of said obstruction or bridge touches; and that all railway companies desiring to use the said bridge shall have and be entitled to equal rights and privileges in the passage over the same, and in the use of the machinery and fixtures thereof and of all the approaches thereto, for a reasonable compensation to be paid to the owners of said bridge, under and upon such terms and conditions as shall be prescribed by the secretary of war upon hearing the allegations and proofs of the parties in case they shall not agree.

"Sec. 2. That said bridge shall be constructed as a pivot draw bridge, with a draw over the main channel of the sound at an accessible and navigable point, and with spans of not less than 200 feet in length in the clear on each side of the central or pivot pier of the draw; and said spans shall not be less than thirty-two feet above mean low water mark measuring to the lowest member of the bridge superstructure: *And Provided also*, That said draw shall be opened promptly, upon reasonable signal, except when trains are passing over the said bridge, for the passage of the boats whose construction shall not be such as to admit of their passage under the draw of said bridge when closed; but in no case shall unnecessary delay occur in opening the said draw after the passage of trains; and the said company or corporation shall maintain, at its own expense, from sunset to sunrise, such lights or other signals, on said bridge, as the light house board shall prescribe.

"Sec. 3. That any bridge constructed under this Act and according to its limitations shall be a lawful structure, and shall be recognized and known as a post route, upon which also no higher charge shall be made for the transmission over the same of the mails, the troops, and the munitions of war of the United States, than the rate per mile paid for their transportation over the railroads or public highways leading to said bridge; and the United States shall have the right of way for postal telegraph purposes across said bridge.

"Sec. 4. That the plan and location of said bridge, with a detailed map of the sound at

the proposed site of the bridge, and near thereto, exhibiting the depths and currents, shall be submitted to the secretary of war for his approval, and until he approve the plan and location of said bridge it shall not be built; but upon the approval of said plan by the secretary of war, the said companies, or either of them, may proceed to the erection of said bridge in conformity with said approved plan; and should any change be made in the plan of said bridge during the progress of the work thereon, such change shall be subject likewise to the approval of the secretary of war. If the secretary of war shall at any time deem any change or alteration necessary in the said bridge, so that the same shall not obstruct navigation, or if he shall think the removal of the whole structure necessary, the alteration so required or the removal of the whole structure, shall be made at the expense of the parties owning said bridge; and if said bridge shall not be finished within two years from the passage of this Act, the rights and privileges hereby granted shall determine and cease.

"Sec. 5. That the right to alter, amend, or repeal this Act is hereby expressly reserved."

The said Staten Island Rapid Transit Railroad Company proposes to build a bridge across Arthur Kill, under and in conformity with this Act, to connect its own road on Staten Island with another railroad through and across the State of New Jersey for the purposes of interstate transportation; and in pursuance of that design, has adopted a site for the location of the bridge, from a certain point in the City of Elizabeth to Staten Island; and has caused the plan and location of said bridge, with a detailed map of the sound at and near the same (as required by the Act) to be submitted to the secretary of war, who has approved the same.

The Company, by its engineers and contractors (who are made codefendants in the case), proceeded to make preparations for laying the piers and erecting the bridge according to the plan thus approved. Thereupon the Attorney-General of New Jersey, deeming the property rights and sovereignty of the State in danger of violation from the erection of the proposed bridge, filed the present information to prevent it.

The information states the ordinary doctrine, that the State is owner of the shore and land under water of all navigable streams and arms of the sea within its borders; that this ownership was a part of the *jura regalia* of the King of Great Britain, by virtue of which he was seized and possessed of an estate in fee simple absolute in said lands; and that, at the Revolution, the State, in its sovereign capacity, succeeded to the rights of the Crown; and that this right of supreme dominion had never been ceded or surrendered to the United States; and that without such cession or surrender the United States could not take possession of such lands, or authorize other parties to do so, except by making compensation therefor as provided in the Fifth Amendment to the Constitution; and that at the place of location of the proposed bridge this ownership of the soil on the part of the State extended from ordinary high water mark to the center line of the

sound, being the boundary line between New Jersey and New York, as settled by agreement in 1883, and confirmed by Act of Congress, June 28, 1884.

The information further states that this ownership on the part of the State has been practically exercised by it for more than a century past, by regulating the enjoyment and disposition of the lands under the navigable waters within its limits, passing laws for the preservation and protection of the oyster fisheries therein, and authorizing the construction of wharves, with solid filling, to certain prescribed limits beyond low water mark; and that for these privileges, the grantees are required to pay and have paid a certain compensation to the State. It is contended by the informant that the Act of Congress cannot be construed as intending to give any authority to take any portion of said lands without compensation; and that said Act must be construed as a mere license or permission to erect the proposed bridge, so far as Congress, the conservator of navigation, is concerned, leaving the Companies to obtain from the State the usual authority to build the bridge on the territory and lands of the State; but that if the Act should be construed as giving authority to erect the bridge without the consent of the State and without compensation for taking its lands therefor, then it is violative of the Constitution of the United States—not only for authorizing the lands of the State to be taken without compensation, but for enlarging the powers of a corporation created by the State itself (if the bridge should be built by the Baltimore and New York Railroad Company) and authorizing it to do what, by its own charter and other laws of the State, it is prohibited from doing.

The information further contends that the other corporation defendant, the Staten Island Rapid Transit Company, is not a corporation of New Jersey, and has no authority from the State to exercise any corporate franchises therein, and cannot lawfully do so, except by the comity of the State, which has not been accorded to it; that instead of any such comity having been exercised, the said Company is expressly prohibited from exercising any such powers or franchises as that of building said bridge, by an Act of the Legislature of New Jersey, passed April 6, 1886, which prohibits any person or corporation from erecting any bridge, viaduct or fixed structure over or in any part of the navigable waters where the tide ebbs and flows, and separating said State from other States, without permission of the Legislature of New Jersey first given by statute for that purpose; and that no such permission has ever been asked or given.

The answer of the defendants does not advance any material new facts, except to state that the Baltimore and New York Railroad Company has nothing to do with the proposed building of the bridge, and that the Staten Island Rapid Transit Railroad Company proposes to build it as a connecting link in a line of railroad extending from the Bay of New York across the soil of the States of New York, New Jersey, Pennsylvania and other States as an instrument of commerce among the States; and claims the right to do so under the Act of Congress before cited.

INTER S.

The first question to be examined is the true construction of the Act of Congress on which the case arises,—the informant contending that it is merely permissive in its character, and the defendants, that it gives authority and power to build a bridge, without reference to any authority from the State. This question need not detain us long. The words of the Act are broad enough to confer the authority, if Congress had power to confer it. The language is, "It shall be lawful for the Staten Island Rapid Transit Railroad Company, etc., to build and maintain a bridge across the Staten Island Sound or Arthur Kill." This is the ordinary language used for conferring authority. Had the State Legislature passed a law in these terms, there could not be a doubt of its sufficiency to give authority. And there are expressions in the Act which imply that plenary authority was intended to be given. The minute directions laid down as to the manner of construction and use of the bridge imply this. The third section declares "that any bridge constructed under this Act and according to its limitations shall be a lawful structure," etc. implying that the construction of the bridge, when built, would be under the Act.

If Congress had no power to authorize the construction of the bridge, independent of state legislation, the Act would, of course, be properly construed as permissive in its character, auxiliary to, or confirmatory of state legislation which might be adopted for the purpose of authorizing such a bridge.

In other words, the Act, within the scope of its terms, may have such effect given to it as comports with the power of the legislative body which enacted it; just as a deed of conveyance may operate as a grant, a bargain and sale, a release or a confirmation, according to the interest of the grantor, on the one hand, and of the grantee on the other.

The true construction of the Act, therefore, depends on the power of Congress, which will be examined hereafter.

Another question of a preliminary character relates to the capacity and right of the defendant, the Staten Island Rapid Transit Railroad Company, to perform any acts and transact any business as a corporation in New Jersey.

It is argued that corporations, as such, have no legal existence outside of the State by whose laws they are created, and cannot transact business in another State except by the comity of its laws, which is not accorded in the present case.

This doctrine is subject to much qualification. The habits of business have so changed since the decision in the case of *Bank of Augusta v. Earle*, 13 Pet. 519 [38 U. S. bk. 10, L. ed. 274], and corporate organizations have been found so convenient, especially as avoiding a dissolution at every change of membership, that a large part of the business of the country has come to be transacted by their instrumentality, while their most objectionable feature—the nonliability of corporators—has in most instances been abrogated in whole or in part; and to deny their admission from one State to another in ordinary cases, at the present day, would go far to neutralize that provision in the fourth article of the Constitution which secures to the citi-

zens of one State all the privileges and immunities of citizens in another, and that provision of the Fourteenth Amendment, which secures to all persons the equal protection of the laws. So strongly is this felt that in the recent case of *Santa Clara County v. Southern Pacific R. R. Co.* 118 U. S. 394-396 [Bk. 80, L. ed. 118], the doctrine that corporations are not citizens or persons within the protective language of the Constitution, was unanimously disapproved, and the court expressly held that they are entitled, as well as individuals, to the equal protection of the laws under the Fourteenth Amendment of the Constitution.

It is undoubtedly just and proper that foreign corporations should be subject to the legitimate police regulations of the State and should have, if required, an agent in the State to accept service of process when sued for acts done or contracts made therein. In reference to some branches of business, like those of banking and insurance, which affect the people at large, they may also be subject to more stringent regulations for the security of the public, and may be even prohibited from pursuing them except on such terms and conditions, not unlawful in themselves, as the State chooses to impose.

But in the pursuit of business authorized by the Government of the United States, and under its protection, the corporations of other States cannot be prohibited or obstructed by any State. If Congress should employ a corporation of shipbuilders to construct a man-of-war, they would have the right to purchase the necessary timber and iron in any State of the Union; and in carrying on foreign and interstate commerce, corporations, equally with individuals, are within the protection of the commercial power of Congress, and cannot be molested in another State by state burdens or impediments.

This was held and decided in the case of *GloUCESTER Ferry Co. v. Pennsylvania*, 114 U. S. 204 [Bk. 29, L. ed. 163, ante, 883], and affirmed in the recent case of *Philadelphia S. S. Co. v. Pennsylvania*, 123 U. S. [Bk. 80, —, ante, 808]; and although the decision in *Paul v. Virginia*, 8 Wall. 168 [75 U. S. bk. 19, L. ed. 857], conformed to the doctrine of *Bank of Augusta v. Earle*, the following striking language was used by the court to wit: "At the time of the formation of the Constitution, a large part of the commerce of the world was carried on by corporations. The East India Company, the Hudson's Bay Company, the Hamburg Company, the Levant Company, and the Virginia Company, may be named among the many corporations then in existence, which acquired, from the extent of their operations, celebrity throughout the commercial world. This state of facts forbids the supposition that it was intended in the grant of power to Congress, to exclude from its control the commerce of corporations. The language of the grant makes no reference to the instrumentalities by which commerce may be carried on; it is general and includes alike commerce by individuals, partnerships, associations and corporations. We may fairly supplement this language by adding that when the Constitution was adopted, it could not have been supposed that the regulations of com-

merce to be made by Congress, might be of no avail to commercial corporations, or at least might be rendered nugatory with regard to them, in consequence of state restrictions upon their power to act as corporations in any other State than that of their origin.

At all events, if Congress, in the execution of its powers, chooses to employ the intervention of a proper corporation, whether of the State or out of the State, we see no reason why it should not do so.

There is nothing in the Constitution to prevent it from making contracts with, or conferring powers upon, state corporations for carrying out its own legitimate purposes.

What right of the State would be invaded? The corporations thus employed or empowered, in executing the will of Congress, could do nothing which the State could rightfully oppose or object to. It may be added that no state corporation more suitable than the defendant could be empowered to build the bridge in question in this case, since one half of the bridge is in the State of New York, and the railroad of the defendant is to connect with it on the New York side.

In our judgment, if Congress itself has the power to construct a bridge across a navigable stream for the furtherance of commerce among the States, it may authorize the same to be done by agents, whether individuals or a corporation created by itself, or a state corporation already existing and concerned in the enterprise. The objection that Congress cannot confer powers on a state corporation is untenable. It has used their agency for carrying on its own purposes from an early period. It adopted as post roads the turnpikes belonging to the various turnpike corporations of the country as far back as such corporations were known, and subjected them to burdens and accorded to them privileges arising out of that relation. It continued the same system with regard to canals and railroads when these modes of transportation came into existence. Nearly half a century ago, it constituted every railroad built or to be built in the United States, a post route. This, of course, involved duties and conferred privileges and powers not contained in their original charter. In 1866, Congress authorized every steam railroad company in the United States to carry passengers and goods on their way from one State to another, and to receive compensation therefor, and to connect with roads of other States, so as to form continuous lines for the transportation of the same to the place of destination. The powers thus conferred were independent of the powers conferred by the charter of any railroad company. Surely these Acts of Congress cannot be condemned as unconstitutional exertions of power.

In the present case the corporate capacity of the Staten Island Rapid Transit Railroad Company is admitted by making it a defendant. It is not excluded from the State by any want of comity in the laws of the State. Its alleged want of power under those laws to build the bridge in question does not arise from anything peculiar to it as a foreign corporation, but from the general prohibition of the State Law of April 6, 1896, which is applicable to all persons and corporations, and

declares "that no bridge, viaduct or fixed structure shall be erected by any person or corporation over or in any part of the navigable waters separating this State from other States where the tide ebbs and flows, without express permission of the Legislature of this State given by statute for that purpose." This prohibition, in its broadest sense, inhibits the erection of such a bridge as is described therein, by Congress itself, or (which is the same thing) by any person or corporation acting under the authority of Congress, and, of course, is to that extent void, if Congress has power to erect such a bridge. But if it is not to be taken in this broad sense, but as subject to the condition in law of being inoperative as against the paramount power of Congress, then the authority of the defendant is unaffected by it, inasmuch as the defendant has express power from Congress to build the bridge. So that we are brought back to the question of the power of Congress to build the bridge, and whether that power is independent of the consent and concurrence of the State government. And, in our judgment, this question must be answered in the affirmative.

The power to regulate commerce in the several States is given by the Constitution in the most general and absolute terms. The "power to regulate," as applied to a government has a most extensive application. With regard to commerce it has been expressly held that it is not confined to commercial transactions, but extends to seamen, ships, navigation and the appliances and facilities of commerce. And it must extend to these or it cannot embrace the whole subject. Under this power the navigation of rivers and harbors has been opened and improved; and we have no doubt that canals and water ways may be opened to connect navigable bays, harbors and rivers with each other or with the interior of the country.

Nor have we any doubt that, under the same power, the means of commercial communication by land as well as by water may be opened up by Congress between different States, whenever it shall see fit to do so, either on failure of the States to provide such communication or whenever, in the opinion of Congress, increased facilities of communication ought to exist.

Hitherto, it is true, the means of commercial communication have been supplied either by nature in the navigable waters of the country or by the States in the construction of roads, canals and railroads so that the functions of Congress have not been largely called into exercise under this branch of its jurisdiction and power, except in the improvement of rivers and harbors and the licensing of bridges across navigable streams.

But this is no proof that its power does not extend to the whole subject in all its possible requirements.

Indeed it has been put forth in several notable instances which stand as strong arguments of practical construction given to the Constitution by the legislative department of the government.

The Cumberland or National Road is one instance of a grand thoroughfare projected by Congress and extending from the Potomac to the Mississippi. After being nearly completed,

it was surrendered to the several States within which it was situated. The system of Pacific Railroads presents several instances of railroads constructed through or into different States, as Iowa, Kansas and California. The main stem of the Union Pacific commences at Council Bluffs, in Iowa, and crosses the Missouri by a bridge at that place, erected under the authority of Congress alone. In 1862 a bridge was authorized by Congress to be constructed across the Ohio River at Steubenville between the States of Virginia and Ohio, to be completed, maintained and operated by the railroad company authorized to build it, and by another company named, "anything in any law or laws of the above named States to the contrary notwithstanding." (12 Stat. 569).

Still it is contended that although Congress may have power to construct roads and other means of communication between the States, yet this can only be done with the concurrence and consent of the States in which the structures are made. If this is so, then the power of regulation in Congress is not supreme; it depends on the will of the States. We do not concur in this view. We think that the power of Congress is supreme over the whole subject, unimpeded and unembarrassed by state lines or state laws; that in this matter the country is one and the work to be accomplished is national; and that state interests, state jealousies and state prejudices do not require to be consulted. In matters of foreign and interstate commerce there are no States.

It is very true that in some cases of bridges authorized to be erected and other things authorized to be done, Congress may have required that the consent of the State should be first obtained. But the power of the United States cannot depend on the consent of the States. It is only to be found in the Constitution. The consent of a State may sometimes facilitate the execution of a power, as the consent to the use of the prisons, court houses and other public buildings of the State, but it never can confer power. Particular States have sometimes consented to the employment of their courts and judicial machinery by the officers of the United States for condemning land for public purposes. But if the United States had no power to take land by condemnation, such consent could not give it. So where, in any case, Congress may have authorized the construction of a railroad or a bridge upon the condition of obtaining the consent of the State, it is clear that such consent was not required for the purpose of supplementing the power of Congress to authorize the structure to be made, but rather for the purpose of manifesting a disposition of comity and good will towards the State. For if Congress had not the power to authorize the structure, consent could not give it. All those cases, therefore, in which Congress has given such authority, whether with or without the consent of the State, are precedents for affirming the power of Congress. They are all instances of practical construction of the Constitution in favor of it.

The most strenuous objection, however, to the exercise of the power in this case, and in the manner proposed, is based on the fact that the piers of the bridge are to rest, and the bridge is to stand, on land which belongs to

to be an obstruction to navigation and abated as a nuisance. In the mean time Congress had passed an Act declaring the bridge to be a lawful structure, and on this ground a motion was made to dismiss the bill, and it was granted. The whole subject is very thoroughly discussed by Judge Miller who decided the case in the circuit court. The decision was affirmed on appeal in a short opinion by Judge Nelson reaffirming the exclusive power of Congress in the premises, and the efficacy of the Act in legalizing the bridge.

III. The principle was again affirmed in *South Carolina v. Ga.* 98 U. S. 4 (Bk. 23, L. ed. 793). The case concerned an alleged obstruction to the navigation of the Savannah River under authority of an Act of Congress. It was held that the obstruction was lawful. Among other things the court says: "The power to regulate commerce comprehends the control for that purpose, and to the extent necessary of all the navigable rivers of the United States which are accessible from a State other than those in which they lie. For this purpose they are the public property of the Nation and subject to all the regulate legislation by Congress."

IV. The case of the *Pensacola Tel. Co. v. West. U. Tel. Co.* 98 U. S. 1 (Bk. 24, L. ed. 708), brought in question the validity of a state statute conferring an exclusive right to build and maintain a telegraph line in a particular locality. It was decided that the State had no such power, and that the statute was void because in conflict with an Act of Congress on the same subject.

The court reaffirms the supremacy of Congress, saying, among other things:

"The Government of the United States within the scope of its powers operates upon every foot of territory under its jurisdiction. It legislates for the whole Nation and is not embarrassed by state lines. * * * The State has attempted to regulate commercial intercourse between its citizens and those of other States. * * * It is unnecessary to decide how far this might have been done if Congress had not acted upon the same subject, for it has acted."

V. In *Newport etc. Bridge Co. v. United States*, 105 U. S. 470 (Bk. 36, L. ed. 1143), the question is again thoroughly reviewed. The subject matter was a bridge over the Ohio River between Newport and Cincinnati. The court, among other things, say: "The paramount power of regulating bridges that effect the navigation of the navigable waters of the United States is in Congress. It comes from the power to regulate commerce with foreign Nations and among the States."

VI. It has been decided that a State may, in the absence of federal legislation, permit the bridging of navigable waters within its own jurisdiction (*Gilman v. Philadelphia*, 8 Wall. 781, 70 U. S. bk. 13, L. ed. 96), the court saying, however, that: "Congress may interpose, whenever it shall be deemed necessary, by either general or special laws. It may regulate all bridges over navigable waters, remove offending bridges and punish those who shall thereafter erect them. Within the sphere of their authority both the legislative and judicial power are supreme." *Pound v. Turck*, 95 U. S.

459 (Bk. 24, L. ed. 525), was a similar case. The court says, among other things: "In the absence of legislation by Congress a statute of a State which authorizes the erection of a dam across a navigable river which is wholly within her limits is not unconstitutional."

VII. The doctrines of constitutional law laid down in the foregoing cases were again reaffirmed in the case of *Miller v. Mayor of New York*, 109 U. S. 885 (Bk. 27, L. ed. 971), which was a suit brought to restrain the erection of the East River Bridge. The case was tried below before Judge Blatchford, who decided against the plaintiff. The decision was affirmed on appeal. It was held not to impair the efficacy of the Act, that certain incidental matters were left to the determination of the secretary of war. And it declared that the action of Congress was "paramount and conclusive." The court said that all the questions presented had been finally settled by a long line of decisions, and that what the court "say in this opinion will be little more than a condensation of what was there declared."

Authorities in the support of the supreme exclusive power of Congress in this and in analogous cases might be multiplied almost indefinitely, but it would be a waste of time; the question is no longer open for discussion. It follows that when Congress, acting within its powers, says a thing may be done, and a state statute says that it shall not be done, the latter is void. It was so declared in *Wilson v. Black Bird Creek Marsh Co.*, in the *Wheeling Bridge Case*, in *Gilman v. Philadelphia*, and in *Pensacola Tel. Co. v. Florida*; and the principle is necessarily involved in all the cases. Nowhere is there a suggestion that in the case of bridges or in any other case must there be concurrent action of the State Legislature.

For all purposes navigable waters and the land under them are the "public property of the Nation."

South Carolina v. Ga. supra. See also the opinion of Judge Miller, 1 Wall. 150 (68 U. S. bk. 17, L. ed. 578).

From supplemental brief for the defendants in answer to the brief for the complainant.

The able and ingenious brief for the plaintiff presents his case in the strongest and most plausible way possible. But the premises (not altogether without support in early decisions of state courts) have long since been decided to be unsound by the Supreme Court of the United States, whose decisions are conclusive upon all questions of constitutional law. Although not stated in so many words, the fundamental proposition of the brief is that the power of Congress extends only to saying that bridges may not be built over navigable waters, and that there is no power in Congress to say what bridges may be erected; that every federal statute on the subject, no matter how strong and definite in expression, must be held to express only that Congress would not object if the consent of the State or States interested could be obtained. That state courts were in the beginning so inclined to construe the constitutional provision in question is undoubtedly true; this clearly appears by the case of the *People v. Rensselaer etc. R. R. Co.* 15

Wend. 118, cited for the plaintiff. But in this case, as in many others, the tribunal having jurisdiction to finally determine all questions arising under the Constitution has disapproved of the interpretation which would limit the power of Congress merely to giving its assent subject to the approval of the State. The supreme court has asserted for Congress the sole power, and has over and over again declared that any state law obstructing the full and efficient operation of an Act of Congress is void. State courts have, of course, accepted this interpretation as conclusive. Indeed, the court of appeals, in the case of this very bridge, has declared the rule to be settled as above stated in the following words:

"It is also proper to say that the enactment by Congress during its last session of a bill authorizing the contracting parties hereinbefore referred to, to build a railroad bridge or viaduct across Arthur Kill, has apparently removed any legal objection to such a structure, and rendered it quite certain that the connections contracted for between such parties will be made and the property sought to be obtained by this proceeding devoted to the purposes alleged in the petition."

Nothing could be more explicit nor is the decision in the *People, Murphy, v. Kelly*, 76 N. Y. 475, in conflict with what the court here say; for in that case the court say, referring to the power of Congress:

"What it authorizes may be justified upon its authority; what it forbids is necessarily unlawful" (at p. 483).

In the case of the Brooklyn Bridge, it was necessary to take for its use a large amount of land, far within the limits of the two cities, and for that purpose, state legislation was, of course, necessary. An Act of Congress authorizing a bridge does not necessarily have anything to do with the acquisition of land on the shore, or of other property necessary for its construction; and it is quite conceivable that in the absence of any general law on the subject, state legislation might be necessary for its condemnation; but with that question we are not, at present, concerned. But if it were held that the right of the State to the land under water was superior to that of the United States, it would be equivalent to holding that no bridge could be built under an Act of Congress, and we have seen that the court of appeals has decided in the case of this very bridge that such an Act gives all the authority that is required. If it were not so, it is obvious that a State might wholly nullify the provision of the Federal Constitution in question.

If, for example, a state law is essential to the legality of the structure, a repeal of that law, under a power of repeal reserved as is usual, would make it unlawful; and so after all, everything would depend upon the pleasure of the State and the ever changing views of successive Legislatures as to the State's interest. This cannot be so.

The superior right of Congress over the land under water is a necessary incident of its constitutional supremacy, and essential to its efficient exercise. For all the purposes of that constitutional power, the State is regarded as having transferred to the Federal Government, for the benefit of the people of the United

States, the interest which it held in the land under water for the benefit of the people of the State; and that interest, for all the purposes of commerce, is now held by the United States upon a larger and more comprehensive trust. That is what the court says in *South Carolina v. Ga.* (brief, p. 4, pt. 8).

The dissenting opinion of Judge Field in *Bridge Co. v. U. S.* is cited. But while not altogether approving, he admits that the question is settled for, he says:

"Yet out of this assertion of a power to legalize a structure, which, without such sanction, would be deemed an obstruction to navigation, has grown up the doctrine of an independent power in Congress to authorize the construction of bridges over navigable streams, without the permission of the States, and to control them when constructed."

In the late case of *Cardwell v. American Bridge Co.* 113 U. S. 205 (Bk. 28, L. ed. 959), Judge Field delivered the opinion of the court, and the views expressed in his dissenting opinion in *Bridge Co. v. United States*, appear to have been modified, for he says, among other things, after referring to the cases in which the plenary and controlling power of Congress is asserted: "We are entirely satisfied with the soundness of the conclusions reached." Again, referring to the States, he says: "And as to bridges over navigable streams this power is subordinate to that of Congress, as an Act of the latter body is by the Constitution made the supreme law of the land."

The opinion of the court, it will be noticed, asserts the doctrine in the strongest way.

In *South Carolina v. Ga.* 93 U. S. 4 (Bk. 23, L. ed. 782), the court says:

"It is not, however, conceded that Congress has no power to order obstructions to be placed in the navigable waters of the United States. * * * If, as we have said, the United States have succeeded to the power and rights of the several States, so far as control over interstate and foreign commerce is concerned, this is not to be doubted" (at pp. 11, 12).

In the case of the *Newport etc. Bridge Co. v. U. S.* 105 U. S. 479 (Bk. 26, L. ed. 1147), Judge Miller, in his opinion below, commences his elaborate discussion of this question with the following sentence: "If the determination of the circumstances under which a bridge may be built over a navigable stream, or the presenting of general rules for its construction and maintenance, be a regulation of commerce either with foreign Nations or among the States, then the enactment under consideration falls within the power conferred on Congress by that clause." He then goes on to show that it has been definitely settled that Congress has this power.

1 Woolw. p. 156.

But it is said, on the other side, that in many of these cases there was also the authority of the State for doing that which was contemplated. This is true, but there is no case in which the existence of that authority was regarded as a factor of any importance in the decision. Some of the cases related to structures in waters wholly within one State, as in the case of the *Eust River Bridge*, and of the *Becanaba Co. v. Chicago*, 107 U. S. 678 (Bk. 27, L. ed. 442), and in the case of *Gilman v. Philadel-*

phia. In all these cases, rights of a different nature from those under consideration were essential both to create corporations with corporate power to do what was purposed, and to acquire property over which Congress had no control. For these subsidiary purposes, therefore, state legislation was essential. This is well illustrated in the case of the *Clinton Bridge*. In that instance, the respective State Legislatures professed to do nothing more than to create corporations capable of building the bridge, and then in express terms left it to Congress to decide whether they might build a bridge, and what sort of a bridge it should be. Another illustration of the same principle is to be found in the case of the *Pensacola Tel. Co. v. Western Union Tel. Co.* 96 U. S. 1 (Bk. 24, L. ed. 708).

In that case, as in the case before the court, the land required had been obtained by private purchase, and it was only necessary to find a law which authorized the work. That was found in an Act of Congress, and a state statute that stood in the way of that Act was swept out of the way and declared to be void. And we know that in the great leading case of the *Wheeling Bridge* no importance at all was attached to a statute of Virginia and no force allowed to it; for in spite of that statute, the bridge was, in the first instance, declared to be a nuisance, then, before that judgment was carried into execution, came the Act of Congress which at once made it a lawful structure, the bridge obtaining its status, so to speak, wholly from that Act.

Again; whatever plausibility an argument on the lines of the plaintiff's brief might once have had, or may now have, in respect to waters wholly interstate, disappears when applied to navigable waters constituting a boundary between two States. All constitutional law is, from its very nature, exclusive when brought into exercise. Indeed, volition which is in any wise dependent upon the will of another is not power; nor is there any case in which, under the Federal Constitution, co-operative legislation on the part of a State is necessary to communicate vitality and efficiency to an Act of Congress. And in a case where, in the absence of action on the part of Congress, the State is left free to legislate, the moment Congress does exercise its superior authority, the statute of the State ceases to be operative; it remains in abeyance or becomes a nullity. Therefore, it follows, of course, as laid down in all the authorities, that when Congress, acting within its powers, declares that a thing may be done, the state statute forbidding it to be done is simply void. It will be noticed that the Act of Congress makes this bridge part of a post road, and if it were at all necessary, this provision might well be referred to as strengthening the main position and argument for the defendant. But the efficiency of the Act upon the broad general principles already mentioned seems to be too clear to call for further discussion.

Wallace, C. J., delivered the following opinion:

The complainant is a vessel owner whose business of transportation makes it necessary for him to use the narrow navigable water-

way known as Arthur Kill, which constitutes one of the boundaries between the States of New York and New Jersey. He has brought this suit to restrain the defendants from constructing a railroad bridge across these navigable waters, which they propose to build and maintain under claim of authority conferred by the Act of Congress of June 16, 1886, entitled "An Act to Authorize the Construction of a Bridge across the Staten Island Sound, Known as Arthur Kill, and to Establish the Same as a Post Road." The case is now here upon the defendants' demurrer to the bill of complaint, and upon complainant's motion for an injunction *pendente lite*.

It is not disputed that the complainant has a sufficient standing in a court of equity to challenge the right of the defendants to build the bridge; and the single question to be decided is whether they have a legal right to build the bridge. If they have, it is solely by the efficacy of the Act of Congress as a constitutional exercise of the power to regulate commerce between the several States.

The Legislature of New Jersey, by an Act passed April 6, 1886, has forbidden the erection of any bridge or structure over any part of the navigable waters where the tide ebbs and flows, separating the State from other States, without express permission given by the Legislature by statute in that behalf. The Act was passed after the bill had been introduced in Congress authorizing the construction of this bridge, and before it became a law, and was preceded by the adoption of concurrent resolutions of the Senate and House of Assembly of New Jersey protesting against any action on the part of Congress intended to legalize the erection of such a bridge.

The case thus presents the constitutional question whether Congress can lawfully confer upon a private corporation the capacity to occupy navigable waters within a State, and appropriate the soil under them, for the purposes of interstate commerce, without the consent of the State.

Although the Act of Congress establishes the bridge, when constructed as a post road, this is wholly an incidental and an unnecessary feature of the legislation. The Act does not purport to authorize the bridge in order to provide an additional post road; and the provision establishing the bridge as a post road, when built, was unnecessary, because it would become such by force of pre-existing law. Sec. 3964, R. S. U. S.

Neither does it in terms purport to be an exercise of the power to regulate commerce between the States; but that this is its essential character is apparent from the recitals which show that it was designed to afford a connection between railroads already constructed, or to be constructed, on opposite sides of the Sound. Obviously, Congress intended to plant the rights conferred on the defendants upon the validity of the Act as a regulation of commerce.

Both the language and the history of the Act preclude the doubt whether it can be construed as intended to grant a privilege which is to become operative when concurrent authority to build the bridge is obtained from the States of New Jersey and New York. It

is silent as to any such condition, and this silence is emphatic, in view of the provisions contemplating the assent of the State which have been inserted in all previous Acts of a similar character when permission by the State had not been given in advance. As it was passed notwithstanding the protest of New Jersey, which was in effect a declaration that she would not consent, it must be assumed that Congress did not regard the consent of the State necessary.

The precise question to be decided has never been adjudicated; and the present Act is the first attempt on the part of Congress to grant such a right as is asserted by the defendants.

In the language of the Supreme Court of the United States in *Miller v. Mayor of New York*:

"The power vested in Congress to regulate commerce with foreign Nations, and among the several States, includes the control of the navigable waters of the United States so far as may be necessary to insure their free navigation; and by navigable waters of the United States are meant such as are navigable in fact, and which, by themselves, or by their connection with other waters, form a continuous channel for commerce with foreign countries or among the States." 109 U. S. 395 [Bk. 27, L. ed. 976].

Whether the waters are wholly within the boundaries of a State, or, as here, lie between two States, is not material. They are navigable waters of the United States if they form, by themselves or by uniting with others, a continuous highway for commerce with other States or countries. *The Daniel Ball*, 10 Wall. 557 [77 U. S. bk. 19, L. ed. 999]; *Escanaba etc. Transportation Co. v. Chicago*, 107 U. S. 683 [Bk. 27, L. ed. 444.]

The power of control over such waters necessarily includes the power of deciding what structures are impediments to commerce; and, by an unbroken line of decisions, it is settled that the paramount authority regulating bridges that affect the navigation of the navigable waters of the United States is in Congress.

So long as this authority lies dormant, the States may authorize the erection of bridges over navigable waters within their limits, which may to some extent obstruct navigation, or, by concurrent action, may bridge the waters lying between them; but, so soon as Congress intervenes and exercises its power of regulation, what has been done by state authority must give way to the paramount authority of Congress. The power of the State ends where that of the Nation begins. *Wilson v. Black Bird Creek Marsh Co.* 2 Pet. 250 [37 U. S. bk. 7, L. ed. 414]; *Pa. v. Wheeling etc. Bridge Co.* 18 How. 421 [59 U. S. bk. 15, L. ed. 495]; *Gilman v. Philadelphia*, 3 Wall. 728 [70 U. S. bk. 18, L. ed. 100]; *Mobile Co. v. Kimball*, 102 U. S. 691 [Bk. 26, L. ed. 238]; *Pound v. Turck*, 93 U. S. 459 [Bk. 24, L. ed. 525].

These decisions, however, fall short of adjudicating the present case, because they do not decide in terms that the power of regulation extends further than is required to preserve the free and unobstructed navigation of the public waters. If the power ends there, the present Act is nugatory. That it does end there never has been authoritatively determined.

The lands under the water on the New Jersey side of Arthur Kill belong to the State of New Jersey, or to those who have derived title from the State. The shores of navigable waters, and the soil under them, were not granted by the Constitution to the United States, but were reserved to the States respectively. *Potlard v. Hagan*, 8 How. 212 [44 U. S. bk. 11, L. ed. 565].

The right of eminent domain over such lands, for all municipal purposes, resides in the State within the boundaries of which they lie, and within the legitimate limitations of this right the power of the State to appropriate the shores of navigable waters, and the lands under them, is absolute. *Ormerod v. New York etc. R. Co.* 21 Blatchf. 106.

Expressions of opinions by learned jurists are found in several adjudged cases, to the effect that Congress cannot, under the power of regulating commerce, authorize the erection of bridges over navigable waters without the consent of the State, or sanction an obstruction of commerce.

In *People v. Rensselaer etc. R. R. Co.* 15 Wend. 113, Chief Justice Savage, after asserting that the power to erect bridges over such waters existed in the State Legislature before the adoption of the Federal Constitution, says:

"It is not pretended that such power has been delegated to the general government as is conveyed under the power to regulate commerce and navigation. It remains, then, in the State Legislature, or it exists nowhere. It does exist because it has not been surrendered any further than such surrender may be qualifiedly implied; that is, the power to erect bridges over navigable streams must be considered so far surrendered as may be necessary for a free navigation upon those streams."

In *People, Murphy, v. Kelly*, 76 N. Y. 475, Earl, J., says:

"The East River is a public navigable water, and to bridge it requires the concurrent authority of the State of New York and of the United States; of the former by reason of its rights in the lands on the shore, and under the water, and of its qualified sovereignty over the water; and of the latter by reason of the exclusive power of Congress to regulate commerce, and to determine in its regulation thereof to what extent navigation upon the water may be obstructed or interfered with."

In the *Wheeling Bridge Case*, Mr. Justice McLean, in considering whether Congress could legalize a bridge over navigable water within the jurisdiction of any State or States, uses this language:

"But this does not necessarily include the power to construct bridges which may obstruct commerce, but can never increase its facilities on a navigable water. Any power which Congress may have in regard to such a structure is indirect, and results from a commercial regulation. It may, under this power, declare that no bridge shall be built which shall be an obstruction to the use of a navigable water. And this, it would seem, is as far as the commercial power by Congress can be exercised. * * * If, under the commercial power, Congress may make bridges over navigable waters, it would be difficult to find any limitation of such a power. * * * So extravagant and absorbing

The application has not yet been granted, but it must be assumed that the board will do its duty within a reasonable time, and then the riparian owner of the land on which this bridge is to rest will own all that the State has to give him in the lands of Arthur Kill beneath the bridge, subject to the paramount rights of the United States.

How then can the State now claim to arrest this work authorized by the United States, and permitted by the riparian owner, by reason of anything arising out of the riparian laws?

III. As to the Consent of the State.

Not only has no such consent been given to the building of this bridge, but the State, by the Act of April 6, 1886, has declared in a preamble "that it reserves to itself the right to determine in each case whether the navigable boundary waters of this State shall be crossed or occupied by bridges, viaducts, or other fixed structure, and if so, when, where and in what manner;" and has forbidden any bridge, viaduct or fixed structure in any navigable waters separating New Jersey from other States, without express permission by statute. The only exception in this statute, is, that it shall not be construed to forbid the construction of docks or wharves. Both the preamble and the body of the Act assume that New Jersey has the power to declare when, where and how any fixed structure whatever shall be placed in the Delaware, New York Bay, the Hudson River or Arthur Kill. It includes lighthouses, buoys, jetties, and indeed everything which can come within the meaning of the term "fixed structures." This claim is asserted and this power assumed in the year 1886, after the long line of decisions on the subject of the power of Congress over navigable waters had been made.

The position assumed by New Jersey in this Act was well known to the Congress of the United States and fully considered.

In fact a concurrent resolution, passed by the House of Assembly January 27, 1886, and by the Senate February 3, 1886, was forwarded to the senators and representatives of New Jersey for presentation to Congress, and they were requested to use their utmost endeavors to defeat the bill to authorize this bridge. Those resolutions made the same claim as to the title of the State in these waters, and solemnly protested that any action of Congress to authorize the bridge would be unconstitutional and the usurpation of a power belonging to New Jersey. They asserted that the bridge could only be authorized by the States of New York and New Jersey. They alleged "that the attempt to legalize such a bridge in advance of its construction by enacting that it shall be a post road is an evident subterfuge and should be rejected as an attempt to establish a precedent under which all exclusive powers of the States may be set at naught."

And the fourth resolution declared "that in aid of this protest New Jersey invoked the sympathy of all her sister States in the maintenance of the doctrine of established and acknowledged state rights."

Notwithstanding these resolutions and the Act of the Legislature subsequently passed, Congress afterwards passed a law to authorize the construction of this bridge over Arthur Kill

and to establish it as a post road without requiring the consent of the State. It undoubtedly considered the doctrine that consent of the State is not needed to give power to the United States to build any fixed structure in and across any of the navigable waters of the country for the promotion of interstate commerce, was too fully established for further discussion or legislation.

More than twenty years before it had passed a law authorizing such a bridge, anything in the laws of either of the States between which the river ran to the contrary notwithstanding.

In *Wallamet Iron Bridge Co. v. Hatch*, 19 Fed. Rep. 347, Judge Deady said, that the theory that Congress can only legislate concerning navigable waters so as to limit or affect the power of each State equally, so as to preserve its equal footing with the others, was founded on a total misapprehension of the relation of the national and state governments to the subject and to one another. He said:

"For the purposes of commerce and the exercise of the power of Congress over that subject, every navigable water in the Union which, of itself or by means of its connections, forms a continuous highway for interstate or foreign commerce, is primarily the navigable water of the United States, over which it has the same power for the purposes of such commerce as if it was wholly in a Territory or the District of Columbia."

See also *Miss. etc. Boom Co. v. Patterson*, 98 U. S. 408 (Bk. 25, L. ed. 206); *People v. Humphrey*, *supra*.

IV. As to Authorizing a Foreign Corporation to Build a Bridge.

This same Congress authorized thirty-three railroad corporations to build bridges. Many of these were corporations foreign to the States where the bridges were to be built.

Ever since the Telegraph Act of 1866, foreign companies of one State have extended their lines over the highways and post roads of other States under the authority of that Act.

In the *Pensacola Case*, *supra*, the corporation seeking to set aside the excluding Act of the State of Florida, was not a corporation of that State. In that case the court, admitting the general proposition that a corporation of one State exercises its business and franchises in another by comity, and that it is strictly in the power of a State to withdraw or refuse such comity, nevertheless clearly manifests its view that if the subject matter of the business or the franchise supposed to be carried on or enjoyed by a corporation of one State within the limits of another be national in its nature, and relate to the commercial dealings of the country as a whole, the power of the United States is sufficient to prevent the interference of the State, and the interruption of commerce, through motives of state pride, jealousy or self interest.

Chief Justice Waite said that the court was aware that in *Paul v. Virginia*, 8 Wall. 168 (75 U. S. bk. 19, L. ed. 357), they had held that a State might exclude a corporation of another State from its jurisdiction and that the corporations were not within section 2, article 4 of the Constitution.

But he added:

"This was not, however, the case of a corpo-

ration engaged in interstate commerce; and enough was said by the court to show that, if it had been, very different questions would have been presented."

Enough has been said in recent cases to show that it will never be held that any State can bar out from its soil at its will, or its caprice, any corporation existing under the laws of another, and desiring to cross that State for the purpose of commerce with another.

V. As to What the Act of Congress Means.

It is strongly insisted in the information that the Act does not purport to, nor does it authorize and empower the defendants to build a bridge, but that its true meaning is merely to permit and to license them to do so when they have acquired the lands from the State on which they place the pier and have obtained the consent of the State that any bridge at all shall be erected. It seems unnecessary to argue this point. There is no hint of any kind in the Act that any conveyance from the State or consent of the State were deemed necessary.

Notwithstanding the solemn protest of New Jersey and the invocation to her sister States solemnly presented to Congress, and in spite of the Act of April 6, 1886, declaring the rights in the navigable boundary which the State had reserved to itself and enacting that no fixed structure should be built over it by any person or corporation without its permission by statute, this Act of Congress was passed after several months' consideration of the action of New Jersey.

It is by its very title an Act to authorize the bridge and to establish it as a post road. It declares that its construction shall be lawful, provided the work is done as prescribed in the statute and approved by the secretary of war. It declares that when that approval is obtained, the companies or either of them may proceed to build it. Nowhere in the Act is there a suggestion of any other condition or limitation, nor any hint that the protests of the State, so urgently made, were to be considered, or anything to be done in pursuance of such protests as a preliminary to the work.

The Act of Congress rests upon the paramount power of the United States over the subject, and upon that basis the defendants stand.

It is to be observed that this is not the first time that New Jersey has attempted, through its courts, to put a stop to the work of the Federal Government in the bed of its navigable waters.

Although such work has been eagerly invited in the Passaic, the Raritan, Cheesquakes Creek and Arthur Kill itself—yet in 1885 the same Attorney-General fled an information in the court of chancery to restrain the agents of the United States from work in the bed of the Delaware, on the Camden shore.

It made the same assumptions of *jura regalia* regularly acquired by the State, and of oyster and riparian laws passed and acted upon.

It alleged the same invasion of state rights, on a more ruinous scale. It charged the actual taking of the shores to high water mark between Petty's Island—Jersey soil—and the Camden shore for the purpose of a dyke, stopping the entire eastern channel, to the injury of
INTER S.

health, the destruction of the navigation interests of Jersey Creek, and the ruin of the Camden water supply.

The injunction was granted, as in this case, but upon an answer simply saying that the work was going on under the authority of a few lines in an appropriation bill for the improvement of the Delaware, and on the removal of the cause to this court, Judges Mc Kennan and Nixon promptly dissolved the injunction, and the work went on.

This court thought it unnecessary to write an opinion, and the case is not reported.

Finally, This very case has been decided by Judge Wallace in the Southern District of New York in the case of *Decker v. The Baltimore & New York Railroad Co. and the Staten Island Rapid Transit Railroad Co.*, two of the defendants in this cause, 80 Fed. Rep. 723, *post*.—

The bill was for an injunction to restrain the building of this bridge. It alleged that the defendants were about to build the bridge under the Act of Congress and with the approval of the secretary of war. That the construction of the bridge would greatly injure navigation. That the Legislature of New Jersey, January, 1886, passed a concurrent resolution against it, and that on the 6th of April, 1886, in order more effectually to prevent it, the Legislature passed a law requiring express permission. That the State had granted no such permission and also that no such permission had been granted by the State of New York. A copy of the Act of Congress, the concurrent resolution of the Legislature and the Act of April 6, 1886, was appended to the bill. The motion for injunction was argued upon a demurrer to the bill. Judge Wallace discussed the subject fully, citing the most important cases and denied the injunction.

It is insisted, therefore, that the injunction which is now arresting this work, undertaken under the authority of the United States, ought to be dissolved so that it can go on without delay.

Bradley, C. J., delivered the opinion of the court:

This case was commenced by information filed by the Attorney-General of New Jersey in the Court of Chancery of that State, praying for an injunction to restrain the defendants from erecting a bridge across Arthur Kill, between New Jersey and Staten Island in the State of New York, upon the lands of the State situated on the shore and under the waters of said Kill.

The chancellor granted a preliminary injunction upon the bill and affidavits. The defendants have removed the case to this court, as one arising under the Constitution and laws of the United States, and have filed an answer.

Motion was then made to dissolve the injunction; but after argument, the parties stipulated to submit the case as upon final hearing on bill and answer. There are no controverted facts in the case.

The Staten Island Rapid Transit Railroad Company, a corporation of New York, one of the defendants, claims the right to build the bridge in question, and to occupy the lands under water, necessary for the support of its piers,

under an Act of Congress, approved June 16, 1886, entitled "An Act to Authorize the Construction of a Bridge Across the Staten Island Sound, Known as Arthur Kill, and to Establish the Same as a Post Road."

This Act declares: "Sec. 1. That it shall be lawful for the Staten Island Rapid Transit Railroad Company, a corporation existing under the laws of the State of New York, and the Baltimore and New York Railroad Company, a corporation existing under the laws of the State of New Jersey, or either of said companies, to build and maintain a bridge across the Staten Island Sound, or Arthur Kill, from New Jersey to Richmond County, New York, for the passage of railroad trains, engines, and cars thereon, and to lay on and over said bridge railway tracks for the more perfect connection of any railroads that are or shall be constructed to the said sound at or opposite said point; and in a case of any litigation concerning any alleged obstruction to the free navigation of said sound on account of said bridge, the cause may be tried before the Circuit Court of the United States of either of said States in which any portion of said obstruction or bridge touches; and that all railway companies desiring to use the said bridge shall have and be entitled to equal rights and privileges in the passage over the same, and in the use of the machinery and fixtures thereof and of all the approaches thereto, for a reasonable compensation to be paid to the owners of said bridge, under and upon such terms and conditions as shall be prescribed by the secretary of war upon hearing the allegations and proofs of the parties in case they shall not agree.

"Sec. 2. That said bridge shall be constructed as a pivot draw bridge, with a draw over the main channel of the sound at an accessible and navigable point, and with spans of not less than 200 feet in length in the clear on each side of the central or pivot pier of the draw; and said spans shall not be less than thirty-two feet above mean low water mark measuring to the lowest member of the bridge superstructure: *And Provided also*, That said draw shall be opened promptly, upon reasonable signal, except when trains are passing over the said bridge, for the passage of the boats whose construction shall not be such as to admit of their passage under the draw of said bridge when closed; but in no case shall unnecessary delay occur in opening the said draw after the passage of trains; and the said company or corporation shall maintain, at its own expense, from sunset to sunrise, such lights or other signals, on said bridge, as the light house board shall prescribe.

"Sec. 3. That any bridge constructed under this Act and according to its limitations shall be a lawful structure, and shall be recognized and known as a post route, upon which also no higher charge shall be made for the transmission over the same of the mails, the troops, and the munitions of war of the United States, than the rate per mile paid for their transportation over the railroads or public highways leading to said bridge; and the United States shall have the right of way for postal telegraph purposes across said bridge.

"Sec. 4. That the plan and location of said bridge, with a detailed map of the sound at

the proposed site of the bridge, and near thereto, exhibiting the depths and currents, shall be submitted to the secretary of war for his approval, and until he approve the plan and location of said bridge it shall not be built; but upon the approval of said plan by the secretary of war, the said companies, or either of them, may proceed to the erection of said bridge in conformity with said approved plan; and should any change be made in the plan of said bridge during the progress of the work thereon, such change shall be subject likewise to the approval of the secretary of war. If the secretary of war shall at any time deem any change or alteration necessary in the said bridge, so that the same shall not obstruct navigation, or if he shall think the removal of the whole structure necessary, the alteration so required or the removal of the whole structure, shall be made at the expense of the parties owning said bridge; and if said bridge shall not be finished within two years from the passage of this Act, the rights and privileges hereby granted shall determine and cease.

"Sec. 5. That the right to alter, amend, or repeal this Act is hereby expressly reserved."

The said Staten Island Rapid Transit Railroad Company proposes to build a bridge across Arthur Kill, under and in conformity with this Act, to connect its own road on Staten Island with another railroad through and across the State of New Jersey for the purposes of interstate transportation; and in pursuance of that design, has adopted a site for the location of the bridge, from a certain point in the City of Elizabeth to Staten Island; and has caused the plan and location of said bridge, with a detailed map of the sound at and near the same (as required by the Act) to be submitted to the secretary of war, who has approved the same.

The Company, by its engineers and contractors (who are made codefendants in the case), proceeded to make preparations for laying the piers and erecting the bridge according to the plan thus approved. Thereupon the Attorney-General of New Jersey, deeming the property rights and sovereignty of the State in danger of violation from the erection of the proposed bridge, filed the present information to prevent it.

The information states the ordinary doctrine, that the State is owner of the shore and land under water of all navigable streams and arms of the sea within its borders; that this ownership was a part of the *jura regalia* of the King of Great Britain, by virtue of which he was seised and possessed of an estate in fee simple absolute in said lands; and that, at the Revolution, the State, in its sovereign capacity, succeeded to the rights of the Crown; and that this right of supreme dominion had never been ceded or surrendered to the United States; and that without such cession or surrender the United States could not take possession of such lands, or authorize other parties to do so, except by making compensation therefor as provided in the Fifth Amendment to the Constitution; and that at the place of location of the proposed bridge this ownership of the soil on the part of the State extended from ordinary high water mark to the center line of the

sound, being the boundary line between New Jersey and New York, as settled by agreement in 1833, and confirmed by Act of Congress, June 28, 1834.

The information further states that this ownership on the part of the State has been practically exercised by it for more than a century past, by regulating the enjoyment and disposition of the lands under the navigable waters within its limits, passing laws for the preservation and protection of the oyster fisheries therein, and authorizing the construction of wharves, with solid filling, to certain prescribed limits beyond low water mark; and that for these privileges, the grantees are required to pay and have paid a certain compensation to the State. It is contended by the informant that the Act of Congress cannot be construed as intending to give any authority to take any portion of said lands without compensation; and that said Act must be construed as a mere license or permission to erect the proposed bridge, so far as Congress, the conservator of navigation, is concerned, leaving the Companies to obtain from the State the usual authority to build the bridge on the territory and lands of the State; but that if the Act should be construed as giving authority to erect the bridge without the consent of the State and without compensation for taking its lands therefor, then it is violative of the Constitution of the United States—not only for authorizing the lands of the State to be taken without compensation, but for enlarging the powers of a corporation created by the State itself (if the bridge should be built by the Baltimore and New York Railroad Company) and authorizing it to do what, by its own charter and other laws of the State, it is prohibited from doing.

The information further contends that the other corporation defendant, the Staten Island Rapid Transit Company, is not a corporation of New Jersey, and has no authority from the State to exercise any corporate franchises therein, and cannot lawfully do so, except by the comity of the State, which has not been accorded to it; that instead of any such comity having been exercised, the said Company is expressly prohibited from exercising any such powers or franchises as that of building said bridge, by an Act of the Legislature of New Jersey, passed April 6, 1888, which prohibits any person or corporation from erecting any bridge, viaduct or fixed structure over or in any part of the navigable waters where the tide ebbs and flows, and separating said State from other States, without permission of the Legislature of New Jersey first given by statute for that purpose; and that no such permission has ever been asked or given.

The answer of the defendants does not advance any material new facts, except to state that the Baltimore and New York Railroad Company has nothing to do with the proposed building of the bridge, and that the Staten Island Rapid Transit Railroad Company proposes to build it as a connecting link in a line of railroad extending from the Bay of New York across the soil of the States of New York, New Jersey, Pennsylvania and other States as an instrument of commerce among the States; and claims the right to do so under the Act of Congress before cited.

INTER S.

The first question to be examined is the true construction of the Act of Congress on which the case arises,—the informant contending that it is merely permissive in its character, and the defendants, that it gives authority and power to build a bridge, without reference to any authority from the State. This question need not detain us long. The words of the Act are broad enough to confer the authority, if Congress had power to confer it. The language is, "It shall be lawful for the Staten Island Rapid Transit Railroad Company, etc., to build and maintain a bridge across the Staten Island Sound or Arthur Kill." This is the ordinary language used for conferring authority. Had the State Legislature passed a law in these terms, there could not be a doubt of its sufficiency to give authority. And there are expressions in the Act which imply that plenary authority was intended to be given. The minute directions laid down as to the manner of construction and use of the bridge imply this. The third section declares "that any bridge constructed under this Act and according to its limitations shall be a lawful structure," etc. implying that the construction of the bridge, when built, would be under the Act.

If Congress had no power to authorize the construction of the bridge, independent of state legislation, the Act would, of course, be properly construed as permissive in its character, auxiliary to, or confirmatory of state legislation which might be adopted for the purpose of authorizing such a bridge.

In other words, the Act, within the scope of its terms, may have such effect given to it as comports with the power of the legislative body which enacted it; just as a deed of conveyance may operate as a grant, a bargain and sale, a release or a confirmation, according to the interest of the grantor, on the one hand, and of the grantee on the other.

The true construction of the Act, therefore, depends on the power of Congress, which will be examined hereafter.

Another question of a preliminary character relates to the capacity and right of the defendant, the Staten Island Rapid Transit Railroad Company, to perform any acts and transact any business as a corporation in New Jersey.

It is argued that corporations, as such, have no legal existence outside of the State by whose laws they are created, and cannot transact business in another State except by the comity of its laws, which is not accorded in the present case.

This doctrine is subject to much qualification. The habits of business have so changed since the decision in the case of *Bank of Augusta v. Earle*, 18 Pet. 519 [38 U. S. bk. 10, L. ed. 274], and corporate organizations have been found so convenient, especially as avoiding a dissolution at every change of membership, that a large part of the business of the country has come to be transacted by their instrumentality, while their most objectionable feature—the nonliability of corporators—has in most instances been abrogated in whole or in part; and to deny their admission from one State to another in ordinary cases, at the present day, would go far to neutralize that provision in the fourth article of the Constitution which secures to the citi-

zens of one State all the privileges and immunities of citizens in another, and that provision of the Fourteenth Amendment, which secures to all persons the equal protection of the laws. So strongly is this felt that in the recent case of *Santa Clara County v. Southern Pacific R. Co.* 118 U. S. 394-396 [Bk. 80, L. ed. 118], the doctrine that corporations are not citizens or persons within the protective language of the Constitution, was unanimously disapproved, and the court expressly held that they are entitled, as well as individuals, to the equal protection of the laws under the Fourteenth Amendment of the Constitution.

It is undoubtedly just and proper that foreign corporations should be subject to the legitimate police regulations of the State and should have, if required, an agent in the State to accept service of process when sued for acts done or contracts made therein. In reference to some branches of business, like those of banking and insurance, which affect the people at large, they may also be subject to more stringent regulations for the security of the public, and may be even prohibited from pursuing them except on such terms and conditions, not unlawful in themselves, as the State chooses to impose.

But in the pursuit of business authorized by the Government of the United States, and under its protection, the corporations of other States cannot be prohibited or obstructed by any State. If Congress should employ a corporation of shipbuilders to construct a man-of-war, they would have the right to purchase the necessary timber and iron in any State of the Union; and in carrying on foreign and interstate commerce, corporations, equally with individuals, are within the protection of the commercial power of Congress, and cannot be molested in another State by state burdens or impediments.

This was held and decided in the case of *Gloucester Ferry Co. v. Pennsylvania*, 114 U. S. 204 [Bk. 29, L. ed. 162, ante, 383], and affirmed in the recent case of *Philadelphia S. S. Co. v. Pennsylvania*, 123 U. S. [Bk. 30, —, ante, 308]; and although the decision in *Paul v. Virginia*, 8 Wall. 168 [75 U. S. bk. 19, L. ed. 357], conformed to the doctrine of *Bank of Augusta v. Earle*, the following striking language was used by the court to wit: "At the time of the formation of the Constitution, a large part of the commerce of the world was carried on by corporations. The East India Company, the Hudson's Bay Company, the Hamburg Company, the Levant Company, and the Virginia Company, may be named among the many corporations then in existence, which acquired, from the extent of their operations, celebrity throughout the commercial world. This state of facts forbids the supposition that it was intended in the grant of power to Congress, to exclude from its control the commerce of corporations. The language of the grant makes no reference to the instrumentalities by which commerce may be carried on; it is general and includes alike commerce by individuals, partnerships, associations and corporations." We may fairly supplement this language by adding that when the Constitution was adopted, it could not have been supposed that the regulations of com-

merce to be made by Congress, might be of no avail to commercial corporations, or at least might be rendered nugatory with regard to them, in consequence of state restrictions upon their power to act as corporations in any other State than that of their origin.

At all events, if Congress, in the execution of its powers, chooses to employ the intervention of a proper corporation, whether of the State or out of the State, we see no reason why it should not do so.

There is nothing in the Constitution to prevent it from making contracts with, or conferring powers upon, state corporations for carrying out its own legitimate purposes.

What right of the State would be invaded? The corporations thus employed or empowered, in executing the will of Congress, could do nothing which the State could rightfully oppose or object to. It may be added that no state corporation more suitable than the defendant could be empowered to build the bridge in question in this case, since one half of the bridge is in the State of New York, and the railroad of the defendant is to connect with it on the New York side.

In our judgment, if Congress itself has the power to construct a bridge across a navigable stream for the furtherance of commerce among the States, it may authorize the same to be done by agents, whether individuals or a corporation created by itself, or a state corporation already existing and concerned in the enterprise. The objection that Congress cannot confer powers on a state corporation is untenable. It has used their agency for carrying on its own purposes from an early period. It adopted as post roads the turnpikes belonging to the various turnpike corporations of the country as far back as such corporations were known, and subjected them to burdens and accorded to them privileges arising out of that relation. It continued the same system with regard to canals and railroads when these modes of transportation came into existence. Nearly half a century ago, it constituted every railroad built or to be built in the United States, a post route. This, of course, involved duties and conferred privileges and powers not contained in their original charter. In 1866, Congress authorized every steam railroad company in the United States to carry passengers and goods on their way from one State to another, and to receive compensation therefor, and to connect with roads of other States, so as to form continuous lines for the transportation of the same to the place of destination. The powers thus conferred were independent of the powers conferred by the charter of any railroad company. Surely these Acts of Congress cannot be condemned as unconstitutional exertions of power.

In the present case the corporate capacity of the Staten Island Rapid Transit Railroad Company is admitted by making it a defendant. It is not excluded from the State by any want of comity in the laws of the State. Its alleged want of power under those laws to build the bridge in question does not arise from anything peculiar to it as a foreign corporation, but from the general prohibition of the State Law of April 6, 1886, which is applicable to all persons and corporations, and

declares "that no bridge, viaduct or fixed structure shall be erected by any person or corporation over or in any part of the navigable waters separating this State from other States where the tide ebbs and flows, without express permission of the Legislature of this State given by statute for that purpose." This prohibition, in its broadest sense, inhibits the erection of such a bridge as is described therein, by Congress itself, or (which is the same thing) by any person or corporation acting under the authority of Congress, and, of course, is to that extent void, if Congress has power to erect such a bridge. But if it is not to be taken in this broad sense, but as subject to the condition in law of being inoperative as against the paramount power of Congress, then the authority of the defendant is unaffected by it, inasmuch as the defendant has express power from Congress to build the bridge. So that we are brought back to the question of the power of Congress to build the bridge, and whether that power is independent of the consent and concurrence of the State government. And, in our judgment, this question must be answered in the affirmative.

The power to regulate commerce in the several States is given by the Constitution in the most general and absolute terms. The "power to regulate," as applied to a government has a most extensive application. With regard to commerce it has been expressly held that it is not confined to commercial transactions, but extends to seamen, ships, navigation and the appliances and facilities of commerce. And it must extend to these or it cannot embrace the whole subject. Under this power the navigation of rivers and harbors has been opened and improved; and we have no doubt that canals and water ways may be opened to connect navigable bays, harbors and rivers with each other or with the interior of the country.

Nor have we any doubt that, under the same power, the means of commercial communication by land as well as by water may be opened up by Congress between different States, whenever it shall see fit to do so, either on failure of the States to provide such communication or whenever, in the opinion of Congress, increased facilities of communication ought to exist.

Hitherto, it is true, the means of commercial communication have been supplied either by nature in the navigable waters of the country or by the States in the construction of roads, canals and railroads so that the functions of Congress have not been largely called into exercise under this branch of its jurisdiction and power, except in the improvement of rivers and harbors and the licensing of bridges across navigable streams.

But this is no proof that its power does not extend to the whole subject in all its possible requirements.

Indeed it has been put forth in several notable instances which stand as strong arguments of practical construction given to the Constitution by the legislative department of the government.

The Cumberland or National Road is one instance of a grand thoroughfare projected by Congress and extending from the Potomac to the Mississippi. After being nearly completed,

it was surrendered to the several States within which it was situated. The system of Pacific Railroads presents several instances of railroads constructed through or into different States, as Iowa, Kansas and California. The main stem of the Union Pacific commences at Council Bluffs, in Iowa, and crosses the Missouri by a bridge at that place, erected under the authority of Congress alone. In 1863 a bridge was authorized by Congress to be constructed across the Ohio River at Steubenville between the States of Virginia and Ohio, to be completed, maintained and operated by the railroad company authorized to build it, and by another company named, "anything in any law or laws of the above named States to the contrary notwithstanding." (12 Stat. 569).

Still it is contended that although Congress may have power to construct roads and other means of communication between the States, yet this can only be done with the concurrence and consent of the States in which the structures are made. If this is so, then the power of regulation in Congress is not supreme; it depends on the will of the States. We do not concur in this view. We think that the power of Congress is supreme over the whole subject, unimpeded and unembarrassed by state lines or state laws; that in this matter the country is one and the work to be accomplished is national; and that state interests, state jealousies and state prejudices do not require to be consulted. In matters of foreign and interstate commerce there are no States.

It is very true that in some cases of bridges authorized to be erected and other things authorized to be done, Congress may have required that the consent of the State should be first obtained. But the power of the United States cannot depend on the consent of the States. It is only to be found in the Constitution. The consent of a State may sometimes facilitate the execution of a power, as the consent to the use of the prisons, court houses and other public buildings of the State, but it never can confer power. Particular States have sometimes consented to the employment of their courts and judicial machinery by the officers of the United States for condemning land for public purposes. But if the United States had no power to take land by condemnation, such consent could not give it. So where, in any case, Congress may have authorized the construction of a railroad or a bridge upon the condition of obtaining the consent of the State, it is clear that such consent was not required for the purpose of supplementing the power of Congress to authorize the structure to be made, but rather for the purpose of manifesting a disposition of comity and good will towards the State. For if Congress had not the power to authorize the structure, consent could not give it. All those cases, therefore, in which Congress has given such authority, whether with or without the consent of the State, are precedents for affirming the power of Congress. They are all instances of practical construction of the Constitution in favor of it.

The most strenuous objection, however, to the exercise of the power in this case, and in the manner proposed, is based on the fact that the piers of the bridge are to rest, and the bridge is to stand, on land which belongs to

the State, and that no compensation is proposed to be made for the taking thereof. It is contended that if the land of the State can be taken at all (which is denied), it can, at most, only be taken like other private property after just compensation has been made.

First, it is denied that the land of the State can be taken at all without voluntary cession, or consent of the State Legislature. If this is so, we are brought back to the dilemma of requiring the consent of the State in almost every case of an interstate line of communication by railroad; for hardly a case can arise in which some property belonging to a State will not be crossed. It will always be so at the passage of a navigable stream. This shows that the position cannot be sound, for it brings us to a *reductio ad absurdum*. It interposes an effectual barrier to the execution of a constitutional power vested in Congress. It overlooks the fundamental principle that the Constitution and all laws made in pursuance thereof are the supreme law of the land. For, if the consent of a State is necessary, such State may always, in pursuit of its own interests, refuse its consent, and thus thwart the plain objects and purposes of the Constitution.

One argument for the position is, that no part of the territory of one sovereign can be acquired by another except by conquest or cession, and, therefore, in a case like the present, where conquest is out of the question, it can only be acquired by cession. And this conclusion is supposed to be affirmed and provided for in our federal system, by the 17th paragraph of section 8, article 1, of the Constitution, which gives to Congress power to exercise exclusive legislation "over all places purchased by the consent of the Legislature of the State in which the same shall be, for the erection of forts, magazines, arsenals, dock yards and other needful buildings." It is argued that this is the only constitutional method by which the United States Government can obtain the possession and use of lands within a State, especially lands belonging to the State.

This argument, however, is directed to the acquisition of territory with exclusive jurisdiction over the same; and is entirely sound in that regard. But it does not touch the question as to the power of the United States to acquire the mere use of land without exclusive jurisdiction therein.

Nearly all the powers of government are exercised over territory in which the United States and the several States have concurrent jurisdiction. It is only in exceptional cases that the United States desires to have exclusive jurisdiction and a consequent cession of territory. It is very true that the consent of the State Legislature is required, in order to give this exclusive jurisdiction. But that is all. It is not required when exclusive jurisdiction is not sought; on the contrary, the government, if it sees fit, may condemn land for its purposes without the consent of the State. Thus, it was decided by the supreme court in the case of *Kohl v. United States*, 91 U.S. 867 [8k. 28, L. ed. 449], that the government of the United States may exercise the right of eminent domain within a State, for the purpose of condemning land for the use of a postoffice building; and may, for this purpose, resort to its own courts. In such

a case there cannot be a doubt that the postoffice building could be erected and used by the government without asking the consent of the State Legislature.

Such consent would, indeed, be necessary to vest in the United States exclusive jurisdiction over the postoffice building and grounds, but it would not be necessary to enable the government to use the property for the purposes for which it was acquired. So if any other property is wanted for a public purpose, the consent of the state Legislature is not necessary to its acquisition or to its use; but only to the exclusion of state jurisdiction over the place. That jurisdiction, if allowed to remain, will extend to the punishment of crimes, committed against state laws therein, and to the service of state process, but, of course, cannot interfere with the execution of the United States laws, nor with the performance, by United States officers and agents, of the duties devolved upon them.

In short, cession by a State is only necessary to extinguish its jurisdiction in whole or in part; and is not necessary to the use of land by the United States for public purposes, subject, like all lands within the limits of the Union, to the concurrent jurisdiction of both governments, that of the United States being supreme. The laws of the latter are supreme everywhere in the States as well as in the Territories of the United States; but have exclusive force within the States only in such places as have been ceded by them.

The argument based upon the doctrine that the States have the eminent domain or highest dominion in the lands comprised within their limits, and that the United States have no dominion in such lands, cannot avail to frustrate the supremacy given by the Constitution to the Government of the United States in all matters within the scope of its sovereignty.

This is not a matter of words but of things. If it is necessary that the United States Government should have an eminent domain still higher than that of the State, in order that it may fully carry out the objects and purposes of the Constitution, then it has it. Whatever may be the necessities or conclusions of theoretical law as to eminent domain or anything else, it must be received as a postulate of the Constitution that the Government of the United States is vested with full and complete power to execute and carry out its purposes.

And as one of these purposes is the regulation of commerce among the several States, and as that involves the needs and ways of intercommunication, it follows that Congress may provide for these necessities whether the States co-operate and concur therein or not.

But, secondly, it is contended that if the United States can constitutionally take the land of the State, as well as that of the citizen, for public purposes, without consent, it can only do so in the same manner and subject to the same conditions, namely: that of making just compensation. It is urged that the language of the Fifth Amendment of the Constitution is applicable to the case and is imperative.

This language is—"Nor shall private property be taken for public use without just compensation." It is insisted that the property of the State in lands under its navigable waters

is private property and comes strictly within the constitutional provision. It is significantly asked, Can the United States take the state house at Trenton and the surrounding grounds belonging to the State, and appropriate them to the purposes of a railroad depot, or to any other use of the general government without compensation? We do not apprehend that the decision of the present case involves or requires a serious answer to this question. The cases are clearly not parallel. The character of the title or ownership by which the State holds the state house, is quite different from that by which it holds the land under the navigable waters in and around its territory.

The information rightly states that, prior to the Revolution, the shores and lands under water of the navigable streams and waters of the province of New Jersey belonged to the King of Great Britain, as part of the *jura regalia* of the Crown, and devolved to the State by right of conquest. The information does not state, however, what is equally true, that after the conquest the said lands were held by the State, as they were by the King, *in trust* for the public uses of navigation and fishery, and the erection thereon of wharves, piers, light houses, beacons and other facilities of navigation and commerce. Being subject to this trust, they were *publici juris*; in other words, they were held for the use of the people at large. It is true that to utilize the fisheries, especially those of shellfish, it was necessary to parcel them out to particular operators, and employ the rent or consideration for the benefit of the whole people; but this did not alter the character of the title; the lands remained subject to all other public uses as before, especially to those of navigation and commerce, which are always paramount to those of the public fisheries. It is also true that portions of the submerged shoals and flats, which really interfere with navigation, and could better subserve the purposes of commerce by being filled up and reclaimed, were disposed of to individuals for that purpose. But neither did these dispositions of useless parts affect the character of the title to the remainder.

Such being the character of the State's ownership of the land under water—an ownership held, not for the purpose of emolument but for public use, especially the public use of navigation and commerce—the question arises whether it is a kind of property susceptible of pecuniary compensation, within the meaning of the Constitution. The Fifth Amendment provides only that *private property* shall not be taken without compensation, making no reference to public property. But if the phrase may have an application broad enough to include all property and ownership, the question would still arise whether the appropriation of a few square feet of the river bottom to the foundation of a bridge which is to be used for the transportation of an extensive commerce, in aid and relief of that afforded by the waterway, is at all a diversion of the property from its origi-

nal public use? It is not so considered when sea walls, piers, wing dams and other structures are erected for the purpose of aiding commerce by improving and preserving the navigation. Why should it be deemed such when, without injury to the navigation, erections are made for the purpose of aiding and enlarging commerce beyond the capacity of the navigable stream itself, and of all the navigable waters of the country? It is commerce and not navigation which is the great object of constitutional care.

The power to regulate commerce is the basis of the power to regulate navigation in navigable waters and streams; and these are so completely subject to the control of Congress, as subsidiary to commerce, that it has become usual to call the entire navigable waters of the country the navigable waters of the United States. It matters little whether the United States has or has not the theoretical ownership and dominion in the waters or the land under them; it has what is more, the regulation and control of them for the purposes of commerce. So wide and extensive is the operation of this power that no State can place any obstruction in or upon any navigable waters against the will of Congress, and Congress may summarily remove such obstructions at its pleasure. And all this power is derived from the power "to regulate commerce." Is this power stayed when it comes to the question of erecting a bridge for the purposes of commerce across a navigable stream? We think not.

We think that the power to regulate commerce between the States extends not only to the control of the navigable waters of the country and the lands under them for the purposes of navigation, but for the purpose of erecting piers, bridges and all other instrumentalities of commerce which in the judgment of Congress may be necessary or expedient. Entertaining these views with regard to the power of Congress over the whole subject of the regulation of commerce among the several States, including that of the navigable waters of the country and the lands under the same, as subsidiary to that end, we have no hesitation in declaring our opinion to be that the authority given by the Act of June 16, 1886, to build the bridge in question, and for that purpose to erect the necessary piers of such bridge upon the lands under the water of Arthur Kill, is valid and constitutional, and does not injuriously affect any property or other rights of the State of New Jersey. This conclusion resolves also the other questions remaining unanswered with regard to the true construction of the Act and the capacity of the defendant, the Staten Island Rapid Transit Railroad Company, to perform the said acts necessary to execute the authority given by Congress.

The information is dismissed with costs, and the injunction heretofore granted is dissolved.

Nixon, D. J., concurred.

UNITED STATES CIRCUIT COURT FOR THE SOUTHERN DIST. OF N. Y.

David DECKER

v.

BALTIMORE & NEW YORK R. R. Co.

et al. *

1. Congress can lawfully confer upon a **private corporation** the capacity to occupy navigable waters within a State, and appropriate the soil under them, for the purposes of **interstate commerce**, without the consent of the State.
2. *Held*, that the Act of Congress of June 16, 1886, entitled "An Act to Authorize the Construction of a **Bridge across** the Staten Island Sound, known as **Arthur Kill**," etc., is within the power conferred upon Congress to regulate commerce among the States, and that if the corporation undertaking the erection of such bridge acquires the right of the owners of the land under the waters and on the shore, the Act gives such corporation lawful authority to build and maintain such bridge without the consent, and notwithstanding the inhibition, of the State of New Jersey.

(Decided April 27, 1887.)

IN equity. Bill for an injunction. *Demurrer to bill sustained and motion for injunction denied.*

The case is stated in the opinion.

Mr. P. B. McLennan, for complainant:

The material facts stated in the bill of complaint and which are conceded, are:

1. The defendants are railroad corporations, organized under the laws of the States of New Jersey and New York, respectively.
2. In about June, 1886, the defendants were authorized by an Act of Congress to build and maintain a bridge across the Staten Island Sound or Arthur Kill at the point mentioned.
3. Staten Island Sound or Arthur Kill is a navigable water way lying between the States of New Jersey and New York, forming the boundary line between said States, and is wholly within their borders, and is the principal and only practicable water way leading from New York, Brooklyn and Jersey City to the places on the westerly side of Staten Island, and on the New Jersey shore opposite to Princess Bay, Raritan Bay, and to the places on the Raritan River, and is, and has been extensively used by all kinds of vessels and crafts engaged in commerce between said points.
4. The defendants threaten immediately to commence the construction of a bridge, according to the plans and under the conditions specified in the Act of Congress; and if said bridge is constructed upon said plans or upon any similar plan, it will seriously interfere with commerce, and it will be impossible to safely navigate a vessel in or through said water way.

5. The complainant is, and for more than twenty years last past has been, engaged in navigating said water way, with vessels, sloops and steamers duly enrolled and licensed under the laws of the United States, and also under the laws of the States of New York and New Jersey, in carrying on and in the prosecution of his business; and if the bridge is constructed, it will prevent the complainant from carrying on the business in which he is engaged, and will prevent him and all others from safely navigating said water way, and will cause him irreparable damage and injury.

6. The Legislature of the State of New Jersey, by a concurrent resolution, protested and protests against the construction of said bridge, and by an Act of its Legislature, passed April 6, 1886, declared that no bridge should be erected over the navigable waters separating the State of New Jersey from other States, without the express permission of the Legislature given by statute for that purpose.

No such permission has been given by the State of New Jersey, and the State of New York has in no way assented or consented to the erection of the bridge in question, or any other bridge across Long Island Sound or Arthur Kill.

7. It will be conceded that the bridge in question was not authorized by Congress for the purpose of national defense, or for the purpose of establishing postoffices or post roads. It will also be conceded that the jurisdiction of the States of New Jersey and New York is as complete and comprehensive over the water way in question, as would be the jurisdiction of either State over such water way if it were located wholly within its boundaries.

Upon these facts and concessions, the question is presented, and it is the only question involved in this case: Has Congress the power under article 1, § 8, subd. 8 of the Constitution, which reads: "The Congress shall have power to regulate commerce with foreign Nations, among the several States and with the Indian Tribes," to authorize the construction of a bridge across a navigable water way, forming the division line between two States and wholly within their boundaries, in such manner as will practically prohibit its navigation, against the will of one State, expressed by statute and without the assent or consent of the other State?

1. Congress has no power under the commercial clause of the Constitution to authorize the obstruction of a navigable water way lying wholly within the boundaries of two States, against the will of such States.

1. Never until the passage of the Act in question, authorizing the construction of a bridge across Arthur Kill, has Congress attempted the exercise of such power. In every reported case which I have been able to find, action on the part of Congress was preceded by the action of the State or States interested.

In the opinions of the court in some of the cases, there may be found expressions to the effect that such power exists in Congress, but the precise question here presented was not in-

*See *Stockton v. Baltimore & New York R. R. Co.* ante, 411.

volved and its determination was not necessary to the decision of the case.

2. The case of the *People, Murphy, v. Kelly*, 76 N. Y. 475, is a direct authority upon the question at issue. At page 482 the court says (Earl, J., writing the opinion), "The East River is a public navigable water and to bridge it requires the concurrent authority of the State of New York and of the United States; of the former by reason of its rights in the lands on the shore, and under the water, and of its qualified sovereignty over the water; and of the latter by reason of the exclusive power of Congress to regulate commerce, and to determine, in its regulation thereof, to what extent navigation upon the water may be obstructed or interfered with."

The above action was brought to restrain the construction of the East River bridge. It was conceded that Congress, after the State of New York had acted, authorized its construction, and the principal question presented was, Was the Act of the Legislature of the State of New York purporting to authorize its construction constitutional and valid? That question having been answered in the affirmative, the court says, page 483: "Having thus the authority of Congress, and of the State Legislature, the bridge company proceeded with the construction of the bridge;" and again at page 490, the court says: "What is thus sanctioned, both by the State and National Legislatures, cannot be a nuisance, or otherwise unlawful."

3. The question here involved was also passed upon in the case of the *People v. Rennselaer etc. R. Co.* 15 Wend. 113, 131.

Chief Justice Savage, in delivering the opinion of the court, said: "I think I may safely say that a power exists somewhere to erect bridges over waters which are navigable, if the wants of society require them, provided such bridges do not essentially injure the navigation of the waters which they cross. Such power certainly did exist in the State Legislatures, before the delegation of power to the Federal Constitution. It is not pretended that such power has been delegated to the general government as is conveyed under the power to regulate commerce and navigation. It remains then in the State Legislature, or it exists nowhere. It does exist because it has not been surrendered any farther than such surrender may be qualifiedly implied; that is, the power to erect bridges over navigable streams must be considered so far surrendered as may be necessary for a free navigation upon those streams."

5. The case of the *Newport etc. Bridge Company v. United States*, 105 U. S. 470 (Bk. 26, L. ed. 1143), which is relied upon by the counsel for the defendant, decides no more than that where a bridge has been authorized to be constructed across a navigable stream lying between two States, by the Legislatures of those States, Congress has the power to cause such bridge to be removed or its plan of construction changed, notwithstanding the bridge as constructed does not impede or interfere with navigation.

In that case the General Assemblies of the States of Kentucky and Ohio passed an Act authorizing the construction of a bridge across the Ohio River between Newport and Cincinnati S.

nati in such manner as not to obstruct the navigation of the Ohio River.

It was not determined or deemed necessary to determine that the bridge so constructed did obstruct the navigation of the river; yet notwithstanding, it was held that Congress had the power to compel the bridge to be constructed upon another or different plan.

The question presented in that case was therefore very different from the one presented here; there the States interested had assumed to act and it was held that Congress had then the power to determine whether the States should be allowed to act at all in the premises, and if so, to determine absolutely in what manner.

In the opinion of the court, page 475, this language is used: "The paramount power regulating bridges that affect the navigation of the navigable waters of the United States is in Congress; it comes from the power of regulating commerce with foreign Nations and among the States." It is this expression, although not necessary to the decision of the case, that *Mr. Justice Field* in his dissenting opinion criticises; and at p. 489 he expressly says "That the power to authorize the construction of such bridges has not been conferred upon Congress by the commercial clause of the Constitution, and therefore does not exist."

His opinion when carefully considered, it seems to me, must be regarded as authority upon the question at issue in this case. The conclusion which he draws from the illustrations given at pages 490, 491, seems unanswerable; it at least demonstrates conclusively that Congress has no power to authorize the destruction of a navigable stream by the construction of a bridge in opposition to the will of the States interested.

At page 493 *Mr. Justice Field* further says: "Nor do I find in the previous decisions of this court any recognition of the power in Congress to authorize the construction of bridges over navigable streams, within or bordering upon the States, in the sense that its permission will justify their construction, and that without it such construction would be unlawful, excepting of course, bridges which are parts of work undertaken for national purposes."

In the *Pa. v. Wheeling etc. Bridge Co.* 18 How. 782 (59 U. S. bk. 15, L. ed. 449), referred to by *Judge Field*, *Mr. Justice McLean* says: "If under the commercial power, Congress may make bridges over navigable water it would be difficult to find any limitation of such a power. Turnpike roads, railroads and canals, might on the same principle be built by Congress; and if this be a constitutional power, it cannot be restricted or interfered with by any state regulation. So extravagant and absorbing a federal power as this has rarely, if ever been claimed by anyone. It would, in a great degree, supersede the state government by the tremendous authority and patronage it would exercise. But if the power be found in the Constitution, no principle is perceived by which it can be practically restricted; this dilemma leads us to the conclusion that it is not a constitutional power."

If Congress has the power to authorize the construction of the bridge in question across

Arthur Kill, in opposition to the will of the States of New Jersey and New York, equally it has the power to authorize the construction of a bridge across the East River between New York and Brooklyn or across the North River between New York and Jersey City in such manner as will absolutely prohibit the navigation of such water ways, regardless of the protest of the state authorities against such structures.

6. Mr. Gould in his work on Waters (p. 244) says: "The combined action of Congress and the State or States interested would legalize impediments to the right of passage over any navigable waters;" and he cites *Miller v. Mayor etc. of N. Y.* 13 Blatchf. 469; *People, Murphy, v. Kelly*, 5 Abb. N. C. 383, 440; *Baltimore etc. R. R. Co. v. Wheeling etc. Transportation Co.* 82 Ohio St. 116.

The cases cited decide that the structures involved in those cases are legal structures, not solely for the reason that they were authorized by the Acts of Congress, but also because, in each instance, such structures were authorized by the State or States interested.

7. Mr. Cooley in his work on Constitutional Limitations (p. 731) says: "States may authorize the construction of bridges over navigable waters and for railroads as well as every other species of highway, notwithstanding they may, to some extent, interfere with the right of navigation; if the stream is not one which is subject to the control of Congress, and it, while permitting the erection, cannot be questioned on any ground or public inconvenience. The Legislature must always have power to determine what public ways are needed, and to what extent the travel over one way must yield to the greater interest for another; but if the stream is one over which the regulations of Congress extend, the question is somewhat complicated, and it becomes necessary to consider whether such bridge will interfere with the regulations or not. * * * In general terms it may be said that the State may authorize such constructions, providing they do not constitute material obstructions to navigation; but whether they are to be regarded as material obstructions or not is to be determined in each case upon its own circumstances. * * * The decision of the State Legislature that the erection is not an obstruction is not conclusive; but the final determination will rest with the federal courts which have jurisdiction to cause the structure to be abated, if it be found to obstruct unnecessarily, the passage on the water."

"Parties constructing a bridge must be prepared to show not only the state authorities that the plan and construction are proper, but also that it accommodates more than impedes general commerce."

8. In the case of *Pound v. Turak*, 95 U. S. 459 (Bk. 24, L. ed. 525), the question was presented as to the validity of the Statute of Wisconsin, which authorized the construction of dams at a given point across the Chippewa River.

In delivering the opinion of the court Mr. Justice Miller says: "The principle established * * * is that, in regard to the powers conferred by the commerce clause of the Constitution, there are some which by their essential

nature are exclusive in Congress, and which the States can exercise under no circumstances; while there are others which from their nature may be exercised by the States until Congress shall see proper to cover the same ground by such legislation as that body may deem appropriate to the subject; of this class are pilotage and other port regulations * * * bridges across navigable streams * * * But to the Legislature of the State may be most appropriately confided the authority to authorize these structures where their use will do more good than harm, and to impose such regulations and limitations in their construction and use as will best reconcile and accommodate the interest of all concerned in the matter; and since the doctrine we have deduced from the cases recognizes the right of Congress to interfere and control the matter whenever it may deem it necessary to do so, the exercise of this limited power may all the more safely be confided to the local Legislatures."

9. In the case of *Gibbons v. Ogden*, decided in 1824, 9 Wheat. 203 (22 U. S. bk. 6, L. ed. 71), Chief Justice Marshall, in delivering the opinion of the court, says: "The inspection laws form a portion of that immense mass of legislation which embraces everything within the territory of a State not surrendered to the general government; all of which can be most advantageously exercised by the States themselves. Inspection laws, quarantine laws, health laws of every description, as well as laws for regulating the internal commerce of the State and those respecting turnpike roads, ferries, etc., are component parts of this mass. No direct general power over these objects is granted to Congress; and, consequently, they remain subject to state legislation. If the legislative power of the Union can reach them, it must be for national purposes; it must be where the power is expressly given for the special purpose or is clearly incidental to some power which is expressly given."

It will not be seriously contended that ferries across navigable streams are not subject to state legislation; bridges across such streams must also be subject to state legislation; a ferry might be used for the transportation of mail across a navigable stream as well as a bridge, and upon principle it seems to me that no distinction can be made between the two; and if Congress has the power to authorize the construction of the bridge in question against the will of the States interested, it also has the power to authorize the maintenance and operation of ferries between Jersey City and New York in opposition to the will of such States; but the court in the case above cited holds distinctly that ferries so located are subject to state legislation, and as suggested above at no time previous to the passage of the Act in question has Congress attempted to authorize the construction of a bridge across a navigable stream in opposition to the will of the States interested.

II. The State has not the power to authorize the obstruction of a navigable stream where Congress has acted in respect to the subject matter, even by implication. This was decided in the case of *Pennsylvania v. Wheeling etc. Bridge Co.* 18 How. 518 (54 U. S. bk. 14, L. ed. 248); in that case the State of Virginia had an-

thorized by statute the construction of a bridge across the Ohio River. Congress had previously regulated navigation upon this river by licensing vessels, etc. It was shown that the bridge as constructed interfered with the navigation of the river; and it was declared to be a nuisance and beyond the power of the State to authorize it.

In the same case reported in 18 How. 436 (59 U. S. bk. 15, L. ed. 435), it was decided that notwithstanding the bridge had been declared a nuisance by the highest court, yet Congress had the power to make it a lawful structure, and that having passed an Act to that effect, the bridge authorized by the Legislature of the State of Virginia became a lawful and legal bridge. Those were the only questions involved or decided in that case.

III. The State has the power to authorize the construction of a bridge over a navigable stream in the absence of any action by Congress in execution of the power to regulate commerce.

This was the question and the only question passed upon in the case of *Wilson v. Black Bird Creek Marsh Co.* 2 Pet. 245 (27 U. S. bk. 7, L. ed. 412). This principle was also decided in *South Carolina v. Ga.* 93 U. S. 4 (Bk. 23, L. ed. 782). The same question and no other was presented in the case of *Gilman v. Philadelphia*, 3 Wall. 713 (70 U. S. bk. 18, L. ed. 96), where the State of Pennsylvania had authorized the construction of a bridge across the Schuylkill River at the City of Philadelphia. It was conceded in that case that the bridge obstructed the navigation of the river; but it was held that in the absence of any action on the part of Congress the bridge was a lawful structure.

IV. An examination of the authorities will show:

1. That the State or States interested may authorize the obstruction of a navigable stream within their boundaries, provided Congress has not acted in the premises.

2. That any structure obstructing or affecting a navigable stream, although authorized by a State or States, may be removed or changed by authority of Congress.

3. That a structure erected across a navigable stream by authority of the State interested, although a nuisance in fact, may be legalized and made lawful by Act of Congress.

4. That a structure authorized by the State or States interested, across a navigable stream, although in fact it does not obstruct or interfere with the navigation of the stream, may be removed or changed by authority of Congress.

5. That the combined action of the State or States interested and of Congress will legalize and make lawful any obstruction to a navigable stream.

These propositions in no way conflict with the principle contended for by the complainant in this case, viz.: that Congress has not the power to obstruct and destroy a navigable water way lying wholly within the boundaries of two States under the commercial clause of the Constitution, against the will of such States.

If this be not so, then Congress has the absolute power under the commercial clause of the Constitution to obstruct the Mississippi River

or any other water way within the United States, in such manner as to make it impossible to navigate such water ways, in opposition to the will of every State adjacent thereto. It is contended that no such power exists in Congress.

V. The demurrer should be overruled and the motion for an injunction during the pendency of the action, granted.

Mr. W. W. MacFarland, for defendants:

I. It is not necessary to go further back than the case of *Pa. v. Wheeling etc. Bridge Co.* 13 How. 518 (54 U. S. bk. 14, L. ed. 249). That case decided:

1. That a State had no power to authorize a bridge over a navigable river that would obstruct navigation in a case where Congress has expressly or by implication acted in the matter, and that such a bridge would be declared a nuisance, notwithstanding a statute of the State to the contrary. The proposition is thus stated in the head note. "The Ohio is a navigable stream subject to the controlling power of Congress, which has been exercised over it; and if the Act of Virginia authorized the structure of the bridge so as to obstruct navigation, it would afford no justification to the Bridge Co."

2. In the next place it decided that the power of Congress under the commercial clause in the Constitution was, in respect to bridging navigable waters, supreme and, when exercised, exclusive; and therefore, although the court had declared the bridge in that case to be a nuisance, and had ordered its abatement, a subsequent Act of Congress, declaring it to be a lawful structure, made it so and superseded the judgment and orders of the court. The court said: "The power of Congress to regulate commerce includes the regulation of intercourse and navigation, and consequently the power to determine what shall or what shall not be deemed in judgment of law an obstruction to navigation." And in respect to the paramount authority of Congress when legislating within the orbit of its constitutional powers, the court in its first opinion uses this language: "No state law can hinder or obstruct the free use of a license granted under an Act of Congress" 18 How. 566 (54 U. S. bk. 14, L. ed. 269).

In its opinion on the effect of the Act it further said: "The Act of Congress afforded full authority to reconstruct the bridge," 18 How. 436 (59 U. S. bk. 15, L. ed. 435). "Although it may be an obstruction in fact, it is not so in contemplation of law" (18 How. 430).

In the earlier case of *Wilson v. Black Bird Creek Marsh Co.* 2 Pet. 245 (27 U. S. bk. 7, L. ed. 412), involving the same general principle, the court, speaking by *Chief Justice Marshall*, said: "If Congress had passed any Act which bore upon the case, any Act in execution of the power to regulate commerce, * * * we should feel not much difficulty in saying that a state law coming in conflict with such Act would be void."

II. The case of the *Clinton Bridge*, 1 Woolw. 150; 10 Wall. 454 (77 U. S. bk. 19, L. ed. 969), was very similar to that of the *Wheeling Bridge*. A suit in chancery was pending and ready for hearing, the object of which was to have a bridge across the Mississippi River adjudged

to be an obstruction to navigation and abated as a nuisance. In the mean time Congress had passed an Act declaring the bridge to be a lawful structure, and on this ground a motion was made to dismiss the bill, and it was granted. The whole subject is very thoroughly discussed by Judge Miller who decided the case in the circuit court. The decision was affirmed on appeal in a short opinion by Judge Nelson reaffirming the exclusive power of Congress in the premises, and the efficacy of the Act in legalizing the bridge.

III. The principle was again affirmed in *South Carolina v. Ga.* 98 U. S. 4 (Bk. 23, L. ed. 782). The case concerned an alleged obstruction to the navigation of the Savannah River under authority of an Act of Congress. It was held that the obstruction was lawful. Among other things the court says: "The power to regulate commerce comprehends the control for that purpose, and to the extent necessary of all the navigable rivers of the United States which are accessible from a State other than those in which they lie. For this purpose they are the public property of the Nation and subject to all the requisite legislation by Congress."

IV. The case of the *Pensacola Tel. Co. v. West. U. Tel. Co.* 96 U. S. 1 (Bk. 24, L. ed. 708), brought in question the validity of a state statute conferring an exclusive right to build and maintain a telegraph line in a particular locality. It was decided that the State had no such power, and that the statute was void because in conflict with an Act of Congress on the same subject.

The court reaffirms the supremacy of Congress, saying, among other things:

"The Government of the United States within the scope of its powers operates upon every foot of territory under its jurisdiction. It legislates for the whole Nation and is not embarrassed by state lines. * * * The State has attempted to regulate commercial intercourse between its citizens and those of other States. * * * It is unnecessary to decide how far this might have been done if Congress had not acted upon the same subject, for it has acted."

V. In *Newport etc. Bridge Co. v. United States*, 105 U. S. 470 (Bk. 26, L. ed. 1143), the question is again thoroughly reviewed. The subject matter was a bridge over the Ohio River between Newport and Cincinnati. The court, among other things, say: "The paramount power of regulating bridges that effect the navigation of the navigable waters of the United States is in Congress. It comes from the power to regulate commerce with foreign Nations and among the States."

VI. It has been decided that a State may, in the absence of federal legislation, permit the bridging of navigable waters within its own jurisdiction (*Gilman v. Philadelphia*, 3 Wall. 781, 70 U. S. bk. 18, L. ed. 96), the court saying, however, that: "Congress may interpose, whenever it shall be deemed necessary, by either general or special laws. It may regulate all bridges over navigable waters, remove offending bridges and punish those who shall thereafter erect them. Within the sphere of their authority both the legislative and judicial power are supreme." *Pound v. Turck*, 95 U. S.

459 (Bk. 24, L. ed. 525), was a similar case. The court says, among other things: "In the absence of legislation by Congress a statute of a State which authorizes the erection of a dam across a navigable river which is wholly within her limits is not unconstitutional."

VII. The doctrines of constitutional law laid down in the foregoing cases were again reaffirmed in the case of *Miller v. Mayor of New York*, 109 U. S. 385 (Bk. 27, L. ed. 971), which was a suit brought to restrain the erection of the East River Bridge. The case was tried below before Judge Blatchford, who decided against the plaintiff. The decision was affirmed on appeal. It was held not to impair the efficacy of the Act, that certain incidental matters were left to the determination of the secretary of war. And it declared that the action of Congress was "paramount and conclusive." The court said that all the questions presented had been finally settled by a long line of decisions, and that what the court "say in this opinion will be little more than a condensation of what was there declared."

Authorities in the support of the supreme exclusive power of Congress in this and in analogous cases might be multiplied almost indefinitely, but it would be a waste of time; the question is no longer open for discussion. It follows that when Congress, acting within its powers, says a thing may be done, and a state statute says that it shall not be done, the latter is void. It was so declared in *Wilson v. Black Bird Creek Marsh Co.*, in the *Wheeling Bridge Case*, in *Gilman v. Philadelphia*, and in *Pensacola Tel. Co. v. Florida*; and the principle is necessarily involved in all the cases. Nowhere is there a suggestion that in the case of bridges or in any other case must there be concurrent action of the State Legislature.

For all purposes navigable waters and the land under them are the "public property of the Nation."

South Carolina v. Ga. supra. See also the opinion of Judge Miller, 1 Wall. 150 (68 U. S. bk. 17, L. ed. 578).

From supplemental brief for the defendants in answer to the brief for the complainant.

The able and ingenious brief for the plaintiff presents his case in the strongest and most plausible way possible. But the premises (not altogether without support in early decisions of state courts) have long since been decided to be unsound by the Supreme Court of the United States, whose decisions are conclusive upon all questions of constitutional law. Although not stated in so many words, the fundamental proposition of the brief is that the power of Congress extends only to saying that bridges may not be built over navigable waters, and that there is no power in Congress to say what bridges may be erected; that every federal statute on the subject, no matter how strong and definite in expression, must be held to express only that Congress would not object if the consent of the State or States interested could be obtained. That state courts were in the beginning so inclined to construe the constitutional provision in question is undoubtedly true; this clearly appears by the case of the *People v. Rensselaer etc. R. R. Co.* 15

Wend. 118, cited for the plaintiff. But in this case, as in many others, the tribunal having jurisdiction to finally determine all questions arising under the Constitution has disapproved of the interpretation which would limit the power of Congress merely to giving its assent subject to the approval of the State. The supreme court has asserted for Congress the sole power, and has over and over again declared that any state law obstructing the full and efficient operation of an Act of Congress is void. State courts have, of course, accepted this interpretation as conclusive. Indeed, the court of appeals, in the case of this very bridge, has declared the rule to be settled as above stated in the following words:

"It is also proper to say that the enactment by Congress during its last session of a bill authorizing the contracting parties hereinbefore referred to, to build a railroad bridge or viaduct across Arthur Kill, has apparently removed any legal objection to such a structure, and rendered it quite certain that the connections contracted for between such parties will be made and the property sought to be obtained by this proceeding devoted to the purposes alleged in the petition."

Nothing could be more explicit nor is the decision in the *People, Murphy, v. Kelly*, 76 N. Y. 475, in conflict with what the court here say; for in that case the court say, referring to the power of Congress:

"What it authorizes may be justified upon its authority; what it forbids is necessarily unlawful" (at p. 483).

In the case of the Brooklyn Bridge, it was necessary to take for its use a large amount of land, far within the limits of the two cities, and for that purpose, state legislation was, of course, necessary. An Act of Congress authorizing a bridge does not necessarily have anything to do with the acquisition of land on the shore, or of other property necessary for its construction; and it is quite conceivable that in the absence of any general law on the subject, state legislation might be necessary for its condemnation; but with that question we are not, at present, concerned. But if it were held that the right of the State to the land under water was superior to that of the United States, it would be equivalent to holding that no bridge could be built under an Act of Congress, and we have seen that the court of appeals has decided in the case of this very bridge that such an Act gives all the authority that is required. If it were not so, it is obvious that a State might wholly nullify the provision of the Federal Constitution in question.

If, for example, a state law is essential to the legality of the structure, a repeal of that law, under a power of repeal reserved as is usual, would make it unlawful; and so after all, everything would depend upon the pleasure of the State and the ever changing views of successive Legislatures as to the State's interest. This cannot be so.

The superior right of Congress over the land under water is a necessary incident of its constitutional supremacy, and essential to its efficient exercise. For all the purposes of that constitutional power, the State is regarded as having transferred to the Federal Government, for the benefit of the people of the United

States, the interest which it held in the land under water for the benefit of the people of the State; and that interest, for all the purposes of commerce, is now held by the United States upon a larger and more comprehensive trust. That is what the court says in *South Carolina v. Ga.* (brief, p. 4, pt. 3).

The dissenting opinion of Judge Field in *Bridge Co. v. U. S.* is cited. But while not altogether approving, he admits that the question is settled for, he says:

"Yet out of this assertion of a power to legalize a structure, which, without such sanction, would be deemed an obstruction to navigation, has grown up the doctrine of an independent power in Congress to authorize the construction of bridges over navigable streams, without the permission of the States, and to control them when constructed."

In the late case of *Cardwell v. American Bridge Co.* 113 U. S. 205 (Bk. 28, L. ed. 959), Judge Field delivered the opinion of the court, and the views expressed in his dissenting opinion in *Bridge Co. v. United States*, appear to have been modified, for he says, among other things, after referring to the cases in which the plenary and controlling power of Congress is asserted: "We are entirely satisfied with the soundness of the conclusions reached." Again, referring to the States, he says: "And as to bridges over navigable streams this power is subordinate to that of Congress, as an Act of the latter body is by the Constitution made the supreme law of the land."

The opinion of the court, it will be noticed, asserts the doctrine in the strongest way.

In *South Carolina v. Ga.* 93 U. S. 4 (Bk. 28, L. ed. 782), the court says:

"It is not, however, conceded that Congress has no power to order obstructions to be placed in the navigable waters of the United States. * * * If, as we have said, the United States have succeeded to the power and rights of the several States, so far as control over interstate and foreign commerce is concerned, this is not to be doubted" (at pp. 11, 12).

In the case of the *Newport etc. Bridge Co. v. U. S.* 105 U. S. 479 (Bk. 26, L. ed. 1147), Judge Miller, in his opinion below, commences his elaborate discussion of this question with the following sentence: "If the determination of the circumstances under which a bridge may be built over a navigable stream, or the presenting of general rules for its construction and maintenance, be a regulation of commerce either with foreign Nations or among the States, then the enactment under consideration falls within the power conferred on Congress by that clause." He then goes on to show that it has been definitely settled that Congress has this power.

1 Woolw. p. 156.

But it is said, on the other side, that in many of these cases there was also the authority of the State for doing that which was contemplated. This is true, but there is no case in which the existence of that authority was regarded as a factor of any importance in the decision. Some of the cases related to structures in waters wholly within one State, as in the case of the *East River Bridge*, and of the *Esplanade Co. v. Chicago*, 107 U. S. 678 (Bk. 27, L. ed. 442), and in the case of *Gilman v. Philadel-*

phia. In all these cases, rights of a different nature from those under consideration were essential both to create corporations with corporate power to do what was purposed, and to acquire property over which Congress had no control. For these subsidiary purposes, therefore, state legislation was essential. This is well illustrated in the case of the *Clinton Bridge*. In that instance, the respective State Legislatures professed to do nothing more than to create corporations capable of building the bridge, and then in express terms left it to Congress to decide whether they might build a bridge, and what sort of a bridge it should be. Another illustration of the same principle is to be found in the case of the *Pensacola Tel. Co. v. Western Union Tel. Co.* 96 U. S. 1 (Bk. 24, L. ed. 708).

In that case, as in the case before the court, the land required had been obtained by private purchase, and it was only necessary to find a law which authorized the work. That was found in an Act of Congress, and a state statute that stood in the way of that Act was swept out of the way and declared to be void. And we know that in the great leading case of the *Wheeling Bridge* no importance at all was attached to a statute of Virginia and no force allowed to it; for in spite of that statute, the bridge was, in the first instance, declared to be a nuisance, then, before that judgment was carried into execution, came the Act of Congress which at once made it a lawful structure, the bridge obtaining its status, so to speak, wholly from that Act.

Again; whatever plausibility an argument on the lines of the plaintiff's brief might once have had, or may now have, in respect to waters wholly interstate, disappears when applied to navigable waters constituting a boundary between two States. All constitutional law is, from its very nature, exclusive when brought into exercise. Indeed, volition which is in any wise dependent upon the will of another is not power; nor is there any case in which, under the Federal Constitution, co-operative legislation on the part of a State is necessary to communicate vitality and efficiency to an Act of Congress. And in a case where, in the absence of action on the part of Congress, the State is left free to legislate, the moment Congress does exercise its superior authority, the statute of the State ceases to be operative; it remains in abeyance or becomes a nullity. Therefore, it follows, of course, as laid down in all the authorities, that when Congress, acting within its powers, declares that a thing may be done, the state statute forbidding it to be done is simply void. It will be noticed that the Act of Congress makes this bridge part of a post road, and if it were at all necessary, this provision might well be referred to as strengthening the main position and argument for the defendant. But the efficiency of the Act upon the broad general principles already mentioned seems to be too clear to call for further discussion.

Wallace, C. J., delivered the following opinion:

The complainant is a vessel owner whose business of transportation makes it necessary for him to use the narrow navigable water-

way known as Arthur Kill, which constitutes one of the boundaries between the States of New York and New Jersey. He has brought this suit to restrain the defendants from constructing a railroad bridge across these navigable waters, which they propose to build and maintain under claim of authority conferred by the Act of Congress of June 16, 1886, entitled "An Act to Authorize the Construction of a Bridge across the Staten Island Sound, Known as Arthur Kill, and to Establish the Same as a Post Road." The case is now here upon the defendants' demurrer to the bill of complaint, and upon complainant's motion for an injunction *pendente lite*.

It is not disputed that the complainant has a sufficient standing in a court of equity to challenge the right of the defendants to build the bridge; and the single question to be decided is whether they have a legal right to build the bridge. If they have, it is solely by the efficacy of the Act of Congress as a constitutional exercise of the power to regulate commerce between the several States.

The Legislature of New Jersey, by an Act passed April 6, 1886, has forbidden the erection of any bridge or structure over any part of the navigable waters where the tide ebbs and flows, separating the State from other States, without express permission given by the Legislature by statute in that behalf. The Act was passed after the bill had been introduced in Congress authorizing the construction of this bridge, and before it became a law, and was preceded by the adoption of concurrent resolutions of the Senate and House of Assembly of New Jersey protesting against any action on the part of Congress intended to legalize the erection of such a bridge.

The case thus presents the constitutional question whether Congress can lawfully confer upon a private corporation the capacity to occupy navigable waters within a State, and appropriate the soil under them, for the purposes of interstate commerce, without the consent of the State.

Although the Act of Congress establishes the bridge, when constructed as a post road, this is wholly an incidental and an unnecessary feature of the legislation. The Act does not purport to authorize the bridge in order to provide an additional post road; and the provision establishing the bridge as a post road, when built, was unnecessary, because it would become such by force of pre-existing law. Sec. 3964, R. S. U. S.

Neither does it in terms purport to be an exercise of the power to regulate commerce between the States; but that this is its essential character is apparent from the recitals which show that it was designed to afford a connection between railroads already constructed, or to be constructed, on opposite sides of the Sound. Obviously, Congress intended to plant the rights conferred on the defendants upon the validity of the Act as a regulation of commerce.

Both the language and the history of the Act preclude the doubt whether it can be construed as intended to grant a privilege which is to become operative when concurrent authority to build the bridge is obtained from the States of New Jersey and New York. It

is silent as to any such condition, and this silence is emphatic, in view of the provisions contemplating the assent of the State which have been inserted in all previous Acts of a similar character when permission by the State had not been given in advance. As it was passed notwithstanding the protest of New Jersey, which was in effect a declaration that she would not consent, it must be assumed that Congress did not regard the consent of the State necessary.

The precise question to be decided has never been adjudicated; and the present Act is the first attempt on the part of Congress to grant such a right as is asserted by the defendants.

In the language of the Supreme Court of the United States in *Müller v. Mayor of New York*:

"The power vested in Congress to regulate commerce with foreign Nations, and among the several States, includes the control of the navigable waters of the United States so far as may be necessary to insure their free navigation; and by navigable waters of the United States are meant such as are navigable in fact, and which, by themselves, or by their connection with other waters, form a continuous channel for commerce with foreign countries or among the States." 109 U. S. 395 [Bk. 27, L. ed. 975].

Whether the waters are wholly within the boundaries of a State, or, as here, lie between two States, is not material. They are navigable waters of the United States if they form, by themselves or by uniting with others, a continuous highway for commerce with other States or countries. *The Daniel Ball*, 10 Wall. 557 [77 U. S. bk. 19, L. ed. 999]; *Escanaba etc. Transportation Co. v. Chicago*, 107 U. S. 632 [Bk. 27, L. ed. 444].

The power of control over such waters necessarily includes the power of deciding what structures are impediments to commerce; and, by an unbroken line of decisions, it is settled that the paramount authority regulating bridges that affect the navigation of the navigable waters of the United States is in Congress.

So long as this authority lies dormant, the States may authorize the erection of bridges over navigable waters within their limits, which may to some extent obstruct navigation, or, by concurrent action, may bridge the waters lying between them; but, so soon as Congress intervenes and exercises its power of regulation, what has been done by state authority must give way to the paramount authority of Congress. The power of the State ends where that of the Nation begins. *Wilson v. Black Bird Creek Marsh Co.* 2 Pet. 250 [27 U. S. bk. 7, L. ed. 414]; *Pa. v. Wheeling etc. Bridge Co.* 18 How. 421 [59 U. S. bk. 15, L. ed. 435]; *Gilman v. Philadelphia*, 3 Wall. 738 [70 U. S. bk. 18, L. ed. 100]; *Mobils Co. v. Kimball*, 102 U. S. 691 [Bk. 26, L. ed. 238]; *Pound v. Turck*, 95 U. S. 459 [Bk. 24, L. ed. 525].

These decisions, however, fall short of adjudicating the present case, because they do not decide in terms that the power of regulation extends further than is required to preserve the free and unobstructed navigation of the public waters. If the power ends there, the present Act is nugatory. That it does end there never has been authoritatively determined.

The lands under the water on the New Jersey side of Arthur Kill belong to the State of New Jersey, or to those who have derived title from the State. The shores of navigable waters, and the soil under them, were not granted by the Constitution to the United States, but were reserved to the States respectively. *Potlard v. Hagan*, 3 How. 212 [44 U. S. bk. 11, L. ed. 565].

The right of eminent domain over such lands, for all municipal purposes, resides in the State within the boundaries of which they lie, and within the legitimate limitations of this right the power of the State to appropriate the shores of navigable waters, and the lands under them, is absolute. *Ormerod v. New York etc. R. Co.* 21 Blatchf. 106.

Expressions of opinions by learned jurists are found in several adjudged cases, to the effect that Congress cannot, under the power of regulating commerce, authorize the erection of bridges over navigable waters without the consent of the State, or sanction an obstruction of commerce.

In *People v. Rensselaer etc. R. R. Co.* 15 Wend. 113, Chief Justice Savage, after asserting that the power to erect bridges over such waters existed in the State Legislature before the adoption of the Federal Constitution, says:

"It is not pretended that such power has been delegated to the general government as is conveyed under the power to regulate commerce and navigation. It remains, then, in the State Legislature, or it exists nowhere. It does exist because it has not been surrendered any further than such surrender may be qualifiedly implied; that is, the power to erect bridges over navigable streams must be considered so far surrendered as may be necessary for a free navigation upon those streams."

In *People, Murphy, v. Kelly*, 76 N. Y. 475, Earl, J., says:

"The East River is a public navigable water, and to bridge it requires the concurrent authority of the State of New York and of the United States; of the former by reason of its rights in the lands on the shore, and under the water, and of its qualified sovereignty over the water; and of the latter by reason of the exclusive power of Congress to regulate commerce, and to determine in its regulation thereof to what extent navigation upon the water may be obstructed or interfered with."

In the *Wheeling Bridge Case*, Mr. Justice McLean, in considering whether Congress could legalize a bridge over navigable water within the jurisdiction of any State or States, uses this language:

"But this does not necessarily include the power to construct bridges which may obstruct commerce, but can never increase its facilities on a navigable water. Any power which Congress may have in regard to such a structure is indirect, and results from a commercial regulation. It may, under this power, declare that no bridge shall be built which shall be an obstruction to the use of a navigable water. And this, it would seem, is as far as the commercial power by Congress can be exercised. * * * If, under the commercial power, Congress may make bridges over navigable waters, it would be difficult to find any limitation of such a power. * * * So extravagant and absorbing

a federal power as this has rarely, if ever, been claimed by anyone."

In the more recent case of *Newport etc. Bridge Co. v. U. S.* 105 U. S. 496 [Bk. 26, L. ed. 1152], *Mr. Justice Field* uses this language:

"From the use of the word 'assent' to the erection of a bridge over a navigable river, or the declaring of one already erected a lawful structure, the transition has been easy and natural to the assumption of an affirmative power in Congress to authorize, independently of the action of the States, the construction of such bridges, and to control them. From the authorities cited, and the reasons assigned, it is evident that Congress possesses no such power. * * * If weight is to be given to these authorities, and to the reasons on which they rest, it must follow that the sovereignty and jurisdiction of the States over their navigable waters, which were as absolute upon the adoption of the Constitution as over their roads, still continue, except that they are to be so exercised as not to obstruct the free navigation of the waters, so far as such navigation may be required in the prosecution of interstate and foreign commerce."

It is to be remarked, however, of these observations, that what was said by *Mr. Chief Justice Savage* in the first case, and by *Mr. Justice Earl* in the second, was *obiter*, and that the views expressed by *Mr. Justice McLean* and by *Mr. Justice Field* were by way of argument in dissenting from the opinion of the court. It was not necessary in either of those cases to pass upon the point suggested.

The case of *South Carolina v. Georgia*, 93 U. S. 4 [Bk. 23, L. ed. 782], is an authority the other way. The supreme court there considered a case in which a bill was filed by the State of South Carolina against the secretary of war and other officers of the United States, to restrain them from obstructing or interrupting the navigation of the Savannah River under authority of an appropriation Act of Congress for the improvement of the harbor at Savannah. The court were of the opinion that the Acts sought to be restrained did not tend to the destruction of the navigation of the river, although, by obstructing the water way of one of its channels, navigation would be restricted to the other channel, and therefore were not in any just or legal sense a destruction or impediment of navigation. The court held that the appropriation Act conferred upon the secretary of war the discretion to determine the mode of improvement, and authorized the diversion of the water from one channel into another, if, in his judgment, such was the best mode.

Mr. Justice Strong, speaking for the court, used this language:

"It is not, however, to be conceded that Congress has no power to order obstructions to be placed in the navigable waters of the United States, either to assist navigation, or to change its direction by forcing it into one channel of a river rather than the other. It may build light houses in the bed of the stream. It may construct jetties. It may require all navigators to pass along a prescribed channel, and may close any other channel for their passage. If, as we have said, the United States have succeeded to the power and rights

of the several States, so far as control over interstate and foreign commerce is concerned, this is not to be doubted." And the *Wheeling Bridge Case* was cited as ruling that the power of Congress to regulate commerce includes the power to determine what shall or shall not be deemed, in the judgment of law, an obstruction of navigation.

This decision controls the present case. The State of South Carolina had not consented to the closing of one of the channels of her river by the authorities of the United States, and insisting that this could not be done against her consent, and asserted her rights to prevent it by a bill in equity. The question was necessarily involved whether, under the power to regulate commerce, Congress can close the channel of a river within a State against the consent of the State. The decision puts that question at rest, and is an unqualified affirmation that Congress can do so. If Congress can close a river, it can certainly bridge one. Applying the principle of that decision here, where, instead of a jetty or a light house, a bridge is the structure authorized, it follows that what Congress has sanctioned by the present Act is not an obstruction of navigation, that the judgment of Congress concludes controversy as to the fact, and that concurrent action on the part of New Jersey is not only not indispensable, but that her opposition is futile.

The argument that the rights of the State of New Jersey are ignored or invaded by permitting such a bridge to be built without her consent is purely a sentimental one. She has no control of the water way for the purposes of navigation which is not subordinate to the will of Congress. She can make no use of it against the will of Congress. The Act of Congress does not attempt to appropriate any of the property of her citizens, or to interfere with her power of eminent domain.

If the constitutional power of Congress over the navigable waters of the United States is confined to a mere negation of state authority over them, if Congress can only ratify and prohibit what the State proposes, if it has no faculty of independent action, and no vigor to originate, then, instead of being paramount, the power is practically subordinate to the power of the State. Yet it has never been doubted that, within the scope of its powers, the Government of the United States is supreme, or that its authority, when ascertained, is, to the extent asserted, of necessity exclusive.

The Constitution delegates to Congress the power to prescribe the conditions upon which commerce, in all its forms, shall be conducted between the citizens of the several States, and to adopt measures to promote its development and prosperity. Bridges over navigable waters are necessary to facilitate transportation and commercial intercourse. They are well recognized instrumentalities of commerce. The power to build them, or authorize them to be built, is an incident of the general power to regulate interstate commerce. If the national and state authorities disagree as to the expediency of bridging a river, and if, as is asserted, the power to act is partitioned between them, and can only be exercised concurrently, interstate commerce may be crippled. If Congress deems a railroad bridge necessary or useful as

an instrumentality of interstate commerce, there is no sound reason, aside from considerations of expediency, why it should not build one, or authorize a private corporation to do so. It seems idle to say that its power only extends to prohibiting the States from building such bridges, and that it can direct what bridges shall not be built, but not what shall be built. This would make the constitutional prerogative obstructive merely. Thus circumscribed, it would be ahorn of most of its value.

It is not intended to intimate that Congress can authorize the appropriation of private property for the purposes of such a bridge. It was at one time doubtful whether the Government of the United States, in order to obtain property required for its own purposes, could exercise the right of eminent domain within

the States. That question was settled in *Kohl v. U. S.* 91 U. S. 367 [Bk. 23, L. ed. 449], where it was held that the government, if such property cannot be obtained by purchase, may appropriate it upon making just compensation to the owner. It is not necessary to consider whether Congress could enable the defendants to condemn property in New Jersey for the purposes of their bridge. This has not been attempted by the Act under consideration. All that is now necessary to decide is that if the defendants acquire the right of the owners of the land under the waters and on the shores, the Act of Congress gives them lawful authority to build and maintain their bridge without the consent of the State of New Jersey.

The demurrer is sustained, and the motion for an injunction is denied.

THE INTERSTATE COMMERCE COMMISSION.

George RICE

v.

LOUISVILLE & NASHVILLE R. R. CO.*

(Answer filed August 15, 1887.)

THE answer of the Louisville & Nashville Railroad Company to the bill of complaint made by George Rice before the Interstate Commerce Commission.

The Louisville & Nashville Railroad Company, defendant in the above case, for answer to the bill of complaint filed therein, respectfully submits the following:

I. It admits that it is a corporation, incorporated and organized by and under the laws of Kentucky, and is a common carrier engaged in the business, among other things, of transportation for hire of persons and property, by a continuous shipment by means of lines of railroad, owned or operated by it (and by the South & North Alabama Railroad, between Decatur and Montgomery, which is owned and operated by the South Alabama Railroad Company), from and to the various towns and cities set out in complainant's bill of complaint except the Town of Selma, Alabama, which town is not reached thereby; and defendant further admits that one of its duties is the transportation of refined illuminating petroleum oil from Cincinnati, Ohio, and Louisville, Kentucky, to the aforesaid towns and cities; and it also admits that in the transportation of said oil to some, not all of aforesaid towns and cities, two methods are employed: one by means of box cars, carrying oil in barrel packages, the other by iron tank cars, generally holding, not 100, but sixty barrels, or over that amount.

II. Further answering defendant says it does not know, but believes that complainant, Rice, is engaged at Marietta, Ohio, or in that vicinity, in the business of producing, manufacturing and dealing in petroleum oils, and in shipping the same to various markets in the Southern and Western States of this country; but whether he has large capital or what amount of capital he has invested in said business, or whether he has extensive facilities or what facilities he has therefor, defendant does not know, nor can it speak from its belief or otherwise; but it denies that but for the alleged acts

of this defendant in complainant's said bill complained of, he would produce or sell many thousand more, or any more, barrels of such oil than he now produces and sells. Defendant admits that many of complainant's principal markets for his said manufactures are in the territory reached and traversed by this defendant's system of railway; that it is absolutely essential to the continued existence and success of his said business, that he should have rates and facilities, both reasonable in themselves and equally as favorable under similar circumstances and conditions as those accorded to his competitors for the transportation of said products to such markets; and defendant admits that many of them can only be reached by defendant's roads, but it denies that none of said markets can be as conveniently or cheaply reached by any other means, if complainant is accorded reasonable and just rates by this defendant. Defendant admits that the Standard Oil Company is a corporation, incorporated and organized under the laws of Kentucky, and that it is a very extensive dealer in and shipper of such petroleum oil; and defendant believes that said Standard Oil Company is the chief competitor of complainant for the sale thereof in the aforesaid markets.

III. For answer to the first charge made in complainant's bill and the specification thereunder, defendant says: 1. It is not true and it denies that it has been guilty of any violations of the provisions of the Act of Congress of the United States, entitled, "An Act to Regulate Commerce," approved February 4, 1887, either by making charges for services to be rendered by it as common carrier in the transportation of oil from Cincinnati, Ohio, or Louisville, Kentucky, to points on its railroad lines in States other than the States of Ohio or Kentucky, or in any other manner. 2. It admits that on May 9, 1887, and ever since that time, for services to be rendered by it in the transportation in barrel packages, in car load shipments, of petroleum oil from Louisville, aforesaid, to Mobile, Alabama, New Orleans, Louisiana, Montgomery, Alabama, Selma, Alabama, Birmingham, Alabama, Nashville, Tennessee, Memphis, Tennessee, and Clarksville, Tennessee, its charges were the respective prices set out in complainant's bill of complaint; and it also admits that each one of said towns is

*See Petition, ante, 374.

reached by its lines of road, and the South & North Alabama Railroad, except Selma, Alabama, which cannot be reached thereby; but defendant says it is not true and it denies that said rates or any of them, are unreasonably high or unjust. 3. Defendant denies that the rate or rates to all other points or to any point reached by its lines of railroad, located in any State other than Kentucky, fixed by it in its schedule, required by law to be and which has been filed with the honorable Commission, are or is unreasonable or unjust. 4. It admits that the following rates per 100 lbs. for shipment of petroleum oil in barrel packages, car load shipments, from Cincinnati, Ohio, to the following points in States other than Ohio, are the rates which appear on its tariff sheets furnished by it to complainant on May 9, 1887, as the rates then in force, and they are rates which are now in force, to wit:

Nashville, Tenn.	- - - -	25 cents
Decatur, Ala.	- - - -	50 "
Birmingham, Ala.	- - - -	59 "
Calera, Ala.	- - - -	59 "
Montgomery, Ala.	- - - -	59 "
Selma, Ala.	- - - -	59 "
Pensacola, Fla.	- - - -	45 "
Mobile, Ala.	- - - -	39 "
New Orleans, La.	- - - -	39 "

Except that the rates furnished for shipment to Nashville, Tennessee, was 28 3-4, instead of twenty-five cents, that to Pensacola was forty cents instead of forty-five cents; that to New Orleans and that to Mobile was thirty-four cents each, instead of thirty-nine cents; and defendant admits that all of said points are reached by its lines of road, except Selma, and except all points between Decatur and Montgomery, Alabama, which cannot be thus reached; but defendant says it is not true and it denies that said rates or any of them are unjust or unreasonably high.

IV. For answer to the second charge made in complainant's bill and the specifications thereunder, defendant, 1, denies that it has at any time since April 5, 1887, charged complainant for services to be rendered by this defendant in the transportation of such oils to points in States other than Ohio, reached by its lines of railroad or from Louisville, Kentucky, to points in States other than Kentucky, reached by said lines of railroad, a greater compensation than it charged said Standard Oil Company of Kentucky, for like and contemporaneous services rendered or to be rendered by this defendant for said company in the transportation of such oils for said company from said Cincinnati, Ohio, or from Louisville, Kentucky, to said points or any of them in States other than Kentucky, and denies that the shipments referred to by complainant in his said bill were made for him and for said Standard Oil Company under substantially similar circumstances or conditions.

2. It admits that the rate per 100 lbs. charged by it to complainant on May 9, 1887, and ever since, for the transportation of such oil from Louisville, Kentucky, to the respective destinations named in complainant's bill is the rate given therein, to wit:

To Montgomery, Alabama, 24 7-10 cents; Selma, Alabama, 45 7-10 cents; Birmingham,

Alabama, 45 7-10 cents; Nashville, Tennessee, 18 3-4 cents; Memphis, Tennessee, fifteen cents; and that on some oil shipped by it during that time for the Standard Oil Company, defendant charged from Louisville to said respective points per 100 lbs. the following rates, as stated in complainant's bill, to wit:

To Montgomery, thirty cents; to Selma, thirty cents; to Birmingham, thirty cents; to Nashville, fifteen cents; and to Memphis, 12 1-2 cents.

8. It further admits that its rate to complainant on May 9, 1887, and ever since for shipment of oil from Cincinnati, Ohio, to the following points, per 100 lbs. were the rates stated in complainant's bill, to wit:

To Decatur, Alabama, fifty cents; to Birmingham, Alabama, fifty-nine cents; Calera, Alabama, fifty-nine cents; Montgomery, Alabama, fifty-nine cents; Selma, Alabama, fifty-nine cents; to Pensacola, Florida, forty-five cents; to Mobile, Alabama, thirty-nine cents; and to New Orleans, Louisiana, thirty-nine cents, with the exception that the charge was and is from Cincinnati to Pensacola forty cents instead of forty-five cents, and to Mobile and to New Orleans each thirty-four cents, instead of thirty-nine cents.

And defendant further admits that during said time it was shipping some oil for the Standard Oil Company from Cincinnati, to aforesaid towns at the following rates per 100 lbs., to wit:

To Decatur, forty-six cents; to Birmingham, forty-seven cents; to Calera, forty-seven cents; to Montgomery, forty-seven cents; to Selma, forty-seven cents; to Pensacola, forty cents; to Mobile thirty-four cents; to New Orleans, thirty-four cents,—except that to Birmingham since May 11, 1887, the rates have been a little less than forty-seven cents per 100 lbs. But defendant denies that in its said rates for shipment for the Standard Oil Company and for complainant from Cincinnati and from Louisville, respectively, to aforesaid respective towns, or any of them, it discriminated in favor of the Standard Oil Company or against complainant, or that by said rates, shipped under the circumstances that said oils were respectively shipped, defendant charged complainant per 100 lbs. a greater compensation than it charged said Standard Oil Company.

3. Defendant says that all the rates for shipments for complainant made so as aforesaid from Cincinnati and from Louisville, respectively, to aforesaid respective towns, were made for shipment in barrel packages and car load shipments, and all of the rates for shipments for the Standard Oil Company so as aforesaid from Cincinnati and from Louisville, respectively, to said respective towns, were made for shipments in tank cars, cost of transportation of the shipment and risk of which is much less than the cost of transportation or shipment and the risk of the like quantity of oil in barrels; that the rate paid or to be paid as aforesaid by complainant for such shipments is the same rate per 100 lbs. neither greater nor less than was and is by defendant charged to and paid by the Standard Oil Company for shipments of oil in barrel packages and car load shipments, at the same time and from and to the same points that said shipments for complainant were made; and defendant also states

that at the same rates charged the Standard Oil Company for the shipments of its oil so as aforesaid in tank cars, from Cincinnati and from Louisville, respectively, to said several respective towns, complainant could have shipped, as he well knew, his oil in like kind of tank cars, at any time on or after the 9th day of May, 1887, and the same rates as aforesaid were offered him and published in defendant's schedules of rates furnished the honorable Interstate Commission.

4. Defendant admits that in its shipment of oil in barrels for complainant it has charged or intended to charge him for the actual weight of such oils, and has also charged or intended to charge in its shipments of oil in barrels for the Standard Oil Company for the actual weight of such oils; and it denied that it has in any shipment of oil in barrels made any difference in this respect between oil shipped for complainant and oil shipped for the Standard Oil Company.

Defendant says that as to the shipment of oil in tanks for the Standard Oil Company and everybody else, the same is not and never has been weighed, but the quantity contained in the tanks is estimated at a certain number of pounds; and it may be true that in some shipments for the Standard Oil Company that estimates were below the actual weight, but the same quantity of oil could have been shipped in the same manner at the same price by complainant.

5. Defendant denies that about May 1, 1887, it transported or contracted to transport, a car load containing sixty-six barrels of oil, and weighing 24,750 lbs., or any other weight, from Louisville, Kentucky, to Huntsville, Alabama, for the Standard Oil Company for \$68.07 or 27½ cents per 100 lbs., at least no record of such shipment can be found on defendant's books.

V. For answer to the third charge made in complainant's bill and the specification thereunder, defendant:

1. denies that in its rates charged by it for services rendered or to be rendered by it for the transportation of said oils for complainant and the said Standard Oil Company, from Cincinnati, Ohio, to points, or any point, reached by defendant's line of railroads in States other than Ohio and Kentucky it has since April 5, 1887, uniformly, or at all, made or given undue or unreasonable preferences or advantages to said Standard Oil Company, or to certain, or any, localities on its lines of railroad; nor has it subjected complainant or certain or any localities on its lines of railroad; to undue or unreasonable prejudices or disadvantages.

2. Defendant says in reference to the difference in rates to complainant and the Standard Oil Company, respectively, appearing in specifications No. 1 and No. 2, under the second charge in complainant's bill of complaint, it denies that said differences are not measured, but avers that they are, by the differences in circumstances surrounding these shipments respectively; and defendant denies that the difference to it in the cost, and expense and convenience of transportation of such oils for complainant and the Standard Oil Company, respectively, or that the difference between the circumstances under which complainant and said company respectively ship their oils

INTER 8.

do not; but it avers that they do justify the difference in rates made to said parties respectively; and it denies that they are either small or insignificant in comparison with the differences in the rates so charged; and defendant says that said rates so made for the shipment of the oils for the Standard Oil Company were made for shipment of oil to be made in large and regular shipments in iron tank cars, which tank cars were to be furnished and the cars kept in repair by said Standard Oil Company, free of expense to defendant, which oil was never on defendant's premises and there at its risk and by which cars defendant was furnished with return loads; while the rates thus made to complainant were made in reference to the shipment of oil in barrel packages in small quantities and irregular shipments, to be received and loaded by defendant at its expense, and held at its risk while on its premises, and the cars used for barrel shipments were thus greatly injured and rendered of less value to defendant for general purposes, and were returned usually empty, so that, as this defendant believes and charges, the circumstances and conditions under which the shipments of oil for the Standard Oil Company were made were so dissimilar from the circumstances and conditions under which the oil for complainant was shipped as to justify and authorize the difference in rates to said Standard Oil Company and to complainant, made so as aforesaid.

8. Defendant says it is not true and it denies that it owns or ever did own any tank cars, or that it ever furnished to said Standard Oil Company such cars, or that it refuses or ever refused to furnish such cars, to complainant, or that he ever applied for such; but defendant says if complainant had applied for such cars he would have been refused, for the reason that defendant did not and does not own or have such cars.

4. Defendant admits that it has, since April 5, 1887, in its freight rates, charged a higher rate per 100 lbs. for transportation of oil in barrels than for oil in tanks, except when the competition with water lines and railroads, or competition between markets or products has forced a reduction in rates on oil in barrels to the same, or nearly the same rates charged upon oil in tank cars; but it is not true and defendant denies that the difference between the cost, expenses and convenience of transportation of oil by the two methods has been out of proportion to the difference between the rates by the two methods, and denies that said difference in expenses, cost and convenience is slight or insignificant; but on the contrary defendant avers that they were so great as to justify, as it believes, the difference in rates charged.

5. Defendant admits that complainant ships in barrels all the oils he ships over this defendant's lines of railroad, but it is not true and it is denied that the Standard Oil Company, ships in tank cars almost all the oil which it ships over defendant's lines of railroad. Defendant says that said Standard Oil Company, since April 5, 1887, has shipped over its lines of railroad, in barrel packages, car load shipments, a much greater quantity of oil than complainant has, and at the same prices from and to the same points, and it has shipped over

its lines of railroad during that period about twice as much oil in barrels as it has shipped in tank cars.

6. Defendant admits that the rate of transportation of oil from Louisville to the following destinations are the same, whether the oil is carried in barrel packages or in tank cars, to wit: Mobile, Alabama; Meridian, Mississippi; Jackson, Tennessee; New Orleans, Louisiana; Jackson, Mississippi; Vicksburg, Mississippi; and that the rates are the same for shipments from Cincinnati to Nashville, Tennessee, and Mobile, Alabama; and such is true not as a matter of choice of this defendant, but because the competition with water lines, directly and indirectly at said points, or competition with railroad lines or between markets or products reduced the rates for shipment of oil in barrels to these points, to the regular rates for shipment of oil in tank cars.

7. Defendant admits that since April 5, 1887, it has charged for the transportation of oils from Cincinnati and from Louisville to Birmingham, Alabama; Montgomery, Alabama; Calera, Alabama; Selma, Alabama, the same freight rate in all cases to each of said points and that the distance from Cincinnati and Louisville by its road is to Calera thirty-three miles greater than to Birmingham, and to Montgomery is sixty-three miles greater than to Calera, and that oils transported over its lines of road from Cincinnati or Louisville, to Montgomery are carried through Birmingham and Calera, but not through Selma, nor is Selma on defendant's lines of railroad; but said rates were not made nor are they controlled by this defendant; the same are fixed and regulated by the competition with water and railroad lines over which defendant had and has no control, and are in and of themselves fair, just and reasonable.

VI. For answer to the fourth charge made in complainant's bill and the specifications thereunder, defendant:

1. Denies that it has since April 5, 1887, charged or received for the transportation by it of such oils from Cincinnati or from Louisville, to points reached by its lines of railroad, in States other than Ohio and Kentucky, a greater compensation in the aggregate for a shorter than a longer distance on the same line in the same direction, where the shorter was included within the longer distance, and whose transportation being under substantially the same or similar circumstances and conditions.

2. Defendant admits that the charges made by it for shipments of oil from Cincinnati and from Louisville to the various points set out in complainant's bill under this charge, and the distance to each of said points from Cincinnati and Louisville, respectively, is as given by complainant in its first and second specifications under the fourth charge in his bill, with the exception that the rate from Cincinnati to New Orleans should be thirty-four cents per 100 lbs. and to Mobile the same; and the distance from Louisville to Mobile is 670 miles, and the rates should be from Louisville to New Orleans, thirty cents per 100 lbs., to Birmingham, 45 7-10 and to Mobile, thirty cents; but defendant says that said respective shipments to said several points were made under the very dissimilar circumstances and condi-

tions as aforesaid, justifying and authorizing, as it believes, the different rates charged to the different places as aforesaid.

8. Defendant denies that any of the alleged discriminations against complainant, or the alleged unreasonably high and unjust charges against him, set out in his bill of complaint, have had any effect, or were designed to effect or to give to said Standard Oil Company a monopoly of the traffic in such oils, at the points, or at any points, reached by its lines of railroad, or to exclude complainant's products from nearly all, or any, of aforesaid points; and it denies that such alleged discriminations or charges, or both, have been made by defendant at the dictation of the Standard Oil Company; and it denies that by reason of such alleged discriminations or such alleged unjust and unreasonably high charges, or both, complainant has been injured in his business, or that thereby he has lost profits that he would otherwise have realized.

Whether complainant in all other respects than for said transportation during all or any of the time since April 5, 1887, has had ample facilities, or what facilities it has had for the transaction of a large or a profitable business in the sale of said oils in said markets, or that but for said alleged unjust and unreasonable charges, and alleged unjust discriminations, complainant would have prosecuted such with profit to himself, defendant does not know and cannot state from his belief or otherwise.

And this defendant denies that there is any other matter, cause or thing in the said complainant's said bill of complaint contained, material or necessary for this defendant to make answer unto, and which is not herein and hereby well and sufficiently answered, confessed, traversed and avoided or denied; all which matters and things this defendant is ready and willing to aver, maintain and prove, as this honorable Commission shall direct; and humbly prays to be hence dismissed with his reasonable costs and charges in this behalf most wrongfully sustained.

Baxter & Barnett, Noble & Barnett,
Solicitors.

PROCEDURE BEFORE THE COMMISSION.

LETTER of Chairman Cooley, in response to a communication expressing the desire that the Commission would come to Minnesota and there hear testimony in the case of the Boards of Trade Union against the Chicago, Milwaukee & St. Paul R. R. Co., now pending at issue, and such other cases as may have arisen in that State.

Interstate Commerce Commission,
Washington.

Ann Arbor, Aug. 16, 1887.

Dear Sir:

Your letter of the 4th inst. to the Secretary of the Interstate Commerce Commission is before me. You are doubtless right in your opinion that it would be desirable to hear the case of *The Boards of Trade Union against The Chicago, Milwaukee & St. Paul R. Co.* in the

territory where it arises. And I can see that there must be a great deal of testimony in the case. But I desire at this early day to impress upon counsel this fact: that if we are to be able to hear *at all* the cases brought before us, we must have the co-operation of counsel in saving time. We have cases now assigned for hearing which if heard on testimony taken in the ordinary way might well occupy us for six months, and these to be followed by numerous others already crowding along. In nearly every case, however, the major portion of the facts are not in dispute at all, and as to all such facts we are compelled to insist that counsel shall stipulate them in advance. We have more difficulty with this matter than with any other, counsel holding themselves aloof from each other, not trying to agree or not half trying, and then coming forward expecting to take time indefinitely in making proof of facts which are really not contested. If we had an indefinite amount of time at our disposal, they might be indulged; but as the case actually is, unnecessary indulgence to some is equivalent to denial of right to others awaiting a hearing.

In the *Boards of Trade Union Case*, the facts must be largely matters of public notoriety, and it would be altogether wrong to calculate upon taking up time to prove them by oral evidence. An agreement upon them should be all ready before we take up the case. Of course it would not be expected parties should agree upon the consequences flowing from the facts, but even as to these it is not generally necessary to go into proof as in a suit at law, for the Commission will apply its own judgment where all that is requisite in an application of ordinary common sense, and will not require or expect that evidence be adduced to show that usual results have followed.

With this letter before you I suggest that if you have charge of the case for the complainant you proceed as speedily as possible to put the facts as you understand them, and so far as you think they are indisputable, in writing, and make with the counsel for the railroad company a diligent effort to bring within the smallest possible compass the necessity for oral evidence. You can show this letter to him, and you can both understand that the Commission insists that this matter be entered upon in a spirit of mutual accommodation, as a necessity of the public service. Hitherto we have found counsel ready to act in this spirit in most cases, and in the exceptional cases nothing has been gained for any body but annoyance.

Very Respectfully Yours,
T. M. Cooley.

NEW YORK, PHILADELPHIA & NORFOLK R. R. CO.

ATLANTIC COAST LINE *et al.*

PETITION based upon allegations of violations of section 8 of the Interstate Commerce Act.

Norfolk, Va. August 10, 1887.

To the Honorable, the Interstate Commerce Commission:

The petition of the New York, Philadelphia & Norfolk Railroad Company, by R. B. Cooke, its General Passenger and Freight Agent, which road extends from Delmar, in the State of Delaware, to Cape Charles, in the State of Virginia, thence by ferry service to Norfolk and Portsmouth, in the said State of Virginia, and by traffic arrangements with the Pennsylvania Railroad Line north of Delmar to the principal cities in the East and West, respectfully represents and complains that the "Atlantic Coast Line" comprised of the Seaboard & Roanoke Railroad, Wilmington & Weldon Railroad, Wilmington, Columbia & Augusta Railroad, etc., and the "Seaboard Air Line" made up of the Seaboard & Roanoke Railroad, Raleigh & Gaston Railroad, Raleigh & Augusta Air Line Railroad, and Carolina Central Railroad, in their intercourse with the New York, Philadelphia & Norfolk Railroad Company, are violating section 3 of the Interstate Commerce Act, which reads as follows:

"That it shall be unlawful for any common carrier, subject to the provisions of this Act, to make or to give any undue or unreasonable preference or advantage to any particular person, company, firm, corporation, or locality, or any particular description of traffic, to any undue or unreasonable prejudice or disadvantage, in any respect whatsoever.

"Every common carrier subject to the provisions of this Act shall, according to their respective powers, afford all reasonable, proper and equal facilities for the interchange of traffic between their respective lines, and for the receiving, forwarding, and delivering of passengers and property to and from their several lines and those connecting therewith, and shall not discriminate in their rates and charges between such connecting lines; but this shall not be construed as requiring any such common carrier to give the use of its tracks or terminal facilities to another carrier engaged in like business."

Your petitioner avers that the New York, Philadelphia & Norfolk Railroad Company is carrying out in good faith all of the provisions of the Law referred to, and is affording all reasonable, proper and equal facilities for the interchange of traffic between its line and those of the "Atlantic Coast Line" and the "Seaboard Air Line," and is ready to receive and forward freight and passengers to and from the lines of the "Atlantic Coast Line" and the "Seaboard Air Line" without discriminating in rates and charges between said lines. The New York, Philadelphia & Norfolk Railroad Company being ready and willing to accept traffic to given points and ship it direct and protect advance charges as usual between railroad companies, accepting the same pro rate as the present connections and lines via which the traffic to and from the "Atlantic Coast Line" and the "Seaboard Air Line" is transported, which will fully appear from a copy of a telegram from F. W. Clark, General Freight Agent of the "Seaboard Air Line" and reply of your petitioner and also from rate orders issued by the "Seaboard Air Line" for traffic originating on its lines, and destined for points off and on the line of your petitioner, which traffic said lines cannot do to advantage or profitably by their water line connections, which copy and order are hereto attached, marked exhibit "A."

the point that the Company is not liable to the provisions of the said sixth section.

Respectfully Yours,
The Southern Express Company,
G. H. Tilley, Secretary."

The Southern Express Company now has the honor to submit for your consideration the following argument why it has not complied, and why it is not legally bound to comply with the provisions of the said sixth section of the Act of Congress, approved February 4, 1887, entitled An Act to Regulate Commerce:

The Southern Express Company is a corporation, duly established and existing under the laws of the State of Georgia. By the terms of its original charter it was created:

"For the purpose of carrying on the business of express forwarding from, between and to any places, all manner of parcels, goods, specie, bullion and other articles, and property animate and inanimate (except such as may be prohibited by law) and bills, notes and securities, and for the collection thereof, and of all claims and demands, and the remittance of the proceeds thereof by anticipation or otherwise, and all business similar in kind or incidental to that above described or indicated, and for conducting the business of telegraphing by means of their own telegraph lines, or those of other parties leased or otherwise possessed and occupied by them for that purpose, and for the transaction of custom house brokerage."

The charter of the Company was recently amended by an Act of the Legislature of the State of Georgia, approved December 21, 1886, the sixth section of which is as follows:

"That all the rights, privileges and franchises now possessed and enjoyed by said corporation be and the same are hereby continued of force for the said term of thirty years."

And the second section is as follows:

"That this corporation is created for the purpose and object of enabling the aforesaid incorporators, their associates and successors by the aforesaid corporate name, to engage in and carry on in the State of Georgia, and in any and all of the States and Territories of the United States and in foreign countries, where permitted, the business of carrying, and transporting and forwarding by railroads, steamboats, ships, canals, stages and other means of transportation, of goods, wares, merchandise, money, bills, notes, bullion, packages, parcels and movable valuables of any description, for delivery, collection, exchange or otherwise, over and upon such lines and routes as they may from time to time establish, and between the geographical points, places or stations at which they may from time to time establish and continue agencies; and the said Corporation is hereby invested with the powers necessary and proper for said purpose, as well as the powers incident to and appropriate to express carriers."

The Southern Express Company, as a corporation, with the powers and franchises conferred by its charter, has been doing business since 1861, and using wagons, railroads, steamboats, steamships and other vehicles of conveyance. It has always owned its own horses and wagons, but has depended to a very great extent upon railroads, steamships and steamboats owned, managed or controlled by others. It has used its own horses, wagons and

agents for receiving, collecting and delivering its traffic, and has used other companies for its transportation from points and places on their respective lines. The use of these lines has always been the subject matter of special contracts, and these contracts have been and are now different in their terms and conditions; and many of them are subject to change or complete abrogation at the will of the railroad companies. The rates and charges therefore, of this Company, are made up of an estimated reasonable allowance for the use of its own property and for the use of other lines; but the latter estimate is dependent entirely upon the terms and conditions of the special contracts respectively.

It often happens that in the forwarding and handling of this Company's business, its messengers and the property intrusted to them, will pass over several different railroads, each with a separate and distinct management, ownership and control. And it also happens that each will have a different kind of a contract with this Company for express business. One railroad company may have a contract for car space, another a contract for tonnage, and a third a contract for a percentage of the revenue from the business.

In reference to these contracts, *Mr. Chief Justice Waite*, delivering the opinion of the Supreme Court of the United States, in the case of *Express Cases*, reported in 117 U. S. 23 (Bk. 29, L. ed. 801), said: "The reason is obvious why special contracts in reference to this business are necessary. The transportation required is of a kind which must, if possible, be had for the most part on passenger trains. It requires not only speed but reasonable certainty as to the quantity that will be carried at any one time. As the things carried are to be kept in the personal custody of the messenger or other employee of the express company, it is important that a certain amount of car space should be specially set apart for the business, and that this should as far as practicable be put in the exclusive possession of the expressman in charge. As the business to be done is 'express' it implies access to the train for loading at the latest, and for unloading at the earliest, convenient moment. All this is entirely inconsistent with the idea of an express business on passenger trains free to all express carriers."

"Railroad companies are by law carriers of both persons and property. Passenger trains have from the beginning been provided for the transportation primarily of passengers and their baggage. This must be done with reasonable promptness and reasonable comfort to the passengers. The express business on passenger trains is in a degree subordinate to the passenger business; and it is consequently the duty of a railroad company in arranging for the express to see that there is as little interference as possible with the wants of the passengers."

"This implies a special understanding and agreement as to the amount of car space that will be afforded, and the conditions on which it is to be occupied, the particular trains that can be used, the places at which they shall stop, the price to be paid, and all the varying details of a business which is to be adjusted

large type of at least the size of ordinary picas; and copies for the use of the public shall be kept in every depot or station upon any such railroad, in such places and in such form that they can be conveniently inspected."

The language here is very plain; the schedules to be printed and kept for public inspection are those which any common carrier subject to the provisions of the Act has "established and which are in force at the time upon its railroad, as defined by the first section," to wit:

Sec. 1, par. 2. "The term 'railroad' as used in this Act shall include all bridges and ferries used or operated in connection with any railroad, and also all the road in use by any corporation operating a railroad, whether owned or operated under a contract, agreement or lease."

The schedule referred to is one which is made by a railroad company or a continuous line composed of several railroads owned or operated as a solid line.

It is a schedule which is entirely under the control of the management. It must plainly state the places upon the railroad under that management and contain the classification of freight in force upon the same, and copies for the use of the public must be kept in every depot or station upon the said railroad.

This Company does not own or operate any one of the railroads over which it does business. It has no control over their schedules or the classification of their freights, and has no offices or agents at many of their depots or stations. This Company is an employer of the railroads. By the rulings of the supreme court it has been excepted from the general class of the public and is permitted to make special contracts with the railroads for the transaction of its business.

The sixth section no more requires of this Company a publication of schedules of rates, fares and charges, and the classification of freight in force upon the railroads than it does of any other customer.

The only other portion of section 6 which it is deemed proper to quote, refers to joint tariffs, and it may be denominated as paragraph 6.

Sec. 6, par. 5. "And in cases where passengers and freight pass over continuous lines or routes operated by more than one common carrier, and the several common carriers operating such lines or routes establish joint tariffs or rates, or fares, or charges for such continuous lines or routes, copies of such joint tariffs shall also, in like manner, be filed with said Commission. Such joint rates, fares and charges on such continuous lines so filed as aforesaid shall be made public by such common carriers when directed by said Commission in so far as may, in the judgment of the Commission, be deemed practicable; and said Commission shall from time to time prescribe the measure of publicity which shall be given to such rates, fares and charges, or to such part of them as it may deem it practicable for such common carriers to publish, and the places in which they shall be published; but no common carrier party to any such joint tariff shall be liable for the failure of any other common carrier, party thereto, to observe and adhere to the rates, fares or charges thus made and published."

INTER S.

This part of the Act clearly refers to railroads as defined in section 1, par. 2 of the Act already cited. It refers to lines where the tracks unite; but the management, ownership or control is separate. These continuous lines of rail, although they may be separate in operation, may make joint tariffs; and if they do, then the tariffs must be submitted to the Commission. It should be particularly noted "that no common carrier party to any such joint tariff shall be liable for the failure of any other common carrier party thereto to observe and adhere to the rates, fares or charges thus made and published."

How would it be practicable for this Company to make a joint tariff between any two such railroads over which it may do its business? With one line it may have a percentage contract and with the connecting line a tonnage or a space agreement.

With one line its special contract may be in writing for a term of years, and with the other it may be verbal and liable to termination on a moment's notice.

This Company, besides, often carries traffic over several lines which do not do business with each other and do not establish between themselves joint tariffs.

And what would be the condition of the Company if it were forced to make joint tariffs over any such lines as had established them for their own operation, and one of the lines observed the tariffs and the other did not? The statute makes provisions for the protection of the innocent railroad line in such a case; but no provision is made for the protection of the express company doing business with both.

In conclusion, it is respectfully submitted that section 6 of the Act refers entirely to the rates, fares and charges of and on railroads as defined by the first section of the Act, and that this Company is not subject to its provisions.

W. S. Chisholm.

General Counsel Southern Express Company.

Re EXPRESS COMPANIES.

IN THE MATTER OF THE NATIONAL EXPRESS COMPANY.

ANSWER of the National Express Company to the demand of the Interstate Commerce Commissioners, that said Company comply with the provisions of section 6 of the Law known as the Interstate Commerce Act:

First. The "express business," transacted by the National Express Company, was not within the intent of the "Interstate Commerce Act."

The Act of Congress known as the "Interstate Commerce Act" is the first exercise of the power of legislation under subdivision 3, § 8, art. 1, of the Federal Constitution. That this Act of legislation was intended to be special, and confined to a limited field of such commerce, appears from the Act itself.

The Act in question had its inception in a resolution adopted by the Senate of the United States on the 17th day of March, 1885, as follows:

"Resolved, That a select committee of five Senators be appointed to investigate and report upon the subject of the regulation of the trans-

portation by railroad, and water routes in connection or in competition with said railroads, of freights and passengers between the several States, with authority to sit during the recess of Congress, and with power to summon witnesses and to do whatever is necessary for a full examination of the subject, and report to the Senate on or before the second Monday of December next."

In the resolution the methods of transportation to be investigated are clearly stated as those by railroad and water routes in connection or in competition with said railroads, and all other methods are necessarily excluded. The subjects of transportation are also equally clearly stated as "freights and passengers" between the several States. At that time and from the commencement of railroad transportation until now, there have at all times been four separate and distinct kinds of traffic over all the railroads and water routes of the United States, each equally well known to the whole public, and each by itself technically, individually and specifically recognized as a specialty by the public, and by numerous Acts of legislation as passenger, freight, express and mail traffic. No words in the English language are better defined than these; and the mere mention of either of them in legislative enactments has been deemed sufficient for public comprehension and judicial recognition.

Under this resolution the committee caused to be prepared, and addressed in immense numbers to all parties supposed by them to be interested in the scope of the investigation, a series of questions, so as to direct attention to the salient points under inquiry, a copy of which will be found at pages 2 and 3 of the report of the committee. Testimony (report 46, part 2), submitted to the Senate January 18, 1886, such report containing over 1,400 octavo pages of printed testimony. The foregoing report of testimony accompanied the report proper of the committee. Report (46, part 1), submitted at the same time, and containing nearly 350 printed octavo pages.

It does not appear from the reports of the committee that a single series of such questions was sent to an officer of any express company, or that the thought was entertained by the committee, that the business of such companies was within the scope of its inquiry. Hundreds of railroad men and shippers of freight were examined as to every possible subject of investigation respecting the organization, capitalization, and construction of railroads; concerning passenger and freight trains; concerning the connection and competition of railroad and water routes, and of railroads with each other; concerning every department of such competition in grain, cattle, manufactures, merchandise, minerals, etc.; concerning discriminations in rates, pools, long and short haul, rebates, commissions, the car load unit, etc., etc., but in the whole range of inquiry, and in the whole mass of testimony, not a complaint is made respecting the express traffic, not an inquiry is predicated upon it, and the attention of no witness is directed to it. In the whole report of the committee, both parts 1 and 2, the very name is not mentioned, but the undivided attention of complainants, committee and witnesses, for a period of many

months, and at sittings held at many different commercial centers, embracing the principal offices of all the Express Companies, was entirely confined to what was technically and legally known as the freight and passenger business of the railroads and water routes as conducted by railroad and water route companies.

See specially the report of the committee, part 1, pp. 2 and 3, under heads "Plan of Work Adopted," and "Importance of the Question," and a further cursory glance over the first sixteen pages of the report will show that railroads, as the method, and the passenger and freight transportation by railroads, as the subject matter of inquiry, were the sole matters intended to be embraced in their report, as they finally became the sole subjects of the Law under consideration. Of the hundreds of parties called before the committee, or from whom information was sought by the committee, all are of two classes: either 1, persons connected with and representing the railroad companies, and directing and controlling the transportation of the roads, in other words the railroad companies themselves, subsequently in the Interstate Commerce Act, designated as "Common Carriers by Railroad;" or 2, shippers by railroad of freights as generally and technically understood in railroad business.

The relation of the National Express Company being to the railroad company simply that of a forwarder as to the property in its charge, and of a passenger as to the messenger having such property personally in charge, and it having no interest as a shipper in the question of transportation of freight, and no relation to the railroad as a common carrier by it, it stood entirely outside the investigation, and neither advice nor information as to its organization or business was sought by the committee nor volunteered by it.

The debates in Congress during the pendency of the bill presented by the committee through the various stages of its progress, to its final passage, are entirely confined to the matters embraced in the report of the committee.

Nothing can be clearer, therefore, than that there were in contemplation of the Interstate Commerce Act these three things, and these only: 1, transportation of passengers and railroad freights, as a subject matter; 2, transportation by railroad, as a method; 3, transportation of such passengers and railroad freights by a railroad company, as the "common carrier by railroad" upon which, as a person, the Act was to become operative.

Second. The "express business" transacted by the National Express Company is not, in fact, embraced within the provisions of the "Interstate Commerce Act."

The Law, while covering the same subjects of transportation only as the original resolution, to wit: passenger and freight traffic, is a limitation of the original resolution, inasmuch as the methods are confined in the Law to railroads, or partly railroad and partly water, when both are used under a common control, etc.; and exclusively water lines and all other methods of transportation are excluded from the operation of the Law, and the word *prop-*

erty is occasionally used interchangeably with the word *freight*, which latter word was used in the original resolution, and exclusively throughout the whole course of the investigation of the committee. In other words, water lines, bridges and ferries connected with railroads, are considered by the Law as embraced in them, and the term "railroad" is made to cover the whole method of transportation embraced in the Law.

As the term "railroad," as defined by the Law, is made to cover the whole method of transportation affected by it, so but one class of common carrier, is embraced in the entire Law, and that a common carrier to which every provision of the Law applies. There is nowhere any discrimination that certain provisions shall apply to one class and others to another, but in every section of the Act is treated as an entirety.

Section 2 reads "That if any common carrier subject to the provisions of this Act."

Sec. 3. "That it shall be unlawful for any common carrier subject to the provisions of this Act."

Sec. 4. Same as section 3.

Sec. 5. Same as section 3.

Sec. 6. "That every common carrier subject to the provisions of this Act."

Sec. 7. "That it shall be unlawful for any common carrier subject to the provisions of this Act."

Sec. 8. "That in case any common carrier subject to the provisions of this Act."

Sec. 9. "That any person or persons claiming to be damaged by any common carrier, subject to the provisions of this Act."

Sec. 10. Same as section 6.

These are all the sections of the Act which are at all declaratory, or mandatory, or prohibitive, except possibly section 16, which also begins: "That whenever any common carrier, as defined in and subject to the provisions of this Act, shall violate or refuse or neglect to obey," etc., and they all relate to the same one class of common carrier subject to the Act as an entirety.

Now section 1 defines exactly what this common carrier is, and is as follows:

"The provisions of this Act (that is, all of its provisions) shall apply to any common carrier or carriers engaged in the transportation of persons or property wholly by railroad or partly by railroad and partly by water, when both are used under a common control, management, or arrangement for a continuous carriage or shipment," etc.

Were there any doubt that the words "control, management or arrangement" refer to the railroad and water lines themselves as a method of transportation, it is entirely set at rest by the definition of the word "railroad," as used in the last paragraph but one of the section, as follows: The term "railroad," as used in this Act, shall include all bridges and ferries used or operated in connection with any railroad, and also all the road in use by any corporation operating a railroad, whether owned or operated under a contract, agreement or lease.

As thus defined, the section reads: "The provisions of this Act shall apply to any common carrier or carriers engaged in the transportation of persons or property, * * * by

railroad, * * * in use by any corporation operating a railroad, whether owned or operated under a contract, agreement, or lease."

This definition is neither an enlargement nor restriction, nor even a definition of the term "railroad" as used in the opening paragraph of this section, so far as the method of transportation "by railroad" is concerned. It is, however, as all the subsequent sections of the Act show it to be, a complete definition of the terms "common carrier by railroad." That common carrier is to be a common carrier "by a railroad in use by a corporation operating a railroad." The preposition "by" in this connection, is not synonymous with "on," or "over," but with "through the control of." The railroad company making use of the road of another as a mere shipper, to continue or complete its transportation, or even making use of it under an arrangement for a continuous carriage with agreed division of charges, would not become liable under the Act for any act of omission or commission on a railroad, over which it hired or arranged for transportation, although as between itself and the forwarder by it, the relation of common carrier would continue from point of receipt to point of destination of property. It is not the making use of a railroad, but the having it in use, that creates the liability. To such "common carrier" owning or operating a railroad all of the sections of the Law are applicable, and to no other. Nor can they be made applicable as an entirety to any other.

The National Express Company is not a corporation. It is a simple partnership with unlimited liability of each of its members for all of its obligations; with no rights to a common seal; existing purely under the rights recognized by the common law and without statutory authority, and having no rights under statute law different from those possessed by all partnerships, except such as are given by the laws of the State of New York from considerations of public policy alike to all partnerships having seven or more members. It neither owns nor operates any railroad. As between itself and any railroad doing business with it, it is a mere shipper like the general public, and the railroad company is the common carrier. As between it and its patrons the Law justly imposes upon it the liabilities of a common carrier; but in no sense in which passengers and freight are considered in the Interstate Commerce Law, it is neither a common carrier of passengers nor freight. While it carries no passengers as such, its business is wholly done (when done at all upon a railroad) upon passenger trains, and while transporting freight in a limited sense, as a portion of its business by whatever instrumentalities it can command which will furnish the greatest dispatch, it does no business by freight trains.

The business of this Company, as defined in its articles of association ready to be produced as the Commission may require, embraced the various objects, affairs, business and undertakings of a general express business, including the purchasing, receiving, selling, insuring and forwarding on commission and for hire and otherwise of money, bullion, gold and silver coin, bank bills, drafts, bills of exchange or other property, things or freight not by law

prohibited, and such other express forwarding, commission, exchange, money and agency business as is usually done by express companies, or brokers or commission merchants.

It will be seen that a large proportion of its business is neither passenger business nor property in the sense of "freight," nor business capable of being regulated by rules simply adapted to the question of transportation; and an attempt to regulate its business by rules or regulations common with railroads, or to have a system of accounts uniform with them would be as incongruous as would be the attempt to bring the business of the postoffice into such uniformity.

If the National Express Company is embraced within this Law as a "common carrier subject to the provisions of this Act," there is not an injunction with which it can comply, to which it is not already held by the common law; not a prohibition that can be made applicable to it, that does not exist at common law. There is not a reason for enacting any of these requirements or prohibitions into statute law, that does not exist as to all persons, partnerships, companies, or corporations rendering service of any kind for hire; and there is not a new obligation or prohibition created as to it in common with railroads with which it can comply. Take for instance the last paragraph of section 8 which is perfectly intelligible when applied to a common carrier owning or operating a railroad, as follows:

"Every common carrier subject to the provisions of this Act, shall according to their respective powers afford all reasonable, proper and equal facilities for the interchange of traffic between their respective lines and for the receiving, forwarding and delivery of passengers and property to and from their several lines and those connecting therewith, and shall not discriminate in their rates and charges between such connecting lines; but this shall not be construed as requiring any such common carrier to give the use of its tracks or terminal facilities to another carrier engaged in like business."

Can anything be any more incongruous than this, as applied to the National Express Company, unless it be section 5, as follows:

Sec. 5. "That it shall be unlawful for any common carrier subject to the provisions of this Act, to enter into any contract, agreement or combination with any common carrier or carriers for the pooling of freights of different and competing railroads, or to divide between them the aggregate or net proceeds of the earnings of such railroads, or any portion thereof," etc.

Considering the Act therefore simply as a civil statute to regulate the transportation of passengers and freights by railroad, no sensible interpretation can be given to it by which the one common carrier, common to every section of the Act, can be other than the common carrier directing the business of the railroad proper, in other words the railroad organization operating the railroad; and we are driven irresistibly to the conclusion that there are only three things embraced within it, viz.:

1, transportation of passengers and railroad freights as a subject matter; 2, transportation by railroad as a method; 3, transportation of

such passengers and railroad freights by a railroad company as the "common carrier by railroad" upon which, as a person, the Act is, in fact, operative.

Third. By section 10 of the Act, a violation of any provision of it, whether of commission or omission is declared a misdemeanor, punishable by fine, which may be \$5,000 for each offense. The Act therefore is to be construed as a penal statute strictly and literally, and nothing can be assumed nor taken by way of intendment. The principle of the construction of penal statutes is too well defined to need the quotation of authorities.

1. The Act can therefore only apply to corporations (see section 1) and the National Express Company is not a corporation.

2. The Act can only apply to a party operating a railroad. See section 1.

To operate is in the language of Webster's Dictionary, "to put into or to continue in operation or activity; to work, as to operate a machine."

Who is it that has put into activity and that continues in operation and works and operates as a machine the New York Central & Hudson River Railroad?

Is it not the corporation of the New York Central & Hudson River Railroad Company, which has built the road bed and its bridges, and owns its connecting ferries, and its locomotives and all of its rolling stock, and hires all engineers and conductors and other employees and which by its own sole expenditures continues it in operation, and works and operates it as a machine, and from which as a common carrier the National Express Company hires transportation in the same manner as any other private forwarder of property?

It is too absurd for argument that anybody other than the corporation of the New York Central & Hudson River Railroad Company operates its railroad, or can by any possibility comply with the requirements of the Interstate Commerce Law applicable to the transportation of passengers and freight by such road; or that under the provisions of that Law construed as a penal statute, any other party can be construed to be the "common carrier by railroad" as to such road.

3. If the National Express Company is a common carrier within the provisions of this Act, then by penal statute it is required as now demanded by the Interstate Commerce Commission "to print and keep for public inspection schedules showing the rates, and fares and charges for the transportation of passengers and property which it has established, and which are in force at the time upon its railroad as defined by the first section of this Act."

By the rules of the construction of penal statutes the party liable at all under this provision must be liable in every particular. No party but the railroad company operating the railroad can be so liable. It is not too much to say of the National Express Company by the strict construction applicable to a penal statute that it is liable in no particular of this provision.

But if it shall be held that this paragraph although evidently intended to apply to a rail-

road company, and using language embracing the passenger and freight business of a railroad, solely applicable to such company, can by legal intentment be held to embrace an independent express company which is a mere forwarder over such road (and whose business is neither passenger nor freight) and to require a compliance also with this section by such express company; let us hold such claim up to the light of the next paragraph of section 6, as follows:

"The schedules printed as aforesaid by any such common carrier shall plainly state the places upon its railroad, between which property and passengers will be carried, and shall contain the classification of freight in force upon such railroad; and shall also state separately the terminal charges, and any rules or regulations which in any wise change, affect or determine any part of the aggregate of such aforesaid rates, and fares and charges." Every particular of this paragraph is precisely and technically applicable to a railroad company.

The whole section, including these two paragraphs, is to be construed as one; and all the requirements therein contained must by the principles of law governing penal statutes be complied with in every particular by every party liable at all under it. If the express company is liable at all, it is to comply with all the requirements which a strict construction requires of the railroad company in addition to any which may be attributed to it by any liberality of construction. Whatever schedule is required upon any railroad must be the same schedule by whomsoever furnished, as every common carrier, subject to the provisions of the Act, is to furnish the same. If the railroad company doing business by any road and the express company upon it are each to furnish schedules, they must, necessarily, be duplicated in every particular and under the same provision of the Law.

It is impossible to see how any one of these requirements can be complied with, in the letter of the Law, by the National Express Company or by any other shipper over the lines of a railroad. It can only be done by that common carrier which the railroad itself represents. Every part of the section is clear, direct, and technical, as applied to a railroad company doing business as a common carrier by its railroad and is exhausted by such application, and no liberality of construction (were liberality allowed in the construction of a penal statute) could be broad enough to embrace any common carrier disconnected from the operating of the railroad itself.

4. But the National Express Company transacts business over many lines of railroad operated by separate railroad companies and its charge is but a single charge, including collecting, transportation, expense of accompanying messenger, delivering, and all the incidental charges attending such service from any point upon all these continuous lines to any other point. How are the requirements of section 6 to be applied in common to these separate railroad companies and to the express company?

5. The same objections heretofore made to the application to the National Express Company, of the first two paragraphs of section 6,

tion 6 apply to all the other provisions of that section and also to sections 7, 8 and 9 and in fact to all provisions of the Act where the National Express Company can by any implication be held liable in common with any railroad company over whose road its business is conducted, for any act of omission or commission applicable to such railroad.

6. Any attempt therefore to make section 6 of the Act applicable to the National Express Company, must be through a construction by the Commission by which they shall seek to require from the Express Company so far as in their judgment the nature of its business will permit a schedule conforming as nearly as practicable in principle to that required by the section from the railroad company, but such breadth of construction would be practical legislation, even as applied to a civil statute and certainly will not be entertained in the application of a penal statute. The National Express Company must comply with the provisions of the section and with each and all of them under a strict construction or not at all.

Fourth. The preparation of a tariff or schedule (such as contemplated by section 6 in its application to railroad companies), defining the charges for railroad transportation as between the National Express Company and its customers, as to whom alone the Express Company has any relation as common carrier, is an impossibility. Transportation on railroads or otherwise is but an incident in the business of the National Express Company. The payment to the railroad company is in gross for the entire business of the Express Company over its road, and is easy of calculation as between them, but it is impossible of distribution to the individual customers of the Express Company throughout the diversified business, as to some of which the charge for service is principally on account of transportation, on others principally on account of value, on others principally for commission, on others charges for collection, etc. In fact the National Express Company has nothing to do with the transportation of passengers nor freight. The messengers of the company bear about the same relation to the passenger business of the railroad, both as to number and classification as passengers, that the property carried by it does to the freight business as to volume and to its classification as freight. The messengers are not in the sense of the Law passengers, nor the packages, valuables, collections, and the various matters of brokerage and commission in their charge, freight.

If Henry Wells traveling from Albany to Detroit in the inception of the express business, with a valise in his personal care, containing the entire express business of his day between these localities, was a common carrier of passengers and freight by railroad or by steamboat, or by stage, whatever conveyance he may have availed himself of, then it may be claimed that the express company which is the outgrowth from him is in the same sense such common carrier. The business in its nature and essence remains unchanged. The same elements enter into the charge for service now as then. It is the personal care, the despatch necessary in matters of banking and business generally, the valuable

letter of inquiry, ver, that the real y be stated thus: clude those doing ves common car- having the attri- rers of those car- n, exclusively, the

es, and the express en established in and—the existence elations to the peo- : as extensive, and t Congress as mag- itoffice. The Gov- had for years been panies throughout he Adams Express and arrangements the nature of the

business, and also of its relationship to the lines of transportation with which it bargained.

Various Acts of Congress, some of them years ago, had recognized express companies and their peculiar species of service—"so distinct and marked in its character," in the words of *Mr. Justice Miller*.

Nearly a year before the Interstate Commerce Act was adopted, the radical distinction and antagonism between railroads and express companies came before the Supreme Court of the United States in a broad and searching inquiry. A number of cases were elaborately argued and decided; and in these cases, not collaterally, but directly, as the point in judgment, were involved provisions both of constitutions and of statutes wherein are found near equivalents, *mutatis mutandis*, of those now in question, in respect of the application to express companies and to the express business of language descriptive of railroad rates, freight, transportation, etc.

The court emphasized in various forms the wide distinction, in law and in fact, between railroad companies and companies or individuals doing express business; and also clearly distinguished between those carrying on express business and shippers or freighters in general.

These cases, and the judgments pronounced in them, attracted wide attention; and one leading member of the Senate had part in their argument in the supreme court, as he had at the circuit, and afterwards participated as senator in the discussions which preceded the enactment of the Interstate Commerce Act.

In the presence of these facts, if the Congress did not use apt or sufficient terms to embrace express companies—if, on the other hand, language was used which, read by the light of these then recent and conspicuous judicial discussions, would plainly fail to embrace express companies, it would seem hardly possible to ascribe to the law making power an intention to deal with them. Such a conclusion will be even more difficult, if substantial and effective provisions of the Act, and the scheme of the Act itself, are found incapable of certain, practical or intelligent adaption to those who have no ownership or control of any railroad or line of transportation, or of any boat or vehicle by which it is traversed, or of the time, speed, frequency or circumstance of the movement, of its management, or of the rates of fare or freights established for it.

The Adams Express Company is thus destitute of ownership, power and control; and it may also be safely said that no express company whatever, as such, owns or operates a railroad.

Looking at the statute without the aid of these considerations, or of any canon of construction, it is obvious that express companies are nowhere named, or in terms referred to. If they are included at all among those whom the Act visits, it must be because, and solely because, they belong to the class of carriers described and referred to in so many words in several sections.

Whether they do so belong depends wholly upon who they are, what they are, in fact and in law, and how they stand related to or di-

vorced from the instrumentalities, transactions and powers which the Act regulates.

In the *Express Cases* as reported (117 U. S. 1, Bk. 29, L. ed. 791), and still more fully in the records of those cases, appears the nature of the express business, and also the relations, legal and actual, which those who conduct it hold to railroads and to other common carriers, and also to the public. (It is proper to resort to these records, and it will be proper to lay them before the Commission, should there be occasion to do so, and to explain them orally if required.)

The Adams Express Company has no charter, franchise or right to take tolls, or to run or operate any railroad or transportation route. It is not the creature of the State, nor is it the recipient of any grant or other thing from the State. It is a mere firm of individuals. There are a few isolated instances elsewhere in the United States of incorporated express companies. If, however, any effect be deducible from this distinction, the company in hand must be treated by itself and as it is.

It owns no railroad, or line, or link of transportation. It has no more power over the fares, or freights or charges, or management of any line of freight or travel, than any other mercantile firm, or shipper or passenger.

It is not even a shipper or passenger in the legal sense, as the supreme court has decided.

It is a contractor with railroads, and steamboats and steamships in this country and in other countries, for the carriage of its messengers, and, in the custody of its messengers, of money, valuables and securities, and also of property usually of small bulk and incapable of enduring the handling and risks of freight. The packages thus treated are not received or transported by railroads on account of or in virtue of their obligations as common carriers. Railroads are free, as the supreme court has declared, to refuse the service; and when performed it is at the mere volition of the railroads, and under stipulations exempting them from all risks, and binding them to nothing beyond hospitality in their cars for the express messenger with his packages in his charge.

The haul or transportation of express parcels over the railroad or by the ship performing that service does not constitute the business, nor even the chief factor of the business of the express company.

This is only one of the elements of its service; and for even so much it is, as already stated, a mere suitor of the railroads. So special, and unlike freighting or shipping, is the thing it does, that except by voluntary and previously obtained consent, and under charges previously agreed upon, it cannot enter a railroad car or put a parcel into it.

Under these agreements in proof before the supreme court, how much is paid by the express company for the railroad carriage of any parcel, or of all the parcels despatched, on any train or on any day, is wholly matter of accident. A certain cubic space, or a certain number of pounds is paid for absolutely, whether there be more or less, or anything to be carried. If on a particular day the express has many commissions, or parcels, or bonds, or large sums of money committed to it, then the sum

actual distance which packages or parcels are carried, is not the same, except by accident, in the case of any two parcels.

It also appeared that even the charges paid by the express company to railroads, are not based, as in case of freight, on bulk and weight, but largely on the values handled; and that the handling of money itself—a species of property not covered by the bailment of a common carrier—makes up a large proportion of the express business. In this connection the fact is also significant that express parcels are frequently sent by trains not stopping at the destination and are sent back by way trains—thus requiring duplicate transmission.

The varied offices done and covered by the rates and charges of the express company, were somewhat fully displayed before the supreme court.

The following examples of the nature of the business done were put in evidence:

First. It includes making affidavits and giving bonds to clear goods at custom houses, both on the frontier and at seaports. These duties can not lawfully be performed by a railway corporation "for a corporation aggregate cannot take upon itself an oath" nor otherwise fulfill the requirements of the customs Acts, as it is not authorized so to do.

Alabama v. Oaks, 37 Ala. N. S. 694; 10 Coke, 326; 1 Bl. Com. 477.

Second. It includes the carriage of property from the custom houses and places of business and residences of consignors to a railway station, and transferring them from a railway station and delivering them at the residences and places of business of the consignees, and guarantying the owner against loss or damage while so in transit off the lines of railway. This intermediate service cannot lawfully be required from or performed by a railway company, nor can it lawfully give such continuing guaranties.

American etc. Express Co. v. Wolf, 79 Ill. 430; *American etc. Exp. Co. v. Robinson*, 72 Pa. 274; *Thomas v. Boston etc. R. R. Corp.* 10 Met. 477; *Witbeck v. Holland*, 45 N. Y. 17; 55 Barb. 443; *Hoagland v. Hannibal etc. R. R. Co.* 39 Mo. 451; *St. Joseph v. Saville*, 39 Mo. 460; *People v. Chicago etc. R. R. Co.* 55 Ill. 95.

This point was illustrated in *Mayor v. Macon etc. R. R. Co.* 7 Ga. 221, in which it was held that a railroad company having the exclusive right to transport goods, wares and merchandise from Atlanta to Macon had no right to engage in the business of transporting produce through the City of Macon, across the Ocmulgee Bridge, from its own railroad depot to another railroad depot, for the accommodation of its customers.

See also *Abbott v. Baltimore*, 1 Md. Ch. 542.

Third. It includes the receipt at the treasury, the subtreasuries, and the mints, of millions of money, and conveying the same to the railways and subsequently conveying the same to other subtreasuries and guarantying the safety thereof, both on and off the railway lines, which guaranty a railway company cannot lawfully give.

Fourth. It includes the indorsement of negotiable commercial paper, and the consequent assumption of all the liabilities of an indorser, INTER 8.

which liabilities a railway company, certainly outside of paper connected with its own internal affairs, cannot lawfully assume.

Byles, Bills, 62; *Bateman v. Mid Wales R. Co.* L. R. 1 C. P. 499.

Fifth. It includes the transportation of such paper and of its proceeds, which transportation a railroad company is under no obligation to perform, has no lawful right to perform, or no lawful right to monopolize, if it has a right to perform.

Citizens Bank v. Nantucket Steamboat Co. 3 Story, 51.

Sixth. It includes the collection of indebtedness of every kind, and the safe remission of the proceeds—a service which a railway company has no lawful right to perform.

Collender v. Dinsmore, 55 N. Y. 200.

In *Bland v. So. E. Co.* 1 Hughes, 345, the court said:

"It is not the custom of railroad companies to receive drafts or bills of exchange for collection at all, nor even drafts for the value of the particular shipments on which they are drawn, or to hold the goods or produce until these drafts are paid. Such a proceeding would be foreign to the business of railroad companies; is never allowed by them; is generally impracticable in itself, and is wholly unknown in practice. There are many reasons why this proceeding could not obtain. * * * It would have been vain, idle, and preposterous to have endeavored to induce the railroad company to agree to hold their produce until the drafts for its value were paid. That would have been foreign to the usage of the railway company, probably impracticable in itself, and a sort of engagement which the company could not consistently with its modes of transportation, its interests and its principles of business, make with any customer."

Seventh. It includes the protesting of negotiable paper at the proper time, and the giving of notice to the proper parties, a service which a railway company has no legal right to perform.

Knapp v. U. S. etc. Express Co. 55 N. H. 348; *Whitney v. Merchants etc. Express Co.* 104 Mass. 152; *Palmer v. Holland*, 51 N. Y. 416; *American Express Co. v. Haire*, 21 Ind. 4.

Eighth. It includes the payment of negotiable paper by telegraphic order, the transportation thereof to the owner, and the return of the money to the place of payment, a service which a railroad company is not legally competent to perform.

Ninth. It includes the receipt and transmission of moneys for investment in designated articles and the return of the articles when purchased, a service which a railway company has no lawful right to perform.

Tenth. It includes the giving of a through bill of lading by a responsible carrier, covering connecting steamboat and railway lines, which through bill a railway company cannot lawfully give as against its bondholders and stockholders having prior rights and contesting the legality of such bills.

An incident of the business of the Adams Company—and only an incident, though large and indispensable—is the employment of vari-

of such aforesaid rates and fares and charges." It is because "such schedules shall be kept in every depot or station upon any such railroad"—which is to say kept by the Adams Express Company on its railroad.

Contemplating the doing of such violence to such language with its context is certainly calculated to remove the caution and hesitation with which this examination of the subject was undertaken. These provisions are fundamental, essential and central. They are inwrought with the entire framework. The whole scheme of the Act depends largely upon them. Unlike some of the prior sections, this one cannot be discarded or held inapplicable, and still leave substantive parts of the Act to operate upon the express company as itself a common carrier with whom the Act deals.

It seems too plain for argument that neither in letter nor in spirit can such requirements be legally construed as having any relation whatever to a copartnership hiring transmission by rail of its own messengers and of money and special packages, having no other connection with any railroad, and as destitute of right or power to control any railroad or its doings as a spectator on the shore is destitute of commandment over the tides.

Possessed of no such schedules, or of information enabling it to make them; having no such rates, fares or charges; in possession or management of no railroad or train; having no such "places upon its railroad" or upon any railroad or highway; being naked of faculty to classify freight upon any railroad, or to meddle with terminal charges; a mere passenger or visitor in any railroad depot, and having no such thing of its own the express company would seem to be, if any individual firm or association can be, a person to or of whom such mandates do not and cannot speak.

Manifestly, the schedules required are the schedules of the railroad—not the schedules of anybody else—especially not of the customers of the road.

Manifestly, too, the schedules are not to be dual, diverse or various, but the schedules,—the only ones, the authentic exhibit of the prescribed items, as a time table is such an exhibit, however many copies of it may be issued or posted up.

It is expressly declared that the rates, fares and charges established and published by the required schedule, shall be absolutely the whole compensation demanded or received "for the transportation of passengers or property, or for any service in connection therewith." That this does not and cannot include or admit any charges for services done off the line or road is certain; and thus the schedule exacted and prescribed is one on which there is no place for 60 per cent of the actual business and transactions of the express company.

Indeed, it is not too much to say that if section 6 applies to the express company it lays the express business under a ban, and virtually prohibits and destroys it. It does so by confining the rates and charges to be paid exclusively to railroad transportation, and then positively prohibiting, and, in connection with subsequent sections, punishing all other charges "for any service in connection" with the property transported. This, of course, is

tantamount of saying that it shall be unlawful to charge for gathering parcels beforehand, or delivering them at the scattered places beyond the railroad terminus to which they are addressed, or for any of the numberless varieties of other services incident to the business.

No such chance medley of incongruities can be imputed to this provision. It is relieved of all challenge of its intelligence and foresight by being left to operate upon those whom its requirements fit, and to whom they were adapted.

In most of the subsequent sections are found persuasive indications that express companies are utter strangers to the object and purpose of the Act. Section 7 relates to matters wholly within the province of railroad corporations, and wholly beyond and alien to the province of express companies.

Other sections contain regulations touching reports to be made relative, among other things, to "franchises;" others authorize prescribing for the carriers intended "a uniform system of accounts, and the manner in which such accounts shall be kept." These and various other provisions consist with the idea that they relate to railroads—so understood they are reasonable; but stretched to cover express companies, they become impracticable and irrational.

From all this, and much else that might be added, the conclusion appears irresistible that the object as well as the meaning of the Law is to visit those primarily engaged in transportation of persons and property; and that it is not intended, after "regulating" them, to reach beyond and regulate their customers and employers.

Any other theory affords no test or limit to the scope or measure of the Law's operation. If it extends to employers of railroad corporations, does it not encompass all such employers? If not all, how many, and what kind and classes of employers does it reach? What is the criterion of its province in this regard?

Those described in the Act are corporations created or authorized by positive law—they have been endowed with the power to exercise the right of eminent domain, the right to exact tolls, and the like. Without these grants and franchises, they could not legally build or operate their highways, or demand compensation for their use.

Not so the express company.

It is an individual, or association of individuals. Each constituent has, and all the constituents have, the right, inherent in every unit of society under our institutions, to select and pursue his or their occupation, provided it be lawful, at pleasure.

The express company, as may again be repeated, is not created by law. It receives nothing from the State. It neither owns nor operates a highway. It is not sustained by statutory toll, or empowered to take toll. Its existence depends on contracts with others, and its compensation depends on contracts, and not as in the case of railroads on charter right to fix and exact compensation.

Regulating corporate tolls is regulating the exercise of corporate power, against which, unless so regulated, the public is helpless.

Regulating express charges is regulating a

portation by railroad, and water routes in connection or in competition with said railroads, of freights and passengers between the several States, with authority to sit during the recess of Congress, and with power to summon witnesses and to do whatever is necessary for a full examination of the subject, and report to the Senate on or before the second Monday of December next."

In the resolution the methods of transportation to be investigated are clearly stated as those by railroad and water routes in connection or in competition with said railroads, and all other methods are necessarily excluded. The subjects of transportation are also equally clearly stated as "freights and passengers" between the several States. At that time and from the commencement of railroad transportation until now, there have at all times been four separate and distinct kinds of traffic over all the railroads and water routes of the United States, each equally well known to the whole public, and each by itself technically, individually and specifically recognized as a specialty by the public, and by numerous Acts of legislation as passenger, freight, express and mail traffic. No words in the English language are better defined than these; and the mere mention of either of them in legislative enactments has been deemed sufficient for public comprehension and judicial recognition.

Under this resolution the committee caused to be prepared, and addressed in immense numbers to all parties supposed by them to be interested in the scope of the investigation, a series of questions, so as to direct attention to the salient points under inquiry, a copy of which will be found at pages 2 and 3 of the report of the committee. Testimony (report 46, part 2), submitted to the Senate January 18, 1886, such report containing over 1,400 octavo pages of printed testimony. The foregoing report of testimony accompanied the report proper of the committee. Report (46, part 1), submitted at the same time, and containing nearly 250 printed octavo pages.

It does not appear from the reports of the committee that a single series of such questions was sent to an officer of any express company, or that the thought was entertained by the committee, that the business of such companies was within the scope of its inquiry. Hundreds of railroad men and shippers of freight were examined as to every possible subject of investigation respecting the organization, capitalization, and construction of railroads; concerning passenger and freight trains; concerning the connection and competition of railroad and water routes, and of railroads with each other; concerning every department of such competition in grain, cattle, manufactures, merchandise, minerals, etc.; concerning discriminations in rates, pools, long and short haul, rebates, commissions, the car load unit, etc., etc., but in the whole range of inquiry, and in the whole mass of testimony, not a complaint is made respecting the express traffic, not an inquiry is predicated upon it, and the attention of no witness is directed to it. In the whole report of the committee, both parts 1 and 2, the very name is not mentioned, but the undivided attention of complainants, committee and witnesses, for a period of many

months, and at sittings held at many different commercial centers, embracing the principal offices of all the Express Companies, was entirely confined to what was technically and legally known as the freight and passenger business of the railroads and water routes as conducted by railroad and water route companies.

See specially the report of the committee, part 1, pp. 2 and 8, under heads "Plan of Work Adopted," and "Importance of the Question," and a further cursory glance over the first sixteen pages of the report will show that railroads, as the method, and the passenger and freight transportation by railroads, as the subject matter of inquiry, were the sole matters intended to be embraced in their report, as they finally became the sole subjects of the Law under consideration. Of the hundreds of parties called before the committee, or from whom information was sought by the committee, all are of two classes: either 1, persons connected with and representing the railroad companies, and directing and controlling the transportation of the roads, in other words the railroad companies themselves, subsequently in the Interstate Commerce Act, designated as "Common Carriers by Railroad;" or 2, shippers by railroad of freights as generally and technically understood in railroad business.

The relation of the National Express Company being to the railroad company simply that of a forwarder as to the property in its charge, and of a passenger as to the messenger having such property personally in charge, and it having no interest as a shipper in the question of transportation of freight, and no relation to the railroad as a common carrier by it, it stood entirely outside the investigation, and neither advice nor information as to its organization or business was sought by the committee nor volunteered by it.

The debates in Congress during the pendency of the bill presented by the committee through the various stages of its progress, to its final passage, are entirely confined to the matters embraced in the report of the committee.

Nothing can be clearer, therefore, than that there were in contemplation of the Interstate Commerce Act these three things, and these only: 1, transportation of passengers and railroad freights, as a subject matter; 2, transportation by railroad, as a method; 3, transportation of such passengers and railroad freights by a railroad company, as the "common carrier by railroad" upon which, as a person, the Act was to become operative.

Second. The "express business" transacted by the National Express Company is not, in fact, embraced within the provisions of the "Interstate Commerce Act."

The Law, while covering the same subjects of transportation only as the original resolution, to wit: passenger and freight traffic, is a limitation of the original resolution, inasmuch as the methods are confined in the Law to railroads, or partly railroad and partly water, when both are used under a common control, etc.; and exclusively water lines and all other methods of transportation are excluded from the operation of the Law, and the word prop-

erty is occasionally used interchangeably with the word *freight*, which latter word was used in the original resolution, and exclusively throughout the whole course of the investigation of the committee. In other words, water lines, bridges and ferries connected with railroads, are considered by the Law as embraced in them, and the term "railroad" is made to cover the whole method of transportation embraced in the Law.

As the term "railroad," as defined by the Law, is made to cover the whole method of transportation affected by it, so but one class of common carrier, is embraced in the entire Law, and that a common carrier to which every provision of the Law applies. There is nowhere any discrimination that certain provisions shall apply to one class and others to another, but in every section of the Act is treated as an entirety.

Section 2 reads "That if any common carrier subject to the provisions of this Act."

Sec. 3. "That it shall be unlawful for any common carrier subject to the provisions of this Act."

Sec. 4. Same as section 3.

Sec. 5. Same as section 3.

Sec. 6. "That every common carrier subject to the provisions of this Act."

Sec. 7. "That it shall be unlawful for any common carrier subject to the provisions of this Act."

Sec. 8. "That in case any common carrier subject to the provisions of this Act."

Sec. 9. "That any person or persons claiming to be damaged by any common carrier, subject to the provisions of this Act."

Sec. 10. Same as section 6.

These are all the sections of the Act which are at all declaratory, or mandatory, or prohibitive, except possibly section 16, which also begins: "That whenever any common carrier, as defined in and subject to the provisions of this Act, shall violate or refuse or neglect to obey," etc., and they all relate to the same one class of common carrier subject to the Act as an entirety.

Now section 1 defines exactly what this common carrier is, and is as follows:

"The provisions of this Act (that is, all of its provisions) shall apply to any common carrier or carriers engaged in the transportation of persons or property wholly by railroad or partly by railroad and partly by water, when both are used under a common control, management, or arrangement for a continuous carriage or shipment," etc.

Were there any doubt that the words "control, management or arrangement" refer to the railroad and water lines themselves as a method of transportation, it is entirely set at rest by the definition of the word "railroad," as used in the last paragraph but one of the section, as follows: The term "railroad," as used in this Act, shall include all bridges and ferries used or operated in connection with any railroad, and also all the road in use by any corporation operating a railroad, whether owned or operated under a contract, agreement or lease.

As thus defined, the section reads: "The provisions of this Act shall apply to any common carrier or carriers engaged in the transportation of persons or property, * * * by

railroad, * * * in use by any corporation operating a railroad, whether owned or operated under a contract, agreement, or lease."

This definition is neither an enlargement nor restriction, nor even a definition of the term "railroad" as used in the opening paragraph of this section, so far as the method of transportation "by railroad" is concerned. It is, however, as all the subsequent sections of the Act show it to be, a complete definition of the terms "common carrier by railroad." That common carrier is to be a common carrier "by a railroad in use by a corporation operating a railroad." The preposition "by" in this connection, is not synonymous with "on," or "over," but with "through the control of." The railroad company making use of the road of another as a mere shipper, to continue or complete its transportation, or even making use of it under an arrangement for a continuous carriage with agreed division of charges, would not become liable under the Act for any act of omission or commission on a railroad, over which it hired or arranged for transportation, although as between itself and the forwarder by it, the relation of common carrier would continue from point of receipt to point of destination of property. It is not the making use of a railroad, but the having it in use, that creates the liability. To such "common carrier" owning or operating a railroad all of the sections of the Law are applicable, and to no other. Nor can they be made applicable as an entirety to any other.

The National Express Company is not a corporation. It is a simple partnership with unlimited liability of each of its members for all of its obligations; with no rights to a common seal; existing purely under the rights recognized by the common law and without statutory authority, and having no rights under statute law different from those possessed by all partnerships, except such as are given by the laws of the State of New York from considerations of public policy alike to all partnerships having seven or more members. It neither owns nor operates any railroad. As between itself and any railroad doing business with it, it is a mere shipper like the general public, and the railroad company is the common carrier. As between it and its patrons the Law justly imposes upon it the liabilities of a common carrier; but in no sense in which passengers and freight are considered in the Interstate Commerce Law, it is neither a common carrier of passengers nor freight. While it carries no passengers as such, its business is wholly done (when done at all upon a railroad) upon passenger-trains, and while transporting freight in a limited sense, as a portion of its business by whatever instrumentalities it can command which will furnish the greatest dispatch, it does no business by freight trains.

The business of this Company, as defined in its articles of association ready to be produced as the Commission may require, embraced the various objects, affairs, business and undertakings of a general express business, including the purchasing, receiving, selling, insuring and forwarding on commission and for hire and otherwise of money, bullion, gold and silver coin, bank bills, drafts, bills of exchange or other property, things or freight not by law

cars is only about 20,000 to 28,000 lbs., or only about one half of that of the other cars.

The fresh meat shipments require special despatch, while the cured meats can be transported as ordinary freight, and when unloaded the refrigerator cars have to be returned promptly, and frequently without return load.

The refrigerator cars in which the fresh meat is carried belong to the petitioners and other shippers; and for their use the Railroad Company pays three fourths of one cent per mile run, which rate is onerous and burdensome on the Railroad Company, and is very profitable to the owner of the car.

The Railroad Company is a common carrier, not only of the contents of the car, the value of which per pound is in excess of that of meat provisions per pound, but also of the car, which is worth twice as much as an ordinary freight car. The Railroad Company's risk as a common carrier is, therefore, much greater on this class of shipments, and the release referred to in the petition relieves the Railroad Company only from responsibility for the refrigeration of the contents of the car.

5. Respondent neither admits nor denies the correctness of the tables contained in paragraph 7 of the petition, showing the rates charged on southern and southeastern roads; but leaves the petitioners to proof of their correctness, if the facts therein contained are deemed material. The respondent, however, denies that the rates charged by those roads have any bearing upon the question at issue, or that they can be considered in deciding the question whether the rate charged by the respondent from Chicago to Baltimore is a just and reasonable rate.

Respondent denies the correctness of the inference sought to be drawn by the petitioners from the rate of sixty cents per 100 pounds on dressed hogs in common cars established by special joint tariff No. 50 issued February 1, 1887. That rate was established as a just and reasonable one, in view of the fact that the capacity of a common car loaded with dressed hogs is only about 20,000 pounds. When, however, after that rate was established it became necessary to fix a rate for dressed hogs in refrigerator cars, it was thought unjust to charge more for dressed hogs than the rate already established for dressed beef and sheep in refrigerator cars, which was sixty-five cents per 100 pounds. So far, therefore, from showing that five cents per 100 pounds has been established by the published tariffs as the reasonable advance for transporting meat in refrigerator cars, over the rate for transporting the same meat in common cars, this instance cited in the petition shows rather that the rate of sixty-five cents per 100 pounds on dressed beef, sheep and hogs in refrigerator cars is too low, in comparison with the rates charged on other meat products, fresh and cured.

6. The respondent denies the existence of any such practice as that stated and alleged in paragraph 8 of the petition; and denies any knowledge that the shipments therein alleged of meat provisions and other products in refrigerator cars at the rate of thirty cents per 100 pounds were ever made over its railroad; and the respondent states, upon information and belief, that if such shipments were ever

made over any railroad between Chicago and the eastern seaboard, they were made as a special and exceptional accommodation to the petitioners, in order that their refrigerator cars might not lie idle.

This respondent again denies that it has ever carried any shipment of dressed meat, sheep and hogs for the petitioners between the City of Chicago, or the Union Stock Yards, and the City of New York.

7. The respondent denies that the present rates demanded by it for the transportation of dressed beef, sheep and hogs, subject that particular description of traffic to an unjust and unreasonable disadvantage, or that any of the facts set forth in the petition go to show the existence of any such unjust and unreasonable disadvantage. There is no competitive relation between dressed beef, sheep and hogs, and meat provisions; and the market price of the petitioners' dressed beef, sheep and hogs is in no way affected by the transportation rate on meat provisions. So far from the traffic of the petitioners suffering from an unjust and unreasonable disadvantage, respondent states that, although, as is shown by the table in paragraph 4 of the petition, the transportation charge on dressed beef, sheep and hogs has frequently, for months at a time, been much lower than the present rate; yet at no time has any corresponding reduction been made in the price of their dressed beef, sheep and hogs to the consumer or retail dealer on account of such reduction in the transportation charge.

On the contrary, the transportation charge has not, and does not, affect the market price of those articles, as it certainly would do if it were, as the petitioners allege, an unjust and oppressive charge.

Wherefore, respondent prays that the petition in this matter be dismissed.

The Baltimore & Ohio Railroad Company, by

Samuel Spencer, Vice President.

John K. Cowen,

Counsel for respondent, Baltimore & Ohio Central Building, Baltimore, Maryland.

State of Maryland, } ss.
County of Garrett,

Samuel Spencer, being duly sworn, on oath says that he is the Vice President of the Baltimore & Ohio Railroad Company, the above named respondent; that he has read the foregoing answer and knows the contents thereof, and that the same are true.

Subscribed and sworn to before me this fifth day of July, A. D. 1887.

Emil F. Droege,

Justice of the Peace of the State of Maryland, in and for Garrett County.

State of Maryland, Garrett County, to wit:

I, E. Z. Tower, Clerk of the Circuit Court for Garrett County, the same being a court of law and of record, do hereby certify that Emil F. Droege, Esquire, before whom the foregoing affidavit was made, and who has thereto subscribed his name, was at the time of so doing a justice of the peace in and for the County and State aforesaid, duly

[Seal]

road company, and using language embracing the passenger and freight business of a railroad, solely applicable to such company, can by legal intentment be held to embrace an independent express company which is a mere forwarder over such road (and whose business is neither passenger nor freight) and to require a compliance also with this section by such express company; let us hold such claim up to the light of the next paragraph of section 6, as follows:

"The schedules printed as aforesaid by any such common carrier shall plainly state the places upon its railroad, between which property and passengers will be carried, and shall contain the classification of freight in force upon such railroad; and shall also state separately the terminal charges, and any rules or regulations which in any wise change, affect or determine any part of the aggregate of such aforesaid rates, and fares and charges." Every particular of this paragraph is precisely and technically applicable to a railroad company.

The whole section, including these two paragraphs, is to be construed as one; and all the requirements therein contained must by the principles of law governing penal statutes be complied with in every particular by every party liable at all under it. If the express company is liable at all, it is to comply with all the requirements which a strict construction requires of the railroad company in addition to any which may be attributed to it by any liberality of construction. Whatever schedule is required upon any railroad must be the same schedule by whomsoever furnished, as every common carrier, subject to the provisions of the Act, is to furnish the same. If the railroad company doing business by any road and the express company upon it are each to furnish schedules, they must, necessarily, be duplicated in every particular and under the same provision of the Law.

It is impossible to see how any one of these requirements can be complied with, in the letter of the Law, by the National Express Company or by any other shipper over the lines of a railroad. It can only be done by that common carrier which the railroad itself represents. Every part of the section is clear, direct, and technical, as applied to a railroad company doing business as a common carrier by its railroad and is exhausted by such application, and no liberality of construction (were liberality allowed in the construction of a penal statute) could be broad enough to embrace any common carrier disconnected from the operating of the railroad itself.

4. But the National Express Company transacts business over many lines of railroad operated by separate railroad companies and its charge is but a single charge, including collecting, transportation, expense of accompanying messenger, delivering, and all the incidental charges attending such service from any point upon all these continuous lines to any other point. How are the requirements of section 6 to be applied in common to these separate railroad companies and to the express company?

5. The same objections heretofore made to the application to the National Express Company, of the first two paragraphs of section 6,

tion 6 apply to all the other provisions of that section and also to sections 7, 8 and 9 and in fact to all provisions of the Act where the National Express Company can by any implication be held liable in common with any railroad company over whose road its business is conducted, for any act of omission or commission applicable to such railroad.

6. Any attempt therefore to make section 6 of the Act applicable to the National Express Company, must be through a construction by the Commission by which they shall seek to require from the Express Company so far as in their judgment the nature of its business will permit a schedule conforming as nearly as practicable in principle to that required by the section from the railroad company, but such breadth of construction would be practical legislation, even as applied to a civil statute and certainly will not be entertained in the application of a penal statute. The National Express Company must comply with the provisions of the section and with each and all of them under a strict construction or not at all.

Fourth. The preparation of a tariff or schedule (such as contemplated by section 6 in its application to railroad companies), defining the charges for railroad transportation as between the National Express Company and its customers, as to whom alone the Express Company has any relation as common carrier, is an impossibility. Transportation on railroads or otherwise is but an incident in the business of the National Express Company. The payment to the railroad company is in gross for the entire business of the Express Company over its road, and is easy of calculation as between them, but it is impossible of distribution to the individual customers of the Express Company throughout the diversified business, as to some of which the charge for service is principally on account of transportation, on others principally on account of value, on others principally for commission, on others charges for collection, etc. In fact the National Express Company has nothing to do with the transportation of passengers nor freight. The messengers of the company bear about the same relation to the passenger business of the railroad, both as to number and classification as passengers, that the property carried by it does to the freight business as to volume and to its classification as freight. The messengers are not in the sense of the Law passengers, nor the packages, valuables, collections, and the various matters of brokerage and commission in their charge, freight.

If Henry Wells traveling from Albany to Detroit in the inception of the express business, with a valise in his personal care, containing the entire express business of his day between these localities, was a common carrier of passengers and freight by railroad or by steamboat, or by stage, whatever conveyance he may have availed himself of, then it may be claimed that the express company which is the outgrowth from him is in the same sense such common carrier. The business in its nature and essence remains unchanged. The same elements enter into the charge for service now as then. It is the personal care, the despatch necessary in matters of banking and business generally, the valuable

petitioners as shall, in the estimation of your honorable body, be deemed proper.

And your petitioners will ever pray, etc.,

[L. a.]

Sworn to before me, this
19th day of April, 1887.

ANSWER OF NEW YORK, LAKE ERIE & WESTERN R. R. CO.

The New York, Lake Erie & Western Railroad Company, for an answer to the complaint in the above entitled matter, respectfully shows:

First: It admits that it is a duly incorporated railroad company, whose lines of railroad extend into the States of New York, New Jersey and Pennsylvania, and that about fifty miles of the main stem thereof are in the County of Orange, in said State of New York.

Second: It denies that all of the petitioners herein transport daily over its line large quantities of milk from various points in said county to the City of Jersey City, in the State of New Jersey, as they have alleged in their petition; and upon information and belief it also denies that the said petitioners are duly commissioned to represent the farmers and milk producers of the said County of Orange, as is further alleged in said petition.

Third: The said Railroad Company denies the allegations contained in the fourth paragraph of said petition to the effect that the rate charged by it for transporting milk from points in said county to the said City of Jersey City, a mean distance of about fifty miles, is unreasonable and unjust; but on the contrary it avers that said charges are reasonable and just, as will fully appear from the facts hereinafter stated.

Fourth: And it also denies that said charges are unreasonable and unjust as is alleged in the fifth paragraph of said petition; and it further avers that the reasons stated by the petitioners in support of their allegations are not in accordance with the facts, because it avers that the rate which the said Company charges is not 85 per cent of the value of said product, but on the contrary is only thirty-five cents per can, of forty quarts each, which weigh about 100 pounds, and that the said charge of thirty-five cents per can, as above stated, includes the expense of returning the empty cans from Jersey City to the points from which the milk was shipped, for which service no additional charge is made, although the empty cans require the same service in handling as full cans do. And said Company further avers that it

does not receive the five cents per can ferry charges, as is alleged in said petition.

It also denies that it transports milk at any less rate for any one person, company, firm or corporation, than for another, or that it subjects any particular person, company, firm, corporation or locality, to any undue prejudice or disadvantage in any respect whatsoever, or that it gives any special rate to any shipper of milk.

Fifth: And the said Railroad Company further denies that its charges are unreasonable and unjust, and that the continuance thereof by it would be contrary to, and in violation of, the latter clause of section 1 of the Interstate Commerce Law, as is alleged in the sixth paragraph of the petition.

Sixth: The said Railroad Company admits that it charges for transporting milk from Summit, in the State of New York, to Jersey City, in the State of New Jersey, a distance of about 184 miles, the same rates that it charges from points in Orange County, New York, to said Jersey City, New Jersey, a mean distance of about fifty miles. But said Company avers that said rates which it charges as aforesaid are not unreasonable and unjust for the following reasons:

That milk is a perishable commodity, and must reach its market within a few hours after it is made ready for shipment by the producer; that all the milk carried on said road is sold in the Cities of New York and Brooklyn, and is delivered by the dealers or peddlers to consumers in those cities early in the morning, and that it must, therefore, arrive at Jersey City not later than midnight, so that it may be taken away by the consignees, and distributed before the early hour at which it must be delivered to the consumer.

That in order to insure the arrival of the milk in proper condition, and in time to reach its market, said Company is obliged to run two trains each way daily, consisting of about thirteen cars each, especially for the transportation of this traffic; that during the winter, to prevent the milk from freezing, said Company is obliged to heat the cars by stoves, that the trains have to be run at a high rate of speed, equal to that of an ordinary passenger train, for which are required cars, equipped with Miller platforms and Westinghouse airbrakes, and much more expensively constructed than the cars in the ordinary freight service; that the milk is shipped in various lots ranging from one can to 200 cans, and more frequent stops are necessary than with other trains, intermediate milk stations being established solely for the accommodation of milk shippers; that the fast time necessary to be made by the trains increases the risk of accidents, and requires the employment of larger crews in order to handle the cans, and arrange them convenient for quick delivery, and also entails greater expense for fuel and maintenance of equipment; that the consignees of the milk who take it away in wagons from Jersey City, assemble there so as to meet the trains, about the time of their arrival, and are so numerous and require so much room for their accommodation that extra men have to be employed to make the delivery, and separate delivery sheds and grounds have to be provided and maintained; that the

dealers or consignees who come for the milk at Jersey City, cross from New York or Brooklyn, and ferries have to be run for several hours during the night for their accomodation, at large expense, there being during those hours very little, or none other, business passing from one side of the river to the other and the fares paid by the milkmen being insufficient to meet the cost of operating the ferries.

That milk is time freight and delay of a few hours in arrival, by accident, or otherwise, would render the whole cargo comparatively worthless, because even if the milk were not spoiled, the demand for the day would have passed, and that for the next day would be met by the following shipment.

That the trains coming in at night have to go out early in the following morning to carry back to the shipper the cans brought in by the trains on the previous day, and returned empty, so that he may receive them before night, and in time to use them on the following day; that it requires the same number of cars to return the empty cans that it does to bring them down loaded, and the equipment used in the milk traffic can therefore be used for no other purpose, consequently, the return trip of the cars employed in such traffic brings no revenue whatever to the Company (the carriage of the empty cans being included in the charge of thirty-five cents, as already stated).

Said Company further shows and alleges that having regard to the cost and character of the service, and the facilities and accomodations afforded, the rate on milk is lower comparatively than that made on any other class of freight.

Seventh: The said Railroad Company further avers that ever since the establishment of the business of transporting milk from remote points to the Cities of New York and Brooklyn (about forty years ago), it has been the custom of all the common carriers engaged in that business to charge a uniform fixed rate per quart or gallon for the milk so transported, irrespective altogether of the length of the haul; and that the same custom now prevails among all the common carriers engaged in transporting milk to the Cities of New York and Brooklyn. This custom owes its origin, and long continuance, to the fact that milk is sold to all consumers in the cities aforesaid at a uniform price for the quantity sold; and it was therefore deemed better and more satisfactory for all parties interested to have one uniform charge made for transporting milk, irrespective of distance, instead of prorating for the same according to the length of the haul.

And it is averred that up to, or about, the time of filing this petition, the establishment and observance of the custom aforesaid regulating the charge for transporting milk gave a general, if not universal, satisfaction, and that there is not now any legal or just ground for complaint against the same.

Eighth: And the said Railroad Company further avers that it is of the greatest importance to the citizens of New York and Brooklyn, as well as to the other consumers of milk, to have the area for the production thereof enlarged as much as possible, instead of having the same

narrowed and circumscribed, which would be the effect of granting the prayer of the petitioners; because the practical effect of so doing would be to enable the petitioners to establish a monopoly in the milk business by preventing the establishment of dairy farms and creameries at a greater distance than fifty miles from New York City.

The business of producing milk is a peculiar one, confined to few localities in comparison with the raising of other farm products, and requires therefore all lawful and reasonable encouragement for the establishment and successful working of dairy farms and creameries.

Ninth: And this Railroad Company avers, upon information and belief, that quite a number of persons relying upon the custom hereinbefore mentioned of making the same charge for the transportation of milk irrespective of the length of the haul, have established dairy farms and creameries at or near Summit, and at various points between there and the points in Orange County, New York, mentioned in the petition; and the said Railroad Company further avers that to make any change in the rates heretofore charged for the transportation of milk would cause great loss and damage to the parties who have established such dairy farms and creameries, as aforesaid.

Tenth: And the said Railroad Company denies that by conducting the milk business in the manner, and for the rates and charges hereinbefore stated, it has done anything unlawful, or improper, or in violation of the second and fourth sections of the Interstate Commerce Law, or any other section or provision thereof.

Eleventh: And this Railroad Company finally says that having answered fully and particularly each and all of the allegations of said petition, it prays that the same may be dismissed.

The New York, Lake Erie & Western Railroad Company.

By J. A. Buchanan, Attorney.

State of New York,
City and County of New York. } ss.

John S. Hammond, being duly sworn, says that he is the General Freight Agent of the New York, Lake Erie & Western Railroad Company, the defendant named in the foregoing answer, and that he has read the same and knows the contents thereof, and that the same is true, of his own knowledge, except as to the matters therein stated to be alleged upon information and belief, and that as to those matters he believes it to be true.

Sworn to before me this }
26th day of May, 1887. }

(Signed) J. S. Hammond,

Geo. E. Grant & Co. Notary Public,
[L. s.] N. Y. City.

ANSWER OF NEW YORK, ONTARIO & WESTERN R. Co.

The New York, Ontario & Western Railway Company answering the complaint in the above entitled matter:

First. Demands that the said complaint be dismissed, because it contains no statement of facts as against said Company, showing any

violation by said Company of any provision of the Act of Congress, approved February 4, 1887, entitled "An Act to Regulate Commerce," nor any omission on the part of said Company to do anything that by the provisions of said Act it is required to do.

1. By the ninth paragraph of the complaint, the said Company is expressly excepted from the allegations of said complaint.

2. The allegations as against the New York, Lake Erie & Western Railway Company, which the complainants allege show a violation of the provisions of the said Act by that Company, do not apply to the New York, Ontario & Western Railway Company for the reasons (which appear upon the complaint) that the said New York, Lake Erie & Western Railway Company is alleged to charge a certain rate for the transportation of milk from various points upon its road in the County of Orange, to the City of Jersey City, in the State of New Jersey, with 5 per cent additional for ferriage from Jersey City to New York City, which rates the complaint alleges are unreasonable and unjust: Whereas, it appears by the said complaint that milk transported by this Company is carried upon its own road; that such road does not terminate in Jersey City, and that the milk carried upon its road is not carried between the same points as to which it is alleged that the Erie Company make an unreasonable or unjust charge.

3. That the complaint as against this Company is too vague and indefinite and insufficient to base any proceeding under the said Act, and would not furnish the Commission with any facts upon which it could formulate or make any judgment or order.

Without waiving the foregoing objections to the insufficiency of the complaint, the said Company for a further and separate answer admits that it is a corporation doing a general freight and passenger business, and that its railroad runs through a portion of Orange County, in the State of New York, with a terminus in the State of New Jersey, but denies that it transports milk from Summit or any other point in the County of Orange or in the State of New York to Jersey City, or makes any charges or rate for transportation of milk, between Summit or any other point and Jersey City.

It also denies that it charges for the transportation of milk 35 per cent of the value thereof, or at the rate of thirty-five cents per 100 pounds; and it also denies that the rates charged by it for transporting milk upon its railroad, are unreasonable and unjust.

It also denies that it transports milk at any less rate for any one person, company, firm or corporation than for another, or that it subjects any particular person, company, firm, corporation or locality to any undue prejudice or disadvantage in any respect whatsoever, or that it gives any special rate to any shipper of milk.

It also denies that it transports any freight or produce, under similar circumstances and conditions, at a less rate than that charged for the transportation of milk.

Said Company further answering, shows and alleges that the terminus of its road in the State of New Jersey, is at Weehawken on the

west bank of the Hudson River; that its railroad passes through a portion of the County of Orange, in the State of New York, and that it charges for the transportation of milk in cans from points in said county to Weehawken, and the return of the can empty to the point of original shipment, thirty-five cents per can; that the can weighs twenty pounds, and contains forty quarts of milk, weighing eighty pounds; that the average distance of transportation of milk from points in Orange County to Weehawken is seventy-seven miles, and that the rate charged by said Company for such transportation of the milk, and return of the can, is at the rate of twenty-nine cents per 100 pounds; that the full load per car of milk in cans is ten tons, while the load per car returning with the empties is but two tons.

That the milk is a perishable commodity and must reach its market within a few hours after it is made ready for shipment by the producer; that all the milk carried on said road is sold in the Cities of New York and Brooklyn, and is delivered by the dealers or peddlers to consumers in those cities early in the morning, and that it must, therefore, arrive at Weehawken not later than midnight, so that it may be taken away by the consignees, and distributed before the early hour at which it must be delivered to the consumer.

That in order to insure the arrival of the milk in proper condition, and in time to reach its market, said Company is obliged to run trains especially for the transportation of this traffic; that during warm weather, to preserve the milk, the Company is obliged to cool the cars with ice, placed in refrigerators in the cars, and during winter, to prevent it from freezing, is obliged to heat the cars by stoves; that the trains have to be run at a high rate of speed, equal to that of an ordinary passenger train, for which are required cars, equipped with Miller platforms and Westinghouse air-brakes, and more expensively constructed than the cars in the ordinary freight service; that the milk is shipped in small lots ranging from five to forty cans, and more frequent stops are necessary than with other trains, intermediate milk stations being established solely for the accommodation of milk shippers; that the fast time necessary to be made by the train increases the risk of accidents, and requires the employment of larger crews in order to handle the cans, and arrange them convenient for quick delivery, and also entails greater expense for fuel and maintenance of equipment; that consignees of the milk who take it away in wagons from Weehawken, assemble there so as to meet the train, about the time of its arrival, and are so numerous and require so much room for their accommodation that extra men have to be employed to make the delivery, and separate and costly delivery sheds and grounds have to be provided and maintained, which cannot be used for general delivery of other classes of freight; that the dealers or consignees who come for the milk at Weehawken, cross from New York or Brooklyn, and ferries have to be run for several hours during the night for their accommodation at large expense, there being during those hours very little, or none other, business passing from one side of the river to

the other, and the fares paid by the milkmen being insufficient to meet the cost of operating the ferries.

That milk is time freight and a delay of a few hours in arrival by accident or otherwise, would render the whole cargo worthless, because even if the milk were not spoiled, the demand for the day would have passed, and that for the next day would be met by the following shipment.

That the train coming in at midnight has to go out early in the following morning to carry back to the shipper the cans brought in by the train on the previous day, and returned empty, so that he may receive them before night, and in time to use them on the following day; that it requires the same number of cars to return the empty cans that it does to bring them down loaded, and the equipment used in the milk traffic can therefore be used for no other purpose; consequently the return trip of the train brings no revenue whatever to the Company from other sources than the milk traffic (the carriage of the empty cans being included in the charge of thirty-five cents as already stated).

Said Company further shows and alleges that having regard to the cost and character of the service, and the facilities and accommodations afforded, the rate on milk is lower comparatively than that made on any other class of freight.

Said Company further shows that to the best of its knowledge, information and belief, none of the complainants are shippers of milk upon the road of said Company.

ANSWER OF NEW YORK, SUSQUEHANNA & WESTERN R. R. Co.

The New York, Susquehanna & Western Railroad Company, one of the corporations complained against in and by the above mentioned petition, answering so much and such parts thereof as relate to this respondent, says:

1. It admits that it is a corporation (formed under and by virtue of the laws of New Jersey and Pennsylvania) doing a general freight and passenger business, as in the eighth paragraph of said petition alleged; but it denies it to

be true as in said paragraph alleged, that its road passes "through the State of New York," and says that its main line extends from Marion, in Jersey City, in the State of New Jersey, to Gravel Place, in the State of Pennsylvania, with a branch (called the "Unionville Branch") extending from the Two Bridges on its main line, to the boundary line between the States of New Jersey and New York, at Unionville, in the last named State; together with a railroad (known as the "Middletown, Unionville & Water Gap Railroad") operated by it under a traffic arrangement, in connection with said branch, and extending from said state line at Unionville, to Middletown, in the County of Orange, a distance of 13 9-10 miles; which last mentioned road is the only road operated by this respondent in the State of New York.

2. It denies it to be true (as in the ninth paragraph of said petition alleged), that the allegations of the petition "are equally applicable" to this respondent, "as to the New York, Lake Erie & Western Railroad Company"; and further answering, severally, the allegations of said petition alleged to be applicable to this respondent.

3. It denies the allegation that its railroad runs "through the County of Orange aforesaid, a distance of about fifty miles," contained in the second paragraph of said petition; and it says that it runs only 13 9-10 miles in said County, as hereinbefore stated.

4. It admits that considerable (though not very large) quantities of milk are daily transported from various points in said county, to Jersey City, in the State of New Jersey; but it denies that the same is transported by said petitioners and those by them represented; and it says that, as it has been informed and believes, the milk so transported over its road, as aforesaid, is transported largely (if not entirely) by or for other persons, who purchase the same before transportation, of the said petitioners and others.

5. It denies that the rate charged for such transportation is unreasonable or unjust, as alleged in the fourth paragraph of said petition.

6. It says that the rate charged by it amounts to only thirty-five cents per can, containing about 100 pounds of milk, for the transportation of filled cans from different points on its said New York line of 13 9-10 miles in extent to Jersey City aforesaid, and the return transportation of the empty cans from said city to said points on said New York line; and it denies that such charge is simply for the transportation of the filled cans to Jersey City aforesaid, or that this respondent has anything to do with the ferrage thereof to or from the City of New York, or that it charges or receives anything therefor or on account thereof,—as alleged or insinuated in said petition; and while it may be true, as indefinitely alleged in the last mentioned paragraph, that "other classes of freight and produce of equal value, are transported from and to the same points for a less rate and with no greater risk attached"; yet such "other classes of freight and produce," transported at a less rate, are not in fact, and are not alleged to be, of a like kind or description, nor is the service in the transportation thereof of a like and contemporaneous service under substantially similar circum-

stances and conditions, with that performed in the transportation of milk as aforesaid; nor is the charge in question (as this respondent submits) a violation of the law.

7. It denies that the allegations of the seventh paragraph of said petition are true in respect to this respondent, or that they are at all applicable to it.

8. It submits that the "estimation," inference, or conclusion of the said petitioners, following the allegations of facts, herein before answered, and characterizing them as violations of the Act of Congress entitled "An Act to Regulate Commerce"—are unfounded, unwarranted, and unjust.

And this respondent prays to be hence dismissed.

John W. Taylor, F. A. Potts,
Solicitor for Respondent. President,
State of New York, }
County and City of New York. } ss.

The foregoing answer of the New York, Susquehanna & Western Railroad Company, was taken before me, this thirteenth day of May, A. D. 1887, under the common seal of the said corporation, as by their seal thereto affixed, appears.

R. C. Shimeall.

[Seal] Notary Public for Kings County.
Certificate filed in New York County.

ANSWER OF LEHIGH & HUDSON RIVER R. CO.

The Lehigh & Hudson River Railway Company answering the petition of Nathaniel W. Howell and others heretofore filed with the Interstate Commerce Commission against said Company,

1. Admits that said Company is a corporation doing a general freight and passenger business upon their line of railway passing through the State of New Jersey and a portion of Orange County, in the State of New York.

2. Denies each and every other allegation and statement in said petition contained, so far as such allegations and statements refer to or are sought to be alleged against the said Lehigh & Hudson River Railway Company.

8. And for a further and separate answer and defense to said petition the said Lehigh & Hudson River Railway Company avers that its charges for the transportation of milk over the line of said railway or for the receiving, delivering, storage or handling of such property are and have been reasonable and just; that in the transportation of said property the said Company has not in the past and does not now violate any of the provisions of the Act of Congress entitled "An Act to Regulate Commerce" and known as the Interstate Commerce Act.

4. And for a further and separate answer and defense to said petition the said Company avers that in the transportation of milk over the said Railway for the shippers thereof the said Company, as a common carrier, does not do for any other person or persons a like and contemporaneous service in the transportation of a like kind of traffic under substantially similar conditions and circumstances; that such transportation of milk is by a different and separate service from that of any other traffic over said Railway and is carried under

wholly dissimilar circumstances and conditions, in that among other things such milk is transported by special train service at greater expense for equipment, maintenance and carriage, and that the cans returned as freight to the shipper require the same service and car room as the original shipment, and no additional charge or charges are made for such return and transportation.

Wherefore, the said Lehigh & Hudson River Railway Company demands that the said petition be dismissed as against said Company.

Dated the 31st day of May, 1887.

Leverett LEONARD

v.

UNION PACIFIC R. CO.

(No. 10.)

PLEADINGS in case now pending before the Commission, based upon allegations of the exaction of an unreasonable and discriminating rate for the transportation of cattle in a Burton stock car.*

COMPLAINT.

(Filed May 21, 1887.)

Mount Leonard, Mo., April —, 1887.

To the Honorable Chairman, Interstate Commerce Commission, Washington, D. C.
Dear Sir:

Be it known to your honorable board that I, Leverett Leonard, of Mount Leonard, Saline County, and State of Missouri, am a breeder and shipper of pure bred stock. That on the 14th day of April, A. D. 1887, I did deliver to the Union Pacific Railroad Company, at their station at Kansas City, Missouri, to their authorized employees, twenty-six long yearling, pure bred stock cattle, in the Burton feeding and watering stock car, No. 47, said car being owned and operated by the Burton Stock Car Company (Incorporated), Boston,

*See Burton Stock Car Co. v. Chicago, Burlington & Quincy R. R. Co., ante, 222.

Mass., said stock being consigned by and to myself, to Pueblo, Colorado, on sale. The said employees of the Union Pacific Railroad Company charged me a rate of freight, for transportation of said stock from Kansas City, Missouri, to Pueblo, Colorado, 38 per cent in excess of the regular rate of transportation of same stock, from Kansas City to Pueblo, in the common stock cars owned and operated by the Union Pacific Railroad Company. (See expense vouchers attached).

I protested against said excess charge for transportation, the same being wholly in defiance of the letter and the spirit of the Interstate Commerce Law; the employees of the said Union Pacific Railroad Company then referred me to a copy of the western classification (revised to April 1, 1887), page 23, relating to "The transportation of live stock in special or palace cars" (copy of said western classification being herewith attached). I then demanded of said employees that the said Union Pacific Railroad Company supply me with an improved feeding and watering stock car, suitable for the safe and prompt transportation of the above mentioned pure bred stock, and was informed that the Union Pacific Railroad Company did not own any such stock cars, and that it supplied only the common stock car.

Be it further known to your honorable board that the common stock cars supplied by the said Union Pacific Railroad Company are wholly inadequate for the comfortable and safe transportation of valuable and pure bred stock, being common rack cars, exposing animals transported therein to draughts of air, dust, and locomotive cinders, and having no appliances for feeding and watering pure bred animals on the cars, which is very important to their comfort and safety on long hauls.

Therefore, I, Leverett Leonard, respectfully petition your honorable board to cause the Union Pacific Railroad Company to refund to me the aforementioned excess charge of 38 per cent above the regular rates; and further, I petition, in the interest of breeders and shippers of live stock, that all railroads operating under the aforesaid western classification, or any other classification, be required to supply suitable improved live stock cars, provided with adequate appliances for properly feeding and watering horses and cattle on the cars while in transit; or in the event of failing to supply such improved stock cars, said railroad companies shall be required to receive live stock, loaded in improved feeding and watering stock cars, when offered to them, and transport said stock, in said improved cars, at the same rates of freight as they receive for transporting a like number or weight of live stock, in their own cars, the same distance, without charging any excess whatever for the use of said improved cars; all of which your petitioner respectfully prays;

Leverett Leonard.

Done at Denver, Colorado, this 12th day of April, 1887.

State of Missouri, }
County of Saline. }

Personally appeared Leverett Leonard, who is personally known to the undersigned notary public, and he states upon his oath that the above statements are true, for the uses and purposes therein set forth.

INTER S.

Witness my hand and seal in Mt. Leonard, Saline Co., Missouri, this eleventh day of May, 1887.

John Cherry, Notary Public.

Term of office expires 5-12, 1889.

(Seal)

ANSWER.

(Filed June 9, 1887.)

The answer of the Union Pacific Railway Company, to the complaint of Leverett Leonard made to the Interstate Commerce Commission and filed May 21, 1887, alleging overcharge in the transportation of twenty-six head of cattle loaded in Burton stock car No. 47 from Kansas City to Denver:

For answer to said complaint respondent, the Union Pacific Railway Company, says that it is true that about the 14th day of April, 1887, application was made to the Union Pacific Railway Company at Kansas City for the transportation of a Burton stock car, said to be loaded with twenty-six head of cattle, from that place to Pueblo, Colorado, via Denver, Colorado. That at the date of said application the assistant general freight agent of respondent located at Kansas City explained to said Leonard the rate of freight upon said car so loaded as aforesaid from Kansas City to Denver. That said stock car was represented to said agent, and was a Burton palace stock car of the ordinary size, and thirty-six feet in length, internal measurement. That the rate of freight upon an ordinary stock car thirty feet in length as used by railways generally was \$72.50, and was so explained to said Leverett Leonard. That under the rules adopted for the transportation of live stock in the general western classification, as adopted and used by agreement of western roads, through the western classification committee,—so called,—as existing at the date of said shipment, the rate established by said association on live stock palace cars, thirty-six feet in length, internal measurement, was 138 per cent of the regular tariff rate; which said regular tariff rate was \$72.50 as stated and explained to said Leonard at the time of his application for such transportation. That said Leonard at that time made no objection to said rate, and that the only difference which arose between said Leonard and said freight agent, at that interview or at any other interview prior to said shipment, was in relation to the issue of a free pass to said Leonard by said Union Pacific Railway Company from Kansas City to Denver. That said assistant general freight agent having, as he was advised and believed, no authority under the Act of Congress to Regulate Commerce, to issue such free transportation to said Leonard from Kansas City to Denver, refused the request of said Leonard for the same. To this refusal the said Leonard objected; but no other or further complaint was made by him in respect to said shipment, nor were said assistant general freight agent or any general officer of the company advised of any dissatisfaction in respect to said shipment until the filing of his complaint with the Interstate Commerce Commission. That he made no complaint or claim for the refunding of any alleged excess in the rate to any department or officer of respondent, and that the first knowledge said Railway Company had of said claim was re-

cars is only about 20,000 to 23,000 lbs., or only about one half of that of the other cars.

The fresh meat shipments require special despatch, while the cured meats can be transported as ordinary freight, and when unloaded the refrigerator cars have to be returned promptly, and frequently without return load.

The refrigerator cars in which the fresh meat is carried belong to the petitioners and other shippers; and for their use the Railroad Company pays three fourths of one cent per mile run, which rate is onerous and burdensome on the Railroad Company, and is very profitable to the owner of the car.

The Railroad Company is a common carrier, not only of the contents of the car, the value of which per pound is in excess of that of meat provisions per pound, but also of the car, which is worth twice as much as an ordinary freight car. The Railroad Company's risk as a common carrier is, therefore, much greater on this class of shipments, and the release referred to in the petition relieves the Railroad Company only from responsibility for the refrigeration of the contents of the car.

5. Respondent neither admits nor denies the correctness of the tables contained in paragraph 7 of the petition, showing the rates charged on southern and southeastern roads; but leaves the petitioners to proof of their correctness, if the facts therein contained are deemed material. The respondent, however, denies that the rates charged by those roads have any bearing upon the question at issue, or that they can be considered in deciding the question whether the rate charged by the respondent from Chicago to Baltimore is a just and reasonable rate.

Respondent denies the correctness of the inference sought to be drawn by the petitioners from the rate of sixty cents per 100 pounds on dressed hogs in common cars established by special joint tariff No. 50 issued February 1, 1887. That rate was established as a just and reasonable one, in view of the fact that the capacity of a common car loaded with dressed hogs is only about 20,000 pounds. When, however, after that rate was established it became necessary to fix a rate for dressed hogs in refrigerator cars, it was thought unjust to charge more for dressed hogs than the rate already established for dressed beef and sheep in refrigerator cars, which was sixty-five cents per 100 pounds. So far, therefore, from showing that five cents per 100 pounds has been established by the published tariffs as the reasonable advance for transporting meat in refrigerator cars, over the rate for transporting the same meat in common cars, this instance cited in the petition shows rather that the rate of sixty-five cents per 100 pounds on dressed beef, sheep and hogs in refrigerator cars is too low, in comparison with the rates charged on other meat products, fresh and cured.

6. The respondent denies the existence of any such practice as that stated and alleged in paragraph 8 of the petition; and denies any knowledge that the shipments therein alleged of meat provisions and other products in refrigerator cars at the rate of thirty cents per 100 pounds were ever made over its railroad; and the respondent states, upon information and belief, that if such shipments were ever

made over any railroad between Chicago and the eastern seaboard, they were made as a special and exceptional accommodation to the petitioners, in order that their refrigerator cars might not lie idle.

This respondent again denies that it has ever carried any shipment of dressed meat, sheep and hogs for the petitioners between the City of Chicago, or the Union Stock Yards, and the City of New York.

7. The respondent denies that the present rates demanded by it for the transportation of dressed beef, sheep and hogs, subject that particular description of traffic to an unjust and unreasonable disadvantage, or that any of the facts set forth in the petition go to show the existence of any such unjust and unreasonable disadvantage. There is no competitive relation between dressed beef, sheep and hogs, and meat provisions; and the market price of the petitioners' dressed beef, sheep and hogs is in no way affected by the transportation rate on meat provisions. So far from the traffic of the petitioners suffering from an unjust and unreasonable disadvantage, respondent states that, although, as is shown by the table in paragraph 4 of the petition, the transportation charge on dressed beef, sheep and hogs has frequently, for months at a time, been much lower than the present rate; yet at no time has any corresponding reduction been made in the price of their dressed beef, sheep and hogs to the consumer or retail dealer on account of such reduction in the transportation charge.

On the contrary, the transportation charge has not, and does not, affect the market price of those articles, as it certainly would do if it were, as the petitioners allege, an unjust and oppressive charge.

Wherefore, respondent prays that the petition in this matter be dismissed.

The Baltimore & Ohio Railroad Company, by

Samuel Spencer, Vice President.

John K. Cowen,

Counsel for respondent, Baltimore & Ohio Central Building, Baltimore, Maryland.

State of Maryland, }
County of Garrett, } ss.

Samuel Spencer, being duly sworn, on oath says that he is the Vice President of the Baltimore & Ohio Railroad Company, the above named respondent; that he has read the foregoing answer and knows the contents thereof, and that the same are true.

Subscribed and sworn to before me this fifth day of July, A. D. 1887.

Emil F. Droege,

Justice of the Peace of the State of Maryland, in and for Garrett County.

State of Maryland, Garrett County, to wit:

I, E. Z. Tower, Clerk of the Circuit Court for Garrett County, the same being a court of law and of record, do hereby certify that Emil F. Droege, Esquire, before whom the foregoing affidavit was made, and who has thereto subscribed his name, was at the time of so doing a justice of the peace in and for the County and State aforesaid, duly

[Seal]

appointed, commissioned and qualified, and authorized by law to administer oaths and take acknowledgments.

In testimony whereof I hereunto set my hand and affix the seal of the said Circuit Court for said Garrett County, this fifth day of July, A. D. 1887.

E. Z. Tower, Clerk.

Nathaniel W. HOWELL *et al.*,
v.

NEW YORK, LAKE ERIE & WESTERN
R. R. CO., New York, Ontario & Western R. Co., New York, Susquehanna & Western R. R. Co., and Lehigh & Hudson River R. R. Co.*

(No. 4 on Docket.)

PLEADINGS in a proceeding based upon allegations of the exaction of unreasonable and unjust charges for the transportation of milk, now pending before the Commission.

The hearing of the case was entered upon on July 13, 1887, but not being then concluded it was postponed to a day to be agreed upon.

COMPLAINT.

To the honorable body of Interstate Railroad Commissioners of the United States:

Gentlemen:

The petition of Nathaniel W. Howell, Hiram A. Pooler, Charles M. Thompson, Cornelius B. Wood and A. T. Moshier, residents and taxpayers of Orange County, in the State of New York, and duly commissioned to represent the farmers and milk producers of said county show:

First: That the New York, Lake Erie & Western Railroad Company is a duly incorporated Railroad Company running through the States of New York, New Jersey & Pennsylvania.

Second: That said Railroad Company runs in and through the County of Orange aforesaid a distance of about fifty miles.

Third: That your petitioners and those by them represented, transport daily over the line of said Railroad Company large quantities of milk from various points in said county to the City of Jersey City, in the State of New Jersey.

Fourth: That in the estimation of your petitioners and those by them represented, the rate charged by said Railroad Company for transporting milk from points in said county to the City of Jersey City, in the State of New Jersey, a mean distance of about fifty miles is unreasonable and unjust.

Fifth: That said charges are unreasonable and unjust for the following reasons:

That the rate charged by said Railroad Company from and to the points aforesaid amounts to the 85 per cent of the value of said product,

or at the rate of thirty-five cents per 100 pounds with 5 per cent additional for ferrage, from Jersey City to New York City; whereas, other classes of freight and produce of equal value are transported by said Railroad Company from and to the points aforesaid and generally delivered in the City of New York for a less rate, and with no greater risk attached.

Sixth: That in the estimation of your petitioners such charges being unreasonable and unjust, the continuance thereof by said Railroad Company is contrary to and in violation of the latter clause of section 1 of the Interstate Commerce Law.

Seventh: And your petitioners further show that the said New York, Lake Erie & Western Railroad Company charge for transporting milk to the City of Jersey City from Summit in the State of New York a distance of 184 miles from Jersey City, the same rate for a like service from points in Orange County, a mean distance of fifty miles.

That in the estimation of your petitioners said Railroad Company, by such rates and charges and discriminations, demands, collects and receives from other persons (by special rate), for doing a like and contemporaneous service in the transportation of a like kind of traffic under substantially similar circumstances and conditions a less compensation for such service contrary to and in violation of section 2 of the Interstate Commerce Law.

That in the estimation of your petitioners the rates charged by said Company for transporting milk, being no greater for a longer than a shorter distance, is an undue and unjust preference and advantage to particular persons and localities, and subjects your petitioners and the persons by them represented, and the locality in which they reside, and their particular description of traffic to an unjust and unreasonable prejudice as against other persons and localities contrary to and in violation of section 3, of the Interstate Commerce Law.

Eighth: And your petitioners further show that the New York, Ontario & Western Railroad, and the New York, Susquehanna & Western Railroad and the Lehigh & Hudson River Railroad, are corporations doing a general freight and passenger business, the former running through a portion of Orange County, N. Y., with a terminus in the State of New Jersey, and the two latter passing through the States of New York and New Jersey and a portion of Orange County aforesaid.

Ninth: With the exception of the New York, Ontario & Western Railroad Company which charges an advanced rate of three cents per 100 pounds for transporting milk from points west of Bloomingburgh, in the County of Sullivan, the allegations of your petitioners are equally applicable to the last named corporations as to the New York, Lake Erie & Western Railroad Company, and are to be so regarded.

Wherefore, by reason of the allegations aforesaid your petitioners pray that your honorable body will take such immediate action in the premises as shall seem just and equitable, to the end that the said corporations complained of may be restrained from a further continuance of the acts complained of, and that such other and further relief may be afforded your

*See *Re Milk Traffic*, ante, 24, 202, 315.

petitioners as shall, in the estimation of your honorable body, be deemed proper.

And your petitioners will ever pray, etc.,

(Signed) Nat. W. Howell, C. B. Wood,
H. A. Pooler, Chas. M. Thompson,
A. T. Moshier.

State of New York, }
County of Orange. } ss.

Nathaniel W. Howell, Hiram A. Pooler, Cornelius B. Wood, Charles M. Thompson and A. T. Moshier of said county being sworn say, and each for himself says, that they have read the foregoing petition, that the facts therein stated of their own knowledge are true, and that the facts therein stated to be alleged on information and belief they believe to be true. (Signed) Charles L. Mead, Notary Public.

[L. a.]

Sworn to before me, this
19th day of April, 1887.

ANSWER OF NEW YORK, LAKE ERIE & WESTERN R. R. CO.

The New York, Lake Erie & Western Railroad Company, for an answer to the complaint in the above entitled matter, respectfully shows:

First: It admits that it is a duly incorporated railroad company, whose lines of railroad extend into the States of New York, New Jersey and Pennsylvania, and that about fifty miles of the main stem thereof are in the County of Orange, in said State of New York.

Second: It denies that all of the petitioners herein transport daily over its line large quantities of milk from various points in said county to the City of Jersey City, in the State of New Jersey, as they have alleged in their petition; and upon information and belief it also denies that the said petitioners are duly commissioned to represent the farmers and milk producers of the said County of Orange, as is further alleged in said petition.

Third: The said Railroad Company denies the allegations contained in the fourth paragraph of said petition to the effect that the rate charged by it for transporting milk from points in said county to the said City of Jersey City, a mean distance of about fifty miles, is unreasonable and unjust; but on the contrary it avers that said charges are reasonable and just, as will fully appear from the facts hereinafter stated.

Fourth: And it also denies that said charges are unreasonable and unjust as is alleged in the fifth paragraph of said petition; and it further avers that the reasons stated by the petitioners in support of their allegations are not in accordance with the facts, because it avers that the rate which the said Company charges is not 85 per cent of the value of said product, but on the contrary is only thirty-five cents per can, of forty quarts each, which weigh about 100 pounds, and that the said charge of thirty-five cents per can, as above stated, includes the expense of returning the empty cans from Jersey City to the points from which the milk was shipped, for which service no additional charge is made, although the empty cans require the same service in handling as full cans do. And said Company further avers that it

does not receive the five cents per can ferry charges, as is alleged in said petition.

It also denies that it transports milk at any less rate for any one person, company, firm or corporation, than for another, or that it subjects any particular person, company, firm, corporation or locality, to any undue prejudice or disadvantage in any respect whatsoever, or that it gives any special rate to any shipper of milk.

Fifth: And the said Railroad Company further denies that its charges are unreasonable and unjust, and that the continuance thereof by it would be contrary to, and in violation of, the latter clause of section 1 of the Interstate Commerce Law, as is alleged in the sixth paragraph of the petition.

Sixth: The said Railroad Company admits that it charges for transporting milk from Summit, in the State of New York, to Jersey City, in the State of New Jersey, a distance of about 184 miles, the same rates that it charges from points in Orange County, New York, to said Jersey City, New Jersey, a mean distance of about fifty miles. But said Company avers that said rates which it charges as aforesaid are not unreasonable and unjust for the following reasons:

That milk is a perishable commodity, and must reach its market within a few hours after it is made ready for shipment by the producer; that all the milk carried on said road is sold in the Cities of New York and Brooklyn, and is delivered by the dealers or peddlers to consumers in those cities early in the morning, and that it must, therefore, arrive at Jersey City not later than midnight, so that it may be taken away by the consignees, and distributed before the early hour at which it must be delivered to the consumer.

That in order to insure the arrival of the milk in proper condition, and in time to reach its market, said Company is obliged to run two trains each way daily, consisting of about thirteen cars each, especially for the transportation of this traffic; that during the winter, to prevent the milk from freezing, said Company is obliged to heat the cars by stoves, that the trains have to be run at a high rate of speed, equal to that of an ordinary passenger train, for which are required cars, equipped with Miller platforms and Westinghouse airbrakes, and much more expensively constructed than the cars in the ordinary freight service; that the milk is shipped in various lots ranging from one can to 200 cans, and more frequent stops are necessary than with other trains, intermediate milk stations being established solely for the accommodation of milk shippers; that the fast time necessary to be made by the trains increases the risk of accidents, and requires the employment of larger crews in order to handle the cans, and arrange them convenient for quick delivery, and also entails greater expense for fuel and maintenance of equipment; that the consignees of the milk who take it away in wagons from Jersey City, assemble there so as to meet the trains, about the time of their arrival, and are so numerous and require so much room for their accommodation that extra men have to be employed to make the delivery, and separate delivery sheds and grounds have to be provided and maintained; that the

dealers or consignees who come for the milk at Jersey City, cross from New York or Brooklyn, and ferries have to be run for several hours during the night for their accomodation, at large expense, there being during those hours very little, or none other, business passing from one side of the river to the other and the fares paid by the milkmen being insufficient to meet the cost of operating the ferries.

That milk is time freight and delay of a few hours in arrival, by accident, or otherwise, would render the whole cargo comparatively worthless, because even if the milk were not spoiled, the demand for the day would have passed, and that for the next day would be met by the following shipment.

That the trains coming in at night have to go out early in the following morning to carry back to the shipper the cans brought in by the trains on the previous day, and returned empty, so that he may receive them before night, and in time to use them on the following day; that it requires the same number of cars to return the empty cans that it does to bring them down loaded, and the equipment used in the milk traffic can therefore be used for no other purpose, consequently, the return trip of the cars employed in such traffic brings no revenue whatever to the Company (the carriage of the empty cans being included in the charge of thirty-five cents, as already stated).

Said Company further shows and alleges that having regard to the cost and character of the service, and the facilities and accomodations afforded, the rate on milk is lower comparatively than that made on any other class of freight.

Seventh: The said Railroad Company further avers that ever since the establishment of the business of transporting milk from remote points to the Cities of New York and Brooklyn (about forty years ago), it has been the custom of all the common carriers engaged in that business to charge a uniform fixed rate per quart or gallon for the milk so transported, irrespective altogether of the length of the haul; and that the same custom now prevails among all the common carriers engaged in transporting milk to the Cities of New York and Brooklyn. This custom owes its origin, and long continuance, to the fact that milk is sold to all consumers in the cities aforesaid at a uniform price for the quantity sold; and it was therefore deemed better and more satisfactory for all parties interested to have one uniform charge made for transporting milk, irrespective of distance, instead of prorating for the same according to the length of the haul.

And it is averred that up to, or about, the time of filing this petition, the establishment and observance of the custom aforesaid regulating the charge for transporting milk gave a general, if not universal, satisfaction, and that there is not now any legal or just ground for complaint against the same.

Eighth: And the said Railroad Company further avers that it is of the greatest importance to the citizens of New York and Brooklyn, as well as to the other consumers of milk, to have the area for the production thereof enlarged as much as possible, instead of having the same

narrowed and circumscribed, which would be the effect of granting the prayer of the petitioners; because the practical effect of so doing would be to enable the petitioners to establish a monopoly in the milk business by preventing the establishment of dairy farms and creameries at a greater distance than fifty miles from New York City.

The business of producing milk is a peculiar one, confined to few localities in comparison with the raising of other farm products, and requires therefore all lawful and reasonable encouragement for the establishment and successful working of dairy farms and creameries.

Ninth: And this Railroad Company avers, upon information and belief, that quite a number of persons relying upon the custom hereinbefore mentioned of making the same charge for the transportation of milk irrespective of the length of the haul, have established dairy farms and creameries at or near Summit, and at various points between there and the points in Orange County, New York, mentioned in the petition; and the said Railroad Company further avers that to make any change in the rates heretofore charged for the transportation of milk would cause great loss and damage to the parties who have established such dairy farms and creameries, as aforesaid.

Tenth: And the said Railroad Company denies that by conducting the milk business in the manner, and for the rates and charges hereinbefore stated, it has done anything unlawful, or improper, or in violation of the second and fourth sections of the Interstate Commerce Law, or any other section or provision thereof.

Eleventh: And this Railroad Company finally says that having answered fully and particularly each and all of the allegations of said petition, it prays that the same may be dismissed.

The New York, Lake Erie & Western Railroad Company.

ANSWER OF NEW YORK, ONTARIO & WESTERN R. Co.

The New York, Ontario & Western Railway Company answering the complaint in the above entitled matter:

First. Demands that the said complaint be dismissed, because it contains no statement of facts as against said Company, showing any

violation by said Company of any provision of the Act of Congress, approved February 4, 1887, entitled "An Act to Regulate Commerce," nor any omission on the part of said Company to do anything that by the provisions of said Act it is required to do.

1. By the ninth paragraph of the complaint, the said Company is expressly excepted from the allegations of said complaint.

2. The allegations as against the New York, Lake Erie & Western Railway Company, which the complainants allege show a violation of the provisions of the said Act by that Company, do not apply to the New York, Ontario & Western Railway Company for the reasons (which appear upon the complaint) that the said New York, Lake Erie & Western Railway Company is alleged to charge a certain rate for the transportation of milk from various points upon its road in the County of Orange, to the City of Jersey City, in the State of New Jersey, with 5 per cent additional for ferrage from Jersey City to New York City, which rates the complaint alleges are unreasonable and unjust: Whereas, it appears by the said complaint that milk transported by this Company is carried upon its own road; that such road does not terminate in Jersey City, and that the milk carried upon its road is not carried between the same points as to which it is alleged that the Erie Company make an unreasonable or unjust charge.

8. That the complaint as against this Company is too vague and indefinite and insufficient to base any proceeding under the said Act, and would not furnish the Commission with any facts upon which it could formulate or make any judgment or order.

Without waiving the foregoing objections to the insufficiency of the complaint, the said Company for a further and separate answer admits that it is a corporation doing a general freight and passenger business, and that its railroad runs through a portion of Orange County, in the State of New York, with a terminus in the State of New Jersey, but denies that it transports milk from Summit or any other point in the County of Orange or in the State of New York to Jersey City, or makes any charges or rate for transportation of milk, between Summit or any other point and Jersey City.

It also denies that it charges for the transportation of milk 85 per cent of the value thereof, or at the rate of thirty-five cents per 100 pounds; and it also denies that the rates charged by it for transporting milk upon its railroad, are unreasonable and unjust.

It also denies that it transports milk at any less rate for any one person, company, firm or corporation than for another, or that it subjects any particular person, company, firm, corporation or locality to any undue prejudice or disadvantage in any respect whatsoever, or that it gives any special rate to any shipper of milk.

It also denies that it transports any freight or produce, under similar circumstances and conditions, at a less rate than that charged for the transportation of milk.

Said Company further answering, shows and alleges that the terminus of its road in the State of New Jersey, is at Weehawken on the

west bank of the Hudson River; that its railroad passes through a portion of the County of Orange, in the State of New York, and that it charges for the transportation of milk in cans from points in said county to Weehawken, and the return of the can empty to the point of original shipment, thirty-five cents per can; that the can weighs twenty pounds, and contains forty quarts of milk, weighing eighty pounds; that the average distance of transportation of milk from points in Orange County to Weehawken is seventy-seven miles, and that the rate charged by said Company for such transportation of the milk, and return of the can, is at the rate of twenty-nine cents per 100 pounds; that the full load per car of milk in cans is ten tons, while the load per car returning with the empties is but two tons.

That the milk is a perishable commodity and must reach its market within a few hours after it is made ready for shipment by the producer; that all the milk carried on said road is sold in the Cities of New York and Brooklyn, and is delivered by the dealers or peddlers to consumers in those cities early in the morning, and that it must, therefore, arrive at Weehawken not later than midnight, so that it may be taken away by the consignees, and distributed before the early hour at which it must be delivered to the consumer.

That in order to insure the arrival of the milk in proper condition, and in time to reach its market, said Company is obliged to run trains especially for the transportation of this traffic; that during warm weather, to preserve the milk, the Company is obliged to cool the cars with ice, placed in refrigerators in the cars, and during winter, to prevent it from freezing, is obliged to heat the cars by stoves; that the trains have to be run at a high rate of speed, equal to that of an ordinary passenger train, for which are required cars, equipped with Miller platforms and Westinghouse air-brakes, and more expensively constructed than the cars in the ordinary freight service; that the milk is shipped in small lots ranging from five to forty cans, and more frequent stops are necessary than with other trains, intermediate milk stations being established solely for the accommodation of milk shippers; that the fast time necessary to be made by the train increases the risk of accidents, and requires the employment of larger crews in order to handle the cans, and arrange them convenient for quick delivery, and also entails greater expense for fuel and maintenance of equipment; that consignees of the milk who take it away in wagons from Weehawken, assemble there so as to meet the train, about the time of its arrival, and are so numerous and require so much room for their accommodation that extra men have to be employed to make the delivery, and separate and costly delivery sheds and grounds have to be provided and maintained, which cannot be used for general delivery of other classes of freight; that the dealers or consignees who come for the milk at Weehawken, cross from New York or Brooklyn, and ferries have to be run for several hours during the night for their accommodation at large expense, there being during those hours very little, or none other, business passing from one side of the river to

the other, and the fares paid by the milkmen being insufficient to meet the cost of operating the ferries.

That milk is time freight and a delay of a few hours in arrival by accident or otherwise, would render the whole cargo worthless, because even if the milk were not spoiled, the demand for the day would have passed, and that for the next day would be met by the following shipment.

That the train coming in at midnight has to go out early in the following morning to carry back to the shipper the cans brought in by the train on the previous day, and returned empty, so that he may receive them before night, and in time to use them on the following day; that it requires the same number of cars to return the empty cans that it does to bring them down loaded, and the equipment used in the milk traffic can therefore be used for no other purpose; consequently the return trip of the train brings no revenue whatever to the Company from other sources than the milk traffic (the carriage of the empty cans being included in the charge of thirty-five cents as already stated).

Said Company further shows and alleges that having regard to the cost and character of the service, and the facilities and accommodations afforded, the rate on milk is lower comparatively than that made on any other class of freight.

Said Company further shows that to the best of its knowledge, information and belief, none of the complainants are shippers of milk upon the road of said Company.

Dated, New York, May 28, 1887.

ANSWER OF NEW YORK, SUSQUEHANNA & WESTERN R. R. Co.

The New York, Susquehanna & Western Railroad Company, one of the corporations complained against in and by the above mentioned petition, answering so much and such parts thereof as relate to this respondent, says:

1. It admits that it is a corporation (formed under and by virtue of the laws of New Jersey and Pennsylvania) doing a general freight and passenger business, as in the eighth paragraph of said petition alleged; but it denies it to

be true as in said paragraph alleged, that its road passes "through the State of New York," and says that its main line extends from Marion, in Jersey City, in the State of New Jersey, to Gravel Place, in the State of Pennsylvania, with a branch (called the "Unionville Branch") extending from the Two Bridges on its main line, to the boundary line between the States of New Jersey and New York, at Unionville, in the last named State; together with a railroad (known as the "Middletown, Unionville & Water Gap Railroad") operated by it under a traffic arrangement, in connection with said branch, and extending from said state line at Unionville, to Middletown, in the County of Orange, a distance of 13 9-10 miles; which last mentioned road is the only road operated by this respondent in the State of New York.

2. It denies it to be true (as in the ninth paragraph of said petition alleged), that the allegations of the petition "are equally applicable" to this respondent, "as to the New York, Lake Erie & Western Railroad Company"; and further answering, severally, the allegations of said petition alleged to be applicable to this respondent.

3. It denies the allegation that its railroad runs "through the County of Orange aforesaid, a distance of about fifty miles," contained in the second paragraph of said petition; and it says that it runs only 13 9-10 miles in said County, as hereinbefore stated.

4. It admits that considerable (though not very large) quantities of milk are daily transported from various points in said county, to Jersey City, in the State of New Jersey; but it denies that the same is transported by said petitioners and those by them represented; and it says that, as it has been informed and believes, the milk so transported over its road, as aforesaid, is transported largely (if not entirely) by or for other persons, who purchase the same before transportation, of the said petitioners and others.

5. It denies that the rate charged for such transportation is unreasonable or unjust, as alleged in the fourth paragraph of said petition.

6. It says that the rate charged by it amounts to only thirty-five cents per can, containing about 100 pounds of milk, for the transportation of filled cans from different points on its said New York line of 13 9-10 miles in extent to Jersey City aforesaid, and the return transportation of the empty cans from said city to said points on said New York line; and it denies that such charge is simply for the transportation of the filled cans to Jersey City aforesaid, or that this respondent has anything to do with the ferriage thereof to or from the City of New York, or that it charges or receives anything therefor or on account thereof,—as alleged or insinuated in said petition; and while it may be true, as indefinitely alleged in the last mentioned paragraph, that "other classes of freight and produce of equal value, are transported from and to the same points for a less rate and with no greater risk attached"; yet such "other classes of freight and produce," transported at a less rate, are not in fact, and are not alleged to be, of a like kind or description, nor is the service in the transportation thereof of a like and contemporaneous service under substantially similar circum-

stances and conditions, with that performed in the transportation of milk as aforesaid; nor is the charge in question (as this respondent submits) a violation of the law.

7. It denies that the allegations of the seventh paragraph of said petition are true in respect to this respondent, or that they are at all applicable to it.

8. It submits that the "estimation," inference, or conclusion of the said petitioners, following the allegations of facts, herein before answered, and characterizing them as violations of the Act of Congress entitled "An Act to Regulate Commerce"—are unfounded, unwarranted, and unjust.

And this respondent prays to be hence dismissed.

John W. Taylor, F. A. Potts,
Solicitor for Respondent. President,
State of New York, } ss.
County and City of New York. }

The foregoing answer of the New York, Susquehanna & Western Railroad Company, was taken before me, this thirteenth day of May, A. D. 1887, under the common seal of the said corporation, as by their seal thereto affixed, appears.

R. C. Shimeall.
[Seal] Notary Public for Kings County.
Certificate filed in New York County.

ANSWER OF LEHIGH & HUDSON RIVER R. CO.

The Lehigh & Hudson River Railway Company answering the petition of Nathaniel W. Howell and others heretofore filed with the Interstate Commerce Commission against said Company,

1. Admits that said Company is a corporation doing a general freight and passenger business upon their line of railway passing through the State of New Jersey and a portion of Orange County, in the State of New York.

2. Denies each and every other allegation and statement in said petition contained, so far as such allegations and statements refer to or are sought to be alleged against the said Lehigh & Hudson River Railway Company.

3. And for a further and separate answer and defense to said petition the said Lehigh & Hudson River Railway Company avers that its charges for the transportation of milk over the line of said railway or for the receiving, delivering, storage or handling of such property are and have been reasonable and just; that in the transportation of said property the said Company has not in the past and does not now violate any of the provisions of the Act of Congress entitled "An Act to Regulate Commerce" and known as the Interstate Commerce Act.

4. And for a further and separate answer and defense to said petition the said Company avers that in the transportation of milk over the said Railway for the shippers thereof the said Company, as a common carrier, does not do for any other person or persons a like and contemporaneous service in the transportation of a like kind of traffic under substantially similar conditions and circumstances; that such transportation of milk is by a different and separate service from that of any other traffic over said Railway and is carried under

wholly dissimilar circumstances and conditions, in that among other things such milk is transported by special train service at greater expense for equipment, maintenance and carriage, and that the cans returned as freight to the shipper require the same service and car room as the original shipment, and no additional charge or charges are made for such return and transportation.

Wherefore, the said Lehigh & Hudson River Railway Company demands that the said petition be dismissed as against said Company.

Dated the 31st day of May, 1887.

Leverett LEONARD

UNION PACIFIC R. CO.
(No. 10.)

PLEADINGS in case now pending before the Commission, based upon allegations of the exaction of an unreasonable and discriminating rate for the transportation of cattle in a Burton stock car.*

COMPLAINT.

(Filed May 21, 1887.)

Mount Leonard, Mo., April —, 1887.

To the Honorable Chairman, Interstate Commerce Commission, Washington, D. C.

Dear Sir:

Be it known to your honorable board that I, Leverett Leonard, of Mount Leonard, Saline County, and State of Missouri, am a breeder and shipper of pure bred stock. That on the 14th day of April, A. D. 1887, I did deliver to the Union Pacific Railroad Company, at their station at Kansas City, Missouri, to their authorized employees, twenty-six long yearling, pure bred stock cattle, in the Burton feeding and watering stock car, No. 47, said car being owned and operated by the Burton Stock Car Company (incorporated), Boston,

*See Burton Stock Car Co. v. Chicago, Burlington & Quincy R. R. Co., ante, 288.

Mass., said stock being consigned by and to myself, to Pueblo, Colorado, on sale. The said employees of the Union Pacific Railroad Company charged me a rate of freight, for transportation of said stock from Kansas City, Missouri, to Pueblo, Colorado, 88 per cent in excess of the regular rate of transportation of same stock, from Kansas City to Pueblo, in the common stock cars owned and operated by the Union Pacific Railroad Company. (See expense vouchers attached).

I protested against said excess charge for transportation, the same being wholly in defiance of the letter and the spirit of the Interstate Commerce Law; the employees of the said Union Pacific Railroad Company then referred me to a copy of the western classification (revised to April 1, 1887), page 23, relating to "The transportation of live stock in special or palace cars" (copy of said western classification being herewith attached). I then demanded of said employees that the said Union Pacific Railroad Company supply me with an improved feeding and watering stock car, suitable for the safe and prompt transportation of the above mentioned pure bred stock, and was informed that the Union Pacific Railroad Company did not own any such stock cars, and that it supplied only the common stock car.

Be it further known to your honorable board that the common stock cars supplied by the said Union Pacific Railroad Company are wholly inadequate for the comfortable and safe transportation of valuable and pure bred stock, being common rack cars, exposing animals transported therein to draughts of air, dust, and locomotive cinders, and having no appliances for feeding and watering pure bred animals on the cars, which is very important to their comfort and safety on long hauls.

Therefore, I, Leverett Leonard, respectfully petition your honorable board to cause the Union Pacific Railroad Company to refund to me the aforementioned excess charge of 88 per cent above the regular rates; and further, I petition, in the interest of breeders and shippers of live stock, that all railroads operating under the aforesaid western classification, or any other classification, be required to supply suitable improved live stock cars, provided with adequate appliances for properly feeding and watering horses and cattle on the cars while in transit; or in the event of failing to supply such improved stock cars, said railroad companies shall be required to receive live stock, loaded in improved feeding and watering stock cars, when offered to them, and transport said stock, in said improved cars, at the same rates of freight as they receive for transporting a like number or weight of live stock, in their own cars, the same distance, without charging any excess whatever for the use of said improved cars; all of which your petitioner respectfully prays;

Leverett Leonard.

Done at Denver, Colorado, this 12th day of April, 1887.

State of Missouri, }
County of Saline. }

Personally appeared Leverett Leonard, who is personally known to the undersigned notary public, and he states upon his oath that the above statements are true, for the uses and purposes therein set forth.

INTER 8.

Witness my hand and seal in Mt. Leonard, Saline Co., Missouri, this eleventh day of May, 1887.

John Cherry, Notary Public.

Term of office expires 5-12, 1889.

(Seal)

ANSWER.

(Filed June 9, 1887.)

The answer of the Union Pacific Railway Company, to the complaint of Leverett Leonard made to the Interstate Commerce Commission and filed May 21, 1887, alleging overcharge in the transportation of twenty-six head of cattle loaded in Burton stock car No. 47 from Kansas City to Denver:

For answer to said complaint respondent, the Union Pacific Railway Company, says that it is true that about the 14th day of April, 1887, application was made to the Union Pacific Railway Company at Kansas City for the transportation of a Burton stock car, said to be loaded with twenty-six head of cattle, from that place to Pueblo, Colorado, via Denver, Colorado. That at the date of said application the assistant general freight agent of respondent located at Kansas City explained to said Leonard the rate of freight upon said car so loaded as aforesaid from Kansas City to Denver. That said stock car was represented to said agent, and was a Burton palace stock car of the ordinary size, and thirty-six feet in length, internal measurement. That the rate of freight upon an ordinary stock car thirty feet in length as used by railways generally was \$72.50, and was so explained to said Leverett Leonard. That under the rules adopted for the transportation of live stock in the general western classification, as adopted and used by agreement of western roads, through the western classification committee,—so called,—as existing at the date of said shipment, the rate established by said association on live stock palace cars, thirty-six feet in length, internal measurement, was 188 per cent of the regular tariff rate; which said regular tariff rate was \$72.50 as stated and explained to said Leonard at the time of his application for such transportation. That said Leonard at that time made no objection to said rate, and that the only difference which arose between said Leonard and said freight agent, at that interview or at any other interview prior to said shipment, was in relation to the issue of a free pass to said Leonard by said Union Pacific Railway Company from Kansas City to Denver. That said assistant general freight agent having, as he was advised and believed, no authority under the Act of Congress to Regulate Commerce, to issue such free transportation to said Leonard from Kansas City to Denver, refused the request of said Leonard for the same. To this refusal the said Leonard objected; but no other or further complaint was made by him in respect to said shipment, nor were said assistant general freight agent or any general officer of the company advised of any dissatisfaction in respect to said shipment until the filing of his complaint with the Interstate Commerce Commission. That he made no complaint or claim for the refunding of any alleged excess in the rate to any department or officer of respondent, and that the first knowledge said Railway Company had of said claim was re-

ceived through his complaint filed with the Interstate Commerce Commission.

Respondent further answering says that it denies that said charge or any part thereof is imposed wholly in defiance of the letter and spirit of the Act of Congress to Regulate Commerce; and further denies that any demand was made upon said Railway Company to furnish said Leonard with an improved feeding and watering stock car suitable for the safe and prompt transportation of high bred stock; or that said complainant was informed that the Railway Company did not own such cars; and says that the statements of the complainant in that particular are untrue in fact.

Respondent further answering says that the stock cars of the Union Pacific Railway Company in ordinary use are well built, substantial and in every respect fit for the transportation of live stock, as such business is ordinarily conducted by western roads; and that the same are managed, run and operated with due care and prudence, and in accordance with the laws of the respective States and Territories through which the same are operated, and of the United States.

Respondent further answering says that the said Burton stock car in which said cattle were loaded, and which the respondent was requested to transport, is a species of palace stock car. That it is not owned by any railroad company, but by a private corporation or partnership known as the Burton Stock Car Company, whose business it is to provide cars for shippers of live stock at a fee and expense for such shipment to be paid to said Burton Stock Car Company wholly separate and apart from any payment for the transportation of said car and its contents. That said corporation is a private pecuniary corporation, building and owning cars to be hired at and for their own profit to stock shippers, and for which said Burton Stock Car Company demands and receives a separate compensation wholly distinct from, and in addition to the compensation paid to railway companies for the transportation of cars. That the tendency and effect of such private ownership and private profit upon cars transported by railway companies is to absorb and divert a portion of the legitimate business of railways into the pockets of private corporations and individuals, who deny any obligation as common carriers to the public or the Government, and who seek to interpose themselves between the public and the railways as middlemen and thus extract a private profit from each.

Respondent further answering says that in the transaction set forth in complainant's complaint respondent has granted and allowed to said complainant equal advantages and facilities, without preference or discrimination in favor of or against any other person or corporation similarly situated tendering for transportation cars of the same character, construction, weight, length and capacity; and that the charges made said complainant for hauling and handling the same by respondent were reasonable and just.

Respondent further answering denies that in said transaction it has been guilty in any way or manner, either directly or indirectly, of a breach of sections 1, 2 or 3, or of any other sec-

tion of the Act of Congress passed at the late session of Congress; all of which respondent is ready to support by appropriate proof.

Respondent further submits that it is not under any legal obligation, either of common law or by construction, to receive and transport over its road trains, cars and vehicles owned by private parties or corporations, whether tendered by the owners thereof or by the hirers thereof, not operating railways as common carriers and not exchanging passengers, freight or other cars with respondent as common carriers.

Respondent further answering denies each and every allegation of complainant's complaint not herein already denied, confessed or avoided and prays that it may be dismissed with its costs.

Union Pacific Railway Company,

By A. J. Poppleton, its Attorney.

State of Nebraska, } ss.
County of Douglas. }

Thomas L. Kimball being first duly sworn, on oath says that he is the General Traffic Manager of the Union Pacific Railway Company, respondent herein, having general charge and supervision of its traffic business; that he has read the foregoing answer and knows the contents thereof; and that the facts therein stated are true as he verily believes.

Subscribed in my presence and sworn to before me this fourth day of June, A. D. 1887.

CHICAGO, MILWAUKEE & ST. PAUL
R. CO.

(No. 20.)

PLEADINGS in a case pending before the Commission, based upon allegations of the exaction of an unreasonable charge for the transportation of wheat.

COMPLAINT.

(Filed May 26, 1887.)

This is to certify that I, E. B. Raymond, am a citizen of the Town of Mazeppa, County of Wabasha, and State of Minnesota; that I am interested with another party in the purchase and sale of produce; that the Town of Mazeppa is located on the Wabasha division of the Chicago, Milwaukee & Saint Paul Railroad, about fifty-two miles from Wabasha where the said Wabasha division connects with river division of the said Chicago, Milwaukee & Saint Paul Railroad, the said river division constituting and being a part of the main line extending from Chicago via Racine, Milwaukee and La Crosse to Saint Paul, Minnesota. That Lake City and Red Wing are located on the said river division of the said Chicago, Milwaukee & Saint Paul Road, the former, Lake City, about twenty miles from Mazeppa, and the latter, Red Wing, about twenty-two miles from Mazeppa, both towns

being direct competitors with the Town of Mazeppa for the rail traffic and purchase of produce from the territory or country intervening.

That the posted rates on wheat and some other kinds of grain by the said Chicago, Milwaukee & Saint Paul Railroad from Red Wing and Lake City to Chicago was fifteen cents per 100 pounds from August 15, 1886, until April 5, 1887. That the posted rates on wheat and some other kinds of grain by the said Chicago, Milwaukee & Saint Paul Railroad from Mazeppa to Chicago was seventeen cents per 100 pounds from August 15, 1886, until April 5, 1887. That when the Chicago, Milwaukee & Saint Paul Railroad posted its new rates April 5, 1887, it did not change the old rates on wheat from Winona or Hastings on the river division, nor the rates on wheat to Chicago from Hammonds, a station about thirty-four miles from Wabasha on the said Wabasha division; but at all stations west of Hammonds on said Wabasha division, the rate on wheat was advanced to eighteen cents per 100 pounds to Chicago, making at this place a differential of three cents per 100 pounds in place of two cents per 100 pounds as existed from August 15, 1886, until April 5, 1887.

That the said Chicago, Milwaukee & Saint Paul Railroad I believe at times previous to August 15, 1886, did make such rates on some kinds of grain to interstate points from Lake City as to draw the grain from within eighty rods of our own elevator. That an eighteen cents rate from Mazeppa to Chicago is what I believe to be unreasonable, and I further believe that the advance April 5, 1887, from seventeen cents to eighteen cents on wheat to Chicago from Mazeppa was wholly unwarranted. That any differential exceeding two cents per 100 pounds on grain from Mazeppa to Chicago or other interstate points over the rates from Red Wing and Lake City to such interstate points I believe to be unjust and a discrimination against this place and locality. That it is now claimed by the Daily Press that a ten cent rate on wheat from Minneapolis to Chicago, including Red Wing and Lake City, is now being made; if so, then an eight cent differential exists sufficient to take the wheat from before our own door.

Therefore I ask of your honorable Commission as early a consideration of my complaint as possible. I further ask that if you find that the advance April 5, 1887, was unwarranted and unjust, then you request the said Chicago, Milwaukee & Saint Paul Railroad Company to refund the excess collected from shippers since April 5, 1887. I further ask that if you find that the said Chicago, Milwaukee & Saint Paul Railroad is carrying wheat from Red Wing and Lake City to Chicago at ten cents per 100 pounds and has been since the 18th inst. that you declare the same to be a discrimination against this place and locality and a violation of section 8 of the Interstate Commerce Law so long as the rate remains eighteen cents per 100 pounds from this place to Chicago; and that you further request it, if you find that it has violated said third section of the Interstate Commerce Law, to refund any excess of money it may have collected from shippers over and above the rate at Lake City

ENTER S.

and Red Wing, with a reasonable differential, and to pay any damages that may have accrued in consequence of such violation of the Interstate Commerce Law.

Subscribed and sworn to }
according to my best
knowledge and belief.

E. B. Raymond.

Witness, H. F. Fowler.

Sworn to and subscribed before me this 23d day of May, 1887.

Wabasha Co.

ANSWER.

(Filed June 13, 1887.)

Milwaukee, Wis. June 7, 1887.

Mr. Edward A. Moseley, Secretary Interstate
Commerce Commission,
Washington, D. C.

Sir:

Answering the complaint of E. B. Raymond, a citizen of Mazeppa, County of Wabasha, State of Minnesota, the Chicago, Milwaukee & St. Paul Railway Company states as follows:

First. It is true, as claimed, that immediately prior to April 5, 1887, fifteen cents per 100 pounds was the rate charged from stations on the River Division, including Lake City and Red Wing, and seventeen cents per 100 pounds from Mazeppa to Chicago.

Second. That in adjusting rates to take effect April 5, 1887, it was agreed by all lines that eighteen cents per 100 pounds was a reasonable rate for the transportation of grain and flour from St. Paul and Minneapolis to Chicago, via the river, La Crosse and the Chicago & Milwaukee divisions to Chicago.

This rate of eighteen cents was graded down so that the rate from Lake City and from Red Wing was made fifteen cents.

Mazeppa is a station on the Wabasha division, *narrow gauge*, and is fifty-two miles from the main line of the river division at Wabasha.

Zumbrot is eight miles west of Mazeppa, and is the terminus of the Wabasha division, and is the terminus of the Zumbrot branch of the Winona & St. Peter Division of the Chicago & Northwestern Railway. Thus all this territory is competitive, and rates are usually made after agreement.

In adjusting new rates it was agreed that eighteen cents was a reasonable rate from this interior territory, including corresponding stations on the Zumbrot branch of the Winona & St. Peter Railway.

The question of an agreed differential, above rates charged on the River Division, was not and is not considered, as there are many contingencies affecting rates from river division stations which do not directly concern interior points.

Third. May 18, in consequence of the action of our competitors, we reduced rates from St. Paul, Minneapolis and all stations on the River and the La Crosse divisions, to ten cents per 100 pounds, but we made no change in the rates from stations on the Wabasha division, nor on other divisions, not part of the direct line to Chicago over which the St. Paul and Minneapolis business is done.

Fourth. May 20, for the same reasons, we made a further reduction to 7½ cents per 100 pounds, but made no change at Mazeppa or other points on the Wabasha division, or from stations on other divisions not part of the direct line to Chicago.

Fifth. May 26, the 7½ cent rate from St. Paul and Minneapolis remaining in effect, we made reductions on branches connecting with the direct line to Chicago, among which was a reduction of rates from Mazeppa to 12½ cents per 100 pounds, which rate is now in effect.

Sixth. The rates from St. Paul, Minneapolis, and from river division stations, to Chicago, are affected by the competition via Lake Superior and the competition of the Mississippi River, causing at times (notably today), extremely low and unprofitable rates. This competition and these low rates only indirectly affect the rates at Mazeppa and other interior points; and we claim that the rates charged from Mazeppa to Chicago since April 5 have been and are just and reasonable.

Very Respectfully,
The Chicago, Milwaukee & St. Paul Railway Company, by
Roswell Miller, General Manager.

George M. JACKSON

ST. LOUIS, ARKANSAS & TEXAS R. CO.

(No. 28.)

PLEADINGS in a case pending before the Commission, based upon allegations of the exaction of unjust rates for the transportation of hewed lumber or ties, and of discrimination in favor of sawed lumber as against hewed lumber.

COMPLAINT.

(Filed June 7, 1887.)

St. Francis, Clay Co. Arkansas,
June 1, 1887.

Judge Thomas M. Cooley,
Chairman Interstate Commerce Commission:

I respectfully ask that your honorable body summon the St. Louis, Arkansas & Texas Railroad Company before you. Your petitioner charges the said Railroad Company with a violation of the first section of the Interstate Commerce Law, in this: that the said Railroad Company refuses to ship ties or hewed lumber for your petitioner from this place to Kansas City, Missouri which is in another State, for less than 40½ cents each, which is an unreasonable and unjust charge. A tie is generally made of oak, and is 6 x 8 inches, 8 feet long, which is of a convenient shape and size to handle, and is such freight as is not liable to injury in transit. A tie is a hewed stick of lumber of the above dimensions and will weigh 160 pounds, which makes the rate a fraction over twenty-five cents per 100 pounds. In proof that said charge is unreasonable your petitioner will state that said Railroad Company charges a rate of eighteen cents per 100 pounds on sawed oak lumber from here to Kansas City.

Your petitioner further charges the St. Louis, Arkansas & Texas Railroad Company

with the violation of the second section of said Act, in this,—that said Railroad Company refuses to transport for your petitioner from this place to Kansas City, Missouri, which is in another State—hewed lumber or ties, for a less rate than 40½ cents each, which is a fraction over twenty-five cents per 100 pounds, while it transports for other parties oak lumber that is sawed, to and from the same points, at eighteen cents per 100 pounds. For the purpose of concealing the discrimination said Railroad Company will not quote you a rate per 100 pounds on ties or hewed lumber; that there is no difference between hewed and sawed lumber; that it is "a like and contemporaneous service in the transportation of a like kind of traffic, under substantially similar circumstances."

Your petitioner further charges the said St. Louis, Arkansas & Texas Railroad Company with a violation of the third section of said Act, in this—that said Railroad Company gives "undue and unreasonable" preference to sawed lumber, as against hewed lumber, when they are substantially the same thing, which is a discrimination against a "particular kind of traffic."

Your petitioner asks that said Railroad Company be ordered to discontinue said discrimination, and that hewed lumber or ties be transported at the same rate per 100 pounds as sawed lumber.

And your petitioner would further ask that if you find that said Company has violated the Law, that the lowest penalty be assessed, as this petition is filed solely with the view of forcing the said Railroad Company to do that which it ought to do without being forced, viz.: transport your petitioner's hewed lumber at the same rate that it does your petitioner's sawed lumber, who is also engaged in running a saw mill on said Railroad, and shipping lumber to Kansas City, Missouri.

(Signed) Geo. M. Jackson.

Subscribed and sworn to before me, a Justice of the Peace within and for the County aforesaid.

June 2, 1887.

ANSWER.

(Filed June 23, 1887.)

To the Interstate Commerce Commission,

Hon. Thomas M. Cooley, Chairman:

Now comes the St. Louis, Arkansas & Texas Railway Company in Arkansas and Missouri, and for answer to the petition of George M. Jackson, of St. Francis, Clay County, Arkansas, dated June 1, 1887, respectfully states as follows:

First. It denies that it has violated the first section of the Interstate Commerce Law, as alleged in the first paragraph of said petition, and specially denies that it refuses to ship ties of hewed timber, for the petitioner, for less than 40½ cents each from St. Francis to Kansas City, and denies that it ever had a rate on hewed cross ties of 40½ cents from St. Francis to Kansas City, or that it has ever charged, or offered to charge, the petitioner at the rate of 40½ cents each for hewed cross ties between the points named.

Further answering the said first paragraph of

said petition, it admits that a tie is generally made of oak, 6x8 inches, 8 feet long, and that such freight is not liable to injury in transit, but denies that the weight thereof is 160 pounds, and says that the weight thereof would average about 180 pounds in the condition in which they are usually shipped.

And further answering said petition, it denies that it has violated the second section of the Interstate Commerce Law, as alleged in the second paragraph of said petition, and denies that it has refused to transport for petitioner hewed timber or ties from St. Francis, Arkansas, to Kansas City, Missouri, at a less rate than 40½ cents each; but admits that it transports oak timber, which is sawed, from St. Francis, billed for Kansas City, Missouri, at a through rate of eighteen cents per 100 pounds.

It denies that it discriminates against hewed timber or ties, as alleged, and denies that it refuses to quote rate per 100 pounds on ties or hewed timber for the purpose of concealing any such discrimination; denies that there is no difference between hewed and sawed timber, and denies that the hauling of the one class is a like contemporaneous service in transportation of a like kind of traffic under substantially similar circumstances.

And further answering said petition, it denies that it has violated the third section of said Interstate Commerce Law in giving undue or unreasonable preference to sawed lumber as against hewed timber, and denies that they are substantially the same thing.

And for further answer to said petition, it says that in transporting ties or timber or other material from St. Francis, Arkansas, to Kansas City, Missouri, it does the same in connection with the Kansas City, Springfield & Memphis Railway Company, the line of which latter road it crosses at Jonesboro, Arkansas; that this respondent has no line of its own road, or any line that it controls, which reaches Kansas City or any point nearer to Kansas City than Jonesboro, Arkansas; that at no time has it ever charged or attempted to charge a rate between St. Francis and Kansas City for the amount of 40½ cents per cross tie; that previous to the 23d day of May, 1887, the rate between St. Francis and Kansas City was forty cents, but on said last named day it was reduced for cross ties to 33½ cents per tie. The special order fixing this rate is filed with your honorable Commission, and is numbered I. S. 136, and this rate has been maintained since said time, and was in force at the time petition was filed.

Further answering, respondent states that said rate is reasonable and just, and has not been complained of by any person other than petitioner.

Further answering, respondent says that hewn ties, such as are usually offered for transportation, weigh about 180 pounds, instead of 160 as stated in the petition; that they are usually offered for transportation while green and while they are wet, and may be reduced by seasoning from about 180 pounds to 160 pounds if left to dry before they are transported; yet as a matter of fact those offered for shipment on respondent's road are nearly always so offered before they are so seasoned.

INTER 8.

Further answering, respondent states that in charging a rate per tie rather than by the 100 pounds, as is customary with sawed timber, it is following the ordinary custom of railroads west of the Mississippi River in the handling of such freights. Hewn ties are always sold at so much per ties. They are of unequal size. Along the line of respondent's road they are nearly always cut from swampy, wet lands; and to charge per 100 pounds would be an injustice to those parties, causing them to have to pay more for transporting cross ties than if the same tie was cut from upland. If the rate was made per 1,000 feet, there would necessarily be disputes as to the number of feet in a tie, from the fact that being hewn they are necessarily of innumerable shapes, rendering accurate measuring difficult. For these reasons respondent and other railroads west of the Mississippi River have found it to the mutual advantage of shippers, consumers and themselves to make rate per tie instead of in any other manner. The rate at present charged, of 33½ cents per tie from St. Francis and contiguous stations, to Kansas City, is a reasonable rate for the service performed; and when the weight of each tie is taken into consideration is about the same rate per 100 pounds as is charged for sawed timber, of which rate the petitioner has not complained and with which it seems to be satisfied; therefore respondent states that in making the rate as hereinbefore set forth it has violated no part of the Interstate Commerce Law, has followed the usual and ordinary course as adopted by railroads of the section of the country in which it operates, and has charged but a reasonable rate, without discrimination, and is therefore entitled to be hence discharged with its costs. It therefore prays for such order in the premises.

The St. Louis, Arkansas & Texas Railway Company in Arkansas and Missouri.

By Phillips & Stewart, General Attorneys.

The State of Missouri, }
The City of St. Louis. } ss.

Before me, the undersigned notary public within and for the City of St. Louis, and State of Missouri, personally appeared D. Miller, who being by me duly sworn according to law, upon his oath, deposeth and saith that he is the General Freight and Passenger Agent of the St. Louis, Arkansas & Texas Railway Company in Arkansas and Missouri, and that he has read the foregoing answer and knows the contents thereof, and that the allegations contained therein are true to the best of his knowledge, information and belief.

GEORGE RICE

ST. LOUIS, IRON MOUNTAIN & SOUTHERN R. CO.*

(No. 52.)

SYNOPSIS of pleadings.

COMPLAINT.

Defendant is a corporation organized, etc., in Missouri and Arkansas and engaged in transportation from St. Louis to Newport, Little Rock and Texarkana in Arkansas, and beyond.

In the transportation of oil two methods are employed: (a) by box cars, carrying the oil in barrels; (b) by tank cars holding 100 barrels and upwards.

Complainant manufactures and deals in oils at Marietta, Ohio, where he has large capital invested. He would have produced and sold many thousand more barrels of oil but for the wrongful acts of defendant.

Many of complainant's principal markets are in the territory reached by defendant's road.

The Waters-Pierce Oil Co., a Missouri corporation, is a large dealer in and shipper of oils, and is complainant's chief and almost sole competitor in said markets.

The defendant has violated the Interstate Commerce Act, as follows:

First Charge. By making charges for transporting oil from St. Louis, "which were in themselves unjust and unreasonably high."

As specifications, under charge 1, rates charged July 7, 1887, are given.

Second Charge. Defendant has charged complainant higher rates for the same services than it has charged said Waters-Pierce Oil Co., in transporting oils from St. Louis to points in States other than Missouri. The Waters-Pierce Oil Co.—being sometimes consignor and

sometimes consignee and sometimes both consignor and consignee.

Specifies comparative rates thus:

Rates per bbl. since April 5, 1887.

Destination,	To G. Rice,	To Waters-Pierce Oil Co.
Newport, Ark.	91 cts.	50 cts.
Little Rock, "	91 "	50 "

Defendant charges complainant for actual weight and charges the Waters-Pierce Oil Co., in many instances for much less than weight.

Third Charge. Undue and unreasonable preference to the Waters-Pierce Oil Co.

Specifications. Repeats specification No. 1, under second charge, and avers that the differences in rates are not measured by differences in the circumstances, and that the differences in cost, convenience, etc., to the carrier, if any, are insignificant in comparison with the difference in rates. This discrimination has had, and complainant believes was intended to have, the effect of giving said Waters-Pierce Oil Co. a monopoly at the points reached by defendant's line, and to exclude complainant's products entirely from said markets.

Prayer. For investigation, and that the Commission will report to what reparation complainant is entitled; and will require defendant to cease and desist from such violations, etc., and for general relief.

ANSWER.

Admits that defendant is a common carrier, as alleged, that it transports oil from St. Louis as alleged either in barrel packages, in box cars, or in tank cars. Is not informed as to capital invested by complainant. Admits that the Waters-Pierce Oil Co. is a shipper of oil, but is not informed whether it is complainant's chief competitor.

To Charge First. Defendant's charges for transporting refined petroleum oil from St. Louis to Newport and Little Rock, Arkansas, \$50 per box car containing 55 bbls., i. e., a little more than 90.9 cents per bbl.; and from St. Louis to Texarkana, Arkansas, forty-five cents per 100 lbs., not sixty-seven cents.

Denies that these rates are unjust, etc.

To Charge Second. The rates charged to complainant, to said Waters-Pierce Oil Co., and to all, are the same: to be shipped in bbls., 90.9 cts. per bbl.; and when shipped in tank cars, \$50 per tank car.

Denies discrimination in favor of said Waters-Pierce Co., or any other shipper.

Denies that it has discriminated against Rice in matter of "weights."

Denies that it has charged Rice at any time since April 5, more than it has charged the Waters-Pierce Oil Co., or any other shipper "for like and contemporaneous service performed under substantially similar circumstances and conditions."

To Third Charge. Denies giving unreasonable preference or subjecting complainant, etc.; denies that any charges were designed to have the effect of giving said Waters-Pierce Oil Co. any monopoly or to exclude complainant, etc.; answer to second charge to be deemed repeated here; and asserts that the circumstances, etc., under which oil is shipped in barrels

*This case, and cases Nos. 53 to 60 inclusive on the Docket of the Commission, following, belong to the group of cases based upon allegations of discrimination in favor of the Standard Oil Company and others, in rates for the transportation of oil, of which Rice v. Louisville & Nashville R. R. Co., (the complaint in which is given in full on page 576, ante, and the answer on page 443, ante), is one. As all the cases are based upon the same general grounds, it is thought that a synopsis of the pleadings will suffice to give all the desired information in reference to them.

and in tank cars "are so dissimilar as to prevent one rate being taken as a standard whereby to measure the other," and that if they are compared it will be found that neither relatively to the other is unjust.

George RICE

MOBILE & OHIO R. CO.

(No. 53.)

SYNOPSIS of pleadings.

COMPLAINT.

Complaint alleges defendant is a corporation existing in Illinois, Kentucky, Tennessee, Mississippi and Alabama, and is a common carrier, etc., engaged in transportation from Cairo, Illinois, to Rives and Jackson, in Tennessee; Columbus and Meridian, in Mississippi; and Chunchula, Eight Mile and Mobile, in Alabama.

Allegations as to complainant's business same as in case 52.

Charges violations of Act as follows:

1. Charges unreasonably high in themselves; specifies rates from Cairo thus:

Destination.	Rate per 100 lbs.
Columbus, Miss.	58 cts.
Lauderdale, "	68 "
Meridian, "	84 "
Enterprise, "	68 "
Shubuta, "	76 "
Eight Mile, " (sic)	76 "

and to other points not in Illinois as in tariffs required to be filed.

2. Defendant has charged more for a less than for a greater distance "over the same line," etc., repeating the words of the Act.

Specifies

From Cairo to	Distance.	Rate per 100 lbs.
Shubuta, Miss.	396	76 cts.
Eight Mile, " (sic)	483 4-10	76 "
Mobile, " (sic)	491 4-10	84 "

(Prayer as in No. 52.)

ANSWER.

Defendant is a corporation under the laws of Alabama, Mississippi, Tennessee and Kentucky, authorized to build a railroad from Mobile, Alabama, "to a point at or near the mouth of the Ohio River, in Kentucky," and is now operating such road.

Has no knowledge of complainant's business. Denies violation of the Act.

3. *To First Charge.* Denies that the rates set forth in petition are unreasonably high, says that the rate of thirty-four cents per 100 lbs. "per car load" from Cairo to Meridian (357 miles) is unreasonably low,—but is necessary, owing to competition "due to a combination of rates of steamers plying up and down the Mississippi River, with the rates of the Vicksburg & Meridian Railroad within the State of Mississippi," both said carriers being outside of the jurisdiction of the Commission. Said rate could be availed of by petitioner. All defendant's charges are just and reasonable "un-

der the circumstances, conditions and necessities of the business of the defendant."

To Second Charge. Admits that its tariffs filed with the Commission provide seventy-six cents per 100 lbs. (per car load) from Cairo, Illinois, to Shubuta, Miss., 396 miles; and seventy-six cents from Cairo to Eight Mile, Ala., 485 miles; and twenty-four cents from Cairo to Mobile, Ala., 492 miles; admits greater charge for shorter distance over, etc. (quoting statute), that the oils are of like kind and character, and justifies under order of relief granted April 16, 1887.

Further answering all charges. Since expiration of said order, where more has been charged for shorter haul, denies that such transportation was under similar circumstances and conditions.

Further answering. The rate of twenty-four cents from Cairo to Mobile was fixed by competition with water lines and combinations of rates by water lines with rates from New Orleans to Mobile.

Further answering, says that the rate of thirty-four cents per 100 lbs. from Cairo to Meridian, Miss., is fixed by competition with rates made by combination of steamer rates (on Ohio and Mississippi Rivers), with rates of Vicksburg & Meridian Railroad (wholly within Mississippi), and also by competition with the short rail line from Marietta, Ohio, to Meridian over the Cincinnati, New Orleans & Texas Pacific. Such competition is beyond the jurisdiction of the Commission.

Defendant is expressly authorized by the Act "to meet competitive rates fixed by causes beyond the jurisdiction of the Commission."

Further answering. Rates for oil in bbls. per 100 lbs. are:

From Mobile north to Eight Mile, 8 cts.

From Mobile (97 miles) to Shubuta, Miss., 80 cts.

From Mobile (120 miles) to Enterprise, Miss., 88 cts.

Denies damage to complainant.

Defendant has revised its rates since filing of petition, which are now as follows:

From Cairo to	Distance.	Rate per 100 lbs.
Columbus, Miss.	287	37 cts.
Lauderdale, "	339	48 "
Meridian, "	357	45 "
Enterprise, "	373	45½ "
Shubuta, "	396	47½ "
Eight Mile, Ala.,	485	54 "
Mobile, "	492	81 "

George RICE

v.

EAST TENNESSEE, VIRGINIA & GEORGIA R. CO.

(No. 54.)

SYNOPSIS of pleadings.

COMPLAINT.

Defendant is a corporation organized and existing in Tennessee, Georgia, Alabama and Mississippi. Is a common carrier, etc., from Chattanooga, Tennessee, through Tennessee,

to Boston for merchandise which to said points on the coast east of same as the rate to New York. of Portland and the points on the of Portland, mentioned in the petition, and the circumstances and attending transportation thereto are dissimilar from those attending and transportation to points on the Portland.

true that the same rates have been charged on west bound freight, from Chicago, as from New York to Chicago, by Boston is put upon an equality of ports of entry, and with other without such equality the western the Boston and New England manufacturer and merchant, by reason of the competition of manufacturers and merchants of the cities, ports of entry and States of the West would be seriously and diminished, and the said railroads would be deprived of a large and business.

Lake Shore & Michigan Southern Railway Company asks that the prayers of the petition be granted.

DRESSED MEAT CASES.*

(Nos. 31 to 40 on Docket.)

ARMOUR & CO.

vs.
Baltimore & Ohio R. R. Co.

(No. 31.)

(Answer filed July 6, 1887.)

Following is the answer of the Baltimore & Ohio R. R. Co. to the complaint of Armour & Co. (The complaint in this case is, inception of the names of parties,

None of these cases was originally set for trial at Chicago, but at the Commission at Rutland, Vt., on September 7, 1887, it was ordered, by consent of parties, that the trial should be had at Washington, on September 11, 1887.

etc., the same as that in the case of *Nelson Morris & Co. v. Lake Shore & Michigan Southern R. R. Co.* which is given in full, *ante*, 303.)

ANSWER.

To the Honorable, the Interstate Commerce Commission:

The Baltimore & Ohio Railroad Company, in answer to the petition filed in the above matter, says:

1. It admits the allegation contained in the first paragraph, and also that the allegations in the second paragraph are substantially true, so far as they allege the carriage by it of the petitioners' dressed meats and meat provisions between the terminus of the Baltimore & Ohio Railroad in the City of Chicago, and its terminus in the City of Baltimore. But it denies that it has ever carried the shipments of petitioners to points on the eastern seaboard other than Baltimore.

2. Respondent does not know what sidings the petitioners have provided in connection with their slaughter houses, etc., at point of shipment, those slaughter houses not being contiguous to, or in any way connected with, any of the tracks of the respondent's road; but it denies that the petitioners have provided any sidings or tracks at the City of Baltimore. On the contrary, all the tracks at the point of destination used in handling or discharging refrigerator cars of the petitioners' over or on the respondent's railroad are furnished by the respondent at its own expense.

While the respondent admits that the petitioners "furnish ice, provide the labor for relcing in transit, load and unload the cars, and ship the meats at their own risk of refrigeration and condition" yet it denies that it is relieved from all special expense, labor and risk attending the transportation of such property, and avers that on the contrary it is subjected to special expense, labor and risk in the transportation of the petitioners' meat, some of the particulars of which are hereinafter stated.

3. Respondent admits that the table of rates on dressed beef contained in the fourth paragraph of the petition, is substantially correct, and that the rate which went into effect March 1, 1886, has continued in force from that date to the present time; but it calls attention to the fact that the table itself shows that this rate was established on the first of March, 1886, and not on the fifth (see page 8), of April, 1887, and that the passage of the Interstate Commerce Act had nothing to do with the establishment of the rate as the statements in the fourth section of the petition would seem to imply.

Respondent further states that the rates during a great part of the period covered by the table, were affected by special circumstances and were the result of active competition between the railroads running from Chicago to the seaboard and of the cutting of rates on the part of some of said roads; and that in particular the rates of forty, thirty-two and 48½ cents respectively, which are cited in the fourth paragraph of the petition to show what the respondent has heretofore deemed a remunerative rate, were not established or fixed by its judgment of what would be a fair and reason-

able remunerative rate for the service, but were forced upon it by special circumstances referred to above.

Respondent denies that the rate of forty cents for 100 pounds was a fairly remunerative rate, and denies that the rates now charged are unjust or unreasonable for the services rendered; but, on the contrary, it alleges that such rates are only fairly remunerative and are wholly just and reasonable.

4. The respondent admits that the rates now charged are fixed by agreement between it and certain other common carriers, but denies that the rates were so fixed for the purpose of destroying competition between the carriers, or that respondent refuses, because of such agreement, to make petitioners just and reasonable rates for the service rendered, or that it is the purpose of any combination between the respondent and other carriers to prevent the petitioners or other shippers from obtaining just and reasonable rates; and further denies that the respondent would establish less rates for the services performed, if not prevented from so doing by its agreement with other carriers.

Respondent denies the allegations contained in the first clause of the seventh paragraph of the petition, and states that meat provisions and beef, sheep and hog products, such as side meats, partly cured or cured, beef, pork and pickled tongues in barrels or tierces, loose green hams, loose salt hams, salt tongues, beef and pork hams, are not like kinds of property with the dressed beef, sheep and hogs, and that they are not transported by this respondent under similar circumstances and conditions, with such dressed beef, sheep and hogs.

The respondent further denies the accuracy of the first table contained in paragraph 7 and states that while the rates on side meats, pork and beef hams in tierces or barrels, and on salt or pickled tongues, are as stated in the table, the tariff rates on loose green hams and other similar meat provisions, are five cents per 100 pounds higher than those stated, and that the tariff rates on the articles mentioned in the second column of said table, to wit: side meats, pork or beef hams in tierces or barrels, salt or pickled tongues, loose green hams and other similar meat provisions, are not made under conditions of refrigeration; but, on the contrary, they are made for shipments in ordinary cars of the respondents.

It is denied that the articles mentioned above require refrigeration, except under special conditions and at special times. The tariffs upon those articles are made with reference to shipments which are not refrigerated; moreover, respondent avers that the circumstances and conditions under which the above mentioned articles are carried differ from those under which the dressed beef, sheep and hogs of the petitioners are carried in the following, among other particulars:

The dressed beef of the petitioners is invariably carried in heavy refrigerator cars, weighing about 37,000 lbs. to 43,000 lbs., empty, as against about 25,000 to 26,000 lbs. the weight of an ordinary car, in which the other articles above mentioned are carried. To the weight of the empty refrigerator car must be added that of the ice used for refrigeration. The capacity in paying freight of these refrigerator

appointed, commissioned and qualified, and authorized by law to administer oaths and take acknowledgments.

In testimony whereof I hereunto set my hand and affix the seal of the said Circuit Court for said Garrett County, this fifth day of July, A. D. 1887.

E. Z. Tower, Clerk.

Nathaniel W. HOWELL *et al.*,

v.

NEW YORK, LAKE ERIE & WESTERN R. R. CO., New York, Ontario & Western R. Co., New York, Susquehanna & Western R. R. Co., and Lehigh & Hudson River R. R. Co.*

(No. 4 on Docket.)

PLEADINGS in a proceeding based upon allegations of the exaction of unreasonable and unjust charges for the transportation of milk, now pending before the Commission.

The hearing of the case was entered upon on July 13, 1887, but not being then concluded it was postponed to a day to be agreed upon.

COMPLAINT.

To the honorable body of Interstate Railroad Commissioners of the United States:

Gentlemen:

The petition of Nathaniel W. Howell, Hiram A. Pooler, Charles M. Thompson, Cornelius B. Wood and A. T. Moshier, residents and taxpayers of Orange County, in the State of New York, and duly commissioned to represent the farmers and milk producers of said county show:

First: That the New York, Lake Erie & Western Railroad Company is a duly incorporated Railroad Company running through the States of New York, New Jersey & Pennsylvania.

Second: That said Railroad Company runs in and through the County of Orange aforesaid a distance of about fifty miles.

Third: That your petitioners and those by them represented, transport daily over the line of said Railroad Company large quantities of milk from various points in said county to the City of Jersey City, in the State of New Jersey.

Fourth: That in the estimation of your petitioners and those by them represented, the rate charged by said Railroad Company for transporting milk from points in said county to the City of Jersey City, in the State of New Jersey, a mean distance of about fifty miles is unreasonable and unjust.

Fifth: That said charges are unreasonable and unjust for the following reasons:

That the rate charged by said Railroad Company from and to the points aforesaid amounts to the 35 per cent of the value of said product,

or at the rate of thirty-five cents per 100 pounds with 5 per cent additional for ferriage, from Jersey City to New York City; whereas, other classes of freight and produce of equal value are transported by said Railroad Company from and to the points aforesaid and generally delivered in the City of New York for a less rate, and with no greater risk attached.

Sixth: That in the estimation of your petitioners such charges being unreasonable and unjust, the continuance thereof by said Railroad Company is contrary to and in violation of the latter clause of section 1 of the Interstate Commerce Law.

Seventh: And your petitioners further show that the said New York, Lake Erie & Western Railroad Company charge for transporting milk to the City of Jersey City from Summit in the State of New York a distance of 184 miles from Jersey City, the same rate for a like service from points in Orange County, a mean distance of fifty miles.

That in the estimation of your petitioners said Railroad Company, by such rates and charges and discriminations, demands, collects and receives from other persons (by special rate), for doing a like and contemporaneous service in the transportation of a like kind of traffic under substantially similar circumstances and conditions a less compensation for such service contrary to and in violation of section 2 of the Interstate Commerce Law.

That in the estimation of your petitioners the rates charged by said Company for transporting milk, being no greater for a longer than a shorter distance, is an undue and unjust preference and advantage to particular persons and localities, and subjects your petitioners and the persons by them represented, and the locality in which they reside, and their particular description of traffic to an unjust and unreasonable prejudice as against other persons and localities contrary to and in violation of section 3, of the Interstate Commerce Law.

Eighth: And your petitioners further show that the New York, Ontario & Western Railroad, and the New York, Susquehanna & Western Railroad and the Lehigh & Hudson River Railroad, are corporations doing a general freight and passenger business, the former running through a portion of Orange County, N. Y., with a terminus in the State of New Jersey, and the two latter passing through the States of New York and New Jersey and a portion of Orange County aforesaid.

Ninth: With the exception of the New York, Ontario & Western Railroad Company which charges an advanced rate of three cents per 100 pounds for transporting milk from points west of Bloomingburgh, in the County of Sullivan, the allegations of your petitioners are equally applicable to the last named corporations as to the New York, Lake Erie & Western Railroad Company, and are to be so regarded.

Wherefore, by reason of the allegations aforesaid your petitioners pray that your honorable body will take such immediate action in the premises as shall seem just and equitable, to the end that the said corporations complained of may be restrained from a further continuance of the acts complained of, and that such other and further relief may be afforded your

*See *Re Milk Traffic*, ante, 24, 232, 315.

petitioners as shall, in the estimation of your honorable body, be deemed proper.

And your petitioners will ever pray, etc.,

(Signed) Nat. W. Howell, C. B. Wood,
H. A. Pooler, Chas. M. Thompson,
A. T. Moshier.

State of New York, } ss.
County of Orange. }

Nathaniel W. Howell, Hiram A. Pooler, Cornelius B. Wood, Charles M. Thompson and A. T. Moshier of said county being sworn say, and each for himself says, that they have read the foregoing petition, that the facts therein stated of their own knowledge are true, and that the facts therein stated to be alleged on information and belief they believe to be true.

(Signed) Charles L. Mead, Notary Public.
[L. S.]

Sworn to before me, this
19th day of April, 1887.

ANSWER OF NEW YORK, LAKE ERIE & WESTERN R. R. CO.

The New York, Lake Erie & Western Railroad Company, for an answer to the complaint in the above entitled matter, respectfully shows:

First: It admits that it is a duly incorporated railroad company, whose lines of railroad extend into the States of New York, New Jersey and Pennsylvania, and that about fifty miles of the main stem thereof are in the County of Orange, in said State of New York.

Second: It denies that all of the petitioners herein transport daily over its line large quantities of milk from various points in said county to the City of Jersey City, in the State of New Jersey, as they have alleged in their petition; and upon information and belief it also denies that the said petitioners are duly commissioned to represent the farmers and milk producers of the said County of Orange, as is further alleged in said petition.

Third: The said Railroad Company denies the allegations contained in the fourth paragraph of said petition to the effect that the rate charged by it for transporting milk from points in said county to the said City of Jersey City, a mean distance of about fifty miles, is unreasonable and unjust; but on the contrary it avers that said charges are reasonable and just, as will fully appear from the facts hereinafter stated.

Fourth: And it also denies that said charges are unreasonable and unjust as is alleged in the fifth paragraph of said petition; and it further avers that the reasons stated by the petitioners in support of their allegations are not in accordance with the facts, because it avers that the rate which the said Company charges is not 85 per cent of the value of said product, but on the contrary is only thirty-five cents per can, of forty quarts each, which weigh about 100 pounds, and that the said charge of thirty-five cents per can, as above stated, includes the expense of returning the empty cans from Jersey City to the points from which the milk was shipped, for which service no additional charge is made, although the empty cans require the same service in handling as full cans do. And said Company further avers that it

does not receive the five cents per can ferry charges, as is alleged in said petition.

It also denies that it transports milk at any less rate for any one person, company, firm or corporation, than for another, or that it subjects any particular person, company, firm, corporation or locality, to any undue prejudice or disadvantage in any respect whatsoever, or that it gives any special rate to any shipper of milk.

Fifth: And the said Railroad Company further denies that its charges are unreasonable and unjust, and that the continuance thereof by it would be contrary to, and in violation of, the latter clause of section 1 of the Interstate Commerce Law, as is alleged in the sixth paragraph of the petition.

Sixth: The said Railroad Company admits that it charges for transporting milk from Summit, in the State of New York, to Jersey City, in the State of New Jersey, a distance of about 184 miles, the same rates that it charges from points in Orange County, New York, to said Jersey City, New Jersey, a mean distance of about fifty miles. But said Company avers that said rates which it charges as aforesaid are not unreasonable and unjust for the following reasons:

That milk is a perishable commodity, and must reach its market within a few hours after it is made ready for shipment by the producer; that all the milk carried on said road is sold in the Cities of New York and Brooklyn, and is delivered by the dealers or peddlers to consumers in those cities early in the morning, and that it must, therefore, arrive at Jersey City not later than midnight, so that it may be taken away by the consignees, and distributed before the early hour at which it must be delivered to the consumer.

That in order to insure the arrival of the milk in proper condition, and in time to reach its market, said Company is obliged to run two trains each way daily, consisting of about thirteen cars each, especially for the transportation of this traffic; that during the winter, to prevent the milk from freezing, said Company is obliged to heat the cars by stoves, that the trains have to be run at a high rate of speed, equal to that of an ordinary passenger train, for which are required cars, equipped with Miller platforms and Westinghouse airbrakes, and much more expensively constructed than the cars in the ordinary freight service; that the milk is shipped in various lots ranging from one can to 200 cans, and more frequent stops are necessary than with other trains, intermediate milk stations being established solely for the accommodation of milk shippers; that the fast time necessary to be made by the trains increases the risk of accidents, and requires the employment of larger crews in order to handle the cans, and arrange them convenient for quick delivery, and also entails greater expense for fuel and maintenance of equipment; that the consignees of the milk who take it away in wagons from Jersey City, assemble there so as to meet the trains, about the time of their arrival, and are so numerous and require so much room for their accommodation that extra men have to be employed to make the delivery, and separate delivery sheds and grounds have to be provided and maintained; that the

dealers or consignees who come for the milk at Jersey City, cross from New York or Brooklyn, and ferries have to be run for several hours during the night for their accommodation, at large expense, there being during those hours very little, or none other, business passing from one side of the river to the other and the fares paid by the milkmen being insufficient to meet the cost of operating the ferries.

That milk is time freight and delay of a few hours in arrival, by accident, or otherwise, would render the whole cargo comparatively worthless, because even if the milk were not spoiled, the demand for the day would have passed, and that for the next day would be met by the following shipment.

That the trains coming in at night have to go out early in the following morning to carry back to the shipper the cans brought in by the trains on the previous day, and returned empty, so that he may receive them before night, and in time to use them on the following day; that it requires the same number of cars to return the empty cans that it does to bring them down loaded, and the equipment used in the milk traffic can therefore be used for no other purpose, consequently, the return trip of the cars employed in such traffic brings no revenue whatever to the Company (the carriage of the empty cans being included in the charge of thirty-five cents, as already stated).

Said Company further shows and alleges that having regard to the cost and character of the service, and the facilities and accommodations afforded, the rate on milk is lower comparatively than that made on any other class of freight.

Seventh: The said Railroad Company further avers that ever since the establishment of the business of transporting milk from remote points to the Cities of New York and Brooklyn (about forty years ago), it has been the custom of all the common carriers engaged in that business to charge a uniform fixed rate per quart or gallon for the milk so transported, irrespective altogether of the length of the haul; and that the same custom now prevails among all the common carriers engaged in transporting milk to the Cities of New York and Brooklyn. This custom owes its origin, and long continuance, to the fact that milk is sold to all consumers in the cities aforesaid at a uniform price for the quantity sold; and it was therefore deemed better and more satisfactory for all parties interested to have one uniform charge made for transporting milk, irrespective of distance, instead of prorating for the same according to the length of the haul.

And it is averred that up to, or about, the time of filing this petition, the establishment and observance of the custom aforesaid regulating the charge for transporting milk gave a general, if not universal, satisfaction, and that there is not now any legal or just ground for complaint against the same.

Eighth: And the said Railroad Company further avers that it is of the greatest importance to the citizens of New York and Brooklyn, as well as to the other consumers of milk, to have the area for the production thereof enlarged as much as possible, instead of having the same

narrowed and circumscribed, which would be the effect of granting the prayer of the petitioners; because the practical effect of so doing would be to enable the petitioners to establish a monopoly in the milk business by preventing the establishment of dairy farms and creameries at a greater distance than fifty miles from New York City.

The business of producing milk is a peculiar one, confined to few localities in comparison with the raising of other farm products, and requires therefore all lawful and reasonable encouragement for the establishment and successful working of dairy farms and creameries.

Ninth: And this Railroad Company avers, upon information and belief, that quite a number of persons relying upon the custom hereinbefore mentioned of making the same charge for the transportation of milk irrespective of the length of the haul, have established dairy farms and creameries at or near Summit, and at various points between there and the points in Orange County, New York, mentioned in the petition; and the said Railroad Company further avers that to make any change in the rates heretofore charged for the transportation of milk would cause great loss and damage to the parties who have established such dairy farms and creameries, as aforesaid.

Tenth: And the said Railroad Company denies that by conducting the milk business in the manner, and for the rates and charges hereinbefore stated, it has done anything unlawful, or improper, or in violation of the second and fourth sections of the Interstate Commerce Law, or any other section or provision thereof.

Eleventh: And this Railroad Company finally says that having answered fully and particularly each and all of the allegations of said petition, it prays that the same may be dismissed.

The New York, Lake Erie & Western Railroad Company.

By J. A. Buchanan, Attorney.

State of New York,
City and County of New York. } ss.

John S. Hammond, being duly sworn, says that he is the General Freight Agent of the New York, Lake Erie & Western Railroad Company, the defendant named in the foregoing answer, and that he has read the same and knows the contents thereof, and that the same is true, of his own knowledge, except as to the matters therein stated to be alleged upon information and belief, and that as to those matters he believes it to be true.

Sworn to before me this }
26th day of May, 1887. }

(Signed) J. S. Hammond,
Geo. E. Grant & Co. Notary Public,
[L. s.] N. Y. City.

ANSWER OF NEW YORK, ONTARIO & WESTERN R. Co.

The New York, Ontario & Western Railway Company answering the complaint in the above entitled matter:

First. Demands that the said complaint be dismissed, because it contains no statement of facts as against said Company, showing any

violation by said Company of any provision of the Act of Congress, approved February 4, 1887, entitled "An Act to Regulate Commerce," nor any omission on the part of said Company to do anything that by the provisions of said Act it is required to do.

1. By the ninth paragraph of the complaint, the said Company is expressly excepted from the allegations of said complaint.

2. The allegations as against the New York, Lake Erie & Western Railway Company, which the complainants allege show a violation of the provisions of the said Act by that Company, do not apply to the New York, Ontario & Western Railway Company for the reasons (which appear upon the complaint) that the said New York, Lake Erie & Western Railway Company is alleged to charge a certain rate for the transportation of milk from various points upon its road in the County of Orange, to the City of Jersey City, in the State of New Jersey, with 5 per cent additional for ferriage from Jersey City to New York City, which rates the complaint alleges are unreasonable and unjust: Whereas, it appears by the said complaint that milk transported by this Company is carried upon its own road; that such road does not terminate in Jersey City, and that the milk carried upon its road is not carried between the same points as to which it is alleged that the Erie Company make an unreasonable or unjust charge.

3. That the complaint as against this Company is too vague and indefinite and insufficient to base any proceeding under the said Act, and would not furnish the Commission with any facts upon which it could formulate or make any judgment or order.

Without waiving the foregoing objections to the insufficiency of the complaint, the said Company for a further and separate answer admits that it is a corporation doing a general freight and passenger business, and that its railroad runs through a portion of Orange County, in the State of New York, with a terminus in the State of New Jersey, but denies that it transports milk from Summit or any other point in the County of Orange or in the State of New York to Jersey City, or makes any charges or rate for transportation of milk, between Summit or any other point and Jersey City.

It also denies that it charges for the transportation of milk 35 per cent of the value thereof, or at the rate of thirty-five cents per 100 pounds; and it also denies that the rates charged by it for transporting milk upon its railroad, are unreasonable and unjust.

It also denies that it transports milk at any less rate for any one person, company, firm or corporation than for another, or that it subjects any particular person, company, firm, corporation or locality to any undue prejudice or disadvantage in any respect whatsoever, or that it gives any special rate to any shipper of milk.

It also denies that it transports any freight or produce, under similar circumstances and conditions, at a less rate than that charged for the transportation of milk.

Said Company further answering, shows and alleges that the terminus of its road in the State of New Jersey, is at Weehawken on the

west bank of the Hudson River; that its railroad passes through a portion of the County of Orange, in the State of New York, and that it charges for the transportation of milk in cans from points in said county to Weehawken, and the return of the can empty to the point of original shipment, thirty-five cents per can; that the can weighs twenty pounds, and contains forty quarts of milk, weighing eighty pounds; that the average distance of transportation of milk from points in Orange County to Weehawken is seventy-seven miles, and that the rate charged by said Company for such transportation of the milk, and return of the can, is at the rate of twenty-nine cents per 100 pounds; that the full load per car of milk in cans is ten tons, while the load per car returning with the empties is but two tons.

That the milk is a perishable commodity and must reach its market within a few hours after it is made ready for shipment by the producer; that all the milk carried on said road is sold in the Cities of New York and Brooklyn, and is delivered by the dealers or peddlers to consumers in those cities early in the morning, and that it must, therefore, arrive at Weehawken not later than midnight, so that it may be taken away by the consignees, and distributed before the early hour at which it must be delivered to the consumer.

That in order to insure the arrival of the milk in proper condition, and in time to reach its market, said Company is obliged to run trains especially for the transportation of this traffic; that during warm weather, to preserve the milk, the Company is obliged to cool the cars with ice, placed in refrigerators in the cars, and during winter, to prevent it from freezing, is obliged to heat the cars by stoves; that the trains have to be run at a high rate of speed, equal to that of an ordinary passenger train, for which are required cars, equipped with Miller platforms and Westinghouse air-brakes, and more expensively constructed than the cars in the ordinary freight service; that the milk is shipped in small lots ranging from five to forty cans, and more frequent stops are necessary than with other trains, intermediate milk stations being established solely for the accommodation of milk shippers; that the fast time necessary to be made by the train increases the risk of accidents, and requires the employment of larger crews in order to handle the cans, and arrange them convenient for quick delivery, and also entails greater expense for fuel and maintenance of equipment; that consignees of the milk who take it away in wagons from Weehawken, assemble there so as to meet the train, about the time of its arrival, and are so numerous and require so much room for their accommodation that extra men have to be employed to make the delivery, and separate and costly delivery sheds and grounds have to be provided and maintained, which cannot be used for general delivery of other classes of freight; that the dealers or consignees who come for the milk at Weehawken, cross from New York or Brooklyn, and ferries have to be run for several hours during the night for their accommodation at large expense, there being during those hours very little, or none other, business passing from one side of the river to

the other, and the fares paid by the milkmen being insufficient to meet the cost of operating the ferries.

That milk is time freight and a delay of a few hours in arrival by accident or otherwise, would render the whole cargo worthless, because even if the milk were not spoiled, the demand for the day would have passed, and that for the next day would be met by the following shipment.

That the train coming in at midnight has to go out early in the following morning to carry back to the shipper the cans brought in by the train on the previous day, and returned empty, so that he may receive them before night, and in time to use them on the following day; that it requires the same number of cars to return the empty cans that it does to bring them down loaded, and the equipment used in the milk traffic can therefore be used for no other purpose; consequently the return trip of the train brings no revenue whatever to the Company from other sources than the milk traffic (the carriage of the empty cans being included in the charge of thirty-five cents as already stated).

Said Company further shows and alleges that having regard to the cost and character of the service, and the facilities and accommodations afforded, the rate on milk is lower comparatively than that made on any other class of freight.

Said Company further shows that to the best of its knowledge, information and belief, none of the complainants are shippers of milk upon the road of said Company.

Dated, New York, May 28, 1887.

New York, Ontario & Western Railway Company,

By John Burton, Secretary.

John B. Kerr,

Attorney for said Company,

16 & 18 Exchange Place, New York.
State of New York, City } ss.
and County of New York.

John Burton being duly sworn deposes and says: that he is the Secretary and Treasurer of the New York, Ontario & Western Railway Company above named; that the foregoing answer is true of his own knowledge except as to the matters therein stated on information and belief, and as to those matters he believes it to be true.

Sworn to before me, this 28th day of May,

Certificate filed in New York County.

ANSWER OF NEW YORK, SUSQUEHANNA &
WESTERN R. R. Co.

The New York, Susquehanna & Western Railroad Company, one of the corporations complained against in and by the above mentioned petition, answering so much and such parts thereof as relate to this respondent, says:

1. It admits that it is a corporation (formed under and by virtue of the laws of New Jersey and Pennsylvania) doing a general freight and passenger business, as in the eighth paragraph of said petition alleged; but it denies it to

be true as in said paragraph alleged, that its road passes "through the State of New York," and says that its main line extends from Marion, in Jersey City, in the State of New Jersey, to Gravel Place, in the State of Pennsylvania, with a branch (called the "Unionville Branch") extending from the Two Bridges on its main line, to the boundary line between the States of New Jersey and New York, at Unionville, in the last named State; together with a railroad (known as the "Middletown, Unionville & Water Gap Railroad") operated by it under a traffic arrangement, in connection with said branch, and extending from said state line at Unionville, to Middletown, in the County of Orange, a distance of 13.9-10 miles; which last mentioned road is the only road operated by this respondent in the State of New York.

2. It denies it to be true (as in the ninth paragraph of said petition alleged), that the allegations of the petition "are equally applicable" to this respondent, "as to the New York, Lake Erie & Western Railroad Company"; and further answering, severally, the allegations of said petition alleged to be applicable to this respondent.

3. It denies the allegation that its railroad runs "through the County of Orange aforesaid, a distance of about fifty miles," contained in the second paragraph of said petition; and it says that it runs only 13.9-10 miles in said County, as hereinbefore stated.

4. It admits that considerable (though not very large) quantities of milk are daily transported from various points in said county, to Jersey City, in the State of New Jersey; but it denies that the same is transported by said petitioners and those by them represented; and it says that, as it has been informed and believes, the milk so transported over its road, as aforesaid, is transported largely (if not entirely) by or for other persons, who purchase the same before transportation, of the said petitioners and others.

5. It denies that the rate charged for such transportation is unreasonable or unjust, as alleged in the fourth paragraph of said petition.

6. It says that the rate charged by it amounts to only thirty-five cents per can, containing about 100 pounds of milk, for the transportation of filled cans from different points on its said New York line of 13.9-10 miles in extent to Jersey City aforesaid, and the return transportation of the empty cans from said city to said points on said New York line; and it denies that such charge is simply for the transportation of the filled cans to Jersey City aforesaid, or that this respondent has anything to do with the ferriage thereof to or from the City of New York, or that it charges or receives anything therefor or on account thereof,—as alleged or insinuated in said petition; and while it may be true, as indefinitely alleged in the last mentioned paragraph, that "other classes of freight and produce of equal value, are transported from and to the same points for a less rate and with no greater risk attached"; yet such "other classes of freight and produce," transported at a less rate, are not in fact, and are not alleged to be, of a like kind or description, nor is the service in the transportation thereof of a like and contemporaneous service under substantially similar circum-

stances and conditions, with that performed in the transportation of milk as aforesaid; nor is the charge in question (as this respondent submits) a violation of the law.

7. It denies that the allegations of the seventh paragraph of said petition are true in respect to this respondent, or that they are at all applicable to it.

8. It submits that the "estimation," inference, or conclusion of the said petitioners, following the allegations of facts, herein before answered, and characterizing them as violations of the Act of Congress entitled "An Act to Regulate Commerce"—are unfounded, unwarranted, and unjust.

And this respondent prays to be hence dismissed.

John W. Taylor, F. A. Potts,
Solicitor for Respondent. President.
State of New York, } ss.
County and City of New York. }

The foregoing answer of the New York, Susquehanna & Western Railroad Company, was taken before me, this thirteenth day of May, A. D. 1887, under the common seal of the said corporation, as by their seal thereto affixed, appears.

R. C. Shimeall.
[Seal] Notary Public for Kings County.
Certificate filed in New York County.

ANSWER OF LEHIGH & HUDSON RIVER R. CO.

The Lehigh & Hudson River Railway Company answering the petition of Nathaniel W. Howell and others heretofore filed with the Interstate Commerce Commission against said Company,

1. Admits that said Company is a corporation doing a general freight and passenger business upon their line of railway passing through the State of New Jersey and a portion of Orange County, in the State of New York.

2. Denies each and every other allegation and statement in said petition contained, so far as such allegations and statements refer to or are sought to be alleged against the said Lehigh & Hudson River Railway Company.

3. And for a further and separate answer and defense to said petition the said Lehigh & Hudson River Railway Company avers that its charges for the transportation of milk over the line of said railway or for the receiving, delivering, storage or handling of such property are and have been reasonable and just; that in the transportation of said property the said Company has not in the past and does not now violate any of the provisions of the Act of Congress entitled "An Act to Regulate Commerce" and known as the Interstate Commerce Act.

4. And for a further and separate answer and defense to said petition the said Company avers that in the transportation of milk over the said Railway for the shippers thereof the said Company, as a common carrier, does not do for any other person or persons a like and contemporaneous service in the transportation of a like kind of traffic under substantially similar conditions and circumstances; that such transportation of milk is by a different and separate service from that of any other traffic over said Railway and is carried under

wholly dissimilar circumstances and conditions, in that among other things such milk is transported by special train service at greater expense for equipment, maintenance and carriage, and that the cans returned as freight to the shipper require the same service and car room as the original shipment, and no additional charge or charges are made for such return and transportation.

Wherefore, the said Lehigh & Hudson River Railway Company demands that the said petition be dismissed as against said Company.

Dated the 31st day of May, 1887.

Leverett LEONARD

v.

UNION PACIFIC R. CO.

(No. 10.)

PLEADINGS in case now pending before the Commission, based upon allegations of the exaction of an unreasonable and discriminating rate for the transportation of cattle in a Burton stock car.*

COMPLAINT.

(Filed May 21, 1887.)

Mount Leonard, Mo., April —, 1887.

To the Honorable Chairman, Interstate Commerce Commission, Washington, D. C.

Dear Sir:

Be it known to your honorable board that I, Leverett Leonard, of Mount Leonard, Saline County, and State of Missouri, am a breeder and shipper of pure bred stock. That on the 14th day of April, A. D. 1887, I did deliver to the Union Pacific Railroad Company, at their station at Kansas City, Missouri, to their authorized employees, twenty-six long yearling, pure bred stock cattle, in the Burton feeding and watering stock car, No. 47, said car being owned and operated by the Burton Stock Car Company (Incorporated), Boston,

*See *Burton Stock Car Co. v. Chicago, Burlington & Quincy R. R. Co.*, ante, 222.

Mass., said stock being consigned by and to myself, to Pueblo, Colorado, on sale. The said employees of the Union Pacific Railroad Company charged me a rate of freight, for transportation of said stock from Kansas City, Missouri, to Pueblo, Colorado, 88 per cent in excess of the regular rate of transportation of same stock, from Kansas City to Pueblo, in the common stock cars owned and operated by the Union Pacific Railroad Company. (See expense vouchers attached).

I protested against said excess charge for transportation, the same being wholly in defiance of the letter and the spirit of the Interstate Commerce Law; the employees of the said Union Pacific Railroad Company then referred me to a copy of the western classification (revised to April 1, 1887), page 23, relating to "The transportation of live stock in special or palace cars" (copy of said western classification being herewith attached). I then demanded of said employees that the said Union Pacific Railroad Company supply me with an improved feeding and watering stock car, suitable for the safe and prompt transportation of the above mentioned pure bred stock, and was informed that the Union Pacific Railroad Company did not own any such stock cars, and that it supplied only the common stock car.

Be it further known to your honorable board that the common stock cars supplied by the said Union Pacific Railroad Company are wholly inadequate for the comfortable and safe transportation of valuable and pure bred stock, being common rack cars, exposing animals transported therein to draughts of air, dust, and locomotive cinders, and having no appliances for feeding and watering pure bred animals on the cars, which is very important to their comfort and safety on long hauls.

Therefore, I, Leverett Leonard, respectfully petition your honorable board to cause the Union Pacific Railroad Company to refund to me the aforementioned excess charge of 88 per cent above the regular rates; and further, I petition, in the interest of breeders and shippers of live stock, that all railroads operating under the aforesaid western classification, or any other classification, be required to supply suitable improved live stock cars, provided with adequate appliances for properly feeding and watering horses and cattle on the cars while in transit; or in the event of failing to supply such improved stock cars, said railroad companies shall be required to receive live stock, loaded in improved feeding and watering stock cars, when offered to them, and transport said stock, in said improved cars, at the same rates of freight as they receive for transporting a like number or weight of live stock, in their own cars, the same distance, without charging any excess whatever for the use of said improved cars; all of which your petitioner respectfully prays;

Leverett Leonard.

Done at Denver, Colorado, this 12th day of April, 1887.

State of Missouri, }
County of Saline. }

Personally appeared Leverett Leonard, who is personally known to the undersigned notary public, and he states upon his oath that the above statements are true, for the uses and purposes therein set forth.

Witness my hand and seal in Mt. Leonard, Saline Co., Missouri, this eleventh day of May, 1887.

John Cherry, Notary Public.

Term of office expires 5-12, 1889.

(Seal)

ANSWER.

(Filed June 9, 1887.)

The answer of the Union Pacific Railway Company, to the complaint of Leverett Leonard made to the Interstate Commerce Commission and filed May 21, 1887, alleging overcharge in the transportation of twenty-six head of cattle loaded in Burton stock car No. 47 from Kansas City to Denver:

For answer to said complaint respondent, the Union Pacific Railway Company, says that it is true that about the 14th day of April, 1887, application was made to the Union Pacific Railway Company at Kansas City for the transportation of a Burton stock car, said to be loaded with twenty-six head of cattle, from that place to Pueblo, Colorado, via Denver, Colorado. That at the date of said application the assistant general freight agent of respondent located at Kansas City explained to said Leonard the rate of freight upon said car so loaded as aforesaid from Kansas City to Denver. That said stock car was represented to said agent, and was a Burton palace stock car of the ordinary size, and thirty-six feet in length, internal measurement. That the rate of freight upon an ordinary stock car thirty feet in length as used by railways generally was \$72.50, and was so explained to said Leverett Leonard. That under the rules adopted for the transportation of live stock in the general western classification, as adopted and used by agreement of western roads, through the western classification committee,—so called,—as existing at the date of said shipment, the rate established by said association on live stock palace cars, thirty-six feet in length, internal measurement, was 188 per cent of the regular tariff rate; which said regular tariff rate was \$72.50 as stated and explained to said Leonard at the time of his application for such transportation. That said Leonard at that time made no objection to said rate, and that the only difference which arose between said Leonard and said freight agent, at that interview or at any other interview prior to said shipment, was in relation to the issue of a free pass to said Leonard by said Union Pacific Railway Company from Kansas City to Denver. That said assistant general freight agent having, as he was advised and believed, no authority under the Act of Congress to Regulate Commerce, to issue such free transportation to said Leonard from Kansas City to Denver, refused the request of said Leonard for the same. To this refusal the said Leonard objected; but no other or further complaint was made by him in respect to said shipment, nor were said assistant general freight agent or any general officer of the company advised of any dissatisfaction in respect to said shipment until the filing of his complaint with the Interstate Commerce Commission. That he made no complaint or claim for the refunding of any alleged excess in the rate to any department or officer of respondent, and that the first knowledge said Railway Company had of said claim was re-

or manner, either directly or indirectly, of a | Mazeppa, and the latter, Red Wing, about
breach of sections 1, 2 or 3, or of any other sec- | twenty-two miles from Mazeppa, both towns

being direct competitors with the Town of Mazeppa for the rail traffic and purchase of produce from the territory or country intervening.

That the posted rates on wheat and some other kinds of grain by the said Chicago, Milwaukee & Saint Paul Railroad from Red Wing and Lake City to Chicago was fifteen cents per 100 pounds from August 15, 1886, until April 5, 1887. That the posted rates on wheat and some other kinds of grain by the said Chicago, Milwaukee & Saint Paul Railroad from Mazeppa to Chicago was seventeen cents per 100 pounds from August 15, 1886, until April 5, 1887. That when the Chicago, Milwaukee & Saint Paul Railroad posted its new rates April 5, 1887, it did not change the old rates on wheat from Winona or Hastings on the river division, nor the rates on wheat to Chicago from Hammonds, a station about thirty-four miles from Wabasha on the said Wabasha division; but at all stations west of Hammonds on said Wabasha division, the rate on wheat was advanced to eighteen cents per 100 pounds to Chicago, making at this place a differential of three cents per 100 pounds in place of two cents per 100 pounds as existed from August 15, 1886, until April 5, 1887.

That the said Chicago, Milwaukee & Saint Paul Railroad I believe at times previous to August 15, 1886, did make such rates on some kinds of grain to interstate points from Lake City as to draw the grain from within eighty rods of our own elevator. That an eighteen cents rate from Mazeppa to Chicago is what I believe to be unreasonable, and I further believe that the advance April 5, 1887, from seventeen cents to eighteen cents on wheat to Chicago from Mazeppa was wholly unwarranted. That any differential exceeding two cents per 100 pounds on grain from Mazeppa to Chicago or other interstate points over the rates from Red Wing and Lake City to such interstate points I believe to be unjust and a discrimination against this place and locality. That it is now claimed by the Daily Press that a ten cent rate on wheat from Minneapolis to Chicago, including Red Wing and Lake City, is now being made; if so, then an eight cent differential exists sufficient to take the wheat from before our own door.

Therefore I ask of your honorable Commission as early a consideration of my complaint as possible. I further ask that if you find that the advance April 5, 1887, was unwarranted and unjust, then you request the said Chicago, Milwaukee & Saint Paul Railroad Company to refund the excess collected from shippers since April 5, 1887. I further ask that if you find that the said Chicago, Milwaukee & Saint Paul Railroad is carrying wheat from Red Wing and Lake City to Chicago at ten cents per 100 pounds and has been since the 18th inst. that you declare the same to be a discrimination against this place and locality and a violation of section 3 of the Interstate Commerce Law so long as the rate remains eighteen cents per 100 pounds from this place to Chicago; and that you further request it, if you find that it has violated said third section of the Interstate Commerce Law, to refund any excess of money it may have collected from shippers over and above the rate at Lake City

INTER 8.

and Red Wing, with a reasonable differential, and to pay any damages that may have accrued in consequence of such violation of the Interstate Commerce Law.

Wabasha Co.

ANSWER.

(Filed June 13, 1887.)

Milwaukee, Wis. June 7, 1887.

Mr. Edward A. Moseley, Secretary Interstate
Commerce Commission,

Washington, D. C.

Sir:

Answering the complaint of E. B. Raymond, a citizen of Mazeppa, County of Wabasha, State of Minnesota, the Chicago, Milwaukee & St. Paul Railway Company states as follows:

First. It is true, as claimed, that immediately prior to April 5, 1887, fifteen cents per 100 pounds was the rate charged from stations on the River Division, including Lake City and Red Wing, and seventeen cents per 100 pounds from Mazeppa to Chicago.

Second. That in adjusting rates to take effect April 5, 1887, it was agreed by all lines that eighteen cents per 100 pounds was a reasonable rate for the transportation of grain and flour from St. Paul and Minneapolis to Chicago, via the river, La Crosse and the Chicago & Milwaukee divisions to Chicago.

This rate of eighteen cents was graded down so that the rate from Lake City and from Red Wing was made fifteen cents.

Mazeppa is a station on the Wabasha division, *narrow gauge*, and is fifty-two miles from the main line of the river division at Wabasha.

Zumbrota is eight miles west of Mazeppa, and is the terminus of the Wabasha division, and is the terminus of the Zumbrota branch of the Winona & St. Peter Division of the Chicago & Northwestern Railway. Thus all this territory is competitive, and rates are usually made after agreement.

In adjusting new rates it was agreed that eighteen cents was a reasonable rate from this interior territory, including corresponding stations on the Zumbrota branch of the Winona & St. Peter Railway.

The question of an agreed differential, above rates charged on the River Division, was not and is not considered, as there are many contingencies affecting rates from river division stations which do not directly concern interior points.

Third. May 18, in consequence of the action of our competitors, we reduced rates from St. Paul, Minneapolis and all stations on the River and the La Crosse divisions, to ten cents per 100 pounds, but we made no change in the rates from stations on the Wabasha division, nor on other divisions, not part of the direct line to Chicago over which the St. Paul and Minneapolis business is done.

Fourth. May 20, for the same reasons, we made a further reduction to $7\frac{1}{4}$ cents per 100 pounds, but made no change at Mazeppa or other points on the Wabasha division, or from stations on other divisions not part of the direct line to Chicago.

Fifth. May 26, the $7\frac{1}{4}$ cent rate from St. Paul and Minneapolis remaining in effect, we made reductions on branches connecting with the direct line to Chicago, among which was a reduction of rates from Mazeppa to $12\frac{1}{4}$ cents per 100 pounds, which rate is now in effect.

Sixth. The rates from St. Paul, Minneapolis, and from river division stations, to Chicago, are affected by the competition via Lake Superior and the competition of the Mississippi River, causing at times (notably today), extremely low and unprofitable rates. This competition and these low rates only indirectly affect the rates at Mazeppa and other interior points; and we claim that the rates charged from Mazeppa to Chicago since April 5 have been and are just and reasonable.

Very Respectfully,

The Chicago, Milwaukee & St. Paul Railway Company, by
Roswell Miller, General Manager.

George M. JACKSON

v.

ST. LOUIS, ARKANSAS & TEXAS R. CO.

(No. 28.)

PLEADINGS in a case pending before the Commission, based upon allegations of the exaction of unjust rates for the transportation of hewed lumber or ties, and of discrimination in favor of sawed lumber as against hewed lumber.

COMPLAINT.

(Filed June 7, 1887.)

St. Francis, Clay Co. Arkansas,

June 1, 1887.

Judge Thomas M. Cooley,

Chairman Interstate Commerce Commission:

I respectfully ask that your honorable body summon the St. Louis, Arkansas & Texas Railroad Company before you. Your petitioner charges the said Railroad Company with a violation of the first section of the Interstate Commerce Law, in this: that the said Railroad Company refuses to ship ties or hewed lumber for your petitioner from this place to Kansas City, Missouri which is in another State, for less than $40\frac{1}{4}$ cents each, which is an unreasonable and unjust charge. A tie is generally made of oak, and is 6×8 inches, 8 feet long, which is of a convenient shape and size to handle, and is such freight as is not liable to injury in transit. A tie is a hewed stick of lumber of the above dimensions and will weigh 160 pounds, which makes the rate a fraction over twenty-five cents per 100 pounds. In proof that said charge is unreasonable your petitioner will state that said Railroad Company charges a rate of eighteen cents per 100 pounds on sawed oak lumber from here to Kansas City.

Your petitioner further charges the St. Louis, Arkansas & Texas Railroad Company

with the violation of the second section of said Act, in this,—that said Railroad Company refuses to transport for your petitioner from this place to Kansas City, Missouri, which is in another State—hewed lumber or ties, for a less rate than $40\frac{1}{4}$ cents each, which is a fraction over twenty-five cents per 100 pounds, while it transports for other parties oak lumber that is sawed, to and from the same points, at eighteen cents per 100 pounds. For the purpose of concealing the discrimination said Railroad Company will not quote you a rate per 100 pounds on ties or hewed lumber; that there is no difference between hewed and sawed lumber; that it is “a like and contemporaneous service in the transportation of a like kind of traffic, under substantially similar circumstances.”

Your petitioner further charges the said St. Louis, Arkansas & Texas Railroad Company with a violation of the third section of said Act, in this—that said Railroad Company gives “undue and unreasonable” preference to sawed lumber, as against hewed lumber, when they are substantially the same thing, which is a discrimination against a “particular kind of traffic.”

Your petitioner asks that said Railroad Company be ordered to discontinue said discrimination, and that hewed lumber or ties be transported at the same rate per 100 pounds as sawed lumber.

And your petitioner would further ask that if you find that said Company has violated the Law, that the lowest penalty be assessed, as this petition is filed solely with the view of forcing the said Railroad Company to do that which it ought to do without being forced, viz.: transport your petitioner's hewed lumber at the same rate that it does your petitioner's sawed lumber, who is also engaged in running a saw mill on said Railroad, and shipping lumber to Kansas City, Missouri.

(Signed) Geo. M. Jackson.

Subscribed and sworn to before me, a Justice of the Peace within and for the County aforesaid.

(Signed) M. D. Gunter, J. P.

June 2, 1887.

ANSWER.

(Filed June 23, 1887.)

To the Interstate Commerce Commission,

Hon. Thomas M. Cooley, Chairman:

Now comes the St. Louis, Arkansas & Texas Railway Company in Arkansas and Missouri, and for answer to the petition of George M. Jackson, of St. Francis, Clay County, Arkansas, dated June 1, 1887, respectfully states as follows:

First. It denies that it has violated the first section of the Interstate Commerce Law, as alleged in the first paragraph of said petition, and specially denies that it refuses to ship ties of hewed timber, for the petitioner, for less than $40\frac{1}{4}$ cents each from St. Francis to Kansas City, and denies that it ever had a rate on hewed cross ties of $40\frac{1}{4}$ cents from St. Francis to Kansas City, or that it has ever charged, or offered to charge, the petitioner at the rate of $40\frac{1}{4}$ cents each for hewed cross ties between the points named.

Further answering the said first paragraph of

said petition, it admits that a tie is generally made of oak, 6x8 inches, 8 feet long, and that such freight is not liable to injury in transit, but denies that the weight thereof is 160 pounds, and says that the weight thereof would average about 180 pounds in the condition in which they are usually shipped.

And further answering said petition, it denies that it has violated the second section of the Interstate Commerce Law, as alleged in the second paragraph of said petition, and denies that it has refused to transport for petitioner hewed timber or ties from St. Francis, Arkansas, to Kansas City, Missouri, at a less rate than 40½ cents each; but admits that it transports oak timber, which is sawed, from St. Francis, billed for Kansas City, Missouri, at a through rate of eighteen cents per 100 pounds.

It denies that it discriminates against hewed timber or ties, as alleged, and denies that it refuses to quote rate per 100 pounds on ties or hewed timber for the purpose of concealing any such discrimination; denies that there is no difference between hewed and sawed timber, and denies that the hauling of the one class is a like contemporaneous service in transportation of a like kind of traffic under substantially similar circumstances.

And further answering said petition, it denies that it has violated the third section of said Interstate Commerce Law in giving undue or unreasonable preference to sawed lumber as against hewed timber, and denies that they are substantially the same thing.

And for further answer to said petition, it says that in transporting ties or timber or other material from St. Francis, Arkansas, to Kansas City, Missouri, it does the same in connection with the Kansas City, Springfield & Memphis Railway Company, the line of which latter road it crosses at Jonesboro, Arkansas; that this respondent has no line of its own road, or any line that it controls, which reaches Kansas City or any point nearer to Kansas City than Jonesboro, Arkansas; that at no time has it ever charged or attempted to charge a rate between St. Francis and Kansas City for the amount of 40½ cents per cross tie; that previous to the 23d day of May, 1887, the rate between St. Francis and Kansas City was forty cents, but on said last named day it was reduced for cross ties to 33½ cents per tie. The special order fixing this rate is filed with your honorable Commission, and is numbered I. S. 136, and this rate has been maintained since said time, and was in force at the time petition was filed.

Further answering, respondent states that said rate is reasonable and just, and has not been complained of by any person other than petitioner.

Further answering, respondent says that hewn ties, such as are usually offered for transportation, weigh about 180 pounds, instead of 160 as stated in the petition; that they are usually offered for transportation while green and while they are wet, and may be reduced by seasoning from about 180 pounds to 160 pounds if left to dry before they are transported; yet as a matter of fact those offered for shipment on respondent's road are nearly always so offered before they are so seasoned.

Further answering, respondent states that in charging a rate per tie rather than by the 100 pounds, as is customary with sawed timber, it is following the ordinary custom of railroads west of the Mississippi River in the handling of such freights. Hewn ties are always sold at so much per tie. They are of unequal size. Along the line of respondent's road they are nearly always cut from swampy, wet lands; and to charge per 100 pounds would be an injustice to those parties, causing them to have to pay more for transporting cross ties than if the same tie was cut from upland. If the rate was made per 1,000 feet, there would necessarily be disputes as to the number of feet in a tie, from the fact that being hewn they are necessarily of innumerable shapes, rendering accurate measuring difficult. For these reasons respondent and other railroads west of the Mississippi River have found it to the mutual advantage of shippers, consumers and themselves to make rate per tie instead of in any other manner. The rate at present charged, of 33½ cents per tie from St. Francis and contiguous stations, to Kansas City, is a reasonable rate for the service performed; and when the weight of each tie is taken into consideration is about the same rate per 100 pounds as is charged for sawed timber, of which rate the petitioner has not complained and with which it seems to be satisfied; therefore respondent states that in making the rate as hereinbefore set forth it has violated no part of the Interstate Commerce Law, has followed the usual and ordinary course as adopted by railroads of the section of the country in which it operates, and has charged but a reasonable rate, without discrimination, and is therefore entitled to be hence discharged with its costs. It therefore prays for such order in the premises.

The St. Louis, Arkansas & Texas Railway Company in Arkansas and Missouri.

By Phillips & Stewart, General Attorneys.

GEORGE RICE

vs.

ST. LOUIS, IRON MOUNTAIN & SOUTHERN R. CO.*

(No. 52.)

SYNOPSIS of pleadings.

COMPLAINT.

Defendant is a corporation organized, etc., in Missouri and Arkansas and engaged in transportation from St. Louis to Newport, Little Rock and Texarkana in Arkansas, and beyond.

In the transportation of oil two methods are employed: (a) by box cars, carrying the oil in barrels; (b) by tank cars holding 100 barrels and upwards.

Complainant manufactures and deals in oils at Marietta, Ohio, where he has large capital invested. He would have produced and sold many thousand more barrels of oil but for the wrongful acts of defendant.

Many of complainant's principal markets are in the territory reached by defendant's road.

The Waters-Pierce Oil Co., a Missouri corporation, is a large dealer in and shipper of oils, and is complainant's chief and almost sole competitor in said markets.

The defendant has violated the Interstate Commerce Act, as follows:

First Charge. By making charges for transporting oil from St. Louis, "which were in themselves unjust and unreasonably high."

As specifications, under charge 1, rates charged July 7, 1887, are given.

Second Charge. Defendant has charged complainant higher rates for the same services than it has charged said Waters-Pierce Oil Co., in transporting oils from St. Louis to points in States other than Missouri. The Waters-Pierce Oil Co.—being sometimes consignor and

sometimes consignee and sometimes both consignor and consignee.

Specifies comparative rates thus:

Rates per bbl. since April 5, 1887.

Destination,	To G. Rice,	To Waters-Pierce Oil Co.
Newport, Ark.	91 cts.	50 cts.
Little Rock, "	91 "	50 "

Defendant charges complainant for actual weight and charges the Waters-Pierce Oil Co., in many instances for much less than weight.

Third Charge. Undue and unreasonable preference to the Waters-Pierce Oil Co.

Specifications. Repeats specification No. 1, under second charge, and avers that the differences in rates are not measured by differences in the circumstances, and that the differences in cost, convenience, etc., to the carrier, if any, are insignificant in comparison with the difference in rates. This discrimination has had, and complainant believes was intended to have, the effect of giving said Waters-Pierce Oil Co. a monopoly at the points reached by defendant's line, and to exclude complainant's products entirely from said markets.

Prayer. For investigation, and that the Commission will report to what reparation complainant is entitled; and will require defendant to cease and desist from such violations, etc., and for general relief.

ANSWER.

Admits that defendant is a common carrier, as alleged, that it transports oil from St. Louis as alleged either in barrel packages, in box cars, or in tank cars. Is not informed as to capital invested by complainant. Admits that the Waters-Pierce Oil Co. is a shipper of oil, but is not informed whether it is complainant's chief competitor.

To Charge First. Defendant's charges for transporting refined petroleum oil from St. Louis to Newport and Little Rock, Arkansas, \$50 per box car containing 55 bbls., i. e., a little more than 90.9 cents per bbl.; and from St. Louis to Texarkana, Arkansas, forty-five cents per 100 lbs., not sixty-seven cents.

Denies that these rates are unjust, etc.

To Charge Second. The rates charged to complainant, to said Waters-Pierce Oil Co., and to all, are the same: to be shipped in bbls. 90.9 cts. per bbl.; and when shipped in tank cars, \$50 per tank car.

Denies discrimination in favor of said Waters-Pierce Co., or any other shipper.

Denies that it has discriminated against Rice in matter of "weights."

Denies that it has charged Rice at any time since April 5, more than it has charged the Waters-Pierce Oil Co., or any other shipper "for like and contemporaneous service performed under substantially similar circumstances and conditions."

To Third Charge. Denies giving unreasonable preference or subjecting complainant, etc.; denies that any charges were designed to have the effect of giving said Waters-Pierce Oil Co. any monopoly or to exclude complainant, etc.; answer to second charge to be deemed repeated here; and asserts that the circumstances, etc., under which oil is shipped in barrels

*This case, and cases Nos. 53 to 60 inclusive on the Docket of the Commission, following, belong to the group of cases based upon allegations of discrimination in favor of the Standard Oil Company and others, in rates for the transportation of oil, of which Rice v. Louisville & Nashville R. R. Co., (the complaint in which is given in full on page 376, ante, and the answer on page 443, ante), is one. As all the cases are based upon the same general grounds, it is thought that a synopsis of the pleadings will suffice to give all the desired information in reference to them.

and in tank cars "are so dissimilar as to prevent one rate being taken as a standard whereby to measure the other," and that if they are compared it will be found that neither relatively to the other is unjust.

George RICE

MOBILE & OHIO R. CO.

(No. 53.)

SYNOPSIS of pleadings.

COMPLAINT.

Complaint alleges defendant is a corporation existing in Illinois, Kentucky, Tennessee, Mississippi and Alabama, and is a common carrier, etc., engaged in transportation from Cairo, Illinois, to Rives and Jackson, in Tennessee; Columbus and Meridian, in Mississippi; and Ohunchula, Eight Mile and Mobile, in Alabama.

Allegations as to complainant's business same as in case 52.

Charges violations of Act as follows:

1. Charges unreasonably high in themselves; specifies rates from Cairo thus:

Destination.	Rate per 100 lbs.
Columbus, Miss.	58 cts.
Lauderdale, "	68 "
Meridian, "	84 "
Enterprise, "	68 "
Shubuta, "	76 "
Eight Mile, " (sic)	76 "

and to other points not in Illinois as in tariffs required to be filed.

2. Defendant has charged more for a less than for a greater distance "over the same line," etc., repeating the words of the Act.

Specifies

From Cairo to	Distance.	Rate per 100 lbs.
Shubuta, Miss.	896	76 cts.
Eight Mile, " (sic)	488 4-10	76 "
Mobile, " (sic)	491 4-10	84 "

(Prayer as in No. 52.)

ANSWER.

Defendant is a corporation under the laws of Alabama, Mississippi, Tennessee and Kentucky, authorized to build a railroad from Mobile, Alabama, "to a point at or near the mouth of the Ohio River, in Kentucky," and is now operating such road.

Has no knowledge of complainant's business. Denies violation of the Act.

3. *To First Charge.* Denies that the rates set forth in petition are unreasonably high, says that the rate of thirty-four cents per 100 lbs. "per car load" from Cairo to Meridian (857 miles) is unreasonably low,—but is necessary, owing to competition "due to a combination of rates of steamers plying up and down the Mississippi River, with the rates of the Vicksburg & Meridian Railroad within the State of Mississippi," both said carriers being outside of the jurisdiction of the Commission. Said rate could be availed of by petitioner. All defendant's charges are just and reasonable "un-

INTER 8.

der the circumstances, conditions and necessities of the business of the defendant."

To Second Charge. Admits that its tariffs filed with the Commission provide seventy-six cents per 100 lbs. (per car load) from Cairo, Illinois, to Shubuta, Miss., 896 miles; and seventy-six cents from Cairo to Eight Mile, Ala., 485 miles; and twenty-four cents from Cairo to Mobile, Ala., 492 miles; admits greater charge for shorter distance over, etc. (quoting statute), that the oils are of like kind and character, and justifies under order of relief granted April 16, 1887.

Further answering all charges. Since expiration of said order, where more has been charged for shorter haul, denies that such transportation was under similar circumstances and conditions.

Further answering. The rate of twenty-four cents from Cairo to Mobile was fixed by competition with water lines and combinations of rates by water lines with rates from New Orleans to Mobile.

Further answering, says that the rate of thirty-four cents per 100 lbs. from Cairo to Meridian, Miss., is fixed by competition with rates made by combination of steamer rates (on Ohio and Mississippi Rivers), with rates of Vicksburg & Meridian Railroad (wholly within Mississippi), and also by competition with the short rail line from Marietta, Ohio, to Meridian over the Cincinnati, New Orleans & Texas Pacific. Such competition is beyond the jurisdiction of the Commission.

Defendant is expressly authorized by the Act "to meet competitive rates fixed by causes beyond the jurisdiction of the Commission."

Further answering. Rates for oil in bbls. per 100 lbs. are:

From Mobile north to Eight Mile, 8 cts.
From Mobile (97 miles) to Shubuta, Miss., 80 cts.
From Mobile (120 miles) to Enterprise, Miss., 88 cts.

Denies damage to complainant.

Defendant has revised its rates since filing of petition, which are now as follows:

From Cairo to	Distance.	Rate per 100 lbs.
Columbus, Miss.	287	87 cts.
Lauderdale, "	839	48 "
Meridian, "	357	45 "
Enterprise, "	873	45½ "
Shubuta, "	896	47½ "
Eight Mile, Ala.,	485	54 "
Mobile, "	492	81 "

George RICE

v.

EAST TENNESSEE, VIRGINIA & GEORGIA R. CO.

(No. 54.)

SYNOPSIS of pleadings.

COMPLAINT.

Defendant is a corporation organized and existing in Tennessee, Georgia, Alabama and Mississippi. Is a common carrier, etc., from Chattanooga, Tennessee, through Tennessee,

Georgia and Alabama to Selma, Alabama, and Meridian, Mississippi.

First Charge. Charges from Chattanooga to points in other States unjust, etc., in themselves.

Specifies rates per 100 lbs. from Chattanooga to

Selma, Ala. - - - 28 cts.

Meridian, Miss. - - - 25 cts.

Second Charge. Violation of section 4.

Specifies. From Chattanooga (bbl. pkg. C. L. lots)

To

Selma, Ala. 293 m. 28 cts. per 100 lbs.

Meridian, Miss. 403 m. 25 cts. " " "

ANSWER.

Denies that charges are unreasonable.

Denies that defendant's rates from Chattanooga are as charged.

Since November 1886, rates have been

To Selma, Ala. - - - 23 cts.

" Meridian, Miss., - - - 25 cts.

Denies violation of section 4, since April 5, 1887.

Distances are not as alleged but "over respondent's line" are as follows:

From Chattanooga, to Selma, 276 miles.

" " Meridian, 389 "

General denial.

George RICE

v.

CINCINNATI, NEW ORLEANS & TEXAS
PACIFIC R. CO.

(No. 55.)

SYNOPSIS of pleadings.

COMPLAINT.

Defendant is a corporation organized under laws of Ohio. Is a common carrier, etc. (by means of a line leased by it) between Cincinnati and Chattanooga, and intermediate points on its line between said cities, through Kentucky and Tennessee.

Standard Oil Company is a corporation under laws of Kentucky; is complainant's chief and almost sole competitor in said markets.

First Charge. Charges from Cincinnati unjust, etc. in themselves.

Specifies.

To Lexington, Kentucky, 13 cts.

" Chattanooga, Tenn. 33 cts.

Second Charge. Defendant since April 5, 1887, has charged complainant more than said Standard Oil Co.

Specifies	Charged Rice	Charged Oil Co.
To Lexington	13 cts.	8 cts. 8 mills.
" Chattanooga,	33 cts.	15 cts. 9 "

The rate to the Company being made on assumption that tank cars contain no more than 100 bbls. each (which is untrue). Such cars were hauled to

Lexington, for \$26 per car, and to

Chattanooga, " \$50 " "

Complainant has been charged for actual weight. Oil Company for much less than actual weight.

Third Charge. Defendant has given unreasonable preference, etc. to Standard Oil Company, and has subjected Rice to, etc.

Specifies.

Repeats specification No. 1 under second charge. Difference in rates not measured by difference in circumstances, etc. (as in Case No. 52).

The discrimination, etc., was intended to give monopoly to the Oil Co. and to exclude complainant, etc. (as in No. 52.)

ANSWER.

Denies first charge.

Denies second charge, and to specification 1 thereunder says rates charged per bbl. are (as alleged).

Denies that rates in tank were 8.3 cents and 15.9 cents as alleged, but were per car \$26 and \$50 as alleged.

Denies the charges per tank car "were not based upon the exact capacity."

When these cars were first introduced they were understood to have a capacity of seventy bbls. and rates were made accordingly.

Rice ships in bbls.

Oil Co. in tank cars.

Rice was charged for actual weight.

Oil Co., by the car; and "while it may be true that thereby said Standard Oil Co. obtained transportation for its said oil at a cost that would be less per 100 pounds of oil than the complainant Rice paid," yet the price charged per tank car is based on the average capacity, is open to all shippers, is fair, and has been in practice for many years by all railroad companies in the West and Northwest, as well as in the South.

To the third charge. Denies preference, etc.

To specification 1 repeats its answer to specification 1 under second charge, and further alleges that the difference between rates per 100 lbs. and rates per tank car is justified by difference to defendant in circumstances, etc., and denies that such difference is insignificant.

Oil in bbls. is undesirable freight on account of leakage and odors, unfitting the cars for other freight. Many claims for damage to other goods have to be paid, thereby increasing expense of transportation; risk of fire is greater.

Tank cars are generally unloaded on separate side tracks (by pumping) by the owners. Shipper furnishes the cars. Ninety per cent of the tank cars are used on their return for other freight—principally turpentine and cotton seed oil.

The Standard Oil Company to accommodate said return freight has erected at its own expense extensive plants at Ludlow, Kentucky (Cincinnati), and at Louisville.

Said tank car shippers also furnish large return shipments of resin.

No monopoly given or designed to be given.

George RICE

v.

CINCINNATI, NEW ORLEANS & TEXAS
PACIFIC R. CO., and Alabama Great
Southern R. R. Co.

(No. 56.)

SYNOPSIS of Pleadings.

COMPLAINT.

The Cincinnati, New Orleans & Texas Pacific R. Co. is the lessee of and as such is engaged in operating a line of railroad from Cincinnati through Kentucky and Tennessee, to Chattanooga, 836 miles (and intermediate points), and there connect with the Alabama Great Southern R. R. Co. (which owns and operates its line) extending from Chattanooga through Georgia and Alabama to Meridian, in Mississippi.

Charges as in preceding (including discrimination in favor of Standard Oil Co.).

Specifications are of course for different points.

Also charges violation of section 4; specifies from Cincinnati

To Birmingham, Ala.	478 m.	47 cts.
Meridian, Miss.	630 "	45 "

JOINT ANSWER.

Substantially as in No. 55.

(There are some allegations as to the arrangements between the two defendants for continuous carriage.)

The rates are fixed by competition with water rates.

In answer to the charge of violation of section 4, rely on order of relief of April 19, and at the expiration thereof the rates were altered.

George RICE

v.

MISSISSIPPI & TENNESSEE R. R. CO.

(No. 57.)

SYNOPSIS of Pleadings.

COMPLAINT.

Charge unreasonable rates from Memphis, Tennessee, to Grenada, Mississippi, and intermediate points, by charging between said points, a distance of 100 miles, thirty-eight cents per 100 lbs., or \$1.52 per bbl.

ANSWER.

Admits incorporation, etc. Denies the charge generally. States that defendant's charges are barely sufficient to pay running expenses, etc., and that its rates on oil are in proportion to other parts of its tariff. Defendant has failed several times in earning enough to pay mortgage interest. Never has paid a dividend. Was torn to pieces in the war. Is subject to competition with lines on either side of it, viz.: Kansas City, Memphis & Birmingham R.

INTER S.

R. Co., on the east, and the Mississippi Valley R. Co. on the west.

Has only transported since February 25, 1887, three shipments of oil, amounting to about 7,000 lbs. in all. None of them shipped by Rice.

That the complaint is "frivolous and speculative."

George RICE

v.

NEWPORT NEWS & MISSISSIPPI VAL-
LEY R. R. CO., and Louisville, New Or-
leans & Texas Pacific R. Co.

(No. 58.)

SYNOPSIS of Pleadings.

COMPLAINT.

Charges 1, exaction of unreasonably high rates: Specifies 75 cts. per bbl. from Louisville to New Orleans, and from Louisville to Vicksburg.

2. Discrimination in favor of Standard Oil Co., which ships in tank cars, etc., as in other cases.

SEPARATE ANSWER OF LOUISVILLE, NEW
ORLEANS & TEXAS PACIFIC R. CO.

Denies that Standard Oil Co. is sole or principal competitor of complainant, or that said Company transports oil exclusively in tank cars.

Rate when shipped in barrels seventy-five cents per bbl.; box car holds sixty bbls.; making total freight from Louisville to Vicksburg (612 miles) as well as from Louisville to New Orleans (848 miles) about \$45 per car, and rate in tank cars, \$55 per car. Average load of tank cars, ninety bbls.

When shipped in bbls. the oil usually comes to respondent from the road of another company and has to be transhipped, or respondent has to pay mileage.

Denies preference, etc.

The rates on tank cars are open to both, as are the rates in barrels.

Denies that its rates have been made at the dictation or even the suggestion of Standard Oil Co., and "denies that the difference in rates on a car load in barrels and a car load in tanks is not based or measured by a difference to it in the cost, expense or convenience of handling same between said two methods, because," etc., the tank cars are owned by shippers, and loaded by them at shipper's risk of leakage; and also there is a demand for cars for cotton oil on their return.

General denial, except, etc.

SEPARATE ANSWER OF NEWPORT NEWS &
MISSISSIPPI VALLEY R. R. CO.

Similar to preceding answer.

Tank cars hold about eighty-five barrels.

Respondent gives notice to petitioner to produce at hearing all original letters, etc., between him and it, during 1887. Also freight bills and bills of lading.

General denial, except etc.

George RICE

v.

NEWPORT NEWS & MISSISSIPPI VALLEY R. R. CO. and Illinois Central R. R. Co.

(No. 59.)

SYNOPSIS of Pleadings.

COMPLAINT.

Alleges that the Newport News & Mississippi Valley R. R. Co., operates a road known as the Chesapeake, Ohio & South Western, beginning at Louisville and extending through Kentucky to Fulton, Kentucky, and thence to Memphis, Tennessee, there connecting with the Illinois Central, which road extends from Chicago to Fulton and thence to Jackson, Mississippi and New Orleans.

The defendants transport oil from Louisville to Jackson and other points on the Illinois Central south of Fulton.

First Charge: Complains of charges unreasonably high. Specifies from Louisville to Jackson, 1.60 per bbl.

Second Charge: Preference etc., to Standard Oil Co., by charging gross sum of \$96 per car for tank cars containing over 100 bbls. Proceeds as in No. 52. Rates designed to give monopoly, etc.

SEPARATE ANSWER OF NEWPORT NEWS & MISSISSIPPI VALLEY R. R. Co.

Admits incorporation, etc.—Does not admit that "the continued success of petitioner's business depends upon the rates on respondent's road," for the reason that each of the points named can be reached by petitioner by water routes or other railroad lines, as conveniently and cheaply.

The rest of the answer is almost identical with this defendant's answer in No. 58.

SEPARATE ANSWER OF ILLINOIS CENTRAL R. R. Co.

Defendant is ignorant of allegations respecting Newport News & Mississippi Valley Co., except that it interchanges business with it.

Admits its incorporation and existence in Illinois. Denies that it has owned a railroad in Kentucky, Tennessee, or Mississippi, but admits that it operates the Chicago, St. Louis & New Orleans Railroad from East Cairo through Kentucky, Tennessee and Mississippi, to Jackson, Mississippi, and thence to New Orleans, under lease from the C. St. L. & N. O. R. R. Since January 1, 1883.

"If by the allegation that defendants have been engaged in the transportation of persons and property wholly * * * under a common arrangement for a continuous carriage from Louisville, Kentucky, to Jackson, Mississippi, * * * is meant that the defendants have any interest in or control of each others lines of railroad—then the allegation is denied."

The defendants receive and deliver freight from and to each other, and *pro rata* or on a mileage basis, or by special agreement. The defendants are competing lines, and their interchange of business is small.

Only two car loads of oil have been shipped over defendant's line during the period complained of, and the shipper was not in either case the complainant. The shipments were in barrels in box cars; hence, there was no discrimination. One load was consigned to the Standard Oil Co., and one by the Standard Oil Co. to S. Semly. Charge \$1.60 per bbl.

Admits that it, like all carriers, charges less for oil in tank cars furnished them, than for oil in barrels in carrier's own cars, and justifies (as in other cases).

States financial difficulties of the company, reduction of debt and corporate stock, etc., and denies that its rates for oil exceed in proportion those rates on other freight which are necessary to maintain its business.

General denial, except, etc.

Alleges that the complaint is frivolous and speculative.

George RICE

v.

ILLINOIS CENTRAL R. R. CO.

(No. 60.)

SYNOPSIS of Pleadings.

COMPLAINT.

First Charge: Unreasonably high rates, specifies:

From Cairo, Ill. to		
Water Valley, Miss.	-	46 cts per. 100 lbs.
Grenada, Miss.	-	37½ " " "
Jackson, "	-	41½ " " "
New Orleans, La.	-	24 " " "

Second Charge: Violation of section 4, since July 9, specifies:

From Cairo to		per 100 lbs.
Water Valley, Miss.	297 miles	46 cts.
Grenada, Miss.	256 "	37½ "
Jackson, "	867 "	41½ "
New Orleans, La.	550 "	24 "

ANSWER.

Denies that charges are unreasonably high.

Road from Cairo to New Orleans traverses a sparsely settled country, which affords small volume of tonnage considering mileage of the road. From the physical features of the country the line is difficult to maintain in running order, and requires large expense for operation.

If the circumstances and conditions as shown by the foregoing are not sufficient to justify respondent in charging more for the short haul where rail and water competition existed, then respondent was relieved from the charge made by complainant by order of relief granted by Commission, suspending fourth section for ninety days from April 4, 1887, *i. e.* until July 16.

Denies having received any oil for shipment or having transported any oil from Cairo to the points named in the complaint, during the period stated.

General denial, except, etc.

GRIFFITH OWEN & CO.

DELAWARE & HUDSON CANAL CO.
(No. 69.)

(September 3, 1887.)

AT a session of the Commission, held at Rutland, Vermont, on September 2, 1887, a notice of discontinuance of this proceeding (the complaint in which is given *ante*, 896), was filed by George M. Fuller, Esq., attorney for the complainant; and thereupon it was ordered by the Commission that the proceeding be discontinued accordingly.

MEMORANDA OF NEW CASES.

THE following cases, Nos. 72-77, have been recently commenced before the Commission. The pleadings and subsequent proceedings therein will be duly reported hereafter.

Robert M. TUTTLE

NORTHERN PACIFIC R. R. Co.
(No. 72.)

Complaint filed September 1, 1887, charging the use of a free pass by one of the territorial judges of Dakota.

H. T. KETRON

NORFOLK & WESTERN R. R. Co.
(No. 73.)

Complaint filed September 3, 1887, alleging that household goods consigned to a point beyond the line of the Norfolk & Western R. R. Co. were carried by that Company by a round-about route, causing higher charges and delay.

BUSINESS MEN'S ASSOCIATION OF MINNESOTA

CHICAGO & NORTHWESTERN R. Co.
(No. 74.)

Complaint filed September 3, 1887, alleging that while defendant company makes a less rate for the longer haul from Chicago to Lake Michigan points, as it ought to do, it makes a higher rate for stations beyond Janesville—thus discriminating against Janesville and other points, in violation of sections 1, 2 and 3 of the Act.

BUSINESS MEN'S ASSOCIATION OF MINNESOTA

CHICAGO, ST. PAUL, MINNEAPOLIS & OMAHA R. R. Co.
(No. 75.)

Complaint filed September 5, 1887, containing the same allegations as the complaint in No. 74, in reference to Lake Superior points and points southwest of St. Paul.

INTER 8.

MANUFACTURERS & JOBBERS UNION OF MANKATO, Minnesota,

MINNEAPOLIS & ST. LOUIS R. Co.
(No. 76.)

Complaint filed September 5, 1887, charging violation of section 4 of the Act, and unreasonable rates.

James C. SAVERY & Co. of New York, doing business under the name of the AMERICAN EMIGRANT CO.

TRUNK LINES.
(No. 77.)

Complaint filed September 5, 1887, alleging unreasonable charges for transporting emigrants from Castle Garden to Chicago, etc., and combination to exclude plaintiffs from interviewing emigrants at Castle Garden.

James H. McMULLAN *et al.*, Committee of Board of Trade of Hartwell, Georgia,

RICHMOND & DANVILLE R. R. CO.
(No. 25.)

PLEADINGS in proceeding based upon charges of the exaction of unreasonable and preferential rates, now pending before the Commission.

COMPLAINT.

(Filed June 9, 1887.)

Hartwell, Ga, May 10, 1887.

To the honorable Interstate Commerce Commissioners:

The undersigned, a committee of the Board of Trade at Hartwell, Hart County, Georgia, beg to submit to your honorable body their petition for relief under the Interstate Commerce Law, arising out of the following statement of facts:

1. The Town of Hartwell, the county site of Hart County, is located at the terminus of a part of the Richmond & Danville Railroad intersecting with another part of said Richmond & Danville Railroad running from Toccoa to Elberton, Georgia, at Bowersville being a distance of ten miles from Hartwell to Bowersville. The portion of said road from Hartwell to Bowersville along with that portion of said road from Toccoa to Elberton, while keeping up a nominal official organization, is under the absolute control and management of said Richmond & Danville Railroad and is operated by it. Freight for Hartwell is shipped without any change of cars at Bowersville. The geographical location, etc. of Hartwell is shown on map annexed.

2. The rate of freight to Hartwell as compared with the rate of freight to Elberton, say on corn from Chattanooga, Tennessee, is as follows:

To Hartwell, 27½ cents per 100 pounds.

" Elberton, 18 cents per 100 pounds.

Again from New York to Elberton the spe-

cial rate on sixth class goods, including sugar, syrup, etc., is thirty-three cents per 100 pounds, to Hartwell, sixty-two cents per 100 pounds; and from other points and on other goods the difference between Elberton and Hartwell rates is onerous and unjust, as will be seen by reference to freight rates.

8. By reference to the map hereto annexed it will be noticed that freight, in being transported from Chattanooga to Hartwell, a distance of about 260 miles, passes over but two roads, the Western & Atlantic, and the Richmond & Danville, and the rate on corn is 27½ cents per 100 pounds; whereas, the rate to Elberton over the same road and fifteen miles farther than Hartwell is only eighteen cents per 100 pounds.

Again; freight from Chattanooga to Eatonton, Georgia, a distance of about 290 miles, passes over four roads, Western & Atlantic, East Tennessee, Virginia & Georgia (or Central), Georgia Railroad and Southwestern, and the rate is 21½ cents per hundred.

And several other points will be noticed by reference to the map where freights are shipped from Chattanooga to points more distant than Hartwell, and passing over more roads, and the rate is lower than the rate to Hartwell. The special point, however, from which our town and community suffer injury is the great difference in rates between Hartwell and Elberton.

4. There to Elberton, being so much lower than the rate to Hartwell, takes from the southern and western parts of the county a large part of the trade which should legitimately go to Hartwell, and which would go to Hartwell if we had the same rate of freights as to Elberton. In addition to the above we have a very small area on eastern side of county before reaching the Savannah River, and cannot draw trade from the Carolina side with present high rate.

5. We respectfully ask that section 4 of the Interstate Commerce Bill be put in force at the expiration of the present ninety days' suspension. We claim, however, that the foregoing high rates to Hartwell are in violation of section 3 of the Interstate Commerce Bill. We claim that the present rate gives "an undue and unreasonable preference to Elberton," and subjects Hartwell to "an undue and unreasonable prejudice and disadvantage." We ask relief under both sections, 8 and 4, of said Bill.

6. We respectfully submit that if the present rate to Elberton is just and right; the present rate to Hartwell is too high, and if the present rate to Hartwell is just and right, then the present rate to Elberton is too low. It will be noticed that the above advantage is given to Elberton over Hartwell, the former being a rural business town only twenty miles distant, and both with the same railroad facilities, and said road managed and controlled by the same company.

7. Some time ago the business men of Hartwell found it would be cheaper to have their goods shipped to Elberton and then reshipped back to Hartwell. They began this method, and soon after the Richmond & Danville Railroad Company raised the local rates from Elberton to Hartwell, and thus continue to sub-

ject us to the unjust discrimination set forth in this memorial.

(Signed) Jas. H. McMullan, J. D. Matheson,

" J. W. Williams, A. F. Brown,
" A. R. McCurry.

[L. s.]

ANSWER.

(Filed July 18, 1887.)

The above named respondent, the Richmond & Danville Railroad Company, in obedience to the citation of the honorable, the Interstate Commerce Commission, issued to it upon the complaint entitled as above, without waiving and specially reserving all rights of objection or exception legally inuring to it, hereby makes answer to so much and such parts of said complaint as it is advised it is material and necessary for it to do, and says:

First. That the said complaint does not comply, and is not filed in accordance, with the rules adopted by the said honorable Commission, and that for such reason this respondent is entitled to, and does insist, that the said complaint shall be wholly stricken out and dismissed.

Second. That the said complaint does not contain a statement of facts sufficient to show that this respondent has done or omitted to do anything in contravention of the Act of Congress approved February 4, 1887, entitled "An Act to Regulate Commerce," to constitute a lawful cause of complaint to this honorable Commission, or require an investigation by it, or, especially, to require this respondent to make answer thereto.

Third. That all charges made in said complaint of unjust or unlawful discrimination, in freight rates or otherwise, by this respondent against the said Town of Hartwell, Georgia, or the citizens thereof, are untrue, and this respondent denies the same, and alleges the fact to be that the said freight rates, over line owned, controlled or managed by this respondent, and in so far as the same are made, fixed or determined by it, have been so made, fixed and determined without any intention or design of giving any undue or unreasonable preference or advantage to the said Town of Elberton, Georgia, or the citizens thereof; or of discriminating against said Town of Hartwell, in favor of said Town of Elberton,

or otherwise, or, as a matter of fact, resulting in said discrimination, or to the undue or unreasonable prejudice or disadvantage of said Town of Hartwell.

Fourth. That the through rate on corn shipped at Chattanooga, Tennessee, to said Town of Elberton, complained of in said complaint, is not made and determined, either by general arrangement or special contract, by this respondent, or any authorized agent of it, nor is it in any wise controlled by it, but is made by the common carrier or transportation line to which the shipper may deliver to, and contract with, at said Town of Chattanooga, and which transports such corn to the City of Atlanta, Georgia, at which point it is transferred to the respondent, and that in no instance is said contracting first carrier authorized to name, give or fix for the portion of the transportation passing over lines controlled and managed by this respondent,—that is to say, over the Charlotte Air Line Railway from Atlanta to Toccoa, both in the State of Georgia; thence, by unloading and reloading, to narrow gauge cars, over the Elberton Air Line, being a narrow gauge railroad from Toccoa, Georgia, to Bowersville, Georgia; and thence by new train over the Hartwell Railroad to Hartwell, Georgia,—any other or different, less or greater, rate than is named and established in and by the regular and ordinary schedule of rates for like service by this respondent over the said lines, and whether the freight and transportation thereof originates at said City of Atlanta, Georgia, or at points beyond.

Fifth. That under the provisions of the Statute of the State of Georgia, in such case made and provided, that is to say, section 719 g. of the Code of the State of Georgia of 1882, the maximum rates which railroads are permitted to charge for transportation of freight or passengers to and from points within said State of Georgia, are fixed and determined by a board of railroad commissioners, and that the rate on corn charged by this respondent between said City of Atlanta and said Town of Hartwell, which is complained of in said complaint as being so unduly and unreasonably high as to violate section 8 of the Act of Congress approved February 4, 1887, entitled "An Act to Regulate Commerce," is in fact four cents per hundred less than the rates fixed and authorized to be charged by the said board of railroad commissioners.

Sixth. That, at the rates heretofore charged and named and complained of in said complaint, the business of said Town of Hartwell, both freight and passenger, as developed and existing to the present time, is not only wholly unremunerative but is done by this respondent at a heavy yearly loss, which is illustrated by the financial statement of the said Hartwell Railroad for the first eight months of the current fiscal year, as follows, viz.:

1886, Oct. 1, 1887, May 31	
Expenses, - - -	\$3,650.59
1886, Oct. 1, 1887, May 31	
In. on bonds - - -	1,333.34 \$4,983.93
Gross earnings - - -	4,452.44
Lost on operation, first eight months	
current fiscal year - - -	\$531.49

INTER 8.

so that it may in fact be said that, at the rate complained of in the said complaint, this respondent has been and is operating the said railroad solely for the benefit and advantage of the said complainants and said Town of Hartwell, without benefit or profit to itself, and at a cost and expense largely in excess of any return of earnings.

Seventh. That the provisions of the fourth section of the Act of Congress approved February 4, 1887, entitled "An Act to Regulate Commerce," do not apply and cannot be applied to the regulation of the business of this respondent to and from the said Town of Hartwell, with the object of requiring it to charge and receive a less, or of prohibiting it from charging and receiving a greater, compensation for the transportation of freight to or from said Town of Hartwell than it charges and receives for a similar service to and from said Town of Elberton.

Eighth. That at said Town of Elberton, which is the southern terminus of the said Elberton Air Line Railroad, this respondent comes into competition with the Georgia Railroad (a separate and distinct organization), for business at said town and from the territory contiguous thereto, which said condition and circumstances does not exist as to said Town of Hartwell and its contiguous territory.

Ninth. That as appears from said complaint and the exhibits filed therewith, the rates which form the basis of said complaint are those which were in force prior to the 31st day of March, 1887, and which said rates were authorized to be continued for the period of ninety days from and after the 6th day of April, 1887, by the order of this honorable Commission duly made and entered on said last named day, and which said order was made upon the petition of this respondent, and other railroad companies, asking for a permanent suspension of the fourth clause of the Act of Congress approved February 4, 1887, entitled "An Act to Regulate Commerce," and that said period of time expired but three days prior to the date of the filing of said complaint, at which time and since, this respondent was diligently revising the schedules of rates and charges over its entire extended system of railroads, reaching and traversing four different States, so as to conform the same to the requirements of the said Act of Congress as substantially, and as fairly and equitably to the people, communities and localities served and reached by its said system of railroads, as the same can be reasonably done, and that as soon as it was possible to accomplish the same, and on the 18th day of July, 1887, a new schedule of rates was duly perfected and posted, in conformity to the sixth section of said Act of Congress, to take effect on the 18th day of July, 1887, in all cases where said schedules show a reduction of rates, and on the 25th day of July, 1887, in all cases where said schedules show an increase of rates, which said schedules are duly filed with this honorable Commission as required by said Act of Congress, and hereby referred to in verification of the statements herein made and contained; that said schedules show all the through rates as made by this respondent, as aforesaid, to and from said Town of Hartwell, and to and from said Town of Elberton,

to and from Boston, Mass., Providence, R. I., New York, N. Y., Philadelphia, Pa., Baltimore, Md., Richmond, Petersburg and Norfolk, Va., to be identical without any discrimination or inequality whatever as against or in favor of either of said towns; and beyond these, all other rates to and from said towns are local rates in the State of Georgia, and are made in conformity to the requirements of the laws, and of the board of railroad commissioners of said State; but nevertheless in the revision of the rates above referred to, said local rates as fixed by this respondent are less, by a large percentage, than the rates authorized to be charged by said railroad commissioners, and shows large reduction of charge to said Town of Hartwell, and increase to said Town of Elberton, from the rates heretofore charged to said points, respectively, and as specified and complained of in said complaint.

Tenth. That the matters and things complained of in said complaint relate and refer wholly to rates and charges between points situated within the state limits of the said State of Georgia; and this respondent respectfully submits and insists that, therefore, the said complaint, and said matters and things, are not within the jurisdiction of this honorable Commission.

Wherefore, this respondent prays that the said complaint may be dismissed, and that it have its costs in this behalf expended.

The Richmond & Danville Railroad Company, by Jas. F. Worthington,
General Attorney.

District of Columbia, } ss.
City of Washington. }

Peyton Randolph, being first duly sworn, says that he is the Assistant General Manager of The Richmond & Danville Railroad Company, the respondent making the foregoing answer; that he has carefully read the same, and that it is true to his knowledge, except as to the matters therein stated to be alleged on information and belief, and that as to those matters he believes it to be true.

(Signed) Peyton Randolph.

Sworn and subscribed before me, this 18th day of July, 1887.

(Signed) John T. C. Clark,
Notary Public.

[L. s.]
District of Columbia, } ss.
City of Washington. }

John T. Downs, being first duly sworn, says he is a clerk in the Law Department of The Richmond & Danville Railroad Company, at the City of Washington, D. C., and that on Monday the eighteenth day of July, A. D. 1887, he mailed at said City of Washington a copy of the foregoing answer in a sealed envelope, postage prepaid and addressed, "James H. McMullan, Esq., Chm. Com: Board of Trade, Hartwell, Georgia."

(Signed) John T. Downs.

Sworn and subscribed before me, this 18th day of July, 1887.

PLEADINGS in proceeding now pending before the Commission, based upon charges of discrimination and improper classification of an article manufactured by complainants, known as "Pearline."

COMPLAINT.

(Filed June 11, 1887.)

New York, June 7, 1887.

To the United States Interstate Commerce Commission, Washington, D. C.

Gentlemen:

We beg to present to your respected board the following statement of persistent discrimination, against the goods we manufacture, by the railroad and steamship lines that form "The Southern Railway & Steamship Association"—whose address is Atlanta, Georgia,—(Virgil Powers, Gen. Commissioner), and pray that your Commission grant such order as will give relief from such undue and unreasonable disadvantage—which we believe to be forbidden under section 8 of the "Interstate Commerce Law."

We cite the Southern Railway & Steamship Association, as it is the legislative body that makes up the classification and rates for the railroads and steamship lines that form said Association, and also append a list of the said railroads and steamship lines (as far as we are able) that make up said Association or adhere to its rulings.

We have made repeated and persistent application to these railway and steamship lines, and to the rate committee of the said Southern Railway & Steamship Association, particularly during the year past—to correct the unjust rating of our goods; but they have been unavailing to secure such favorable action, or even any reason for continuing their discrimination against our goods.

Our article is sold under our trademark name of *Pearline*, and is a soap prepared in powdered form—it is classified either under the adjective name of *Pearline* or the general heading *soap powder* at the same rate as "common soap" to all parts of our country excepting only a portion of that that comes under the control of the said Southern Railway & Steamship Association; and in this latter section the following state railroad commissions have decided that "Pearline should be classified the same as common soap", viz.: of South Carolina (as per letter April 14, 1887, to railroads and to the Southern Railway & Steamship Association), of Georgia (as per circular No. 82), of Alabama (as per circular letter April 4, 1887).

See official classification No. 1; classification by Eastern Railway and Steamship Lines: joint western classification; New Orleans, Texas, and Southwestern classification; trans-continental lines classification; etc.

Very justly, "soap powders" (and, or including, pearline) are placed under the same freight

classification and tariff as common soap (as noted above) for the following reasons, viz.:

It is a soap in powdered form.

It is used for laundry and household purposes in place of soap, and not in connection with it, and so is competitive with soap.

It is of similar bulk, packed in boxes like soap, is no more liable to injury or damage, and no more trouble or expense to handle and forward.

It is sold at a low price—being retailed to consumers throughout the Southern States at five cents per package, containing six to seven ounces of powder—while the quality of the goods is the very best for a laundry article and unadulterated in any way whatsoever. Compared to common soap in price it may be higher than the bulk of low grade stuff, but not high for the grade of this article.

In bulk it figures forty pounds to the cubic foot, viz.: case weighing fifty-three pounds 9 x 15 x 17½ inches.

The name, you can readily appreciate, is for the purpose of protecting the quality of the article and the trademark for it, and is in no sense a monopoly as there are innumerable other "soap powders" sold throughout the country, but of course no one else can use the adjective Pearlina on such an article.

The Southern Railway & Steamship Association puts our article under the fourth class rate, while common soap is made sixth class; and *special class to the leading cities*—so taking the rate from New York to Atlanta as a basis (this we believe is their standard)—common soap goes for fifty-three cents per 100 pounds, while our goods are subject to a rate of seventy-three cents per 100 pounds. This to us seems clearly "to subject" a "particular description of traffic to undue" and "unreasonable disadvantage."

The said Association put our article under the title "Powders and Washing Compounds," etc., which of course will cover it, but yet it will apply to many very dissimilar articles—say purely chemical articles of small bulk, etc., which might properly pay a higher freight tariff—yet we care nothing for the title if rate is correct.

Trusting this will be regarded as a proper complaint for the consideration of your Commission, we are,

Very Respectfully Yours, etc.,
James Pyle & Sons.

City and County }
of New York }

June 8, 1887, before me personally came Wm. S. Pyle to me known, and being sworn saith that he is a member of the firm of James Pyle & Sons, of New York, and that the foregoing statement is correct and true to the best of his knowledge and belief.

Jesse Howell, Commissioner of Deeds,
City and County of New York.

Railroads and steamship lines belonging to or adopting the classification and rates of the Southern Railway & Steamship Association, viz.: the great Southern Freight Lines—viz.: New York, Charleston & Florida Steamship Co.; South Carolina Railway and connections; Georgia Railroad; Ocean Steamship Co. of Savannah; Central Railroad of Georgia; Old Dominion Steamship Co. New York; Richmond & Danville Railroad; Norfolk & West-
INTER 8.

ern Railroad; East Tennessee, Virginia & Georgia Railroad; Wilmington & Weldon Railroad; Mobile & Ohio Railroad; Georgia Pacific Railroad; Western & Atlantic Railroad; Alabama Great Southern; Alabama Central; Atlanta & West Point; Florida Railway & Navigation Co.; Florida Southern Railway & *etc.*

ANSWER.

(Filed June 30, 1887.)

The Southern Railway & Steamship Association.

Office of the General Commissioner.

Virgil Powers, Gen. Com.

Atlanta, Ga. June 25, 1887.

To the United States Interstate Commerce Commission.

Edward A. Mosely, Esq., Secretary.

Washington, D. C.

Dear Sir:

Yours enclosing charge against the Southern Railway & Steamship Association (Virgil Powers General Commissioner), by Messrs. James Pyle & Sons, received, and would have received earlier attention but for absence attending meetings of the executive and rate committees.

We admit that this firm has made repeated and persistent applications both by letter and in person to our committee to have their trademark article Pearlina advertised in our classification and put in sixth class. Also that they have made repeated and persistent application to the Railroad Commissioners of Georgia, Alabama, etc., and succeeded in getting their trademark article classed as common soap; which the Georgia Commission has corrected as per enclosed circular; and I have no doubt that the South Carolina and Alabama Commissions will do so when they have investigated the case.

Our rate committee is also the classification committee of the Southern Railway & Steamship Association, composed of fifteen general freight agents of the several railroads of the South with Virgil Powers and Jas. R. Ogden as commissioners and chairmen and Chas. A. Sindall as secretary. These gentlemen are supposed to know, or at least should know, from their occupation, much about the classification and rates of goods. They have on each application made by Messrs. Pyle & Sons fully discussed their application. They have in all cases refused to class patent or trademark articles, under their patent or trademark name, but class them under the general name of the article.

As to this article "Pearline:" it is a powder or "washing compound" and is classed under the head of "Powders and Washing Compounds," and is put in fourth class for the following reasons:

1. It is a powder or washing compound, and we would be advertising their trademark extensively against all other washing compounds, if put under their "trademark" name.

2. It is of more than double the value of common bar soap. According to their own valuation it is worth 18½ cents per pound when common soap is worth not exceeding 6 cents

per pound, or an average of about 5 cents per pound varying from 4 cents to 6 cents per pound according to quality.

3. It takes about one fourth as much in weight as common soap to do the same work according to their own assertions; therefore carrying about one fourth as much in weight of an article, of more than double the value, certainly entitles our railroads to make much higher classification on these goods than on common soap (at least fourth class), as compared with sixth class for common soap. I think it might be third class with propriety.

4. The tonnage of our Southern roads is, as is well known, very light as compared with the Northern and Western roads, and if our tonnage was reduced one half or three fourths by new things taking the place of old, we would have to make much higher classification or rates to earn as much money as now, or to sustain the property. In considering all these questions the committee takes into consideration the quality as well as the quantity of articles shipped, and class them accordingly.

For the above and foregoing reasons I am sure the committee did right in making washing compounds of all names fourth class.

Respectfully Yours,
Virgil Powers, Gen. Com.

State of Georgia, } ss.
Fulton County.

Before me personally came Virgil Powers and, being duly sworn, says he is General Commissioner of the Southern Railway & Steamship Association and that the foregoing statement is true to the best of his knowledge and belief.

Sworn and subscribed to before me,

June 25, 1887.

[L. s.]

Lewis Redwine, N. P.

WESTERN & ATLANTIC R. R. CO.

v.

EAST TENNESSEE, VIRGINIA & GEORGIA R. CO.

(No. 41.)

COMPLAINT filed June 17, 1887, alleging violations of the third section of the Act, in refusing equal facilities for the interchange of traffic, etc. Proceedings on the complaint have been suspended, and no answer has been filed.

COMPLAINT.

Atlanta, Ga. June 6, 1887.

To the Interstate Commerce Commission,
Washington, D. C.:

The petition of the Western & Atlantic Railroad Company, by R. A. Anderson, its Superintendent, which road extends from the City of Atlanta, in the State of Georgia, to the City of Chattanooga, in the State of Tennessee, crossing the East Tennessee, Virginia & Georgia Railway at Dalton, Georgia, respectfully complains that the East Tennessee, Virginia & Georgia Railway Company, in its intercourse with the Western & Atlantic Railroad Company, is violating the last paragraph in section 3 of the Interstate Commerce Act, which is in these words:

"Every common carrier subject to the provisions of this Act shall, according to their respective powers, afford all reasonable, proper, and equal facilities for the interchange of traffic between their respective lines, and for the receiving, forwarding, and delivering of passengers and property to and from their several lines, and those connecting therewith, and shall not discriminate in their rates and charges between such connecting lines; but this shall not be construed as requiring any such common carrier to give the use of its tracks or other terminal facilities to another carrier engaged in like business."

Your petitioner avers that the Western & Atlantic Railroad Company is carrying out in good faith the provision of the Law just referred to, and is affording all the reasonable, proper, and equal facilities in its power for the interchange of traffic between its lines and those of the East Tennessee, Virginia & Georgia Railway Company, and is ready to receive, forward and deliver passengers and property to and from the lines of the said East Tennessee, Virginia & Georgia Railway Company, without any discrimination in rates or charges between said lines,—the Western & Atlantic Railroad Company being ready and willing to receive the usual prorate between given points, and to protect rates, and advance charges, as is usual practice between railroad companies.

But your petitioner further avers that the East Tennessee, Virginia & Georgia Railway Company refuses to comply with the requirements of said paragraph in said above quoted Law, and refuses to exercise its power in affording all reasonable, proper, and equal facilities for the interchange of traffic between its lines and the lines of the Company of your petitioner, while daily affording to other connecting railroads, all the reasonable, proper, and equal facilities in its power for an interchange of traffic between them, which is greatly to the detriment and injury of the Western & Atlantic Railroad Company, and which is in violation of the Interstate Commerce Act.

To illustrate the above allegation by examples.

The East Tennessee, Virginia & Georgia Railway Company interchanges traffic with the Richmond & Danville Railroad Company at Atlanta on all business coming from Virginia and the Carolinas over the Richmond & Danville, on the usual terms, and consigned to stations on the East Tennessee, Virginia & Georgia, in Georgia and Tennessee, and the like interchange takes place on business going from stations on the East Tennessee, Virginia & Georgia, in the States of Tennessee and Georgia, consigned to stations in the Carolinas, or Virginia, each railroad advancing charges, and protecting rates.

But the East Tennessee, Virginia & Georgia refuses to make the like interchange on the usual terms with the Western & Atlantic Railroad on business coming from the Carolinas and Virginia over the Richmond & Danville to Atlanta, and shipped thence over the Western & Atlantic to Dalton, and tendered to the East Tennessee, Virginia & Georgia Railway Company for shipment to the point of consignment upon its line, and to points beyond its lines, or business originating at At-

lanta, and it refuses in such case either to protect the usual rate, or advance charges in the usual manner. As evidence of this fact, reference is hereby made to the accompanying way bills, numbered 1, 2 and 8, and communication from H. A. Lowry, agent of said Company at Dalton, marked number 4. The same fact will appear by reference also to the accompanying communication from T. S. Davant, numbered 5, G. F. A. of the East Tennessee, Virginia & Georgia Railway Company, in which he distinctly notifies the Western & Atlantic Railway Company that their Company will not pay charges on shipments received from the Western & Atlantic.

To further illustrate, it is clear that a bill of lading given at Danville, Virginia, over the Richmond & Danville to Atlanta, and thence over the East Tennessee, Virginia & Georgia Railway via Dalton to Charleston, Tennessee, would pass under the usual rule of interchange as between the Richmond & Danville and the East Tennessee, Virginia & Georgia; while way bill 1291 from Danville, Virginia, to Charleston, Tennessee, which is herewith submitted, shows that on a similar shipment made from Danville to Charleston where the consignment is through Atlanta, thence over the Western & Atlantic from Atlanta to Dalton, it is refused by the East Tennessee, Virginia & Georgia Railway at Dalton, and they will not receive it, protect the rates, or advance the charges, as is usual in such cases.

To still further illustrate, the East Tennessee, Virginia & Georgia Railway Company interchanges traffic both ways on the usual terms with the Georgia Railroad & Banking Company at Atlanta, whether the traffic originated upon the Georgia and is consigned to stations on the East Tennessee, Virginia & Georgia, or to points beyond.

As evidence of this fact, you are respectfully referred to the accompanying communication from E. A. Werner, agent of the Georgia Railroad & Banking Company, at Atlanta, marked number 6. But it refuses to make interchange with the Western & Atlantic where the freight originates on the Georgia Railroad and is billed via the Western & Atlantic to points on the East Tennessee, and beyond, as will appear by reference to exhibit number 6-A.

A like interchange of freights and passengers takes place daily at Atlanta between the East Tennessee, Virginia & Georgia Railway Company, and the Central Railroad & Banking Company and between the East Tennessee, Virginia & Georgia Railway Company and the Atlanta & West Point Railroad Company as will appear by the accompanying statement of Mr. R. Schmidt, the agent of the Central Railroad & Banking Company, and of the Atlanta & West Point Railroad Company at Atlanta. Marked number 7.

The East Tennessee, Virginia & Georgia Railroad Company also interchanges traffic on the usual terms at Jesup, Georgia, with the Savannah, Florida and Western Railway Company, on business passing both ways over the said roads respectively, via Jesup, Georgia. This will appear by the accompanying statement of W. P. Hardee, general freight agent of the Savannah, Florida & Western Railway Company. Marked number 8.

INTER S.

The East Tennessee, Virginia & Georgia Railway Company also interchanges business upon the usual terms and affording the usual facilities, with the Louisville & Nashville Railroad Company, at Calera, Alabama, on traffic going over the lines of the respective railroads at that point.

This will appear from the accompanying statement of J. M. Culp, general freight agent of the Louisville & Nashville Railroad Company. Marked number 9.

The East Tennessee, Virginia & Georgia Railway Company also interchanges traffic upon the usual terms with the Nashville, Chattanooga & St. Louis Railway Company at Chattanooga, Tennessee, as will appear by the accompanying statement of Mr. Geo. R. Knox, general freight agent of the Nashville, Chattanooga & St. Louis Railway Company. Marked number 10.

The East Tennessee, Virginia & Georgia Railway Company also interchanges, on the usual terms, traffic with the Cincinnati Southern Railway Company at Chattanooga, Tennessee, as will appear by the accompanying statement of Mr. H. Collbran, general freight agent of the Cincinnati Southern Railway. Marked number 11.

The East Tennessee, Virginia & Georgia Railway Company also interchanges upon the usual terms, traffic with the East & West Railroad of Alabama, at Rockmart, Cross Plains, Alabama, and East & West Junction, Alabama, affording the usual facilities, as will appear by the accompanying statement of J. J. Calhoun, general freight agent of said East & West Railroad Company. Marked number 12.

But, notwithstanding the said East Tennessee, Virginia & Georgia Railway Company interchanges with all the other railway companies above mentioned, upon the usual terms, protecting rates and advancing charges, said Company utterly refuses to make a like interchange with petitioner's Company at Dalton, Georgia, or Chattanooga, Tennessee, for any business originating in or consigned to East Tennessee, thereby denying to the Company of your petitioner the same reasonable, proper, and equal facilities which it extends to all other railroad companies connected with its entire system, which is greatly to the damage of your petitioner.

And your petitioner humbly prays that the Interstate Commerce Commission will pass such order in the premises as will correct the abuses referred to and will secure to the Western & Atlantic Railroad Company the reasonable, proper, and equal facilities afforded by the East Tennessee, Virginia & Georgia Railway Company to its other connections.

And your petitioner will ever pray, etc.

R. A. Anderson, Supt.

State of Georgia, }
Fulton County. } ss.

Personally appeared before the undersigned, a notary public in said county, R. A. Anderson, who on oath says, that he is the Superintendent of the Western & Atlantic Railroad Company, that the facts set forth in the foregoing petition, in so far as they relate to his own acts and deeds and that of the Company of which he is superintendent, are true of his

own knowledge, and so far as they relate to the acts and deeds of others, he believes them to be true.

Sworn to and subscribed }

B. S. CREWS *et al.*, Committee of Chamber
of Commerce of Danville, Va.,
v.

RICHMOND & DANVILLE R. R. CO. and
Virginia Midland R. Co.
(No. 24.)

PLEADINGS in proceeding now pending
before the Commission, based upon allega-
tions of unjust rates and of discrimination
against Danville.

COMPLAINT.

(Filed June 8, 1887.)

To the Honorable Board of Interstate Com-
merce Commissioners:

B. S. Crews, J. E. Schoolfield and D. A. Overbey, members of the committee on transportation of the Chamber of Commerce of the City of Danville, Virginia, for themselves, and in behalf of said Chamber of Commerce, respectfully prefer this, their petition, to your honorable body, and say that they are aggrieved by the action and operations of certain common carriers conducting business in and throughout the State of Virginia and States adjacent.

Especially have your petitioners cause to complain of the Richmond & Danville and Virginia Midland Railroads, corporations created by and in pursuance of the laws of Virginia, the latter, to wit: the Virginia Midland Road, being now operated under the auspices of the Richmond & Danville Railroad, and recognized as a part of its system, said system extending into and over several States adjacent to said State of Virginia. As the Midland is now in fact operated as a part of the Richmond & Danville Railroad, your petitioners will speak of the two as the Richmond & Danville Railroad, as of one body or corporation.

Your petitioners beg to represent that for a number of years the Richmond & Danville was the only railroad running into Danville, and there was much complaint of its freight and other charges. To obtain a competitive line of road, the people of Danville and country adjacent, after a large outlay of time and money, procured the building of the Lynchburg & Danville Road which connected with the Midland Road at Lynchburg. After some years the said Lynchburg & Danville was merged into, or absorbed by the Virginia Midland Road, and only some two or three years ago the said Midland was consolidated with, or passed to the control of the Richmond & Danville Railroad. Very soon after the Midland passed to the control of, the said Richmond & Danville Road, the latter commenced to make changes in its freight charges, and conditions of transportation and business, so that the people of Danville and vicinity felt

oppressed by such charges and ever since have been put to disadvantage, loss and damage in all their commercial and trade relations.

That before the Midland passed to the control of the Richmond & Danville Road, the merchants and traders of Danville drove a large trade in grain, meat, flour and heavy goods generally with nearly all points South in Virginia, North and South Carolina and beyond. Now that trade is destroyed by reason of lower freight rates, and better facilities afforded by said Richmond & Danville Road to other points and localities than were or are accorded to Danville.

Your petitioners have appealed to said Railroad for redress, but to no purpose or effect. Your petitioners are advised to appeal to your honorable body, and now come and humbly represent that they are informed, believe and charge, that the Richmond & Danville Railroad Company, through combination and arrangements with connecting lines of railroad North and West, has charged, and continues to charge the people, merchants and tradesmen of Danville, Virginia, and adjacent country, a greater price for the hauling and transportation of their goods and merchandise purchased in New York, Philadelphia, Baltimore, Chicago, Cincinnati, Mansfield, Grand Rapids, St. Louis and other places, than the said Railroad charges other persons and localities, under like conditions and for similar services. To specify, the said Company and its connections aforesaid charge for the transportation of grain from Chicago to Charlottesville, Lynchburg and Richmond, Virginia, twenty-two cents per cwt., on meat from Chicago to same points twenty-seven cents per cwt.; while from Chicago to Danville the charge for grain is thirty-four cents per cwt., and for meat bulk, per car load forty-three cents per cwt., and for boxed meat or lard fifty-eight cents per cwt. On flour in barrels from Columbus, Ohio, to Lynchburg per car load of 125 barrels the charge is \$50 per car; from same point to Danville, only sixty-six miles further, the charge is \$86.25; these things will more fully appear from a statement here filed, marked "A," and prayed to be taken as a part of the petition.

Your petitioners are informed, believe and charge that the said Richmond & Danville Railroad, has for some time past discriminated, and continues to discriminate in its transportation and freight charges in favor of other persons and localities, and against Danville and its people, merchants, tradesmen and others. To instance: the said Railroad has so arranged its freight charges from Charlottesville, Richmond and Lynchburg to Ridgeville, Greensboro, Durham, Salisbury, High Point, Asheville and Charlotte, North Carolina points south of Danville, that far higher relative rates are charged to the people of Danville and country adjacent, than are charged by said Road to the people at the points referred to or named. A statement showing said relative charges is here filed, marked "B," as part of this petition.

Your petitioners are further informed, believe and charge that the said Richmond & Danville Railroad discriminates against Danville, its merchants and people adjacent, in its freight charges, by applying or attaching to goods and merchandise received from other

lines of road for Danville local rate or charges from the point of reception to point of delivery at Danville, notwithstanding it receives from said other lines of road goods of similar character for, and carriers to such other points at lower and through rates, at the same time and by the same haul.

For instance: meat, lard, grain, flour, etc., are received by said Road for Richmond and Lynchburg, which are transported from said points directly by Danville to points south and beyond, at prices lower than said goods or goods of similar kind and quantity are shipped or transported by said Road from Danville to said points as Durham, Salisbury, Asheville and Charlotte, North Carolina. A statement bearing in said matters is here filed, marked "C," as a part of this petition.

Your petitioners are informed, believe and charge, that the said Richmond & Danville Railroad discriminates against the people of Danville and vicinity by denying to them a lower or approximate "through rate" upon the transportation of their goods, which it accords to other persons and points south, say from Richmond to Durham, Salisbury, High Point, Asheville and Charlotte, North Carolina.

Your petitioners are informed, believe and charge, that said Richmond & Danville Railroad has charged and received of the merchants and people generally of Danville and vicinity, and continues to charge and receive of said people, a greater price and compensation for the transportation of goods and merchandise over short lines or by "short hauls," than it charges to, and receives of other localities and people for like and contemporaneous services in the transportation of like traffic under substantially similar circumstances and conditions, over long distances or by "long hauls." For example, meat, lard, grain, flour and other goods are received at Charlottesville, Lynchburg and Richmond by said Road, and transported over the same to points south of and beyond Danville, say to Durham, Asheville, High Point and Charlotte, North Carolina, at lower rates than it charges and receives for the transportation of goods of like character, bulk weight, and to Danville from said Charlottesville, Lynchburg, and Richmond. A statement in regard to said charges is here filed, marked "D," as a part of the petition.

Your petitioners are informed, believe and charge, that said Richmond & Danville Railroad, by the exercise of its discriminating charges in the matter of "long and short hauls," have rendered the merchants and tradesmen of Danville and vicinity unable to compete for trade with points possessing less advantages by reason of distance, etc., say with Charlottesville, Lynchburg and Richmond, in favor of which discriminations have been made. An inspection of the freight charges made by said Road from Lynchburg and Richmond, to Danville, and thence south to points of stoppage on said road and to Charlotte, N. C., will show the truth of this charge.

Your petitioners are informed, believe and charge, that the Richmond & Danville Railroad makes discrimination in its freight charges between Danville and other points, and against Danville and the people thereof and vicinity, for the transportation of iron goods and coal.

To instance: the charge upon iron goods from Lynchburg to Danville, sixty-six miles, varies from \$4 to \$5 per ton. On coal the freight per ton is from \$3 to \$3.50, this charge in effect compels the people in Danville, etc., to pay double or nearly twice as much for coal per ton, as do the people of Lynchburg, to which point it is brought by rail a much greater distance, and from other States.

Your petitioners are informed, believe and charge, that the Richmond & Danville Railroad, since the passage of the Act known as the "Interstate Commerce Law," has increased the freight charges to the manufacturers and others of Danville and those dealing with them for the transportation of tobacco from Danville to Richmond, and thence to points beyond, and exacts exorbitant and unreasonable freight charges of said manufacturers and others, and those trading with them, for the transportation of their goods over said Road. For example, tobacco is shipped from Richmond to San Francisco, California, for from \$1.50 to \$1.61 per cwt. The charge for the same from Danville, via Richmond by and under the auspices of said Road to San Francisco is \$3 per cwt.; charges for the transportation of tobacco from Danville to points in Florida and other States are similarly high and unreasonable. As these charges are believed "to be fixed" by the Richmond & Danville Railroad, proof of the same will be offered at the proper time.

Your petitioners are informed, believe and charge, that the Richmond & Danville Railroad Company, exacts of the merchants, traders and people generally of Danville and vicinity, exorbitant, unjust and unreasonable charges and freight rates for the transportation of dry goods and of all other characters and classes of goods and merchandise to and from said city. For example: the freight charges upon goods of the first class from New York to Lynchburg, about 425 miles, is sixty cents per cwt., from Lynchburg to Danville, sixty-six miles, thirty-three cents per cwt. A statement showing the charges attached by said Road to many goods, and different classes of the same is here filed, marked "E," as part of this petition.

Your petitioners believe and charge that the combinations, arrangements, acts and doings of the said Richmond & Danville Railroad Company hereinbefore referred to, set forth and complained of whether said combinations, arrangements, acts and doings have or bear relation to the main line of said Richmond & Danville Railroad, or any of its parts or divisions operated under purchase, lease or otherwise, have been greatly to the loss and injury of your petitioners and those they represent, are illegal and improper and in plain violation of the second, third, fourth, and other sections of the Act of the Congress of the United States approved February 4, 1887, entitled "An Act to Regulate Commerce."

Your petitioners are advised that said Act was passed by Congress to prevent unjust discrimination in the matters of freight and transportation, and the imposition of wrong by excessive charges or otherwise upon the trading or traveling public by common carriers, and that to your honorable body, as a commission, were confided by said law the power and

authority to investigate complaints, and in proper cases to compel obedience to law. Your petitioners humbly pray your intervention, and the exercise of the authority vested in you, in their behalf, and in behalf of those they represent, in regard to and touching the matters herein complained of, they pray relief against the unjust charges, discriminations and wrongs imposed and perpetrated by the Richmond & Danville Railroad Company, its managers, agents, and servants upon your petitioners and the people generally of Danville and country adjacent, that your honorable board will investigate all the matters and things herein set forth and complained of, that you will take such steps and action against and in regard to said Railroad Company as the law authorizes and contemplates, and mete out such redress and relief to your petitioners and those for whom they are acting, as justice and the nature of their case demand. And award all proper rules, orders, etc., and your petitioners will ever pray, etc.

B. S. Crews,
J. E. Schoolfield,
D. A. Overbey.

State of Virginia, }
City of Danville. } ss.

I, W. J. Daner, Jr., a notary public in and for the City of Danville, in the State of Virginia, do hereby certify that B. S. Crews, J. E. Schoolfield, D. A. Overbey, came personally before me in my corporation aforesaid and made oath that the matters and things in the foregoing petition contained are true to the best of their knowledge and belief. Given under my hand this 28th day of May, 1887.

W. J. Daner, Jr., N. P.

Geo. C. Cabell, Danville, Va., for petitioners.

ANSWER.

(Filed July 18, 1887.)

The Richmond & Danville Railroad in its own behalf, and for the Virginia Midland Railway Company, of which it is lessee, in obedience to the citation of the honorable the Interstate Commerce Commission, issued upon the complaint entitled as above, without waiving and especially reserving all rights of objection or exception legally inuring to it so to do, hereby makes answer to so much and such parts of said complaint as it is advised it is material and necessary for it to do, and says:

First. That the said complaint does not comply, and is not filed in accordance, with the rules adopted by the said honorable Commission, and that for such reason the said respondents are justly entitled to insist that the said complaint shall be wholly stricken out and dismissed.

Second. That the said Virginia Midland Railway Company is not a proper party respondent hereto, because all the railway property, rights, privileges and franchises of said Company are held, controlled, operated and managed by the said respondent, The Richmond & Danville Railroad Company, as lessee thereof; and if there exists any just cause of complaint, requiring the intervention and investigations of this honorable Commission, growing out of the matters and things alleged in said complaint, the said lessor thereof, the said Virginia Mid-

land Railway Company, should be hence dismissed with its reasonable costs herein.

Third. That all charges in said complaint of unjust, unlawful and improper discrimination against the City of Danville, Virginia; or of "combination and arrangements" to "charge the people, merchants and tradesmen of Danville, Virginia, and adjacent country, a greater price for the handling and transportation of their goods and merchandise purchased in New York, Philadelphia, Baltimore, Chicago, Cincinnati, Mansfield, Grand Rapids, St. Louis, and other places than the said Railroad charges other persons and localities, under like conditions and for similar services," or of "exorbitant, unjust, and unreasonable charges and freight rates for the transportation of dry goods and of all other characters and classes of goods and merchandise to and from said city;" in so far as they are made either specifically, inferentially or generally against this respondent, The Richmond & Danville Railroad Company, in its own corporate capacity, or as the lessee, managing and operating the said Virginia Midland Railway, are untrue; and this respondent wholly denies all and every of such charges and allegations, and says that, on the contrary, its schedule of rates and charges to and from the said City of Danville, in all instances in which the same are made, determined and controlled by its action, have been so made and determined without any intention or design of giving any undue or unreasonable preference or advantage to others, or of discriminating to any extent against said city, persons, parties, or localities, or, as a matter of fact, resulting in such discrimination, or to the undue or unreasonable prejudice or disadvantage of said city, persons, parties or localities.

Wherefore, this respondent prays that the said complaint both as against itself and the said Virginia Midland Railway Company, may be dismissed and that it have its costs in this behalf expended.

The Richmond & Danville Railroad Co. by Jas. S. Worthington, General Attorney.

District of Columbia, }
City of Washington } ss.

Peyton Randolph, being first duly sworn, says, that he is the Assistant General Manager of the Richmond & Danville Railroad Company, the respondent making the foregoing answer; that he has carefully read the same, and that it is true to his knowledge, except as to the matter therein stated to be alleged on information and belief, and that as to those matters he believes it to be true.

Peyton Randolph.

Sworn and subscribed before me this 18th day of July, 1887.

PLEADINGS in proceeding pending before the Commission, based upon the exclusion of a colored man from a first-class car.

COMPLAINT.

(Filed July 4, 1897.)

To the Interstate Commerce Commission, Washington, D. C.:

The petition of the undersigned respectfully sheweth to your honorable body that he is a citizen of the United States, and as such citizen he is entitled to the benefit of section 3 of the Interstate Commerce Act approved February 4, 1887; that your petitioner held a first class through ticket from Cincinnati, Ohio, to Charleston, South Carolina; that on the 18th day of June, 1897, your petitioner, in company with Dr. Wesley J. Gaines, and Mrs. Josie Gunseager, at Atlanta, Georgia, approached the first-class coach of the Georgia Railroad Company for the purpose of entering the same, and was told by the conductor of said train that he could not ride in that car, and was compelled by said conductor to ride in what is known on said Georgia Railroad, as the "Jim Crow Car." The accommodation in the "Jim Crow Car" was much inferior to the accommodation accorded to persons who rode in the first class car, which the ticket of your petitioner entitled him to ride in.

The car in which your petitioner was forced to ride by the conductor, is but a half car partially partitioned from the other half, which is used as a smoking car. It was dirty, and dirty railroad hands with their tools and baggage were allowed to ride in said car.

Your petitioner therefore prays that your honorable body will cause the said Georgia Railroad Company to furnish equal accommodations to persons holding first class tickets traveling over said road, irrespective of race or color, according to the Act of Congress in such cases made and provided.

Saml. J. Lee, Notary Public,

DEMURRER, PLEA AND ANSWER.

(Filed August 4, 1897.)

Respondent respectfully demurs to the petition and says that section 3 of the Act to Regulate Commerce, upon which section the petition is founded, has no application to such facts as are set out in the petition.

Without prejudice to its aforesaid demurrer, respondent says by way of plea to the jurisdiction of this honorable Commission, that petitioner was not, as he avers, the holder of a through ticket from Cincinnati, Ohio, to Charleston, South Carolina, at the time of the occurrences of which he complains; but at that time he was traveling on a local ticket from Atlanta, Georgia, to Augusta, Georgia—the line of travel being altogether in the State of Georgia.

Wherefore, respondent respectfully submits that this honorable Commission has no jurisdiction to hear and determine said petition.

Not waiving its aforesaid demurrer and plea, respondent answers as follows:

Petitioner claims that he was not permitted to ride in the first-class coach of respondent, but was compelled to ride in what is known on said Georgia Railroad as the "Jim Crow Car."

Respondent replies that it has in no way given or authorized such designation of any car on its road, and if, when complainant says that the car, on which he rode, is known as the "Jim Crow Car," he means to say that respondent is in any way responsible for this designation, and implied contempt for its inmates, respondent denies such allegation. At the Augusta end of respondent's main line, there is an accommodation train, running out of Augusta twenty five miles, and spoken of popularly as "The Picayune." At the Atlanta end, a similar train is known to its patrons and dwellers along the line of the Road as "The Goober." But these designations or nicknames are merely effusions of popular pleasantries, beyond the control of respondent, and considered by respondent, up to this time (perhaps erroneously), as entirely innocuous. If any of respondent's cars have been spoken of by evil disposed persons as "Jim Crow Cars," respondent is not aware of it; but prays, if the fact is shown to exist, that the Commission, if its large powers extend to such a case, will afford appropriate and adequate relief to respondent.

Complainant avers that the accommodation in the car, in which he was compelled to ride, was much inferior to the accommodation accorded to persons who rode in the "first class car."

Respondent respectfully denies this allegation, and in reply to the same, and as a statement at large of the true state of affairs on respondent's Road, so far as they concern the transportation of passengers, says as follows, to wit:

The regular day passenger trains on respondent's road are composed of: 1, an engine; 2, a combined baggage, express and mail car; 3, a passenger coach, divided about equally into two compartments—the two compartments communicating by a solid door, which opens and shuts after the usual manner of passenger

*See ante, 314; and Council v. Western & Atlantic R. R. Co., ante, 303.

car doors; and, 4, a passenger coach of the usual size and construction.

One of the compartments in No. 3 is assigned to smokers and the other to colored passengers, just as the whole of No. 4 is set apart for white passengers. The smaller amount of space, set apart for colored passengers, is for the obvious reason that there are much fewer of them.

This respondent says that except in the particular above noted—less space—the car for colored passengers affords accommodation substantially equal to that of the white passengers' car.

It is equally safe. It is equally comfortable. It is equally clean and well ventilated. No person is allowed to smoke in it; all smokers being obliged whether white or colored, to confine themselves to the smoking car.

No white person is allowed to ride in it, just as no colored person is allowed to ride in the white passengers' car.

It is not a car for the transportation of "railroad hands with their tools and baggage" any more than the white passengers' car. It might happen that a colored passenger was a railroad hand and traveling with his tools. This fact would not authorize his exclusion from the colored passengers' car. If he were exceptionally and disgustingly filthy in his person, this would furnish a substantive ground for exclusion, without reference to his occupation or calling. The same considerations would also operate to admit or exclude a white railroad hand to or from the white passengers' car.

The differences, if any, between the white passengers' and colored passengers' cars relate to matters æsthetical only, and consist in higher ornamentation and matters of that sort rather than in those which effect the substantial conditions of safety, comfort and convenience. If the two cars fail to be equal to each other in these respects, such failure is, to the extent of it, a departure from the aim and purpose of the management, and is not willful or intentional.

In a word, respondent states that it is the purpose and aim of its management, while insisting on separate accommodations for the races, to furnish, in all essential matters, equal accommodation to all. If it does this, it respectfully submits that it complies with the law of the land, including "An Act to Regulate Commerce."

Finally, respondent says that if the honorable Interstate Commerce Commission has under the law and the facts of this case jurisdiction in the matter set forth in the petition, respondent makes no resistance to the grant of the prayer of the petition, to wit: "That your honorable body will cause the Georgia Railroad Company to furnish equal accommodations to persons holding first class tickets traveling over said road, irrespective of race or color," etc., etc.

For respondent says that it has been its aim and policy and practice to do so for several years last past.

(No. 47.)

PLEADINGS in proceeding pending before the Commission, based upon allegation of discrimination against Opelika, Alabama.

COMPLAINT.

(Filed July 6, 1887.)

Opelika, Ala. July 3, 1887.

To the honorable Interstate Commerce Commission,
Washington, D. C.
Gentlemen:

We would respectfully petition your honorable body and call your attention to the unjust discrimination as practiced by the Columbus & Western Railroad and Western Railroad against Opelika, Alabama, in favor of Columbus, Georgia and Montgomery, Alabama, in violation of the Interstate Commerce Commission Law, by charging Opelika, Alabama, more for freight on similar shipments, when there is less service rendered, than for either Columbus or Montgomery. When Opelika was building up the rates were so adjusted that she could sell goods north and west, which is her natural territory, and she was enabled to divide the territory between Columbus and Montgomery. These advantages being thus, the people were induced to come and invest their money. And in this way, Opelika was being built and aided in building the Savannah & Memphis and East Alabama & Cincinnati Railroads. Now the rates are so fixed that Montgomery can retail goods at Opelika's very door, to Auburn, which is only seven miles, for less money than Opelika; Columbus can retail goods at Youngsboro, which is three miles from Opelika, for less money than Opelika. This is equally true to all points on Columbus & Western Railroad and Western Railway beyond Opelika. By these unjust and ruinous rates, Opelika has no outlet. What goods she sells are at such profits that it has forced the merchants to the most rigid economy. The profits have been reduced from fair rents to the property holders, until today her rents are only about one fourth. Yet Opelika furnishes equal facilities for distributing goods that Columbus or Montgomery does. The goods from the West are shipped by Opelika and there distributed up the Columbus & Western Railroad and East Alabama Railroad. To illustrate, from Louisville, Henderson, Kentucky, and Evansville, Indiana and other western points to Columbus, Georgia, via Louisville &

*See Re Opelika Board of Trade, ante, 314.

Northern Railroad and Western Railroad via Opelika and over the Columbus & Western Railroad (Opelika being twenty-nine miles nearer shipping point than Columbus), the rates are as follows, in favor of Columbus and to the ruin of Opelika:—

Class	1	2	3	4	5	6	A	B	C	D	E	H	F
	23	18	16	14	12	10	8	8	8	6	12	23	14
in favor of Montgomery, against Opelika:—													
Class	1	2	3	4	5	6	A	B	C	D	E	H	F
	32	18	19	19	15	15	8	15	12	9	14	25	20
													10

By adding these differences in favor of Columbus to the locals of Columbus & Western Railroad, you will find that Columbus can deliver goods at the first station beyond Opelika, which is Gold Hill, on Columbus & Western Railroad, for less money than Opelika, Montgomery can do the same thing with all the stations on the Western Railroad. Freight from Chattanooga, Tennessee, via Atlanta and West Point, Georgia, to Opelika, on grain is 23½ cents per 100 pounds. To Montgomery over the same roads via Opelika and sixty-six miles further, is only 12½ cents per 100 pounds. Now the same goods back to Auburn from Montgomery with a rate of fifteen cents per 100 pounds, makes a rate of 27½ cents to Auburn. Now take Opelika's rate of 23½ cents and add eight cents, the local rate from Opelika to Auburn, and you see 31½ which makes four cents per 100 pounds against Opelika and in favor of Montgomery; and as already stated, Auburn is only seven miles from Opelika.

Cotton. We desire further to call your attention to the unjust discriminations on cotton. It is a fact that to New Orleans, Louisiana, a port, to which Opelika has no through freight rate at all on cotton. Although the Alabama State Commission, no longer than last fall, gave it as their opinion, and it is a standing order today, that—"Opelika was unjustly discriminated against," still the railroad authorities refuse to give the necessary relief, and have withdrawn all their freight rates to New Orleans from Opelika. However, the facilities for the handling of cotton, at Opelika, are good and ample. And while both Columbus and Montgomery compete with Opelika, for the cotton tributary to Opelika and for which Opelika is the natural market, and by reason of Columbus and Montgomery having these through cheap rates to the ports and to the East and eastern mills, makes it extremely disastrous to Opelika's cotton receipts—and to her business generally. When Opelika was enjoying better rates, years ago, she received and shipped 26,000 to 28,000 barrels of cotton annually; from three to five years since, about 16,000 barrels; in 1885 about 11,500 with an extra crop in 1886, about 15,000 barrels,—but still the territory tributary to Opelika continues to make more and more cotton every year.

Now to show some of Opelika's disadvantages: Opelika is nearer Savannah, Georgia, than Montgomery, Alabama,—but Opelika has a rate of fifty-two cents per 100 pounds, while Montgomery and Columbus enjoy a rate of forty-five cents per 100 pounds. And each place has only one line of railroad (the Central) to Savannah, Georgia. Again; Opelika has no through freight rate to New Orleans, while

Montgomery has a rate of forty-five cents per 100 pounds to New Orleans. We claim that situated as we are, on the Columbus & Western Railroad and Western Railroad, gives Opelika outlets to all points north, east, south and west. The course, however, pursued by the Railroads are to circumscribe Opelika's territory to within a radius of three miles, which, beyond question, cripples Opelika, drives away her business and carries it to other and distant points; besides forcing the cotton over their lines of railroads by not giving through freight rates to other and all ports alike.

In support of this petition, we especially call your attention to the evidence adduced before your honorable body in Atlanta on April 28,* all of which you have on file. And more especially, do we call your attention to the admissions as made by General E. P. Alexander, President of the Central System.†

And we, your humble petitioners, therefore pray that Your Honors relieve us of this unjust discrimination as practiced by the Columbus & Western R. R. Co. and Western Railway.

Respectfully Submitted,

W. O. Harwell,

H. B. T. Montgomery,

ANSWER OF COLUMBUS & WESTERN R. CO.

(Filed August 13, 1887.)

Office of President
Central Railroad and Banking Co. of Georgia.
E. P. Alexander, President.

Savannah, Ga., July 22, 1887.

To the honorable Interstate Commission,
Washington, D. C.

Gentlemen:

As President of the Columbus & Western Railway, I acknowledge receipt of copy of the petition filed against this Company embracing charges made by Harwell and others of Opelika, Alabama.

Representing Opelika, these gentlemen claim that there is unjust discrimination in freight rates to that point.

Briefly stated, the case is this: Montgomery situated on the Alabama River, and Columbus situated upon the Chattahoochee River, have lower rates than Opelika. The reason is very plain: the railroads there have water competition, and are compelled to meet it. The rates to Opelika are made by adding to the rates from Montgomery or Columbus, a line of rates which we call the "Ball arbitraries," as they were suggested by Colonel Ball, one of

*See ante, 119.

†See ante, 124.

the State Railway Commissioners of Alabama. They are less than the local rates which generally prevail on the railroads in that State.

Opelika wishes them still further reduced. I am prepared to say that I am not unwilling to reduce them so far as Opelika is concerned, if I may be allowed to reduce them to Opelika, without making the reduction general to all other stations upon the line of the Columbus & Western Road.

This Railroad has a bonded debt which does not represent over one half of the actual cost of building it. Last year it fell short about \$15,000 of paying the interest upon its bonds. It has very little through business, and that only over twenty-nine miles of its length. It cannot, therefore, be claimed that the Road is making exorbitant profits, and, therefore, I do not think we can be asked to reduce its average charges. Yet, as above stated, I am willing to reduce the Opelika rate alone if the Interstate Commission thinks I can do so without violating section 4 of the Law, or will give me the permission to do so without reducing to other points, which that section confers upon them the power to do.

Very Respectfully,

E. P. Alexander, Pres.

Personally appeared E. P. Alexander, Pres., who swears that the above statement is true to the best of his knowledge and belief.

Wm. W. Rogers,

[Seal] Notary Public, Chatham, C. Ga.

ANSWER OF WESTERN RAILWAY OF ALABAMA.

(Filed July 25, 1887.)

Atlanta & West Point Railroad,
The Western Railway of Alabama, and
The Cincinnati, Selma & Mobile Railway. }
Montgomery, Ala. July 23, 1887.

Cecil Gabbett,

General Manager.

To the Interstate Commerce Commission,
Washington, D. C.
Mr. Chairman, and Gentlemen:

In compliance with the summons received from your honorable body, dated July 8, to answer the petition filed against the Western Railway of Alabama, embracing the charges made by W. O. Harwell and others of Opelika, Alabama, I herein respectfully furnish you with a brief statement of the facts in the case under consideration showing why said petition, in our opinion, should not be granted.

Montgomery, Alabama, is situated on the Alabama River, sixty-six miles west of Opelika and is the terminus of the following railroads: South & North Division of the Louisville & Nashville Railroad, Mobile & Montgomery Division L. & N. R. R., Montgomery & Eufaula Railway, Montgomery & Florida Railway, and the Western Railway of Alabama, which reaches from Selma, Alabama, to West Point, Georgia, passing through Montgomery, thereby constituting it a railroad center of great importance, and a direct competitive point; which city is in direct competition with long competing lines, reaching either by rail or water to the best markets of the world.

Mobile has direct ocean rates, and a line of steamboats on the Alabama River to Montgomery, which traverse the Alabama River during

the entire year. The rates to Mobile are regulated by the ocean rates. The rates to Montgomery are therefore under the same category. The rates from the West to Montgomery are also vitally affected by its water transportation route via the Mississippi River, New Orleans, Mobile, and thence to Montgomery.

The City of Columbus, Georgia, is situated on the Chattahoochee River, and is a place of about 13,000 inhabitants, and has many manufacturing, and is also the market for a large section of country both in Alabama and Georgia. The Chattahoochee River is navigable practically during the entire year, and is a formidable competitor of the railroad lines for the freight business of that city. Statistics will show that during the years 1879, 1880, 1882, and 1884, boats run without interruption the entire year as far up as Columbus; also in 1881 navigation was only interrupted from August 17, to August 28, nine days; also in 1883 the only period of interference was from September 5, to October 5. The United States mail is carried regularly by the steamboats on the river. The water competition on western products to Columbus by steamboats on that river has practically ceased during the past three or four years, owing to the reduction of rates by the rail lines to that point from the West; but should the rates be raised from the West to Columbus, competition would again ensue similar to what it was prior to 1881. From 1865 to 1869, nearly all the western business was taken by the boats on the Chattahoochee River. Upwards of twenty-seven boats have plied the Chattahoochee River at one time. As a further evidence of the importance of the Chattahoochee River as a navigable river, I would say that in the year 1883 the boats delivered 20,000 bales of cotton in Columbus, and a few years prior to that date Appalachicola, Florida, received upwards of 160,000 bales of cotton.

Columbus is also the terminus of the following railroads: Columbus & Western Railway, Southwestern Railroad of Georgia (Central R. R.), Mobile & Girard Railroad, and Columbus & Rome Railway.

The above information I furnish you for the purpose of advising you of the modes of transportation at Montgomery and Columbus.

Opelika, Alabama, is a town of about 3,000 inhabitants, having no navigable water course in its vicinity, and dependent entirely upon its railroads for freight transportation. It is the terminus of the East Alabama & Cincinnati Railroad, a line twenty-two miles long, and is located at the junction of the Columbus & Western Railroad and the Western Railway of Alabama, twenty-two miles from West Point, Georgia, sixty-six miles from Montgomery, Alabama, and twenty-nine miles from Columbus, Georgia. It has no manufacturing interests of any importance. Opelika has always been, until the year 1884, considered strictly a local station on the line of the Western Railway of Alabama, and the rates to it were made upon the customary plan throughout the South, based upon the lowest combination of through and local rates. Samples can be found all throughout the South similar to that of Opelika, where rival roads have not reduced the rates to an undesirable figure; none of such

stations in the State the same, which would destroy the railroad property in this State.

Now, as to Opelika and all such points where the action of antagonistic or rival railroads does not cut the rates of freight to unremunerative figures, how much business can they expect to do at other railroad stations beyond them? The business to all stations may be divided into three classes: sales to local towns, wagons, and other railroad stations. The business that Opelika complains of not being able to control is that of Auburn, Youngsboro, and other towns in their vicinity similarly situated. Can the rates of freight be fixed to make it to the interest of the merchants of those points to trade with Opelika? Merchants at those points have credit and equal intelligence, and can buy goods from first hands upon just as good terms as the merchants of Opelika, without paying tribute to the middleman. Is this not the reason that one town on a railroad does not sell goods to another town a few miles off also situated on a railroad? Can Opelika reasonably expect to do more than a local town under

kind of trade; if so, it was before the merchants of smaller places had established their credit, or the present system of through bills of lading was adopted and used through the banks as they are now in western markets. In the year 1884 the subject of discrimination against Opelika in favor of Columbus and Montgomery on western products was referred to the Alabama State Commission, and after the matter had been thoroughly investigated and discussed, it was agreed upon to make some concession in favor of Opelika, which resulted in an arbitrary being added to the Columbus rate on western products. (Arbitrary means a rate that is never higher than a local rate and sometimes less, and when used stands in lieu of a local rate or part of a pro-rate.) In this case the arbitrary amounted, as you will see by reference to the figures below, to only about 50 per cent of the local rate previously charged, thereby making a considerable reduction in the through rates from the West to Opelika, apparently satisfactory to Opelika merchants dealing in western products.

The local rates sanctioned by the Alabama State Commission between Montgomery and Opelika now in operation are as follows:

	1	2	3	4	5	6	A	B	C	D	E	H	F
Local rates from Columbus to Opelika...	50	48	39	29	25	19	19	30	19	15	27	30	36
Now the rates from the West, say Cincinnati to Opelika, are made as follows:													
Cincinnati to Columbus	117	109	91	76	68	52	32	40	35	31	54	63	
Arbitrary	28	18	16	14	12	10	8	8	8	6	12	14	24
Cincinnati to Opelika	150	120	107	90	75	62	40	48	43	37	66	83	
Rates from Cincinnati to Gold Hill:													
Cincinnati to Columbus	117	109	91	76	68	52	32	40	35	31	54	63	
Local Col. to Gold Hill	62	58	48	30	23	17	17	19	22	15	22	40	
Total to Gold Hill	179	155	139	106	85	69	49	58	57	46	76	103	
Rates from Cincinnati to Youngsboro:													
Cincinnati to Columbus	117	109	91	76	68	52	32	40	35	31	54	63	
Local Columbus to Youngsboro	59	52	39	27	21	16	16	17	20	15	19	40	
Total to Youngsboro	176	154	130	103	84	68	48	57	55	46	73	103	
Rates from Cincinnati to Auburn:													
Cincinnati to Montgomery	108	102	88	71	59	47	32	33	33	28	52	56	
Local Montgomery to Auburn	47	41	37	27	24	18	18	19	18	15	25	38	
Total to Auburn	155	143	125	98	83	65	50	52	52	43	77	94	
Rates from Cincinnati to Cusseta:													
Cincinnati to Montgomery	108	102	88	71	59	47	32	33	33	28	52	56	
Local Montgomery to Cusseta	53	45	40	30	25	20	20	22	20	16	28	39	
Total to Cusseta	161	147	128	101	84	67	52	55	53	44	80	95	

These figures show that there is in reality more ground for complaint against the railroads for discriminating in favor of Opelika against Auburn, Cusseta, Youngsboro, and Gold Hill, than there is for Opelika to complain of discrimination in favor of Montgomery and Columbus. The circumstances and conditions which cause the difference in rates between Opelika and the Cities of Montgomery and Columbus are more potent and forcible than any which can be shown in favor of Opelika as against its neighboring towns.

ENTER 8.

It was in a spirit of compromise that the present concessions were made to Opelika, and we feel that if discrimination exists at all, it is in favor of the people of Opelika, and not against them.

As to the charge that no through bills of lading are being issued by this Road from Opelika to New Orleans, Louisiana, we would say that they were issued on the same basis that freights between Opelika and other places were charged, until a promise of rebates or secret rates to some of the merchants of Opelika.

aforesaid gorge for two miles, to the mine worked by your petitioners. This extension consequently brought such last mentioned mine into direct competition with the mines of the Coal Creek Mining & Manufacturing Company aforesaid. The said Coal Creek & New River Railroad Company has never owned rolling stock of any kind. For the operation of its road it has depended upon the Knoxville & Ohio Railroad Company, and the latter has always controlled, managed and operated such road. In the course of such operation, the last named Company, up to the 10th day of April, 1887, as will hereafter be shown, furnished all the cars and trains used upon such road, and delivered the same at and to all the mines along the line thereof, without improper discrimination, and then, after these had been loaded, again duly received and transported them.

Petitioners further show that coal shipped from their said mines to the State of North Carolina first goes over said Coal Creek & New River Railroad, then over the switch or branch connecting said last mentioned road with the Knoxville & Ohio Railroad proper, then over said Knoxville & Ohio Road to Knoxville, then over the Virginia Division of the East Tennessee, Virginia & Georgia Railroad to Morristown, Tennessee; then over the North Carolina Division of said East Tennessee, Virginia & Georgia Railroad to the North Carolina state line at Paint Rock, then over the Western North Carolina Division of the Richmond and Danville system, owned by the Richmond & Danville Railroad Company; then over the North Carolina Division of said Richmond & Danville Railroad, and over other divisions of the same system, to the customers of petitioners. It has been, and is now, the invariable custom of said East Tennessee, Virginia & Georgia Railway Company to receive coal for shipment at the mines in said coal field and give a through bill of lading for the same from the mines to the point of destination in the State of North Carolina, as one continuous haul.

Petitioners further show and charge that said Coal Creek & New River Railroad is managed and controlled by said Knoxville & Ohio Railroad Company, that said Knoxville & Ohio Railroad is controlled and managed by the East Tennessee, Virginia & Georgia Railway Company, that the North Carolina Division and Virginia Division of the East Tennessee, Virginia and Georgia system are controlled and managed by said East Tennessee, Virginia & Georgia Railway Company, that the North Carolina roads hereinbefore mentioned are controlled and managed by said Richmond & Danville Railroad Company; and that both said East Tennessee, Virginia & Georgia Railway system, and said Richmond & Danville Railroad system are managed and controlled by the Richmond & West Point Terminal Railway & Warehouse Company, so it is that the entire line of railroad from petitioners' mines to their customers in North Carolina is under one general management.

One E. R. Chapman, of the City of New York, is acting as and claiming to be President of said Coal Creek & New River Railroad Company; E. J. Sanford, of Knoxville, Tennessee,

is President of said Knoxville & Ohio Railroad Company; Samuel Thomas, of the City of New York is President of said East Tennessee, Virginia & Georgia Railway Company, and Alfred Sully, of said City of New York, is President of the said Richmond & Danville Railroad Company, and also of said Richmond & West Point Terminal Railway & Warehouse Company.

Prior to April 14, 1887, said E. R. Chapman, E. J. Sanford, Samuel Thomas, Alfred Sully, and Calvin Brice and C. M. McGhee, of said City of New York, who were then officers or directors in said East Tennessee, Virginia & Georgia Railway Company, and said Knoxville & Ohio Railroad Company, and others who were their friends, purchased from the then owners almost the entire stock of said Coal Creek Mining & Manufacturing Company, and thereupon said purchasers openly avowed their purpose to crush out all competitors of said Company and its lessees in the business of mining coal in said coal field. Accordingly, orders were issued by the superintendent of said East Tennessee, Virginia & Georgia Railway Company to its agent at Coal Creek not under any circumstances to furnish any cars to petitioners, or to allow petitioners to ship any coal over said railroad; but said Company continued and now continues to control, manage, operate and use said Coal Creek & New River Railroad and run its cars and engines over the same, and to furnish and deliver coal cars to the lessees of said Coal Creek Mining & Manufacturing Company, who are operating upon the line of said road, and upon the line of the road running up the south fork of Coal Creek. Petitioners have applied to the agent and officers of said Railroad Companies at Coal Creek, Knoxville, Asheville, North Carolina, Richmond, Virginia, Washington, D.C., and New York, for relief against this unjust, oppressive and outrageous discrimination against them and their business, but have been unable to get a single car, or remove or ship a pound of coal, since April 14, 1887, although the cars and trains of said Railroad Company are on said Coal Creek & New River Railroad every day and within a few yards of petitioners' mines.

Petitioners charge that this iniquitous action of the Companies named as defendants in the caption of this petition was caused by their said officers for the purpose and with the intent to give an unreasonable and undue preference to the lessees of the said Coal Creek Mining & Manufacturing Company, which is owned and controlled by said officers and their friends, and for the purpose and with the intent of crushing out petitioners as competitors, and destroying their business; all of which is in violation of section 8 of the Interstate Commerce Bill.

Petitioners now have orders from customers in the State of North Carolina for many thousand tons of coal, which were received since April 14, 1887, and which petitioners cannot fill, because of the failure and refusal of said Railroad Companies to furnish cars. At the same time, the lessees of said Coal Creek Mining & Manufacturing Company are daily shipping large quantities of coal from said coal field to the State of North Carolina, in cars

furnished, delivered and moved by said Railroad Companies.

Petitioners, by said iniquitous and oppressive action, have been damaged not less than \$25,000 already, and are sustaining further grievous loss and damage every day while such action is persisted in.

Petitioners pray that the Railroad Companies named in the caption be cited to appear and answer this petition, according to the practice of the Commission, and that the grievances hereinbefore set forth be investigated, and on final hearing that petitioners be awarded such damages as shall be just and proper, and that such orders be made, and such proceedings be had as shall fully protect petitioners.

Heck & Petree, Coal Creek, Anderson County, Tennessee.

Webb & McClung, } Attorneys.

State of Tennessee, }
County of Knox. }

Personally appeared before me, H. H. Taylor, United States Circuit Court Clerk for the Eastern District of Tennessee, John D. Heck, who being duly sworn, deposed and said that the statements made in the foregoing petition are true, according to the best of his knowledge, information and belief.

John D. Heck.

Subscribed and sworn to before me, this the 30th day of August, 1887.
[Seal] H. H. Taylor, Clerk.

PROCEEDINGS AT RUTLAND, VT.

BOSTON & ALBANY R. R. CO.

v.

BOSTON & LOWELL R. R. CO. *et al.**

(Two Cases, Nos. 14 and 15.)

VERMONT STATE GRANGE OF PATRONS OF HUSBANDRY†

v.

BOSTON & LOWELL R. R. CO. *et al.*
(No. 68.)

THE Interstate Commerce Commission, all the members being present, commenced a duly appointed hearing, at the United States Court House, in Rutland, Vermont, on the morning of Thursday, September 1, 1887.

The proceedings were as follows:

Chairman Cooley. We have come here today to hear certain causes of complaint in this part of the country, embodied in the complaint made by the Boston & Albany R. R. Co. against the Boston & Lowell R. R. Co., and other defendants, and also in the complaint made by the State Grange of Vermont against certain railroad companies.

As our secretary is not in attendance, the Commission will appoint Edmund H. Smith, Esq., of Rochester, N. Y., acting secretary for the session.

We are now ready to proceed.

The pleadings having been read by respect-

ive counsel—at the suggestion of the chairman, the following appearances were noted:

For the Boston & Albany R. R. Co.—*Hon. Samuel Hoar.*

For the Vermont State Grange,—*Messrs. Haskins & Stoddard, and Hon. George F. Edmunds.*

For the Boston & Lowell R. R. Co.—*Messrs. Almon A. Strout and W. H. Coolidge.*

For the Central Vermont R. R. Co., and its roads in the line complained of,—*Hon. B. F. Fifield, and Mr. C. A. Prouty.*

For the Northern R. R. Co.—*Hon. W. L. Foster.*

For the Concord R. R. Co.—*Superintendent H. E. Chamberlin.*

Mr. Fifield. I desire to call the attention of the Commissioners to a single matter in the petition of the State Grange. The original petition of the Boston & Albany R. R. Co. is in respect to west bound traffic only; the Vermont State Grange come in by intervention and claim on east as well as west bound traffic; I respectfully submit they should be limited to the scope of the original petition.

Mr. Edmunds. Why can't we be heard on east bound, too?

Mr. Fifield. Because in this case you are limited by the original petition to west bound freight.

Mr. Edmunds. We do not want to be heard on that point on our side.

Chairman Cooley. We do not see any objection to hearing them on the matter of east bound freight, as well as west.

Mr. Hoar. I have been asked by Mr. Strout to state to the Commission the ground upon which we ask to have the Grand Trunk R. Co. a party to the all rail case, inasmuch as the Grand Trunk R. Co. is not a railroad over which traffic is taken from Boston to St. Albans, Vermont, which is an intermediate point between both Boston and Detroit, and Boston and Montreal in relation to which we complain. We have set out in the petition, and it is substantially admitted in the answer, that the Grand Trunk R. Co. participates in the rates which are charged for the longer haul, and, with the other railroads, makes that rate, and we supposed they were proper parties having an interest in the subject matter here, and were proper parties to be heard before this Commission, and so we joined them in our petition. If the petition is maintained and an order is made in the premises by this Commission, it will be binding upon all the parties to the record; that is the proposition.

Mr. Strout. The answer of the Grand Trunk R. Co., specifically denies that that road does participate in making the rate on freight by the National Despatch Line.

John Porteous, called by the complainants, sworn: testified as follows:

By **Mr. Hoar:**

Q. Your name is John Porteous?

A. It is.

Q. What is your position in relation to the Central Vermont Railroad Company?

A. General Manager of the through freight department.

Q. What is your position in relation to the National Despatch Line?

*See pleadings, *ante*, 400.

†See intervening complaint, *ante*, 408.

case, who receives the freight money from the consignee?

A. The agent of the steamers at the destination point.

Q. Is any part of the money received from that freight paid to the National Despatch Line?

A. Of the lake and rail money do you mean?

Q. Of the money paid to the terminal road, has it any part of that freight charge?

A. Are you speaking of all rail?

Q. Well, take the all rail?

A. There is so much paid for car service.

Q. So much paid for mileage on car service?

A. Yes sir.

Q. What else?

A. Expense of working the line.

Q. How is that based?

A. I don't know; I presume on an agreed division.

Q. On tonnage?

A. On division of the rate.

Q. My question is, How are the expenses of the National Despatch Line paid by these various roads?

A. On agreed division.

Chairman Cooley. Have not you the arrangement of the organization with you?

A. It is not in writing.

Mr. Strout. There is no written contract. **By Mr. Edmunds:**

Q. Is there no correspondence about it?

A. I have not any.

Q. Is there any?

INTER 8.

ern R. R. Co.

Q. Do you have anything to do with it yourself?

A. I am consulted about it.

Q. Who fixes the rates from Boston to Ogdensburgh?

A. Mr. Frank Owen, of the Ogdensburgh & Lake Champlain R. R. Co., and those other parties named.

Q. Not Mr. Chittenden, I suppose?

A. No sir; Mr. Frank Owen, except Mr. Chittenden.

Q. And you are consulted on the making of those rates, too?

A. Yes sir.

Q. Who is the person who represents the Central Vermont Co. in establishing the rate to Ogdensburgh?

A. Mr. Frank Owen.

Q. What is his position?

A. General freight agent.

Q. At Ogdensburgh?

A. Yes sir.

Q. He is the freight agent for the Central Vermont at Ogdensburgh?

A. Yes sir.

Q. And it is done on consultation with you?

A. Yes sir; I have been consulted, but he is the party who makes the rate. I do not take any responsibility of the rates from Boston to Ogdensburgh, or Boston to St. Albans.

Q. Who fixes the through lake and rail rate from Boston to western points?

A. Mr. Frank Owen.

Q. The through rate?

A. Yes sir.

Q. I thought you said you were the general manager of through traffic?

A. He is the representative of the Central Vermont line of steamers.

Q. When you say you are the general manager of the through traffic of the Central Vermont Railroad, do you mean of only the all rail traffic?

A. Well, and the other on consultation.

Q. And you also manage the lake and rail?

A. No sir; Frank Owen does.

Q. You do not at all?

A. No sir.

Q. Except consulting with him?

A. Yes sir.

Q. Is not the Central Vermont practically the initial road for west bound traffic out of Boston?

A. The Boston & Lowell is the initial road.

Q. I know it is in point of place; but in point of fact does not the Central Vermont assume to be the road that fixes the rates on traffic which is received at Boston bound for the West?

A. No more than the Boston & Lowell.

Q. Did you ever know the Boston & Lowell Road to be represented at any of the meetings of the trunk lines?

A. No sir.

Q. The Central Vermont is always the one, is it not?

A. The Central Vermont does not belong to the trunk lines.

Q. Is not the Central Vermont a member of the joint committee?

A. No sir.

Q. Don't you know it is, or published as being?

A. No sir; I never saw it.

Q. Did you ever know of their attending meetings of that association?

A. Yes; by invitation.

Q. Did you ever know of the Boston & Lowell R. R. Co. attending the meetings?

A. I think I have.

Q. Are you sure about that?

A. I am not certain; I think I have; Mr. Turner can tell whether he has or not; I would not swear to it.

By Mr. Edmunds:

Q. I suppose the same gentlemen whom you have named as fixing the rates for western bound freights do reciprocally for the same line of roads, for eastern bound freights?

A. Yes; the National Despatch Line does not issue east bound rates; they have not a tariff; I can explain that to you.

Q. Take the route, for instance from Detroit to Boston?

A. Yes sir; they do that; but they conform to the rates made by the east bound lines, but they are different.

Q. Do the same persons in authority arrange what price shall be charged on property going west over the same roads and lines?

A. On the west bound I arrange the rates for the lines; I do not for the lines east bound.

Q. Who does?

A. The initial road; but we conform to the rates.

Q. Then the all rail line, the initial road

from Detroit would be the Grand Trunk Railway?

A. Yes sir.

Q. The Grand Trunk Railway fixes the eastern rate from Detroit to Boston?

A. Yes sir.

Q. And you succeeding persons assent to that?

A. Yes; and issue what we call a "billing list" such as this (producing the same).

Q. It comes then, does it not, to a practical fact that all these gentlemen interested in all these lines that connect with each other, from any given point, as Detroit, finally come to an understanding as to what rates shall be charged from point to point both ways, don't they?

A. Yes.

Q. Can you give from any of your papers the eastern bound rates from Detroit to Boston, Toronto to Boston, Cleveland to Boston, by water and the Central Vermont Line, and so on and from St. Albans to Boston—everything west of New Hampshire?

A. The only tariff I have with me is the tariff from Detroit, and that is—Detroit to Boston—

1.	2.	3.	4.	5.	6.
62½	60½	44½	32½	28½	24½

Q. That is all you have with you?

A. All of those you have mentioned.

Q. You have no tariff here showing the rates from Toronto to Boston over the same line?

A. No sir.

Q. And none showing the rate?

A. Did you say Montreal?

Q. Yes; any points west.

A. Here is Montreal (producing the same).

Q. Who arranges the freight rates from Ogdensburgh to Boston?

A. Mr. Frank Owen, for the line.

Q. Who arranges the rates from St. Albans to Boston?

A. Mr. Chittenden and the members of the line.

Q. That covers all points in the State of Vermont, from Boston that the Central Vermont and its associations supply?

A. Yes sir.

Q. Have you any of those tariffs with you?

A. No sir.

Q. Can you tell, taking the all rail line to begin with, how this money is divided between the Grand Trunk Railway, and the Central Vermont and each of the other lines—state first the all rail line, Detroit to Boston, how the division is made, taking in each one of the respective lines that make it up, as you have described them before?

A. The Grand Trunk Railway gets 64 per cent.

Q. Of the total money?

A. Yes sir; from Detroit to Boston.

Q. The next is the Central Vermont. How much does that get?

A. My recollection is 58 per cent of the balance, and I do not know how the balance is divided; the 47 per cent is south of White River Junction. That is divided on mileage as I understand.

Q. That is to say—supposing there are \$100 earned on freight from Boston to Detroit on this all rail line, how much does the Grand Trunk Railway get?

A. Sixty-four dollars.

Q. How much does the Central Vermont get?

A. Fifty-three per cent of \$36.

Q. How many dollars is that?

A. Nineteen dollars and eight cents.

Q. And what is left is divided between the lower roads. That is, the Northern, Concord and the Boston & Lowell?

A. Yes sir.

Q. According to mileage?

A. So I understand.

Q. Supposing it were divided according to mileage as between the Central and the Grand Trunk Roads, how would that compare as to mileage with the share of the lower roads?

A. I should think it would compare about the same; I have not figured it.

Q. Do you know the distance by the Grand Trunk R. Co. from Detroit to wherever the Grand Trunk connects with the Central—at St. Johns, if that is the point?

A. Six hundred and eighty-eight miles.

Q. How far is it from St. Johns to White River Junction, which is the end of the Central Vermont at that point?

A. One hundred and sixty-two miles.

Q. How far is it from White River Junction to Boston?

A. One hundred and forty-four miles.

Q. How far is it from White River Junction to St. Albans?

A. One hundred and twenty-two miles.

Q. How far is Burlington from White River Junction?

A. A little more than a hundred miles.

Q. How far is it to Montreal by Portland and the Grand Trunk Railway—a good deal further, is it not?

A. No sir; not a great deal further—405 miles.

Q. It is further to Montreal, a good deal, by Portland from Boston?

A. Yes; it is further.

Q. And it is further from Boston to Montreal by the Passumpsic and the Southeastern Railway?

A. I think not. I think they are about equal distances.

Q. Is not the Central Vermont a little shorter than any other railroad line from Boston to Montreal, or Boston to St. Johns either?

A. Boston to Montreal?

Q. Or St. Johns?

A. I had an idea it was about the same by the Passumpsic.

Q. "About the same" is not what I am asking you, but whether you know?

A. I don't know; I had an idea they were the same. I never measured.

Q. Won't you tell us as to how the money is divided from Detroit to Boston by the Lakes, Ogdensburgh, and the Central Vermont, and these same lower lines, take the same \$100, to keep the equation even?

A. The steamer gets \$40—well, I don't know,—I'll take that back,—I don't know; I am not certain.

Q. What do you believe they get—you were consulted about the business?

A. I had rather have Mr. Owen testify to that.

Q. But I would rather have you; tell us what you think yourself.

INTER 8.

A. I have no positive knowledge on the subject.

Q. Have you any general business knowledge, which you have acquired by your consultations, which you have stated you had in making these rates?

A. I have the idea that we got 40 per cent, and forty cents a ton.

Q. Who got?

A. That the boats got 40 per cent, and forty cents a ton.

Q. Forty per cent of the hundred dollars?

A. Yes sir.

Q. And forty cents a ton besides?

A. Yes sir.

Q. How much would that make out of the given hundred dollars?

A. I can figure it.

Chairman Cooley.

Is that on all classes of freight?

A. Yes sir.

Mr. Hoar:

Is that for dockage?

A. Yes sir; and in addition to that there is agency expenses.

Q. The hundred dollars I am speaking about is freight money?

A. That comes out of the \$100; there is twenty cents, I think, two cents a hundred, and two cents for dockage, making four cents a hundred, to come out before prorating on the \$100; but I don't give those positively.

Q. How much of what is left of the \$100 does the Central Vermont get from Ogdensburgh to White River Junction?

A. I do not carry the figures with me, and I cannot tell; I should have to refer.

Q. Can't you state with substantial accuracy?

A. I don't think I could.

Q. Can't you get within \$50 of it out of a given hundred?

A. Yes.

Q. Try it, and do the best you can.

A. I have stated that this matter of division of rates is left entirely to, and arranged by, Mr. Frank Owen, of Ogdensburgh; and I am not very well posted on it; I have no positive knowledge of it.

Q. Would you be willing to give the knowledge you have—positive or general?

A. It might be so far out of the way.

Chairman Cooley.

I think it would be well to call it out from other witnesses who know it. If it becomes necessary, you can recall Mr. Porteous.

Q. How far is it by the steamers from Detroit to Ogdensburgh?

A. About 450 miles.

Q. How far is it from Ogdensburgh to Rouse's Point?

A. It is 142 miles from Ogdensburgh to Rouse's Point. No—that is to St. Albans. It is 118 from Ogdensburgh to Rouse's Point.

Q. That is the dividing line between New York and Vermont for railroad purposes?

A. Yes.

Q. And from Rouse's Point to St. Albans is how much?

A. Twenty-four miles.

Q. Now, tell us—if you can, a little more about the composition of what is called the National Despatch Line. Did I understand

you to say, in answer to Mr. Hoar, that there was no agreement in writing on the subject?

A. None that I have seen.

Q. Did you ever hear of any being in existence?

A. I never did.

Q. Have you ever seen or heard of any correspondence on the subject which would show anything in respect to the nature of the relations existing between these various lines making up what is called the National Despatch Line?

A. Nothing further than through rates and division lists.

Q. That exists in correspondence?

A. Yes; it is in print.

Q. Have you a print here?

A. No sir.

Q. Where is it?

A. It is at all the principal offices of the line.

Q. Is it not in your office, in your personal charge?

A. Yes.

Q. Could you furnish those papers to the Commission for the purposes of this case?

A. I believe I have already furnished the division lists to the Commission.

Q. If they are not already furnished, will you furnish them?

A. If the Commission requires them.

Chairman Cooley.

We shall require them. Have you anything to show what the arrangement between the roads is as to this Fast Freight Line, considered as a line by itself—how it is compensated for what it does?

A. Nothing further than the tariffs and division lists.

Q. Did you say that the tariff is made up without consultation between these various roads, through their authorized agents?

A. They would be if I did not know I am acting there for the through line, and know what is necessary to be done to conduct the business properly, and what they will agree to, and what they are furnished with, either before or after the rates are published.

Q. When the rates are thus published they are published by their authority, are they not?

A. They are supplied with copies of the tariff; and if they do not object, they participate.

Q. And it is your business to make up those tariffs in respect to the line you have described?

A. Yes sir.

Q. Who agrees upon the division list?

A. The members of the line.

Q. Name again the members of the line; take the water line to begin with—that is, the Central Vermont Line of steamers and the Ogdensburg & Lake Champlain R. R. Co., and the Central Vermont Railroad; that carries you from Detroit to White River Junction?

A. Yes sir.

Q. Then who makes up the rest of the line?

A. The Northern Railroad, and Concord Railroad.

Q. Who operates the Northern Railroad, and the Lowell & Nashua?

A. I am not sure about that now.

Q. Some of the managers?

A. Some time ago the Boston & Lowell, but I am not sure now—I am not certain just now.

Q. You say these division lists, which you will publish, are made up by these various corporations and concerns that make this line from Detroit to Boston?

A. You are speaking of the National Despatch?

Q. Yes.

A. Yes sir.

Q. And taking the water line, which is not the National Despatch line, is it?

A. It is not.

Q. How are those division lists made up?

A. I don't know; I have taken no part in division, or the arranging of divisions, and I don't know.

Q. Is there a division as far as you know?

A. There must be.

Q. When are those division lists agreed upon, of the National Despatch—after the money is earned, or before?

A. Before the money is earned.

Q. The rates of course, are made before the money is earned?

A. Yes sir.

Q. And the division of the income of the traffic is agreed upon before the money is earned?

A. It is.

Q. What else is there that the National Despatch Line has to do, except to do the things which you now describe?

A. Nothing else except to get the trade.

By **Mr. Fiffeld:**

Q. Are you the agent of the National Despatch Line?

A. General manager.

Q. What is this National Despatch Line?

A. A fast freight line.

Q. How many cars has it?

A. Four thousand.

Q. Who owns them principally?

A. The National Car Company.

Q. Is that a corporation?

A. I understand so.

Q. A Vermont corporation?

A. I understand so.

Q. Has any of these roads any interest in these cars, or ownership in them?

A. None that I know of. The Grand Trunk Railway has 700.

Q. So that you are the agent of the National Despatch Line of cars?

A. Yes sir.

Q. What is your business?

A. To solicit traffic.

Q. To gather it together?

A. Yes sir.

Q. And what is your motive about it in this regard?

A. Motive?—to get as much as I can.

Q. And to keep your cars running?

A. Yes sir.

Q. Who issues the bill of lading?

A. My agent.

Q. Is it done at your office?

A. Yes sir.

Q. Do you have a general office in Boston?

A. Yes sir.

Q. Is there one in Chicago?

A. Yes sir.

Q. Have you agents elsewhere in the United States?

A. Yes sir.

Q. These are the agents of the National Despatch Line?

A. Yes sir.

Q. And you say that you issue a tariff?

A. A west bound tariff.

Q. When you issue that tariff saying that you take through traffic from Boston to Chicago for 44 cents a hundred—do you do such a thing?

A. Sixty-five.

Q. When it gets at the end of the destination that money is collected?

A. It is, I suppose.

Q. And divided?

A. It is.

Q. Between this line of cars and the roads?

A. Yes sir.

Q. What part is taken out for the cars?

A. The car service.

Q. What is that?

A. Three quarters of one cent per mile.

Q. And is something taken out for the roads?

A. Yes sir.

By the **Chairman**:

Q. Something taken out for your services first, is there not?

A. Well, I am paid; I don't know how.

Q. What is taken out before the division is made for the roads?

A. There is the car service.

Q. What else?

A. The salaries and expenses of the line are made up by monthly vouchers; it is practically taken out of the earnings; but it is done by monthly voucher, not by the billing.

Q. That is taken out of the gross earnings, is it?

A. Yes.

Q. Is the car service taken out of the gross earnings?

A. Yes sir; out of the gross earnings.

Mr. **Fifield**, resuming:

Q. You say you issue a bill of lading for the National Despatch Line; see if that is the bill of lading?

A. Yes sir.

(Offered in evidence, and filed with the clerk).

Q. Is that the west bound tariff? (handing same to witness.)

A. (Examining same.) Yes sir.

(Offered in evidence and filed with the clerk).

By **Chairman Cooley**:

Q. You say you make up these tariffs?

A. I do.

Q. What do you make it up from? Do you make it up on your own judgment? How do you arrive at the figures?

A. We sometimes discuss the matter before they are made up, sometimes not.

Q. I speak now of the tariffs you make up as the general manager of the National Despatch Line: Do you make those up on your own judgment exclusively?

A. There are guides; the general executive committee, of New York, issue a tariff for the other line; and after that is issued, I make up a tariff for the National Despatch Line.

Q. In other words, you have the tariff of those lines or roads before you, and your tariff is made up from that?

INTER 8.

A. Yes.

Q. It must conform to that?

A. It must not, but it does.

Q. You would not be at liberty to issue a tariff that would make the rates lower than are made by the railroads?

A. I do.

Q. Upon the same class of goods that they carry?

A. Yes sir.

Q. Do you carry all kinds by the National Despatch Line that are taken by the railroads?

A. I do.

Q. All kinds?

A. Yes sir.

Q. And you make rates independent of them?

A. Yes sir.

Q. And sometimes lower than they make?

A. Always lower.

Q. And they accept them?

A. They accept them; I am speaking of west bound traffic.

Mr. **Fifield**, resuming:

Q. Tell the way you do it?

A. By arrangement.

Q. Go into the details and give the Commissioners all the facts about it?

A. We have had such an arrangement for twenty to twenty-five years, to make differential rates with the Boston & Albany, Fitchburg, New York Central, N. Y. & Erie, & Pennsylvania Central; Baltimore & Ohio, and latterly with the West Shore R. R. and with the Delaware, Lackawanna & Western R. R.

Q. Are those called the trunk lines, the Pennsylvania Central, etc? Name them.

A. N. Y. Central. N. Y. & Erie, Pennsylvania Central—

Chairman Cooley. We understand what the trunk lines are.

Q. Have they been accustomed to make rates for west bound traffic by convention of their agents for twenty-five years past?

A. I should say so.

Q. In that connection state if this line through here where the National Despatch cars run—do they claim to make a rate much less than the rates fixed by the trunk lines?

A. They have.

Q. What was that differential?

A. 10. 9. 8. 6. 5. and 4. Those were the original differentials, they have been modified since.

Q. To what extent?

A. 10. 8. 6. 4. to points beyond Detroit and Toledo, and 8. 6. 4. 3. to Detroit and Toledo.

Mr. **Edmunds**. Less or more?

A. Less; lower rates.

Chairman Cooley. Rates on the National Despatch Line are lower than on the lower roads?

A. Yes; lower than the trunk lines.

Q. And these trunk lines in convention fix the rates for west bound traffic?

A. Yes sir.

Q. Then what do you do?

A. I issue my tariffs less the differentials, that is the way.

Q. These differentials are things assented to by these petitioners, as well as the trunk lines?

A. Yes sir.

Q. Why has this been assented to?

A. Because of the long line; it is a much longer line than the Boston & Albany R. R.

Q. If the shipper in Boston had to pay the advertised rates the same as those of the Boston & Albany, which way would the traffic go?

A. By the Boston & Albany.

Q. You would get nothing?

A. No sir.

Q. That is one reason—the traffic would all go away from your road?

A. Yes; by the shorter line.

Q. Any other reasons?

A. Yes; during the winter season it has a worse climate to go through.

Q. Further north?

A. Yes sir.

Q. More expensive in the operating expenses?

A. Yes sir.

Q. On the other hand, what is the distance by all rail to the lake at Ogdensburgh; take our line from Boston to Ogdensburgh—what is our rail length?

A. Four hundred and five miles.

Q. What is the distance from Boston to Buffalo by the Boston & Albany, their rail line to Buffalo?

A. Five hundred and five miles.

Q. So that we have the longest run from Boston to Chicago, but we have the shortest line by rail via Ogdensburgh?

A. We have.

Q. How much difference?

A. One hundred miles.

Q. Is that a computation of distances on these lines out of Boston for Chicago (handing a paper to witness)?

A. Yes; but the president corrects me; that is 418; it should be 405; these tables of distances were made up in my office.

Q. Is this computation correct?

A. It is so far as I know.

(Offered in evidence and filed with the secretary).

By **Mr. Hoar**:

Q. What source is it made up from?

A. From the time table.

Q. From this book, The Official Gazette?

A. Yes sir.

By **Chairman Cooley**:

Q. When I asked you if you made up these tariffs independent of the railroads, you replied that you did; and that you made the tariff lower than the tariffs of the railroads—Do you mean the tariffs over the very roads over which your line operates? My question was whether you made up this tariff independent of the roads over which your line operates?

A. No sir; by consultation.

Q. When you sit down to make up this tariff, do you have before you the tariffs of the roads over which your line operates, and must your tariff conform thereto?

A. No sir; I never looked at it.

Q. Do you mean to be understood that if a man along the line of one of these roads offers to you freight, that you may receive that freight, and carry it, and charge less for it than he would be charged if instead of offering it to you he offered it to the regular agent of the road for the same distance?

A. I will explain it in this way: If a shipper was to take traffic to the Boston & Lowell R. R. to go to a point west of St. Johns, or in Canada, west of St. Johns, the agent of the

Boston & Lowell Road would refer him to me for his bill of lading.

Q. Would he have no rates to the same points?

A. Yes sir.

Q. He would have the rates to bill by?

A. Over his own road. Yes sir.

Q. Are those the same rates you would give him if he came to you?

A. He would not give him rates.

Q. He advertises rates, does he not?

A. I advertise the rates.

Q. I want to get at whether there are two sets of rates advertised; one by the railroad and one by you, the rates not agreeing?

A. I will explain that by saying that the Boston & Lowell R. R. Co. advertise the rates from Boston to White River Junction, or I suppose they do; they may, I never saw one; They issue a tariff for White River Junction, but for traffic passing from Boston to St. Johns, or points west. The National Despatch Line issues the tariff, and if the shipper went to the Boston & Lowell R. R. for a bill of lading, he would be referred to my office in the city; and in making up the National Despatch tariff I never inquire what is the tariff from Boston to White River Junction, or Boston to St. Albans, or Boston to any other point.

Q. Take it from Boston to Detroit—you make a tariff on freights from Boston to Detroit over certain railroads that you have specified; do I understand you that those roads do not in their tariffs give rates to Detroit from Boston?

A. I so understand it. I have never seen any.

Q. And the only rates given at all over those roads are over this National Despatch Line?

A. Yes sir; I have seen no other tariff.

Q. How it for the return freight? Do I understand that you have no tariffs for that?

A. No sir; I haven't.

Q. But you receive freight from Detroit?

A. Yes sir.

Q. And from other western points for Boston over these roads?

A. Yes sir.

Q. What is the guide there?

A. The Grand Trunk Railway tariff.

Q. They do make a tariff the other way, but not west?

A. Yes sir.

Mr. Fifield, resuming:

Q. You say this differential practice has been in force how long?

A. Twenty-five years.

Q. Has the Boston & Albany made any objections to it?

A. My own impression is that they agreed to it; and that they agreed to it this last March, to the differentials in force in that tariff.

Q. Then just tell the Commission what was done last March.

A. There was a meeting of the General Executive Committee of the trunk lines at New York; I was present at it.

Q. You say these agents of the trunk lines got together last March and made a rate for west bound traffic?

A. Yes; from Boston to Detroit, and New York to Detroit.

Q. And you issued a tariff with the differential rate?

A. Yes sir.

Q. In respect to east bound traffic, do you adhere to the rates of the other lines?

A. Yes sir.

Q. What did you do at that meeting?

A. I attended by invitation; I am not a member of the line; we do not belong to the Executive Committee, but by invitation I attended the meeting.

Commissioner Schoomaker. Did you take part in the proceedings?

A. I think I did.

Commissioner Walker. Was this line a member of the Trunk Line Association prior to April last?

A. No sir; it was a good many years ago.

Q. Down to what time?

A. I can't say.

By **Commissioner Schoonmaker:**

Q. Did you take any part in the action of that meeting?

A. I was there. Yes, I took part because we had a discussion and we did not agree.

Q. You say you attended that meeting. What were you there for?

A. By invitation.

Q. What was going on? What was the object of the meeting?

A. The meeting was for the trunk lines to agree on rates, and I wanted to find out what they agreed to.

By **Mr. Fifield:**

Q. What for?

A. So as to know how to make up my own tariff.

Q. Did the Boston & Lowell participate in that meeting?

A. I am not certain.

Q. Did the Concord R. R.?

A. No sir.

Q. Did the Northern?

A. No sir.

Q. Did the Central Vermont?

A. Mr. Turner acts for the Northern R. R. If he was there he did not take any very active part in it. He may have been there; I don't know.

By **Mr. Edmunds:**

Q. Who did you act for?

A. I acted for the Central Vermont R. R.

Q. Anybody else?

A. No sir.

Mr. Strout. I would like to have it appear that neither the Boston & Lowell, Northern, Concord, or Central Vermont were members of the trunk line or had anything to do with it?

A. No sir.

By **Mr. Fifield:**

Q. Was the Central Vermont represented there as one of the Commission?

A. No sir.

Q. Who did you represent there?

A. Myself.

Q. And the National Despatch Line, of course?

A. No sir; I don't know as I did. I was there by invitation and I went, and I was asked certain questions, and I answered them. I wanted to get information to make up my tariffs for the National Despatch Line according to the old arrangement in force for the last twenty-five years.

Chairman Cooley:

Q. Will you state in what position held by

INTER S.

you were you invited there; you were not invited as an individual?

A. No sir; I represent the National Despatch Line.

Q. Was it because of your representing that line, or as manager of the Central Vermont?

A. It might be either or both.

By **Mr. Edmunds:**

Q. Were you invited by letter?

A. Yes sir.

Q. How was it addressed to you?

A. I don't know; very likely to John Porteous, Boston.

Q. Were you the agent of the Central Vermont at that time?

A. I was general manager of the through freight department.

Q. And General Manager of the National Despatch Line?

A. Yes.

By **Mr. Fifield:**

Q. Who makes this tariff between Boston & St. Albans?

A. Mr. Chittenden.

Q. In connection with whom, if anybody?

A. The roads between St. Albans and Boston.

Q. Do you taken any traffic between St. Albans and Boston by the National Despatch Line?

A. We do not.

Q. From New England to points west of St. Johns, do you take it?

A. Yes sir.

Q. Are your cars used exclusively for that class of traffic?

A. I believe they are used occasionally, when they are short of cars, used for anything. They belong to the National Car Company, mainly; and they take a car when they can get it for any purpose.

Q. You have said that these roads make up a tariff between Boston and St. Albans. What is that paper now handed to you?

A. Central Vermont tariff, No. 18, between Boston and St. Albans.

Q. And the roads between those points make that?

A. Yes sir.

Q. Does the National Despatch have anything to do with making that tariff?

A. No sir.

Q. Are they consulted about it?

A. No sir.

Q. Are you consulted about it, except by invitation?

A. This tariff is made up by Mr. Chittenden for the Central Vermont R. R. And in consultation with the general freight agents of the other roads south of St. Albans.

Q. Is all of the traffic between those points done independently of the National Despatch Line?

A. Yes sir.

(Tariff last above referred to put in evidence, and filed with the clerk.)

Mr. Fifield. I desire to call attention to the fact that since the filing of the petition of the Boston & Albany R. R. Co. this rate from Boston to St. Albans has been reduced. It used to be 60 cents first class from Boston to St. Albans. On the 6th of July it was reduced to 55 and 48 cents. That was before the petition of the State Grange was filed.

Q. Please state what that is (handing a paper to the witness).

A. Shipping papers, Boston & Lowell R. R. Corporation. It is the receipt and bill of lading. (Offered in evidence and handed to the clerk.)

Q. Is that the thing that it is customary for the Boston & Lowell to issue for freight between Boston and St. Albans?

A. Yes sir.

Q. Look at that paper (handing it to witness), and say what that is.

A. Bill of lading, Central Vermont R. R. Line.

Q. Is that the bill of lading for points between Boston and St. Albans?

A. I do not know sir; I never saw this before. It looks like it, like a bill of lading.

Q. Will you see if that is the tariff made by the Central Vermont line of steamers? (Handing it to witness.)

A. That is the tariff made by the Central Vermont Line of steamers.

Q. What traffic do they take, and from where to where?

A. From Boston to points taking Boston rates, to Cleveland, Detroit, Port Huron, Milwaukee, and Chicago.

Q. Who makes the tariff between Boston and Ogdensburgh?

A. Mr. Frank Owen, in consultation with the members of the line from Boston to Ogdensburgh.

Q. Under that bill of lading, is property taken from Boston to Ogdensburgh?

A. Yes sir.

Q. Who issues the tariff for business, originating in New England destined for points west of Ogdensburgh and to points on the lake?

A. Mr. Frank Owen, of Ogdensburgh, general freight agent, and agent of the Central Vermont line of steamers.

Q. Is there a difference between the Central Vermont Railroad and the Central Vermont line of steamers?

A. Yes sir.

Q. They issue that tariff in respect to rates beyond Ogdensburgh?

A. Yes sir.

Q. Do they make any tariff beyond Ogdensburgh, from Boston?

A. No sir.

Q. What is that I hand you?

A. Central Vermont freight tariff, Ogdensburgh & Lake Champlain division for rates of freight from Boston, and stations on the Boston & Lowell Railroad.

Q. That is the tariff we have been talking about between Boston and Ogdensburgh?

A. Yes sir.

Q. And this I now show you is the bill of lading of the Central Vermont line of steamers?

A. Yes sir.

Q. You have stated that your business is to collect together the traffic?

A. Yes sir.

Q. And your object, as agent of the National Despatch Line is to keep your cars running?

A. Yes sir.

Q. And the object of the roads is to have traffic taken over the roads?

A. Yes sir.

Q. When it gets to the destination of the car,

and the freight is paid, it is divided on a proportion agreed upon between yourselves?

A. It is divided.

Q. In that division, is the Grand Trunk mileage put in at less than it really is?

A. Yes sir.

Mr. Edmunds. How much less?

A. It is the difference between the distance from Boston to Ogdensburgh, and the distance from Boston to Prescott via St. Johns. My impression is it is thirty-five to forty miles.

Mr. Edmunds. That is, the mileage of the Grand Trunk Railway is called thirty-five to forty miles less than it really is?

A. Yes sir.

Mr. Fifeled, resuming:

Q. What is the terminus in the east on this line complained of?

A. The Boston & Lowell Railroad.

Q. Is that a Massachusetts corporation?

A. Yes sir.

Q. What is the length of the road?

A. About twenty-six miles.

Q. What is the distance to White River Junction?

A. One hundred and forty-four miles.

Q. What is the length of the road next in succession?

A. Fourteen miles.

Q. Is the Boston & Lowell Corporation managed by its own board of directors?

A. I so understand it.

Q. And the next road in the succession is the Concord Railroad?

A. Yes sir.

Q. A New Hampshire corporation?

A. Yes sir.

Q. Where does that run from?

A. Nashua to Concord.

Q. What is the length of it?

A. Thirty-seven miles.

Q. What is the next road in that line?

A. The Northern Railroad.

Q. Where does that run from and to?

A. Concord to White River Junction; that is just at the line of the State.

Q. Is that a New Hampshire corporation?

A. Yes sir.

Q. Is it under a lease to the Boston & Lowell?

A. Yes sir.

Q. What is the next in succession?

A. The Central Vermont commencing at the State Line, White River Junction, and running to St. Johns, or rather to St. Albans.

Q. From St. Albans is there a branch to the right?

A. Yes.

Q. Up to Highgate, or the Canada line?

A. Yes sir.

Q. What is the length of that?

A. About thirteen miles.

Q. What is the next road in the succession from the Canada line?

A. On the other side of the Canada line? On this side of the Canada line—The Montreal & Vermont Junction Railroad.

Q. Is that in the United States, or in Canada?

A. I don't know. From Highgate to St. Johns is in United States territory, I think.

Q. They connect with the Montreal & Vermont Junction Railroad?

A. Yes sir; from St. Armand, in Canada, to St. Johns in Canada.

Q. Where does our road run, branching to the left?

A. From Rouse's Point to Ogdensburgh.

Q. To the line of the State between New York and Vermont?

A. Yes sir.

Q. What is the length of that line?

A. About eighteen miles.

Q. What is the length of the Central Vermont proper, independent of its leased lines?

A. One hundred and sixty six-miles.

Q. Does that connect with the Ogdensburgh & Lake Champlain Railroad at the State line?

A. Yes sir.

Q. That is under a lease to the Central Vermont?

A. Yes sir.

Q. And then there is a line of steamers through the lakes to Chicago?

A. Yes sir.

Q. Controlled by the Ogdensburgh Railroad and the Central Vermont?

A. Yes sir.

Q. Aside from that, is there any common control over the roads or any management that you know of, to Boston?

A. No sir.

Q. Is there any arrangement for a continuous shipment except what the joint tariff makes?

A. None that I know of.

Q. To repeat, then, now that we have our roads marked out—the joint tariff west of St. Albans, for traffic going west of there, is made by the National Despatch Line; and the tariff from, or between Boston and St. Albans, and intermediate points, is made by the roads between those points?

A. They are.

Q. And so on, on the other line, the rates between Ogdensburgh and Boston are made by the roads between those points, and to Chicago by the lakes is made by the Central Vermont line of steamers?

A. Yes sir.

Q. Take these maps, and explain them to the Commissioners, pointing out the lines of road that compete for west bound traffic from Boston?

(The witness then took the map and pointed out the various lines, saying:)

There is the Canadian Pacific Railway, from Boston over the southeastern division to Montreal; that goes out of Boston over the Boston & Lowell R. R. out of Boston; and here, from Boston to Portland and over the Grand Trunk Railway to Montreal.

Mr. Hoar. How does that go out of Boston?

A. Over the Boston & Maine R. R. and by steamer.

By Mr. Fildes:

Q. There then are the foreign railroads competing for Boston west bound traffic. What about the water routes?

A. There is a line of steamers running from Boston to St. Johns, and Boston to Halifax, and then over the Inter-Colonial R. R. to Canadian points and to Montreal.

Commissioner Schoonmaker. Is that a competing line?

A. It is a possible competitor.

Q. What other water ways are there?

IN THE S.

A. There is from Boston to Montreal by water direct.

Q. I am speaking of west bound, the Erie Canal, for instance?

A. Then there is Boston to New York and up to Montreal by canal, and by rail, by the Delaware & Hudson Canal Co.

Q. That is for Montreal?

A. Yes sir.

Q. What other water line is there from Boston to Chicago?

A. There is from Boston around the St. Lawrence and by the Erie Canal to lake ports.

Q. Are those maps correctly made up as you suppose?

A. Yes (The maps were then put into the case and filed with the clerk.)

Q. Is there a water line from Boston to Chicago which touches along at points on the great Lakes?

A. There is the Erie Canal.

Commissioner Schoonmaker. Do you mean an actually competing line, or a possibly competing line?

A. It is possible, and I am not sure but they are actual. I know their rates from New York are thirty-five to fifteen cents; and they take lower rates than that; I understand they take it from thirty to fifteen cents per 100 pounds from New York City.

Commissioner Walker. Is there any through rate from Boston to the West by the Erie Canal?

A. I don't know that there is.

Commissioner Schoonmaker. Is there any joint tariff made from New York to Chicago by that way?

A. Yes sir; but if you are speaking of any joint tariff from Boston by way of New York and Buffalo, I have not seen that.

By Mr. Fildes:

Q. Do the New England manufacturing companies have their agents in New York to sell goods delivered in New York at the New England prices?

A. They do.

Q. What is the effect on your line?

A. The effect is that they are very strong competitors for the business.

Q. Have you lost any business in consequence of that?

A. We have lost considerable business.

(Recess until 2 o'clock.)

Afternoon Session, Sept. 1.

Examination of Mr. Porteous, resumed.

By Mr. Fildes:

Q. State what lines there are from Boston to Montreal that are competitive with the Central Vermont Line?

A. The Portland Steam Packet Company, and the Grand Trunk via Portland; the South Eastern Division via Concord; the International Steam Packet Company via St. Johns, and the Canadian Pacific from there. The Halifax Steam Packet Co. via Halifax, and the Inter-Colonial from there to Montreal.

Q. How about Lake Champlain via New York?

A. That is New York competition, as against Boston; the rates from New York are on the forty-five cent basis, the same as they are from Boston; the Montreal merchant does not require to go to Boston to buy his goods; he goes where

he can buy the cheapest; if the value of the goods are the same in Boston as in New York, he will prefer Boston, if the rate of freight is the same. There is the canal. The rate on freight from New York to Montreal is very low; much lower than from Boston to Montreal.

Q. And that gets up competition and it is lost to your line?

A. Yes sir.

Q. Is there a large amount of western traffic over the Grand Trunk Railway?

A. Yes sir.

Q. Whether there was a large amount of western traffic forwarded east over the Grand Trunk Railway, and the Central Vermont, destined for transportation abroad?

A. A very large quantity.

Q. What has happened to that since the passage of this Act?

A. It has principally gone to Montreal.

Q. And is exported from there?

A. Yes; from Montreal.

Q. Down the St. Lawrence River?

A. Yes sir.

Q. Have you attempted to make a revision of your tariff rate since the passage of this Act?

A. We have; but we found that we lost Montreal when we came to look at that; for if we made the rates higher from New York to Montreal than the rates to St. Albans, we would not get the business. We have endeavored to conform to the Interstate Commerce Law as far as we knew. I would like to say to the Commission that with regard to the lake and rail business the rates of insurance are much lower from Buffalo than they are from Ogdensburg, so much so that it requires a lower rate of freight from Ogdensburg than it does from Buffalo, and that enters into the cost of running goods to Cleveland and other western lake ports.

By **Chairman Cooley**:

Q. You have spoken of the export trade falling off largely since the passage of this Act. Is that the cause of the decrease?

A. The Interstate Commerce Law?

Q. Yes. What is the connection between the falling off of the trade and the Law?

A. The rates are lower to Montreal than they are to Boston.

Q. But what is the connection between the decrease in the trade and the Law?

A. I cannot state any more than that the rates are lower.

Q. Is the state of things that exists now different from what it was formerly in that regard?

A. Not that I know.

Q. Then how do you explain it? What is the connection between the Law and the falling off?

A. The result is that we lost the business.

Q. But you spoke of the passage of the Law having some connection with it; explain that.

A. The question, as I understood it, was whether we had lost the business since the passage of the Interstate Commerce Law.

Q. You do not point out any connection between the two events, do you? (Not answered).

Commissioner Morrison. How did the Interstate Commerce Law make the loss of business that you did lose?

A. Before the Interstate Commerce Law we

competed for it. We quoted the same rates via Boston as they did via Montreal. We cannot do it now.

Chairman Cooley. I do not see that you explain it, now.

Witness. Previous to the Interstate Commerce Law, we quoted such rates as we thought proper. We don't, now; we have now to publish a tariff; that is to say, our connections west are to publish a tariff to Boston, and adhere to it. They have to establish a tariff. We did not have to publish any tariff and adhere to it previous to the passage of the Interstate Law.

Q. Before the passage of the Law then, you could adhere to your rates or not, as you pleased?

A. Yes sir.

Q. Now, you speak of competition at St. Albans, in the business from Boston and New York; what did you say about that?

A. In connection with Montreal it was: I said that the rates from Boston to Montreal could not be higher than the rates from New York to Montreal. For instance, take the Delaware & Hudson R. R. Co., they made rates from New York on a forty-five cent basis to Montreal. It was impracticable for the line from Boston to Montreal to make a higher rate because the Montreal merchant would go to New York to purchase goods instead of coming to Boston, unless he bought his goods cheaper in Boston than he did in New York.

Q. Is there any fast freight line operating from New York by way of St. Albans?

A. Yes sir; the National Despatch.

Q. Your own line?

A. Yes sir.

Q. Is it this same organization from New York, by way of St. Albans, but over different lines?

A. Yes sir.

Q. It is this same organization?

A. Yes. I am the general manager. It goes from New London, instead of from Boston.

Q. Does not your Company fix the rates by both those routes?

A. I do.

By **Mr. Edmunds**:

Q. The Central Vermont controls the New London route, does it not?

A. Yes; but not the Connecticut River, which is part of that line.

Q. Your line operates to New York City?

A. Yes that way; and from New York City.

Q. By way of St. Albans?

A. Yes sir.

Commissioner Schoonmaker.

Q. That is by the way of New London?

A. Yes; by water from New York.

Q. Have they any all rail track from New York City?

A. No sir.

Q. It is by water to New London, and thence by rail?

A. Yes.

Commissioner Walker. There is a rail route direct from New York to Montreal by way of the D. & H. C. Co., but that you have nothing to do with?

A. No sir. There is a joint line of the D. & H. C. Co. through the State of New York not subject to the Interstate Commerce Law, from New York to Rouse's Point, over the New York Central, or West Shore, and over the

Delaware & Hudson Canal Company. That goes into Montreal from Rouse's Point by the Grand Trunk Railway. They make a rate from New York to Montreal and publish a tariff. They make a rate on the forty-five cent basis, so that our route from Boston to Montreal has to be on the same basis in order to compete.

Commissioner Schoonmaker.

Q. Does the Delaware & Hudson Canal Company run cars over the New York Central R. R. from New York to Albany?

A. Yes sir; it is a joint line; they form a line to Rouse's Point, and thence to Montreal and other points in Canada, and their rates to Montreal are on the forty-five cent basis, the same as ours from Boston to Montreal.

By **Mr. Strout:**

Q. I confine your attention, Mr. Porteous, to the routes that are complained of in this petition. If I understood you the rates complained of were fixed in this way: The trunk lines met March 5, before this Act became operative, in New York, and there they discussed through rates, and agreed upon them; you were there by invitation, you heard the discussion, you knew what rate they substantially agreed upon there, and you fixed for the National Despatch Line a rate the same as that rate, less the differentials as stated by you?

A. Yes sir.

Q. That is all there was to it?

A. Yes sir.

Q. Now I want to get at the connection of the Boston & Lowell—. Does the Boston & Lowell own any stock, or is it connected in any way with the National Car Company that you know of?

A. No sir.

Q. Has it any control or management of the National Despatch Line, or its officers that you know of, as a corporation?

A. Not much!

Q. Does it appoint you as the agent? Can you say to this Commission that you are appointed by the Boston & Lowell as the agent of the National Despatch Line?

A. They were not consulted so far as I know.

Q. Do they pay your salary, as a corporation?

A. I think not.

Q. Was the Boston & Lowell present at that meeting on the 5th of March?

A. I think not.

Q. Is the Boston & Lowell a member of that trunk line organization?

A. No sir. I never knew it to be.

Q. Or had they any representative upon the general committee to establish these rates which you say form the measure from which you established the rates by the National Despatch Line?

A. They were not represented.

Q. You came back and established your tariffs, did you?

A. Yes sir.

Q. Do you issue your through bill of lading?

A. Yes sir.

Q. Were those rates shown to the Boston & Lowell; or were they consulted before you established your rates, and issued your bills of lading?

A. I have no recollection of it.

INTER S.

Q. Is not this the only connection that the Boston & Lowell had with it? You having established your tariffs in the manner you have stated, the Boston & Lowell carry the cars of the National Despatch Line Company over their road, and accept in division a certain portion of the through rate?

A. That is all.

Q. And that is all they had to do with it in any way, shape, or manner?

A. That is all.

Q. I understood you to say to the Commission that there was no written arrangement or agreement?

A. Not that I know of.

Q. And the Boston & Lowell was not a party to any written agreement or arrangement to your knowledge, was it sir?

A. Not to my knowledge.

Q. When the rates are changed do the Boston & Lowell R. R. control such change in any way that you know of?

A. I have never consulted them.

Q. They run to White River Junction. Is it within your knowledge that the rates charged by the Boston & Lowell R. R. to White River Junction and intermediate points are less than the rates charged to St. Albans, and points beyond St. Albans to the west?

A. I have been so informed.

Q. Is it within your knowledge that after the passage of the Interstate Commerce Act, the Boston & Lowell R. R. made their rates conform in every particular to that law?

A. I have been so informed.

Q. Is it not true that this Portland Steam Packet Company, having a line of ocean steamers from Boston to Portland, from that point forward freight over the Grand Trunk Railway Co. to Montreal, Detroit, and other points west, and is it not true that they adopt the rates charged by the National Despatch Company?

A. They do.

Q. And do they compete with the National Despatch Line Company?

A. They do.

Q. And do not they compete with the National Despatch Line for freight at those identical rates?

A. They are prepared to compete.

Q. They do compete, do they not?

A. Yes sir; all the freight that is offered them they take at National Despatch rates.

Q. I have confined myself to the Boston & Lowell. Is not this same statement of fact true in relation to the Concord R. R., one of the parties defendant here; that is, as to any participation in making the rates?

A. The Boston & Lowell R. R. and the Concord R. R. are the same.

Q. Is it not true as to the Northern?

A. I so understand. I have never consulted them.

Q. Is it not true that the Northern R. R. has been under a formal lease to the Boston & Lowell, and is operated by it as a matter of fact?

Mr. Hoar. We do not deny that.

A. So far as the tariff of rates are concerned, they have never been consulted about making the rates of the National Despatch tariff, by me.

Q. And as a corporation, has the Grand Trunk Railway been consulted as to the rates, by you?

A. I have no recollection of any conversation with any of the officers about it; I understood the basis upon which the tariff was to be made up, and made up the tariffs and supplied them with copies.

Q. Do I understand you to testify to the Commission that those rates that were established on the 5th of March, and the differentials, that they were agreed to by the Boston & Albany R. R., the petitioner in this case?

A. I so understand it; on that day, and before, for many years before.

Q. I am dealing with this case before the Commission, as charged in this petition?

A. I so understood it at that meeting held at New York, that the Chesapeake & Ohio R. R. Co., the line passing over there, and the line known as the National Despatch Line were at that meeting allowed certain differentials on which the tariff of through rate by the National Despatch Line was made up, and that the Boston & Albany R. R. was there represented.

Chairman Cooley. I should like to know about the organization, etc., of this National Despatch Line.

Mr. Strout. We claim that there is no organization, but that the whole matter consists in simply what the witness has stated.

Chairman Cooley. Let me ask a few questions of the witness.

By the **Chairman:**

Q. Will you tell us what you understand the organization of this fast freight line is? How is it formed? What is the organization of the line? How is it made up? How did you get your authority in the matter?

A. I was appointed for the National Despatch Line by Governor Smith.

Q. Who is the National Despatch Line?

A. It is a fast freight line.

Q. Who composes it, and how do they become members of it?

A. There is no organization, it is a trade mark.

Q. Trade mark! There must be some persons to it; a trade mark does not do all this business?

A. It is all done through me.

Q. How did you come to stand for a trade mark?

A. I communicate with the parties in interest.

Q. How do you come to be in a position where you do communicate, and represent the National Despatch Line?

A. Before I became manager of the fast freight line—

Q. How did you become manager?

A. I was appointed by Governor Smith.

Q. Did he create this despatch line?

A. He created my appointment.

Q. He gave you the appointment?

A. Yes sir.

Q. In giving you the appointment, what or whom did he represent?

A. I never asked him.

Q. Did you go and take possession of a great number of cars without ascertaining whether the person telling you, had authority? Don't you understand that there is some def-

inite authority back of you that has the right to put you in this position?

A. Governor Smith has. He has the right.

Q. What was his authority?

A. The National Car Company authorized him.

Q. Do the National Car Company own all these cars?

A. They own a large number.

Q. Who represents the others?

A. The Grand Trunk Railway Company have 700 cars.

Q. Does any other railroad company have any?

A. Yes sir.

Q. In giving you authority did these roads have any voice in the matter, the other owners of cars, besides the car company?

A. They ought to have, but I have not consulted them.

Q. You don't know whether they were consulted in regard to your appointment?

A. I understood that they were.

Q. That is, that all these owners of these cars concurred in your being selected for this place?

A. Yes sir.

Q. So that you act for them all?

A. Yes sir.

Q. How long have you been the general manager of this line?

A. Eight months.

By **Mr. Strout:**

Q. As I understand, the National Car Company is a distinct corporation?

A. Yes sir.

Q. And that is the owner of these cars?

A. Yes sir.

Q. Will you state who owns the cars operated by the National Despatch Line?

A. The National Car Company, and the Grand Trunk Railway Company most of them.

Q. Who owns the balance?

A. The Chicago, Pekin & South Western Railroad own fifty.

Q. Neither the Boston & Lowell, nor any of these defendants own any, do they?

A. None.

Q. Not at all?

A. No sir.

Q. Now, is it not true that that National Car Company desire to have occupation for their cars?

A. Certainly.

Q. And is it not further true that the stockholders, whoever they are—do you know who they are?

A. I know but very few of them.

Q. But they run their cars under the name of the National Despatch Line, do they not?

A. Yes sir.

Q. And you are appointed by Governor Smith as the agent of that line?

A. Yes sir; and I get the traffic for them.

Q. You get the traffic that pays the compensation for the use of the cars?

A. Yes; that is how they live.

Q. Is Governor Smith a large stock holder in the car company?

A. I don't know whether he owns a dollar.

Q. That is an independent organization, and if it is a carrier, it is a different carrier from any named in this petition?

A. Yes sir.

Q. And the Boston & Lowell issue this forwarding receipt which is in evidence?

A. Yes sir.

Q. And this forwarding receipt states upon the receipt that it forwards it and delivers it to the next carrier, and that its liability ceases, and that they become a delivering agent, do they not?

A. Yes sir.

Q. And do they occupy any other position?

A. No sir.

By **Mr. Hoar**:

You say that you make the rates for the carriage of freight to the west over the Boston & Lowell R. R.

A. Yes.

Q. And you do that, as I understand without any consultation with any of their officers?

A. I do.

Q. From whence do you derive your authority to charge tolls over that road, or charge rates for the carriage of freight over that road?

A. From the National Despatch Line.

Q. Of which they are a part?

A. I cannot say that; the goods are delivered at the Boston & Lowell depot; that is all I can say.

Q. Suppose the Boston & Lowell R. R. objected to the rates you made, what should you do?

A. I don't know; that is a conundrum I can't answer; I know what I would do, but I don't want to say it before the Boston & Albany people.

Q. What is that?

A. Find some one else.

Q. Is it not therefore a fact that you stand in such relation to the Fitchburg R. R. and the Boston & Lowell R. R. that you, in effect, dictate what rates they shall take?

A. I never undertake to dictate.

Q. Well, settle the rates?

A. I arrange the rates, I make the rates, and they have been always carried out.

Q. But you do not consult with either of those terminal roads?

A. No sir.

By **Commissioner Walkers**:

Q. This bill of lading issued by the Boston & Lowell that has been put in evidence is that used upon freight received by the N. D. Line at all?

A. Yes. (Taking the bill of lading, and indicating) This upper part, here, down to the word "shipper" is left with the Boston & Lowell road by the shipper for way billing purposes; this lower part is handed to the shipper and signed by the agent and that is taken to the National Despatch Office, in the City of Boston, or elsewhere, and they get a National Despatch bill of lading; this document will carry the freight to White River Junction, there to be handed over to the Central Vermont R. R. and the shipper won't be satisfied when the freight has to go to Montreal, say; so he comes to our office and hands us this document and we give him a National Despatch bill of lading to satisfy him.

Q. What is the course of business upon freight that you solicit that comes to your office first?

A. It is the same; we solicit it, and go and

tell them to deliver it at the Boston & Lowell R. R. freight depot; he does so and gets this receipt and comes with it to our office and gets his bill of lading; they do not solicit business, that is, the Boston & Lowell do not solicit business.

By **Mr. Hoar**:

Q. It is the employees of the Boston & Lowell R. R. that attend to the way billing of the freight over their road?

A. Yes.

Q. None of your employees are concerned in handling the freight?

A. No sir.

Q. The employees of the National Despatch Line are solicitors for the freight?

A. Yes sir.

Q. But do nothing about handling it upon the railroads?

A. No sir.

Q. And the way bill is issued by the Boston & Lowell Railroad?

A. That way bill is made by them.

Q. Is that the way bill (indicating)?

A. No sir; it is a way bill that accompanies the freight; it is the National Despatch Line way bill.

By **Mr. Schoonmaker**:

Q. These railroads making up the National Despatch Line, do they have officers and officials along the line at any point?

A. They do at the principal points, Montreal, Detroit, Toronto, etc.

Q. Along the line of the roads between Montreal and Boston, do the officers of the various railroads act as officials of the Despatch Line?

A. Yes sir.

(The witness took a list of agents of the National Despatch Line, and marked the word "no" against those who are not railroad agents.)

By **Mr. Hoar**:

Q. If a shipper whose freight has not been solicited by the N. D. Line goes to the Boston & Lowell Station and tenders freight to be carried over their line and connecting roads to the West, What happens to him in the way of documents?

A. The shipper is allowed to leave his freight and he is furnished with a receipt for it, and he is sent to the National Despatch Line office for a bill of lading.

Q. And they quote the rates which are the National Despatch Line rates, to him?

A. I don't know what they do.

Q. They cannot send it over your line, except upon those rates?

A. No sir.

Q. And it is way billed at those rates?

A. Yes sir.

Q. By the Boston & Lowell R. R.?

A. By the employees.

Q. You have spoken about the Delaware & Hudson Canal Company as being a competitor with you for Montreal business?

A. Yes sir.

Q. Is that letter in your writing (handing letter to witness)?

A. Yes; that is my writing.

Q. At its date?

A. Yes sir.

(Letter read aloud, put in evidence and filed with the secretary.)

Q. Was that agreed on between you and them?

A. No sir.

Q. What rates did you thereupon make?

A. Forty-five cents.

Q. You suggest fifty-three cents, etc.?

A. Yes, for them, for Mr. Crawford, between New York and Montreal.

Q. What rates did you thereupon make?

A. I made on the forty-five cent basis.

Q. Instead of fifty-three cents?

A. Yes sir.

Q. Was that a rate under the rate made by the New York Central to go by the Del. & Hudson Canal Co.?

A. No sir.

Q. At that time?

A. No sir.

Q. What was their rate?

A. Forty-five; they never had over forty-five cents.

Q. At what date do you fix it that the New York Central rate was forty-five cents?

A. I fix it then, the 5th of April; I suggested to them to put them up, so as to have fixed rates, and so as not to compel me to put them down; if their rate was forty-five cents, and I had to make a differential of 8 cents to get part of the business, I should make my rate thirty-seven cents; I wanted them to go up to fifty-three cents so that I could get my share of the business.

Q. They made a rate of forty-five cents?

A. Yes sir.

Q. You made the same rate?

A. The same rate was made before, and I did not change it.

Q. So that your rates were identically the same?

A. Yes sir.

Q. Have they changed theirs?

A. Not that I know of.

Q. In answer to a question by Mr. Fifield, you said your all rail route to the West is the longest route?

A. I said it was a longer route.

Q. And that was the reason you charged the differentials?

A. Yes sir.

Q. The basis of the charging of differentials was that you had the longest route in mileage, was that it?

A. The basis was because the trunk lines allowed the differentials.

Q. What was the basis on which you claimed it? Because your own was the longest line?

A. Claimed it! I was not in the discussion when it was allowed to us, the original discussion.

Q. Do you understand it was based upon the fact that you were the longest line?

A. Yes sir.

Q. And that you took a long time to carry the goods?

A. Yes sir.

Q. Is that the fact?

A. I have no doubt of it.

Q. Longer than the trunk lines?

A. Yes sir; longer than the complainant, the Boston & Albany.

Q. Did you know of the issuance of that circular about the time your fast train made

over that route? (Handing a printed circular to witness.)

A. This is 1886; I may have seen copies of that; probably I did.

Q. Does that correctly represent the time occupied?

A. I don't know; I don't think so.

Q. Does it make it too long or too short?

A. Too short; I wish we did make that time; I would get more business.

Q. Do you solicit freight under these advertisements?

A. No sir; I haven't seen this, I don't know that I ever saw it. I have not seen it lately. I know.

Q. That makes it in about four and a half days?

A. Yes sir; that does not come under my business, but if they would keep up the time, I would get more business.

Q. How long have you been connected with the Central Vermont Railway?

A. Eight months.

Q. You were connected with the Grand Trunk Railway before that time?

A. Yes sir; for thirty-two years and a half.

Q. You were the general freight agent of the Grand Trunk Railway?

A. I was for ten years.

Q. Can you give me the rate—you say a forty-five cent basis, what do you mean by that? I suppose you mean that is first-class.

A. Yes sir.

Q. Can you give me the rates the New York Central made to be carried over the Delaware & Hudson Company for the other classes of freight, other than first class?

A. It would only be approximate; I have only got it in my mind now.

Q. Let me read them: 45, 40, 35, 30, 25 and 23, is that right?

A. Yes; I think it is.

Q. You do not follow that rate through the classification?

A. No sir.

Q. When you say you adopted the 45 rate you adopted that on first class?

A. Yes sir; and took the differentials on the other classes of tariff.

Q. What was the rate on the second-class; where theirs was 40. What did you make?

A. 40, 30, 23, 20, 18.

Q. Then you did not as a matter of fact make the same rate; whenever they adopted a 45 cent basis you took the differentials out on all classes under second—on all the four lower classes?

A. Yes sir.

By Mr. Edmunds:

Q. In those rates you are now speaking of besides this rate as printed, did you allow any rebates, discounts, or drawbacks, or anything of that nature, to the shipper?

A. No sir.

Q. So that he actually and finally pays without contrivance to make it easier for him, exactly what is stated in that print?

A. Yes sir; or other prints; this as far as it goes.

Q. So that that is the positive sum that the shipper has to pay finally, for good and all, and

without any benefit back to himself, in any shape?

A. If it has not been amended.

Q. That is, it is that way, if it is not otherwise?

A. Yes; as it is published and printed.

Q. You have said that you do not get any foreign freights now to speak of since this Law came into operation; what was the rate last year from Detroit to Boston for exportation?

A. Whatever we could get. All the money we could get; it would vary.

Q. What was the highest rate?

A. On grain the highest rate would be nineteen and a half cents.

Q. What would be the lowest rate?

A. Twelve and a half.

Q. What has been the highest rate this year from Detroit to Boston, on grain?

A. Nineteen and a half.

Q. So that you get down this year to exactly where you were last year when you were at concert pitch?

A. Yes sir.

Q. We desire a copy of this way bill put in evidence. Now, suppose, Mr. Porteous, that your National Despatch fast freight line concern gets a train load of your fast freight thrown off the track between Boston and Lowell; who foots the bill to the shipper?

A. I would collect from the Boston & Lowell R. R. Co. The bill would be sent to me by the shipper or consignee; he would send the bill, and I would do what I could to collect it from the Boston & Lowell R. R. Co.

Q. Do you hold yourself responsible?

A. Not much!

Q. If anybody was to be sued, it would not be you?

A. I hope not.

Q. It would be the National Despatch Company, would it not?

A. I think it would.

Q. Who would be served with process in that case?

Mr. Strout. How does he know? If the gentleman will refer to the Mass. reports, he will see.

Q. Suppose you thought it was an unjust claim, what would you do?

A. Decline to pay it.

Q. Has there ever been an instance in which you, or any officer of the National Despatch Line, or the line itself have been sued for the loss or injury of freight?

A. Personally?

Q. Just as I put the question, personally or as a corporation?

A. I don't know that we allowed our cases to go to suit.

Q. Is there any other officer of this National Despatch Company, or line, except yourself, and those employed under you?

A. I have an auditor and claims agent.

Q. Do you appoint him?

A. He was there when I went there. I suppose if a successor was to be appointed that I should appoint him.

Q. Is he under your orders?

A. He takes orders from me.

Q. Is he under the orders of anyone else that you know of?

INTER S.

A. No sir; he is there independent. If he is not under my orders he is independent.

Q. Well, take your claims agent; who appoints the claims agent?

A. That is the same man; auditor and claims agent.

Q. Is there any treasurer?

A. I don't know him.

Q. Is there any treasurer, I asked. Do you know whether there is any treasurer or not?

A. I don't know of any such officer.

Q. You have never heard of such a one?

A. No sir.

Q. Is there any president?

A. I don't know.

Q. You never heard of one?

A. No sir.

Q. Is there any board of directors?

A. I don't know them.

Q. Then all that there is of it on the face of the earth are those railway corporations mentioned, and their officers, and their line of cars, whoever owns them, that run?

A. Yes sir.

Q. Now, about the cars. You say the National Car Company, a Vermont organization, or corporation is the owner of a very large number of cars. Who pays that company for their car service?

A. The roads over which they run.

Q. You do not?

A. No sir.

Q. You do not keep the accounts?

A. No sir, they keep them themselves.

Q. The roads over which the cars run, then, form the National Car Company?

A. They loan the cars to the railroads, and they run them over their roads for hire. The National Car Company send their cars over the roads for hire.

Q. Do they pay for the use of the road, or does the railroad pay for the use of the cars?

A. I should say they got pay for the use of the cars.

Q. Then the railroad companies pay the car company for the use of the cars that are used on their roads?

A. Yes sir. I should think so.

Q. And so with each of the roads that constitutes a link in the connection between Detroit & Boston?

A. I should say so.

Q. And the same is done with the Grand Trunk Railway as far as it owns cars, I suppose?

A. Yes sir.

Q. And with everybody else that owns cars?

A. Yes sir, as I understand it.

Q. I understood you to say before, in answer to a question of mine, that while there were no written contracts between these roads in the line doing this through business there were division lists on paper between them.

A. Yes sir.

Q. What is a division list?

A. It shows the various proportions of the through rates.

Q. Have you one of them?

A. No sir.

Q. Can you get one?

A. Yes sir, a hundred thousand.

Q. Will you get some and bring them here for the Commission?

A. Mr. Fifield is going to produce them.

I will supply them if the Commission require it. (Mr. Strout objects that the divisions are immaterial).

Mr. Edmunds. It would have a tendency to show to the unsophisticated mind something about this car company or this National Despatch Line.

Mr. Strout. (After discussion.) We withdraw any objection to the papers going to the Commission for their use.

Chairman Cooley. We think it very proper to have the papers, the law contemplates entire publicity in regard to rates— We think we are entitled to call out this evidence, and that we are entitled to have this information ourselves, without reference to this suit.

By Commissioner Walker:

Q. Whether or not these 3,750 cars are enough to do all the business that the National Despatch Line takes under this bill of lading, or whether you use other cars?

A. We are not particular; we use what we can. If our cars happen to be west, and we want other cars, we get them.

Q. Whom do you get them off?

A. Anybody that has them.

Q. The Boston & Lowell, or any other road where the goods are taken?

A. Yes, wherever they are wanted.

By Mr. Strout:

Q. I suppose that is simply upon the general principle obtaining between railroads; when your cars are all in use you take other cars and pay the car service?

A. We take other cars.

By Mr. Hoar:

Q. You say you get them; who gets them, do you do it?

A. Sometimes.

Q. Don't you leave it to the Lowell Road as to which car this freight shall be put in?

A. I have never had any correspondence with them about it.

Q. Don't you leave it to them?

A. I have not said anything about it; I have had no discussion with them about it.

Q. They put it into such cars as they may have upon the track?

A. As far as I know.

By Mr. Edmunds:

Q. You spoke about some paper in existence, or papers, respecting the transactions between these various companies concerning this business, besides the division lists?

A. The tariff rates,—they are in; the commissioners are supplied with copies of the tariff.

By Commissioner Bragg:

Q. If a shipper in Detroit should offer the National Despatch Company there a shipment from Detroit to any point on your line, he could get it shipped, could he not?

A. Yes sir.

Q. If he wanted to ship from Detroit by the National Despatch Company to points in New York, between Ogdensburgh and New York, could he do it?

A. No sir; it would be a difficult matter to do it. It could be done, but it is not usual, not by way of Ogdensburgh.

Q. It could be shipped from Detroit or Chicago to points in New Hampshire and Vermont?

A. Yes sir.

Q. A shipper in New York could get freight shipped to points in Vermont?

A. No sir, it is not in his line of business.

Q. Whose?

A. The agent of the National Despatch Line.

Q. He could ship by way of New London?

A. No sir; not by any line; the National Despatch agent would not do it.

Q. Would not give a rate from New York?

A. No sir.

Q. From New York to Montreal, would he give a rate?

A. Yes; but you said to points in Vermont.

Q. From the City of New York to any point in Vermont or Connecticut, they would not give him a rate?

A. No sir.

Q. Why not?

A. He is not the agent.

Q. He is the agent for Montreal shipments, but not for any intermediate points?

A. No sir.

Q. How is it from Boston to points in Vermont?

A. Our line is not from Boston to Vermont; it is from Boston to Montreal.

Q. Don't they go through Vermont?

A. Yes sir.

Q. That is what I am talking about. Don't it seem to you a little funny, Mr. Porteous, when shippers in Detroit and Chicago can get freight shipped over your line to points in Vermont, that if he lived in Boston he could not do it?

A. I don't understand you; he can.

Q. I thought you said just now that he could not?

A. You were talking about New York.

Q. I am talking about Boston. If a shipper in Boston offers freight by the National Despatch Line to any point in Vermont, or south of St. Johns, you won't take it?

A. No sir; we don't take it by the National Despatch Line.

Q. You will take it for west of St. Johns from Boston?

A. Yes sir.

Q. Don't it seem a little funny that when a shipper in Detroit or Chicago can do these things anywhere along your line, and all over your line, that a man in Boston can't do it with west bound freight?

A. It does not seem funny to me.

Q. You say that after the passage of the Interstate Commerce Act you went to work and conformed to that Law with your rates?

A. Yes sir.

Q. What changes did you make in your rates at Nashua, N. H., from Boston, to Nashua?

A. We don't run from Boston to Nashua.

Q. Does not your road run by there?

A. The National Despatch Line does not; that runs from Boston to St. Johns, and west.

Q. Does it not go right by Nashua?

A. Yes sir.

Q. When you made it conform to the Interstate Commerce Law, you mean between Boston and Montreal?

A. Yes sir, and others.

Q. But not at other points between Boston and Montreal?

this National Despatch Line with these railroads, are the tariff rates and the division lists, that you know of?

A. That is all.

Mr. Edmunds. We would like you to produce the division lists for a year back, so as to show the relation between the business of last year and this with respect to its operation, and reasonableness.

By Mr. Strout:

Q. Can you ship from Boston to Albany by the Blue Line?

A. Not that I know of.

Q. Or the Red Line?

A. Not that I know of.

Q. This Despatch Line is for through and not for local traffic?

A. It is for through traffic.

Q. And not for local traffic at all?

A. No sir.

Q. And no through line is for local traffic?

A. No sir; it is for through traffic only.

Q. And that is one advantage in shipping by the through line; that you get despatch as to time?

A. Yes.

By Mr. Field:

Q. Do any of the Boston & Lowell cars do this through business?

A. Not that I know of; I do not think they would allow them.

By Mr. Strout:

Q. The Boston & Lowell, Concord, and Northern,—are any of their cars allowed to go West?

A. No sir.

Q. Unless anybody steals them, or takes them?

A. No sir; that is all; they are not built for that purpose.

By Mr. Field:

Q. Are many of those cars refrigerator cars?

A. A large number of them are.

Charles S. Mellen. Called on behalf of complainants; sworn, testified as follows:

Examined by Mr. Hoar:

Q. Are you the General Superintendent of the Boston & Lowell R. R. Co.

A. Yes sir.

Q. Were you in 1886?

A. Yes sir.

Q. Did you sign that time table of fast freight trains to the West. (Handing same to witness.)

A. I did not.

Q. Who put your name on it?

A. I don't know; I have seen the same thing; I do not know where it was printed or published.

Q. What did you do? Repudiate it?

A. No sir; I don't know that it is correct; I should not say that it was.

Q. Do you know whether freight was solicited upon this time table?

A. No sir; I know nothing about it, only that there was such a circular issued, and that a lot of them were sent to me.

LATER S.

do not always succeed.

Q. What is the time in that?

A. Four days and a half; that is calculated to be a schedule of one train each way that is 'M.' and 'B.' freight, refrigerator cars, butter and fresh beef, eggs, cheese, any freight that requires special care, and special temperature; it does not apply to general freight; that does not cover one quarter part of the business.

Q. Now take the general freight, what time do you make?

A. I don't know, I never gave the matter any consideration; our line only runs 144 miles; when we get through we let the other man take it and he gets it through when he can. We are only interested as far as White River Junction; I could not tell you what time a shipment leaving Boston would arrive in Chicago, if you should ask me, or if any customer should ask me. That was calculated to be a particularly fast train; the ordinary train would be a day or a day and a half longer. That is only an estimate, and not from any particular knowledge.

Q. How long have you been connected with the Boston & Lowell Railroad Company?

A. Since October, 1880.

Q. How long a time has the National Despatch Line existed?

A. Ever since I have been connected with railroading; it was there before I came there, eighteen years ago, in 1860.

Q. What is the connection of the Boston & Lowell Railroad with it?

A. It is one of the roads that it runs its traffic over.

Q. What authority do they have to make a rate over your road?

A. None; except that they have done it and we have not prevented it.

Q. You have assented to it?

A. Substantially so.

Q. It is on an understood or agreed division?

A. It is on a division that we had no part in making.

Q. You take it?

A. Yes; we take it. I have never been able to understand it; I know how we arrive at our proportion; I know what it is, but I don't know how the parties who originally agreed what that proportion should be, arrived at it; it was there when I came on the road eighteen years ago.

Q. Is that a fair proportion for your road?

A. I never felt so.

Q. Have you objected to it?

A. Yes, and tried to get more and have got more at different times.

Q. When you made that objection, to whom did you make it?

A. The Central Vermont Railroad Company.

Q. And the authority to raise it came from that railroad?

A. All the divisions so far as proportion this side of St. Johns, that is the connection with the Grand Trunk Railway, are all arranged between us and the Central Vermont; that is the road we deal with entirely.

Q. When freight is brought to your station

in Boston for shipment West if it is prepaid you receive the whole money?

A. Yes sir.

Q. What do you do with it?

A. We account to the Central Vermont Railroad for it, and they account in turn to the Grand Trunk Railway and they to the Chicago & Grand Trunk Railway, and so on to destination.

Q. Do you pay any part of the expenses of the National Despatch Line?

A. No sir.

Q. You do not contribute to Mr. Porteous' salary?

A. No sir, not at all.

Q. And do not pay any of these agents?

A. No sir.

Q. Is not the cost taken out in any way out of the money?

A. Not out of us.

Q. And it is not taken out of the gross receipts?

A. No sir. The expenses of the line, so far as they come under my knowledge are not made in the division way bills.

Q. The gross amount received from the shipment, from the consignee or shipper, on delivery, or at destination, is subjected to this charge for car service, and nothing else?

A. The roads pay the car service; they do not necessarily pay it out of money received for the freight, because if freight is taken at a less rate we should have car service to pay, whether we got anything or not; the freight money goes into the general treasury and the car service is paid out of the treasury; we have nothing to do with the expenses, and pay no part of it.

Q. How are they provided for?

A. I don't know; they are provided by somebody besides us.

By Mr. Strout:

Q. Is not this the fact that those expenses are made up upon vouchers (I mean salaries and expenses and everything else) and paid by the roads west of the Vermont Central, and perhaps including the Vermont Central?

A. You are asking me a question I could not answer; prior to 1881 we used to pay our proportion of the expenses, since that time we have had nothing to do with them; they have been assumed by somebody; I suppose I know; I have an idea.

Mr. Edmunds. They are paid out of a railroad treasury somewhere?

A. Unquestionably.

Mr. Hoar, resuming:

Q. There is a route over your road via the southeastern?

A. Yes sir.

Q. What is the comparative bulk of Montreal business by that road and by the Central Vermont?

A. I rather think the line by the Passumpsic Railroad would take full the larger proportion; 50 or 60 per cent of the tonnage to Montreal.

Q. Who fixes the rates by the Passumpsic Railroad?

A. They are all fixed by agreement of all the roads in the line; Mr. Webber acts as the agent in fixing the business.

Q. They are the same as the Central Ver-

mont—you do not make any competition in rates?

A. No sir; we are interested in both lines and like to keep the rates even.

Q. I suppose it is the fact that the greater volume—almost the entire volume of Montreal business from Boston goes by one of those routes?

A. I should assume 9-10 and perhaps 90-100 by those two routes; but I don't know; that is a matter of assumption only.

Q. You never knew of any business to go round by Prince Edward Island steamers and the InterColonial Railroad?

A. I don't know from personal knowledge of any; I would not say that there was not any; it is not an impossible nor an improbable thing; I never had any personal knowledge of it.

Q. Did you ever make any estimate from figures or examination into the question of division of the bulk of the business between the two routes operating over your road?

A. I have at one time.

Q. When?

A. I could not say; I am always figuring to see about the business—how it is going, and how we stand; I could not tell the specified time; it is my impression that a little more than 50 per cent goes by way of the Passumpsic Railroad, and there might be a slight percentage in favor of the Central Vermont; it is very even I should say; my impression is that it would not exceed 60 per cent by the Passumpsic Railroad, and it might be forty-five and fifty-five; I should call that pretty nearly even.

By Commissioner Walker:

Q. That is to Montreal?

A. Yes sir.

Q. How is it west of that?

A. Oh, the Central Vermont do 9-10ths of it; the other line does very little.

By Mr. Fifield:

Q. Does the Grand Trunk Railway form part of this Passumpsic Line to Montreal?

A. No sir, not now; it has until recently; it goes by the way of the Canadian Pacific.

Q. That is an English corporation?

A. Yes sir.

By Mr. Strout:

Q. The Canadian Pacific have no roads within the United States at all?

A. Not that I am aware of.

Mr. Edmunds. The Grand Trunk—part of its main line is in the State of Vermont, and in New Hampshire and Maine. I suppose the Commission will take notice of all such general facts as that.

Mr. Strout. So far as United States business is concerned we stand on all fours with the United States roads.

Mr. Fifield. These corporations in the United States that the Grand Trunk Railway controls—are they American corporations or English?

Mr. Strout. I will tell you how it is. The Atlantic & St. Lawrence Railroad extends from Portland to Island Pond. That was incorporated by the Legislatures of Maine, New Hampshire, and Vermont. The Grand Trunk Railway took a lease of that road, and operates it under a lease; it also operates a road from the Junction to Lewiston.

Mr. Edmunds. Is not this lease really a mere technical form to observe corporation laws and jurisdiction?

Mr. Strout. No sir; it is a lease in the ordinary form, the same as any railroad lease; it is authorized by the Legislature of Maine.

Mr. Edmunds. A set of different stockholders who receive the dividends?

Mr. Strout. Yes, entirely; and the organization is kept up.

Mr. Fifeild. The Grand Trunk Railway Company is a foreign concern?

Mr. Strout. Yes.

By Mr. Hoar:

Q. Where is the Southeastern; is not that partly in the States?

A. No sir; it is not at all in the States; it is Canadian. They lease a road that runs to Newport. It is a divided road; on account of the contour of the country, ten miles of the Southeastern Road has to be connected by a road in the States. They run down into Vermont and back into Canada. The Newport & Richford Road is in between two sections of the Southeastern, and they arrive at the eastern terminus,—it carries them to Newport.

Q. When you say that the Southeastern is a foreign corporation, you make it with this qualification: that they operate part of the road in the United States?

A. Yes; the Southeastern is entirely in Canada, and entirely a Canadian corporation.

Mr. Edmunds. What is the name of the road from Newport?

A. Newport & Richford. That is also in two sections; part of the Southeastern joins that.

Mr. Edmunds. It is one management by the Southeastern to Newport?

A. Yes sir.

Mr. Edmunds. What of the Passumpsic?

A. The Boston & Lowell have a lease of the Passumpsic.

By Mr. Strout:

Q. You are the General Superintendent of the Boston & Lowell?

A. Yes sir.

Q. And you have the general control and management of that road to-day?

A. Yes sir.

Q. Now, Mr. Mellen, I want to ask in relation to the National Despatch Line. As I understand you to say, to start with, the Boston & Lowell Railroad haul the cars of the National Despatch Company over its road to White River Junction?

A. I stated that from the fact that we have had, until last July, a lease of the Northern Railroad. We haul the cars forty miles from Boston to Nashua. There we deliver them to the Concord Railroad. They haul them thirty-five miles to Concord. There they are delivered to the Northern, and they haul them seventy miles to White River Junction, to the Central Vermont Railroad. Prior to the first of July we hauled to Nashua, and they took them to Concord; and then we hauled them to White River Junction.

Q. You have a line that did connect, prior to the first of last July, by way of Hancock Junction?

A. Yes sir.

Q. To Peterboro?

A. Yes sir.

INTER 8.

Q. And so to Concord and by the Northern?
A. Yes sir.

Q. With the exception of hauling the cars of freight over our line and delivering them to the next carriers, and receiving the differential part of the through compensation for hauling that freight, has the Boston & Lowell, directly or indirectly, anything to do with it, or is it any part of the National Despatch Line?

A. I do not understand that the Boston & Lowell Railroad is any part of the National Despatch Line at all; I do not understand that the National Despatch Line is anything but a name, or trade mark. I do not understand that it has any organization, president, directors, treasurer, or anything. It is merely a name under which the business is done. That has been my understanding of it, and therefore we could not be part of a name.

Q. Is there any agreement, to your knowledge, existing by which the Boston & Lowell Railroad forms a part of the National Despatch Line, or any organization by that name?

A. Not by that name at all; no sir.

Q. I think you have stated that we had nothing to do with paying Mr. Porteous?

A. The only way that we have any connection in the business of the National Despatch Line is this: When a bill of lading is issued from Mr. Porteous' office, we bill the freight and make the way bills, making the divisions so far as they are made on the way bills, load the freight into a North Division car, if we have one, and send it along to our next business connection, with the way bill and charges. On the return, when the freight arrives at Nashua, the Concord Railroad delivers to us the east bound freight, and we take it to Boston and collect the charges. We pay to the Central Vermont Railroad any balance that there may remain, over and above our proportion in the division of the freight earnings, on the freight we collect.

By Mr. Hoar:

Q. Do you not always wait for this bill of lading from the National Despatch office if the freight has arrived?

A. We wait for the bill of lading, I understand, I do not personally do this; before the freight goes forward we receive the bill of lading, and when the rates were special. We have not done that since the first of April, but when the rates were special we noted them; but we should now way bill it, because there is an established tariff now, and there did not used to be.

Q. This is done through whom?

A. Mr. Turner, the agent at Boston.

Q. He is the general traffic manager?

A. Yes sir.

C. Did you have to do, or did the Boston & Lowell have to do with fixing these rates, or maintaining these rates that are now in force?

A. The only thing I could say that we did, was this: At the time we fixed our tariff, to go into effect April 5, we made our rates to White River Junction on our road; we notified all the parties that we were in business with that we would bill no freight and receive no freight for billing to any point beyond that that was not as high or higher than the rate to White River Junction, which was our term-

inus, thereby complying with the fourth section of this law; we assume no responsibility for any rates beyond our road and we have nothing to do with making them.

Q. Do you have anything to do whatever, or did the Boston & Lowell have anything to do with fixing the rates beyond St. Albans west, or beyond Ogdensburgh west, as complained in this complaint?

A. The only thing we could have to do with them would have been to insist that they should be in excess of our terminal point, in excess of rates in force at that point.

Q. Do I understand you to say to the Commission that when you fixed your rates to White River Junction, that you fixed such rates as should be within the terms of the fourth section of the Interstate Commerce Act?

A. They are progressive. There is no point south of White River Junction but what is at an equal or less rate than the White River Junction rates; that is, there is no rate in excess of the rate for White River Junction for any point south of that place, now.

Q. Can you give the Commission, for the purpose of a comparison with the rates named in this petition, can you give the rates on the six classes of freight established in accordance with this Act, as you have stated, by the Boston & Lowell?

A. I could not, but if there is a tariff here it will show.

Q. Do you know, take the highest and lowest, whether our first highest class is thirty-six cents and the lowest 12½ cents?

A. I do not. I should not undertake to state any rates in figures. I merely know that fact that the rates are not less on freight to White River Junction from Boston, than they are to any intermediate point; that is, they were not at the time I was in consultation when the tariffs were made up, and that we did not take any business in excess of that; if it has been done it is without my knowledge.

The Chairman. I do not understand that any such claim as that is made.

Mr. Hoar. We do not make any such claim as to that.

Mr. Strout. I desire to have it appear that when the Boston & Lowell Railroad made up its rates to White River Junction and points intermediate between White River Junction and Boston over that line, that it did not make those rates at a less figure than any rate that is charged beyond, either to St. Albans or Detroit; we conform to the Law, that is what I want to show.

Mr. Edmunds. What I wish to know is this—Mr. Mellen has stated what their rates are as put forth by his road. I want to ask him in that connection:

Q. Suppose, taking the first class, or second, or any of it, supposing the rate to be thirty cents, or whatever it may be to White River Junction; what do you actually get for carrying the same kind of freight to White River Junction when it is going on to Detroit; and when you come to divide it on these division lists that have been spoken of, with the other roads, what is your share?

A. You say if the rate is thirty cents from Boston to White River Junction, and then if the

same rate was extended from Boston to Detroit. I want to understand you.

Q. No sir; what I mean is this—supposing under your published rates you carry a car load of chairs, for illustration, made in Boston, to White River Junction, there to be unloaded and go into consumption at that point, you would get a certain sum?

A. Yes sir.

Q. Now, in the same train you have another car load of chairs over the National Dispatch Line, this fast freight concern consigned to Detroit. When you come to get your share of the freight money for carrying those chairs from Boston to Detroit, how much do you get for the Detroit car load of chairs as compared with the White River Junction car load of chairs?

A. For an estimate I should say from 10 to 15 per cent of what we should get if it went to White River Junction.

Q. That is to say you would get a great deal less?

A. Yes sir; not a quarter as much beyond any question; if the rate was \$100 on a car load of chairs to White River Junction, it might be \$100 say, to Detroit; in the case of the Detroit shipment we might get \$10; while to White River Junction we should get the whole \$100.

Q. So that your road does carry the same sort of freight under the same physical conditions that is to be delivered at points west and north of White River Junction and beyond Montreal, for a great deal less than it would carry it to White River Junction if it is to be delivered, and stop there?

A. In one case we get our division of the rate, and in the other we make the rate.

Q. I am not on the question of that, but what money you get for the service. You have performed just the same services, burned the same amount of coal; you have the same number of tons of chairs; the tracks are the same, drawn by the same locomotive, the same train hands, etc. Now if it is for White River Junction you get \$100; how much do you say you would get for hauling it if it was going to Detroit?

A. Ten or twelve, or fifteen, somewhere along there.

Q. Is it not true that in order to get the haul upon that freight, you consent in your division with the other roads to take that amount, so far as you and the other roads are concerned?

A. Yes sir.

By Mr. Strout. And is not that true of all roads and all through lines?

A. All that I have had any experience with.

Q. You do not establish the rate, but you take that as a division?

A. Yes sir.

Mr. Edmunds. **Q.** That division is agreed upon among you all?

A. It is practically a mileage division whatever the through rate may be; we each take out our proportion based on the number of miles; we have had contracts to that effect in years gone by.

By Mr. Strout:

Q. You say this is true of other roads—do you know of any instances of the petitioner in this case—the Boston & Albany?

A. Yes; it is a similar method with the Boston & Albany on freight going from Boston to Detroit—just the same.

Q. And that is the practice on all roads, is it not?

A. It is on roads that do any through business.

Q. They have their own arrangements as to division, I suppose?

A. Yes sir.

Q. Whether or not the Boston & Lowell Railroad Company have had to make a large outlay in the provision for doing this through business, and have made special terminal facilities?

A. They have, of course; quite a considerable outlay. They have erected freight houses, and provided terminal facilities.

Q. At Mystic Wharf?

A. Yes sir.

Q. Amounting to \$3,000,000 or \$4,000,000 as alleged in the petition?

A. Yes sir.

Q. Now is that a part of the business of the Boston & Lowell R. R. that they desire to retain; that is, is it some profit to them?

A. Oh yes, there is a profit in it.

Q. Suppose that the prayer of this petition were granted, and suppose that you should put up the rate through, would or not that cut off competition with the Boston & Albany for this through business, and are not they the shorter route?

A. We should have to do one of three things, put up the through rate, or reduce the local, and either one would amount to a loss equally large; we should have to do one of those two things, either increase the through freight which would mean to go right out of the business, which would mean a loss of the income derived from that source, or reduce the local rates, so that the locals would be inside of the through freight rates, and that would mean an equally large loss; in either case it means a loss.

By Mr. Edmunds. But in either case you would make a profit.

A. I don't know; I don't know what the effect would be. I should estimate it a large loss.

Q. Pursuing the same idea that I had, take these roads that go to the west from Boston; the N. Y. & New England, Boston & Albany, Fitchburg, Boston & Lowell. Take the Fitchburg, do they carry at the same general tariffs that you do?

A. They do, and accept differentials; they bill to N. D. points. The differentials apply to any business going by the Fitchburg if it is going by National Despatch Line, but not if it goes through the tunnel.

Q. State to the Commission just what difference there is between this line which goes up through New Hampshire, Northern Vermont, and around through Canada, and the shorter line from Boston, by the more southern route; what difference is there in carrying merchandise; what preferences have shippers for one over the other, and what are the reasons?

A. The shorter line is able to give better dispatch, and of course accommodate customers better. There must be an offset to that in order for the longer line to do the business. Then the physical difficulties in haul by the long

line are greater than they are by the shorter lines, the Fitchburg, and the Boston & Albany; and in the absence of a corresponding advantage, by the longer line, they would be practically shut out from the business. That corresponding advantage has already been considered, and conceded by the trunk lines, and it has resulted in the allowance of differential rates in order that the longer line could have a fair proportion of the business. They were allowed to take freight at less rates than the other roads. That difference was agreed upon, and its allowance compensated for their other difficulties that they had to contend with; and by that means they hold their proportion of the traffic.

Q. Does the Boston & Lowell belong to the trunk line?

A. They have nothing to do with it; anything of the kind that has been done through any attendance has been through the National Despatch Line.

Q. State to the Commission who it is that really dictates the rates on freight—through freight?

A. It is, as I understand, the trunk lines, the N. Y. Central, Pennsylvania and the other Trunk lines; and we adopt those rates less the differentials from Boston.

Q. If you did not adopt them, you would lose the traffic and cease to become a competitor?

A. That is it, precisely.

Q. Has the Boston & Lowell Railroad anything to do with fixing the rates on freight from Ogdensburgh west over the line of steamers?

A. No sir.

Q. Does it form any part of it in any way?

A. We haul the business between Nashua and Boston, forty miles.

Q. Have you anything to do with it from White River Junction, west?

A. No sir; not at all.

Q. Who does make the tariff from White River Junction, west?

A. The Central Vermont Railroad in connection with the steamer line running from Ogdensburgh. Just where the authority rests that fixes the rates, I don't know.

Q. Do you control it in any way?

A. Not the slightest. We have nothing to do with it; we take our proportion, and if we did not it would go to some one else. It is to take it or leave it.

Q. By some one else, I suppose you mean the Fitchburg?

A. Yes sir.

Q. State to the Commission as to St. Albans. Do you have anything to do with fixing the rates from White River Junction to St. Albans?

A. We never have until the meeting in March, when the rates were fixed at White River Junction. And then I notified Mr. Chittenden verbally that he must make his rates either White River Junction rates or in excess or else we could not do the business with him.

Q. Why?

A. Because we understood the rates must be as much or greater than White River Junction, in order to comply with section four.

Q. Was that after consultation with counsel that you fixed those rates?

A. Yes sir.

Q. To comply with the fourth section of the Law?

A. Yes.

Q. Have you anything to do with fixing the rates on freight west from St. Albans?

A. We have nothing to do with any rate beyond White River Junction. We have no authority in the matter. We use the Central Vermont tariff for all points. It is not a joint tariff; they make it up without consultation, and they never consulted us about White River Junction rates until the 5th of April, as I have stated.

Q. Have you ever published any rates?

A. No sir; we have not been a party to any publication for any points on the Central Vermont Railroad. We use a tariff furnished by the Central Vermont and sent to our agent. On the Ogdensburgh & Lake Champlain Railroad it is the same, and the National Despatch takes everything beyond the Central Vermont, in the all rail line.

Q. And you neither fix them nor are consulted?

A. We have nothing to do with them, except to bill such freight by them as is brought to us.

Commissioner Walker. This is the fact: They give you a rate from all the points on the line of the Central Vermont to Boston, and to points on your road; and you take that, and you work it in the reverse order the other way?

A. Yes sir; they work the business done by the same tariff, and we work it back to them, furnish a tariff and give all the rules as to how the business shall be done.

Mr. Edmunds. And each of you have a local rate within your own State?

A. Yes sir.

By **Mr. Strout:**

Q. I hand you a map for identification containing the different lines leading out of Boston, and where there either is, or may be, if the rates are raised, competition. Was that prepared in the Boston & Lowell office?

A. I don't know where it was made.

Q. Whether or not that contains substantially in different colors the different lines?

A. The Fitchburg Line is not there; and there are quite a number of lines omitted, I should say.

Mr. Strout. Then I will withdraw this for the time being.

Q. You do not make joint rates between Boston and St. Albans?

A. We use the tariff that the Central Vermont gives us to bill to any point on that road, but the tariff is made by the Central Vermont, the rules of classification and everything, we only use that and act as their agent.

Mr. Strout. I shall move to amend the answer by striking out the part as to joint tariffs between Boston and St. Albans.

Witness. Prior to the 5th April we used to do so.

By the **Chairman:**

Q. You accepted a tariff and acted upon it?

A. Yes.

The Chairman. Taking and acting upon a tariff would bind a company we should say, as much as if they had taken part in the making of it up.

By **Mr. Strout:**

Q. State to the Commission what change has taken place in the last three or four weeks in connection with the Canadian Pacific and the Southeastern Railway, that makes them an active competitor in this business?

A. The Southeastern has recently completed its bridge across the St. Lawrence River and now comes in direct connection with the Boston & Lowell Railroad by its control of the Southeastern Railway which it takes today as a leased line; it comes in direct connection with the Boston & Lowell; heretofore the Southeastern had to run its business over a portion of the Grand Trunk Railway, and has been subject to tolls and rates that today they are not subject to, so that the competition will become stronger I suppose, from this time on.

Q. Is it not true that a road has been built to Sault Ste. Marie which will form an outlet and trackage connection by which they can run freight down to these points west?

A. Yes sir.

Q. From the Canadian Pacific?

A. Yes sir.

By **Mr. Fifield:**

Q. Does it not take freight from Detroit that way?

A. We have never had any freight from Detroit that way over our road, I am sure.

By **Mr. Edmunds:**

Q. Supposing in the case of the two car loads of chairs I took to illustrate, one is for White River Junction for consumption there, and the other is for St. Albans; how much do you get out of the St. Albans car load for your part of the service as compared with what you get to White River Junction?

A. We get one half, on an estimate, to St. Albans, whereas to Detroit we might get 10 or 15 per cent; to White River Junction, if it stopped there, we should get the whole of it; that is, including the three roads below White River Junction.

Q. Suppose you have two car loads of chairs in the same train; one consigned to White River Junction for consumption there and the other consigned to St. Albans; now, is your actual compensation as you finally get it, different between those two cars?

A. Yes; it would be; we should get the whole of the rate if it stopped at White River Junction, and we should only get half of the rate to St. Albans; therefore there would be 50 per cent difference on it in the amount of money we receive for hauling the two cars; that is we should get half as much if the rates were the same.

Q. I want to know what the fact is?

A. What the rates would be? I cannot carry them in my mind, but I should say the rates would be nearly double to St. Albans.

Q. That is the whole through rate; I am speaking of the amount that belongs to you for your service?

A. We should get less; just exactly how much, I don't know.

Q. So that you actually get more for freights of the same kind and in the same train carried to White River Junction for consumption there than you do to White River Junction if it is going beyond?

A. Our earnings are greater to White River Junction.

By **Mr. Fiske**:

Q. Because it costs more to pick up the local traffic than to send the through traffic right along. Is not that one consideration?

A. That is one consideration.

Q. Take traffic between Boston and St. Albans; what are the distances from White River Junction?

A. One hundred forty-four miles, and 120 from White River Junction to St. Albans; we divide, and the entral Vermont gets $\frac{1}{2}$; we give a rebate of 10 per cent on our proportion to them; that is the same both ways.

Q. The freights are the same both ways until you get beyond St. Albans?

A. Yes; the rates are the same until we get beyond Ogdensburgh and beyond St. Johns, practically.

By **Mr. Strout**:

Q. Is it not true that for freight to White River Junction and to points intermediate you put on a local train and ship by that, and that the through freight you put on to a through train?

A. Not necessarily. It is liable to go in the same train, just as it is most convenient to the men operating the train; he might put the cars in the same or in a different train; we have a local way freight train but lots of other freight goes in the same train that is intended to go further than to local points.

Mr. Hoar. The Boston & Albany rests in both complaints.

Mr. Edmunds:

We stand on the records you have of the rates, as to the evidence given as to the practical operations of the roads, and as to the giving of division lists; that makes part of our case, and the table of distances is in.

TESTIMONY FOR THE RESPONDENTS.

Edmund George Lucas, called on behalf of respondents; sworn, testified as follows:

Examined by Mr. Fiske:

Q. Are you the auditor of the Central Vermont Railroad Company?

A. Yes sir.

Q. How long have you been in the employ of the company?

A. Eighteen years.

Q. About a month and a half ago, did I ask you to answer certain interrogatories I propounded to you in respect to through and local business on this road?

A. Yes sir.

Q. And its earnings and expenses on both net and gross, that you made out of through, and local business?

A. Yes.

Q. Have you made it.

A. Yes sir.

Q. See if that is a statement of it.

A. Yes sir.

Q. State if that is correctly made up.

A. It is.

Mr. Fiske.

I offer it in evidence and ask the witness to read it.

The witness then read the statement, as follows:

INTER S.

Q. What was the tonnage of through business east and west?

A. East bound 882,259 tons; west bound, 218,717 tons. Total 1,095,976 tons.

Q. What was the tonnage of joint freight east and west?

A. East bound, 161,984 tons; west bound, 54,219 tons. Total 216,158 tons.

Q. What was the tonnage of strictly local freight?

A. 71,325 tons.

Q. What was the percentage of the through to the total?

A. 79 per cent.

Q. What were the gross earnings of through freight?

A. \$652,647.33 or 64 per cent of total freight earnings.

Q. What were the gross earnings of local and joint freight?

A. \$370,636.54 or 36 per cent of total freight earnings.

Q. What were the net earnings of through freight?

A. \$172,844.62.

Q. What were the net earnings of local and joint freight?

A. \$100,466.27.

Q. What was the number of through passengers?

A. 87,206.

Q. What was the number of joint passengers?

A. 115,814.

Q. What was the number of local passengers?

A. 280,401.

Q. What were the gross earnings from through passengers?

A. \$153,945.51, or 88 per cent of total passenger earnings.

Q. What were the gross earnings from local and joint passengers?

A. \$250,149.10, or 62 per cent of total passenger earnings.

Q. What were the net earnings from through passengers?

A. \$50,626.71.

Q. What were the net earnings from local and joint passengers?

A. \$81,579.58.

Q. What do you mean by joint passengers?

A. Passengers coming from connecting roads.

Q. What do you mean by local?

A. Strictly confined to stations on the Central Vermont Railroad, between stations on the Central Vermont Railroad.

Q. That is a statement of the earnings and expenses of the Central Vermont proper for the year ending June 30, 1886?

A. Yes sir.

Q. Between what termini?

A. Rouse's Point and Province Line Wind-sor, and between Essex Junction and Burlington.

Q. It does not take in any leased lines?

A. None whatever.

Q. Did you also make up a statement in regard to the Ogdensburgh Railroad?

A. Yes sir.

Q. That is leased to the Central Vermont?

A. Yes sir.

Q. Is it made up from the books correctly?
 A. Yes sir.
 Q. Will you read it?
 (Witness reads as follows):
 Q. What was the tonnage of through business east and west?
 A. East bound, 267,007 tons; west bound, 36,694 tons. Total 303,701 tons.
 Q. What was the tonnage of joint freight east and west?
 A. East bound, 83,756 tons; west bound, 20,169 tons. Total 103,925 tons.
 Q. What was the tonnage of strictly local freight?
 A. 66,308 tons.
 Q. What was the percentage of the through to the total?
 A. 64 per cent.
 Q. What were the gross earnings of through freight?
 A. \$200,692.32, or 48 per cent of total freight earnings.
 Q. What were the gross earnings of local and joint freight?
 A. \$216,817.51, or 52 per cent of total freight earnings.
 Q. What were the net earnings of through freight?
 A. \$81,867.98.
 Q. What were the net earnings of local and joint freight?
 A. \$87,891.15.
 Q. What was the number of through passengers?
 A. 2509.
 Q. What was the number of joint passengers?
 A. 29,372 and 1-2.
 Q. What was the number of local passengers?
 A. 131,183.
 Q. What were the gross earnings from through passengers?
 A. \$5,203.86, or 4½ per cent of total passenger earnings.
 Q. What were the gross earnings from local and joint passengers?
 A. \$109,510.47, or 95½ per cent of total passenger earnings.
 Q. What were the net earnings from through passengers?
 A. \$1,731.46.
 Q. What were the net earnings from local and joint passengers?
 A. \$35,818.49.
 Q. What was my request of you? To select perfectly impartial years?
 A. Yes sir. I should call this a very fair year; it was the 30th June, 1886.
 Q. Is it made up for the last year yet?
 A. It is now. It was not at the time of your request when these statements were made up.
 Q. Is that a fair illustration of the business since the reorganization in 1883?
 A. I believe it to be; yes sir.
 By Mr. Edmunds:
 Q. This information is up to the 30th of last June, 1886?
 A. Yes sir.
 Q. Can you give us for this year?
 A. I can.
 Q. Will you do so; I wish you would?

A. It will take some little time; about two weeks.

Q. You have given net earnings and gross earnings; by what system do you arrive at it; how do you ascertain net earnings out of gross?

A. I take the entire expenditure I have for the Central Vermont Railroad Company, operating and other expenditures. Then I have taken out of those the several kinds which seem to be clearly applicable to passenger and freight business; the remainder of the accounts I divided according to my best judgment.

Q. So that it is really and finally an estimate?

A. It is finally an estimate.

Q. You do not keep a set of books by which the net earnings to be divided among the stockholders, or paid on interest, or whatever is shown on the records of the Central Vermont Railroad, do you?

A. Yes sir.

Q. You keep that separate as to all your leased lines, each one by itself, do you?

A. Yes sir.

Q. How do you apportion the services of cars, locomotives, train service, etc., between one part of the line and another—by miles?

A. Yes, by mileage. The roads that have no equipment; we charge them for a certain price per mile for every mile run by engineers and engines.

Q. You keep the accounts so that the branch roads and leased lines are only charged with locomotives that actually run over them, hauling this business?

A. Yes sir.

Q. Just in the same way as if each one was a separate and distinct organization, under the management of a common trust or factor?

A. Yes sir; quite separate. They earn their own money and pay their own bills.

Q. Do you keep the wood and coal account separate?

A. We do with the exception of the S. S. & C. Road, and the Waterloo & Magog Railroad. We keep those two together, dividing them upon the mileage. All the other roads we keep separate. We keep the consumption on our road.

Q. Do you keep separate accounts of this through National Despatch business?

A. I have no account on the book of the National Despatch.

Q. Do you keep account of the work that is done?

A. No sir; we do not know anything about them.

Q. Have you nothing on your books that would distinguish as to expenses of running trains, and of the income out of what is called the National Despatch business, and the other business of the road?

A. No sir.

Q. The National Despatch you do not know on your books at all?

A. No sir.

Q. With whom do you keep accounts of the freight that goes beyond your own line?

A. The Grand Trunk Railway Company.

Q. And the other way at the other end?

A. Yes; the Boston & Lowell, or perhaps to speak more correctly, the Northern, just now.

Q. So that your books then would not show how much that part of the Central Vermont business is; how much it actually carries on beyond, on the lakes, or how much it makes or losses, you do not know?

A. No sir.

Q. How can you tell anything then whether the charges attributed to traffic that goes by those steamers to Ogdensburgh or from Ogdensburgh—that is, can you tell anything about that?

A. No sir; nothing about that.

By Mr. Fifield:

Q. Are all of those figures, except the estimates of earnings, net earnings taken directly and correctly from your books?

A. Yes sir.

Q. And your system of book keeping shows all those figures accurately?

A. Yes sir.

Q. In respect to the net earnings, how close a calculation is this? Is it a jump?

A. No sir; it is put together with some care based upon experience and upon methods that have been adopted.

Q. How long have you been in this kind of business?

A. It will be forty years very soon.

Q. Go on and give your reasons for this statement?

A. This is made up upon my own judgment; I consulted no one about it; I divided such expenses as were not directly chargeable to freight or passenger departments, divided them in accordance with my best judgment; subsequently, after I made out that paper, it was suggested to me that a mileage basis for some accounts would be perhaps more accurate as a basis to work upon; and in making up a division on a mileage basis of such accounts as could be figured in that way, as wood, coal, oil and waste, I differed about \$6,000; so that the result would have been, if I had adopted the mileage basis for those few accounts, we should have differed \$6,000 in the result.

Q. So that taking these two methods there is that difference?

A. Yes sir.

By Mr. Edmunds:

Q. What do you include in reaching net earnings? You deduct, I suppose. Are these sums the gross earnings? You speak of sums of money got from all sources?

A. Yes.

Q. Over the line?

A. Yes sir.

Q. Now, to get at the net earnings, what do you charge off against that if anything beyond

INTER 8.

penses be paid from other sources of income.

Q. What was the nature of those other expenses that you mention?

A. Legal expenses for one thing. Of the precise amounts I deducted, first was engineering, insurance, legal expenses, mails and taxes. Those expenses form no part of what I have included as the expenses of passenger and freight departments.

Commissioner Walker. But you did include construction of new cars and engines?

A. Yes sir.

Q. And repairs to the road, and roadbed?

The Chairman. And the general management of the road?

A. Yes sir, everything; I put in taxes only to a small amount, only \$200.

Mr. Edmunds. Interest on public debt you did not put in?

A. No.

Q. And the state tax comes out of the operating expenses?

A. No sir; it comes out of what you may have after you have run your railroad, out of your net earnings.

Q. The roads pay an income tax, do they not, on gross receipts? Now, when you pay the Treasurer of the State of Vermont \$1,000, or something on that tax, what account do you charge it to?

A. The state tax. Ultimately that account would be closed in the income.

Q. Do you mean that when you have figured out other expenses and arrived at net earnings, from all sources, that there is yet, out of that income, a tax that has to be paid?

A. Yes sir, there would be; but it does not come out of there, for the reason that it was not put in.

Q. Then that really shows net income after all your debts are paid, except interest and taxes?

A. Yes sir.

By Mr. Fifield:

Q. What was the tax for the year ending June 30, 1886, paid on the gross receipts of the Central Vermont proper?

A. As near as I can remember, about \$37,000.

By Mr. Edmunds:

Q. Then, as to this statement here, you have either some other resources, or else that statement is not a true statement of what the net income really was, because you had that net income you had paid \$37,000 for state taxes?

A. After I had the income I paid it.

Q. Did you have that much money left, or \$37,000 less?

A. I had the money in the treasury after paying all my expenses; and the remaining money was applicable to other matters, that is coupons and taxes; \$350,000 is the interest, 5 per cent on seven millions.

By the **Chairman**:

Q. How did you apportion the general expenses between the passenger and freight earnings?

A. Divided it half and half.

Q. How did you apportion between through and local business?

A. I took the total amount of freight earnings from the three several sources, through, joint, and local. We earned \$1,023,000. We earned on through freight \$652,000, which was 64 per cent of the \$1,023,000. Now, having earned on that 64 per cent of the gross earnings, I make the expenses chargeable with 64 per cent.

Mr. Edmunds. You charge the expenses to these various accounts in proportion to your gross income received therefrom?

A. Yes sir; from the three classes of freight I give each its proportion, and the same as to the passenger.

Q. That would not necessarily represent the wear and tear of the traffic?

A. It is supposed that wear and tear is taken care of in the general expenses of the road from year to year.

Mr. Porteous, recalled, says: The way bills referred to in my testimony are signed by the Boston & Lowell Railroad Company.

(Adjourned for the day.)

Second Day, Friday, September 3, 1887.

E. A. Chittenden, called on behalf of the respondents, sworn, testified as follows:

Examined by **Mr. Fiffeld**:

Q. Where do you reside, and what is your business?

A. St. Albans; superintendent of the local freight traffic.

Q. State whether in May, at the time this petition was filed, the tariff between St. Albans and Boston was sixty cents per 100 pounds for first class freight?

A. Yes sir.

Q. Whether that tariff was reduced, and if so, when?

A. About the sixth of July.

Q. Before the filing of the Grange petition in this case?

A. Yes sir.

Q. How much was it reduced?

A. Five cents on the first class, from the sixty cent rate to fifty-five cents.

Q. Do you remember as to the second class?

A. Five cents on that.

Q. Did that run through all the classes?

A. There was a reduction, growing smaller till we reached the sixth class. I do not remember that exactly.

Q. Have you been pretty busy trying to adapt yourselves to this Interstate Commerce Law since April?

A. Done nothing else hardly.

Q. Have you succeeded yet in fixing the local rates—by that I mean rates between points in Vermont?

A. No sir; we have been at work on it.

Q. In general terms, how much have your

rates between St. Albans and Boston, and in intermediate points on interstate traffic, been reduced within the last ten years, in your judgment?

A. I should say one third.

Q. That is from time to time?

A. Yes; from time to time.

Q. Is your road now what you call "blocked"?

A. Yes sir.

Q. What do you mean by that?

A. Putting several stations at the same rates.

Q. That is, east, between Ogdensburgh and Boston, it is sixty cents per hundred?

A. Yes sir.

Q. What is the first block?

A. The Ogdensburgh Railroad.

Q. So that, from any point on the Ogdensburgh Railroad to Boston, it is sixty cents a hundred?

A. Yes sir.

Q. When did this block system begin?

A. I cannot tell; it was before my time.

Q. What is the next group or block?

A. Alburgh Springs to Randolph, I think.

Q. So that the rates between those points to Boston are the same in each case?

A. Yes sir.

Q. Alburgh Springs being on the border of New York?

A. Yes.

Q. What is the next block?

A. The next would be one or two stations South of Randolph, and thence to the rate of the Boston & Lowell at White River Junction.

Q. Whether this system of blocking or grouping the distances on railroads in this country is customary or not?

A. It is.

Q. All along the lines?

A. Yes sir.

Q. Is any more charged for the shorter distance from Boston to Ogdensburgh, or points between them than is charged to Ogdensburgh?

A. No sir.

Q. That is, your rates are graded that way, according to the provision of the Interstate Law?

A. Yes sir.

Q. You take that as a dividing line, and your rates are lower commencing the other way for west bound traffic?

A. Yes.

Q. And the same is true to St. Johns?

A. Yes sir.

Q. Do you know whether the people at Ogdensburgh and along the line are satisfied with the rates between Ogdensburgh and St. Albans respectively, and Boston, so far as the Central Vermont is concerned?

A. I believe they are, and I understand they are.

Q. Have you heard any serious complaints in that regard?

A. No sir.

Q. Whether you have seen any communications on that subject from people along the line of the road?

A. I have.

Q. What is the expression contained in them on the subject?

A. They were all very well satisfied.

Mr. Edmunds. The letters had better be produced, if you want to show their contents.

Q. Have you those letters?

A. I have some with me from St. Albans merchants.

The witness then went to get the letters referred to, but was told by counsel not to stop and look for them. The witness then resumed the stand.

Q. State whether the rates between Ogdensburgh, Boston and New England points are reasonable?

A. I believe they are.

Q. Whether you have made any examination of the tariffs of other roads, situated as this road is, and have put them on paper?

A. We have.

Q. What roads have you compared rates with?

A. The Passumpsic, running from White River Junction to Sherbrooke in Canada.

Q. Along the east side of the State on the Connecticut River or the Passumpsic River?

A. Yes sir.

Q. And your road runs on the west side?

A. Yes sir.

Q. And comes out on the west side, at the north end?

A. Yes sir.

Q. Both roads are north and south roads?

A. Yes.

Q. Is there a road running from the lake at Swanton near the north end of the State, diagonally, known as the St. Johnsbury & Lake Champlain, connecting with the Passumpsic Railroad?

A. Yes sir.

Q. They connect with our road at Swanton?

A. Yes sir.

Q. Have you compared our rates with theirs?

A. Yes sir.

Q. Have you compared the rates on the Connecticut River Railroad and the New York and New Haven, for Vermont business?

A. Yes.

Q. How do these rates compare with those? That is, taking your rates from New York and Boston to Ogdensburgh, and intermediate points, how do our rates compare with the rates on those roads?

A. They are lower. The rates between our stations and Boston, considering the distance, are less than the rates between our stations and their line.

Mr. Edmunds. Less per mile?

A. I don't know that; I can't say that.

Q. What do you mean by considering the distance?

A. I mean the rates on their roads for New York business; take for instance New York as the basis, and Boston, that our rates to Boston are less than they are to New York or from New York more to our stations than from Boston.

Q. The distance is greater, is it not?

A. Yes; But they are always considered as markets, and put on about the same basis for trade in our country.

By Mr. Fifield:

Q. Have you compared our rates between St. Albans, Ogdensburgh and Boston, with the rates on the Delaware & Hudson Canal Company?

INTER S.

A. Yes sir.

Q. On the other side of Lake Champlain running north and south?

A. Yes sir.

Q. How do our rates compare with theirs?

A. They are practically the same.

Q. Have you compared these rates from Ogdensburgh to Boston with the rates on the Chicago and Alton, for like distances on interstate business?

A. Yes sir.

Q. What is the result?

A. Ours is much lower.

Q. How much?

A. Twenty to thirty per cent; the roads I compared run from twenty to fifty per cent.

Q. Have you made a like comparison with the rates on the Chicago, Milwaukee and St. Paul?

A. Yes sir.

Q. What is the result?

A. About the same.

Q. Twenty to thirty or forty per cent less than theirs?

A. Yes sir.

Q. For like distances?

A. Yes sir.

Q. Have you compared them with the Chicago, Burlington and Quincy?

A. Yes sir.

Q. What about that?

A. They run a little higher than that percentage above ours; it was from twenty to fifty per cent.

Mr. Edmunds. Do you mean on commerce passing from State to State? Are these comparisons on interstate business?

A. Yes sir; all of them.

Mr. Fifield, resuming:

Q. Is that the comparative statement you have made up, about which you have been testifying?

A. Yes sir.

Q. Is it made up correctly.

A. Yes sir.

(Statement put in evidence, and filed with the Secretary.)

By Mr. Hoar:

Q. Did you prepare that?

A. Yes sir.

Q. How long did it take you?

A. Some time.

Q. More than thirty minutes?

A. Yes sir.

Q. How long did it take?

A. Several hours; I worked at it at different times as my business would permit.

Q. From day to day?

A. Yes sir.

Mr. Fifield, resuming:

Q. It was stated yesterday by Mr. Mellen that the lower roads had nothing to do with the making of the tariffs between St. Albans and Boston; he is the general superintendent of that road, is he?

A. Yes sir.

Q. Who is the superintendent of traffic, freight?

A. Mr. Turner, H. M. Turner.

Q. So that your relations have not been with Mr. Mellen?

A. No sir.

Q. Who does make the tariff between St. Albans and Boston?

A. The roads in the line.

Q. State how?

A. By deciding what they think are fair rates, and what classification shall govern.

Q. Who decides that?

A. The general freight agents of the road.

Q. Who made that tariff of sixty cents per 100 pounds which is the one complained of?

A. Mr. Prescott and myself.

Q. Who is Mr. Prescott?

A. The general freight agent of the Boston & Lowell.

Q. Who made the modification, reducing the rate to fifty-five cents for first class?

A. The same persons.

Q. Mr. Mellen did not know anything about it?

A. No sir; not that I know of.

Q. When making tariffs between St. Albans and Boston, and Ogdensburgh and Boston, what is the custom in that respect of the agents of the several roads?

A. To meet together and settle upon the tariffs that are to be charged, and the classification to be used.

By Mr. Strout:

Q. Is it not true that Mr. Turner insisted, and has insisted that the rates over the Boston & Lowell should be kept within the Interstate Commerce Law?

A. I don't know; I never have had any discussion with him on that matter.

By Mr. Fifield:

Q. Have they not kept within it between St. Albans and Boston?

A. Yes sir.

By Mr. Hoar:

Q. You say that Mr. Turner is the general traffic manager of the Boston & Lowell Road?

A. Yes sir.

Q. He sat here yesterday while Mr. Mellen testified?

A. Yes.

Q. Do you say that you and the general freight agent, Mr. Prescott, settled the rates to be made between St. Albans and Boston?

A. Yes sir.

Q. Did you have anything to do in settling the rates between Ogdensburgh and Boston?

A. Yes sir.

Q. Did you and he settle them?

A. No sir.

Q. Who did settle them with you?

A. Mr. Owen and the other general freight agent, in the line; he represents the Ogdensburgh & Lake Champlain Railroad.

Q. You represented the Central Vermont, the lessor of the Ogdensburgh?

A. Yes sir.

Q. Who are the other freight agents?

A. I am the other freight agent.

Q. Who are others in the line?

A. Below our road?

Q. Yes.

A. Mr. Prescott, and Mr. Barrett, of the Concord.

Q. So that you four, Mr. Owen, Mr. Barrett, Mr. Prescott and yourself, settled the rates between Ogdensburgh and Boston?

A. Mr. Barrett was not there; I said it was the practice for them to settle the rates; in this

case Mr. Prescott, Mr. Owen, and myself settled the rate and the classification.

Q. Has that been reduced since the time it was reduced to St. Albans?

A. Yes sir.

Q. When were they reduced,—these Ogdensburgh rates?

A. No sir; they have not.

Q. The only rate you have reduced is the St. Albans rate?

A. No sir; the block between Essex Junction and Rouse's Point.

Q. But the block which comprises the Ogdensburgh Railroad has not been changed?

A. No sir.

Q. If you and Mr. Owen, and Mr. Prescott settle the rates between Boston and Ogdensburgh, who settles them beyond that point to Detroit and Lake Ports?

A. I suppose Mr. Porteous, but I don't know anything about that business; I have nothing to do with it.

Q. Not so far as they are carried over your road?

A. No sir.

Q. Never attended any of the meetings?

A. No sir.

Q. The Central Vermont interests are looked after by Mr. Porteous in that respect?

A. I suppose they are.

By Mr. Edmunds:

Q. I think it was stated by Mr. Porteous yesterday that you would be the person who would know about the divisions of these companies for this business?

A. No sir; I don't know that.

Q. Did you make any examination of the tariffs of any other lines than those you have given on this paper?

A. No sir.

Q. How came you to take those particular ones?

A. Because they were leading roads.

Q. You took the Passumpsic?

A. Yes sir.

Q. And the New York, New Haven & Hartford?

A. Yes sir, that is, our line with them; I took that line.

Q. Did you take any other New England roads?

A. No sir.

Q. You omitted the Boston, Hartford & Erie, as it used to be called?

A. Yes sir.

Q. Crossing your line in Connecticut?

A. Yes sir.

Q. That has connections for western business with the Erie Railroad?

A. I suppose they have.

Q. Have you not a reasonable, general railroad knowledge of the fact?

A. Yes sir.

Q. You omitted the Boston & Albany?

A. Yes sir.

Q. And the Fitchburg and Hoosac Tunnel?

A. Yes sir.

Q. You omitted all the other roads in this part of the country except those two that you selected as being the leading roads of New England?

A. No sir.

Q. You took the Chicago & Alton?

A. Yes sir.
 Q. How long is that road?
 A. I can't tell you.
 Q. How far is it from Chicago to Alton?
 A. I can't tell you.
 Q. What are its connections?
 A. With roads into Chicago, and roads beyond.
 Q. It goes into Chicago, does it not?
 A. Yes; and connects with other roads there.
 Q. Did you make any comparison with the St. Johnsbury & Lake Champlain?
 A. Yes sir.
 Q. What are the western connections of that road?
 A. The Ogdensburgh & Lake Champlain, if any.
 Q. That is to say, the road called the Ogdensburgh, and run by the Central Vermont?
 A. I suppose so.
 Q. How far do you live from Swanton where their line crosses yours?
 A. From eight to ten miles.
 Q. You have been round that country some?
 A. Not much this spring.
 Q. Don't you know that the St. Johnsbury & Lake Champlain Railroad has no western connection unless it goes over the road you control, or over the Grand Trunk Railway?
 A. Yes sir; if they do any western business.
 Q. It must be either over the Ogdensburgh Railroad, or the Grand Trunk Railway?
 A. Yes sir; or the Missisquoi, via Richford and the Southeastern; they cross that road at Sheldon.
 Q. Did you compare at all with the New York Central rates?
 A. No sir.
 Q. Have you any idea how they compare with those?
 A. I have not.
 Q. Did you compare with the Rome, Watertown & Ogdensburgh Railroad from Niagara Falls eastward to Lake Champlain?
 A. No sir.
 Q. That arm of the Watertown road would strike Lake Ontario as the Central Vermont & Ogdensburgh would on the lake, only it strikes it at Watertown?
 A. Yes sir.
 Q. And it strikes the foot of Lake Erie, substantially at Niagara Falls, and connects with the Canada Southern, and the Grand Trunk Railway and the Lake Shore Railroad at those points, would it not?
 A. I suppose it would.
 Q. Did you compare with the Erie Road?
 A. No sir.
 Q. Or the Pennsylvania?
 A. No sir; and I have not their tariffs to make a comparison.
 Q. Had you any other western tariffs except the Chicago & Alton and the other ones that you named?
 A. Yes; we had their tariffs.
 Q. How many?
 A. A great many.
 Q. You did not look into others?
 A. No sir.
 Q. You do not know how they compare?
 A. I took the three leading roads; three of the strong roads, west.

INTER 8.

Q. Did you compare with the Delaware & Hudson?

A. I did.

Q. Have you that in here?

A. Yes sir.

Q. Did you compare with the Delaware & Hudson rate for western traffic, or only for the traffic going along on the west side of the lake?

A. I compared the rates on their road with our rates for traffic that I have charge of.

Q. That you interchange?

A. No sir; traffic of a like nature; that is business on that road similar to the business that I have charge of.

Q. What do you mean by that? What do you have charge of?

A. Of the local traffic of the Central Vermont.

Q. By that you include traffic that comes into Vermont from other States, for places in Vermont?

A. Yes sir.

Q. And that which starts in Vermont and goes to other States.

A. Yes sir.

Q. Your comparison with the Delaware & Hudson, then, was between points on that road and Boston?

A. Yes sir.

Q. Going to Boston by what line?

A. Mechanicsville and the Fitchburg, and Eagle Bridge.

Mr. Edmunds. I give notice to counsel on the other side that I shall ask to refer to some large map of the United States to show how, geographically, these roads are situated, what would be the geographical nature of the business they perform, and where the lakes lie, etc.

Q. I notice that this table does not show on its face, apparently, what the dates were of the printed tariffs from which you made this up; it is dated August 17, 1887; is that the date of the tariffs from which you made this up?

A. I don't know whether that was the date of the tariffs or not, but the statement was made up from the tariffs in force at the time we made up the statement; I made up that statement a week or two ago.

Q. Is that in your writing?

A. No sir; it is one of my clerks.

Q. Then this is not your composition?

A. It is by my direction and consideration.

Q. None of these papers are your actual work?

A. Yes sir; some of them are.

Q. You don't know what that date is?

A. That is the date we made up the paper.

Q. State whether the statement was made up from the last tariffs of the roads compared with?

A. Yes sir; from the last tariffs I have.

Q. Do you know how late those tariffs are?

A. Some of them dated within a few days of the time of making up the statement.

Q. Well, take the oldest one.

A. I could not tell you the dates, but the tariffs will show.

By Mr. Haskins:

Q. State whether you have verified these statements since they were made up.

A. Yes sir.

Q. Look at the second statement, a comparison of the rates of the Boston & Lowell over the Passumpsic Railroad to New York and the Central Vermont to New York; now, what is the distance from St. Johnsbury to New York?

A. This says 295 miles, by the way of the Connecticut River, and New York and New Haven line.

Q. How do you get that distance 295 miles?

A. We use the mileage that the tariff gives.

Q. You did not use the mileage shown by the official guide?

A. No sir; it is a mileage that has been adopted.

By **Mr. Fiffeld**:

Q. You say you have verified this statement on the table there.

A. Yes sir; as far as I can verify it any.

Q. You have no doubt of the correctness of it?

A. I have not any doubt; there might be a clerical error, but I do not know of any.

Q. Are you familiar with the roads that Senator Edmunds has referred to, the New York, New Haven, and the Fitchburg, etc?

A. Somewhat.

Q. Do you think it is a fair comparison, the rates they make with the rates we make?

A. I do not think it is fair to compare them.

By **Mr. Haskins**:

Q. Don't you get at that by taking the distance from St. Johnsbury to the most northern station of the New York rate or New York block, for instance Springfield?

A. No sir; there was a tariff No. 18 of the Connecticut River Railroad with the mileage, and we took the distance from that.

Q. Claremont Junction to South Vernon or Brattleboro is one group?

A. Yes, I think so; I don't know exactly, I do not exactly remember.

Q. And from there to Springfield, and then from Springfield to New York is it not?

A. I suppose so; I do not exactly remember.

Q. State whether stations on the western roads are grouped together in the same way?

A. They are on some roads.

Q. Not on all of them?

A. Yes; more or less on all of them.

Mr. S. C. Shurtleff, of Montpelier, addressing the Commission in regard to the Montpelier & Wells River Railroad, said:

The road I represent is not in this petition, and I do not know whether we shall be entitled to be heard in this matter. The road does a local and joint local business. The road was built to open a line from Montpelier to Boston; if the rates on the Central Vermont are lowered, the rates on the Montpelier & Wells River Railroad will have to correspond, or go out of the business. I offer to show what the rates are on that road, and what the road has earned since its re-organization; it is only thirty-eight miles in length.

By the **Chairman**:

Q. What is your relation to the road?

A. I am its attorney and a director.

Q. Do you wish to come in and be made a party?

A. I don't know that I am entitled to.

The **Chairman**. There can be no objection to receiving any testimony, and if you wish to be made a party to this proceeding, by consent all around, it can be done now; I do not see that it will embarrass the proceedings. (Respective counsel intimated they had no objection).

Commissioner Walker. Does your road deliver freight to the Central Vermont at Montpelier?

A. We do some.

Q. And receive some that way?

A. Very little; our Boston freight comes by way of the other line.

Q. Is there any particular point in which your rates are affected by the question made here?

A. In this way; the rate from Montpelier to Boston is fifty-five cents per 100 pounds; if the Central Vermont have to reduce their rate, we shall have to do the same.

The **Chairman**. The matter can remain open until after the recess, and you can intimate what course you elect to pursue.

J. Gregory Smith. Called on behalf of respondents, sworn, testified as follows:

Examined by **Mr. Fiffeld**:

Q. You reside at St. Albans?

A. Yes sir.

Q. How long have you been connected with the Central Vermont Railroad?

A. Since 1858.

Q. I believe these roads originally were the Vermont Central and the Vermont & Canada Railroads?

A. They were.

Q. And for a number of years, from 1856, I believe, they were in very heavy litigation?

A. Yes sir.

Q. They were re-organized in 1883?

A. 1883-4.

Q. They were separate roads in the first instance?

A. Yes.

Q. The Central Vermont running from Windsor to Burlington, and the Vermont & Canada from Essex Junction to the State Line when they were reorganized, under what name were they reorganized?

A. The Consolidated Railroad of Vermont.

Q. What was the capital of this new company?

A. The capital itself was made up of a great amount of the first and second mortgages, amounting to \$1,000,050.00. The first mortgage was put in at twenty, and the second at ten, and the Vermont & Canada at 83½. Then the trust debt was \$7,000,000.

Q. What is the present mortgage?

A. Seven million dollars.

Q. What is the stock of the consolidated company?

A. One million and fifty dollars.

Q. Of the consolidated company?

A. Yes sir; \$700,050 of preferred stock and \$300,000 of the common stock.

Q. And this reorganized company leased their road to the Central Vermont for ninety-nine years?

A. Yes sir.

Q. And then it went to Central and Vermont Vermont Railroad?

A. Yes sir.

Q. What did it cost to build that road, and equip it as it is to-day?

A. The original cost?

Q. Yes; take that view if you please?

A. I have not any data here; I could give you the exact cost if I had; it was between \$15,000,000 and \$20,000,000.

Q. Since its reorganization has the road been able to pay anything more than the interest on its bonds and its taxes?

A. It has not.

Q. You heard the statement read by Mr. Lucas yesterday?

A. Yes sir; I did not quite answer your question correctly; it has only paid its interest and taxes; whatever it has earned more has gone into the improvement of the property.

Q. Then there is the stock of the Central Vermont, which is the lessee; have they paid any dividends?

A. No sir.

Q. What is the amount of their stock?

A. One million dollars.

Q. I was about to ask you if you heard read the statement of Mr. Lucas yesterday, of the income, etc., of this road in 1886?

A. Yes sir.

Q. Whether you believe it to be correct?

A. I do.

Q. We were talking about the Central Vermont. Were they the receiver of, this road for a number of years?

A. Yes sir; the Central Vermont was organized in 1878, and appointed receiver the following year.

Q. Down to what time did they continue receiver?

A. Until the reorganization.

Q. Can't you give the exact date the receivership went out?

A. July 1, 1884, I think.

Q. And it was then that the Central Vermont in its corporate capacity took a lease from the consolidated company of that line of road?

A. Yes sir.

Q. When did this road first commence to do a through business with the Grand Trunk Railway, and what was the condition of the road at that time?

A. The road commenced running, if I remember correctly, in 1851. That was the commencement of the opening of the roads, and opened in connection with the line from Boston to Ogdensburgh. The Ogdensburgh Railroad, the Vermont & Canada Railroad and the Vermont Central were built contemporaneously and completed about the same time. They opened for traffic in 1851. Their only connection then was with the great lakes, and a line of boats was put in to constitute a line from Ogdensburgh in connection with this line, through to Chicago, and the lake ports. That continued to be the only outlet for through traffic until, I think, about 1863 or 1864; I cannot give you the precise date. The management of the Grand Trunk Railway changed, and the manager who came into the position proposed to open a rail line from Boston by

the way of the Central Vermont and the Grand Trunk Railway, and the Michigan Central Railway. The Grand Trunk Railway then terminated at Detroit, and the Michigan Central was its western outlet. It also had connection with the Lake Shore Road. The Grand Trunk Railway at that time was a broad gauge road and the rest of the system was all narrow gauge. Various appliances and methods had been suggested and brought to the notice of Mr. Brydges, then the manager of the Grand Trunk Railway, and myself for the transfer of property, and several experiments were tried. A patent known as the Baukus patent was finally adopted. It was an arrangement for the wheels to slide upon the axle, and adjust themselves by diverging, and in that way making it possible to transport the freight in through cars without change of freight, or changing the bodies of the cars from the narrow tracks to the broad. That proved itself satisfactory to the managers of the line and was a success, although attended with some expense. It was adopted, and the business was done for some time on that basis.

The Grand Trunk Railway was not then in a condition to change the gauge of their road, and pending the period when they would be prepared to change, the question came up of forming a through line across, and what is now called the National Despatch Line grew out of it, which is nothing more nor less than a distinctive name to define the route; there were connected with it at the time the Grand Trunk Railway, the Central Vermont, the Michigan Central, Chicago & Northwestern, Detroit & Eel River and one or two other roads at the west which came into the association. If you please to allow the use of that word and apply it to this; there was a sort of general conference of the managers of these roads who entered into the arrangement to run in connection with this line; the name "National Despatch" was purely a name to distinguish the route, as contradistinguished from the Merchants Despatch; Commercial Express; and the Red, White and Blue Lines, which were running as independent fast freight lines over certain roads; the roads that ultimately came into the arrangement to join with us were pretty much all the roads running from Chicago and Milwaukee west, until now the National Despatch, if you please to continue the designation of the line by that name, has its arrangements through to the Pacific coast, San Francisco, and Puget's Sound, and are running their cars through the roads that come in, except a joint division to the places reached by the line, called the "Billing Points." The western members of the line are the Chicago & Alton, Chicago, Burlington & Quincy, Chicago, Milwaukee & St. Paul, Wabash, Union Pacific, Northern Pacific, and various other roads; the Atchison, Topeka & Santa Fe. They all adopt the bills of lading and way bills of the National Despatch Line under that title, as designating the route the car should take, and its destination, and for the purpose of keeping the accounts for the division of traffic and for the settlement of expenses, and damages, etc., etc., whatever incidental expenses may arise out of a through line; it has no or-

ganization in a corporate capacity, it has no organization as to board of directors; no president, no treasurer, no funds except belonging to the roads over which it runs, out of which car service has to be paid.

The Central Vermont at the outset of its organization was one of the leased lines to Boston; the roads between White River Junction and Boston being at that time four; the Northern, about sixty-nine miles long; the Concord, thirty-five miles; the Nashua & Lowell, fourteen miles, and the Boston & Lowell twenty-five or twenty-six; they were absorbed and engaged in their local traffic and relations, and by consent they gave to the Central Vermont, being the longer line—I call it the Central Vermont, but it includes the Central Vermont and the Vermont & Canada, which was leased perpetually to the Central Vermont—and the line was known as the Central Vermont Line; these roads between White River Junction and Boston, being independent organizations, and all being short lines, by common consent gave to the Central Vermont the control of the business for all points above those roads from White River Junction, north and west, and in all the matters pertaining to the traffic of those roads. The Central Vermont was the main party in developing the business generally, the roads below us sharing in the line and taking their proportion of the traffic for the through business; the joint local business, as I understand it was always a matter of agreement between the roads, what we call joint and local, that is originating at our stations going to Boston, or originating in Boston and coming to stations on our road; that is designated as our joint business and by a little stretch of authority, and for convenience sake, without designating it joint and local, to separate it from the purely local; in that business the roads below have been in consultation as to tariffs, divisions, and settlements; they have been in joint association with the Central Vermont, although the Central Vermont has the principal management of it, or did have until 1881, there was always more or less contention on the part of the short lines about the settling of little accounts and expenses and questions of detail; and the separate roads sometimes could not agree among themselves, and in 1881, we assumed the management of that business and maintained those expenses under an arrangement which was agreed upon between them and us by which practically the four roads from White River Junction to Boston were to treat with us as one road, that there might be one party to settle with, and one party to make our divisions with at White River Junction.

In time it came to the establishment of this through business; they, still being four short roads, committed the management of the business to the Central Vermont Railroad; the Central Vermont, by vote of its directors divided the business, and constituted the departments of it, one to be denominated the through traffic, which was an organization by itself, with an independent arrangement, to be conducted on an entirely different basis from the local traffic which was put into a department called the local department, of which Mr. Chittenden was

made the general superintendent, and that was confined to the business originating on our road going to Boston and *vice versa*; there arose a mixed question between those two departments for business coming from the West on the long haul, to local stations on our road, and *vice versa*; although the amount of traffic from local stations on our road to Chicago and the West was very small as compared with the traffic coming East to be distributed to local points; very little of the products of Vermont go west for a market, most of it goes East, while Vermont finds her largest sustenance in traffic from the West, bread stuffs, grains, meats, etc., etc. To aid and favor the citizens of our own State we varied the rule which had existed, of charging local rates from the west to local, non-competitive points, and all our points on our own road were non-competitive; it seemed to be a hardship upon the people and the farmers of the State—and they constitute the great bulk of the population of the State; and we gave to them, by consent of the lines west of us, what was known as the Boston rate; placed them in the position of availing of the competitive traffic between other lines, so that they shared in the advantage of whatever was the rate through to Boston from the West growing out of railroad quarrels; in other words, making every station on the line of our road, a Boston point, so far as the rate on freight from the West was concerned.

Q. How much of the wheat, flour and corn that is consumed in Vermont comes from the west?

A. I cannot give you the percentage; the grain and flour in Vermont is very small; it is a large dairy State, and there is a small proportion of the bread stuffs, and cereals raised in Vermont; they depend for their support mainly on their dairies, so that the food products brought from the West is very large.

Q. How long has this practice been in force, to bring this western product into Vermont?

A. It started very soon after I came on to the road.

Q. Go on with the statement about the through business?

A. The National Despatch Line was made up by these roads, not by organization but by common consent, using and adopting the name as a distinctive name. As the line increased in importance its business increased, and it became necessary to provide cars for the business. The equipment of the Central Vermont at that time was confined principally to the supply for local use, as was the Ogdensburg, and also the roads below. We had no cars or equipment that we could put into that through service. The difficulty was great and hard to overcome. It was difficult to obtain capital to go into cars to supply them, as was the custom then and is now for the fast freight lines, and trunk lines, to supply their equipments largely by outside car companies like the Blue Line, Red Line, Merchants Despatch. All those lines have cars supplied to take through traffic, the roads paying mileage on the cars. We adopted the same rule, but inasmuch as our cars were subject to the difficulty or necessity for this patent to accommodate them to the broad and narrow gauge it was very difficult to obtain outside

capital to go into the cars, unless the managers of the roads showed their confidence in the system by subscribing themselves; and so the managers of all the roads in the line from Chicago to Boston came forward to encourage the organization of what is known as the National Car Company and took some of its stock. The Michigan Central Railway by some of its officers took some. That I think was in 1867-68. It was started first by association, and afterwards by a charter which was obtained in 1871, into which this was merged. The officials of these roads, the Michigan Central, Detroit & Eel River, Grand Trunk, Central Vermont, Northern, Boston & Lowell, all came forward and signified their confidence in this method by subscribing to some of the stock.

Q. The corporations did not enter into it?

A. No sir; it was in their private capacity. No road in the line felt justified in taxing their corporate funds to invest in that manner. This was still an experiment, although it had been successful so far as it had gone. We all took hold and took some of the stock. I took some myself; and I think every manager and many of the directors of all the roads in the through line, to encourage outside capital to come in and equip the roads with cars to do this through business, took some of the stock. The confidence shown by the managers of the roads in the line induced other capital to come in and equip the roads with cars to do the business; and sufficient funds were raised to start with 2,000 cars. That number has been increased from time to time, the Grand Trunk Railway having changed their grade to the standard in 1870, or 1871, a charter was obtained for this association under the name of the National Car Company. They have nothing to do with the traffic or with the National Despatch Line—have no interest in it whatever. They have liberty to take their cars and put them on any other road, if they see fit to. They run over the Lackawanna Railroad and the Erie, and they are paid for by the roads that use them. It was designed to keep them in the line known as the Grand Trunk and Central Vermont Line.

By Mr. Strout:

Q. Right here, to save any cross examination—is it not true while the directors or some of the officers of the Grand Trunk Railway took this stock, that afterwards they thought it was better for them not to hold it, and that they afterwards sold it?

A. Yes sir.

Q. Is there to your knowledge today any officer, of the Boston & Lowell, the Northern, or the Concord, that has any stock in that Company?

A. I have personal knowledge of the first statement you made as to the Grand Trunk. That road felt, as we all felt, that the officers of the road, if there was any profit in the business, that the officials of the road ought not to be engaged in it. We felt so ourselves; and if we could have done so, we should have changed it. Their directors took the matter up and advised that their officers be purged of any relations outside whatever, and they appropriated money to purchase their quota of cars per mile, dividing it into a mileage basis. That

they should pay for the cars out of their funds, and own their cars, and still keep them in the National Despatch Line.

Q. Have you any knowledge that President Morey, or any of the directors of the Boston & Lowell own any stock?

A. I do not know of my own knowledge. I do not think Mr. Morey or the present managers now do. General Stark did when he was there. I don't know that I have seen the list of stockholders for twenty years.

Q. As this line grew up, whether any controversy arose between it and the Trunk Lines?

A. Each line running from east to west, at that time was running on its own hook, to get what business it could; and the tendency was to demoralize things. Sometimes it happened there were short crops in the West and a falling off in the bulk of freight. The roads hated to have their cars put into sidings. It was at such times considered better to take less rates than to disorganize their lines, and hence rates went down. That increased and intensified the competition for freight, and every road at that time was running for what it could get. That was always so until what was known as the Trunk Line Organization was made up. I think that was in existence before the Boston & Albany was consolidated, while it was the Western Massachusetts.

Mr. Hoar. Before 1867?

A. Yes; I am sure it was before the reorganization of those two lines.

Every road was on the market to get the business, and in the struggle and competition, we being a longer line and occupying more time in the transit of freight, we found it necessary to go below the other roads in rates. If we took freight at a less rate than the shorter lines took it and at what in our minds was a fair differential, they would come down to our rate, and we would fall down with another differential—they would drive us down and compel us to reduce, as they did. This produced disturbances and it led to frequent controversies between the Boston & Albany and the New York Central Line and ourselves, and it led to a great many interviews between the managers of those roads—I had several interviews with Mr. Chapin, president of the Western Massachusetts Road, on the subject of differential rates. It assumed that name as an appropriate one and was always denominated "differential." They felt that we had no right to take a differential; that if we could not stand on an even keel with them, we ought to get out of the way; but we did not take that view.

Then came the Trunk Line Association, composed of the trunk lines. They adopted a series of rules and regulations to which all roads were called upon to conform, such as for instance a union passenger office, ticket office, to have the power to sell all tickets, and no road that sold tickets outside of that was to be permitted by the roads west to share in the business, at the expense of being cut off from connection with that line and the other lines; the pressure brought was very strong upon the Michigan Central & Lake Shore, at that time independent roads, having nothing to do with the New York Central Lines; they were re-

quired to conform to these rules or else they would not be received as connecting roads with the New York Central on the basis of a through ticket arrangement; those roads consented to that and did conform both as to passengers and freight; that led to what was known afterwards and since, as the "rebate" system; the Michigan Central said: We cannot ignore your business, because we take quite a large amount from you, and it is a constantly growing business; we don't want to refuse to take it, and if we adhere to these rules it will virtually amount to that, because you cannot pay the difference between our local and through rate. It was adjusted on the basis that they were to charge us the through billing rates, and that monthly they would settle with us on the basis of our cut rate,—that soon became an open affair, and it led to a vast deal of correspondence between members of the Trunk Line, and of the National Despatch or Central Vermont Line, and led to a great many conferences, and finally resulted in a convention of all the roads, to which the Grand Trunk Railway and ourselves were invited, the first convention we were ever invited to, the first conference with the Trunk Lines; our communications had been with the separate roads previous to that time; that led to so far a recognition of the line, by the way of the Grand Trunk Railway, as to bring an invitation from the chairman of the Trunk Line Association to the Central Vermont and Grand Trunk roads to meet in conference at Niagara Falls on a day set. That was before the organization of the present Boston & Albany, because their road was represented by the then vice president, and Mr. Phillips, then the manager of the Boston & Worcester Road; they were delegates from that line; Mr. Deane Richmond, first manager of the New York Central represented that line; Mr. Corning was then president; Mr. Joy and Mr. Sargeant represented the Michigan Central; Mr. Stone and his superintendent represented the Lake Shore; the roads west of Chicago were all represented. The Chicago, Milwaukee & St. Paul, Chicago, Burlington & Quincy, Chicago & Alton, etc., they were all represented; the policy to be settled was whether we were to be allowed to come in and take part as a trunk line in competition with the other lines, and the basis on which we should be permitted to come in. They were asked by the New York Central Line to refuse to accept us, except upon terms that we should be held to the tariffs that the Trunk Lines agreed upon; we took our position before that convention and as I was requested to take the lead in opening the case, I stated our ground, that we could not maintain equal rates and get the business, at the rates the trunk lines were making, on account of the question of time, which was a great factor in commercial transactions; we were always at a disadvantage in comparison with the other lines in respect to time; even on our ordinary trains we could not make the time they could; so that we must have an allowance—and be permitted to make differential rates; we said if they would fix the rates and fix our—or agree to our differential, we would agree to come in and keep rates on that basis; otherwise we must stand as a free

lance and get what we could. The convention discussed the question at great length, and Mr. Scott, representing the Pennsylvania Railroad, came to me and said he was ready to concede the principle, and that I was just and right, and that he was willing to grant the differential; Mr. King, representing the Baltimore & Ohio, did the same; Mr. Moran representing the Erie Road in the interest of the receivership did the same, and the only question was what the differential should be; that we were entitled to some differential was conceded, except by the New York Central; Western Massachusetts, and the Boston & Worcester; those roads declined.

Mr. Edmunds. Explain precisely what this differential is. Is it that you were to be allowed to carry between the same points for less money than they did?

A. Yes sir, for a certain agreed amount less; the rates were to be fixed and maintained, and then we should not be charged with cutting the rates; that we should be considered as maintaining the rates as long as we adhered to the established differentials. The convention broke up. The New York Central was very indignant at the other roads for conceding the principle, and they declared, Deane Richmond declared, that the whole Trunk Line Organization was broken to pieces, and that they would have nothing to do with it, that they would fight on their own hook; he told me as long as the wheels would hold to the rail they would do their best to drive us out of New England. But from that time it was conceded to us by all the other lines. At a later date the Boston & Albany, and New York Central attended a meeting, and there the Boston & Albany came in and conceded, in writing, to us, the differentials. The first differentials established were ten, eight, six and four.

The Chairman. What are they now?

A. I do not remember exactly; I think it is less than that; the highest is eight, and the lowest four. I understand it is ten to Chicago, and eight to Detroit; we continued on that established basis of differentials, and took the rates they made. I may as well say here, as anywhere, that this line of the Central Vermont and Grand Trunk is never permitted to have any voice in establishing the tariffs east and west bound, particularly west bound; the trunk lines still maintain their organization of which we are not a member, and have no voice in; they make such tariffs as they please, and we adopt them less the differentials. In 1874 a meeting was held in Montreal; there had been a meeting in New York at which it was urged upon us that we could still maintain our business if we would abandon the differentials. We claimed we could not. An arrangement was made at a further hearing at Montreal. We had agreed to maintain the rates as published by them, the tariff rates, and if we failed to get our proportion or percentage of business which was allowed, then the other lines taking it should make up to us what we lost, and equalize matters, so as to get rid of the differentials; they were to make up to us the tonnage; they offered to give us an equivalent in cash which we declined; then they offered to give us our amount in tonnage to be

The Chairman. In brief, the scheme did not work?

A. No sir; Commissioner Fink's report showed there was 17,000 tons our due. We lost our business by attempting to stand on an even keel with them.

The Chairman. What was your percentage of the traffic?

A. Twenty-one per cent.

Mr. Edmunds. How long was that experiment tried?

A. For nearly a year; enough to give it a fair test and show the result of it. It showed a loss of 17,000 tons, which they refused to make up to us. That led to our return to the differentials, and brought this meeting of October 22, at Montreal, 1874. There were present Mr. Bliss of the Boston & Albany, Mr. Rutter of the New York Central, Mr. Hayden of the Boston & Albany, and representatives of the Grand Trunk Railway and Central Vermont Railroad. This is a memorandum of the transactions: (Reading)—

After full discussion, Mr. Bliss and Mr. Rutter assented to the following differential rates on west bound traffic being conceded to the Grand Trunk and Central Vermont routes on Boston and New England freight. 1st, 10; 2d, 9; 3d, 8; 4th, 6 cents per hundred pounds. These figures are based on the Chicago rates which are to govern to other points. The rates from Portland to be agreed upon from time to time, and to be the same by both routes, that the present state of matters shall continue until such time as the proceedings of this meeting have been finally assented to by the various lines in interest, it being understood that where the Boston & Albany Railway have special contracts with parties, the Grand Trunk and Central Vermont Lines shall be at liberty to carry freight at the same rates as the Boston & Albany Railway's contracts less the existing differences, and that there shall be an exchange of special contracts after the proposed arrangements shall have been agreed upon by the various lines interested. On east bound business the Grand Trunk and Central Vermont Companies ask the following differential rates, live stock seven cents; perishable freight seven cents; first and second classes, seven cents; third class, five cents; fourth, nothing. Mr. Bliss offers 6 cents, 6 cents, 6 cents, third and fourth, nothing. Mr. Hickson proposed that if the other lines agreed to a differential of seven cents on live stock, he would meet them on perishable freight, and first and second, and accept six cents per 100. Mr. Bliss offered 6½ per 100, and let the other classes remain as stated by him. After further discussion, it was decided to leave the matter open until Mr.

to it.

Mr. Hoar. We do not concede anything as to this matter; the Boston & Albany may have agreed to something. We do not concede it as the witness states it.

Witness. Subsequently, Mr. Jewett, Mr. Scott, and Mr. King to whom we referred the matter, affirmed the principle as appears by this letter:

Mr. Hoar. This is all rail business you have been talking about?

A. Yes sir.

By Mr. Fiffeld:

Q. How often do these trunk lines meet?

A. I don't know; we are not a member of the Trunk Line Association. I suppose they meet monthly.

Q. From that time down, have the trunk lines dictated these rates?

A. Yes sir.

A. That is, they have made the rates first, and you have accepted them?

A. They make the rates and we accept them, and charge the same less the differential, and maintain those rates.

Q. In consequence of their not making good the 17,000 tons, what happened?

A. As I stated, we returned to the differentials.

Q. And you have continued that down to the present time?

A. Yes sir.

Q. And even last March, who made the rates west?

A. The trunk lines; and we conform to them less the differential.

Q. What was the differential last March?

A. I suppose it was the differential there on that statement you have; I don't know of any change.

Q. You have stated in a general way why you claim these differentials. Explain the character of your road, through what kind of a country it runs.

A. Our road is a mountain road, subject to all the grades and curvatures incident to such a road, and to the climatic influences of a mountain district, snows, frost, ice, etc.

Q. In respect to the taking of west bound traffic, have you got to take it at these rates or leave it?

A. The bulk of the business is east bound, and there is a large percentage of cars return empty.

Q. What percentage is that?

A. I should think more than fifty per cent of the cars go back empty; I don't know but sixty; I cannot say exactly; very nearly that.

Q. Whether you always maintain the rates east agreed upon by the Trunk Lines?

A. Yes sir; we intend to.

Q. You say your road runs through a sparsely settled country?

A. Yes sir; very sparsely. It is a rural, agricultural community.

Q. How is it about the cost of maintaining the road in winter?

A. The cost is in excess of what we can earn.

Q. What is the character of the grades over the Roxbury Heights on the Central Vermont?

A. They are high grades. Those are nearly sixty feet; that is the highest.

Q. Do you have to take extra engines to take your trains over those heights?

A. Yes sir; and the grades are separated over our line, so that we cannot keep auxiliary power to help us over any particular locality. The grades on our Rutland Line are about ninety feet.

Mr. Edmunds. You control the Rutland Road?

A. Yes sir; our grades over the mountain that way are about ninety feet, and the Roxbury grade is fifty or sixty feet.

Q. Do you take this through western traffic at the rates you do except from necessity?

A. No sir; on the east bound we take the established rates, and on the west bound we use the differentials.

Q. Can your roads live without this through traffic?

A. No sir; not and keep up an efficient line.

Q. Can you live with the traffic that is not through traffic?

A. That is what you asked me.

Q. Can you live with the local traffic alone?

A. No sir; that is the proposition; the question is, Can we live without the local traffic? I think we could.

Mr. Strout. You mean local traffic at the rates charged now?

A. Yes sir.

Mr. Fiffeld. What is the state of your road now as compared with what it was when you commenced doing the through business, as to equipment? State whether the road has been equipped and put in good condition to do through business. Compare your road now with what it was when you commenced to do through business. How many engines had you then?

A. I think we had about forty.

Q. How many have you now?

A. About a hundred.

Q. And correspondingly so in cars?

A. Yes, including the national cars.

Q. What is the rail on your road?

A. All steel rails.

Q. Is it in good ballasted condition?

A. Our road is laid with three thousand ties to the mile, and thoroughly ballasted; steel rails of sixty-two to seventy pounds.

Q. Is it adapted to through business?

A. If we were left to depend on local business we could not maintain our road.

Q. What about your equipment?

A. We should have no use for it.

Q. You would have to dispose of it?

A. Yes sir.

Q. You could not pay the interest on your bonds on your local business?

A. No sir.

By Mr. Strout:

Q. Did you say you could live without the local traffic? Did you mean to say that?

A. I answered the question very hastily; I did not quite take in his question. What I intended and had in my mind when I answered the question was this, and I intended to explain before I got through myself without your asking the question: I mean that if we lost, or were compelled to go out of the through business, it must necessarily advance our local business; and if we were to be confined to our local business, we could not sustain our road; that both are necessary for us to carry on and keep up our earnings and meet our obligations. Mr. Edmunds' question was put to me in a flying way, and I answered it without giving it any thought.

By Mr. Fiffeld:

Q. Do you know what the feeling is at Ogdenburgh and along the line in respect to the present rates?

A. I only know from what they say and express themselves to me and to our officials, that they are perfectly satisfied with our local rates; and they realize and appreciate the fact, as they say to me, that if we were to reduce and give up our through business, it would be inevitable that the local rates would have to be raised.

Q. How is it on the Central Vermont Road?

A. I have had no complaints at all. The only one I have had was one that a man brought from Bethel the other day before the Commission, and that I understand has been withdrawn. That is the only complaint I have had, beyond this. The question has often been asked me by shippers of butter and dairy products, why we could not carry freight from St. Albans to Boston as cheap as we carried freight from Chicago to Boston, and I have explained that a good many times to them; and I never found a man yet but that was perfectly satisfied. Even in Convention I have been asked to answer that question, and I have done so. They have withdrawn stating they were satisfied.

Q. Whose money was it that built the roads—the Vermont Central, and Vermont & Canada?

A. It was mostly Boston money.

Q. Very little Vermont money went into it?

A. No sir.

Q. Is there a road in Vermont that has not been foreclosed and reorganized, but one?

A. No sir, I believe not; and on that road they have lost their original stock.

Q. What year was it that you went abroad?

A. 1878.

Q. Did your directors place this matter of through business in the hands of a manager and direct him not to take this through business?

A. One or two of our board of directors thought we could not afford to do the through business at the rates we were doing it; and I always insisted we could not live without it. As I was going away to Europe to be absent some months, we had a discussion on that subject previous to my leaving. Our general manager agreed with the board. I said to them: I shall be out of the way; you can let your manager do as he likes. He cut off the through business. The result was, a telegram

was sent to me to hasten home; that for the first time in the history of the road we had to borrow money to pay our pay-roll. We did not earn enough to pay our pay-roll. It took us a great many months to recover back our business and financial position. They were satisfied the road could not live without the through business.

Q. Have you ever made a computation of the cost of moving through business, after deducting the expenses of it, as compared with the local traffic?

A. I have; I had one prepared;

Q. State what it was, briefly, and state what the result was.

A. A statement was prepared with reference to a hearing before our Legislature, and to settle the question in my own mind as to what we were actually getting on our local traffic, when it was brought up to the condition of our through traffic; I took for example our butter rates from St. Albans and some stations on our road, after deducting the legitimate expenses which do not pertain to transportation. I found, to my surprise, that we were taking butter from our local stations at a less rate per ton per mile than we get on our through butter traffic. When the butter is brought to the condition of the through freight as it passes our stations, we found we were not getting as much for the transportation of butter as we got from the transportation of the through butter; that is, butter from St. Albans to Boston, after bringing it to the point of transportation, did not yield as much as our through rate for butter from Chicago or the West to Boston.

Q. Can you explain why; what basis that was on?

A. Simply on the basis of charging out the actual moneys paid out for maintaining our local stations, and the risks we ran, the work we did, the insurance we paid on our buildings, the maintenance of buildings for the business, clerk hire, stationery, etc., tracking, etc., shunting cars in and out for their loads, getting them back on to the line to where the through freight stands at that station on its way to Boston—deducting these expenses from the price, it did not leave us as much as we got per ton per mile for the same class from the West to the East.

By Mr. Hoar:

Q. I understood you to say that your road was not allowed, you and the Grand Trunk Railway, were not allowed to be members of the Trunk Line Association; did I understand that correctly?

A. No sir; I did not say that; I said the Central Vermont was not.

Q. Is it not a fact that you were often solicited to join, and become members of that association?

A. We were a member for four or five years, and while we have been occasionally invited to be present at some of the conferences as in the case of Mr. Porteous on the 5th of last March, he merely went to learn their action on the Interstate Commerce Law and report to me.

Q. Haven't you been solicited, since you ceased your connection with it, to become members of the association, and declined?

A. No sir; I don't think ever in that form;

INTER S.

never have been asked, and never have asked leave to go in.

Q. Will you state when it was that you went out of the west bound through business? You stated that you went to Europe, and that your road went out of the west bound through business.

A. I went to Europe in 1878; and was gone from the Spring until the Fall.

Q. And it was during that period?

A. Yes sir.

Q. Were your agencies closed up?

A. Substantially; the business was withdrawn; the soliciting was withdrawn and we practically went out of the business.

Q. You did not transact business to the West over your line at the differentials then existing?

A. I think not.

Q. Are you sure of that?

A. From what they told me I feel sure.

Q. Then it was not a matter within your personal knowledge?

A. I know the result was what I stated, in consequence of their policy in going out of the business; they perhaps did business for some particular customers, and brought some grain from the West.

Q. I am speaking of the west bound business.

A. I speak of both; they substantially went out of it.

Q. The testimony you have given in regard to these differentials has been wholly concerning the all rail business, has it not?

A. The controversy arose as to the all rail business, but it has been applied by us to our water line.

Q. You have testified in regard to the all rail business?

A. Yes; the scope of my business has been in reference to that, although we have applied it in regard to the other; always claimed it.

Q. Was there ever any agreement or consent to your taking differentials on the lake and rail business; and if so, when was it?

A. I do not now recall that the question was ever asked me; and I don't know that any complaint has ever come to me that we did apply it there.

Q. Didn't you, as a matter of fact, agree with the other trunk lines not to take a differential on the lake and rail business?

A. When?

Q. That is another question. Did you or not?

A. Never to my knowledge; I don't recollect of an instance, but I will not say that there was not.

Q. Take the year 1879; didn't you then enter into an agreement to charge the same rates on lake and rail business as was charged by the other lines?

A. So far as my own knowledge is concerned I should say no; but I cannot say what Mr. Millis may have done in some of the conferences. He may for some consideration have agreed to it.

Q. Let me read you Mr. Fink's circular No. 158, minutes of meeting held at Commissioner's office May 2, 1879; present Lansing Millis, H. J. Hayden, manager of freight, Boston &

Albany, etc., etc. (Counsel then read the circular to the witness, but a copy was not furnished to the stenographer to embody in these minutes.) Do you remember that?

A. I do not think it was ever brought to my attention. Mr. Millis was intrusted with a great deal of authority in these matters.

Q. You would not say it was not a matter of agreement at that time?

A. I would not; we had no line, as far as the Central Vermont was concerned in 1879; we had no line that year by the way of Ogdensburgh.

Q. When did your Ogdensburgh line start?

A. A year ago last spring, or two years; when we took the possession of Ogdensburgh Road was the first we had a line.

Q. What was the name of it before that time; what was the name of the route?

A. I think they had nothing but wild vessels in 1879; no regular boats and no line running; I think the Ogdensburgh Railroad Company, being in the management of their own road, trusted to the wild boats, as they might casually come.

Q. No line of steamers was running?

A. I think not.

Q. How did you reach Lake Michigan and Lake Superior ports at that time?

A. Through Sarnia and the Grand Trunk Railway. We were not in affiliation enough with the Ogdensburgh Railroad to make a line with them, although we did some business with these wild boats; but no line was established then.

Q. What lake and rail route were you operating in May, 1881?

A. I think there was no line then.

Q. Do you remember this circular No. 371: Office of the trunk line Commissioner May 24, 1881? (Counsel then read this circular to the witness; no copy was furnished to the stenographer.) What do you say about that?

A. It is barely possible; I do not remember the date that the Ogdensburgh Railroad made arrangements with some boats to run by way of Collingwood, and by rail and water from Chicago to Georgian Bay, and thence by rail to Collingwood; thence by steamer to Ogdensburgh. We were not a party to that at all.

Q. Was not your division at that time increased because you had two lake and rail routes, one via Sarnia and one via Ogdensburgh, so that you took one half of the lake and rail business?

A. I don't remember any such arrangement.

Q. Do you say it was not so?

A. So far as my knowledge extends it was not so; that is the year I think that they had the line via Collingwood; we received freight and had our division, but the line was by Sarnia.

Q. At that time Mr. Millis represented your road and took the entire charge of it so far as these meetings were concerned?

A. So far as the details were concerned.

Q. And in settling the divisions between you and other routes?

A. Yes sir.

Q. You say in your answer, signed and sworn to in this case, that you have brought your road into a high state of efficiency for

the purpose of doing this through business; when did you begin on that? As soon as it was reorganized?

A. We commenced before that, sometime.

Q. As a matter of fact you have very much increased your capacity to do business?

A. Yes sir.

Q. And have increased the speed at which you carried freight?

A. Yes sir; and reduced the cost of carrying it.

Q. And you carry it quicker between Boston and the western points?

A. We have made several efforts.

Q. Haven't you succeeded?

A. To some extent perhaps, we have particularly on refrigerator freight; I do not think the time of our ordinary freight has been shortened any; at the time that table was gotten up I think there was a special effort made; but we never have succeeded in doing the business in four and a half days, except on paper; that special effort was made to accommodate the refrigerator business.

Q. What do you say to day is the rate—speed—that you can make over your road to-day from Boston to Chicago?

A. From six to seven days.

Q. You can carry ordinary freight in six days?

A. We can sometimes, under favorable circumstances.

Q. When this differential of ten, eight, etc. was first established, what then was the rate of speed, or time in which you could transport business from Boston to Chicago?

A. I do not think, with the exception of the refrigerator business that we have varied our time, or changed our speed.

Q. At all?

A. No sir.

Q. Then in the increased efficiency of the road you do not think you have shortened the time?

A. I think we have reduced the cost of operating, but I do not think we have on the ordinary freight, via Montreal, changed the speed?

Q. I understood you to say that you did think so?

A. I said that on our refrigerator freight, we had.

Q. And you can send ordinary freight in six or seven days?

A. Yes; I think we can make a little quicker than that on refrigerator cars.

Q. Is it not the fact that in the lower classes of freight, the rate is more important to the shipper than the speed—on time occupied in the shipment—on the lower classes?

A. Perhaps to some extent that may be true, if you give certainty at your lower speed; that is, to have it uniform—take grain, from there, if it arrives on a regular time, so that they can make their calculations, I do not know that it makes very much difference to the shipper, if he can rely upon certainty in time.

Q. The lake and rail route is longer than the all rail route?

A. Yes sir.

Q. And it occupies a much longer time in transporting freight that way?

A. Yes sir; very much.

Q. And the classes of freight that seek that route are the lower?

A. Mainly.

Q. And they are induced to that not so much by the time as by the allowance on the rate?

A. That is probably the ruling consideration.

Q. Something was said in that circular about the Northern Transit Company; what was that?

A. That was the line I referred to that was organized by the way of Collingwood by the Ogdensburgh Railroad.

Q. And went over your route?

A. Some of it did, but more other ways; they were thinking of making a line by the way of the St. Johnsbury & Lake Champlain Railroad against us.

Q. You did not attend any meeting that was held concerning the fixing of rates this year?

A. No sir.

Q. The only representative of your road there was Mr. Porteus?

A. Yes sir.

Q. And what you know about it, you got from him?

A. Yes sir.

Q. I suppose all the roads that compete with you for the western business are also competitors with each other, as well as with you?

A. Yes sir.

Q. The business is a competitive business?

A. Yes sir.

Q. And the Central Vermont fixes the rates of transportation so far as its lines are concerned, on through business?

A. Only by applying the differential to the other rates.

Q. So far as the other roads that connect with it, are concerned, I mean.

A. Yes sir.

Q. So far as they are concerned, the Central Vermont fixes the rates at which freight shall be carried?

A. A west bound freight; and the roads in the west fix it on the east bound.

Q. That is what I am talking about—the west bound business?

A. Yes sir.

Q. How long a time has that arrangement with the lower roads covered, by which they consent to your fixing those rates and they taking their proportion?

A. It has always been so, ever since we had a line.

By Mr. Strout:

Q. In relation to this matter of differentials, I understand you to say that it depends considerably upon the speed, does it not also largely depend upon the certainty which shippers have, that their freight will arrive within a given time, where it goes over a certain route; say for instance the Boston & Albany, which does not obtain upon the routes where the differentials were allowed?

A. That is one of the elements.

Q. Is there not a likelihood or chance of freight cars being sided, or being stopped with snow, especially in the winter on this route, that there would not be perhaps to the same extent on the other?

A. Yes sir; the lines competing with us were

INTER 8.

in the habit often, at one time, of making what they called time contracts, of guarantying freight to be delivered on that time; and it was so much shorter than it was possible for us to make, that they would take the business.

Q. Is it not true, taking these refrigerator cars for instance that by clearing your track and putting on motive power enough you can get those cars through in a very comparatively short period of time, and is it not true that that does not apply to the general, ordinary freight?

A. Yes sir; we try to make about eighteen or twenty miles an hour with our refrigerator cars, and the rate of ordinary freight is from eight to ten miles an hour.

Q. Is it not also true that so great is the desire for certainty, as well as despatch, with some kinds of freight—provisions, such as wheats, bread stuffs, go by boat, rather than by through rail?

A. The question of time on that class of freight is not what it is on the refrigerator freight.

Q. Is it not still an element with all kinds, that the shippers want their goods through?

A. If they get their supply with certainty, they can adjust themselves on that class of freight to a long time better than they can on the perishable freight carried in the refrigerator cars; on that they demand prompt delivery; the freight by that line of cars is relied upon to arrive daily to supply the market.

Q. This Sarnia line that you spoke of, the through freight there, was divided between the companies—the railroad company and the steamboat company, was it not?

A. Yes.

Q. And between the two routes?

A. Yes sir.

Q. So that, is it or not any parallel?

A. No sir.

By Mr. Hoar:

Q. Have there been any time contracts, such as you speak of, in the last ten years, that you have known of?

A. I should think there had within that time, but I do not know of any recently.

Q. Since 1878, has there been any?

A. I don't know; I could not say that there has.

Q. Will you tell the Commissioners what you carry on the fast freight, west bound line?

A. We carry dressed beef—

Q. On west bound, I said?

A. Oh! fruits of various kinds; there is very little freight west, except of the perishable kind, fruit or whatever it may be, by the fast freight line.

Q. Don't you think of any other commodities than fruit?

A. I don't know, I do not see the cars; I know that is one kind.

Q. You do not carry grain or bread stuffs?

A. There are no bread stuffs, sent west bound; the grain all comes East, it does not go West; what we call our A. and M. trains, are our fast express freight trains; they may carry some merchandise in their trains, I don't know how that is; they will not carry anything that will affect the car, or impregnate it with any odor or dirt, so as to injure it for bringing

butter and dairy products, poultry, etc., from the West.

Q. How many cars do you haul on those trains, on the fast freight trains, west bound?

A. From twenty to thirty.

Q. That runs every day?

A. Yes sir; it goes whether the cars are empty or full; they are not generally full.

Q. What proportion is that to the whole amount of west bound cars that you send on other trains?

A. It is quite limited; we are doing it all on one train; we make but one express train each way.

Q. You take other freights in that train besides fruits and perishable things?

A. Yes sir; but we cannot carry certain classes as I said; we cannot carry boots and shoes for instance in the refrigerator cars, because the odor left would injure the car for its return purposes, the freight that comes East in it.

Q. You take your differentials just the same on that traffic as on the other?

A. Yes sir.

Mr. Schoonmaker. You spoke of Boston rates to Vermont points on east bound shipments; on what articles are the Boston rates given?

A. Flour and grain.

Mr. Edmunds. Anything else?

A. I think not; we bring flour and grain at the Boston rates.

By Commissioner Schoonmaker:

Q. Do you still give those rates?

A. Yes sir.

Q. Grains are not produced here in Vermont?

A. They do not raise more than enough for their own consumption; corn and oats, not much wheat.

Q. There is no grain exported from Vermont east, I suppose?

A. Very little; occasionally barley and oats, but there is nothing to amount to anything; the products of Vermont are mainly dairy.

Q. Have you any rates from Vermont to Boston, on grain?

A. No sir, except as it comes in under the general classification; we have no special rates, I mean.

Q. Butter is produced in Vermont?

A. Butter and cheese, very largely.

Q. How do your rates to Boston on butter and cheese compare with the rates by your line from the West on the same commodities?

A. The rate on butter from Chicago to Boston is seventy-five cents per 100 pounds, and sixty cents from St. Albans to Boston growing less according to the grouping of rates. I would add that I should have included provisions in my last answer, canned beef, etc., in the freights from the West to Vermont points at the Boston rates.

Q. Does that cover canned provisions?

A. No sir; dressed beef, etc., provisions.

Q. You give the Boston rates to local Vermont points on all that class of freight?

A. Yes sir.

The further cross examination of Governor Smith, by Mr. Edmunds, is postponed until morning, by request of Mr. Edmunds; with this

qualification, this closes the testimony of the defendants.

PETITIONERS' REBUTTING TESTIMONY.

Herbert C. Hall, called on behalf of the petitioners; sworn, testified as follows:

By Mr. Hoar:

Q. You represent at Boston the Yarmouth Steamship Company?

A. Yes sir; I am the general agent; or the firm of which I am a member, are the agents.

Q. A line of ocean steamers between Boston and Yarmouth?

A. Yes sir.

Q. Are you familiar with their business, and the rates given on freight?

A. I am.

Q. Do you quote rates via your steamers from Boston to Montreal?

A. We do not.

Q. Do you ever carry any traffic from Boston to Yarmouth to be sent to Montreal?

A. We sometimes bring freight from Yarmouth that is destined for Montreal up over the railroad lines from there.

(Cross examination waived).

W. H. Kilby. Called on behalf of petitioners; sworn; testified as follows:

Direct examination by Mr. Hoar:

Q. You represent the International Steamship Company at Boston?

A. Yes sir; I am the Boston agent of that company.

Q. How long have you been familiar with its business?

A. Twenty-five years.

Q. Where does your line run from?

A. From Boston to Portland, and Eastport, Maine, and St. Johns, New Foundland; and we have another line running from Boston to Digby and Annapolis, Nova Scotia.

Q. Do you ever take traffic from Boston destined for Montreal?

A. We can, but I have never known of any to be shipped that way.

Q. Do you quote rates that way?

A. We do not.

Cross examination by Mr. A. A. Strout.

Q. Your line of boats is really a line from Boston to St. Johns, New Brunswick touching at these different ports?

A. Touching at Portland and Eastport; and we have another line from Boston to Digby, and Annapolis.

Q. Which goes direct?

A. An outside line, yes sir.

Q. Is there any reason why you could not make an arrangement for business from Boston by your boats and so through to Montreal?

A. Oh we could if people would pay enough for it.

Q. If it was not that the competitive rates are so low, you could make money out of carrying goods from Boston to Portland, and, by way of the Grand Trunk Railway, from there to Montreal?

A. Yes sir; it would have to be a pretty sum they would have to pay us to go around; it is so much further.

Q. Only 110 miles by boat, is it not?

A. From Boston to Montreal?

Q. No; to Portland?

A. Yes; but we never take any freight that way.

Q. You do not as a matter of fact; but if there was a rate high enough, if it were not for the fact that the competitive rates keep down the price, you could do it?

A. As a matter of policy we do not take Portland freights because our boats go further East.

Q. You do not carry freights to Portland?

A. No sir; as a matter of policy.

Q. What is the policy?

A. Our own legitimate business; it would compel us to delay at Portland and that we don't want to do; we don't want to delay there any longer than necessary; and we have always been on friendly terms with the steamboat lines running there, and so we have never carried Portland freight.

C. F. Williams, called on behalf of petitioners; sworn, testified as follows:

Direct examination by **Mr. Hoar**:

Q. You are the representative in Boston of the Portland Steam Packet Company?

A. Yes sir; the agent.

Q. Are you familiar with its business?

A. Yes sir.

Q. Do you quote rates from Boston to Montreal?

A. We have never been asked to quote rates there.

Q. You have a tariff from Boston to Montreal?

A. Yes sir.

Q. What are your rates on that tariff?

(Witness produces a tariff, and hands to counsel).

Q. By what route do you go?

A. By steamer to Portland, thence by Grand Trunk Railway; that is the route we should give a rate by.

Q. Now, state what that rate is.

A. (Referring to tariff.) 45, 40, 30, 23, 20, and 18.

Q. That is just the same as the all rail rate, is it not?

A. I cannot answer for the rail rates.

Q. What volume of traffic do you carry from Boston destined for Montreal?

A. It is very light.

Q. Do you know what the figures are?

A. I could not give you the figures; it is very light.

Q. Between January and June it was some 60,000 pounds was it not?

A. I think you might safely call it that amount, although I cannot say.

Q. Of this year I mean?

A. Yes sir.

Q. Was there not some examination made of your books to see just about how much it was?

A. I did look at it.

Q. It was about thirty tons, was it not?

A. I did not see it added up.

Q. It was added up, was it not, by the young man who came there for that purpose?

A. Yes sir.

Cross examination by **Mr. Strout**:

Q. Then there is an actual route over which freight passes from Boston by water to Portland.

land, and by the Grand Trunk Railway, to Montreal, is there?

A. Yes sir.

Q. And the Portland Steam Packet Company is not in any way connected with, or under the control and management of, any railroad; it is not within the Interstate Commerce Act but it is a separate and independent line?

A. Yes sir.

Q. Is it not a fact that you quote rates from Boston; and do you not quote the National Despatch rates from Boston to Montreal; that is, you carry freight at the same rates?

A. Yes sir; that is, we bill at those rates; but I never gave a rate, never have had occasion to, never have had the question asked me to give a rate to Island Pond; that is all done by the agent of the Grand Trunk Railway.

Q. But you bill at those rates?

A. Yes sir.

Q. So that you are in competition at Boston for freight to Montreal, with the Boston & Lowell road, and these other roads, are you not?

A. Yes sir.

By **Mr. Hoar**:

Q. You have described the competition, haven't you, and the rate you give, which is the same as theirs, and the volume you get that way?

A. Yes sir.

By **Mr. Strout**:

Q. What would the effect be if the rates were raised to sixty cents per 100 pounds? By way of the Boston & Lowell Road—it would go by your route, would it not?

A. It would if we kept it lower.

Mr. Hoar. But you would raise your rates, of course?

A. Yes sir; well—of course, that would depend upon circumstances.

Q. You make money out of it as it is, do you not, on what you carry?

A. I can't say how much money we make out of it.

A. M. Graham. Called on behalf of the petitioners; sworn; testified as follows:

Direct examination by **Mr. Hoar**:

Q. You are from Boston?

A. Yes sir.

Q. What transportation company do you represent there?

A. The Kenawa Despatch.

Q. Operating over the Chesapeake & Ohio Road?

A. Yes sir.

Q. How does your route go from Boston?

A. From Boston via the Providence Road to Providence, thence by steamers to Newport News, and thence over the Chesapeake & Ohio.

Q. How does your tariff compare with that of the Baltimore & Ohio Railroad from Boston to western points?

A. Very near the same.

Q. Have you seen the National Despatch Line tariff for west bound freight?

A. Yes sir.

Q. At the time of the filing of this complaint were your rates substantially the same as theirs to most western points?

A. No sir; I think our rates were a trifle higher then, they taking ten cents as a differential, and we taking eight on first class business.

Q. To Chicago?
 A. Yes sir.
 By **Mr. Strout**:
 Q. How much differential is there on first class freight on your road?
 A. At the present time?
 Q. Yes; say to Detroit?
 A. We have nothing to do with Detroit; this is a southern route.
 Q. Is yours the Chesapeake & Ohio, and via rail and water?
 A. Yes sir.
 Q. Now between sea board cities and western points, north of the Ohio River, how much differential are you allowed—are you not allowed 8, 6, 4, 3, 2, on 1, 2, 3, 4, 5 and 6 class freight on the different classes?
 A. Yes sir.
 Q. Do you quote rates to Chicago?
 A. Yes sir.
 Q. What is the extent of your business to Chicago?
 A. Very little.
 Q. Do you know how much it is?
 A. I could not say.
 Q. What is your route to get to Chicago?
 A. From Boston we would go via the Providence Road to Providence, thence by steamer to Newport News and over the Chesapeake & Ohio Railroad to Winchester, then over the Kentucky Central to Cincinnati and by the Big Four to Chicago.
 By **Mr. Edmunds**: How many miles would it be round that way?
 A. I could not tell you.
 By **Mr. Strout**:
 Q. Your business is chiefly southwestern business?
 A. Yes.
 Q. You solicit more for St. Louis and those points than you do for Chicago?
 A. Yes sir.
 Q. But still your route is open, and it is a competitive one, is it not?
 A. Yes sir.
 By **Mr. Hoar**:
 Q. What were your differentials to St. Louis at the time of the filing of this complaint in May?
 A. Eight cents on first class.
 Q. That is also reached by the National Despatch Line?
 A. Yes sir.

B. D. Webber. Called on behalf of the petitioners; sworn; testified as follows:

Direct examination by **Mr. Hoar**:

Q. What transportation companies do you represent in Boston, if any?

A. The Canadian Pacific Despatch.

Q. Over the Passumpsic and Southeastern Railways?

A. Yes sir; it goes over the Boston & Lowell Railroad to Concord, by the Northern, and Passumpsic, the Southeastern, and by the Canadian Pacific.

Q. What are your rates to Montreal?

A. Forty-five, forty, thirty, twenty-three, twenty and eighteen.

Q. The same as the National Despatch Line?

A. I presume they are; they were last winter; Montreal is included in the tariff of the Canadian Pacific Despatch.

Q. Which is the longest line in mileage, theirs or yours?

A. Our route has been changed recently, within a week or ten days; I can't say; I think there might be thirty miles difference.

Q. Before that yours was the longer?

A. Yes sir; I understand so.

Q. Take it at the time this petition was filed, the first of June say, what was the difference in your mileage?

A. My impression is between sixteen and eighteen miles.

Q. Your line then was sixteen to eighteen miles longer than to Montreal by the National Despatch Line?

A. That is my impression it was at that time; at the present it is thirty miles longer.

Q. The length of your line has been increased?

A. Yes sir.

Q. Do you carry freight to western points?

A. Not to the Central Western States.

Q. Do you carry to Chicago?

A. We do not.

By **Commissioner Walker**:

Q. Anywhere this side of the Pacific coast?

A. Nowhere this side of the Pacific in the United States; we carry to California and Washington Territory.

By **Mr. Strout**:

Q. This line has just opened, has it not?

A. Yes sir; the Canadian Pacific Despatch Line.

Q. How long has it been running?

A. Under the name of the Canadian Pacific Despatch Line since the first day of May of this year.

Q. How long have you had your direct communication with Montreal?

A. Only about a fortnight over our own system of roads.

Q. Is it not true that the Canadian Pacific are providing themselves with western outlets running to Chicago, Milwaukee and to points west in Minneapolis?

A. I understand so.

Q. You know they are, don't you?

A. I know the Canadian Pacific Railway are.

Q. And they are opening up a new route by way of Sault St. Marie?

A. Yes sir.

Q. And the reason that you do not now take freight to these western points is simply that the road has not yet completed its arrangements, is it not?

A. I understand that to be the reason.

Q. And the arrangements your line have to go clear through to San Francisco on the part of the Canadian Pacific is to go by rail to Van Couver, and then down the coast to San Francisco.

A. We now have a line to San Francisco by that route.

Q. Is it not true they are making arrangements to put on steam boats, fast and elegant boats to run freight and passenger business?

A. I cannot answer for that.

Q. And when these western outlets are completed they will be a very powerful competitor, will they not, with the National Despatch Line, as a matter of fact?

A. Yes sir; I think so.

Q. There is no doubt about it is there?

A. I have no doubt about it.

Q. And the Canadian Pacific is a foreign corporation?

A. Yes sir.

Q. With the exception of these few roads, it is entirely in Canada, and from the provinces west?

A. Yes sir, it is entirely in Canada as I understand.

Q. They are in the sense of a competitor to-day but not as much as they will be to these western points when they get their outlets completed?

A. I agree to that.

Mr. Hoar. We have a deposition here, taken by the consent of the other side in order that the witness might return. We now offer it, and I will read it.

Said deposition is as follows:

Before the Interstate Commerce Commission.

I, **William J. Farrall**, of Boston, certify that I am the agent and representative at Boston of the Boston, Halifax & Prince Edwards Island Steamship Company. I have been in the employ of that company, and am familiar with its business, and received all of its freight for the last eighteen years.

During all that time it has not quoted, nor does it now quote, nor has it carried, nor does it now carry traffic from Boston destined to Montreal. We have never had any such application to carry traffic destined to Montreal. Traffic to go over our route and reach Montreal must be carried by us to Halifax, then carted across the city, and thence by Inter-Colonial Railroad Company to Montreal.

We have one boat a week.

[Signed] William J. Farrall.

Arthur Mills called on behalf of the petitioners; sworn, testified as follows:

Direct examination by **Mr. Hoar**:

Q. You are the general traffic manager of the Boston & Albany Railroad Company?

A. Yes sir.

Q. How long have you been connected with the freight traffic department of that road?

A. Since 1878.

Q. Do you remember the meeting of March 1887 in New York City, of the joint committee of the trunk lines?

A. Yes.

Q. Were you present at it?

A. I was there.

Q. What was the purpose of that meeting?

A. It was called for the purpose, as I remember it, of arranging our tariffs to conform with the requirements of the Interstate Commerce Law.

Q. Was Mr. Porteous there?

A. Yes sir.

Q. Representing the Central Vermont Railway?

A. Yes sir.

Q. Was there any agreement made at that time by which the Central Vermont Railroad should be allowed differentials on all rail west bound business from Boston to Chicago and other western points?

A. There was a proposition made by the Commissioner of the freight department of the

Trunk Lines Association; his name is Gilfort. There was a proposition made by him that the Central Vermont on its all rail business should accept differentials at the rate of 8, 6, 3, 2, 2, 2, cents per hundred pounds.

Q. That is from Boston to Chicago?

A. Yes sir.

Q. That you say was proposed by Mr. Gilfort?

A. Yes sir.

Q. Was there any action taken by the representatives of the different lines, when he made that proposition? If so, what?

A. There was some little discussion between Mr. Porteous and the representatives of the other Boston roads who were there, and myself, and I do not think we came to any distinct agreement on the matter, but the impression left on my mind was that Mr. Porteous was to publish his tariffs on his all rail business based on those differentials.

Q. Was there anything said at that meeting about any differentials on lake and rail business?

A. Nothing whatever.

Q. What did the Central Vermont Railroad then do as to rates after that meeting?

A. We found it published tariffs all rail, upon differentials of 10, 8, 6, 4, 4, and 3 cents per 100 pounds to Detroit less than our rates.

Q. So that he published a greater differential on the all rail business than was proposed by Mr. Gilfort?

A. Yes sir; and that was what I understood he accepted.

Q. Did he also publish a differential on lake and rail business?

A. Yes sir.

Q. About which nothing was said at this meeting?

A. Nothing was said about that.

Q. What did you then do about that?

A. I was absent from Boston I think for two weeks and more after the law took effect, and I found on my return that our freight agent had written to Mr. Porteous on the 18th of April, calling his attention to the fact that he had published these tariffs based upon greater differentials than we understood he was ready to accept, and he had a reply I think, in which Mr. Porteous said he had not.

Mr. Field. Where is that letter?

A. It can be produced; I presume it is in Boston.

Q. When you came back and found this had been done, what did you yourself then do?

A. I wrote to Commissioner Gilfort as I recollect it, and I wrote to Mr. Hayden, Vice President of the New York Central Railroad, calling attention to the tariff that the National Despatch Line had published, and trying to find out just what the status of the thing was.

Q. Are you familiar with the history of this differential as it has existed in the past, as claimed to be taken by the Central Vermont?

A. Yes sir; fairly so.

Q. And upon what distinction between them and other carriers was it based?

A. It was based on the theory that at the time we agreed that the Central Vermont Railroad should have a differential on all rail business,—on the theory that the Central Vermont route could not make as good time nor give as good service on freight traffic from Boston to

western points, particularly on the upper classes of freight as the Boston & Albany and New York Central could.

Q. You say it was a subject of agreement between the Boston & Albany and its connections and the Central Vermont?

A. I have not any doubt about it; on the all rail business there were four classes of freight in the classification at that time, and I think the differentials agreed upon were ten, eight, six and four. And there was an understanding that if any fifth or special classes should be added to the specification that the Central Vermont differential on those classes should not be greater than two cents per 100 pounds. The idea of the differential then was that we at that time were supposed to have a division of freight traffic from Boston west among the different roads, and the theory under which this differential was given was that the Central Vermont might be allowed to keep up its share of the business. After we found that this differential gave them a greater than their share of the business it was admitted that they were not entitled to it.

Q. Was there any arrangement between the roads as to a division of tonnage?

A. Yes sir; there have been from time to time arrangements with the Central Vermont as to a division of tonnage.

Q. That is, the differential being a fair one?

A. Yes sir.

By the Chairman:

Q. When that allowance of tonnage was made was this differential still allowed?

A. Yes sir; the Central Vermont, as I recollect it, always, on the all rail business, took off a differential in quoting its rates.

Mr. Hoar, resuming:

Q. That is on all rail business?

A. Yes sir.

Q. Was the differential taken by the Central Vermont Railway at the time there existed this arrangement for a division of the tonnage?

A. It was indeed.

Q. Have you the reports of the trunk line Commissioners on that?

A. I should qualify my last statement that there has been different times at which there has been a division of traffic made. I have in mind a division of traffic in 1884; and at that time I will say that the Central Vermont made its rates based on the differentials to the west. That is the time I have reference to.

Q. Was there ever any agreed differential on the lake and rail business?

A. There never has been by the Boston & Albany within my recollection any agreement to allow the Central Vermont Line a differential on lake and rail business.

By Commissioner Walker:

Q. Have you a lake and rail route?

A. Yes sir.

Q. Where do you strike the lake?

A. At Buffalo.

Q. And has the Pennsylvania a lake and rail route?

A. Yes sir.

Q. And the Erie?

A. Yes sir.

Q. How do the rates on those lake and rail routes correspond with the all rail rates?

A. They are less than the all rail rates.

Q. They are less than the all rail rates, but are uniform with each other?

A. The rates by the several lake and rail routes, except by the Central Vermont, are identical.

Q. How much less than the all rail rates?

Mr. Hoar. I will put in a table that will show, if it is not in.

Gov. Smith. I should like to ask Mr. Mills a question if there is no objection. I understand Mr. Mills to say that during the time as I stated that the differential was suspended during the tonnage division, you say you did not suspend it; will you please state to me why it was, and how it occurred that there accumulated 17,000 tons of freight if we still continue to take the differentials?

A. I do not recall the time to which you refer; if you can give me the dates I can tell you whether it is within my knowledge.

Gov. Smith. This was in 1874?

A. That was before my connection with the business.

Mr. Hoar, resuming:

Q. Now as to this service of the Central Vermont, at present, by all rail; does that, in your opinion, entitle them to any differential on all rail business at the present time?

A. I think not on the lower classes.

Q. Can you tell me what time your freight trains make in the all rail route between Boston and Chicago?

A. I think it averages about five days.

Q. In regard to the lake and rail business; what is it that determines the seeking that route? Is it the cheapness of the rate or the time it takes in transit?

A. My experience is that with the shipper who proposes to forward his freight by the lake and rail route, that the question of rate is paramount in his mind; he will not select that route unless he gets a low rate; the matter of how quick his freight gets to its destination ceases to be the chief desideratum.

Q. It has been stated by Mr. Porteous, as a reason for the differentials upon the lake and rail route over the Central Vermont Line, that there was a difference in the rates of insurance as between Ogdensburgh and Buffalo, in favor of Buffalo; how is the fact about that?

A. I am informed that insurance can be effected upon goods either way at the same rate, whether they go by Ogdensburgh or Buffalo.

Q. Did Mr. Porteous ever make that statement to you before he testified?

A. Yes sir.

Q. Where was it?

A. In his own office late this spring or early this summer, at a meeting that we had there.

Q. What did you do then to ascertain the fact?

A. I asked him to go with me to our down town office, which joined his, telling him I thought he was misinformed on that matter; we sent a man down from there to an insurance broker to ascertain whether the statement which I had made was not correct. I cannot recollect whether that man sent back a letter or a message; it is my impression that he put it in writing stating that he was prepared to insure goods at the same price by either route, whether by Buffalo or Ogdensburgh. That

was the water insurance alone from Ogdensburg to Chicago, as compared with the insurance from Buffalo to Chicago.

Mr. Edmunds. In those cases do you insure only for the water transportation?

A. We do not insure; the shipper insures his own freight.

Q. The insurance is only on the water part of the route?

A. Yes sir.

Mr. Hoar, resuming:

Q. Now, Mr. Mills, do not the records of the trunk line Commissioner show that the Central Vermont agreed not to make lake and rail differentials?

A. Yes sir; they do.

Q. Is it not a fact that this year, upon their tariff, as made this year, that they have taken a greater differential than ever before on lake and rail business?

A. I think I am safe in saying it is so.

Q. That is, that the differential they made when the Interstate Law went into force was larger than it ever was before. Do you know what it is now?

A. Certainly.

Q. Was that schedule or table made in your office under your direction?

A. It was.

Q. What does it show, in general terms?

A. It shows the rate to Chicago, Cleveland, Detroit, Milwaukee, and Port Huron, via lake and rail routes, and via all rail routes from Boston. It also shows rates from Boston to Montreal by the National Despatch Line, and by the Quebec, Ottawa & New England Air Line; that is over the Passumpsic and Southeastern.

Q. And it shows the rates of all the lines; all rail, does it?

A. Except by the Kēnawa Despatch, the testimony of which you have.

Mr. Hoar. We put this statement in evidence.

Q. The several defendants in this case have set up in their answer this: that the motive of the petitioner, etc., etc. (See answers.) State what the fact is about that if you have any such motive.

A. I am very glad to have an opportunity of stating that that is not a true statement.

Q. Was there ever any such motive in filing this petition as an attempt or purpose to break down this line as a competitor?

A. There was not.

Q. What was your purpose and motive in filing this petition?

A. The motive and purpose was that we might get enlightenment under this Law, of the precise meaning of this Law.

Q. How are your tariffs arranged from Boston to these western points over the Boston & Albany Railroad and its connecting lines?

A. They are made up on a construction of that 4th section, which seemed to us to mean that in no case must the rate which was charged over the same route in the same direction to the further points fall below that charged to points within that distance.

Q. Is the whole tariff arranged upon that basis, on that line?

A. It is except in the case of two instances, in both of which we believe we have authority from the Commission, as decided or intimated

INTER 8.

in their decision; I refer specifically to the California business. On that business we have supposed, from what has been said by the Commission, that we were justified in making rates through from the Atlantic to the Pacific at less than those charged to some of the interior points between the Missouri River and the Pacific coast.

By Commissioner Walker:

Q. Are there any exceptions between Boston and the Missouri River?

A. Yes sir; I think we are making a rate from Boston to Pittsburgh by the way of the Lake Shore, and Lake Erie & Pittsburgh Railroads. I believe we charge less from Boston to Pittsburgh than we do from Boston to Youngstown, on the same line.

Q. Do you know of any other exceptions to the Missouri River?

A. No sir; I do not.

Q. Do you know of any other, on the part of the other roads composing the trunk lines?

A. I don't recall any.

Mr. Hoar, resuming:

Q. What is the effect upon you as a competitor for the through business if the Central Vermont line takes this same or a larger differential, and at the same time charges higher rates for its local business than it does for its through?

A. The effect upon us is that the Central Vermont, with the differentials it is now making, particularly on its lake and rail business, it makes rates for western business to western points so much lower than ours that we are unable to compete with them on certain classes of freight; notably on the Chicago business from Boston during the past summer. The Central Vermont, with its two lines, rail and water, has carried the preponderance. I believe I am safe in saying that on Chicago shipments from Boston, if we undertook to meet the Central Vermont, in butter for instance, on the lake line, we have got to reduce our rate from Boston to Detroit; under our construction of the Law we must reduce it, and to Buffalo also; and on the lowest classes of freight from Boston to Albany, and I believe as far east as Hinsdale, Massachusetts, on our own road, in order to make as low a rate from Boston to Detroit with our lake line as the Central Vermont makes by its line.

Q. Hinsdale is east of Pittsford on your road?

A. Yes sir.

I claim that on the lake and rail business from Boston to Detroit the Central Vermont at even rates, on such freight as sugar, etc., can carry a fair share of the traffic; and we are entirely willing that they should carry a fair share of the traffic, but if they carry the bulk of it, we feel that we are driven out of the market on certain portions of freight; and we do not desire to be driven out of the market on any classes of freight.

I can illustrate that by showing just what the fact is. The rate from Boston by the Central Vermont Line of Steamers to Detroit is 41, 36, 29, 20, 17 and 14 cents per hundred.

The Chairman: In what class is sugar?

A. Sugar comes in the fifth and sixth class. The rate from Boston to Buffalo, through which freight would pass to go to

Detroit by our lake line—the rates are 44, 88, 304, 214, 184, and 154; in every case higher than the rates by the Central Vermont water line from Boston to Detroit. Our lowest class from Boston to Albany is fifteen cents per hundred pounds; that being one cent per hundred higher than the Central Vermont lake and rail route rate from Boston to Detroit on the lowest class. Our lowest rate runs East on our road to Hinsdale, Massachusetts; so it becomes a serious question with us. Our rates to Detroit, lake and rail, are 49, 42, 33, 28, 20 and 17.

Q. And as I understand you from each of those points, in the computation of rates you have made to those points, and to all the intervening points, your rates are made in accordance with your construction of the Interstate Commerce Law, as you have stated?

A. Yes sir; you will find no rate on our line from Boston to Detroit that is higher than the rate we charge from Boston to Detroit over the same line; that is, no higher rates to intermediate points.

By *Commissioner Walker*:

Q. Your point is that if you reduce your lake and rail rate to Detroit, you would have to reduce all the way through?

A. Yes sir. And I think it is right to state that when we fairly made up our minds what the law was and went to work to conform to it, it became a serious matter to us to what extent we could continue in the through business; and in order to continue in the through business, under our construction of the Law we were obliged to reduce our local rates something like 20 per cent from Boston to Albany so that we might still keep in the business beyond there and not have those rates fall below the rates charged from Boston to Albany; and even then we did not quite accomplish what used to be the status in Boston. It was common to make from Boston, beginning at Buffalo, the same rates as were made from New York to points West. Under our construction we found that we could not quite accomplish that. I think the first point from which we make the New York rates from Boston now is a station on the Lake Shore Road just east of Cleveland. The rate from Boston to Buffalo now is higher than the rate from New York to Buffalo, made so, so that it might fall less than our rate from Boston to Buffalo.

By *Mr. Field*:

Q. Then really the point of your controversy is to raise the through rate via the Central Vermont so that it shall correspond to yours, and so that there shall be no differential, is it not?

A. It is not. If it were simply a question of the Central Vermont and Grand Trunk Railway making in the western markets lower rates than ours, we should deal with that question without troubling this Commission.

Q. You either want to have them raise their through rate, or you want them to cut down the rate to St. Albans and Ogdensburgh, don't you?

A. I want to know whether this Law is to be construed—

Q. Answer that question. (Question repeated.)

A. It is not.

Q. If you succeed, it is either to lower the

local rates or to raise the through rates, so that the differential will disappear, is it not?

The *Chairman*. Perhaps it is to raise his own local rates.

A. There is no alternative; that is, if the construction that the Central Vermont Railroad is putting on this Law is the correct one, it will apply to our case as well as to theirs. We can meet your rates in the western markets and will, and sustain our rates to local stations.

Q. If there is no reason for differentials over this route, if there is nothing why the shipper had just as lieve at the same rate ship over this route as over yours, what is to hinder you from raising your local rates now?

A. I have no desire to raise our local rates. Why should I? They are high enough now.

Q. Then it is simply to get a decision of the Commission as to maintaining the Law?

A. That is the purpose for which we are here.

Q. And that is just what you are here for?

A. Yes sir.

Q. If the Commission decide we are to put up our rates, or make such a decision that would result in our putting up our through rates, what would be the effect upon the freight, —would it not go by your road?

A. I don't think it would?

Q. Do you say that?

A. I suppose you can make as low through rates from Boston to the west as you see fit to make, but you will have to make your local rates conform to them.

Q. Should we not lose the freight, as we have done before?

A. I have never known of any time when the differential was abolished.

Q. You heard Governor Smith's testimony?

A. Yes; but that was before I had charge of any business connected with the Boston & Albany Railroad Company.

Q. You are not a competitor for business at St. Albans, or for that point?

A. No sir.

Q. Nor at Ogdensburgh?

A. We might become so. We have no tariff there. We could make one if we pleased.

Q. You are not now?

A. We have no tariff there on through rates.

Mr. Hoar. You are like the Canadian Pacific, in that respect?

A. That is it, precisely.

Q. Do you quote rates to Montreal?

A. No sir.

Q. You have no business to Montreal.

A. No sir.

Q. And don't expect to?

A. No sir; still I don't know. We have not now.

Q. You have no reasonable expectations, have you?

A. There is nothing to prevent it; as a matter of fact we do not do that business now.

Q. Have you a copy of your tariffs?

A. Local tariffs?

Q. Yes; and through tariffs?

A. Yes sir.

Q. How do you transport goods from Ware, to and from Boston? Do you transport them by way of Palmer?

A. Yes sir.

Q. Are not your rates from Ware to Boston, less than from Palmer to Boston?

A. Not that I am aware of.

Q. How is it to Nashua? Have you any through rates to Nashua?

A. From Boston?

Q. Yes; or from Albany.

A. Yes; we have a tariff. It does not appear there. We have a joint tariff.

Q. Is not the charge ten cents less for the shorter haul on that route?

A. To Nashua, than for the longer one?

Q. Than for the short one.

A. There is not.

Q. Have you got that tariff?

A. No sir; but I will swear to it. That is, I will swear to it, if our freight agent made up the tariffs as he was directed to, and I have no doubt that he did. I have no tariff here, because under the Interstate Law we have had so many tariffs that I did not bring them all up. I brought what we thought would be essential. Mr. Chamberlin has got it.

Q. I suppose you filed your tariffs with the Commission?

A. Yes sir.

Mr. Strout. We claim there is a charge of ten cents different.

Mr. Prouty. As I understand it, the tariff is made for the Worcester & Nashua, from Albany to Pittsfield. The lowest class on your tariff is fourth class, and the rate is fifteen cents a hundred. You have it on your tariff to carry in car loads of 24,000 pounds for ten cents per 100 pounds from Albany to Nashua?

A. I daresay we do; but we do not charge any more to intervening points. I guess I can explain what you have got hold of—two tariffs. One is a special tariff, and the other the regular printed tariff of the road. We have innumerable sheets of special tariffs, all of which we filed with the Commission, and I will assure you that every one of them is made up on the construction of the Law I have stated. If made up on any other basis, it is a misprint.

Q. Upon your construction of the Law, how does this special tariff differ from the regular tariffs?

A. Well sir; we had on our road at the time this Law went into effect a printed tariff in four classes, and our own classification for freight traffic that had been in use on the Boston & Albany Road for a number of years. Through business in each direction, previous to the passage of this Law, was done under a different classification. We were confronted with the fact that we had got to conform to the law. The through classification was made up in six classes, our printed rates on the Boston & Albany were in four classes. We concluded, therefore, that instead of going to the tremendous undertaking of altering every local rate we had on the Boston & Albany we would deal with the classification as applied to those four classes of rates then in force on the road, and simply state that the fifth and sixth were to be taken at fourth class rates. There were a number of articles in the fifth and sixth classes that required lower rates than fourth class, and so we made up a number of special tariffs, for instance, on hay, and various kinds of iron, from points on our road to other points. But every one of those special tariffs make just as low

INTER 8.

rates to the intervening points as they do to the point further distant.

Q. But they differ from your general tariffs?

A. Yes; they take certain articles out of the classification and make a special rate for them. If we did not do that, the existing rates would be higher than we want to charge on those things.

By Mr. Strout:

Q. Is it not true that you make quotations and rates for southwestern points at a less rate than you do to points this side?

A. Such as what?

Q. Montgomery, Alabama?

A. Do you find those rates on that tariff?

Q. I do not find them on the tariff; but do you not quote rates and make rates for those points?

A. I don't know whether we have a tariff in existence for them or not.

Q. Whether you have any tariffs for them or not; don't you make rates for those points?

A. We do not make rates for points for which we have not a printed tariff, and have not since the passage of the Interstate Commerce Law.

Q. And you don't know whether you make rates there, or not?

A. I don't know whether we have any established rates to Montgomery, Alabama, or not; I don't know.

Q. Nashville, or Memphis?

A. Yes; I think we have tariffs to Nashville and Memphis.

Q. On certain classes of freight don't you quote less rates than you do to intermediate points this side of those places?

A. I should not wonder if we did, under the authority of the Louisville & Nashville case.*

Q. How much is that?

A. I don't know.

Q. Is not the New York, and New England Road a competitor for lake and rail traffic, and have not they carried large quantities of sugar this summer?

A. It carries sugar to the West. It has two sugar refineries located directly on its tracks; consequently it carries sugar to the West.

Q. And they carry in large quantities?

A. In considerable quantities; it was sent by your lake and rail route at your differential rates, this summer.

By Mr. Fiffeld:

Q. Has your road a bonded debt?

A. I don't know whether we have or not.

Q. What is your stock worth on the market?

A. Well, I showed Mr. Hoar a quotation from the New York Tribune, at 218; I don't know what the fact is; I have not been on the market, and do not deal in stocks.

By Mr. Strout:

Q. Your road runs through a thickly settled country; the Boston & Albany proper, and the New York Central?

A. Yes sir.

The Chairman. We know all about the nature of the localities through which these roads run.

Q. And you have a very heavy local trade, don't you?

A. Yes; we have a heavy local business.

Q. And a heavy passenger business?

A. Yes sir; a good passenger business.

Q. And you have many thriving and populous towns and cities along your line?

A. I am glad to say we have.

By **Mr. Hoar**:

Q. Now about the grades on your road; have you any?

A. Yes sir; the worst grade is on the line between Springfield and Washington, Massachusetts, of eighty-two feet; another one from Worcester to Springfield, of fifty-one feet. I do not recollect how far it is, but the one between Springfield and Washington is very long; it begins at the Westfield River, and lasts for a considerable haul.

Mr. Hoar. We put in that table of comparisons; also the tariffs from which they are compiled.

By **Mr. Bragg**:

Q. Does the Central Vermont compete actively with your line on east bound business from the West?

A. Yes sir.

Q. It competes actively, does it?

A. Yes sir.

Q. And has been doing so, I suppose?

A. Yes sir; since the road was first put into operation, I believe.

Q. Has your road had a larger share of that business than the Vermont Central?

A. Yes sir; I presume we carry more east bound freight than they do.

Q. But still there is an active competition between the two roads?

A. Yes sir.

By **Mr. Hoar**:

Q. Do they make the same rates on east bound freight that you do?

A. If they maintain the rates, they do.

Mr. Ffield. Don't they?

A. I am not here to complain about their cutting rates east bound.

Q. (Repeated).

A. At times they have not.

Q. When have they not?

A. Prior to the Interstate Commerce Law.

Q. Have they done so since?

A. Not within my knowledge.

Mr. Hoar. There is no differential on east bound?

A. No sir; the rates are the same on both routes.

Mr. Hoar. I think we have no further evidence.

(Adjourned for the day).

Third Day, Saturday, September 8, 1887.

Arthur Mills, re-called.

By **Mr. Hoar**:

Q. You referred to the appearance of Mr. Porteous before the Trunk Line Association last March, when the proposition was made to him that instead of these differentials of ten, eight, etc., that we should accept eight, seven, etc.; and that afterwards, when you found he was making these greater differentials, that you wrote to Mr. Gilfort. Have you the reply of Mr. Gilfort?

A. Yes sir; I have a copy of it here.

Q. Will you please read it?

(The witness then read the letter to the Commissioners. No copy was furnished to the

stenographer, who was informed that it had been handed to the Commission.)

Mr. Strout then introduced copies of National Despatch way bills.

John Porteous, re-called, says:

When these way bills are signed they are signed by the Boston & Lowell, I suppose; I never saw any signed.

By **Mr. Edmunds**:

Q. Don't you know who does sign it?

A. I don't know that I ever saw one signed.

By the **Chairman**:

Q. If it is signed by anybody, it is signed by the Boston & Lowell?

A. Yes sir.

Q. This is given to the shipper?

A. Yes sir.

Q. When the goods go by the National Despatch Line as well as when they are received generally?

A. Yes sir.

(The foregoing refers to exhibit B.)

Q. Mr. Schoonmaker does not understand this as I do; let me ask you—when goods to be shipped by your National Despatch Line are delivered to the railroad company, they give the shipper this paper? (Ex. B.)

A. Yes sir; the shipper signs it here (indicating), and leaves it there with the railroad company, and he tears off the bottom.

Q. This lower part is a receipt; that is given to the shipper by the railroad company, and this is given whether the goods are to go by the National Despatch Line, or to be sent by the company to points on their road?

A. To be sent to St. Albans, for instance, you mean?

Q. Yes.

A. Yes sir; or any Central Vermont station.

By **Commissioner Schoonmaker**:

Q. Suppose the goods are to go by the National Despatch Line, then how is it?

A. Then the shipper gets that receipt, and he takes that to the National Despatch city office and gets a bill of lading; as he hands the receipt to the agent of the National Despatch Line he gets in return a bill of lading of the National Despatch Line.

The **Chairman.** He gets this receipt from the railroad company; is that signed by the agent of the railroad company?

A. Yes sir.

Mr. Edmunds. I want to have put in this bill of lading that is filled out.

Arthur Mills, re-called.

By **Mr. Hoar**:

Q. Please state the proportion of freight going West, in comparison to that coming East; take the year 1886.

A. In 1886, coming East, 2,504,510 tons; going West, 1,001,966 tons; that is the entire tonnage coming East and going West in that year.

J. Gregory Smith, re-called:

We have aimed at carrying out the Law in accordance with the advice we have received, and according to our construction. If the testimony here shows that we have erred, we stand ready to be corrected and to conform to the Law; but in the absence of any specific complaint from these parties, collective or in-

dividual, and of any notice that they have any complaint, we are not here prepared to take up any specific case and show whether it comes within the Law or not. Our rule has been to conform to the Law; and if the circumstances and conditions under which we are placed do not bring us within the Law, and the Commission so indicates, we will endeavor to bring ourselves within, and try and comply. We have endeavored to make our rates reasonable and just, and to conform as well as we could with the provision in the fourth section.

The **Chairman**. Do you mean that you propose to reduce your rates, so that you charge no more for the shorter than the longer distance?

A. I mean we are ready to reduce our rates if the circumstances and conditions developed by the testimony in this case do not justify us in adhering to the present rates. Other than that I claim no specific advantages for the Central Vermont, but we are ready to conform to the general rule you lay down applicable to every road.

Cross examination by **Mr. Edmunds**:

Q. You stated that the money that built the Central Vermont Road was not Vermont money, if I understood you?

A. I did not state it as broad as that, or did not intend to; I said principally from Boston.

Q. Is it not true, Mr. Smith, that from Windsor, which was then the end of your line, and is yet, strictly speaking, to Burlington, and from Burlington to St. Albans, on what was called the Vermont & Canada, that the people all along, from one end to the other, took stock according to their ability—all the leading farmers, merchants, and everybody else?

A. Not as broad as that; there were subscriptions to the stock, in proportion to the aggregate amount of the cost of the road; it was very small.

Q. But in proportion to the aggregate wealth of the subscribers, was it not fair and liberal?

A. I do not think in the whole State of Vermont there was \$100,000 put in; it would not exceed that amount.

Q. (Repeated).

A. I don't know that there was.

Q. Have you all the stock books?

A. I don't know whether they were burned or not; I have not seen them; I don't know that I ever saw the stock book of the old Vermont Central.

Q. There were subscribers in nearly every town, were there not? You stated the stock was all taken?

A. Yes sir.

Q. You stated that the National Car Company supplies cars for this through line. To what extent? How many?

A. It was stated here, I don't know myself, personally; it was stated 8,750.

Q. How many were furnished in the first place?

A. I think those that were put in experimentally; I think it was two or three hundred, put in by other parties than the car company.

Q. Did the car company at one time get a pretty large bunch of cars from the Central Vermont, or whatever the name of the concern

INTER S.

was at that time, that was operating the concern?

A. No sir; never a car. They were all purchased and made by the Michigan Car Company; the entire equipment both early and late.

Q. Were no cars ever turned over to the National Car Company or to somebody in their behalf that had before that time belonged to the trustees or managers, or receivers, or whatever the operating gentlemen were called?

A. Never a car to my knowledge; I never was asked to turn one over, and never knew that there was.

Q. Then all the cars that the National Car Company have, or had, have been obtained by them directly of outside parties?

A. Entirely.

Q. And with their own funds?

A. Yes sir.

Q. What is the amount of the capital stock of the National Car Company?

A. I do not know that I can state that. I have nothing to do with it.

Q. State as near as you can.

A. I think it is \$2,000,000; I don't know.

Q. How much do you think it is, Governor?

A. I have no knowledge on the subject; I don't know. My son suggests it is \$3,000,000; I only know so far.

Q. Did you ever hear the quantity of the capital stock mentioned?

A. I don't know that I have for years, and I don't remember that I ever did. I remember the capital first fixed was \$500,000; it has been increased since, and I have so little interest in it I don't know.

Q. Did you take any of the increased stock?

A. I think I did.

Q. You paid in on that stock?

A. I suppose I did, whatever was called for.

Q. But you don't know how much.

A. No sir; I don't remember how much?

Q. Did you ever get any dividend?

A. Yes sir.

Q. How many dividends?

A. I think I have received dividends regularly on my stock.

Q. Annually, or semi-annually?

A. I think quarterly.

Q. How much per quarter?

A. It is 4 per cent per annum; it is 1 per quarter; they are paying now 4 per cent.

Q. How much did they pay last year?

A. Four per cent.

Q. How much before that?

A. Four per cent.

Q. Never any more?

A. Yes sir; when the cars were new and the maintenance light, I think they paid as high as ten per cent; then it fell to eight; then six, and now it is down to four.

Q. How many years has it been going? This car company, I mean?

A. I think it was organized in 1871.

Q. About fifteen years?

A. About that.

Q. When was the capital stock increased?

A. That I cannot tell you; I don't know when it was; I think the first stock, if I remember right, was \$500,000; I knew more

about it at that time than I have since; from time to time it has been increased; I should think the last increase was five or six years ago. Then it was carried up to what it is now.

Q. Do I understand you to say—supposing it to be \$3,000,000, now—do you say that the whole of that \$3,000,000 has been paid into the car company treasury in actual cash?

A. I did not say that.

Q. What is the truth about that?

A. The first stock, I think, was issued at fifty cents on the dollar; I state from imperfect knowledge; I think the next stock was at seventy-five cents, and after that it was raised at par.

Q. What is the arrangement in regard to paying that National Car Company for the use of the cars by this line or anybody else who hires them; what is paid, and on what basis?

A. Three quarters of a cent per mile run of the cars; that is per car.

Q. Without regard to whether they are loaded or empty?

A. Yes sir.

Q. Wherever it is going?

A. Yes sir.

Q. Now, in regard to dividing that payment; how much of that is paid by the Lowell road? Is it according to the length of its line—that is, the car service?

A. They pay according to their mileage as every road does, according to the length of miles in its road.

The **Chairman**. Do you mean the length of the road, or the distance that the car runs over that road?

A. The length the car runs over the road; if it runs the whole length it gets the whole mileage of the road.

Mr. Edmunds, resuming:

Q. So that each one pays for the car service according to the service of the car; what it has done on that road?

A. Yes sir.

Q. Who is the president of the National Car Company?

A. James R. Langdon of Montpelier.

Q. One of the managing directors of your line?

A. He is a director but has nothing to do with the management, other than an ordinary director.

Q. Now, about the divisions; is that the book of divisions in force at the time that it bears date? (Handing book to witness).

A. I don't know whether it is now in force; it was at that time (Marked Q.)

Q. **Mr. Porteous** says it was in force at that time; is that so?

A. Yes sir.

Q. I suppose you adopt his statement about that and about these other papers?

A. Yes sir.

Mr. Edmunds. I should like to put this in, that is what we think proper to go in, out of this batch; a lot of them are immaterial; I wish to put in this book of divisions.

Q. Tell us in respect to these divisions on first class freight that you carry from Detroit or Chicago, by the way of the all rail line from Boston, over the Boston & Lowell, how much the share of the Central Vermont is per ton.

A. I have not the slightest knowledge; I do

not carry those details in my department; these divisions are made up by the freight departments of the various roads; I don't know that I ever looked through the book in my life; I don't know that I have ever seen any more of it than I have seen at this moment; I know nothing of the divisions; it is a matter intrusted to the freight agents of the several lines who represent their respective roads, and agree upon divisions.

Q. You don't know then as a matter of general fact, as the chief manager of this road and line, you don't know what the Central Vermont gets per ton per mile for hauling first class freight from St. Johns to White River Junction, that comes from Detroit, going to Boston?

A. I did not say that.

Q. What do you say to that?

A. I do not know anything about their divisions, except in general terms. I don't know that I can state those divisions now; our manager, when he returns from a conference with the others, reports to me what they have done, and his action is either approved or disapproved; but I do not charge my mind with the details of all these divisions, so that I can carry them in my head and repeat them; I sanction or disapprove at the time, knowing what he has done.

Q. I am not asking about the divisions of a particular shipment, but whether you know in a general way what the share per ton is; supposing it is seventy-five cents a ton from Detroit to Boston, if you had a car load of twenty tons, it would be \$15.00; now in that case, suppose it passes over your road from Detroit to Boston over this fast freight line, and \$15.00 have been earned for carrying that twenty tons, now, can you tell in a general way what share of that \$15.00 the Central Vermont road is entitled to?

A. No sir; I cannot tell you in that form what it is; we have our percentage of the Chicago rate; I think we receive 26 per cent, or 27 per cent, that is, as between us and the Grand Trunk Railway; from the whole amount our proportion for the Central Vermont from St. Johns to Boston is taken out by itself, so far as the division of the Grand Trunk Railway is concerned; they receive theirs, then the division which is due between St. Johns and Boston is subdivided, and the percentages of the roads below us are taken out, that leaves the balance to us; just what that balance is, I do not at this moment recall.

Q. Have you any general idea as to what that balance would be?

A. I don't know that I have.

Q. You have no idea, then, in the case that I have supposed, what would be the general proportion or part of the \$15.00 that would finally go to the Central Vermont as its share?

A. The way bills are various, they are changing from day to day.

Q. Tell me whether you know or not, or have any idea?

A. I have an idea, but I haven't the knowledge.

Q. Well, won't you give us the benefit of your idea?

A. My general idea is that we get in division with the roads below us 53 per cent to their 47 per cent.

Q. How much would that leave out of the \$15.00 earned?

A. I cannot figure that.

Q. What is the final share?

A. I do not know.

Q. You say you have a general idea?

A. I said I had a general idea of what we were carrying freight at per ton per mile, but to aggregate it and say how many miles at that rate it would produce, I do not do it; that is a matter of figuring that goes to the auditor and the division clerks.

Q. You have a general idea of what you get per ton per mile; how much is that?

A. It varies from three mills to seven mills per ton per mile.

Q. On what principle does it vary?

A. According to classification.

Q. Take class one.

A. I can't tell you what we get.

Q. Take class two.

A. I can't tell you.

Q. Take class three.

A. I cannot carry all those details in my head.

Q. Take class four, five, or six.

A. I cannot tell you.

Q. You cannot tell on the particular classes, or on any of them?

A. I do not get those details; if the rates go down too low, I figure it out, or have it figured out for me and determine what our proportion is, so that I thus carry along a general run of the business; but I cannot tell you on any particular shipment, or any particular car load on any division what it aggregates.

Q. Nor on the whole?

A. No sir; the aggregate goes into the treasury; I cannot tell what we receive.

Q. You cannot tell in general or in particular what is the amount your corporation gets out of this business?

A. I cannot.

Q. Either by proportions or any other way?

A. No sir.

Q. By what process do you arrive at the conclusion you state in your answer that this through business is profitable to you?

A. By the supervision I give to it, and by the general results.

Q. You say you do not know anything about the general results?

A. Yes sir; I do know whether we are carrying at a loss or at what we regard as a profit.

Q. If you do not know how much you get for it, for what you are doing, how can you tell?

A. I know what we get per ton per mile.

Q. You are getting from how much to how much?

A. Sometimes we carry at a loss; when we get into a big fight and the other roads cut the rates, we are sometimes down to two mills.

Q. On the rates as they now stand?

A. I don't know; I cannot give you the information.

Q. On the rates as they stood last year?

A. I cannot tell you.

Q. Or the year before, when Lucas' statement was made up?

A. I cannot tell you; I examined his statement, and I was satisfied from his reports that his statement was correct.

Q. What officer of your company, if there happens to be such a man, can tell the Commis-

INTER 8.

sion what is the share the Central Vermont actually gets out of any shipments?

A. Our division clerks; they will tell you at any time; Mr. Leard is our division clerk.

Q. Where is he?

A. He is at St. Albans.

Q. Is there anybody here?

A. No sir.

Q. Is Mr. Chittenden here?

A. He is here. I do not know whether he knows or not; he can answer for that, but he has nothing to do with the through freight.

Q. Who is the manager of the lake steamers?

A. Mr. Frank Owen.

Q. Who employs Mr. Frank Owen?

A. The Ogdensburgh & Lake Champlain Railroad.

Q. Who are the Ogdensburgh & Lake Champlain Railroad for all practical purposes at present?

A. It is under a lease to the Central Vermont, although its accounts are kept separate from ours.

Q. Who are the directors of the Ogdensburgh Road, or its president?

A. Mr. William J. Averill, of Ogdensburgh, is the president.

Q. State whether the Central Vermont, through its own agents and employees, manage that steamboat line. You said the Ogdensburgh Railroad; do you mean to stick to that, or is it not under your control?

A. It is under our control, of course.

Q. Don't you employ him and pay him?

A. We employ him and pay him. He takes his directions from us because it is in the general supervision of the Ogdensburgh Road.

Q. The Ogdensburgh Road has nothing to do with him then, except to appoint him. Now, then, what share does the lake steamboat line get out of freight from Detroit to Boston by way of your Ogdensburgh line?

A. If I remember correctly, on Lake Erie ports they get 40 per cent, and Lake Michigan 50 per cent.

Q. Of the gross receipts?

A. Yes sir; then there is something allowed for commissions and dockage besides that.

Q. What share does the Ogdensburgh Railroad get?

A. I cannot say; I never saw it divided.

Q. All that comes into your treasury?

A. Yes.

Q. Does this report of Lucas, made under your direction, of the divisions of the traffic on your road; does that show how much of the gains and profits is contributed by the Ogdensburgh Road water line?

A. I don't remember whether he put in the through freight derived from the water and rail line and the all rail separately, or whether it is altogether as through freight.

Q. Can you tell what the proportion is by taking the figures of the whole?

A. I do not think I can.

Q. Have you any general idea?

A. I do not think I have; I do not think I ever looked it up to see what the general proportion is.

Q. What I want is the proportion you get on this lake and rail traffic for the service done between Ogdensburgh and White River Junction.

A. I don't think I can tell you.

Q. You say you have a general idea what proportion the lower roads get?

A. No sir; I do not; all that information can be got.

Mr. Edmunds. I have asked these questions, if Your Honors please, because this division list of the National Despatch Line does not cover this course by the lakes, and I was in hopes the manager of the line might give us some general idea how much could be got out of it. My hopes are disappointed!

Q. Can you tell how much the rate for a car load of butter is from St. Albans to Boston?

A. Fifty-five dollars; five and a half mills per pound.

Q. That is what the shipper has to pay without rebate or drawback?

A. Yes sir.

Q. Square business transaction?

A. Yes sir.

Q. Can you tell me how much of that \$55 your concern gets for carrying that car load of butter from St. Albans to White River Junction?

A. One hundred and twenty one hundred forty-fourths of the mileage,—that is, after deducting the car service and terminal charges, it is then divided pro rata.

Q. Do you get 120-144ths of the \$55, or does something come out of it?

A. First deduct car service, then the terminal charges, and the balance is divided according to mileage.

Mr. Strout. I think you are in error, Governor, on the figures of division. You say 120-144ths; is that correct?

A. I thank you for calling my attention to the error. The division is 120 and 144, making 264 miles, of which we get 120-264ths.

Q. It does not make any difference whether you get car service or not, if each road pays its own car service?

A. That is simply made up in a different way. The result would be the same.

Q. How much do you deduct for terminal charges on a car load of butter?

A. Thirty cents for the Boston terminus, and twenty cents for the Central Vermont terminus, per ton.

Q. And the \$55 per car, that would be per car of ten tons, I suppose?

A. It would be more than \$55 per car. The rate is fifty-five cents. That gives more than \$55 for the car load. That is \$1.10 per ton, which would give \$110 per car load. Taking out the \$8 there would be \$52 to divide, after taking out the car service.

Q. And that comes to the same thing because each road pays its own car service?

A. Yes sir.

Q. You get your proportion of that amount?

A. Yes sir.

Q. That is true for first class freight?

A. Yes sir.

Q. Is the division the same in respect to the second and third and fourth and fifth class?

A. Yes sir.

Q. Now can you tell us somewhere near what you think you would get for hauling a car load of butter from Chicago that goes down the same day?

A. It is seventy-five cents per hundred pounds.

Q. And you get your proportion out of that going all rail, as stated in that book?

A. Yes sir.

Q. Would not the result of that be, to make it short, that you get a good many dollars more for hauling a car of butter from St. Albans, made in your own neighborhood, to White River Junction, than you do for hauling the car from the West?

A. Not according to my calculation, it does not. It is a question of figures. If you mean what your question asks, my answer is correct. When the local is brought into the condition of the through freight, according to my calculation we do not get so much. Without deducting any expenses incident to the business, if you mean simply for the transportation, we do get more from St. Albans to Boston than our proportion of the through rate,—that is, without deducting any expenses incident to the haul.

Q. I want to know, without making any reference to incidental charges for anything else, but take the butter as it is after it is put into the car at St. Albans. Now, how much more does the shipper of that butter have to pay you for hauling it to White River Junction than is paid to you for carrying a car load of butter from St. Albans over the same line to White River Junction that came from Montreal?

A. I can't tell you how much more it is, but it is more.

Q. Does he not pay as much as \$10 a car more?

A. You can compute it as well as I can.

Q. I think Mr. Mellen stated the proportion they get for carrying a car from Boston to White River Junction that was going to Montpelier for instance?

A. I did not understand his testimony; I was engaged at the time with something else.

Q. We won't take up the time about that, then. Have you ever made any calculations or estimates as to the cost of carrying a ton of first class freight, or any other kind of freight per mile on your road?

A. I have tried to figure it a great many times; there are a great many elements entering into it which make it difficult to get at.

Q. If you have ever come to any conclusion, state it, shortly.

A. My own impression differs from those of some of the subordinate departments in the road; they figure it higher than I do; it will vary from three to five mills per ton per mile. If you mean to apply your question to local freight, it costs us more than that; it costs us more to haul the local freight per ton per mile, than it does freight from Chicago.

Q. You say you think the cost is from three to five mills per ton per mile; do you mean that three is the cost for through freight, and five the cost for local, or what do you mean?

A. No sir; I mean that it varies, according to the speed of hauling among other things, that is one element of variance.

Q. Is not that the principal element?

A. It is a large element.

Q. Would it not be 75 per cent of the total elements?

A. No sir; I hardly think it would be as much as that?

Q. It would be more than half?

A. Yes sir; I think so.

Q. I think you have stated that this National Fast Freight Line makes, or is expected to make, about eighteen or twenty miles per hour, in answer to Mr. Fifield, if I correctly understood you?

A. Yes sir; the fast train.

Q. And that the average rate made by the ordinary freight, local freight trains, was eight to ten miles per hour?

A. Ordinary freight is from eight to ten miles per hour.

Q. Tell the Commission how much more the cost is to haul a freight train of twenty cars, which you say is the average at twenty miles per hour, than it is at ten miles an hour, taking in all the elements?

A. I do not know that anybody has been able to ever solve that matter.

Q. Have you ever tried?

A. Yes; but with very little success. The element of speed is very difficult to ascertain; it is a factor in the case, but I don't know that anybody has succeeded in finding out; that it does cost more, we all know, but how much more I never have found anybody who can tell.

Q. Did you ever find a man who could guess?

A. No sir; I don't know anybody that guesses at those things.

Q. Did you ever try to guess?

A. No sir.

Q. So that you mean to tell the Commission that you have no idea?

A. No accurate idea.

Q. Well, an approximate or general idea?

A. No sir; I have never reduced it to that; I know it costs a great deal more to run a train sixty miles an hour, than it does to run it twenty.

Q. Is it not true that it costs a good deal more to run a train at twenty miles an hour than to run it ten?

A. Not in the same proportion at all; and it is a query what minimum rate of speed will make a minimum rate of cost.

Q. Then why don't you run all your trains at twenty miles an hour and help your customers get their goods to market rapidly?

A. It is not needed, and there is an additional cost in running at eighteen miles an hour, over eight; but whether it would cost more to run at five than it would at eight miles per hour I am not prepared to say.

Q. Have you any tables or knowledge in your possession which will show the gross earnings of the Central Vermont Road per year for the last five years, in the State of Vermont, leaving out the Ogdensburgh, and the Rutland roads; the gross earnings of the Central proper?

A. They will run from \$1,500,000 to \$2,000,000, \$100,000 or \$200,000 per year.

Q. What has been the gross earnings of the Central Vermont and Rutland Railroad and the Ogdensburgh, that you manage, and the Vermont & Canada Junction, all put together?

A. They have not been put together, and I do not know.

Q. What has been the gross earnings of the Rutland?

A. We have the Rutland and Central together, the others have not been aggregated. The Rutland will earn from \$500,000 to \$600,000.

Q. Can you tell about the Ogdensburgh?

A. That will earn, since we have had it, from \$600,000 to \$700,000.

Q. The gross earnings have been increasing on the Ogdensburgh?

A. Yes sir.

Q. And on the Central?

A. Yes sir; this year.

Q. Gradually from year to year?

A. No sir; sometimes they fall behind and sometimes go ahead; there is no gradual increase; they do not go above the maximum, except this year which is an exceptional year; I have given you the highest and lowest sums, between which they will vary, sometimes \$1,600,000, or it will drop as low as \$1,500,000.

Q. You have seen no symptoms of a fall this year?

A. No sir; it has been a good year this year.

Q. What is the distance from St. Albans to Rouse's Point?

A. Twenty-four miles.

Mr. Edmunds. I want to put in evidence this statement that we have had made up. A comparison of charges per mile on other roads. (Marked "R." and filed with the clerk.)

By Mr. Fifield:

Q. You stated the rate for butter from St. Albans to Boston was fifty-five cents?

A. Yes sir.

Q. And from Chicago to Boston, seventy-five cents?

A. Yes sir.

Q. I suppose they don't raise any butter on the streets of Chicago?

A. I never saw any.

Q. It is raised in Iowa, Wisconsin, etc.?

A. Yes sir.

Q. What does it cost to get that butter into Chicago; what are the joint rates from Iowa points to Boston?

A. I can't tell you; I don't know.

Q. What is the rate from Iowa points to Chicago?

A. I can only tell from statements made up by the clerks; it is \$170 to \$180 per car, probably that covers the remotest points in Iowa; what it is from Illinois, or Wisconsin points.

Commissioner Schoonmaker. In your answer to one of the Senator's questions, you said it was \$1.10 per ton; you made an error in your figuring, I think?

A. Yes. \$11.00 per ton, I meant; that would be \$110.00 for the carload from St. Albans to Boston.

L. J. Seargeant, called on behalf of the defendants; sworn, testified as follows:

Direct examination by Mr. Strout:

Q. You are the general traffic manager of the Grand Trunk Railway?

A. Yes sir.

Q. For how many years have you been so?

A. Since 1874.

Q. State to the Commission your knowledge in relation to this matter of differentials, and

what effect it would have upon the through traffic by the way of this line, if it were taken off; state it briefly.

The Chairman. If no differentials were allowed?

Mr. Strout. Yes sir.

A. It so happens that when I arrived in this country from England, in 1874, that the question was under discussion between the then managers of the Grand Trunk Railway, the New York Central, the Boston & Albany and other parties in interest; and it was argued and conceded that it would not be possible for the Central Vermont & Grand Trunk system, to participate in the through traffic unless a differential were allowed in both directions.

Q. For what reason was the differential allowed?

A. The reasons are numerous; but in the first place we have certain customs difficulties to attend to; they are not of a very serious character, but are sufficiently so to throw some impediments in the way of through business. The next reason, and the most serious reason is the distance between the points of origin, and the destination of the traffic by comparison with the other routes. Now, the distance for instance from Chicago to Boston is by this route 1150, as against 1000, I think by the more direct route, a difference of 150 miles against our route which is a serious difficulty. Another reason is that in the winter season we have a great deal of interruption from snow storms; we have almost a continuous winter from the month of November frequently into May, sometimes terminating in April, always lasting to about March; it has been my constant experience during that period, at such time, to see trains embedded in snow to such an extent as to necessitate the employment of manual labor to clear them and get the wheels in motion; often I have seen two engines struggling to release a few cars from a siding; often after a snow storm the difficulties are so great that nothing but the employment of a large force of manual labor will relieve the cars; in that period we get very much demoralized, and it is one of the most serious difficulties that we have to contend with.

Q. Does not the Grand Trunk Railway run through a sparsely settled country from Montreal almost to Sarnia?

A. Yes; more or less; of course there are some large cities on the route, Toronto, Kingston, etc. I think we go through as much of the populous portion of Canada as there is in Ontario, but it is to some extent comparatively sparse. During the time I have been connected with the Grand Trunk Railway, it has been my duty, as vice president of the Chicago & Grand Trunk Railway, as well as traffic manager of the Grand Trunk Railway, to represent our interests at the Trunk Line meetings in New York, and also at the Central Traffic Association at Chicago, which has something to do in the originating of the business. During the whole of that period it has always been assumed to be necessary that this route should have a differential to enable it to procure some portion of the States-to-States traffic; of course we are desirous, if it were practicable, to do without the differential; but it is a necessity of the situation which has

been recognized, not only in the case of the Grand Trunk & Central Vermont, but in connection, and for other reasons, with the Pennsylvania Railroad, and the Baltimore & Ohio, with which gentlemen of the Commission are familiar. The principle is a recognized principle, and it has always been conceded, and for the reasons I have stated. The Grand Trunk system is entitled to, and ought to receive the differential.

Q. Was it so considered at the last meeting in New York, in March last?

A. I was present at that meeting, on the second, third and fourth of March; it then became necessary to readjust our rates, so as to make them consistent with the Interstate Commerce Law; there was a great difficulty in knowing what it really meant, but we had this meeting to do the best we could. In the course of the inquiry the question of differentials arose and was taken into serious consideration; it was then and there conceded that this route should retain the differentials.

Q. State to the Commission whether or not the gentlemen present at that meeting agreed to and consented that this northern line should continue the differentials?

A. A report was presented that appears on the minutes of the proceedings, and was in my hands yesterday; I have not it with me now; that report stated that the differentials should be continued to the Central Vermont, based upon eight cents for first class differential; we had always been conceded ten cents; that report was adopted; that was eight cents differential to Chicago.

Q. Did the Boston & Albany Railroad representatives object to that?

A. No sir; and Mr. Mills was present.

Q. Will you state to the Commission, in brief, what the effect will be and what it has been to your knowledge, if the differential is not allowed?

A. My knowledge is that we had at one time a division of traffic or a pooling arrangement under which we were to have 21 per cent of the business; it was subsequently reduced to 16 per cent when the business was increased by the admission of other companies from Boston to the West.

By **Commissioner Walker:**

Q. That was the east bound percentage agreed upon?

A. Yes sir; in connection with the Chicago & Grand Trunk Railway, and also in connection with the trunk lines.

Mr. Strout, resuming:

Q. Go on and state what was done.

A. Under the pooling arrangement we ran ahead.

Q. How much?

A. In excess to the extent of 17,000 tons; that was subsequently, in 1883.

By **The Chairman:**

Q. When you say you ran ahead, do you mean that you carried more than your proportion?

A. We over carried.

Q. At that time did you have the differential also?

A. Yes sir; the reason that we retained the differential was that we objected to being paid in money or any other way than by actual car-

riage of freight, and the tonnage was kept up; we feared we should lose our connection if we did not do that, and in order to keep up the tonnage it was necessary that we should retain the differential.

Mr. Edmunds. That is, you would rather do the work than receive the profit out of it?

A. Yes sir.

Q. What was the reason you gave?

A. The reason was that we should lose our connection if we did not do the work, so that when the pooling arrangement terminated, having lost our connection, we should have to begin life all over again.

Q. Like a shut up factory, or anything of that sort?

A. Yes.

Mr. Strout. Now, go on with your statement about this matter?

A. We carried an excess of 17,000 tons. Mr. Fink then communicated with me on the subject; I was always in favor, and recommended the plan that where companies ran in excess that way they should increase their rates in order that the traffic should go by the other lines, as commerce will always seek the most economical routes; we therefore raised our rates. The surplus very soon disappeared, the traffic went by other lines, and we began to be in deficit; we were eventually in deficit to the extent of 17,000 tons, which we did not recover. That is, we made up our deficit, or made up to the other lines what we had taken in excess, and ran to the bad 17,000 tons.

Q. How much did you add to your rate?

A. I think we went up to the full rates. We were desirous of trying the principle, and that was the result.

A. When you found you had lost 17,000 tons, did you try to get any pay for that?

A. Yes sir.

Q. Did you succeed?

A. That is a matter of history.

Q. Did you restore your differentials?

A. Yes sir.

Q. Having stated that as a matter of fact, what would be the effect of taking off the differential or raising your through rate so that it is the same as these other lines?

A. We should cease to be competitors, we should lose the business; we could not carry.

Q. Have you any doubt about that?

A. Not the slightest. In the east bound the same thing has happened to us. Mr. Swift had a large traffic of dressed beef over the Grand Trunk Route, but he will not ship by us now, and has taken his cars away.

Q. Why not?

A. Because of the length of the route, and the climatic difficulties, the trouble in getting through so that he preferred the other route.

Q. The route is against you to the amount of those differentials?

A. Yes sir. He says he prefers four days to six in the line.

By the Chairman:

Q. What was the differential you stated you should receive?

A. On the basis of 10 per cent; we have never yielded that since we began to do it; we cannot do it for less; if we can we will.

By Mr. Edmunds:

INTER 8.

Q. Explain what is meant by these arbitraries—I believe Mr. Porteous or somebody said something about "arbitraries"?

A. An arbitrary is a charge that has to be paid whether we will or not. It is a fixed charge. If I charge so much from A. to B. that is an arbitrary which must be paid to me.

Q. In respect to which there would be no division or participation so far as you were concerned?

A. Yes sir.

Q. It was stated that your road was called longer or shorter than it really was; how is that?

A. Yes sir; we do not pro rate on actual mileage; our road is estimated to be shorter than it is I think by thirty-five miles; that is to say we are supposed to calculate our percentages on the short line division.

Q. Then in dividing, you calculate your percentages on thirty-five miles less than the real distance?

A. Yes sir.

Q. Who pays the car service on that thirty-five miles that does not go into the percentage?

A. The Grand Trunk Railway.

Q. So that that part of the car service makes no difference in the line?

A. No sir; we pay $\frac{1}{2}$ of a cent per mile. Our line allows the difference in the mileage between St. Johns and Prescott, and the distance to Ogdensburgh.

Q. You pay on actual mileage and divide on thirty-five miles less?

A. Yes sir.

By Mr. Hoar:

Q. Does your line carry a fair share of the east bound traffic from western points to Boston?

A. No sir; it does not now.

Q. Has it ever?

A. Yes; I think a fair share.

Q. When did you cease to?

A. It has ceased recently.

Q. State what you mean by recently?

A. This year.

Q. Since when?

A. Since about the month of February or March.

Q. Is there any differential between you and the other lines on east bound traffic?

A. Not at present.

Q. How long ago was it that there was a differential?

A. It was before my time; it was agreed to originally, but not in force.

Q. Has there been any differential in force on the east bound traffic, on the lines from the West to the sea board, since you were there?

A. Practically not.

Q. So that you carry traffic from the West over these very lines from the West to Boston, and have, without any differential, during that time?

A. Yes sir.

Q. And until February of this year you had a fair share of the business?

A. During that time I don't think there has been any.

Q. You have had a fair share of the business, I say?

A. We have secured it.

Q. Does not a large portion of the east

bound business require good time in transportation?

A. Yes sir.

Q. At the time you established the differential on west bound business there were only four classes of freight?

A. Yes; when it was agreed to have differentials.

Q. Was it not a part of that agreement that if there should be any fifth, or additional classes of freight, that the differential should be two cents on those additional classes?

A. Mr. Mills stated so, and I take it it was so; I don't know to the contrary.

Q. As a matter of fact you have assumed to take three cents on your present differentials, or four, and three?

A. Yes, I believe so.

Q. Do you know that that differential was ever a subject of agreement between your road and the other lines, that is the fifth and sixth classes, the differential of four and three cents?

A. My recollection is that they were the subject of a recommendation on the part of Mr. Fink.

Q. How long ago?

A. The last three or four years; Mr. Fink commenced in 1879 or 1880, seven years ago; it is intervening between that time and this period.

Q. Do you say that you know it was established by him as four and three cents?

A. That is to the best of my belief; he is a consenting party to the differentials on behalf of the other lines.

Q. Of four and three cents per 100 on those classes?

A. Yes sir; that is my belief.

Q. What time was that done?

A. I cannot say; it must have been about 1884; it is spread over the time between 1880 and the present time.

Q. State to the Commission what the difference is in the carriage over these particular lines of railroad between the east bound and the west bound traffic, that is, in the service that is rendered by the railroads, between the east bound and the west bound traffic, in one of which you have the differential, and in the other not. Now, what do you say is the distinction?

A. It has reference to the class of business. Does your question refer to the actual, physical haulage?

Q. This question refers to the service rendered only?

A. The gradients are varying in both directions.

Q. In which direction?

A. There is much of a muchness about that; of course the haulage would be about the same; I don't know that there is any great difference.

Q. You do not know that there is any difference in the service rendered between the east and west bound haul?

A. I know nothing about the line south of St. Johns; there is one thing of a physical character affecting the question: there are a good many empty cars go West, and few going East; that would alter the haulage and cause the charges to vary.

Q. I suppose the hauling of empty cars is a thing common to all railroads?

A. West bound.

Q. You do not haul any more, in proportion, than your competitors, do you?

A. It hinges upon the traffic; Mr. Fink said to me the other day that the Pennsylvania Company hauled West as many as four cars to what they hauled East.

Q. From Boston?

A. No sir; on their system.

Q. They carry a good deal of coal, etc?

A. Yes.

Q. I am talking about the Boston system; do you know whether or not your road carries any more than its proportion, as compared with the other roads, of empty cars back to the West?

A. I should think not.

Q. Are not the circumstances of competition between the western markets and the sea board substantially the same as from the sea board to the West?

A. Yes; the same competitors of course.

By the **Chairman**:

Q. State what proportion you are now getting of the Boston business from Chicago, east bound.

A. We are getting now, about between thirteen and fourteen per cent of the Chicago business.

Q. And of the Detroit business, how is it?

A. I have no facts as to the Detroit business; I refer to the business emanating from or passing through Chicago, that is, what comes to us from the Chicago & Grand Trunk Railway; then there is the Milwaukee business which comes to us by the Chicago & Grand Trunk and the Wabash.

Q. What I want to know is, what proportion of the Chicago through business are you getting now?

A. My answer to that was 13 or 14 per cent; it is divided into two parts, that includes the whole business; we have connections at the Niagara frontier east over another route, and also through Toronto; passing in this direction the whole of the business, via the Chicago & Grand Trunk Railway, will be about 13 or 14 per cent of the whole Chicago business; that includes business to New York as well as to Boston.

By **Mr. Strout**:

Q. Do you include in your answer to the Chairman all the freight that comes over the Chicago & Grand Trunk Railway?

A. Yes; I referred only to that.

Q. But all of that does not come East by the Central Vermont, and Boston & Lowell Roads?

A. No sir; a large proportion of it goes off at the Niagara frontier.

Q. Does the whole of that 13 or 14 per cent come over your road and by Montreal?

A. No sir; not to Montreal; a large portion goes to New York.

Q. Not more than 5 per cent of it comes by Montreal?

A. I think we have been awarded 25 per cent of the New England business.

By the **Chairman**:

Q. What percentage do you get of the New England business?

A. My recollection is that Mr. Fink gives 25 per cent of the New England business to us.

New England business from Chicago. That thrown into a pool would represent so much of the whole business.

Q. You said you had 18 or 14 per cent of the Chicago business coming East; now, what part of that comes to New England?

A. I should think about 5 per cent of it. That is 5-18 of the whole sea board business from the West by the Chicago & Grand Trunk Railway. That includes everything out of Chicago for this district.

By *Commissioner Walker*:

Q. Do you mean that of the business coming into New England, as between you and the Fitchburg, and the Boston & Albany, you receive a quarter of the whole?

A. Yes sir; of all the business to this district from Chicago.

Q. How much of that goes to Portland?

A. A comparatively small proportion.

By *Mr. Hoar*:

Q. Have you any steamers to connect with in the winter at Portland?

A. Only in the Portland season, from December to April.

Q. You don't go to Portland to the ocean steamers in the summer?

A. No sir; to Montreal in the summer.

INTER 8.

Central Vermont R. R. Co.; and *Mr. Strout*, for the Boston & Lowell R. R. Co. and the Grand Trunk R. Co.

BRIEF OF MR. B. F. FIFIELD, FOR CENTRAL VERMONT R. R. CO.*

By section one of the Interstate Commerce Law, no carrier is subject to the Act unless: first, it is engaged in Interstate Commerce; and, second, unless it is a carrier by railroad, or partly by railroad and partly by water, where they are subject to a common management or control, or between whom there is an arrangement for a continuous carriage or shipment.

The case shows that the Boston & Lowell, a Massachusetts Corporation, is managed by its own board of Directors and by nobody else. So of the Concord, a New Hampshire Corporation. So of the Central Vermont, a Vermont Corporation. So of the Grand Trunk, an En-

*This brief was prepared in advance of the hearing.

lish Corporation. These roads, then, being in different States and countries, and not being subject to a common control, are not subject to the Act, unless there is between them "an arrangement for a continuous carriage or shipment."

None exists, unless it is implied from the making of joint tariffs.

I. A joint tariff does not make an "arrangement for a continuous carriage or shipment."

It is a mere advertisement to the public of the rates which will be charged from a point of departure to a given point of arrival. The Boston & Lowell can know the advertised rates which each company charges over its own road between Boston and Chicago. It can aggregate these charges without the knowledge or consent of any of the other roads, and advertise a through rate to Chicago with perfect safety. And the reason is this: it is the legal duty of every railroad to carry to the terminus of its own road, and deliver its cars to the road next in succession, and for such last mentioned road to receive and haul the cars over its own road, and so on, until the car arrives at its place of destination.

Harper's Interstate Law, 114, and cases there cited.

This duty has become binding because of the practice and custom among railroads for forty years in respect to the interchange of cars with one another. It has become the common law governing railroads in this regard.

109 *Ill. Rep.* 185; 18 *Fed. Rep.* 3.

It is also a duty under Acts of Congress.

Harper's Interstate Law, 150; 45 *Iowa Rep.* 388, 351-52.

It is believed that the duty is enjoined by all the States. It certainly is by the States through which these roads pass.

Public Statutes of Mass. 639, § 217; *General Laws of New Hampshire*, 392, § 1; *Revised Laws of Vermont*, 651, § 3399.

"When a railroad enters upon, intersects or connects with another railroad, the managers of each of such connecting roads shall furnish to the others reasonable terms of connection, accommodations, privileges and facilities in the reception, transportation and delivery of cars," etc. *Sec.* 3399, *R. L. of Vt.*

The bills of lading of the Boston & Lowell Railroad and its connections expressly exclude any liability beyond the terminus of its own road.

(See bills of lading.)

No "arrangement" between the roads is necessary for this purpose. It rests upon a legal duty. Doubtless arrangements and contracts may be made between connecting roads. But a joint tariff does not make such an "arrangement."

In *Myrick v. Michigan Cent. R.R. Co.* 107 U.S. 107 (Bk. 27, L. ed. 835), the case is this: The Mich. C. R. R. Co. received at Chicago cattle destined for Philadelphia. They gave a receipt to the shipper indicating the place of destination. He was informed of the through rates, and the joint tariffs posted in the company's office in Chicago indicated them. The plaintiff claimed this constituted a contract to take the cattle through to the place of destination; and the circuit court so ruled, but the supreme court reversed the decision. They

said: "The general doctrine, then, as to transportation by connecting lines, approved by this court and also by a majority of the state courts, amounts to this: that each road confining itself to its common-law liability is only bound, in the absence of a special contract, to safely convey over its own route and safely to deliver to the next succeeding carrier, but that any one of the companies may agree that over the whole route its liability shall extend. In the absence of a special contract to that effect, such liability will not attach, and the agreement will not be inferred from doubtful expressions or loose language, but only from clear and satisfactory evidence."

And speaking of the effect of the joint tariff posted in the office of the company at Chicago, as bearing on the question whether the Michigan Cent. R. R. Co. agreed to carry to the place of destination, the court said:

"Nor" was the common-law liability of the defendant corporation enlarged by the fact that a notice of the charges for through transportation was posted in defendant's station house in Chicago. Such notices are usually found in stations on lines which connect with other lines; and they furnish important information to shippers who naturally desire to know what the charges are for through freights as well as for those over a single line. It would be unfortunate if this information could not be given by a public notice in the station of a company without subjecting that company, if freight is taken by it, to responsibility for the manner in which it is carried on intermediate and connecting lines to the end of the route."

Again the court says:

"Our attention has been called to some decisions of the State of Illinois which would seem to hold that a railroad company which receives goods to carry, marked for a particular destination, though beyond its own line is *prima facie* bound to carry them to that place and deliver them there, and that an agreement to that effect is implied from the reception of the goods thus marked. Assuming that such is the purport of the decisions, they are not binding upon us. What constitutes a contract of carriage is not a question of local law upon which the decisions of the state courts must control. It is a matter of general law upon which this court will exercise its own judgment."

Such is the unqualified and unconditional judgment of the Supreme Court of the United States, which must ultimately determine the construction of the Interstate Commerce Law; and if they have not settled the question that the liability of a railroad does not extend beyond its own terminus unless further liability is assumed by a plain, unambiguous, express contract, and that a joint tariff does not constitute such a contract, it is difficult to see how they can do it. On the other hand it would seem clear that if such joint tariffs do not constitute a contract, as between the shipper and the companies, it does not constitute a contract or arrangement for a continuous carriage as between the companies themselves. The "continuous carriage" results from a legal duty, and the joint tariff is for notice or information to the public.

This construction is favored by section 6, part 5, which requires joint tariffs to be filed with the Commission. The next clause requires copies of all contracts, agreements and arrangements between carriers to be filed. If the joint tariffs constitute an "arrangement," the last clause is tautological. The section contemplates an "arrangement" independent of joint tariffs; and when it does exist then joint tariffs become important in order that the Commission may know whether they are reasonable or not; and, second, they shall not be raised without ten days' notice, which shows that the object of the publication of joint tariffs is an advertisement to the public of what the rates are, and nothing more.

It may therefore be assumed safely that the joint tariffs referred to in the petition do not constitute an "arrangement for a continuous carriage or shipment," within the meaning of the first section of the law; and the defendant roads, except in so far as they are controlled by one another, are not subject to the Interstate Commerce Law. The Central Vermont has nothing to do with the roads south of White River Junction, Vermont, nor they with the Central Vermont, except to deliver to one another freight "for a continuous carriage" by virtue of a legal duty.

Achtson, etc. R. R. Co. v. Denver, etc. R. R. Co. 110 U. S. 667 (Bk. 28, L. ed. 291).

The decision made by Judge Deady on this subject in *Ex parte Kahler* is instructive. It is reported in 1 Interstate Com. Rep. 28. The head notes are as follows:

"The transportation of property from one State to another is Interstate Commerce, whether the carriers engaged in moving it, or the vehicles on which it is borne, cross the line of the State or not."

"This Act does not include or apply to all carriers engaged in Interstate Commerce, but only such as use a railway, or a railway and water craft, 'under common control, management or arrangement for a continuous carriage or shipment' of property from one State to another; nor does it apply to the carriage of property by rail wholly within the State, although shipped from or destined to a place without the State, so that such place is not within a foreign country."

"The O. R. & N. Company carries certain kinds of goods on its steamers forth and back between Portland and San Francisco at special and reduced rates; the O. & C. Railway, under the management of the petitioner, carries the same kinds of goods forth and back between Portland and Ashland and way stations, in Oregon, at special and reduced rates; the O. P. Railway Company carries the same kinds of goods forth and back between certain points on the line of the O. & C. road and San Francisco, via its railway from Albany to Yaquina Bay, and then thence by steamer, at reduced rates, and thereby competes with the O. & C., and the O. R. & N. for business between said points and San Francisco. The O. R. & N. and the receiver of the O. & C. act independently, although concurrently, in making these reduced rates; but no through bill of lading or freight receipt is given, nor is either interested in or liable for the carriage of the goods beyond its own line of transportation. *Held*,

INTER 8.

that the O. & C. road and the steamers of the O. R. & N. Company in the carriage of the goods in question are not 'used under any common control, management or arrangement for a continuous carriage or shipment' thereof, to and from San Francisco, within the intent and meaning of the Act, and that the carriage and handling of said goods, so far as the receiver is concerned, is performed wholly within the State, and therefore specially exempted by the terms of the Act from its operation, *provided* the same are not directly shipped to or from a foreign country."

II. If it shall be held that a joint tariff constitutes "an arrangement for a continuous carriage or shipment," then the inquiry arises, What is meant by the words "same line" in the fourth section of the Law?

It cannot mean continuous trackage, for that would make all the railroads in the country the "same line."

The words must probably be construed with reference to the first section of the Law. The line must be a road or roads, or road and water carriage, subject to a common management or control, or between which there is an arrangement for a continuous carriage or shipment. Nothing less will make a line. The case shows, as before stated, that the Central Vermont is managed by its own board of directors, and nobody else. So of the Concord. So of the Lowell and Boston. So of the Grand Trunk. But joint tariffs exist, as will hereinafter be stated. Now if a joint tariff makes an "arrangement for a continuous carriage or shipment" and so makes a line within the meaning of the fourth section of the Law, another joint tariff, although embracing the roads within the first line, constitutes another and different line, if it embraces other and additional roads making a much longer line. The additional roads do not participate in the shorter line. The two tariffs embrace different distances, different roads, and therefore make different lines, and in the cases at bar are intended to cover entirely different traffic.

One petition is that the Boston & Lowell, Concord, Central Vermont, and Ogdensburgh & Lake Champlain make a joint tariff from Boston to Ogdensburgh for six classes of freight.

If these roads are a line at all within the meaning of the fourth section of the Law, it is by virtue of this joint tariff, and nothing else. There is no common management or control.

The petition also alleges that the Central Vermont Line of steamers make a joint tariff from Boston via the aforesaid roads to Cleveland and Detroit, Port Huron, Milwaukee and Chicago at less rates than are charged by the joint tariff first aforesaid from Boston to Ogdensburgh. Suppose they do; this makes a different line. It is not the same line as the one from Boston to Ogdensburgh. They are not identical, and they must be, to be the same line. Besides, the first line embraces traffic between Boston and Ogdensburgh only, which makes another difference. The consequence is that the rates from Boston to Ogdensburgh are not made over the same line as the rates from Boston to Lake points.

The same is true of the other petition. It alleges that the roads between Boston and St.

Albans make rates to St. Albans from Boston more than National Despatch Line makes from Boston to Montreal and Detroit. But the National Despatch Line does not make a tariff from Boston to St. Albans, nor take traffic, except for points west of St. Albans, for west bound freight; nor does the tariff made by the roads from Boston to St. Albans include points west of St. Albans for west bound freight; but the points west of St. Albans for west bound freight are included in the National Despatch Line tariff, and embrace all large points in the West, Northwest and Southwest.

If, then, the joint tariff from Boston to St. Albans makes a "line," can it be pretended that it is the same identical line as the one made by the National Despatch tariff, which embraces thousands of miles beyond, and when the National Despatch cars belong not to the roads but to a separate organization which makes its own tariff, and issues its own bills of lading, and solicits its own business?

When this matter was under discussion in the senate, the question was put, What is meant by the "same line?" and Senator Dawes put to Senator Cullom certain questions looking to the result as to the Boston & Albany, which is an Interstate Road, and extends from Boston, Mass., to Albany, N. Y.

Suppose traffic is taken from Kansas City to Albany, and then over the Boston & Albany to Boston; also from Chicago to Albany over a different line, and also from Detroit to Albany by another, and from Albany to Boston; in each case over the Boston & Albany, what would be the result?

Senator Cullom answered:

"They, the Boston & Albany, can carry the freight as they agree to carry it; and whatever their agreement may be it does not affect the freight that goes from Albany to Boston on that line, its own line according to its own published rates of freight."

Senator Dawes:

"Suppose it be a different rate from that at which it takes up freight at Albany and carries it to Boston?"

Senator Cullom:

"It does not make the slightest difference in the world; it has nothing to do with it. One is a line of railroad by itself. The other is a line of railroad in conjunction with one, two, or five others, if you please, and the one rate does not control the others. In other words, as I have said over and over again, the percentage which the Boston & Albany Road gets for carrying the products which are brought from the West after they reach Albany, has nothing to do with regulating the rates from Albany to Boston over that road."

If this is a correct interpretation of the words, "the same line," in the fourth section, it is tolerably plain that the tariff from Boston to Albany makes one line, and the tariff from Boston to Detroit via the Boston & Albany and New York Central, and the steamships on the Great Lakes, forms another line, because, under the interpretation given by Senator Cullom, it would be perfectly competent for the Boston & Albany, an interstate road, to charge \$1.00 per 100 pounds from Boston to Albany, and yet by agreement with its connections to charge only seventy-five cents per 100 pounds from

Boston to Detroit. This could only be done on the theory that different tariffs, embracing different roads, different distances and different traffic, make different lines.

And this theory is well illustrated by the case, *Union Pacific R. Co. v. U. S.* 117 U. S. 355 (Bk. 29, L. ed. 920). By an Act of Congress the Union Pacific R. Co. were to charge the United States for transportation of mails and passengers, only what was reasonable, "and no more than was charged to private parties for the same kind of service."

The company presented a claim against the Government for the transportation of passengers between Council Bluffs and Ogden. The regular rate to all persons between these points was \$78.50, but by contracts with connecting railroads the Union Pacific receives from companies who sell through tickets at reduced rates from New York to San Francisco \$54 only for each passenger carried between Council Bluffs and Ogden. It was also found that the local rate was reasonable. The supreme court allowed the company the local rate of \$78.50, and held that the tariff rate from Council Bluffs to Ogden was entirely different from their share of the through rate from New York to San Francisco, although the shorter distance from Council Bluffs to Ogden was within the greater distance from New York to San Francisco. In other words, neither the service nor the lines are identical.

See *Atchison etc. R. R. Co. v. Denver etc. R. Co.* 110 U. S. 683 (Bk. 28, L. ed. 297).

Mr. Easley, in commenting upon the word "arrangement," says:

"If this is the true construction of the Act, then a railway does not become subject to the provisions of the Act unless it owns, uses, or operates, by lease, contract or agreement, roadway in two States, or enters into arrangements with connecting carriers to transport persons or property from one State to another."

"If a railway wholly within a State should enter into an arrangement to carry interstate freights or passengers with a connecting line, it would only be subject to the provisions of this Act *quoad* the line thus formed. It could decline to make the same arrangement or a like arrangement with another carrier and not violate this Act. And such a carrier might enter into an arrangement to carry interstate passengers or freight to and from one point on its line and not others, with out subjecting itself to this Act further than the extent it arranged to carry."

III. But, however these things may be, the circumstances and conditions under which traffic is taken from Boston to Ogdensburg and St. Albans, respectively, are wholly dissimilar from what they are in respect to traffic taken beyond Ogdensburg and St. Albans respectively.

a. There is no competition at Ogdensburg or St. Albans for traffic from Boston, nor between Ogdensburg and St. Albans, and points west of there, for business.

b. The rates are reasonable at those points. The distance from Boston to Ogdensburg is 408 miles, and from Boston to St. Albans is 266 miles. (See Porteous' Mileage Computation.)

The tariffs referred to in the petition are as follows:

Tariff made by roads between Boston and Ogdensburgh:

For six classes of freight from Boston to Ogdensburgh,

1 2 3 4 5 6 classes,
60 50 45 80 25 17 cents per 100 pounds.

Tariff made by Central Vermont line of steamers, via Ogdensburgh:

From Boston to Cleveland, Ohio, Detroit, Mich. and Port Huron, for the six classes of freight aforesaid, 41, 36, 29, 20, 17, 14 cents per 100 pounds.

Tariff made by Central Vermont line of steamers, via Ogdensburgh:

From Boston to Milwaukee and Chicago for the six classes of freight aforesaid, 44, 39, 31, 23, 19, 16 cents per 100 pounds.

Tariff made by roads between Boston and St. Albans:

For six classes of freight from Boston to St. Albans:

1 2 3 4 5 6 classes,
55 45 38 27 24 17 cents per 100 pounds.

Tariff made by the National Despatch Line for points west of St. Albans:

From Boston to Montreal for the six classes of freight aforesaid, 45, 40, 30, 23, 20, 18 cents per 100 pounds.

From Boston to Detroit for the six classes of freight aforesaid, 51, 45, 35, 24, 20, 18 cents per 100 pounds.

c. The Vermont Central and Vermont and Canada Roads, now the Central Vermont Road, were constructed about 1849, and are wholly within the State of Vermont. They depended upon local tariff until 1856, when they went into the hands of a receiver and continued so for a good many years. They were reorganized in 1888. The original capital was lost. They run through a sparsely settled country. If they depend upon local traffic, they cannot pay expenses and interest on their bonded debt as now reorganized, to say nothing of their stocks. As reorganized it is not a powerful and rich corporation, eager to swallow its competitors. It has not paid dividends on its stocks since its reorganization. On the other hand, the road has been brought up to a high state of efficiency with a view to doing a through business. Its track is steel rail and its equipment ten times greater than is necessary for local business. If restricted to a local business two results would follow: the sale of their equipment, and the raising of local rates in order to pay operating expenses. Proper remuneration for the capital invested is a legitimate subject for consideration in determining reasonable rates, as well as extraordinary cost of service over roads like the Central Vermont and Ogdensburgh.

Harper's Interstate Law, 89.

d. But with through business the road manages to live and pay its expenses and interest upon its bonded debt of \$7,000,000. It also relieves the local traffic from an increase of charges, and keeps them down to where they now are. The profit on the through business is small in degree, but is great in its results by reason of the magnitude of the business.

Auditor Lucas' statement in respect to earnings from through and local business is as follows:

Interrogatories and answers in regard to the freight and passenger business of the Central Vermont Railroad Company from Rouse's Point and Province Line to White River Junction and Windsor, and also from Essex Junction to Burlington, covering the fiscal year ending June 30, 1886.

1. What was the tonnage of through business East and West?

A. East bound, 882,259 tons. West bound 218,717 tons. Total, 1,095,976 tons.

2. What was the tonnage of joint freight East and West?

A. East bound, 161,984 tons. West bound, 54,219 tons. Total, 216,153 tons.

3. What was the tonnage of strictly local freight?

A. 71,825 tons.

4. What was the percentage of the through to the total?

A. 79 per cent.

5. What were the gross earnings of through freight?

A. \$652,647.83, or 64 per cent of total freight earnings.

6. What were the gross earnings of local and joint freight?

A. \$370,636.54, or 36 per cent of total freight earnings.

7. What were the net earnings of through freight?

A. \$173,344.62.

8. What were the net earnings of local and joint freight?

A. \$100,466.27.

9. What was the number of through passengers?

A. 87,206.

10. What was the number of joint passengers?

A. 115,814.

11. What was the number of local passengers?

A. 230,401.

12. What were the gross earnings from through passengers?

A. \$153,945.61, or 38 per cent of total passenger earnings.

13. What were the gross earnings from local and joint passengers?

A. \$250,149.10, or 62 per cent of total passenger earnings.

14. What were the net earnings from through passengers?

A. \$50,628.71.

15. What were the net earnings from local and joint passengers?

A. \$81,579.58.

The mortgage on the road is \$7,000,000 at 5 per cent interest. It also has common and preferred stocks.

That a profit is made on the through business is not open to doubt. In the year — the board of directors tested the question by cutting off the through business. The road scarcely earned its expenses. (See Gov. Smith's testimony.)

The trunk lines fix the rates to competing points; that is to say, the Boston and Albany, the New York Central Line, the Baltimore and Ohio, the New York and Erie and Pennsylvania lines on the left, and the Grand Trunk and Canada Pacific on the right, all powerful lines,

which, it is to be presumed, are not unwilling to see the "survival of the fittest." Weak lines are to be swallowed up, competition destroyed, and the very purpose of the Interstate Commerce Law defeated. The rates thus fixed by the trunk lines must be met, or the Central Vermont must go out of the business; and in meeting them another obstacle is in the way. The Boston and Albany Line is about 140 miles shorter to Chicago than the Central Vermont Line. (See Porteous' Milage Computation.)

At the same rates from Boston to competing points in the West, traffic would naturally go by the shorter and quicker line. To meet the difficulty and overcome the inequality thus existing between the lines, it was, as early as 1865, conceded by the trunk lines that this line might charge less than the trunk lines to competing points in the West. This line was obliged to do this in order to secure business, and it was conceded by the trunk lines as a matter of justice. On the other hand, while this line was the longest and slowest, it could; nevertheless, make the lower rate because its line reached the great Lakes at Ogdensburgh by a shorter rail line (118 miles) than the Boston & Albany reached the great Lakes at Buffalo, and also because defendant's cars go West empty, unless they take freight at such rates as they can get. They maintain rates for east bound freight. (See maps and Porteous' Milage Computation.)

All the foregoing applies to the Ogdensburgh & Lake Champlain Road as well as the Central Vermont. See auditor's statement as to earnings from through and local business.

c. The decision in the *Louisville & Nashville Case* (1 Interstate Com. Rep. 378), completely covers this case. That case announces the rule that when the competition is by foreign railroads or lines, competition is of itself a dissimilar circumstance. Also water lines. The principal competitors for Boston west bound traffic are the Grand Trunk, via Portland, and the Canadian Pacific, via the South-eastern, also a Canadian corporation, and a water line by ocean carriage from Boston to Halifax, and thence by the Inter-Colonial to Montreal, and by the other water lines referred to in the maps, answers and testimony.

Especially is this true by the all water line, via New York City, the Hudson River, the Erie Canal and the Great Lakes to Cleveland, Port Huron, Detroit, Milwaukee, and Chicago. New England agents sell their goods delivered in New York, at New England prices. The carriage by water from Boston to New York is trifling. The rates from New York to Cleveland and Detroit are

35 30 25 18 17 15.

And Milwaukee and Chicago,

35 30 25 20 18 16.

The rates of insurance are much less by this line than by the Central Vermont Line of Steamers, via Ogdensburgh; so that in the aggregate the rate is 8 to 10 cents per hundred pounds less than on any other line. A vast amount of New England business that used to go via Ogdensburgh now goes by this route, since the passage of the Interstate Commerce Law.

It is unnecessary to go further. The *Louis-*

ville & Nashville Case covers every point. But since the announcement of that decision, Judge Deady has gone a step further, and held that competition in all cases, whether by foreign or domestic corporations, or by water lines, constitutes a dissimilar circumstance.

Ex parte Koehler, 1 Interstate Com. Rep. 817.

The lines out of Boston that compete for west bound traffic to points in the West are very numerous, and are enumerated in the answers and shown on the maps.

Montreal is a competing point. The Grand Trunk, via Portland, is one line competing there; the water line, via New York and Lake Champlain, is another; the Delaware & Hudson Canal Company is another; the Canadian Pacific is another.

A vast amount of traffic that, before the passage of the Interstate Commerce Law, used to come over the Grand Trunk and Central Vermont, and was exported at Boston, now stops at Montreal, and is exported that way.

IV. a. It is true that the Boston & Albany Company, and everybody else, has a standing before this Commission to complain. But it is observable that this complaint does not come from a shipper who complains of the rates at Ogdensburgh and St. Albans respectively. It comes from a competitor at points on the great Lakes, and that is the real grievance. The Boston & Albany care nothing about the rates at Ogdensburgh and St. Albans. There is not a missionary duty. But the trouble is, they want to get rid of their principal competitor for west bound traffic to competing points in the West.

But it has been generally supposed that the object of the Interstate Commerce Law was to encourage competition and to break down monopolies instead of creating them; and so the Commission announced in the *Louisville & Nashville Case*.

How often has it been held that he who seeks equity must come into court with clean hands. Motives are material. Thus when a stockholder of a private corporation buys the stock of a rival corporation for the purpose of bringing a suit to destroy the rivalry, he will not be heard in a court of equity, when the question is one of discretion.

1 *Redfield on Railways*, 76.

The author says:

"But when the fact is established that under pretense of serving the interests of one company, the shareholders of a rival company, by purchasing shares for the purpose of litigation, can make this court the instrument for defeating or injuring the company into which they so intrude themselves, in order to raise questions and disputes on matters as to which all the other members of the company may be agreed, I cannot consider that in such a case it is the province of the court ordinarily to interfere. In questions of the law of contracts, when there is a discretionary jurisdiction in this court, circumstances affecting the condition of the contracting parties and the origin of their rights in relation to the subject matter of the contract deserve great consideration."

b. The second, third, and fourth sections of the Interstate Commerce Law are merely declaratory of the common law. Unjust dis-

crimination was illegal at common law. So was undue preference; and to charge more for a shorter than a longer distance, for the same amount and class of freight, under the same circumstances, was also illegal.

Atchison, etc. R. R. Co. v. Denver, etc. R. R. Co. 110 U. S. 683 (Bk. 28, L. ed. 297).

The guiding rule at common law was, What is reasonable? And that is the rule, and the only guiding rule, under this statute, where every case involves a question of law and fact, and where every case depends on its own merits.

The petitioners never have been able to break down the defendant's line as a competitor for through business. Is it reasonable that the instrumentality of the Interstate Commerce Law should be used to accomplish that purpose, when the object of the Law was to promote competition?

c. The petition is based on the fourth section. No questions arise under any other section. Petitioners must notify parties of what they have got to meet, otherwise interminable confusion arises on trial.

As to the Petition of the Vermont State Grange.

A.

The Rates to Boston, etc.

V. The rates between Boston and Ogdensburgh and St. Albans, respectively, and other Vermont points are reasonable, and for a great variety of reasons besides those enumerated above. The rates charged compare most favorably with those of other north and south lines. The character of the country through which these roads run, the cost of construction, the cost of operation and the amount of local support will, of course, be remembered. No proper comparison can be made between Vermont Roads and roads running through Massachusetts, between Boston and New York, where there are numerous rival roads and where the roads pass through large manufacturing districts, and are operated at a comparatively small expense. The only fair test is to take other roads, situated like the Central Vermont and Ogdensburgh Roads, and compare their interstate rates. The Passumpsic Road is of this character. The St. Johnsbury & Lake Champlain Road is another.

The rates made by the Central Vermont Road to Boston are less than the rates of either of these roads for the same distances. The rates made by the Central Vermont Road to Providence, Rhode Island, are also less than those of other Vermont lines. The rates made by the Connecticut River Railroad and the New York, New Haven & Hartford Railroad for Vermont business are higher, distances considered, than the rates made by the Central Vermont Road from St. Albans and other Vermont points to Boston, which latter are the subject of complaint. The tables submitted by Mr. Chittenden will show this. The local rates that begin and end in Vermont are,

of course, of no consequence. A few illustrations will be given for argument:

a. Let us take a few of the rates between Ogdensburgh and Vermont points to Boston (which are the ones complained of).

CENTRAL VERMONT RAILROAD.

Points.	Miles to Boston.	Rates per 100 lbs. 1st class.
Ogdensburgh	408	60
St. Albans	264	55
Burlington	248	55
Waterbury	218	55
Montpelier	207	55
Rutland	167	30
Ludlow	142	30
White River Junction	144	36

PASSUMPSIC ROAD.

Points.	Miles to Boston.	Rates per 100 lbs. 1st class.
Newport	250	60
Barton	235	60
Lyndonville	214	55
Ryegate	189	46
Bradford	173	42
Norwich	149	40

ST. J. & L. C. ROAD.

Points.	Miles to Boston.	Rates per 100 lbs. 1st class.
Swanton	302	55

b. As to the rates to Providence, Rhode Island, it will be noticed that the rates given by the Central Vermont are also less than those of other Vermont Roads to the same point.

CENTRAL VERMONT ROAD.

Points.	Distances to Providence.	Rates 100 lbs. 1st class.
Burlington	270	58
Waterbury	240	58
Montpelier	229	58
Rutland	195	33
Ludlow	169	33

PASSUMPSIC ROAD.

Points.	Distances to Providence.	Rates 100 lbs. 1st class.
Littleton, N. H.	233	58
Lisbon, N. H.	222	58
Wentworth, N. H.	186	53
Plymouth, N. H.	170	40
Meredith, N. H.	157	40
Laconia, N. H.	146	36
Tilton, N. H.	137	36

c. As to the rates to New York, it will be noticed that the difference in favor of the Central Vermont is great on the first four classes of freight, and still greater on the last two classes.

INTER S.

Station.	Road.	Distances to New York.	Rates for the Six Classes.					
			60	50	40	27	24	17
St. Albans,	C. V. R. R.	354	60	50	40	27	24	17
Newport,	Passumpsic.	339	68	58	49	35	32	28
Burlington,	C. V. R. R.	338	55	45	38	27	23	17
Waterbury,	"	308	"	"	"	"	"	"
Montpelier,	"	297	"	"	"	"	"	"
Barton,	Passumpsic.	324	66	56	47	35	31	27
Lyndonville,	"	303	62	54	45	34	29	26
St. Johnsbury,	"	295	60	53	44	34	29	26
Ryegate,	"	278	59	50	43	33	28	25
Bradford,	"	262	58	48	41	32	27	24
Norwich,	"	238	52	45	37	31	26	23
Brandon,	C. V. R. R.	264	45	40	35	27	19	16
Rutland,	"	247	30	27	23	18	15	15

The last two rates above are about 40 per cent less, for about the same distances, than the rates from Bradford and Norwich on the Passumpsic Road.

d. An examination of the rates existing between Vermont points and points in Massachusetts on the line of the Connecticut River Road, and between Vermont points and points

in Connecticut and New York on the line of the New York, New Haven & Hartford Road, shows that these rates are considerably higher, distances considered, than the rates from Ogdensburgh, St. Albans, and other Vermont points to Boston, as is shown by the following examples taken from Mr. Chittenden's statement:

Station.	Destination.	Road.	Distance.	Rate 1st Class.
Ogdensburgh,	Northampton,	Conn. R.	369	60
"	Hartford,	N. Y., N. H. & H.	298	60
"	Boston,	C. V. R. R.	408	60
St. Albans,	Northampton,	Conn. R.	237	58
"	Hartford,	N. Y., N. H. & H.	270	60
"	Boston,	C. V. R. R.	264	55
Montpelier,	Northampton,	Conn. R.	170	55
"	Springfield,	Conn. R.	187	55
"	Boston,	C. V. R. R.	207	55
White River Junc.,	Northampton,	Conn. R.	107	44
"	Hartford,	N. Y., N. H. & H.	150	46
"	Boston,	C. V. R. R.	144	36

e. The Delaware and Hudson Canal Company's Road is an instance of a New York Railroad running through a country similar to this. A reference to the table of that company's rates, given in Mr. Chittenden's statement, shows that the Interstate rates to Boston, given by the Central Vermont Road on the east side of Lake Champlain, compare very favorably with those of the Delaware & Hudson Canal Company's for corresponding points on the west side of the lake; and in many instances the rates of the Central Vermont for corresponding distances are considerably less. For instance the Delaware & Hudson Canal Company's rate from Westport to Boston, a distance of 298 miles, is sixty cents, while the Central Vermont's rate from Alburgh to the same point, a distance of 284 miles, is only fifty-five cents.

(See Mr. Chittenden's Statement.)

f. The Interstate rates of the Central Vermont from points in Vermont to Boston and New York, compare most favorably with the rates for like distances of many other roads in the United States which run through farming districts, though the character of the country through which these latter roads run is such that their cost of construction and operation is necessarily small as compared with that of roads of the Central Vermont. A comparison of the rates from points on the Central Vermont Road to Boston with the Interstate rates of the Chicago & Alton Railroad, northwest of Woodhouse, where prices are graduated by distances, shows the following:

Stations on C. V. R. R.	Miles to Boston.	Rates, 1st Class C. V. R. R.	Interstate Rates on C. & A. R. R., for same distance.
Hartford, Vt.,	146	38	60½
Sharon,	157	40	61½
South Royalton,	162	45	62
Montpelier,	207	55	63½
Essex Junction,	240	55	64
Milton,	251	55	66
St. Albans,	264	55	68
Rouse's Point, N. Y.,	288	60	70
[Ogdensburgh, N. Y.]	[408]	[60]	

(See Mr. Chittenden's Statement.)

g. Again, a comparison of the rates of the Central Vermont Road from Vermont points to New York, with the interstate rates of the Chicago & Alton Railroad, the Chicago, Milwaukee & St. Paul Railroad, and the Chicago, Burlington & Quincy Railroad, shows that the rates of the Central Vermont Railroad are much the lowest for the same or corresponding distances, as is indicated by the following table, which will be more fully explained by a reference to Mr. Chittenden's statement:

Stations on C. V. R. R.	Miles to N. Y.	Rates 1st class.		Rates C. & A. R. R. 1st class.		Rates M. & St. P. R. R. 1st class.		Rates C. B. & Q. R. R. 1st class.	
		C. V. R. R.	Miles.	Rate.	Miles.	Rate.	Miles.	Rate.	Miles.
Chester, -	234	30	234	64	228	70	233	60	
Ludlow, -	248	30	248	65	238	70	248	65	
Rutland, -	273	30	273	70	274	75	275	68	
Proctor, -	279	34	279	70	284	75	281	68	
Brandon, -	290	45	290	70	292	75	289	70	
Middlebury,	306	54	306	72	305	75	306	75	
Burlington, -	340	55	340	75	348	75	336	75	
St. Albans, -	380	60	380	75½	378	77	379	85	
Rouse's Point, -	404	60	404	78	404	82	402	90	

(See Mr. Chittenden's Statement.)

B.

Substantially all the corn, wheat and flour consumed in Vermont comes from the West, and is dropped off at all Vermont points at the Boston competing rates. This has been the practice for years, and has been done to encourage other industries in the State.

	1888.	1884.	1885.

C.

State Taxes.

The state taxes assessed and collected by the State Tax Commissioner for the years 1883, 1884 and 1885, were as follows:

Of these taxes the Central Vermont Railroad Company paid:

1883.	1884.	1885.
\$43,901.68	\$53,459.38	\$50,133.69

The other state taxes raised in the same time were the biennial taxes of ten cents on the dollar of the grand lists of 1883 and 1885.

This was in 1883-1884, \$162,710.58 (½—\$81,355.29); in 1885-1886, \$171,011.26 (½—\$85,505.63); making the total taxes raised by the State each year as follows:

1883.	1884.	1885.
\$280,692.36	\$286,577.05	\$266,141.38

THE CONDITION OF VERMONT INDUSTRIES.

The material prosperity of the people of Vermont has been steadily on the increase since the introduction of railroads into the State, as is shown by the following statistics of the population, the wealth, the condition of manufactures, and the condition of the agricultural interests in the State, taken from the official figures of the last United States census.

INTER S.

a. The population of Vermont since 1830 is shown by the following figures:

Year.	Number.	Per cent of Increase in Preceding 10 Years.
1830 - - -	332,236	0.5
1870 - - -	330,551	4.9
1860 - - -	315,098	0.8
1850 - - -	314,120	7.5
1840 - - -	291,948	4.0
1830 - - -	280,652	18.9

Though the percentage of increase shows a tendency to grow smaller in the last 40 years, this is not necessarily an indication of less prosperity, for the density of population in Vermont had about reached its limit for a farming State in 1840. This is shown by the comparative density of population of Vermont and New Hampshire since 1840, which is as follows:

1840.	1850.	1860.	1870.	1880.
32.0	34.4	34.5	36.1	36.4
to square mile in Vermont;				
31.6	35.8	36.2	35.8	38.5
to square mile in New Hampshire.				

Iowa, Michigan and Virginia were well settled farming States in 1880, and the density of population in those States for that year is given as 29.3, 28.5 and 37.7, respectively, to the square mile.

Vermont has shown a steady increase in her population since 1830, while in the States of New Hampshire and Maine a decrease took place from 1860 to 1870; in New Hampshire a decrease of 2.3 per cent, and in Maine a decrease of 0.2 per cent.

b. The value in property in Vermont has also shown an increase since 1850. The assessed and true value of property in the State from 1850 to 1870 is shown by the following figures:

	Assessed Value.	True Value.
1850 - - -	\$ 76,364,289	\$ 92,205,049
1860 - - -	84,758,619	123,477,170
1870 - - -	149,732,929	235,849,553

For the year 1880 only the assessed value is given by the United States Census Reports, and this was \$86,806,775. The apparent decrease from 1870, as well as the extraordinary increase in 1870 from 1860, was partly due to the inflated prices current in 1870. Gold was at an average premium of 25.3 per cent, and Superintendent Walker, of the United States

Census, estimates that the increase of valuation due thereto was 20 per cent. With these allowances the value of property in the State shows on the whole a decided increase.

c. Manufactures have also increased steadily in Vermont. The value of manufactured products in Vermont for the years 1850, 1860, 1870 and 1880, is as follows:

1850 - - -	\$ 8,570,920
1860 - - -	14,637,907
1870 - - -	32,184,606 (\$27,356,909.)
1880 - - -	31,554,366

Allowing 15 per cent as the extra increase in 1870 on account of the state of the currency in that year, the figures for that year would stand \$27,356,909, showing an increase of nearly 75 per cent between 1850 and 1860, of nearly 100 per cent between 1860 and 1870, and of about 15 per cent between 1870 and 1880.

d. The condition of agriculture in Vermont also shows a marked improvement since 1850. The number of farms, the number of acres of improved land, the value of farm lands and the value of improvements and machinery used thereon for the years 1850, 1860, 1870 and 1880, is shown by the following table:

Year.	Number of Farms.	Acres of Improved Land.	Value of Farm Lands.	Value of Imp. and Mach. Used.
1850 - - -	29,768	2,601,409	\$ 68,867,227	\$ 2,739,282
1860 - - -	31,556	2,828,157	94,289,045	3,655,955
1870 - - -	38,827	3,078,257	139,367,075	5,250,279
1880 - - -	35,522	3,286,461	109,346,010	4,879,285

Making the same allowance for the state of the money market in 1870 as has been made above, a marked and almost steady increase is shown.

The number of persons engaged in agriculture in Vermont in 1880 was as follows:

Total persons engaged, 55,251; males, 55,037; females, 214.

Ages: 10 to 15—male, 1,670; female, 10; 16 to 59—male, 44,356; female, 160; 60 and over—male, 24,249; female, 883.

(The membership of the Vermont State Grange is about 2,000, composed of both male and female members.)

The average size of the farms in six States in 1880 was as follows:

Vermont, 137 acres; New Hampshire, 116; Maine, 102; New York, 99; Michigan, 90; Iowa, 184.

The productiveness of Vermont farms compares favorably with that of the farms of other States. Following is given the number of acres of improved land in 1879, in the States of Vermont, New Hampshire, Maine and Iowa; the value of the farm products of each of these States in the same year, and the average value of products per acre:

	Number of Acres of Improved Land.	Value of Farm Products 1879.	Value per Acre 1879.
Vermont - - -	3,286,461	\$ 22,082,656	\$6.73
New Hampshire - - -	2,308,112	13,474,830	5.84
Maine - - -	3,484,908	21,945,489	6.30
Iowa - - -	19,866,541	186,103,473	6.34

Since 1850 the amount of agricultural products annually raised in Vermont has increased. There has been an increase in the number of swine, oats, buckwheat and cattle annually produced; also a marked increase in

the production of butter, milch cows, horses, live stock, hay and barley. The amount produced of the last six named articles for the years 1849, 1859, 1869 and 1879 is given as follows:

	Butter, lbs.	Hay, tons.	Barley, bushels.	Horses, No.
1849 - - -	12,187,980	866,153	42,150	61,057
1859 - - -	15,900,357	940,178	79,211	69,071
1869 - - -	17,844,396	1,020,669	117,333	65,015
1879 - - -	25,240,826	1,051,183	267,625	75,215

	Live Stock, Value.	Milch Cows, Number.
1849 - - -	\$12,648,228	146,128
1859 - - -	16,241,989	174,667
1869 - - -	23,888,885	180,285
1879 - - -	16,586,195	217,088

The amount of Indian corn produced in 1879 is about the same as that produced in 1849. The only leading agricultural products of which the annual production has decreased are rye, hops, wheat, cheese, sheep and wool. The decrease in the case of many of the last named articles, and especially in the case of sheep and wool, is to be attributed to circumstances other than the influence of railroads.

(See *Compendiums of the 9th and 10th United States Census.*)

**ARGUMENT OF HON. GEORGE F. EDMUNDS
FOR THE VERMONT STATE GRANGE.***

I shall, if it please Your Honors, occupy only a very few moments of your time in discussing this matter. First and principally, because I do not believe it necessary to you, or to the just disposition of this case; secondly, because I do believe it necessary that my honorable opponents and I should get the train and go home this evening.

The Grangers.

First, then, as to the grangers, my clients, in respect to whom my Brother Fifield and the gentlemen on the other side have, from time to time, made observations altogether uncompimentary, as to their being "mythical," "non-existent persons," and so forth. All I have to say in reply to that is, that the farmers need no defense from me. They are a good deal more numerous than any other part of the people of the United States. I happened to see in a newspaper this morning an account of a meeting of 45,000 of them in Pennsylvania, the other day. There are a good many of them everywhere, though they do not all belong to organized granges, for the grangers' associations do not embrace all the farmers of the country, any more than the law associations embrace all the lawyers. There are a great many persons who have been admitted to the bar who do not belong to any law association; still we are supposed to be entitled to the same rights and privileges as those who are members of a law association. And the farmers of this country, and of this State, therefore, have the same rights, whether members of the grange or not. They have the right to associate and defend their interests, the same as the railroads, the clergymen, the manufacturers, the Knights of Labor, or any other members of the community, so that I need not take up any time in vindicating them as standing before you and asking justice at your hands under the law for the classes of industry that they represent. You are here as a public tribunal of investigators, before whom any citizen, or any set of citizens, having a well founded ground of complaint, may come and state their grievances. They are entitled to be heard, and if a wrong is being done to them, you are

bound to see that justice is done. So much for that, which I will again say was quite unnecessary for my clients.

Scope of the Interstate Commerce Act.

Let us see where we are. This Act in its first and second sections seems to be couched in language that is very plain to the unsophisticated mind. It appears to be intended to regulate and control, according to good methods, and consistent with justice, the operations of interstate commerce by railways and water communications connected with them. So far as it was possible for Congress, within its constitutional power, to reach every agency engaged in those transactions, it was to be exerted. The object was beneficent and the nature of the Law was intended to reach, and, so far as language can go, I think does reach every operation of interstate commerce that is carried on by no matter how many agents or connecting local lines, so that they are engaged in a continuous transmission of men or things by any "arrangement," as the Law says, between them in relation thereto. There can be no escape from the provisions of the Law by any railroad in the United States, unless it is restricted by its charter and operations to purely local state business. Every road that provides facilities for the business of connecting roads, and engages in the taking of goods out of its own State on to a railroad in another State, by any sort of communication or arrangement, or combination, or understanding, by whatever contrivance or form it is reached, comes within the scope of the operation of this Law. When the States have undertaken to interfere with the abuses and wrongs that have been committed all through the country, the supreme court, much against its wishes and will, I believe, was obliged to decide that it was within the purview of Congress alone. So that I insist the language of this Act shall be given the most liberal and benign construction, in order to work the good effects it was intended to accomplish. It is not to be construed like a criminal statute, but every interpretation and construction that can aid and reach the great object Congress had in view should be given to it. Enough for that, because I am confident Your Honors will all agree with me. I do not need to resort to any strained interpretation to apply it to this case. I only make these observations to state my views of its general purpose and effect.

The Defendant Roads Within the Power and Provisions of the Act.

In this case we find certain facts sworn to by Mr. Porteous, although he seems to know a good deal less when he is on the witness stand than he does when he is off from it—as careful men sometimes do—and his superior officer, Governor Smith, seems to be affected with the same malady, unlike Mr. Mellen, who spoke fully and frankly, as did Mr. Mills, and these other gentlemen. As I said, we have the facts sworn to by Mr. Porteous, as you will see when you read over the reporter's notes, that in respect to the transmission of business between the places on the line of the Boston & Lowell Road (and by that I will include all from Boston to White River Junction,

*From stenographic notes of John H. Mimms, Esq., St. Albans, Vt.

without naming the concerns that compose it), whether from Boston or any place between that point and White River Junction, on business going into the State of Vermont, that the two roads have arranged and agreed upon a basis upon which that business shall be done and the prices which shall be paid for it; an arrangement and understanding was arrived at and consummated between the agent of the corporation of the Central Vermont Railroad Company, on the one hand, and the agent of the corporation of the Boston & Lowell Railroad Company, on the other, and perhaps some of the other roads in the route, but mainly between the two I have named. That arrangement was made in advance as to what rates should be charged for that joint business, and the division that was to be made from the collection of those rates, as shown by the division list put in evidence. If this is not a joint arrangement (which is more than the Law requires), if it is not an "arrangement," to use the very language of the Law, for the carriage of goods from one State into another over a common line, then there is no language that can be taken out of our English tongue that can accomplish it. And I leave that. That is all I wish to say about that.

The National Despatch Line.

Now, as to this National Despatch Line. That is just the same only it is done in a different form. We have learned from the evidence in this case what this National Despatch Line is. As some of the witnesses stated, it is only a name, or a trademark. But the public have never known what it really is. A well known man in this town, who is a large shipper, said to me that he had sent millions of dollars of freight out of this town by the National Despatch Line, supposing it to be a regularly organized corporation, having a body and capital and officers, and somebody to look to if there was any loss or damage to be made good. He was much amused to find that the National Despatch Line was in reality a good deal better and stronger than he supposed it was in that respect, for it had turned out to be composed of the Boston & Lowell Railroad Company, with all its goods, assets and effects; the Central Vermont, with all its goods, assets and effects; the Grand Trunk Railway and all its belongings, and a good deal better. But we find that this National Despatch Line is simply a name by which these three operating railroads transact through business together; by which they convey freight from Boston to the West, and to Montreal and East, from those places to Boston and eastern points. That brings these roads within the Act, I assume. The question, then, is simply whether, in order to bring any one of them or all of them within the fourth section of this Act, it is necessary that they should all combine in the charging of a greater rate for a shorter distance than for the longer one. If it is necessary that they should all combine, then it is clear to my mind, as my learned friend Strout says, that the Grand Trunk Railway Company has not had anything to do in respect of the charges that are to be made between Boston and West Lebanon, or White River Junction, or between Boston and White River Junction, Montpelier, St. Al-

bans, etc.; and the reason it did not combine was that it had no interest in that matter. If you take the proposition. In the reverse, the Boston & Lowell would have no interest whatever and could have nothing to do and would have nothing to do with the question of rates on freight from Toronto or Detroit to Montpelier, although that would have come from a foreign country to the United States. The only way, on that theory of the Law, that you could have the fourth section operate at all would be between two roads in adjoining States who made an interchange, each agreeing that it would charge as a common carrier, so much into the other State, and would collect the carriage money and pay it over. This would bring them within the operation of the Law, I think you will be satisfied, as I certainly am. Take the Boston & Lowell, where Mr. Mellen swears they got once and a half or twice as much for carrying a car load of chairs from Boston to White River Junction, for use there, as they would if the chairs were going to Montreal or beyond. They are hauling the same goods over the same line in the same direction, and the same distance in one case, for less than half what they get in the other. Putting such a construction upon the business as is urged here, there is not a single road in the world, not even between two States, that would be under the provision of section 4, and could not be. But this is the position they take. It is the philosophy and dialectics of sophistry that people who feel the hand of the law and are conscious of doing injustice, resort to—as is fair for counsel if they can persuade anybody to believe it—to escape from a plain responsibility.

The same is true in the reverse order. The Central Vermont will not be liable under that claim, because they have nothing to do with what the Lowell Road gets the moment you cross into New Hampshire, and the Lowell nothing to do with what the Central gets the moment the line of Vermont is crossed the other way. Neither is responsible. It is only necessary to state such a proposition to see the fallacy of it, and make an end of it. Congress has not any power over interstate commerce, if that proposition be correct.

But, if there being any arrangement to do that thing brings them within the jurisdiction and power of Congress, then the doing of it must be within its remedial power of prohibition. And they do it. I will call your attention to the case where the Boston & Lowell, within its own State and its own corporate boundary, makes the rates you have heard in the evidence. It does not charge any more for carrying goods to Manchester than it does to carry them to White River Junction, if it is going to stop there. Mr. Mellen tells you with entire frankness: I get twice as much for doing that thing to White River Junction as I do if it is going to Montpelier. But if it is going to be a purely local, intrastate traffic, then I do not charge any more for carrying a thing to Manchester than to White River Junction; but if it is going to be interstate traffic, then I fly directly in the face of the Law. Although it does not appear on my tables, yet as a matter of fact I make an arrangement by which I get twice as much for my short dis-

tance as I do for the longer distance of which I form a component and "arranging" part.

Excusing Circumstances and Conditions.

Now, then, we come to the only question in this case, that is under section 4, as to whether it is made out that the circumstances and conditions are such that you are bound to find, or ought to find fairly and justly, that these companies ought to be relieved from this duty. I will say something later upon the question under the other part of the statute. The first reason they urge as an excusing circumstance is the length of their line. I respectfully submit that the length of line over the same line over which the freight goes any short distance and long distance is no different as to these roads than it can be on any other line in the country. So that length of line only enters as one element in the matter of competition at some distant point of the system, and in no other respect whatever.

Then you come to the difficulty of weather and climate. Is that an element that makes a special circumstance and condition over the same line? If I live in the tropics, where there is no snow at all, is it to be said that because it is hotter at one place on the line than it is at another point on the same line, there is a reason for making a difference in the rates to those respective points? Of course not. If I live in the Arctic, as we do here in the winter, does it cost a railroad any more to haul a short distance through the snow and get its cars out of the snow banks than it does to haul it a longer distance over the mountains in the winter? It must cost less, under the circumstances, for the shorter distance. The idea, therefore, that the snow or the grades claim has anything to do with this question of charging more for a short distance than for a longer one over the same line, is preposterous, with all respect to the honored gentlemen on the other side.

Two Sides to the Question.

There are two sides to the subject of money making and profits, it might be added. These railroads appeal to you to allow them to make a fair profit, as much as they fairly and reasonably can. That is proper enough. But they owe the same duty to their customers, and you owe the same duty to their customers. The weather is no colder for the railroads in Vermont than it is for the farmer. It is no colder in Vermont in the winter for the railroad, than it is for the manufacturer, or the passenger, or anybody else. They are all under precisely the same conditions on the same line, as of course they must be. Therefore, all those considerations fail, entering for what they are worth merely into the consideration of competition at a distant point.

Now, then, I submit with great respect, and I think it will turn out to be so in the next ten years, not upon any supposed construction of this Law that you may make, or upon any too extended a construction of it, but as a fact in the social economics of this country, resting upon justice which gives to every man his due and fair play to all, that every service that a railroad or any body else does for another under public regulations, and of which he is not

the master (as every man has a right to receive profit from his labor which he can sell at any price he chooses to take, or not), will be regulated according to the value of the services performed and not according to the particular circumstances of the person or the corporation who has to perform it. What right has a miller, for illustration, to charge me ten cents a bushel for grinding wheat because there is a mortgage on his mill? What right has a railroad company, like one out in Ohio, managed by Ives, to put its rates up double because double the amount of its stock has been fraudulently issued, into innocent hands, I will assume; and, therefore, to pay a profit the rates must be raised, and the public made to pay it? What right has a railroad to put up its rates above a fair value for the service performed, because the management has been extravagant or unfortunate, and got itself into debt? I deny the proposition. And I say that in less than ten years, unless the people of the United States have lost their reason, this matter will be dealt with by Congress, as far as they have the power, and you will not be troubled with any question about considerations as to competition. You will only be troubled with the question of what is reasonable according to the value of the service performed, because that stands, and can only stand upon principles that are beyond the reach of any contrivances that men may make.

But we will take it as it is. I say on the construction of this Law itself, fairly and justly, on the special circumstances and conditions, that the fact that there is competition, although it is the strongest that there is, is yet the very smallest of elements that should enter into the consideration of this question. The object and purpose of Congress in making use of that phrase was to guard against some extreme and possible circumstances that could not be foreseen. It was intended that those special circumstances and conditions related to the work and the service to be done, and the relations of the parties between whom and by whom it was to be done, and not the relations either of the shippers to the business, or the railroad to its competitors, its enemies or its friends.

But we will suppose it is not so. We will suppose that competition is an element to be considered. Where would you find yourselves, then, upon any such competition as exists here? Here is this line, and here are the other lines in New England competing for this traffic; the lines from Boston to the West crossing the State of New York, or from Baltimore to the West, from Savannah to the West and East and North and South. Every road can say the same thing and be excused from compliance with the requirements of the Law. As an illustration of my idea, take the Passumpsic line, if that be an independent one. It will form a good basis for example because it is a parallel line to the Central Vermont in this same north country, and a competitor with the Central Vermont. If a charge were brought against the Passumpsic, that road would say: I am in competition. You must not touch me. I must charge more for the shorter than for the longer distance, because there is such a strong competition to contend against. The

Boston & Albany could say: We are in competition with the Fitchburg. Or the Erie could say: We are in competition with the New York Central. And so every one of these corporations could let the other one out by the shuffling of the cards. It would be somewhat after the plan adopted some time ago by the banks in this State, by which the specie used to be circulated when the bank examiner came around. One bank would present its specie to the examiner, who would count it and certify that it was all right, and the specie would at once be hurried off to the next bank to be presented to the examiner as its specie, and so on until it had gone all the rounds.

Every railroad competes with each other; and if the fact of competition is to be an element that is to control this question, there is not a railroad in the United States which reaches out of its own State (that is probably too strong a statement) but there are not ten roads in the country that reach out of their own State. So that they could get out one after another, and all make great prices for short distances and small prices for longer distances at the expense of the shippers of freight, and the public. This honorable body will see the force of that, and you are not going to let these corporations, whom you were created to bring to some sense of justice and fairness among men in this country, manage to evade this law by playing off against each other and getting beyond the control of this Act in that way. It is not a special and peculiar circumstance and condition; it is a universal circumstance and condition in all these long haul cases, and therefore it is not one of the ideas that could have been in the minds of the law-makers when they said that in peculiar and special circumstances and conditions you might be compelled to relieve a railway for a limited or unlimited time from the operation of section 4.

Long Haul Rates for Short Distances Grossly Unjust.

One word more and I am done. Upon the evidence as it stands in this case, even if these short haul rates were put down to the long haul figures, then the short haul rates would still be grossly unreasonable in fact. I say it is proved to be so by the testimony. All the facts that are put in evidence here, as to how these operations are carried on and what they get for the work they do, tend to establish the force of the statement. Governor Smith told you the cost of carrying freight per ton per mile is, on an average, four mills per ton per mile over the line complained of, taking the fast and slow trains together. He has told you about the car service, what that is and how profitable it is to the company owning the cars. The stock of the company whose cars carry this very freight, and have carried it for fifteen years pays dividends from ten down to four per cent and on a watered capital at that. Governor Smith also tells you that they make money in this long haul business, and I presume he has told, as everybody should, all that will be of benefit to his case, although he has not told you how much they in fact make out of the business.

If there is a profit in carrying a car load of corn from Detroit, or a car load of hay or any other commodity from the Canada line to the line of New Hampshire, or to Boston, or *vice versa*, at a rate of less than 30 cents per 100 pounds, or whatever it may be, I do not pretend to get the fractions, but an enormously less rate than is charged for the short distance, then the profits for doing that same kind of work, over the same line at the same time of year, at once and a half or double the charge, must be enormously and unreasonably large. This is demonstrable, when you look at these statements made here as to the rates and take the elements of the cost and the profit on the car service. When you find the same kind of work being done over the same line under the same circumstances, at half the rate and paying the road a profit, I insist upon it, it is made out as fully as it ever can be made out in such cases as this at any time.

When it is demonstrated that there is a profit in the lower rate—the through rate—it is demonstrated that the greater rate for the lesser distance is grossly unjust. And even if the short haul rate should be brought down to the longer haul rate it would still be grossly unjust in proportion to the expense of doing the business. It is not to be wondered at that the profits of the farmer in Vermont, Ohio, Illinois, or anywhere else, are small. It is not to be wondered at that they make no profits at all; their profits are apparently somewhere else. So I say that the short haul rates should at least be brought down to the basis of charge for the longer haul. That is what I insisted upon last night, and I should have been willing, as I stated at that time, in the hope of finishing this matter up for the time being, to have had this matter stand upon the rates being brought down to that basis and let the matter stop there, with liberty, after a reasonable trial, to apply to the Commission for relief. But we could not make any arrangement about it and therefore having to go through the whole case, I insist that on the evidence in this case what I have said and claimed as to the intrinsic unreasonableness of these rates is true, and that they would still be unreasonable, even if brought down to the long haul minimum.

The Proposition.

I think that it is all it is desirable to say for the merits of this case. I only wish to say in closing, that we thank you, as the other gentlemen have done, for your patience in bearing with our somewhat desultory management of the case, and with what I and my colleague have said; I say "colleague," as we have no official relations with the distinguished gentleman who represents the Boston & Albany Railroad Company. In bringing this application we are not actuated by any spirit of hostility to these roads or any others. Quite the reverse. The railway service of the United States is just as important to its welfare and prosperity as any other one of its social enterprises and institutions. But the fact that it is a very necessary element of our prosperity, and ought to be encouraged, furnishes no ground for its being granted unlimited and unjust license to oppress anybody else. That is the proposition.

REPORT AND OPINION OF THE COMMISSION.

Thereafter, on September 20, 1887, the Commission rendered its decision, with the following report and opinion (the head notes being by the Editor):

1. Where, in a proceeding against several connecting railroad companies for charging more for a short than for the long haul, one of the companies claims that its only participation in the alleged offense consisted in its sharing in the low charges on the long haul, which were not in themselves alleged to be illegal, the complaint should not be dismissed as against such company, where its interest and the liability of the low rates on long haul traffic to be affected by changes made in the higher rates on short haul traffic is so great that in case such company had not been made a party, and should ask to be made a party, it would be proper to so order.
2. Where, in a proceeding by one railroad company (here, the Boston & Albany R. R. Co.) against other companies, for charging more for a short than for the long haul, it appears that the rates alleged to be illegal are local rates; that the petitioner does not pay or participate in paying them; that they are not competitive rates to those imposed on the petitioner's road; and there is no allegation that such rates are excessive or unjust, and the sole grievance of the petitioner is that the defendant companies accept through traffic at lower rates than are made by the petitioner and its connections,—such petitioner has no standing to maintain the proceeding.

3. A desire to obtain a construction of the Interstate Commerce Act is not sufficient to support such proceeding.
4. The right to make greater charges for short than for long hauls is exceptional and depends in every case upon the peculiar circumstances and conditions; and a ruling in reference thereto in the case of one carrier would not be applicable to another carrier differently circumstanced.
5. It is not held, however, that a complainant must necessarily have a pecuniary interest in order to entitle him to be heard; and it seems, under the provisions of the Act, that when an infraction of the Act would constitute a public grievance, it may be the duty of the Commission to investigate it, when brought to its attention by a responsible party in a duly authenticated form.
6. Held, that the persons composing the Vermont State Grange of the Patrons of Husbandry had such an interest that it was proper that they, as an association, should raise the question as to the justice of the high rates complained of by them, and that the proceeding was maintainable upon their petition.
7. If several railroad companies join in making the joint tariff which constitutes the lesser charge on the longer haul, while one or more of their number makes the greater charge on the shorter haul, the case is within the fourth section of the Act; and those who make such greater charge are called upon to justify it.
8. By the word "line" in the Act, a physical line is meant, not a business ar-

Note. Following is the letter referred to on page 535 at line 20, 2d column, as in evidence:

New York, April 27, 1876.

Com. Vanderbilt, President.

W. H. Vanderbilt, Esq., Vice Pres't.

N. Y. C. & H. R. R. Co.

Gentlemen

Believing that the existing difficulties in regard to the transportation of east bound traffic are not understood as thoroughly as they should be, and that these differences should be adjusted on a basis of equity to all interests, we have, through telegraphic correspondence, requested Mr. Hickson of the Grand Trunk Line, and Gov. Smith of the Vt. Central, to meet us in New York and talk the subject over, to see whether we could not arrive at some satisfactory basis of adjustment.

We believe that your shorter line between the West and New England ought to make a reasonable concession to the Grand Trunk route, which embraces that line, the Vt. Central, and other connections, owing to its location and climate, and other matters incident to it as a through route.

In order to protect and promote the interests of the various roads of the country as well as the best interests of the public, we trust you may find it to your interest to agree, if it can be arranged, to allow the Grand Trunk route the following scale of differences on east bound traffic to competitive points in New England, which are much less than those heretofore existing, and which we deem under the circumstances to be reasonable.

On live stock 7c; on out meats and perishable property 6c; on first and second class, of which there is but a very limited quantity, 4c.

The Grand Trunk to carry third and fourth class,

INTER 8.

which embraces 90 per cent of the entire traffic at equal rates as fixed from time to time.

The matter of west bound rates from New England to remain as adjusted between your lines and the lines of the Grand Trunk route.

Looking over the whole ground it seems to us that if we can prevail on Mr. Hickson to agree to this schedule, you should agree, as well for your own interests as those of all the other lines in the country, to make this adjustment; and if it is made that the Grand Trunk route should then become one of the eastern trunk lines, and be a part of the organization for making and adjusting rates and classifications from time to time, on the general basis that has prevailed among the four trunk lines during the past year.

By adopting this policy its results must be to protect large amounts of property, owned in this and other countries, from a destruction that we think under the circumstances is not warranted; and we believe that the adjustment of this whole matter rests entirely with you.

The pending consequences, are in our opinion so serious that we must respectfully request you to give us an answer by Saturday morning of this week. If you will address your reply to us to the care of Mr. Jewett, at the Erie Railway office, we shall be glad to co-operate, to the end that an adjustment of existing and anticipated difficulties may be reached, and destructive competition be avoided.

Signed,

Thos. A. Scott, Pres't. Penn. R. R.

H. J. Jewett, Pres't. Erie R. R.

Jno. King, Vice-president B. & O. R. R. Co.

rangement; and one piece of road may be part of several lines.

9. **Through business over the defendant companies' roads was done by the National Despatch Line** (a fast freight line, neither a corporation nor an association of persons, but a name under which business was done), the several roads paying mileage for the cars used, furnished to such line by a car company, and the earnings of such line being divided among the roads in agreed proportions. The tariff for the long haul traffic in question was made by the manager of the Despatch Line, who was the agent for all the roads over which it did business, and was acquiesced in by them. *Held*, that the defendant companies were responsible for the long haul rates.
10. *Held*, that such peculiar facts are not found to exist as will justify the greater charge over the shorter line by the Central Vermont roads.

Cooley, Chairman:

On May 24, 1887, the Boston & Albany Railroad Company presented its petition stating "That the Boston & Lowell Railroad Company, a Massachusetts corporation; the Concord Railroad Company, a New Hampshire corporation; the Northern Railroad Company, a New Hampshire corporation; the Central Vermont Railroad Company, a Vermont corporation, and the Grand Trunk Railway Company, established by the laws of Canada, have issued schedules of joint rates under the name of the National Despatch Line, and under these schedules the rates from Boston to Detroit, Michigan, are: 51-45-35-24-20-18 for the six classes of freight, respectively; and to Montreal, Canada, 45-40-30-23-20-18 for the six classes of freight, respectively; while at the same time the Boston & Lowell, Concord, Northern & Central Vermont Railroad Companies, a part of the roads included in the National Despatch Line, have made and maintained rates from Boston to St. Albans, Vermont, a station on the Central Vermont Railroad, a less distance from Boston than either Detroit or Montreal, in the same direction over the same line as follows: 60-50-40-27-24-17 for the six classes of freight, respectively.

"The National Despatch Line comes into competition with the Boston & Albany Railroad Company and its connections at Detroit and other western points.

"The grievance which this company and its connections have is that the National Despatch Line makes rates to Detroit and other points in the West less than the Boston & Albany Railroad Company and its connections make to the same points; while at the same time a certain combination of roads, including a part of the roads in the National Despatch Line, viz.: the Boston & Lowell, Concord, Northern & Central Vermont Railroad Companies, maintain higher rates to St. Albans and other intermediate points—that is, higher rates for the short haul than for the long haul on the same line in the same direction, on the five upper classes of freight; whereas, if the rates to Detroit and other western points were made the

same—no higher and no lower than to any intermediate point on the same line in the same direction—your petitioner would have no reason to complain."

On the same day the complainant presented another petition representing that "the Boston & Lowell Railroad Company, a Massachusetts corporation; the Concord Railroad Company, a New Hampshire corporation; the Northern Railroad Company, a New Hampshire corporation; the Central Vermont Railroad Company, a Vermont corporation; and the Ogdensburgh & Lake Champlain Railroad Company, a New York corporation, have made an arrangement by which the Steamship Company operated by the Ogdensburgh & Lake Champlain Railroad Company has issued a tariff from Boston to lake ports in the United States at a less rate than is charged at the same time from Boston to Ogdensburgh and other points on the same line at a shorter distance from Boston in the same direction. The rates are as follows:

From Boston to—

Cleveland, O.	} 41-36-29-20-17-14 for the six classes of freight respectively.
Detroit, Mich. Port Huron,	

To—

Milwaukee, Chicago,	} 44-39-31-23-19-16 for the six classes respectively, and from Boston to Ogdensburgh, 60-50-45-30-25-17 for the six classes of freight respectively.

"This line via Ogdensburgh comes into competition with the Boston & Albany Railroad Company, and its connections at Cleveland, Detroit, Port Huron, Milwaukee, Chicago and other western points.

"The grievance which the Boston & Albany Railroad Company and its connections have is that the line via Ogdensburgh makes rates to the above places less than the Boston & Albany Railroad Company and its connections make to the same points, while at the same time the above named roads, viz.: the Boston & Lowell, Concord, Northern, Central Vermont, Ogdensburgh & Lake Champlain Railroad Companies maintain higher rates to Ogdensburgh and other intermediate points; that is, higher rates for the short haul than for the long haul on the same line at the same time in the same direction; whereas, if the rates to Cleveland, Detroit, Port Huron, Milwaukee and Chicago were made the same, no higher and no lower than to intermediate points on the same line in the same direction, your petitioner would have no reason to complain."

To these petitions the several defendants made answer, but it is deemed unnecessary to do more in this opinion than to give one in each case.

The answer of the Boston & Lowell Railroad Company to the petition first above recited, denies that the defendants "have issued joint rates under the name of the National Despatch Company as therein averred; and further denies that the line of railroads, or the railroad which established and maintains any joint rates, or any rates for the carriage of freight between Boston and St. Albans and intermediate points, is the same line or railroad corporation as the line which establishes and maintains the rates of freight between Boston

and Detroit and other western points, as alleged in said petition; and further denies that the same carrier or line of railroads or this defendant charge higher rates for a short haul than for a long haul over the same line in the same direction for the like kind of property in the manner set out in said petition; and further alleges that the transportation of freight between the points named in said petition has not been and is not under substantially similar circumstances and conditions within the true intent and meaning of the Act of Congress.

"And this defendant further says that the Boston & Lowell Railroad, the Nashua & Lowell, the Concord, the Northern and the Central Vermont Railroads are connecting railroads so far as trackage is concerned, from Boston, Mass., to St. Albans, Vt. These roads are not managed or controlled by each other, except that the Nashua & Lowell and the Northern are in fact operated by the Boston & Lowell; nor is there between them an arrangement for a continuous carriage or shipment of property over the same, although it is true that they sometimes make joint tariffs of rates between Boston and St. Albans, aforesaid, and interchange cars. At the time of filing the petitioners' complaint the rate fixed by said joint tariff from Boston to St. Albans was and is as stated in said petition.

"These defendants further say that the National Despatch Line, referred to in the said petition, is a line of cars running from Boston, Mass., to all large points in Canada and in the Western States, west of St. Johns in Canada, via the Grand Trunk line. They consist of 3,750 freight cars, marked National Despatch Line, and they are owned as follows:

"The National Car Company, a corporation chartered and organized under the laws of Vermont, owns 3,000 of said cars. The Grand Trunk Railway Company of Canada, owns 700, and the Chicago, Pekin, & South Western Railroad owns 50. The roads over which the National Despatch Line sends freight, and which use the cars, are as follows:

"Boston and Lowell (and others are enumerated, including some whose lines extend beyond the Mississippi).

"The National Despatch Line have their principal office in Boston, Mass. They solicit freight at Boston and other places in New England for transportation to all prominent points in Canada and the Western States west of St. Johns. They have agencies in Boston and other eastern points and in Chicago and other western points. They do not receive or solicit freight at Boston or other New England points, the destination of which is south of St. Johns, for west bound freight. They issue their own bills of lading; and they also issue and publish their tariff for transportation from New England points to points in the Western States and Canada west of St. Johns. They do not issue bills of lading for west bound freight from New England points to points south of St. Johns, nor do they make a tariff nor profess to be carriers between those points in respect to west bound freight destined south of St. Johns. St. Albans, Vt., is South of St. Johns, and is not embraced in the tariff made by the National Despatch Line for west bound freight. The rates made to points west of St.

LYNN S.

Johns, where there is competition with complainant's line, are made under this tariff by the National Despatch Line.

"And this defendant denies that the joint tariff aforesaid constitutes an arrangement for a continuous carriage, within the meaning of the first section of the Interstate Commerce Law; but if it does, then it alleges that the joint tariff from Boston to St. Albans makes a wholly different line from the one made by the joint tariff of the National Despatch Line, within the meaning of the fourth section of said Law.

"And this defendant further says that the rates from Boston and intermediate points to St. Albans are reasonable; that nobody along the line is dissatisfied with the rates made; that the Boston and Albany line is not a competitor for traffic for west bound freight from Boston or intermediate points to St. Albans, and is in no way interested in the rates that are made thereto. It further says that the Central Vermont road runs through a sparsely settled country that the local traffic thereon is small, and that it was constructed at a great expense through an uneven country with high grades; that the road has been foreclosed and reorganized, and the original capital put into the construction of the same has been lost; that if said road was compelled to depend on local traffic, it could not pay its expenses and interest on its bonded debt, to say nothing of the stocks of the road as it has been reorganized. And this defendant further says that the additional expense of doing through traffic as compared with local traffic is small in degree; that its road is the same whether the traffic is local and small or large by reason of through business; that the profit which it makes out of the through business is quite as important to it as the profit on the local business, by reason of the volume of the through traffic as compared with the local traffic; that the volume of business from Boston to St. Albans is not one twentieth part of what it is to points beyond there, westward. That it has been to very large expense for terminal facilities, among other things, to accommodate such through traffic; and this expense amounts to more than \$3,000,000.

"And these defendants further say that the Central Vermont Road extends northerly from St. Albans to the state line, a distance of about ten miles; that it there connects with the Montreal and Vermont Junction Railroad, a Canada corporation, which extends about twenty-two miles northerly to St. Johns, in Canada, where it connects with the Grand Trunk Railroad, which extends through Canada to Windsor, opposite Detroit.

"It is over this line that the National Despatch cars principally run.

"And this defendant further says that the rate made by the National Despatch Line from Boston to Montreal is, and was at the time of the filing of the petitioner's complaint, the same as stated in said complaint, and for the following reasons: There are many competitors at Boston for traffic to Montreal; there are none for traffic to St. Albans. Boston traffic is taken by ocean steamers to Halifax, Nova Scotia, and St. Johns, New Brunswick, and thence by Cana-

dian Railways to Montreal. It is also taken via Passumpsic and Southeastern Railway to Montreal, the latter railroad being a foreign corporation. Traffic is also taken from New York to Montreal by the Delaware & Hudson Canal Company, which extends from New York City to Rouse's Point, within fifty miles of Montreal, and is a railroad entirely within the State of New York. Halifax and St. Johns, N. B., are foreign cities, and together with New York are competitors with Boston for the sale of goods to the merchants of Montreal. Unless the rate of freight is as low from Boston to Montreal as from the aforesaid cities to Montreal, the traffic will not go over the roads used, as the National Despatch Line. The Grand Trunk via Portland is the strongest competitor for traffic from Boston to Montreal, and is a foreign corporation. The National Despatch Line make the rates they do from Boston to Montreal from necessity and and by reason of competition, and for no other reason.

"And this defendant further says that the rate made by the National Despatch Line from Boston to Detroit is and was as stated in said petition, at the time of filing thereof. There are many competing lines for Boston traffic to the West, and especially to Detroit. The Baltimore and Ohio takes traffic at Boston by ocean steamers to Philadelphia and Baltimore, and thence over their line to all large points in the West. The Boston and Albany Line via the New York Central and Michigan Central Railroads and steamships from Buffalo takes freight westward to all lake points, and more especially Detroit. The Grand Trunk Line via Portland is still another line in competition for west bound traffic to Detroit and all other large points in the West. The Grand Trunk Railway Company is a foreign corporation, and their line runs principally through Canada to Windsor, Ontario, opposite Detroit, and Point Edward, Ontario, opposite Port Huron, Michigan. The defendant's line from Boston to St. Albans, in connection with the Ogdensburgh and Lake Champlain Railroad and the line of boats on the Great Lakes, called the Central Vermont Line of Steamers, constitute still another line which comes in competition with the National Despatch Line at Detroit and other western points. The Canadian Pacific, another foreign corporation, is in competition for this same traffic. Many others might be named, and especially the New York and New England and its connections, also the Fitchburg and the Hoosac Tunnel Line.

"And this defendant further says that these competing lines largely dictate the rates from Boston to Detroit and other competing points in the West; that the defendant's lines must make as low rates to these points of competition as the other lines, or go out of the business; that the through business to competing points is important to this defendant and the other connecting roads, and is a source of large profits to this defendant. And this defendant further says that the circumstances and conditions under which freight traffic is taken and transported from Boston to St. Albans is wholly dissimilar to what it is in respect to freight traffic which they take and trans-

port west of there to points of competition, and more especially Montreal and Detroit. That the rates made from Boston to Montreal and Detroit, respectively, are made from necessity and for no other reason; that the petitioner is in no wise interested in the rates from Boston to St. Albans; that its motive in filing its petition is to break down one of its principal competitors for through business from Boston to Detroit and other points in the West, and from no other motive. And this defendant further says that it has acted in good faith in the premises; that it has given the best construction it could to the Interstate Commerce Law, and under the advice of counsel, and if it has erred it will ask leave to file its petition to be relieved from the operation of the fourth section of said Act."

The joint and several answer of the Central Vermont Railroad Company and the Ogdensburgh & Lake Champlain Railroad Company to the petition secondly above set forth says, that "the Boston & Lowell, the Nashua & Lowell, the Concord, the Northern, the Central Vermont, and the Ogdensburgh & Lake Champlain Railroads, form a connecting line of railroads, so far as trackage is concerned, from Boston to Ogdensburgh, N. Y. These roads are not managed or controlled by each other, except the Nashua & Lowell and the Northern are under lease to the Boston & Lowell, and the Ogdensburgh & Lake Champlain is under lease to the Central Vermont Railroad; nor is there between them an arrangement for a continuous carriage or shipment, unless it may be implied from the making of joint tariffs and the interchange of cars. At the time complained of in the petition there was, and still is, a joint tariff for west bound traffic from Boston to Ogdensburgh over the aforesaid roads, at the rates stated in the petition.

"From Ogdensburgh there is a line of eight steamers which run between there and Chicago and touch at various points on the Great Lakes, and more especially at Cleveland, Detroit, Port Huron, Milwaukee, and Chicago. This line of steamers is controlled by the Central Vermont Railroad Company, and they have a joint tariff with the roads aforesaid, entirely different and independent from the one between the roads themselves, as before stated, from Boston to Ogdensburgh.

"This line is called the Central Vermont Line of steamers. They take no traffic for points between Boston and Ogdensburgh, but only for points west of Ogdensburgh for westward bound freight. They make the rates from Boston to Lake points as stated in the petition.

"The defendants insist that the aforesaid joint tariffs do not constitute an arrangement for a continuous carriage or shipment within the meaning of the first section of the Interstate Commerce Law; but if they do, then they do not constitute the same lines within the meaning of the fourth section of said Law.

"And these defendants further say that the rates from Boston to Ogdensburgh referred to in said petition are entirely reasonable; that shippers do not complain, nor do the public at Ogdensburgh. There is no competition with the defendant's line at Ogdensburgh for traffic from Boston to Ogdensburgh. The Ogdens-

burgh & Lake Champlain and Central Vermont Roads embrace more than half the distance from Ogdensburgh to Boston. They run through a sparsely settled country with high grades, and are operated at unusually large expenses, especially in the winter, by reason of heavy drifts of snow and excessive frosts.

"They have both been foreclosed and reorganized, and the original capital put into the construction has been lost, and if they were compelled to depend upon local traffic alone, they could not pay their expenses and interest on their bonded debt, to say nothing of the various stocks of the roads as now reorganized. These roads have been brought up to a high state of efficiency for the purpose of doing a through business from the seaboard to the West; and if the rates from Boston to points on the Great Lakes made by the Central Vermont line of steamers aforesaid were raised to the same rates as the tariff from Boston to Ogdensburgh, no traffic would go by this line to points on the Great Lakes by reason of competition with other lines, and more especially the Boston and Albany Line hereinafter referred to.

"On the other hand, if the rates from Boston to Ogdensburgh were reduced to the same rates as from Boston to points on the Great Lakes, it would seriously cripple these defendants' roads and would weaken them as competitors for through business by the Boston and Albany Line without affording any relief to Ogdensburgh; but it would probably result in a large increase in the rates from Boston to Ogdensburgh in order to maintain the roads, if the through business is given up.

"And these defendants further say that there are many competing lines for Boston traffic to the West—(enumerating them) that these various lines compete with the defendant's line at the various lake points referred to in the petitioner's complaint and dictate the rates that shall be charged thereto; that the defendants' line must make as low rates to these points of competition as the other lines, or go out of the business; that this through business to competing points is quite as important to these defendants as their local traffic; that the amount of traffic from Boston to Ogdensburgh and intermediate points is not one twentieth part of what it is to points west of Ogdensburgh; that they make money on their through business, and without it they could not secure any adequate return for the capital invested in defendants' roads.

"And these defendants further say that the circumstances and conditions under which they take traffic from Boston to Ogdensburgh is wholly dissimilar from what it is in respect to traffic which they take west of there to points of competition on the Great Lakes; that the cost of service is relatively small for the water carriage west of Ogdensburgh, as compared

"And these defendants further say that they have acted in good faith in the premises; that they have given as good construction as they could to the Interstate Commerce Law, and under the advice of counsel; and if they have erred, they will ask leave to file their petition to be relieved from the operation of the fourth section of said Act."

While the cases were pending the Vermont State Grange of the Patrons of Husbandry, representing itself as "an association of farmers and business men, organized and located within the State of Vermont," presented what is called in the proceedings an intervening petition, but which for all practical purposes is an original complaint, which, after reciting the pendency of the proceedings, goes on to allege "that the tariff rates and charges made by the defendants for the transportation of property from Boston, in the State of Massachusetts, and points near said Boston, to St. Albans, Burlington, Middlebury, and other places in the said State of Vermont and from said places in Vermont to Boston and places near thereto are higher than the charges made by said defendants and said National Despatch Line from said Boston to Montreal, in the Province of Quebec, Detroit, in the State of Michigan, and other points beyond and northerly and westerly of the said State of Vermont, and from said northern and western points to said Boston," in contravention of the statute, and also "that said charges for transportation of property from Boston aforesaid to said points in Vermont, and from said Vermont points to Boston and other places in the vicinity thereof, so made by the defendants, are exorbitant in fact, and are not reasonable or just."

The same defenses were relied upon to this as to the other petitions, and the cases were all heard together at Rutland, Vermont, on the first day of September and following days.

Before proceeding with the evidence the Grand Trunk Railway Company moved that the complaints as to it be dismissed, for the reason that the charges supposed to be in violation of the statute were not made or shared in by it, its participation if any being only in the low charges on the long haul, which in themselves were perfectly legal and were not averred to be otherwise. The Commission, however, was of opinion, and so held, that the interest of that company was such, and the liability of the low rates on long haul traffic to be affected by changes made in the higher rates on short-haul traffic was so great that in case it had not been made a party, and should now come in and ask to be made such in order that it might present evidence and be heard by counsel, it would be proper to order accordingly. This being the case, it was equally proper for complainants to join it as a party respondent in the first instance.

The right of the petitioner in the first com-

itive rates to those which are imposed on its road; and if they were, the fact that they are excessive would tend to its advantage. The petitions do not show that those who pay them regard them as excessive or unjust; nor is it averred that they are so in fact. It is consistent with everything that appears in the first two complaints that these rates are fair and just; that they are even necessary as defendants aver they are; and that the parties who pay them do so without complaint and willingly. Why then should this petitioner complain?

The petitions answer this inquiry by saying that "The grievance which this company and its connections have is that the National Despatch Line makes rates to Detroit and other points in the west less than the Boston & Albany Railroad Company and its connections make to the same point," while at the same time making higher rates to the intervening points. But what the higher rates to the intervening points have to do with the complainant's "grievance" the petition fails to inform us. No connection between the high rates and the low is shown or averred. It is not said that the one set are made high in order that the other may be made low, or that the long haul traffic is taken at the expense of the short haul traffic. As the case stands upon the first two complaints the sole grievance of the petitioner is that the defendant roads accept traffic from Boston to Western points at lower rates than are made by petitioner and its connections; and the legitimate inference must be that the purpose of the proceedings is to compel the putting up of those rates. But in that purpose the petitioner can certainly expect no aid from this Commission. The defendant companies have the legal right to make the low through rates, and their competitors cannot restrain them.

On the argument it was said on behalf of the Boston & Albany Company that the purpose of the proceeding was to obtain a construction of the Act. The petitioner desires to know whether the Central Vermont Railroad Company is justified in making with its connections higher rates from Boston to St. Albans and intervening points than it makes to Montreal and more distant points. It desires to have an authoritative decision on that subject, in order that, if such higher rates are sustained, it may proceed in like manner to impose in respect to its traffic higher rates upon shorter than upon longer hauls. And as it was well understood that this Commission did not give opinions upon abstract questions, or undertake to construe the Law as a guide to parties in their own business when no controversy was pending before it, these proceedings were begun in order to present the necessary contention.

One obvious remark upon this is that it is not warranted by the complaint, which undertakes to advance and rely upon a "grievance." Another, equally obvious, is that the desire to have safe guidance in one's own business is not a legitimate ground for overhauling the business of another with which the party has no other concern. Moreover, a decision upholding the lawfulness of the greater charges made for the shorter hauls by the Central Vermont and its connections, could not, in the nature of things, constitute a rule for the petitioner in deciding

whether to impose greater charges for shorter hauls on its line. Our reasons for this were fully given in *the Matter of the Louisville & Nashville Railroad Co.* [ante, 378]. We there pointed out that the right to make such charges under the Law was exceptional; that it depended in every case upon the peculiar circumstances and conditions; and while we did not undertake to indicate all the reasons that might justly or plausibly be advanced in support of an exception, enough was stated to make clear as we thought how impossible it is to lay down definite rules by which the cases as they arise may be readily determined. It is upon its own circumstances and conditions that each case must be judged.

In the cases before us there is neither allegation nor proof that the circumstances and conditions of the local traffic on the Boston & Albany and its connections are like or substantially like the circumstances and conditions of the local traffic of the Central Vermont and its connections between Boston and St. Albans. If, therefore, it were to be decided that the greater charges on the shorter hauls which are here complained of are just, reasonable and legal, it would not follow that the Boston & Albany and its connections could make the like charges. The reason is plain: the decision would be confined to the facts of the very case in judgment; and how it would apply to the facts of any other case not exactly like it would be matter of inference and argument only. The greater the difference in circumstances and conditions the less would be the likelihood that the decision could be accepted as a precedent. And perhaps it may be safely said that any well informed person who has even a general knowledge of that section of the country knows that the circumstances and conditions of local traffic on the Central Vermont must be greatly different from what those are of the local traffic on the Boston & Albany. The latter runs through the more densely populated country; it has more considerable towns and large manufactories upon it, and for these reasons has a vastly greater volume of business within its reach. It also takes the better direction for a heavy long haul traffic.

In what has been said we are not to be understood as holding that a complainant must necessarily have a pecuniary interest in order to entitle him to be heard. There are no doubt many cases in which an individual having no interest, except to see that the law is enforced for the benefit of society, may complain in his own name but in the public interest. In these cases the petitioner does not complain in the public interest, but in its own; and the grievance of low long haul rates, of which it complains, is not a public grievance.

The Act to Regulate Commerce, however, expressly provides that "No complaint shall at any time be dismissed because of the absence of direct damage to the complainant." Under this provision when an alleged infraction of the Law, of such a character as to constitute a public grievance of considerable general importance, is brought to the attention of the Commission, by a responsible party in a duly authenticated form, it may be the duty of the Commission to enter upon its investigation, and if the charge is substantiated, to apply ap-

propriate relief. We are relieved from any necessity of determining what would be the proper course to pursue in such a case by the fact that the question of the violation of Law is directly presented in the petition filed by the Vermont State Grange of the Patrons of Husbandry. We are not informed whether that body is incorporated, nor is it important. It was conceded on the argument to be an association formed for proper purposes by respectable people of the State, and presumably those persons are interested, or are liable to be, in the charges complained of. They find their grievance not in the low rates which the Law does not undertake to restrict, but in the high rates which, if not justified by a proper showing, stand condemned; and as these are likely to bear with peculiar weight upon those who follow the calling of husbandmen, it is very proper that they as an association, if they believe the rates wrong and oppressive, should raise the question. Upon the petition of the State Grange, therefore, we proceed to examination of the merits of the controversy.

I. It is contended on the part of the defendants that they do not nor does either of them violate the fourth section of the Act to Regulate Commerce, because the shorter hauls for which the greater charges are made are not over the same lines as the longer hauls for which the charges are less.

This contention is based on the phraseology of the first and fourth sections of the Act. By the fourth section it is made unlawful for "any common carrier subject to the provisions of this Act" to charge more, etc., "for a shorter than for a longer distance over the same line in the same direction, the shorter being included within the longer distance." The first section prescribes who shall be subject to the provisions of the Act. They are "any common carrier or carriers engaged in the transportation of passengers or property wholly by railroad, or partly by railroad and partly by water when both are used under a common control, management, or arrangement for a continuous carriage or shipment," etc. The party then, it is claimed, who can be liable under the fourth section must, it is said, either be a single carrier operating by itself a line upon which the charges are made, or it must be carriers operating a line "under a common control, management, or arrangement for a continuous carriage," etc. The defendant corporations have each their separate board of directors; they are not under a common control or management; they have no common arrangement for a continuous carriage. Their tracks connect, and a carriage may be made continuous by the delivery of property from one to another till it reaches its destination; but the delivery is a common-law duty, irrespective of common arrangement. The making of a joint tariff is not, it is argued, such a common arrangement as the Act contemplates; it is only an agreement as to what each will accept as its share of the charge for a haul over the roads or lines of them all. The long and short hauls, then, are not on the same line unless both are on the line of the same carrier, which is not the case here. But if two or more roads could be regarded as one "line" within the meaning of the Act, the charges complained

of here are not for hauls on the same line; the line from Boston to St. Albans which some of the defendants form being a different line from that formed to Montreal through St. Albans, and different again from that formed to Detroit, and so on. This is the substance of the very ingenious argument presented and elaborated for the defense.

We do not think the argument sound. Without pausing now to inquire what was meant by the words "under a common control, management, or arrangement," etc., or whether those words have any application at all to carriers wholly by railroad, we have no difficulty in holding that if the defendants join in making the tariff which constitutes the lesser charge on the longer haul, while one or more of their number make the greater charge on the shorter haul, the case is within the fourth section; and those who make such greater charge are called upon to justify it. "Any common carrier" is as much restrained when it unites with one or more others in making the long haul charge as when it makes such charge independently. Nor have we any doubt as to the meaning of the word "line" in the Act. A physical line is meant, not a business arrangement; and one piece of road may be part of several lines, as the road from Boston to White River Junction is part of the line to St. Albans, and also part of the lines severally to Montreal, Ogdensburgh, Detroit, Port Huron, and Chicago. When a greater charge is made from Boston to White River Junction than is made by way of that point to any one of the other points named the two are made for hauls on the same line, the shorter being included within the longer distance.

II. By some of the defendants it is claimed that the case is not brought within the fourth section of the Act, because the tariff for the long haul traffic is not made by the defendants, singly or collectively, but by the National Despatch Line, which operates over their roads.

The National Despatch Line is one of the many fast freight lines of the country, but is perhaps in some respects peculiar. It is neither a corporation nor an association of persons. It exists by virtue of no formal agreement or writing. One witness speaks of it as a name merely; another as a trade mark. It is nevertheless, so far as the public dealing with it are concerned, an actuality of much importance, for it not only transacts a large business, but takes all the traffic passing over the Central Vermont destined to or coming from points beyond St. Albans. It has for general manager, Mr. John Porteous, who owes his office or position to the president of the Central Vermont Railroad Company, whose power to appoint does not appear. Mr. Porteous appoints some assistants, but in general the railroad agents are agents of the National Despatch Line also. The reason for establishing the line originally was that the roads were greatly deficient in rolling stock, and a car company was formed to loan them cars, and this line called into existence to operate the cars. The roads pay mileage for the use of the cars. The earnings of the line, less the expenses, are divided among the roads in agreed proportions. Mr. Porteous makes the tariffs for traffic taken by the line. The long haul traf-

fic rates mentioned in the complaints are rates made by him, the several defendants taking no part in them.

These are the facts as they appear from the proofs. We deem it unnecessary to comment upon them any further than is needful to draw the legal conclusion. The responsibility of the defendant carriers for the long haul rates is unquestionable. They did not through their own officers fix them, but they one and all acquiesced in the designation of a person to be allowed to fix them; they permit the business to be done over their roads respectively at the rates named, and they accept their several proportions. It would be difficult to imagine a method whereby they would become bound more conclusively, for Mr. Porteous is agent of all in making the rates; and they all acquiesce in what he does, so that they would be bound even if he had acted at first without full authority. The arrangement as it exists in fact, though it be only a name or a trade mark, makes the National Despatch Line or its manager representing it, the agent for such roads as the line is operated over. Its rates are their rates for the business done, and at their peril they must see that its tariffs are filed with this Commission, and that in other particulars the Law is obeyed by it.

III. The principal controversy in the case has been over the justification set up for the charges on the short haul traffic. As bearing upon that controversy a considerable body of evidence was taken, the purpose of which was to show that the very low rates charged for long haul traffic were a necessity of the situation, and that the higher rates for short haul traffic were the lowest that could be afforded. As the Central Vermont is the road principally concerned with the short haul rates, and the lines for long haul traffic are very often spoken of as Central Vermont Lines, it will not be necessary in the further discussion of the case to distinguish between the several roads; and what we have to say will perhaps be more readily grasped and understood if we avoid doing so.

The Central Vermont is the successor to the Vermont Central and the Vermont & Canada roads, constructed in 1849 for local traffic, and which became bankrupt and sunk all their capital. There was a long receivership, at the end of which a reorganization was effected under the name of the Central Vermont, with a bonded debt of \$7,000,000. The company as reorganized has paid the interest on its debt, but no dividends—the surplus earnings being all expended in improvements. The road is in a fine state of repair and efficiency, well supplied with motive power, but still making use of leased cars through the National Despatch Line. The line of road is through a sparsely populated country, with no large towns, and where the industry is mainly agricultural. For many years the population has been nearly stationary in numbers, but the wealth of the people has been steadily increasing, and to this increase the railroads have no doubt largely contributed; perhaps it is not too much to say that they have rendered it possible. There is not local traffic along the line of road to enable the company on any possible tariff to maintain a first class road; and its managers before and

during the receivership directed their energies to making it a link in through lines from Boston and other New England towns to Montreal, Detroit, Chicago, and other points in the West. These efforts were successful, and the Central Vermont was recognized by the trunk lines as a powerful rival for the traffic between the Mississippi Valley and the seaboard, and was allotted large percentages of the business. But as the line was much less direct than those of the trunk line roads, and more time was required for the passage of trains over it than between the same points over the other lines, it was compelled to make concessions in rates to shippers; and the trunk lines recognized this necessity and allowed it a differential, as it is called; that is to say, allowed it to make concessions on west bound traffic up to an agreed point without its being regarded as a cutting of rates. This differential has been as high as ten cents a hundred pounds on first class freight between Boston and Chicago, and proportional on the lower classes; but so large a differential is not now conceded. The National Despatch Line, however, continues to insist upon it, and its doing so led to the institution of the original proceedings. The carriers forming the Central Vermont Lines insist that the differentials they make are necessary to enable them to obtain a fair share of the business; their rivals deny this and claim that it results in forcing commerce into unnatural channels and in the taking of traffic at unremunerative rates. All this controversy was gone over in the evidence and in argument, with the purpose on one side to estop the Boston and Albany, as an assenting party to the differentials, from making the complaint it now sets up, and on the other to convict the defendant roads of unfairness to their competitors. But all this becomes immaterial to the controversy presented by the complaint of the State Grange. What we are concerned with now are the local rates as they affect local shippers, not the through rates as they affect the rival lines.

One peculiarity of this controversy is that the differentials are not given or taken on east bound traffic; but, nevertheless, the Central Vermont Line is enabled to obtain its full share of the business. The reasons for this were not brought out on the hearing; but evidently the roads forming that line have been able to give to shippers more satisfactory facilities on east bound than on west bound traffic. But this also is unimportant now. What is important is the fact that the through business is a necessity to the Central Vermont, if it is to maintain its present state of efficiency. The strictly through tonnage over it for the year ending June 30, 1886, was 79 per cent of all; the strictly local tonnage was but 5½ per cent; while what is denominated in the evidence joint freight, that is to say, freight received at points on the line from points beyond its termini, or taken up at local points to be transported beyond the termini, was 15½ per cent. It is very evident from these figures that neither on the local traffic alone, nor on that and the joint traffic, can a first-class road be maintained. It is therefore the right and we may say the duty of the managers of the Central Vermont to obtain and keep up a through business, if they

can do so without injustice to the local traffic and without violation of law.

No injustice is done to the local traffic by taking through traffic at very low rates, provided the doing so neither makes the local traffic more expensive nor otherwise incommodes it. The defendants put in evidence to show: (1) that the rates on local traffic are not out of proportion to those charged on through traffic, it being very much more expensive to handle an equal amount of the former than of the latter; (2) that the through traffic is not carried at a loss, but there are net gains from it in the aggregate exceeding those on the local and joint traffic put together, and that it is by means of those gains that the efficiency of the road is maintained; (3) that the rates on the through traffic cannot be materially advanced without losing it, and (4) that the Company cannot afford to reduce the rates on the local traffic. There was strong evidence in support of all these propositions. We are entirely satisfied that a large through business is essential to this line, if it is to continue to be a useful line even for local business. We are also satisfied that the people of Vermont are largely interested in the low rates on long haul traffic, not only because to some extent they send manufactured articles to distant points, but much more because Vermont relies very largely on the West for grain, flour, meats and provisions. It is highly probable that if the people of the State pay high rates on local traffic, they are fully compensated in the low rates on long haul traffic. A board having full power to adjust rates as circumstances should seem to require might perhaps so hold.

But our power in this regard is restricted by the terms of the Law, which absolutely forbid a carrier "to charge or receive any greater compensation in the aggregate for the transportation of passengers or of like kind of property under substantially similar circumstances and conditions for a shorter than for a longer distance over the same line in the same direction, the shorter being included within the longer distance." This is the Law which governs our action, and it cannot be departed from by us on considerations of equity, or of what would be for the interest of parties concerned. If parties complain of a violation of the Law, we can only pass upon the charge preferred; and our action cannot be affected by the circumstance that the rates as adjusted are on the whole to their advantage. They must judge of their interest, while we are to judge of the violations of Law which are complained of.

The controversy in the case, then, is narrowed to this question: Are the circumstances

made. The cost of different kinds of traffic cannot possibly be arrived at with accuracy; at best only an approximating estimate can be made. The calculations put in evidence do not satisfy us that the same kind of freight can be taken from Boston through St. Albans to Detroit at a less cost than from Boston to St. Albans, or from Boston through Ogdensburg to Chicago and Milwaukee at a less cost than to Ogdensburg. Honest calculations are made to show such a result, but they are very likely to charge upon local traffic exclusively items which ought to be apportioned, or to leave something out of view which ought to be considered.

The main reliance of the defense, however, was upon a showing of the competition which defendants must meet in long haul traffic. It was shown that for traffic between Boston and the West there was actual or possible competition by steamers to Portland, and thence over the Grand Trunk by steamers to Halifax, and thence over the Intercolonial by the South Eastern Road to connect with the Canadian Pacific by the several trunk lines and by combinations of carriers requiring no special mention.

The evidence, however, is entirely conclusive that the competition which is troublesome to the defendants is that of the trunk lines. It is from these that the defendants demand the differentials, and it is because they are possessed of the shorter lines that the differentials become necessary. The defendants do not fear the competition of a route by Halifax or of any of the other circuitous routes that can be organized; and such lines do not constitute circumstances or conditions having any perceptible bearing on the present controversy. The circumstances and conditions that must justify the greater charge on the shorter haul over the Central Vermont Line must be such as spring from the trunk line competition.

In *The Matter of the Louisville & Nashville Railroad Company* [supra] we expressed the opinion that there might be cases in which the competition between railroads, even when they were all subject to the jurisdiction of the Commission, would present such dissimilarity of circumstances and conditions between long haul and short haul traffic as to justify the greater charge on the shorter haul on the same line in the same direction. But our published opinion shows that we thought the cases must be rare and quite exceptional. The trunk lines are all subject to our jurisdiction. What then are the peculiar circumstances and conditions which constitute the difference between the case before us and cases of railroad

same claim they do, with the same justice. It is a claim that could be advanced wherever a route, however circuitous, could be formed for long haul traffic. A line from Boston to Detroit, for example, might be formed by way of the Chesapeake & Ohio Railway, and one from Chicago to St. Louis by way of St. Paul. The greater the departure from a direct line, the greater would commonly be the necessity for low rates on through traffic, and the greater the liability to have the charges on the local traffic increased to make the carriage of through traffic possible. But, without enlarging on this branch of the case, we content ourselves with saying that such peculiar facts are not found to exist in this case as will justify the greater charge over the shorter line.

There remains for us only the duty to make and issue the order which the facts found require. The Central Vermont and the other

defendants concerned with it in interstate traffic between Boston and St. Albans and Boston and Ogdensburg, respectively, including those points, must wholly cease and desist from charging or receiving in respect to any part of such traffic at greater compensation for transportation of a like kind of property for a shorter than for a longer distance over the same line in the same direction, the shorter being included within the longer distance. In performing this duty we neither do nor with propriety can express opinion upon the intrinsic reasonableness or justice of the rates heretofore imposed, except to this extent: that we do not think it was shown by the evidence that when the local tariffs are made to conform to the letter of the Law as above directed they will be unreasonable.

In this opinion all concur.

SUPREME COURT OF ARKANSAS.

LITTLE ROCK & FORT SMITH R. CO.

v.

HANNIFORD *et al.*

1. The Arkansas Act of February 27, 1885, prohibiting any railroad company in the State from charging a greater sum for the transportation of freight than is specified in the bill of lading, and imposing a penalty for refusal to deliver freight on payment or tender of the charges due as shown by the bill of lading, is general and uniform in its operation upon all within the class to which it applies, and therefore is not within the constitutional prohibition against special legislation.
2. Said Act is within the police power of the State and is not an attempt to regulate interstate commerce, within the meaning of the clause of the Federal Constitution vesting in Congress exclusive power to regulate commerce among the States.
3. Where a bill of lading specified the rate per 100 pounds to be paid for the goods carried, but did not state the weight of the goods, but the weight was readily ascertainable, *held*, that the sum to be paid for freight was sufficiently specified in the bill of lading, to accomplish the object of the Act.

(Decided June 25, 1887.)

APPEAL by a defendant from a judgment of the Circuit Court for Conway County, in favor of plaintiffs in an action for damages for refusal to deliver freight on tender of payment of charges. *Affirmed.*

The facts and questions presented are stated in the opinion.

Mr. J. M. Moore, for appellant.

Mr. Eugene B. Henry, for appellees.

Battle, J., delivered the opinion of the court:

On the fourth of January, 1886, plaintiffs, Hanniford, Beal & Wills, purchased of the

Armour Packing Company, of Kansas City, Missouri, 25,000 pounds of meat, and delivered it to the Southern Kansas Railroad Company, which executed its bill of lading therefor, and thereby contracted to ship and deliver it to plaintiff at Morrilton, in this State, at the rate of fifty-five cents per 100 pounds. The defendant Little Rock & Fort Smith Railway Company, being one of the connecting line of carriers, received the meat at one end of its line, and carried it to Morrilton. The weight of the meat was not specified in the bill of lading. In the way bill delivered to the defendant the weight specified was 33,900 pounds. Plaintiffs tendered payment of the freight charges on 25,000 pounds, at the rate specified in the bill of lading, and the defendant demanded freight on 33,900 pounds, and for about four days refused to deliver unless freight on that amount was paid. After a delay and refusal to deliver for several days, plaintiffs brought an action against the defendant for the meat, when defendant agreed to accept plaintiffs' offer. Plaintiffs then brought this action for damages to an amount equal to the freight charges tendered for every day defendant refused to deliver the meat after the tender of payment was made.

This action was brought under the Act of the Legislature, approved February 27, 1885, which reads as follows:

"Section 1. *Be it enacted*, By the General Assembly of the State of Arkansas, that it shall be unlawful for any railroad company in this State, its officers, agents or employees, to charge and collect, or to endeavor to charge and collect, from the owner, agent or consignee of any freight, goods, wares, or merchandise of any character or kind whatever, a greater sum for transporting said freight, goods, wares, or merchandise than is specified in the bill of lading.

"Section 2. That any railroad company, its officers, agents or employees, having possession of any goods, wares, and merchandise of any kind or character whatever, shall deliver the same to the owner, his agent or consignee upon payment of the freight charges, as shown by the bill of lading.

"Section 8. That any railroad company, its officers, agents or employees, that shall refuse to deliver to the owner, agent or consignee any freight, goods, wares and merchandise of any kind or character whatever, upon the payment or tender of payment of the freight charges due, as shown by the bill of lading, the said company shall be liable in damages to the owner of said freight, goods, wares or merchandise, to an amount equal to the amount of the freight charges for every day said freight, goods, wares or merchandise is held after payment or tender of payment of the charges due, as shown by the bill of lading, to be recovered in any court of competent jurisdiction."

This Act being general and uniform in its operation upon all persons coming within the class to which it applies, it does not come within that special legislation prohibited by the Constitution; for it applies to and embraces all persons "who are or who may come into certain situations and circumstances," and is "general and uniform, not because it operates upon every person in the State, for it does not, but because every person who is brought within the relations and circumstances provided for is affected by the law." *McAunich v. Mississippi & Missouri R. R. Co.* 20 Iowa, 842; *Iowa R. R. Land Co. v. Soper*, 39 Iowa, 116; *Chicago etc. R. R. Co. v. Iowa*, 94 U. S. 168 [Bk. 24, L. ed. 96]; *Humes v. Missouri Pac. R. Co.* 32 Mo. 221; *Davis v. State*, 8 Lea (Tenn.), 379; *Cooley*, Const. Lim. 5th ed. 481.

It is of that class of legislation specially enjoined by the Constitution of the State upon the General Assembly; for section 10, art. 17, Const. ordains: "The General Assembly shall pass laws to correct abuses, and prevent discrimination and excessive charges, by railroad, canal and turnpike companies, for transporting freight and passengers, and shall provide for enforcing such laws by adequate penalties and forfeitures." Vested with the power to correct abuses by railroad companies, they had the right "to determine what, on the part of the railroad, constitutes abuses, and to determine what laws will correct them, as well as what remedies may be necessary to secure the enforcement of such laws." In the exercise of this power and right, the Act under consideration was, doubtless, passed. *Houston etc. R. R. Co. v. Harry*, 18 Am. & Eng. R. Cas. 502.

But it is contended that, if this Act is applicable to this case its effect is to regulate the charges to be collected on freight shipped from distant points in other States, and transported over several connecting lines of railroad to points within this State, and thereby affect interstate commerce, and is void. It is true the exclusive power to regulate commerce among the States is given by the Constitution of the United States to Congress; but the vesting of this power in Congress was not a surrender of that which is known as the police power. That power still belongs to the State. The power to regulate commerce does not, in all cases, prevent the States, in the exercise of this power, from interfering with interstate commerce. In some cases it may be exercised to the extent of directly interfering with commerce between the States; as, for instance, a State may enact sanitary laws, and, for the pur-

pose of self protection, establish quarantine and reasonable inspection regulations, and prevent persons and animals having contagious or infectious diseases from entering the State. In many cases a State, through her Legislature, in the exercise of the police power, may enact laws which merely affect or influence, but do not regulate or control, interstate commerce. As an illustration she may, within her boundaries, require trains to stop at railroad crossings, at draw-bridges, and require the speed of trains to be reduced when running through incorporated towns and cities, may regulate the speed of railroad trains, and may require railroad companies to place guards at bridges and other points of danger, notwithstanding the railroad affected may run through more than one State, or connect with railroads operated in other States, and may be engaged in transporting freight from one State to another. *Hannibal etc. R. R. Co. v. Husen*, 95 U. S. 465 [Bk. 24, L. ed. 527]; *Chicago & A. R. Co. v. Pierson*, 12 Am. & Eng. R. Cas. 156.

In *Munn v. Illinois*, 94 U. S. 113 [Bk. 24, L. ed. 77], the State of Illinois undertook, by statute, to regulate warehouses in that State. The court held she could do so, in the exercise of her police power, notwithstanding they were used as instruments by those engaged in interstate as well as in state commerce. The court said: "We come now to consider the effect upon this statute of the power of Congress to regulate commerce. It was very properly said in the case of *State Tax on Railway Gross Receipts*, 15 Wall. 298 [83 U. S. bk. 21, L. ed. 164] that 'It is not everything that affects commerce that amounts to a regulation of it within the meaning of the Constitution.' The warehouses of these plaintiffs in error are situated, and their business carried on exclusively, within the limits of the State of Illinois. They are used as instruments by those engaged in interstate commerce; but they are no more necessarily a part of commerce itself than the dray or cart by which, but for them, grain would be transferred from one railroad station to another. Incidentally they may become connected with interstate commerce, but not necessarily so."

In *Chicago etc. R. R. Co. v. Fuller*, 17 Wall. 567 [84 U. S. bk. 21, L. ed. 713], *Mr. Justice Swayne*, in delivering the opinion of the court said: "The Constitution gives to Congress the power to regulate commerce with foreign Nations, and among the several States, and with the Indian Tribes. The statute complained of provides that each railroad company shall, in the month of September, annually fix its rates for the transportation of passengers and of freight of different kinds; that it shall cause a printed copy of such rates to be put up at all its stations and depots, and cause a copy to remain posted during the year; that a failure to fulfill these requirements, or the charging a higher rate than is posted shall subject the offending company to the payment of the penalty prescribed. In all other respects there is no other interference. No other constraint is imposed. Except in these particulars the company may exercise all its faculties as it shall deem proper. No discrimination is made between local and interstate freights, and no attempt is made to control the rates that may be

charged. It is only required that the rates shall be fixed, made public and honestly adhered to. In this there is nothing unreasonable or onerous. The public welfare is promoted without wrong or injury to the company. The statute is doubtless deemed to be called for by the interests of the community to be affected by it, and it rests upon a solid foundation of reason and justice. It is not, in the sense of the Constitution, in any wise a regulation of commerce. It is a police regulation, and as such forms 'a portion of the immense mass of legislation which embraces everything within the territory of a State not surrendered to the general government, all of which can be most advantageously exercised by the States themselves.'

The Act in question does not undertake to regulate commerce between States. It imposes no restriction upon the introduction or the transportation of any article of commerce whatever. It does not undertake to regulate the charges for transportation, but simply undertakes to enforce the prompt delivery of all freight, goods, wares and merchandise of every character, upon arrival at its place of destination in this State and nowhere else, upon the payment or tender of payment, of the freight charges due, as shown by the bill of lading. It does not go to the extent of the statute considered in *Railroad Co. v. Fuller, supra*. In that case the statute subjected the railroad company to a penalty for the charging of a higher rate than was posted. We cannot see

how it can interfere with or affect interstate commerce, and think it is constitutional and valid.

It is contended that appellant is not liable in damages, under the Act, because the bill of lading fails to give the weight of the meat. The object of the Act is to compel railroad companies to deliver freight, after arrival, upon payment, or tender of payment, of charges. Because the weight of the meat was not stated in the bill of lading, the appellant was not relieved of the duty to deliver promptly upon payment, or tender of payment, of the freight charges. It was its duty to have weighed the meat without unreasonable delay. That was the only way in which the amount of the freight could have been ascertained. The sum to be paid for transportation was sufficiently specified in the bill of lading to enable all parties to ascertain what the freight charges were. This is the only object of the Act in requiring the amount to be paid to be specified in the bill of lading. The sum to be paid was therefore sufficiently specified in the bill of lading to accomplish the object of the Act in that respect, and to render appellant liable in damages for failure to deliver upon the payment, or tender of payment, of the amount due for transportation.

We find no error in the instructions of the trial court prejudicial to appellant. All questions of fact were fairly submitted to the jury. There was evidence to sustain the verdict.

Judgment affirmed.

THE INTERSTATE COMMERCE COMMISSION.

NEW YORK, PHILADELPHIA & NORFOLK R. R. CO.,

ATLANTIC COAST LINE *et al.*

(No. 71.)

THE petition herein, given *ante*, 447, was withdrawn by the complainants October 8, 1887.

I. FRIEND & SON

SOUTHERN PACIFIC CO., Denver & Rio Grande R. Co., and Burlington & Missouri River R. R. Co. in Nebraska.

(No. 43.)

ABSTRACT of pleadings in proceeding now pending at issue before the Commission, based upon allegations of a greater charge for the short than for the long haul, discrimination and excessive charges.

COMPLAINT.

(Filed June 24, 1887.)

Complainants state that they are residents of Lincoln, Lancaster County, Nebraska, and are in the general merchandise business in said city.

That the respondents are railway companies organized under the laws of the United States of America, and of several States thereof, and operate and maintain lines of railway, which connect with each other, and form a through line of railroad connecting the City of San Francisco, California, and the Cities of Omaha and Lincoln, Nebraska.

That on June 11, 1887, complainants caused one M. Heineman to deliver to said Southern Pacific Company, at San Francisco, one case of gents' furnishing goods of the weight of sixty pounds, to be transported to them at Lincoln, Nebraska, via Southern Pacific Company, the Denver & Rio Grande Railway and the Burlington & Missouri River Railroad in Nebraska.

That the said respondents charged for the transportation of said goods the sum of \$3.50.

That said charge is in violation of the third and fourth sections of an Act to Regulate Commerce, in that the said railway companies charge for the transportation of freight of like character, under similar circumstances, to Omaha, Nebraska, from San Francisco, \$1.75, and to Lincoln, Nebraska, from San Francisco, \$3.50 per 100 pounds. That the haul from San Francisco to Lincoln is included in the haul from San Francisco to Omaha, Omaha being fifty-five miles further distant from San Francisco than Lincoln, via said lines of railway.

That the said Railway Companies discriminate against Lincoln, and in favor of Omaha, in that they charge more for the transportation of freight from San Francisco to Lincoln than from said point to Omaha, a greater distance, the haul from San Francisco to Lincoln being included in the haul from San Francisco to Omaha.

That said rate of \$3.50 per 100 pounds from San Francisco to Lincoln, by said lines of railway, is unreasonable and extortionate, and excessive.

ANSWER OF SOUTHERN PACIFIC CO.

(Filed July 19, 1887.)

Admits that the Southern Pacific Company received the goods in question for transportation according to the bill of lading, and guaranteed that the charge for the transportation of this freight from shipping point to destination should not exceed \$3.50, and gave its bill of lading to that effect.

Admits that the Southern Pacific Company waybilled the shipment in question at the rate described, and collected from the Denver & Rio Grande Railroad Company \$1,637 as its proportion of said through charge.

Denies that said charge is in violation of the third section of the Act to Regulate Commerce.

Avers that in the matter of the shipment referred to, neither in the manner of handling nor in the charges made for its service, did the Southern Pacific Company give any undue or unreasonable preference or advantage to any particular person, company, firm, corporation, or any particular description of traffic in any respect whatever; nor did the Southern Pacific Company in such case subject any particular person, company, firm, corporation, or any particular description of traffic to any undue or unreasonable prejudice or disadvantage in any respect whatsoever.

Avers that the charges made on the shipment in question were strictly in accordance with the tariffs of the Southern Pacific Company, which were duly published and filed with the Interstate Commerce Commission according to law.

Avers that the charge for the through service by the companies whose roads form the line over which the goods were transported, and that the charge of each particular road in the line is and was a just and reasonable charge in itself.

Avers that the shipment in question consisted of a single package of gents' furnishing goods, said to weigh sixty pounds, and that such goods are, as a rule, by carriers, rated as of the highest or first class.

That the shipment was of a single package weighing less than 100 pounds, and was, according to the well established and reasonable rule of carriers, charged for at package rates.

Avers that the total charge for the service was \$3.50; that the service consisted in transporting the goods from San Francisco, California, to Lincoln, Nebraska, 2,088 miles, over roads, among the most expensive in construction, difficult and costly to operate in the country.

Avers that the charge of the Southern Pacific Company for the service between San Francisco and Ogden, at which point the goods were delivered to the Denver & Rio Grande Railway, was reasonable and just, being \$1,637.

Avers that in handling the shipment in question and in making the charges for its transportation, no undue or unreasonable preferences or advantage was given to any particular locality, nor was any particular locality subjected to any undue or unreasonable prejudice or disadvantage in any respect whatsoever.

INTER 8.

Avers that while the charges made were more than the regular and published schedule of rates of charge for like and contemporaneous service between San Francisco and Omaha, a point sixty-seven miles beyond Lincoln, Nebraska, yet that, under the circumstances and conditions, this was not an unjust or unreasonable preference or advantage in favor of Omaha nor an undue or unreasonable discrimination against Lincoln.

Avers that the carrying trade between San Francisco and Omaha is the subject of competition between the respondents and other railroad lines in the United States which are subject to the provisions of the Interstate Commerce Law, and also between the respondent and the Canadian Pacific Railway, which is not subject to the Interstate Commerce Law; that by reason of this Omaha possesses an advantage in the matter of transportation charges which Lincoln does not possess; that this advantage was not created by the respondents or either of them; that immediately upon the Interstate Commerce Law taking effect, the respondents prepared tariffs which provided that in no case should there be a greater charge for transportation of the same class and quantity of goods from San Francisco to Lincoln, than to Omaha; that the effect of this tariff was to deprive the Southern Pacific Company, one of the respondents, of a large and valuable traffic which was diverted to the Canadian Pacific Road; that in view of this loss of business and of the probable future loss of traffic and damage to its revenue, the Southern Pacific Company petitioned the Interstate Commerce Commission for a suspension of the fourth section of the Interstate Commerce Law, so far as the same could relate to traffic between San Francisco and Omaha; that after a hearing, the Interstate Commerce Commission issued an order suspending the operation of said fourth section, so far as the same could relate to said traffic, for a period of seventy-five days*; that said period did not expire until July 7.

Avers that if the rate to Omaha was made the maximum rate for any intermediate service, it would require a reduction in the tariffs of the Southern Pacific Company and the joint tariffs of the respondents, to such an extent that they would have been compelled to abandon either the traffic between San Francisco and Lincoln, or between San Francisco and Omaha.

ANSWER OF DENVER & RIO GRANDE R. R. CO.

(Filed July 16, 1887.)

Admits the delivery of the goods in question to the Southern Pacific Company at San Francisco, one case of gents' furnishing goods, of the weight of sixty pounds, to be transmitted to Lincoln, Nebraska, via the respondent roads, and that respondents charged \$1.50 for the transportation of said goods; but denies that said charge is in violation of the third or fourth section of the Interstate Commerce Act.

Admits that the charge for the transportation of freight of like character from San Francisco to Omaha, is \$1.75, but denies that

*See ante, 27.

such charge is made under similar circumstances.

Admits that a greater charge is made for the transportation of freight from San Francisco to Lincoln than from San Francisco to Omaha, but denies that the same constitutes a discrimination against Lincoln in favor of Omaha.

Denies that \$3.50 per 100 pounds from San Francisco to Lincoln, by said lines of railway, is unreasonable, extortionate or excessive.

Alleges that said Denver & Rio Grande Railroad and its connecting lines, in the complaint mentioned, which form a through line between San Francisco, California, and Omaha, Nebraska, are in competition, as between said points, with the Canadian Pacific and its connecting lines, and also with certain water transportation between said cities; which said competing lines are not subject to the provisions of the Interstate Commerce Act, and which said lines fixed the rate on freights of the class and character of that in the complaint mentioned, between San Francisco and Omaha.

That prior to April 5, 1887, at a convention of the representatives of the transcontinental lines, held in the City of Chicago, an agreement was made as to the rates between certain points, including, among others, San Francisco and Omaha, which said rates were reasonably adapted to the necessities of said traffic, and in accordance with the provisions of said Act. That by the schedule of rates then adopted, the tariff for the class of goods mentioned in the complaint herein was \$4 per 100 pounds, between San Francisco and Omaha, which said rate was also applicable to and was adopted as the rate between San Francisco and Lincoln. That by a custom of all the railways using what is known as the "western classification," of freights it is a rule that where a package weighs less than 100 pounds, the minimum charge therefor shall not be less than the 100 pound rate for second class matter, which said second class rate between said points was fixed at \$3.50. That under said rule the charge made upon the goods in the complaint mentioned was fixed at \$3.50 from San Francisco to Lincoln.

Alleges that after the fixing of said rates between San Francisco and Omaha, it was discovered that by reason of the competition of said Canadian Pacific and its connections, and the said water competition, it was impracticable for this respondent and its connections, to maintain the said rate of \$4 per 100 pounds between San Francisco and Omaha. That, by reason of such competition, the rate per 100 pounds for goods of the first class was on or about May 25, 1887, reduced, as between said last two named points, to \$2.80 per 100 pounds; which said rate was subject to the modification of the pacific coast tariff; that where a single shipment weighed less than 100 pounds, the minimum charged should not be less than the 100 pound rate for third class matter, which said rate was \$1.75 per 100 pounds.

Alleges that the traffic between San Francisco and Lincoln is not affected by like circumstances and conditions with the traffic between San Francisco and Omaha, by reason of the competition hereinbefore stated; which

said competition affects Omaha but does not affect Lincoln.

Alleges that as to the said traffic between San Francisco and Omaha this respondent and its connecting lines are not only in competition with the said Canadian Pacific and its connecting lines, and with the said water communication, but also with the Union Pacific Railway and its connections. That on April 23, 1887, by an order of this Commission there was granted temporarily, on the application of the said Union Pacific Railway Company, a suspension of section 4 of the Interstate Commerce Act, as between San Francisco and Omaha; and the said Union Pacific Railway Company was by said order temporarily relieved from the operation of said section 4, to the extent specified in the recitals of said order, for a period not greater than seventy-five days from April 23, 1887; subject, however, to the restriction that while said order should remain in force, said common carrier should not charge nor receive compensation for the transportation of property between stations on its line, where more is charged for a shorter than for a longer haul, which should be greater than the rates theretofore in force prior to the 20th day of April, 1887. That said order of suspension of section 4 did not apply as between the said Cities of San Francisco and Lincoln. That by reason of the suspension of said section 4 in favor of the said Union Pacific Railway Company, between San Francisco and Omaha, this respondent and its connecting lines are, as to the said City of Omaha, also subject to the competition of said Union Pacific Railway Company, under circumstances and conditions different from those which exist as between San Francisco and Lincoln.

Alleges that on or about April 23, 1887, upon a petition of the Southern Pacific Company, the said Company operating one of the connecting lines with this said respondent, and being a correspondent in this action, the said section 4 of the Interstate Commerce Act was by the order of this Commission likewise suspended temporarily for a period not greater than seventy-five days from the date of said order, under like circumstances and upon like conditions as heretofore set forth in reference to the order made upon the application of said Union Pacific Railway Company.

Alleges that the consignment in the complaint mentioned was shipped from San Francisco on or about June 12, 1887, the same being within said period of seventy-five days during which said section 4 was so suspended by the order of this Commission in favor of said Union Pacific Railway Company and the said Southern Pacific Company.

Alleges that this respondent did not at the time in the complaint mentioned, nor has it at any time since April 20, 1887, received compensation for the transportation of property from San Francisco to Lincoln at a greater rate than was hitherto in force prior to said 20th day of April, 1887.

Alleges that said charge of \$3.50 for the carriage of said goods from San Francisco to Lincoln is a fair, reasonable and just charge for the distance which said goods were carried;

propriate relief. We are relieved from any necessity of determining what would be the proper course to pursue in such a case by the fact that the question of the violation of Law is directly presented in the petition filed by the Vermont State Grange of the Patrons of Husbandry. We are not informed whether that body is incorporated, nor is it important. It was conceded on the argument to be an association formed for proper purposes by respectable people of the State, and presumably those persons are interested, or are liable to be, in the charges complained of. They find their grievance not in the low rates which the Law does not undertake to restrict, but in the high rates which, if not justified by a proper showing, stand condemned; and as these are likely to bear with peculiar weight upon those who follow the calling of husbandmen, it is very proper that they as an association, if they believe the rates wrong and oppressive, should raise the question. Upon the petition of the State Grange, therefore, we proceed to examination of the merits of the controversy.

I. It is contended on the part of the defendants that they do not nor does either of them violate the fourth section of the Act to Regulate Commerce, because the shorter hauls for which the greater charges are made are not over the same lines as the longer hauls for which the charges are less.

This contention is based on the phraseology of the first and fourth sections of the Act. By the fourth section it is made unlawful for "any common carrier subject to the provisions of this Act" to charge more, etc., "for a shorter than for a longer distance over the same line in the same direction, the shorter being included within the longer distance." The first section prescribes who shall be subject to the provisions of the Act. They are "any common carrier or carriers engaged in the transportation of passengers or property wholly by railroad, or partly by railroad and partly by water when both are used under a common control, management, or arrangement for a continuous carriage or shipment," etc. The party then, it is claimed, who can be liable under the fourth section must, it is said, either be a single carrier operating by itself a line upon which the charges are made, or it must be carriers operating a line "under a common control, management, or arrangement for a continuous carriage," etc. The defendant corporations have each their separate board of directors; they are not under a common control or management; they have no common arrangement for a continuous carriage. Their tracks connect, and a carriage may be made continuous by the delivery of property from one to another till it reaches its destination; but the delivery is a common-law duty, irrespective of common arrangement. The making of a joint tariff is not, it is argued, such a common arrangement as the Act contemplates; it is only an agreement as to what each will accept as its share of the charge for a haul over the roads or lines of them all. The long and short hauls, then, are not on the same line unless both are on the line of the same carrier, which is not the case here. But if two or more roads could be regarded as one "line" within the meaning of the Act, the charges complained

of here are not for hauls on the same line; the line from Boston to St. Albans which some of the defendants form being a different line from that formed to Montreal through St. Albans, and different again from that formed to Detroit, and so on. This is the substance of the very ingenious argument presented and elaborated for the defense.

We do not think the argument sound. Without pausing now to inquire what was meant by the words "under a common control, management, or arrangement," etc., or whether those words have any application at all to carriers wholly by railroad, we have no difficulty in holding that if the defendants join in making the tariff which constitutes the lesser charge on the longer haul, while one or more of their number make the greater charge on the shorter haul, the case is within the fourth section; and those who make such greater charge are called upon to justify it. "Any common carrier" is as much restrained when it unites with one or more others in making the long haul charge as when it makes such charge independently. Nor have we any doubt as to the meaning of the word "line" in the Act. A physical line is meant, not a business arrangement; and one piece of road may be part of several lines, as the road from Boston to White River Junction is part of the line to St. Albans, and also part of the lines severally to Montreal, Ogdensburg, Detroit, Port Huron, and Chicago. When a greater charge is made from Boston to White River Junction than is made by way of that point to any one of the other points named the two are made for hauls on the same line, the shorter being included within the longer distance.

II. By some of the defendants it is claimed that the case is not brought within the fourth section of the Act, because the tariff for the long haul traffic is not made by the defendants, singly or collectively, but by the National Despatch Line, which operates over their roads.

The National Despatch Line is one of the many fast freight lines of the country, but is perhaps in some respects peculiar. It is neither a corporation nor an association of persons. It exists by virtue of no formal agreement or writing. One witness speaks of it as a name merely; another as a trade mark. It is nevertheless, so far as the public dealing with it are concerned, an actuality of much importance, for it not only transacts a large business, but takes all the traffic passing over the Central Vermont destined to or coming from points beyond St. Albans. It has for general manager, Mr. John Porteous, who owes his office or position to the president of the Central Vermont Railroad Company, whose power to appoint does not appear. Mr. Porteous appoints some assistants, but in general the railroad agents are agents of the National Despatch Line also. The reason for establishing the line originally was that the roads were greatly deficient in rolling stock, and a car company was formed to loan them cars, and this line called into existence to operate the cars. The roads pay mileage for the use of the cars. The earnings of the line, less the expenses, are divided among the roads in agreed proportions. Mr. Porteous makes the tariffs for traffic taken by the line. The long haul traf-

said Canadian Pacific Railway Company and connecting lines and the said Union Pacific Railway Company and connecting lines.

D. F. ALLEN *et al.*,
v.

LOUISVILLE, NEW ALBANY & CHICAGO R. CO.

(No. 44.)

ABSTRACT of pleadings in proceeding now pending at issue before the Commission, based upon allegations of violation of section 4 of the Interstate Commerce Act.

COMPLAINT.

(Filed June 30, 1887.)

Represents that the firm of D. F. Allen & Brother, is engaged in the grain and milling business at Frankfort, in Clinton County, Indiana. That the Louisville, New Albany & Chicago Railway Company owns, operates, manages and controls a line of railway from Indianapolis northward through Frankfort, with general offices at Chicago, Illinois. That said Company was, at the date hereinafter named, engaged in the transportation of passengers and property for hire, and as such, adopted and promulgated an "East bound tariff rate" numbered 9, of the 5th day of April, 1887, whereby it notified the public that the tariff or rate of freight charges for the shipment of all goods and property classified as belonging to the sixth class, would be transported from Indianapolis, Indiana, to New York, N. Y., on and after said last named date, at twenty-three cents per 100 pounds.

That on June 20, 1887, D. F. Allen & Bro., demanded of and received from said Railway Company one freight car for the transportation of bran from Frankfort to the City of New York, over the "Blue Line". That such demand was made for a "Blue Line" car. That on said day said car so given them was loaded, at Frankfort, with bran, to wit: 28,000 pounds, and a bill of lading given therefor.

That thereupon said D. F. Allen & Bro., tendered to the agent of said Railway Company, at Frankfort, the sum of \$64.40, that sum being the freight or tariff thereon, at the rate of twenty-three cents per 100 pounds. That on the same day, the agent of said D. F. Allen & Bro. demanded of and received from said Railway Company's agent at Indianapolis, a statement of the rates of freight or tariff charged by said Railway Company from Indianapolis to New York on said day was twenty-three cents per 100 pounds for property of the sixth class. That bran belongs to and is classified by said Railway Company as property of the sixth class. That all of the property, grain and freight, transported from Indianapolis to New York, over said Company's road, must necessarily pass through Frankfort. That Frankfort is forty-seven miles nearer New York City via said line of railway, than Indianapolis. That the distance from Frankfort to New York over said Company's route, the same being the route over which said car of bran was billed and shipped is forty-seven

miles shorter than the distance from Indianapolis to New York.

That said firm was compelled to accept said bill of lading at said rate of twenty-five cents per 100 pounds.

That the agent of said Railway Company at Frankfort, on the day of such shipment, refused to accept twenty-three cents per 100 pounds for the transportation of said bran, but demanded twenty-five cents per 100 pounds, as aforesaid.

Wherefore complainants say said agent and said Railway Company have violated section 4 of an Act of the Congress of the United States entitled "An Act to Regulate Commerce" approved February 4, 1887, and ask that said Company be fined, for said unlawful discrimination, as provided in section 10 of said Act, that it be ordered to obey the law and furnish to complainants and all other shippers a tariff in conformity with the law, and that they be allowed reasonable counsel and attorney's fees.

ANSWER.

(Filed July 18, 1887.)

Denies each and every allegation in the complaint contained except as hereinafter admitted, and expressly denies that defendant has violated section 4 of the Interstate Commerce Act.

Admits that respondent owns and operates the Louisville, New Albany & Chicago Railway Company, and that it was on June 20, 1887, engaged in the transportation of passengers and property for hire, and that it adopted and promulgated an east bound tariff of freight rates No. 9 on April 5, 1887, whereby it notified the public that the tariff rate of freight charges for the shipment of all goods and property classified as belonging to the sixth class would be transported from Indianapolis, Indiana, to New York, in the State of New York, on and after the date aforesaid, at twenty-three cents per 100 pounds.

Admits that Frankfort is forty-seven miles nearer New York City by respondent's line of railway than is Indianapolis. Admits that respondent's tariff from Frankfort to New York at said date was twenty-five cents per 100 pounds. Avers that such charge of twenty-five cents per 100 pounds was not an unjust or unreasonable rate, and was no discrimination against the complainants or against the locality in which they live and transact business, and that such charge was not in violation of the Act, for the reasons that respondent is a railway company created and existing by and under the laws of Indiana, and as such it is and was at said date engaged in the operation of certain lines of railway owned and leased by it over which it is and was a common carrier of goods, wares and merchandise between Louisville, Kentucky, and Indianapolis and Michigan City, both in Indiana, and Chicago, in Illinois; that in connection with other railway companies and common carriers which connect with the respondent's railway at the points above named, and other points intermediate the points above named, it has been and is now engaged in carrying from Indianapolis, Indiana, goods, wares and merchandise destined to Buffalo, New York, the City of New York and other points without the State of Indiana.

can do so without injustice to the local traffic and without violation of law.

No injustice is done to the local traffic by taking through traffic at very low rates, provided the doing so neither makes the local traffic more expensive nor otherwise incommodes it. The defendants put in evidence to show: (1) that the rates on local traffic are not out of proportion to those charged on through traffic; it being very much more expensive to handle an equal amount of the former than of the latter; (2) that the through traffic is not carried at a loss, but there are net gains from it in the aggregate exceeding those on the local and joint traffic put together, and that it is by means of these gains that the efficiency of the road is maintained; (3) that the rates on the through traffic cannot be materially advanced without losing it; and (4) that the Company cannot afford to reduce the rates on the local traffic. There was strong evidence in support of all these propositions. We are entirely satisfied that a large through business is essential to this line, if it is to continue to be a useful line even for local business. We are also satisfied that the people of Vermont are largely interested in the low rates on long haul traffic, not only because to some extent they send manufactured articles to distant points, but much more because Vermont relies very largely on the West for grain, flour, meats and provisions. It is highly probable that if the people of the State pay high rates on local traffic, they are fully compensated in the low rates on long haul traffic. A board having full power to adjust rates as circumstances should seem to require might perhaps so hold.

But our power in this regard is restricted by the terms of the Law, which absolutely forbid a carrier "to charge or receive any greater compensation in the aggregate for the transportation of passengers or of like kind of property under substantially similar circumstances and conditions for a shorter than for a longer distance over the same line in the same direction, the shorter being included within the longer distance." This is the Law which governs our action, and it cannot be departed from by us on considerations of equity, or of what would be for the interest of parties concerned. If parties complain of a violation of the Law, we can only pass upon the charge preferred; and our action cannot be affected by the circumstance that the rates as adjusted are on the whole to their advantage. They must judge of their interest, while we are to judge of the violations of Law which are complained of.

The controversy in the case, then, is narrowed to this question: Are the circumstances and conditions under the greater charges imposed on the short haul traffic substantially dissimilar to those under which the lesser charges are imposed on the long haul traffic? If not, such greater charges are illegal, and we have no authority to make them otherwise.

The defendants undertook to show that the circumstances and conditions were substantially dissimilar. The evidence of the difference in cost was very justly relied upon, for cost is a very important condition to traffic. This difference fairly justifies a considerable difference in the rates, but we are not satisfied that it will support the difference actually

made. The cost of different kinds of traffic cannot possibly be arrived at with accuracy; at best only an approximating estimate can be made. The calculations put in evidence do not satisfy us that the same kind of freight can be taken from Boston through St. Albans to Detroit at a less cost than from Boston to St. Albans, or from Boston through Ogdensburgh to Chicago and Milwaukee at a less cost than to Ogdensburgh. Honest calculations are made to show such a result, but they are very likely to charge upon local traffic exclusively items which ought to be apportioned, or to leave something out of view which ought to be considered.

The main reliance of the defense, however, was upon a showing of the competition which defendants must meet in long haul traffic. It was shown that for traffic between Boston and the West there was actual or possible competition by steamers to Portland, and thence over the Grand Trunk by steamers to Halifax, and thence over the Intercolonial by the South Eastern Road to connect with the Canadian Pacific by the several trunk lines and by combinations of carriers requiring no special mention.

The evidence, however, is entirely conclusive that the competition which is troublesome to the defendants is that of the trunk lines. It is from these that the defendants demand the differentials, and it is because they are possessed of the shorter lines that the differentials become necessary. The defendants do not fear the competition of a route by Halifax or of any of the other circuitous routes that can be organized; and such lines do not constitute circumstances or conditions having any perceptible bearing on the present controversy. The circumstances and conditions that must justify the greater charge on the shorter haul over the Central Vermont Line must be such as spring from the trunk line competition.

In *The Matter of the Louisville & Nashville Railroad Company* [supra] we expressed the opinion that there might be cases in which the competition between railroads, even when they were all subject to the jurisdiction of the Commission, would present such dissimilarity of circumstances and conditions between long haul and short haul traffic as to justify the greater charge on the shorter haul on the same line in the same direction. But our published opinion shows that we thought the cases must be rare and quite exceptional. The trunk lines are all subject to our jurisdiction. What then are the peculiar circumstances and conditions which constitute the difference between the case before us and cases of railroad competition in general?

The principal difference must be found in the fact that the trunk lines have interior or shorter lines as compared with the line of the defendants, and the latter are compelled, therefore, to make very low rates on their through traffic. This is a necessity of the situation. But it is a necessity which exists wherever long long and short lines compete; the long line must accept the rates made by the short line, and perhaps make concessions from them. In this respect there is nothing peculiar in the position of these defendants; there are roads in every part of the country which can make the

Shows that Indianapolis is nearer the Atlantic seaboard by direct route than Frankfort, and that there are running from Indianapolis the following lines of railway, to wit: Cincinnati, Indianapolis, St. Louis & Chicago, Cincinnati, Hamilton & Chicago, the Pennsylvania Company's Lines; Lake Erie & Western; Cleveland, Columbus, Cincinnati & Indianapolis, and the Louisville, New Albany & Chicago Railway, all competing for Atlantic seaboard business; that this Company could hope to receive none of the business of Indianapolis unless it could be allowed to compete with the above named roads carrying freight to seaboard points at the same rate at which it is carried by the said other competing lines, and if it shall be compelled to charge the same rate that it charges from Frankfort, where complainants transact business, it cannot hope to receive any business at Indianapolis, and it would lose the amount of traffic it has been heretofore able to secure at that point, while merchants and business men at Indianapolis would lose the benefit of one competing line of railroad.

Shows that the warehouse of complainants are located on the tracks of the Lake Erie & Western Railway Company, to which this Company has no access, for the reason that the Lake Erie & Western Railway Company has always refused and still refuses to switch the cars of this respondent to or from its tracks and complainants' elevator and warehouse, and that in consequence thereof any freight complainants may desire to ship by respondent's line must be hauled to the cars of the latter by wagon.

Says that the car of bran mentioned in the complaint shipped by complainants to New York on June 20, last, is the only car the said complainants have ever shipped by this Company to Buffalo or points east thereof, although said complainants ship annually from said point to points in New York and east of the State of Indiana from 1,000 to 2,000 car loads of grain and other property, and the car in question was, as respondent believes, shipped by said line merely for the purpose of affording an opportunity for making the complaint in this action, and not in good faith and in the ordinary and legitimate course of business.

Robert M. TUTTLE

NORTHERN PACIFIC R. R. CO.*
(No. 72.)

ABSTRACT of pleadings in proceeding now pending upon demurrer before the Commission, based upon the charge of carrying a passenger free.

COMPLAINT.

(Filed September 1, 1887.)

States that the Honorable William H. Francis, Judge of the Sixth Judicial District of the Territory of Dakota, has during the year 1887, and since the approval of the Interstate Commerce Law, traveled on the Northern Pacific Railroad cars from place to place as a passen-

ger without paying his railroad fare therefor, and that he has so traveled within this Territory without so paying his fare, with the knowledge, connivance and approval of the agents, employees and officers of said Railroad Company. Asks that such steps be taken as to secure the enforcement of the Statute in such case made and provided.

DEMURRER.

(Filed September 19, 1887.)

Defendant demurs to the petition of the complainant and for ground of demurrer assigns: that said petition does not state facts constituting a violation of the Interstate Commerce Law.

H. F. KETRON

NORFOLK & WESTERN R. R. CO.*
(No. 73.)

ABSTRACT of pleadings in proceeding pending at issue before the Commission, based upon a charge of carrying goods by an indirect route, and one different from that designated by the shipper.

COMPLAINT.

(Filed September 2, 1887.)

The complaint is dated August 27, 1887, and states that petitioner resides in Leicester, Buncombe County, North Carolina. Represents that on or about May 7, 1887, he consigned for shipment 960 pounds of household goods to the Norfolk & Western Railroad Company, at the Town or station of Abingdon, Virginia, to be shipped to Alexander, a station on the Western North Carolina Railroad, every box of said goods marked to be shipped via Morristown, Tennessee. Said goods were forwarded by the agent at Abingdon, to Alexander, via Lynchburg, Virginia, and Salisbury, North Carolina, instead of via Morristown, Tennessee, as directed, thereby causing petitioner to pay \$1.80 per 100 freight; whereas, had they been shipped as directed via Morristown, Tennessee, the freight would have been only seventy-two cents per 100 pounds. States that said goods were delayed in shipping so that they were not delivered to petitioner's agent (his wife) at Alexander for nearly one month from time of consignment, thereby causing slight damages besides trouble and expense.

Further represents that petitioner wrote to Colonel A. Pope, General Passenger Agent of said Norfolk & Western Railroad, explaining the matter to him and asking him to make restitution, but he refused by saying: "We handle business for points beyond our road by such routes as gives us the longest haul thereupon; and that we feel that we have not knowingly injured you in any way, in forwarding your traffic for Alexander via Lynchburg and Salisbury instead of by via Bristol and Morristown."

Wherefore petitioner prays for redress in accordance with law, justice and equity.

*See ante, 483.

*See ante, 483.

ANSWER.

(Filed September 15, 1887.)

States that the question has been the subject of correspondence and investigation to the end of ascertaining the facts, and establishing the correctness of the claimant's statement, viz.: that the property was tendered to our Abingdon agent, marked "To be forwarded via Bristol, Morristown and Paint Rock," as alleged, and likewise for the purpose of ascertaining, by correspondence with connecting lines, what rates would have applied had said property been forwarded by the route it is alleged the goods were marked; there being no other than local rates applicable via the different roads via Bristol, Morristown and Paint Rock. The results of this investigation have been finally reached, and on September 9, 1887, voucher for overcharge upon the shipment to the extent of \$4.38 was made, and forwarded to Mr. Ketron at what was understood to be his postoffice address, viz.: Leicester, Buncombe County, North Carolina.

The settlement of this overcharge was made in conformity with the terms contained in the letter of General Passenger Agent Pope, of June 30, to Mr. Ketron, as per copy herewith attached; and it is suggested that the probability is that this letter reached him, and that the present complaint was in no wise justified by the facts, because it is a matter of evidence that the intention to remedy the alleged wrong, whenever said wrong was established, is clearly shown by said letter, basis of settlement of overcharge attached and referred to, showing at what rate the property was originally charged, and showing likewise that the proportion of the Norfolk & Western Railroad on the property has been reduced in said overcharge settlement to the basis of compensation that would have accrued to it had the property been forwarded from Abingdon to Bristol, as part of the route by which the shipper alleged it was intended the property should be forwarded. The remaining portion of this overcharge is assessed upon the line beyond Lynchburg, as the difference in the sum of the two rates, it being a matter of fact, while this property was charged at a total rate of \$1.30 per 100 pounds, it was not practicable for any rate to have been applied from Abingdon to Alexander via Bristol, Morristown and Paint Rock, of less than \$1.21 per 100 pounds; and it is denied that a rate of seventy-two cents per 100 pounds from Abingdon to Alexander via said route, as charged by the complainant, was practicable or obtainable.

In so far as the erroneous transportation of the property is concerned, careful inquiry fails to establish the fact, by the evidence of any employee, or any other person at Abingdon familiar with the facts of the case, that the property was marked, as alleged; but, as the transportation has been performed and the goods have gone into the possession of the claimant, the Norfolk & Western Railroad Company is powerless to prove to the contrary, and the consignee has been given the benefit of his statement, and thereby reduced defendant's proportion, as before recited, to a sum which would be no greater than that which would have applied had the property been

transported from Abingdon to Alexander via Bristol, Morristown and Paint Rock.

Disclaims any intent on the part of the Norfolk & Western Railroad, or any employee thereof, to have knowingly violated the wishes or instruction of the shipper.

Basis of settlement of overcharge claim of H. F. Ketron, Leicester, North Carolina, on shipment of household goods from Abingdon, Virginia.

copies of the manifesto, in order that I may

endeavor to agree with our connections upon

the reduction of rates that will enable the

overcharge that was made to be refunded.

Very Respectfully,

(Signed) A. Pope, G. F. A.

BUSINESS MEN'S ASSOCIATION OF the

State of MINNESOTA

v.

CHICAGO & NORTHWESTERN R. CO."

(No. 74.)

A

BSTRACT of pleadings in proceeding

pending before the Commission, based

upon allegations of unjust and preferential

charges, etc.

COMPLAINT.

(Filed September 2, 1887.)

1. Represents that petitioner is an Associa-

tion consisting of the several boards of trade,

business men's associations and farmer's organ-

izations in the State of Minnesota; that the

object of the Association is to secure equal

and reasonable rates of transportation of per-

sons and property in accordance with state

and national legislation.

2. That the Chicago & Northwestern Rail-

way Company is a corporation duly incorpo-

*See ante, 488.

rated under the laws of the State of Illinois, and is a common carrier engaged in the transportation for hire of passengers and property, and owning and operating a railroad which runs through Illinois, Wisconsin, Minnesota and Dakota, to and from Chicago, in Illinois, to and through the various stations on its road, including Winona, Janesville, Mankato, St. Peter, Nicollet, New Ulm, Sleepy Eye, Sanborn, Tracy and Lake Benton, in Minnesota, and Huron and Pierre, in Dakota.

8. That the defendant company for its services as such common carrier in carrying merchandise of all kinds and classes from Chicago and Lake Michigan ports to stations on its line of road as before indicated, has established and published a tariff of freights and charges which, as it of right ought to do, establishes and makes a reduced rate per ton per mile for the greater distance from Chicago for all stations on its said line of road between Chicago, Illinois and Janesville, Minnesota, a distance of 412 miles; while in the same tariff, for a continuous transportation of the same freights, over the same line, and from the same point of origination, it establishes and makes a higher through rate per ton per mile for all stations west of Janesville.

Submits the annexed table of extracts from said tariff, wherein the rates per ton per mile are figured from the rates and distances as stated by the defendant railway company, to wit: said defendant charges as follows (the items specified being illustrations of an almost uniform practice on the part of said common carrier):

4. That such charges are unjust and unreasonable and in violation of section 1 of the Interstate Commerce Act.

5. That by such charges such common carrier gives an undue and unreasonable preference and advantage to the several certain stations and localities along the line of said route and, to the same extent, subjects the several certain stations and localities to undue and unreasonable prejudice and disadvantage, in violation of section 3 of said Act.

Prays the Commission to investigate the charges, to order defendant to so amend its tariffs of rates and charges that it shall not charge a higher rate per ton per mile for the longer than for the shorter haul aforesaid, and that such proportionate rates be recommended as shall be just and reasonable, and as shall prevent all undue preferences and advantages, and all undue prejudices and disadvantages.

ANSWER.

(Filed September 22, 1887.)

Demurs to the first, second and third paragraphs of the complaint and says that there is no provision in the Interstate Commerce Act requiring the railway carrier to transport freight at a rate fixed by the ton and mile as supposed in the complaint, and that the complaint shows the fact to be that the Chicago and Northwestern Railway Company does not charge or receive a greater compensation for a shorter than for a longer distance over the same line in the same direction, the shorter being included within the longer distance, and that it has fixed its tariff in ac-

CHICAGO CO.

JANESVILLE, MINN.
MANKATO, MINN.
From JANESVILLE to MANKATO,
being part and the end of a continu-
ous haul of 430 miles.
Distance tariff, under similar circum-
stances.
NICOLLET, MINN.
NEW ULM, MINN.
SLEEPY EYE, MINN.
SANBORN, MINN.
TRACY, MINN.
LAKE BENTON, MINN.

cordance with section 4 of the Act of Congress and published the same according to the other provisions of said Act.

Denies the allegations of the fourth paragraph, that these charges are unjust and unreasonable and in violation of section 1 of the Act.

Denies the statements of the fifth paragraph

of the complaint, and denies that it gives an undue and unreasonable preference and advantage to the several stations and localities along the line of the route mentioned, and that it subjects other stations and localities to undue and unreasonable prejudice and disadvantage in violation of said section 3 of the Act.

mile is figured from the rates and distances as above stated, which are correct,—and showing as claimed by petitioner:

1. That on the first four classes, all stations within the State of Minnesota, south of Henderson, and on the said line of said defendant railway, are charged an unreasonable rate per ton per mile.

2. That on the fifth class (the most important class of general merchandise), all stations in the State of Minnesota, south of St. Paul on said

line of road are charged an unreasonable rate per ton per mile.

3. That on classes A. and B. all stations south of Henderson on said line are charged an unreasonable rate per ton per mile.

4. That on class E. all stations south of Mankato on said line are charged an unreasonable rate and rate per ton per mile.

5. That on classes C. and D. all stations on said line south of St. Paul are charged an unreasonable rate per ton per mile.

INTER S.

6. That on classes of "coal" and "grain" all stations on said line of road south of St. Paul are charged an unreasonable rate per ton per mile.

7. That such charges are unjust and unreasonable and in violation of section 1 of the Interstate Commerce Act.

8. That by such charges such common carrier gives an undue and unreasonable preference and advantage to the several certain stations and localities along the line of the said route, and to the same extent subjects the certain stations and localities to undue and unreasonable prejudice and disadvantage, in violation of section 3 of said Act.

Prayer as in preceding case, No. 74.

ANSWER.

(Filed September 30, 1887.)

Admits defendant is a common carrier, and as such has established and published a tariff of freights and charges, from Superior and other Lake Superior ports to stations on its lines in the State of Minnesota, and to other stations mentioned in the complaint.

Says, as to all that portion of said complaint which avers of and concerning the tariff of freights and charges above set forth, that it (meaning defendant) "establishes and makes a reduced rate per ton per mile for the greater distance from said lake ports for all stations on its lines of road between them and St. Paul, Minnesota (an average distance of 185 miles), while in the same tariff for a continuous transportation of the same freights, over the same line and from the same points of origination, it establishes and makes a higher through rate per ton per mile for stations south and west of St. Paul. In evidence of which representation, your petitioner submits the accompanying table of extracts from said tariff wherein the rate per ton per mile is figured from the rates and distances, as above stated, which are correct," it ought not to be required to make answer thereto because, if such statements are true, the defendant has not thereby violated any law of the United States, and defendant respectfully insists that this honorable board has no jurisdiction to inquire of and concerning the same.

Denies the remainder of the complaint.

LOPEZ DUNBAR'S SONS & CO.

v.

LOUISVILLE & NASHVILLE R. R. CO.

(No. 79.)

COMPLAINT filed September 22, 1887, charging discrimination in favor of New Orleans as against Biloxi.

United States of America, }
Southern District of Mississippi. }

Personally appeared before me, L. B. Holley, a Commissioner of the United States Circuit Court, in and for said district, William K. M. DuKate, a member of the firm of Lopez Dunbar's Sons & Co., a firm doing business in the Town of Biloxi, in said district, who, upon being duly sworn, deposes and says that by reason of the unjust discrimination of the Louis-

ville & Nashville Railroad Company against said firm, doing business on the line of said road, as shown by attached correspondence, rendering it wholly unprofitable for the aforesaid firm, or any other firm, engaged in the same business, to compete with New Orleans, and other points, having a railroad terminus. Affiant further makes oath that his said firm does and carries on its business on the line of said Louisville & Nashville Railroad, and eighty miles nearer Cincinnati, Ohio, than the City of New Orleans, State of Louisiana, and can see no just reason nor cause why they should be made to comply with the unjust discrimination in prices as demanded by the said Louisville & Nashville Railroad Company between the two points named. Wherefore, said affiant in behalf of his said firm prays that the above charges may be investigated by the honorable Interstate Commerce Commission, and relief granted.

(Signed) Wm. K. M. DuKate,
of Lopez Dunbar's Sons & Co.

Subscribed and sworn to before me this—
day of September, A. D., 1887.

(Signed) L. B. Holley, [L. s.]
Comr. U. S. Circuit Court in and for said Dist.

Cincinnati, Ohio, August 22, 1887.

Messrs. Lopez Dunbar's Sons & Co., Biloxi, Miss.,

Gentlemen: Since making your prices, we find that rail freights to N. Orleans have advanced from \$44 to \$88 per car, and to Biloxi they are now \$1.18 per 100 pounds, in less than car lots, and \$188.60 in car lots, as against ninety-eight cents per 100 pounds, and \$78 per car last season. This enormous advance will of course annul our quotations, as it now costs us by rail, in car lots, taking 2,500 pails as a car load basis, about 3½ cents per pail to N. Orleans, and 5½ cents to Biloxi.

Knowing that you have a house in N. Orleans, and believing that you can get your pails into Biloxi much cheaper via N. Orleans, we propose to furnish you at fourteen cents per pail, f. o. b., Cinti. and consign them to your house in N. O., and let them reship from there.

Why could you not arrange with the Biloxi & Barataria Co's, to get your supplies together via N. O.? It may be possible for us, when river opens to get better rates to N. Orleans.

Very Truly,
(Signed) L. W. Gay & Co.

RAYMOND BROS. & CO.

v.

CHICAGO, BURLINGTON & QUINCY
R. R. CO. et al.

(No. 80.)

COMPLAINT filed September 22, 1887, alleging violations of sections 1, 2, 3, 4, 6 and 7 of the Interstate Commerce Act.

To the honorable board of Interstate Commerce Commissioners:

Your petitioners make complaint against the Burlington & Missouri River Railroad Company, in Nebraska, and their owner, the Chicago, Burlington & Quincy Railroad Company, and their western connections, the Denver & Rio Grande, the Rio Grande, Western,

that the distance from San Francisco to Lincoln, by the route of this respondent and its connecting companies is 2163 miles, the same being through that portion of the country where the construction and operation of railroads is attended with the greater cost and expense. That said charge so made is in strict accordance with the provisions of the Interstate Commerce Act as between San Francisco and all points similarly situated, west of the Missouri River.

ANSWER OF BURLINGTON & MISSOURI RIVER R. R. CO. IN NEBRASKA.

(Filed July 14, 1887.)

Admits that the complainants are residents of Lincoln, Lancaster County, Nebraska, and are in the general merchandise business in said city.

Admits that respondents are railway companies organized under the laws of the United States of America and the several States thereof, and operate and maintain lines of railway; but denies that they connect with each other and form a through line of railroad connecting San Francisco, California, and Omaha and Lincoln, Nebraska; but alleges that the respondents, together with the Denver and Rio Grande Western Railway Company, maintain and operate lines of railway which connect with each other and form a through line between the cities aforesaid.

Denies that the charge made by respondents upon the shipment described in the complaint is in violation of the third and fourth sections of the Interstate Commerce Act.

Admits that it charges more for the transportation of freight of the class and character described in the complaint from San Francisco to Lincoln than from San Francisco to Omaha, but denies that the charge for such freight from San Francisco to Omaha is the sum of \$1.75 per 100 pounds, but alleges the fact to be that the charge is the sum of \$2.80 per 100 pounds. Admits that their charge for the transportation of such freight from San Francisco to Lincoln is \$3.50 per 100 pounds, and also admits that the haul from San Francisco to Lincoln is included in the haul from San Francisco to Omaha, and that Omaha is fifty-five miles further distant from San Francisco than is Lincoln via said lines of railway.

Denies that the transportation between San Francisco and Lincoln and between San Francisco and Omaha is under similar circumstances or conditions, and alleges that the transportation aforesaid between the cities as aforesaid is under entirely dissimilar circumstances and conditions.

Denies that respondent railway companies discriminate against Lincoln and in favor of Omaha.

Denies that the rate of \$3.50 per 100 pounds from San Francisco to Lincoln by the lines of railway aforesaid is unreasonable, extortionate and excessive, and alleges the fact to be that said rate is just and reasonable.

Alleges that in respect of the through transportation over the lines of railway aforesaid between San Francisco and Omaha, respondent and they are subject to competition with the Canadian Pacific Railway Company, the

Pacific Mail Steamship Company, and clipper ships, tramp steamers and other vessels running between the Pacific and Atlantic ports, some and all of which are beyond the control of the Interstate Commerce Commission. That especially the Canadian Pacific Railway Company and connecting lines have established as a tariff rate for the transportation of freight of the class and character of that described in the complaint between San Francisco and Omaha the sum of \$3.80 per 100 pounds, thereby either depriving these respondents of the business aforesaid or of forcing them to meet said rate.

Shows that the established rate for the transportation of freight over the lines of the respondents herein of the class and character of that described in the complaint, between San Francisco and Denver, Colorado, and Omaha and other Missouri River points, and all intermediate points between Denver and Omaha and the Missouri River points aforesaid, was \$3.50 per 100 pounds, which rate is yet maintained by this respondent except as to the Missouri River points upon the lines of its road which are the subject of competition with the Canadian Pacific Railway Company and connecting lines and water transportation. That so far as the rate to Lincoln is concerned, it is the same as the rate established to all other points upon the lines of respondent's railroad company within its territory, with the exceptions aforesaid.

Shows that at the times mentioned in the complaint, the through line formed by the railways of the respondents as to all freights of the class and character described in the complaint transported by them between San Francisco and Omaha and all other Missouri River points within their territory, were subject to competition with the through line formed by the Southern Pacific Railway Company and the Union Pacific Railway Company. That sometime prior to the 23d day of April, 1887, upon a showing made by the Union Pacific Railway Company to the Interstate Commerce Commission, an order was granted by the Commission, temporarily releasing the Union Pacific Railway Company from the operation of section 4 of the Interstate Commerce Act for a period not greater than seventy-five days from the date last aforesaid, so as among other things to enable it to compete with the Canadian Pacific Railway Company and connecting lines, and other competing agencies, not subject to the Interstate Commerce Act, for the transportation of freight between the said City of San Francisco and other points on the Pacific Coast, and said City of Omaha and other Missouri River points in its territory. That immediately thereupon the Union Pacific Railway Company reduced its established rates for transportation between San Francisco and Omaha and other Missouri River points in its territory to the rate established by the Canadian Pacific Railway Company and other competing agencies not subject to the Interstate Commerce Act, thereby forcing respondent either to sacrifice its business between San Francisco and Omaha and other Missouri River points in its territory, or to reduce its rates between the points aforesaid to those established by the

PLUMMER, PERRY & CO.

v.

UNION PACIFIC R. CO. *et al.*

(No. 82.)

COMPLAINT filed October 8, 1887, alleging violation of sections 1, 2, 3, 6 and 7 of the Interstate Commerce Act.

To the honorable board of Interstate Commerce Commissioners:

Your petitioners make complaint against the Union Pacific Railway Company, and their western connection, the Southern Pacific Railway Company, and allege the following facts in support of charges made against said Companies, to wit:

One car of canned goods, No. 32151, Union Pacific, was purchased on board of cars at San Francisco, and shipped from that point September 10, 1887, bill of lading 18347; consignors, A. Lusk & Co.; purchasers and consignees, Plummer, Perry & Co., Lincoln, Nebraska. The shipment was taken to Omaha, Nebraska, instead of being stopped at Valley Station, and charges seventy-five cents per cwt., San Francisco to Omaha, was collected and shown as advanced charges when shipment was rebilled from Omaha to Lincoln, via Valley Station, at fifteen cents per cwt., making the through charges from San Francisco to Lincoln, ninety cents per cwt. These charges were paid under protest, in which it is claimed that the rate, San Francisco to Lincoln, should not exceed seventy-five cents per cwt. For particulars see bill of lading, expense bill and copy of protest, herewith attached.

It is further stated that said Railway Companies have during this time, and are now taking canned goods in car loads from San Francisco to Omaha, Sioux City, Chicago, and other jobbing points in the West, in competition with Lincoln, at seventy-five cents per cwt. Therefore, based on the above facts as stated, the complainants charge the Union Pacific Railway Company and the Southern Pacific Railway Company with violations of the Interstate Law as follows:

Violation of section 1. The charges made for the service rendered are unreasonable and unjust. It is claimed that a just and reasonable rate is seventy-five cents per cwt.

Violation of section 2. The excessive charges demanded, collected and received, for performing a like and contemporaneous service, in the transportation of a like kind of traffic, under substantially similar conditions and circumstances, is unjust discrimination.

Violation of section 3. An undue and unreasonable preference is given to firms and localities, also unreasonable prejudice and disadvantage is imposed in other respects; and greater compensation is charged and collected in the aggregate for the transportation of like kind of property, under substantially similar

conditions and circumstances, for a shorter than for a longer haul.

Violation of section 6. The Railway Companies shall print schedules showing the rates, also they shall not charge, collect or receive, greater or less compensation than is specified in said schedules. The rate of ninety cents, as charged, collected and received, is not a published rate.

Violation of section 7. No stoppage or interruption shall be made to prevent continuous carriage from place of shipment to place of destination; and there shall be no intent to avoid or unnecessarily interrupt such continuous carriage, or to evade any of the provisions of this Act. The shipment was taken to Omaha and reshipped to this point, contrary to the wishes of the consignees, thus subjecting the consignment to an unnecessary haul from Valley Station to Omaha and return, delaying the freight to the injury of claimants and exacting additional revenue for the additional and unnecessary service performed.

Complainants also state that they have been injured by the continued violations of the Law since the Act took effect, April 5 last, and that in consequence of said unjust discriminations that have existed and now exist against them, they have been prevented and are now being prevented from selling goods in competition with firms doing like business in all other localities with which they come in competition.

Therefore, complainants pray your honorable body will consider all the facts as above set forth, and will cause a copy of its findings with respect thereto to be delivered to said common carriers, together with a notice to cease and desist from said violations of the Law, and to make such full reparation to the complainants for the injury which has been done them by said common carriers, as it may deem just.

State of Nebraska, } ss.
Lancaster County. }

Eli Plummer, being first duly sworn, deposes and says that he is the senior member of the firm of Plummer, Perry & Co., complainants herein, and that the facts as above set forth are true as he verily believes.

John H. MARTIN *et al.*

v.

SOUTHERN PACIFIC CO. *et al.*

(No. 83.)

COMPLAINT filed October 4, 1887, alleging discrimination in charges from San Francisco, against Denver and in favor of Omaha, Kansas City, etc.

To the honorable, the chairman and members of the Interstate Commerce Commission of the United States:

The complainants, John H. Martin and M. H. Martin, of the City of Denver, County of

Shows that the comparative distances from Indianapolis to New York and points between Indianapolis and Michigan City to New York via the respondent's line and its connections, as

well as by the shortest line via other routes from said several points to New York, are shown in the following

TABLE OF DISTANCES:

From	To	Via.	Miles	Via.	Miles.
Indianapolis....	New York.	L. N. A. & C.	1055	Penna. Co.	825
Westfield.....	"	" " " " "	1035	Ind. Mid. & Penna. Co..	834
Frankfort.....	"	" " " " "	1008	T.St.L. & K.C.Penna.Co..	846
Delphi.....	"	" " " " "	988	Wabash & Penna. Co.	856
Monticello.....	"	" " " " "	970	Penna. Co.	856
Wilders.....	"	" " " " "	971	C. & A. and connections ..	923
La Crosse.....	"	" " " " "	929	Penna. Co.	887
South Wanatah ..	"	" " " " "	923	N. Y. C. & St. L.	876
Wanatah.....	"	" " " " "	921	Penna. Co.	862
Haskell.....	"	" " " " "	917	C. & G. T.	887
Alida.....	"	" " " " "	915	B. & O.	989
Otis.....	"	" " " " "	909	L. S. & N. S.	931
Michigan City..	"	" " " " "		N. C. R. R.	901

States that, for a long series of years last past, the necessities of commerce and trade, and the competition between production and industries, as well as in the business of common carriers, have for all that section of the Union based the charge for transportation upon relative mileage distances to and from the points of shipment, via the shortest line, and other and longer lines having carried at the same rate in the aggregate as the short lines.

Shows that between Chicago, Illinois, and the Atlantic seaboard the rates were based upon the distance between those points, Chicago being treated as a unit. That upon this basis, rates from Indianapolis to New York and other seaboard points and intermediate points like Buffalo, New York, have been and are now fixed by the carriers having short lines between Indianapolis and the points above named rated at 93 per cent of the Chicago rate.

Shows that respondent's road runs from Indianapolis in a northwesterly direction towards Chicago and Michigan City, and that in so doing it crosses lines of railway running east and west, and that in consequence of the distances via the lines crossing respondent's lines, New York, and points east thereof, being shorter than respondent's road and yet further than Indianapolis, each of said junction points has a higher rate to and from New York and points eastward thereof than Indianapolis.

Avers (referring to the table of distances herein before set forth of junction points on respondent's line between Michigan City and Indianapolis) that there are, including Michigan City, twelve junction points as follows, to wit:

1. Junction, Westfield, Indiana, twenty miles from Indianapolis, takes 96 per cent of Chicago rate; 2. Junction, Frankfort, forty-seven miles from Indianapolis, takes 100 per cent of Chicago rate; 3. Junction, Delphi, Indiana, seventy-two miles from Indianapolis, takes 100 per cent of Chicago rate; 4. Junction, Monticello, Indiana, eighty-five miles from Indianapolis, takes 100 per cent of Chicago rate; 5. Junction, Wilders, Indiana, 123 miles from Indianapolis, takes 100 per cent of Chicago rate; 6. Junction, La Crosse, 126 miles from Indianapolis, takes 100 per cent of Chicago rate; 7. Junction, South Wanatah, Indiana, 123 miles from Indianapolis, takes 100 per

cent of Chicago rate; 8. Junction, Wanatah, Indiana, 134 miles from Indianapolis, takes 100 per cent of Chicago rate; 9. Junction, Haskell, Indiana, 136 miles from Indianapolis, takes 100 per cent of Chicago rate; 10. Junction, Alida, Indiana, 140 miles from Indianapolis, takes 100 per cent of Chicago rate; 11. Junction, Otis, Indiana, 146 miles from Indianapolis, takes 100 per cent of Chicago rate; 12. Junction, Michigan City, Indiana, 154 miles from Indianapolis, takes 100 per cent of Chicago rate.

Shows that each of the above named rates from and to said junction points are reasonable and just, and in no sense extortionate, and are made on the rule of a just and reasonable rate for the shortest and most direct line between the junction points named and Buffalo, New York, and points beyond, and that the rates and charges so far fixed from said points are as follows: the Indianapolis rate to and from New York, 93 per cent of the Chicago rate, which, say on sixth class articles, is twenty-five cents per 100 pounds in car load lots, making the Indianapolis rate thereon twenty-three cents, the Westfield rate twenty-four cents, and the other points, including Frankfort, twenty-five cents; so that by reason of the direction in which respondent's road runs, without charging greater compensation in the aggregate for the transportation it cannot secure any of the traffic to or from Indianapolis unless it meets the rate fixed by the short lines; that in the past it has carried from the last named point at the same rate fixed by the shorter lines, and that if it cannot be permitted to continue that practice it must in the future abandon and lose the benefit of that traffic and all freight business to and from Indianapolis and territory herein before named, as this Company has no power or authority to reduce rates in the territory north of Indianapolis below the established rates, and cannot do so from the fact that respondent's connections will not receive the property from it except at the established rate, in effect at the point where the same originates; and therefore there would be no alternative to this Company, except to withdraw from competing for freight at Indianapolis destined to Buffalo, New York, and other points east thereof.

INTER 8.

ises as to the said Commission may seem just and right.

PLUMMER, PERRY & CO.

v.

UNION PACIFIC R. CO. *et al.*

(No. 82.)

COMPLAINT filed October 8, 1887, alleging violation of sections 1, 2, 3, 6 and 7 of the Interstate Commerce Act.

To the honorable board of Interstate Commerce Commissioners:

Your petitioners make complaint against the Union Pacific Railway Company, and their western connection, the Southern Pacific Railway Company, and allege the following facts in support of charges made against said Companies, to wit:

One car of canned goods, No. 82151, Union Pacific, was purchased on board of cars at San Francisco, and shipped from that point September 10, 1887, bill of lading 13347; consignors, A. Lusk & Co.; purchasers and consignees, Plummer, Perry & Co., Lincoln, Nebraska. The shipment was taken to Omaha, Nebraska, instead of being stopped at Valley Station, and charges seventy-five cents per cwt., San Francisco to Omaha, was collected and shown as advanced charges when shipment was rebilled from Omaha to Lincoln, via Valley Station, at fifteen cents per cwt., making the through charges from San Francisco to Lincoln, ninety cents per cwt. These charges were paid under protest, in which it is claimed that the rate, San Francisco to Lincoln, should not exceed seventy-five cents per cwt. For particulars see bill of lading, expense bill and copy of protest, herewith attached.

It is further stated that said Railway Companies have during this time, and are now taking canned goods in car loads from San Francisco to Omaha, Sioux City, Chicago, and other jobbing points in the West, in competition with Lincoln, at seventy-five cents per cwt. Therefore, based on the above facts as stated, the complainants charge the Union Pacific Railway Company and the Southern Pacific Railway Company with violations of the Interstate Law as follows:

Violation of section 1. The charges made for the service rendered are unreasonable and unjust. It is claimed that a just and reasonable rate is seventy-five cents per cwt.

Violation of section 2. The excessive charges demanded, collected and received, for performing a like and contemporaneous service, in the transportation of a like kind of traffic, under substantially similar conditions and circumstances, is unjust discrimination.

Violation of section 3. An undue and unreasonable preference is given to firms and localities, also unreasonable prejudice and disadvantage is imposed in other respects; and greater compensation is charged and collected in the aggregate for the transportation of like kind of property, under substantially similar

conditions and circumstances, for a shorter than for a longer haul.

Violation of section 6. The Railway Companies shall print schedules showing the rates, also they shall not charge, collect or receive, greater or less compensation than is specified in said schedules. The rate of ninety cents, as charged, collected and received, is not a published rate.

Violation of section 7. No stoppage or interruption shall be made to prevent continuous carriage from place of shipment to place of destination; and there shall be no intent to avoid or unnecessarily interrupt such continuous carriage, or to evade any of the provisions of this Act. The shipment was taken to Omaha and reshipped to this point, contrary to the wishes of the consignees, thus subjecting the consignment to an unnecessary haul from Valley Station to Omaha and return, delaying the freight to the injury of claimants and exacting additional revenue for the additional and unnecessary service performed.

Complainants also state that they have been injured by the continued violations of the Law since the Act took effect, April 5 last, and that in consequence of said unjust discriminations that have existed and now exist against them, they have been prevented and are now being prevented from selling goods in competition with firms doing like business in all other localities with which they come in competition.

Therefore, complainants pray your honorable body will consider all the facts as above set forth, and will cause a copy of its findings with respect thereto to be delivered to said common carriers, together with a notice to cease and desist from said violations of the Law, and to make such full reparation to the complainants for the injury which has been done them by said common carriers, as it may deem just.

John H. MARTIN *et al.*

v.

SOUTHERN PACIFIC CO. *et al.*

(No. 83.)

COMPLAINT filed October 4, 1887, alleging discrimination in charges from San Francisco, against Denver and in favor of Omaha, Kansas City, etc.

To the honorable, the chairman and members of the Interstate Commerce Commission of the United States:

The complainants, John H. Martin and M. H. Martin, of the City of Denver, County of

Arapahoe and State of Colorado, do most respectfully complain of the Southern Pacific Company, the Central Pacific Railway Company and the Union Pacific Railway Company; and herein allege and charge the fact to be that they and each of them have been guilty of a violation of the terms, conditions and provisions of the Act entitled "An Act to Regulate Commerce," approved February 4, 1887.

First. That the complainants are informed and therefore believe the fact to be that a certain corporation, calling itself the Southern Pacific Company and organized under the laws of the State of California, in connection with the Central Pacific Railroad Company, has control of or operates a line of road leading from San Francisco, in the said State of California, to the City of Ogden, in the Territory of Utah, the same being owned by the said Central Pacific Railroad Company and forming part of what is now generally known as the Southern Pacific system, and were so operating the same in the month of August, 1887.

Second. That the Union Pacific Railway Company, as the complainants are informed and believe, is a corporation created under the laws of the Congress of the United States, and is the owner of, has been and is operating a line of railway connecting with said Central Pacific Railroad at the said Town of Ogden, in the Territory of Utah, and leading from thence east to the City of Omaha, in the State of Nebraska, on the Missouri River, and another line of railroad connecting with the said last mentioned line at Cheyenne, in the Territory of Wyoming, and running thence by way of said City of Denver to Kansas City, in the State of Missouri, the said Cities of Omaha and Kansas City being on the Missouri River and distant from the City of Denver respectively about 600 and 639 miles.

Third. That the said lines of railway herein above described form a continuous highway under the joint control of said companies, and, as complainants are informed and believe, are used for the transportation of freight without change of cars from said Missouri River to said San Francisco and all intermediate points.

Fourth. That during the month of August, in the year 1887, and for a long time previously thereto, the complainants, your petitioners, were engaged and are now engaged in the business of buying and selling fresh and dried fruits at wholesale, in and about the prosecution of which business they are compelled to and do purchase large quantities of fruits of all kinds and other produce raised in the State of California and sold by the merchants thereof, and in carrying on said business are exposed to the competition of other dealers therein in the City of Denver and other wholesale points along the line of said Railway.

Fifth. That on, to wit: the second day of August, 1887, the complainants purchased at San Francisco from the firm of Allison, Gray & Company 6,400 pounds of dried fruits and 14,025 pounds of raisins, being thirty sacks and seventy-eight boxes of dried fruit and 609 boxes of raisins, and ordered the same shipped and transported from the said City of San Francisco to the said City of Denver by way

of the said Central Pacific and Union Pacific Railroads; and on said second day of August the same were shipped as aforesaid to these complainants, and duly arrived in the said City of Denver about six days thereafter, to wit: about the 8th day of August, 1887.

Sixth. That the said Railway Companies charged complainants for the shipment of said dried fruits at the rate of \$2.80 per 100 pounds and for the shipment of said raisins at the rate of \$3.65 per 100 pounds, which said sums of money complainants were compelled to and did pay on the 9th day of August, 1887, at Denver, Colorado, to T. D. Whithall, agent of the said Union Pacific Railway Company, but paid the same under protest, and that the total amount of charges for said goods was \$532.11.

Seventh. That afterwards and on the 18th day of August, 1887, complainants purchased certain other goods from the said firm of Allison, Gray & Company, to wit: seventy-three sacks of dried fruit of the weight of 4,980 pounds, which were shipped over the same roads and reached the City of Denver on or about the 24th day of August, 1887, for the shipment and transportation of which the said Companies charged these complainants at the rate of \$2.80 per 100 pounds, by reason whereof they were compelled to and did pay to the said agent of the said Union Pacific Railway Company on said 24th day of August the total sum of \$114.54, the said sum being also paid by these complainants under protest, and because the payment of the same was absolutely essential and made essential by the said Union Pacific Railway Company to the delivery of said articles of merchandise to these complainants.

Eighth. That in and about the shipment and transportation of the identical kinds and classes of goods and articles of merchandise to the Cities of Omaha, Nebraska, and Kansas City, Missouri, a distance of more than 600 miles further than is the City of Denver from San Francisco, said Railway Companies charge at the rate of only \$1.05 per 100 pounds, thereby discriminating against these complainants as well as against the said City of Denver more than 100 per cent, there being absolutely no reason whatever therefor. That the said haul from San Francisco to Denver is one continuous haul, and the transportation of said goods can be made and ought to be made from the City of San Francisco to the City of Denver at a rate as much cheaper in proportion to the rate established for the Cities of Omaha and Kansas City as the distance is less to the City of Denver than to said Cities of Omaha and Kansas City; but in truth, and in fact, the said Railway Companies, being common carriers as aforesaid, have charged and received greater compensation from these complainants for the transportation of said goods for a shorter than for a longer distance over the said line and under substantially similar circumstances, in the same direction, the haul to Denver being the shorter haul included within the longer distance to said Kansas City and Omaha.

Ninth. That the rate charged by the said Union Pacific Railway Company from the said Cities of Omaha and Kansas City back to Denver for goods similar to those mentioned

herein is at the rate of \$1.15 per 100 pounds, in consequence of which the misconduct and unlawful actions of said Railway Companies involved in the premises give the merchants of said cities and competitors of your complainants an immense and overwhelming advantage in competition, for the business naturally tributary to Denver, and tend to and will inevitably drive the complainants out of said business, unless relief can be obtained under and in pursuance of the powers conferred upon this honorable Commission by the statute aforesaid.

Tenth. Complainants further allege that they have, by reason of the position of the City of Denver, been compelled to treat directly with the said Union Pacific Railway Company in and about the matters and things herein alleged; that they have protested to the local officials of said Company against the said wrong and outrage, and have demanded to be relieved from the consequences of said discrimination and to be repaid the difference between the amount charged to them for said Denver haul and the amount for similar services in hauling to Kansas City and Omaha, but that the said Company, through its officials aforesaid, has wholly refused and still refuses to make due or any reparation to these, your complainants.

These complainants therefore respectfully pray that your honorable body cause investigation to be made of this, your petitioners' complaint, and of the truth of the charges and statements herein contained, to compel the said Southern Pacific Company, Central Pacific Railroad Company and Union Pacific Railway Company to make answer thereto as required by the rules of practice of your honorable body and to compel the said Companies, or such of them as may be found to be guilty of a violation of the provisions of said Act, to make due reparation not only to these, your petitioners, for the wrong inflicted upon them, but to change and modify their rates of transportation in behalf of the said City of Denver and that immediate locality, so that further unjust, unlawful and unbearable discrimination against it and against your complainants by said companies in behalf of said Cities of Omaha and Kansas City and the merchants of said cities shall forever cease; and in duty bound your complainants will ever pray, etc. Martin & Co., petitioners,

By John H. Martin.

Patterson & Thomas, Attorneys for petitioners, Denver, Colorado.

William S. DEXTER

v.

CHICAGO, BURLINGTON & QUINCY R.
R. CO.

(No. 49.)

A BSTRACT of pleadings in proceeding pending at issue before the Commission, based upon an allegation of violation of section 2 of the Act.

COMPLAINT.

(Filed July 19, 1887.)

The complaint is dated Lincoln, Nebraska,

July 16, 1887, and alleges that the Chicago, Burlington & Quincy Railroad Company, owner of the Burlington & Missouri River Railway Company in Nebraska, did, on the 12th and 18th days of April, 1887, violate section 2 of the Interstate Commerce Act, in having, on those days, transported one John Haggerty, free of charge, from Lincoln, Nebraska, to Oberlin, Kansas, while on the same days, and on the same train and cars, it charged and collected from the complainant, \$7.70 for the same service, said Haggerty not being an officer or employee of any railroad or transportation company, and not a fit subject for charity.

ANSWER.

(Filed August 3, 1887.)

Admits that defendant is a corporation, and that it owns and operates the Burlington & Missouri River Railroad in Nebraska, and that some time in the month of April the said defendant carried one John Haggerty from Lincoln, Nebraska, to Oberlin, Kansas, and return, free of charge, on a pass that was issued by the said road; that said Haggerty is an old employee of the said railroad company and had worked for the defendant for several years on a branch road of the Chicago, Burlington & Quincy Railroad in Iowa, but was transferred from there to Nebraska and commenced working for the Burlington & Missouri River Railroad Company in Nebraska on the 18th day of November, 1885, and continued working for the said road continuously until he was disabled by an attack of rheumatism; that at the time he rode on the pass in April he was incapable of manual labor on account of rheumatic affliction; that he is still in Lincoln, Nebraska, and still disabled to such an extent that he is not capable of performing manual labor; that he expects to go to work for the Company again soon as he is able, and said Company intends that he shall go to work for it whenever he is able, and has always considered him an employee of the Company ever since he commenced working on the road; he has never had any other employment since he commenced working for defendant; that at the time of his using said pass complained of, he made the said trip on his own behalf in looking after his interest in a piece of land in Cheyenne County, Kansas.

Further answering, the defendant denies that in the giving of said pass it violated the Interstate Commerce Act, and denies each and every charge and allegation made in the complaint, excepting that the said Dexter may have ridden over the said road and paid his fare at the time complained of, of which fact the defendant has not accurate information.

ORDER AS TO PUBLICATION OF JOINT TARIFFS.

At a meeting of the Interstate Commerce Commission, held at the office of the Commission in the City of Washington on the 21st day of June, 1887:

Present, all the Commissioners:

The subject of the publication of joint tariffs being under consideration, the following pro-

as the same relate to business
its which are connected by the
le common carrier required b
graph of said section to make pu
of its rates, fares and charg
t tariffs shall be so published
ting the same in large type of
of ordinary pica, copies of w
cept for the use of the public in
in such form that they can be co
ected, at every depot or station
of the carriers uniting in such
re any business is transacted b
with the business of a carrier wh
are required by law to be made
esaid.

defendant refused to ship hew
ltoner from St. Francis, in the
ansas, to Kansas City, for less
one half cents each, which was

be an unreasonable and unjust charge. It was also complained that defendant discriminated in its rates unjustly as between sawed ties and hewed ties, to the prejudice of the latter.

Defendant filed its answer June 28, 1887, in which all unjust discrimination as between hewed and sawed ties was denied. It was further denied that defendant had ever made a charge of forty and one half cents each for the transportation of ties from St. Francis to Kansas City; but it was averred that the charge had been forty cents prior to May 28, 1887, when it was reduced to thirty-three and one half cents, at which it remained when the complaint was filed.

A copy of this answer was sent to complainant, and he has not since been heard from by the Commission. Notice that the case would be heard this day was sent to him, but he has not appeared. The defendant appeared by counsel. Under the circumstances we must assume that complainant is satisfied with the answer, and the case is dismissed.

W. B. FARRAR & CO., of Dalton, Ga.,

v.

EAST TENNESSEE, VIRGINIA & GEORGIA R. CO., and Norfolk & Western R. Co.

(No. 84.)

ABSTRACT of complaint filed October 12, 1887, asking for the restoration of former rate for lumber.

Complainants are, and for twenty years past have been, engaged in the lumber and building business and are obliged to use defendants' railroads.

Complain that the rate on lumber is unjust and excessive, and ask that the old rate be re-established.

The old rate asked for is, from Dalton, Georgia, to Roanoke and Lynchburg, Virginia, eighteen cents per 100 pounds (present rate twenty-two cents), over road of both defendants; from Dalton, Georgia, to Bristol, over first named defendant's road, old rate eight cents, now eleven cents.

Also to Johnson City, this side of Bristol, Tennessee, and to Bristol the rates are excessive.

Former rate to Knoxville six cents per 100 pounds, now seven cents.

Rates are quoted to them "subject to change without notice."

James PYLE & Sons

v.

EAST TENNESSEE, VIRGINIA & GEORGIA R. CO.

(No. 85.)

ABSTRACT of complaint filed October 14, 1887 (as a substitute for complaint in No. 28, ante, 486), charging discrimination against and improper classification of "Pearline."

Complaint of discrimination and violation of section 3.

Defendant is selected (to make a test case)

out of railroads that adhere to classification of Southern Railway & Steamship Association. The article dealt in is a soap powder known as "Pearline" and is classified under "Powders and Washing Compounds," "to all points or cities to which the classification of freight as made by the Southern Railway & Steamship Association is held to apply," and as "soap powder" in their classification to other points reached by them.

E. g., to Knoxville, Tenn., Atlanta, Ga., Chattanooga, Tenn., etc., etc., under first head.

To trans-Mississippi points such as Shreveport, La., Dallas, Texas, Little Rock and Fort Smith, Ark., under second head.

The rate, when classified under first head, is over 100 per cent (that is to say 121 8-10 per cent) more than the freight on soap. The rate to first named points on Pearline being seventy-three cents per 100 pounds as against thirty-three cents on common soap.

Complainants' article should be classified as "soap" for following reasons: it differs only in being in powdered form; similar in bulk; packed in similar boxes; no more liable to injury; no more expensive to handle; used for same purposes; and is in competition with soap, and approximates in price.

All other railroads grant same rate as for soap; and the defendants do for points not subject to the classification of the Southern Railway & Steamship Association.

There is an unjust discrimination, therefore, against this commodity, "Pearline," "under the guise of a different classification."

Thomas J. REYNOLDS of Rochester, N. Y.

v.

WESTERN NEW YORK & PENNSYLVANIA R. R. CO.

(No. 86.)

ABSTRACT of complaint filed October 17, 1887, alleging the imposition of unreasonable and discriminative rates for the transportation of ties.

Defendant corporation (until recently known as the Buffalo, New York & Philadelphia Railroad Company, and for about two years prior to September last under the management of G. Clinton Gardner, Receiver) is engaged in transporting property from Kinzua, Sugar Run, Corydon, Wolf Run, and Quaker Bridge, in Pennsylvania, to Salamanca, Olean, and Rochester, in New York.

Complainant owns from 6,000 to 7,000 acres of timber land in Pennsylvania, and for several years has manufactured and shipped lumber and ties between stations above mentioned.

Prior to appointment of receiver rates on lumber and ties per car (capacity of fifteen to twenty tons), without reference to weight, were as follows:

From Kinzua, Sugar Run, and Corydon to Salamanca,	\$9.00
From Wolf Run and Quaker Bridge to Salamanca,	\$7.50

These rates were continued under receiver until about February, 1888, when the rates on "ties" were so raised that all traffic in ties (except for sale to defendant) ceased.

that the distance from San Francisco to Lincoln, by the route of this respondent and its connecting companies is 2163 miles, the same being through that portion of the country where the construction and operation of railroads is attended with the greater cost and expense. That said charge so made is in strict accordance with the provisions of the Interstate Commerce Act as between San Francisco and all points similarly situated, west of the Missouri River.

ANSWER OF BURLINGTON & MISSOURI RIVER
R. R. CO. IN NEBRASKA.

(Filed July 14, 1887.)

Admits that the complainants are residents of Lincoln, Lancaster County, Nebraska, and are in the general merchandise business in said city.

Admits that respondents are railway companies organized under the laws of the United States of America and the several States thereof, and operate and maintain lines of railway; but denies that they connect with each other and form a through line of railroad connecting San Francisco, California, and Omaha and Lincoln, Nebraska; but alleges that the respondents, together with the Denver and Rio Grande Western Railway Company, maintain and operate lines of railway which connect with each other and form a through line between the cities aforesaid.

Denies that the charge made by respondents upon the shipment described in the complaint is in violation of the third and fourth sections of the Interstate Commerce Act.

Admits that it charges more for the transportation of freight of the class and character described in the complaint from San Francisco to Lincoln than from San Francisco to Omaha, but denies that the charge for such freight from San Francisco to Omaha is the sum of \$1.75 per 100 pounds, but alleges the fact to be that the charge is the sum of \$2.80 per 100 pounds. Admits that their charge for the transportation of such freight from San Francisco to Lincoln is \$3.50 per 100 pounds, and also admits that the haul from San Francisco to Lincoln is included in the haul from San Francisco to Omaha, and that Omaha is fifty-five miles further distant from San Francisco than is Lincoln via said lines of railway.

Denies that the transportation between San Francisco and Lincoln and between San Francisco and Omaha is under similar circumstances or conditions, and alleges that the transportation aforesaid between the cities as aforesaid is under entirely dissimilar circumstances and conditions.

Denies that respondent railway companies discriminate against Lincoln and in favor of Omaha.

Denies that the rate of \$3.50 per 100 pounds from San Francisco to Lincoln by the lines of railway aforesaid is unreasonable, extortionate and excessive, and alleges the fact to be that said rate is just and reasonable.

Alleges that in respect of the through transportation over the lines of railway aforesaid between San Francisco and Omaha, respondent and they are subject to competition with the Canadian Pacific Railway Company, the

Pacific Mail Steamship Company, and clipper ships, tramp steamers and other vessels running between the Pacific and Atlantic ports, some and all of which are beyond the control of the Interstate Commerce Commission. That especially the Canadian Pacific Railway Company and connecting lines have established as a tariff rate for the transportation of freight of the class and character of that described in the complaint between San Francisco and Omaha the sum of \$2.80 per 100 pounds, thereby either depriving these respondents of the business aforesaid or of forcing them to meet said rate.

Shows that the established rate for the transportation of freight over the lines of the respondents herein of the class and character of that described in the complaint, between San Francisco and Denver, Colorado, and Omaha and other Missouri River points, and all intermediate points between Denver and Omaha and the Missouri River points aforesaid, was \$3.50 per 100 pounds, which rate is yet maintained by this respondent except as to the Missouri River points upon the lines of its road which are the subject of competition with the Canadian Pacific Railway Company and connecting lines and water transportation. That so far as the rate to Lincoln is concerned, it is the same as the rate established to all other points upon the lines of respondent's railroad company within its territory, with the exceptions aforesaid.

Shows that at the times mentioned in the complaint, the through line formed by the railways of the respondents as to all freights of the class and character described in the complaint transported by them between San Francisco and Omaha and all other Missouri River points within their territory, were subject to competition with the through line formed by the Southern Pacific Railway Company and the Union Pacific Railway Company. That sometime prior to the 23d day of April, 1887, upon a showing made by the Union Pacific Railway Company to the Interstate Commerce Commission, an order was granted by the Commission, temporarily releasing the Union Pacific Railway Company from the operation of section 4 of the Interstate Commerce Act for a period not greater than seventy-five days from the date last aforesaid, so as among other things to enable it to compete with the Canadian Pacific Railway Company and connecting lines, and other competing agencies, not subject to the Interstate Commerce Act, for the transportation of freight between the said City of San Francisco and other points on the Pacific Coast, and said City of Omaha and other Missouri River points in its territory. That immediately thereupon the Union Pacific Railway Company reduced its established rates for transportation between San Francisco and Omaha and other Missouri River points in its territory to the rate established by the Canadian Pacific Railway Company and other competing agencies not subject to the Interstate Commerce Act, thereby forcing respondent either to sacrifice its business between San Francisco and Omaha and other Missouri River points in its territory, or to reduce its rates between the points aforesaid to those established by the

The case was heard July 19, 1887. (See *ante*, 816.)

Messrs. O'Hara & Bryan, for complainants.

Messrs. Hallam & Myers, for Kentucky Central R. R. Co.

Mr. H. W. Bruce, for Louisville & Nashville R. R. Co.

Mr. J. F. Brooks, for Pittsburg, Cincinnati & St. Louis R. Co.

REPORT AND OPINION OF THE COMMISSION.

Morrison, Commissioner:

In this case it is alleged that the Railroad Companies, against which complaint is made, have denied, and continue to deny and refuse to Keith & Wilson, complainants, reasonable and proper facilities for receiving and forwarding live stock over said Companies' several lines of road, separately, and in their connections with each other, and that said Railroad Companies subject said Keith & Wilson to the payment of terminal and discriminating charges not imposed on other shippers of a like kind of property.

The facts appearing from the agreement of parties and testimony heard are found to be:

1. The complainants are partners buying, selling and shipping live stock, and are the proprietors of stock yards at Covington, Kentucky, convenient for receiving and shipping live stock from and upon the Kentucky Central Railroad, the free use of which yards the complainants have offered to the defendant railroad companies and at which live stock is housed, fed and cared for at lower rates than is done by the Covington Stock Yards Company, whose yards and the yards of Keith & Wilson are near each other on the same live stock switch.

2. The defendants are common carriers of passengers and freight, including live stock, to and from Covington, Kentucky, and, through their connections with each other, from Covington, Kentucky, to Cincinnati, Ohio, and thence to Pittsburg, Pennsylvania, for eastern markets. The Covington Stock Yards, the depot for live stock on the line of the Kentucky Central Road used by all the defendants, are reached by the cars of the other defendant railroad companies over a switch or branch extending from the Kentucky Central to the Louisville & Nashville Road at Milldale, or South Covington, over which the cars from the Louisville & Nashville and the Pittsburg, Cincinnati & St. Louis Roads pass to the Covington Stock Yards; the cars of the Pittsburg, Cincinnati & St. Louis Railway pass to and from its southern terminus at Cincinnati, over the Louisville & Nashville track to Milldale.

3. The defendant, the Pittsburg, Cincinnati & St. Louis Railway Company, with other railroad companies, to which the other defendants are successors, had stipulated with the Covington Stock Yards Company to make its yards with chutes leading thereto, on the line of the Kentucky Central Railroad, their exclusive depot for live stock at Covington, Kentucky, for the term of fifteen years from November 19, 1881; the validity and construction of which stipulation had been litigated in the United States Circuit Court for Kentucky,

and is now pending on appeal in the United States Supreme Court; and before such litigation the stipulation was observed by all the parties.

4. W. A. Peters was and is the superintendent of said Covington Stock Yards Company and agent at the Covington Stock Yards and station for, and reports separately to, each of said defendant railroad companies; and the charges alleged as discriminations were made by him for the benefit of the Covington Stock Yards Company, and went to its treasury.

5. Said Peters, as manager of the Covington Stock Yards Company, has been instructed by it to collect "lotage" on all stock passing through said yards for market, shipped to and from Covington, but none for stock not intended for market, and none for stock transmitted immediately through Covington and not kept or housed at complainants' yards.

6. No charge was made to anyone for passing stock through said Covington Stock Yards before May 8, 1886, about which time complainants established their yards in opposition to the Covington Stock Yards, and at which time said Peters issued notice in writing to complainants, that "on and after that date they would be required to pay yardage on all stock unloaded at the Covington Stock Yards and taken to their (complainants') yards;" and since then such charges have been uniformly imposed on complainants, and, in two instances, the only occurring occasions of their imposition, on others.

7. The Kentucky Central Railroad Company has always been willing to receive and ship stock for Keith & Wilson, at the general freight depot at Covington, free of terminal charges, which could only be done with such inconvenience to both, that the freight depot has been used for receiving live stock only in exceptional cases.

Since said stipulation was litigated in the United States Circuit Court for Kentucky, stock billed in the name of the Kentucky Central Road is delivered to and received from Keith & Wilson, at their own platform and yards, but not by or through the agent Peters. Stock billed in the name of the other defendant railroad companies is delivered and received only at the Covington Stock Yards.

The Kentucky Central Railroad Company protests it has the legal right to resume delivery of all live stock at the Covington Stock Yards arriving at Covington, and that it may do so at any time, unless the judgment of the Commission shall be adverse to the existence of such right.

All live stock transported by the Louisville & Nashville Railroad Company to Covington, however consigned, is contracted to be delivered at the Covington Stock Yards.

Since April 5, 1886, the Pittsburg, Cincinnati & St. Louis Railway Company, defendant, refuses to receive stock from complainants for transportation over its road except through the Covington Stock Yards.

8. The questions litigated in the United States Circuit Court, and now pending on appeal in the United States Supreme Court, involved the right of the Covington Stock Yards Company to charge Keith & Wilson, or their customers, at all for merely transmitting live

stock to and from the public highway; whether the contract was valid to give the Covington Stock Yards Company the exclusive right to keep live stock chutes and yards on right of way of the railroad, and whether the Railroad Company could establish any other live stock depot at Covington. But the said Railroad Company had not proposed to establish any other at Covington.

The defendants answering separately, each for itself, denies that it has, by itself or through its connections, refused to complainants any reasonable or proper facilities, or subjected them to any terminal, discriminating or unreasonable charges, as alleged by them.

In justification of this denial it is urged: that the defendants performed their whole duty to the public as carriers of live stock, by receiving and delivering the same, as they were accustomed to do and had done, on the platform at the chutes of the Covington Stock Yards; that the discriminating and terminal charges complained of were imposed by the Covington Stock Yards Company for its own use; that, while it was more convenient for defendants, the public was reasonably well and better served than it otherwise could or would be but for the arrangement by which defendants made the Covington Stock Yards their exclusive depot for receiving and delivering live stock.

In this view, so ably and plausibly presented as it has been, we are unable to concur. The Covington Stock Yards, less complete than they are at present, were established under different ownership, and were in operation many years previous to the stipulation or arrangement for their use by defendants, or any of them. This arrangement was, no doubt, made with the well meant purpose at the time of securing better terminal and improved stock yard facilities. It may, at the time, have stimulated the improvement and betterment of the yards, and in that way was beneficial, in some measure, to the general public. But that such considerations justify the defendants, or any of them, in making the yards of the Covington Company their exclusive live stock depot, thus enabling the Covington Company to exact payment of those who are not its customers, for the privilege of passing stock to and from the cars of defendants, we do not believe. The justification of such exaction is contradicted by the fact that, near to and on the same live stock switch with the Covington Stock Yards, are the yards of the complainants where the public may be suitably well served at considerably lower rates than the rates of the Covington Company. The complainants, as proprietors of stock yards and in their desire and effort to serve the public in that capacity, have the right to be the rivals of the Covington Stock Yards Company, and such of the public as desire to patronize the complainants, have both the right to do so, and to have their stock shipped on equal terms and for like charges as those who patronize the Covington Yards.

As common carriers of live stock it is the legal duty of the defendants to provide reasonable and proper facilities for receiving on board, and for discharging from their cars, all live stock offered for shipment or brought over their respective roads and their connections to

or from the City of Covington, Kentucky, of charges other than the usual transportation charges. It is not believed that this legal duty and obligation of defendants is fully charged by receiving on, and discharging from, their cars live stock at a depot, access to which must be purchased. And the complainants are entitled to ship and receive live stock over defendants' roads and on defendants' cars to and from Covington, free from any other than the customary transportation charges.

The general freight depot, used as a stock depot in exceptional cases, is admitted to be unsuited for such use; the exaction of demands for passing through their yards made by the Covington Company of the complainants and those who patronize complainant yards, prevent complainants and their customers from shipping or receiving live stock on equally favorable terms with the customer of the Covington Company. Until the defendants provide some other suitable and convenient place at Covington, where the complainants may ship and receive live stock free from other than the customary transportation charges, the defendants should be and will be required to receive from and deliver such stock to complainants at their own yards.

This conclusion of the Commission is in accordance with the judgment and order of Circuit Court of the United States for the District of Kentucky, in the case of George Bliss and Isaac F. Gates, complainants, against the Kentucky Central Railroad Company, which involved the question of the right of the Covington Stock Yards Company to charge Keith & Wilson, complainants, for passing stock through the Covington Stock Yards, which right is involved in that case now pending on appeal in the United States Supreme Court.

It is submitted by the defendant, The Kentucky Central Railroad Company, in view of the pendency in the Supreme Court of the United States of the suit on appeal, involving the validity of the contract and the right of the Covington Stock Yards Company to charge Keith & Wilson for passing through the yards of said Company and the chutes leading therefrom to the platform and cars of the defendants, that no further action be taken, in the matter under consideration, until the determination of said suit. We do not concur in this view.

If the stipulation or contract between the defendants, or any of them, and the Covington Stock Yards Company, should be held valid, as to give the Covington Stock Yards Company a right of action against the Railroad Company for the breach thereof, or if it should be judged that the Covington Stock Yards Company could, by reason of rights acquired under said contract, exact payment of complainants for passing their stock through the yards of the Covington Company, this would not necessarily determine the question which is in controversy here, namely: the right of the defendants to subject the complainants to exorbitant charges by making the Covington Stock Yards the exclusive depot for delivering or receiving live stock shipped to or from Covington. On the other hand, should it be held in the pending suit that, under said

ulation, the Stock Yards Company had no right to demand payment of complainants for so passing stock through their yards, the order, in this case, which would be to the same effect, would be no longer important. It is not, therefore, perceived how a determination by us of the question in controversy here between complainants and defendants can lead to embarrassment, or injuriously affect any rights, which, in the federal courts, may eventually be found to exist.

Yet, that no possible injury may result to the parties, and that the orders of the Commission may conform to the final determination in said suit, leave should and will be given to either of the parties to this proceeding, to apply for a modification of this order at any time after such final determination.

ALLEGHENY RIVER COAL PRODUCERS ASSOCIATION

ALLEGHENY VALLEY R. R. CO.
(No. 89.)

A BSTRACT of complaint filed October 21, 1887, alleging the imposition of unreasonable and discriminative rates for the transportation of coal.

(The complaint is signed by eight Coal Companies composing the Association.)

The complaint alleges that while the defendant company, by a series of circulars, notices, and tariffs, of various dates (copies of which are given), gave notice of terminating all special rates, after April 1, and fixed rates on coal at great advances over former rates, it (the defendant) has nevertheless allowed the owners of coal mined at Phillipstown and Brady's Bend (two of the points named in their tariffs), a rate to Buffalo of eighty-five cents per ton—being much less than the published rates—and affording unjust advantage to such owners. At eighty-five cents complainants could have done a large business, as the favored owners have, while the rate of \$1.10, charged complainants, is almost prohibitory.

BOSTON CHAMBER OF COMMERCE

LAKE SHORE & MICHIGAN SOUTHERN R. CO. *et al.*

A PROTEST was received October 24, 1887, from Jerome Jones and others, a committee representing the following named business organizations of Boston, viz.: The Boston Druggists Association; The Boston Fish Bureau; The Boston Fruit & Produce Exchange; The Boston Grocers' Association; The Boston Merchants' Association; The Boston Paper Trade Association; The Boston Traffic Association; Dry Salters Club; The Earthenware & Glassware Association of Boston; The Lumber Dealers Association; The New England Furniture Exchange; The Boston Shoe & Leather Association; The Oil Trade Association; The Paint & Oil Club of New England.

The protest refers to the pending complaints of the Boston Chamber of Commerce (*ante*,

891), "wherein it is claimed that the practice of allowing an export rebate upon flour, grain, provisions and produce which have originally been billed and transported from points west of Buffalo over the Lake Shore & Michigan Southern, New York Central, and Boston & Albany Railroads and charged regular Boston rates, but after arrival in Boston, by subsequent act and determination of the consignees or owners, been reshipped to Liverpool or other foreign ports, or to the State of Maine, east of Portland, is an unjust discrimination in favor of the exporters and against the local consumers and dealers;" and protests against interfering with this custom, on the ground that "the principal of equalizing the rates so that shippers from the West may have the choice of the Boston route" has long been in practice and has been satisfactory.

The protestants further state that they "are in favor of the effort to secure a revision of the excessive difference in local rates to Boston from Buffalo and points West over those to New York, which is more than the difference in distance justifies."

George RICE of Marietta, Ohio,

CINCINNATI, NEW ORLEANS & TEXAS PACIFIC R. CO., Alabama Great Southern R. Co., and New Orleans & Northeastern R. Co.

(No. 90.)

A BSTRACT of complaint filed October 24, 1887, alleging unreasonable and discriminative rates for the transportation of oil. (See *ante*, 854, 876, 443, 478, *et seq.*)

Complaint alleges that defendants' lines constitute a continuous line from Cincinnati to New Orleans "under a common management," etc.

1. That the rates for oil in barrels (car load lots) are unreasonable in themselves, being \$1.56 per barrel from Cincinnati to New Orleans.

2. That the defendants, at the "dictation" of the Standard Oil Company, of Kentucky, have discriminated in favor of that company since April 5, 1887, by charging it only eighty cents per barrel for the same service.

Each of the present complaints (Nos. 90, 91 and 93), sets forth the same facts as to complainant's business, and the intent to prejudice him, which are combined in the other cases, by the same complaint—Nos. 51–60 (*ante*, 876, 443, 478–482).

They apply to the Queen & Crescent Route and its connection, the East Tennessee, Virginia & Georgia R. Co., and in stating the discrimination, do not expressly allege that it arises from the difference between shipments in barrels and in tank cars, as was stated in the former cases.

George RICE

CINCINNATI, NEW ORLEANS & TEXAS PACIFIC R. CO., Alabama Great Southern R. Co., and Vicksburg & Meridian R. R. Co.
(No. 91.)

A BSTRACT of complaint filed October 24, 1887.

Same facts set forth as in preceding, except that the figures are for transportation from Cincinnati to Vicksburg, Mississippi, charged Rice \$1.56 per barrel; Standard Oil Co. of Kentucky, seventy-five cents.

George RICE

CINCINNATI, NEW ORLEANS & TEXAS
PACIFIC R. CO. and East Tennessee, Vir-
ginia & Georgia R. Co.

(No. 92.)

A BSTRACT of complaint filed October 24,
1887.

Same as preceding, except that the points are
Cincinnati and Knoxville, Tenn.

To Standard Oil Co. of Kentucky, 91 cents

To complainant - - - 1 83 "

Re IOWA BARB STEEL WIRE CO.

1. Whether a special privilege, granted by railroad companies to manufacturers in a single line of trade, but not to manufacturers in general, is consistent with the rule of equity and justice which the Interstate Law undertakes to establish, is a question upon which an opinion ought to be expressed only after the most careful consideration; and the Commission ought clearly to see that duty requires an answer, before it proceeds to give one on *ex parte* application.
2. The Commission will not express an opinion where neither by complaint nor by application for relief is a case stated which will come within its jurisdiction.
3. The Commission has not been given a general dispensing power to relieve hardships under the Law, but its power in that regard is strictly limited.

PETITION for the continuance of an "equalized" rate.

Cooley, Chairman:

A petition is presented by this Company which sets forth that its business is located at Marshalltown, Iowa, on several lines of railway; that the raw material for its manufacture comes from points east of Chicago and, after the same is manufactured, it is shipped southwest, west and northwest; that before the first day of the present month petitioner had an "equalized rate" of freight, which is explained to mean that the fixed rate of freight paid by petitioner from Chicago to Marshalltown, added to the rate paid from Marshalltown to the place of consignment of its manufactured goods, equaled the rate from Chicago to such place of consignment. For example: If the rate of freight from Chicago to the Missouri River was twenty-five cents, and petitioner had paid fifteen cents from Chicago to Marshalltown, its rate from Marshalltown to the Missouri River would be ten cents. This is averred to be a just and equitable arrangement, which has enabled the petitioner to build up a very considerable and reasonably profitable

INTER 8.

business, to give employment to a large number of mechanics and laborers, and to agree to furnish a home market for its products. It has proven satisfactory to the city and surrounding country, and is also averred that while just to the petitioner it has not been a discrimination against other persons or locality. And the petitioner prays on behalf of itself and other like manufacturers, that the Commission shall set the equalized rate, or at least suspend operation of the new Law as applied to the industry mentioned, and that railroad companies be authorized to refund to the manufacturer any excess they may have charged or collected from them before the Commission's action or suspension has been made public.

From this statement of the petitioner it is apparent that what is prayed for is an equal privilege—a privilege not granted to manufacturers in general, and which must be of very great value to the line of trade with which it is thus favored. No doubt what is asserted in the petition is true, that the described industry has prospered in consequence, and that where it is located has received some of the benefit. But whether a special privilege of the sort granted to manufacturers in a single line, but not generally, is consistent with the rule of equity and justice which the Interstate Commerce Law undertakes to establish is a question upon which an opinion ought to be expressed only after the most careful consideration. The consequences of an opinion favorable to the petitioner might tend to injuriously affect other interests, and give rise to complaints of discriminations; the Commission ought clearly to see that it requires an answer before it proceeds to give one on *ex parte* application.

The first question, then, to challenge the action of the Commission, is whether the Commission gives jurisdiction for any authoritative expression of opinion upon the facts of the case. If it makes any complaint which comes within the cognizance of the Commission, or if for any relief which it is in the power of the Commission to grant, it then becomes the duty of the Commission to consider the facts and apply its judgment; but if neither by complaint nor by application for relief is a case stated which will come within its jurisdiction, any expression of opinion upon the facts will be binding upon no one, and might be regarded with impunity. The Commission is not uniformly, under such circumstances, to express opinions when private individuals or corporations have called for them.

The petitioner in this case makes a complaint of violation of law by the railroad companies; the complaint is that a privilege is granted. But the privilege is one which is lawful, the companies might withhold it, and the petitioner would be without any view of what was dictated by interest or their policy. On the other hand, the privilege is one which the railroad companies cannot grant voluntarily because coming under the condemnation of the Law; neither can the Commission give authority to grant it. The Commission has not been given a general dispensing power to relieve hardships under the Law, but its power in

gard is strictly and carefully limited. The Law lays down a general rule of equality of right and privilege, and the Commission has no more authority to make exceptions to that rule than have any other persons, except in the particular cases the Law in terms provides for in section 4.

The case set out in this petition is not one of the exceptional cases for which the Law provides. The Commission is therefore powerless to make any order upon it. *Under such circumstances, it is proper and in accord with its practice to withhold any expression of opinion.*

Re UNITED STATES COMMISSION OF FISH AND FISHERIES.

1. As the United States Commission of Fish and Fisheries is one of the agencies of the government, and the distribution of fish and eggs by that Commission is by authority of the government, the transportation of fish and eggs so distributed falls within the exception of section 22 of the Act.
2. The Interstate Commission declines, in the absence of an actual case, to pass upon the question of the propriety of railroads continuing the issuance of free passes to the United States Fish Commission and the National Museum, to enable their employees to carry on their official duty at less expense to the United States.

ON April 19, 1887, the following communication was received by the Commission: United States Commission of Fish and Fisheries, Washington, D. C., April 16, 1887. The President of the Interstate Commerce Commission.

Sir: For many years past the United States Fish Commission has enjoyed certain privileges given to it by the railroads of the United States, with scarcely an exception, with regard to the transportation of fish and eggs from one part of the country to another in cars built especially for the purpose, and attached to passenger and express trains. The usual rate for such service to private individuals, when not performed as a matter of courtesy for railroad officials of other roads, is from eighteen to twenty-five fares, which at an average rate of three cents per mile would represent from fifty-four to seventy-five cents per mile. The highest charge made by any of the roads to the Commission is twenty cents per mile for a car and five messengers, regular fares being paid for any number of persons above five. In many cases the cost of service is even less, being established by some roads at ten cents per mile; while in repeated instances no charge whatever is made, the car and messengers being carried free. It is estimated that the reduction of cost to the United States by these concessions amounts to not less than \$20,000 or \$30,000 per annum. The appropriations made by Congress would be entirely inadequate to meet the cost of operations of

transportation but for the concessions in question; and the scope of the work of the Commission would be greatly reduced if full payment was required.

The railroad companies are all interested in the work of the Commission, and especially in having proper plants of fish made along their lines, thus increasing the food resources of the country traversed, and inducing a considerable amount of travel on the part of anglers and others.

I find in section 22 of the Act the following clause: "That nothing in this Act shall apply to the carriage, storage or handling of property free or at reduced rates for the United States, state or municipal governments, or for charitable purposes," etc.; and I now beg to inquire whether this applies to the service in question, and whether I may assure such railroads as are willing to continue the favor that their favorable action in the premises would be legal. I ask for an answer at your early convenience, as the work of distribution of shad to the West should begin at an early day.

I would also ask to be informed whether the railroads may continue their practice of issuing to the United States Fish Commission and the National Museum passes to enable their explorers and agents to carry out their official duty at less expense to the United States. It is of course understood that all passes to be used on private business are to be excluded; but a large sum of money is saved annually to the government, by the practice in question. I have not yet ascertained whether the railroad companies would be willing to continue their liberal action in this respect, but desire to have some ruling from you on the subject.

Very Respectfully,

Spencer F. Baird,

U. S. Commissioner Fish and Fisheries,
Secretary Smithsonian Institute.

Schoonmaker, Commissioner, in reply, said:

As the United States Commission of Fish and Fisheries is one of the agencies of the government, and the distribution of fish and fish eggs is by authority of the government, it would seem clear that such transportation falls within the exception in the twenty-second section of the Act to Regulate Commerce, recited in the communication.

(And after citing as conclusive on this branch of the inquiry the opinion *In the Matter of Indian Supplies*, ante, 22, he continued:)

The other branch of the inquiry, "Whether the railroads may continue their practice of issuing to the United States Fish Commission and the National Museum passes to enable their employees and agents to carry on their official duty at less expense to the United States," the Commission declines to express any opinion upon, in advance of an actual case that may be presented for its official action.

The Act is silent upon the question of passes or free carriage for officers or agents of the government; and manifestly the question should only be considered and decided upon a hearing after complaint, should any be presented, for alleged violation of the Law.

Adolph OTTINGER

v.

SOUTHERN PACIFIC R. R. CO.

1. The Act to Regulate Commerce does not afford a remedy for transactions which occurred before it took effect.
2. Where a railroad ticket broker, having no apparent interest in the transaction, presented a complaint alleging unjust discrimination on the part of a railroad company in permitting a certain person to transfer to another the return portion of a passage ticket, while it refused to grant the same privilege to a third person holding a ticket alleged to be similar (but which was not so in fact), *held*, that the person aggrieved should complain in his own name, and that the complaint by the ticket broker would not be entertained.

COMPLAINT charging unjust discrimination in violation of sections 2 and 3 of the Act. The complainant states that he is a railroad ticket broker doing business at San Francisco, California, and alleges substantially the following facts:

That on June 3, 1887, one Mrs. T. M. Randolph was owner of the return portion of a first class railroad ticket over the Southern Pacific railroad, of which a photographic copy is given in the petition, which said ticket was permitted to be sold by Mr. Randolph to another person, through and by virtue of the authority of the Southern Pacific Railroad Company, through its authorized agent, T. H. Goodman, the general ticket and passenger agent of said Company, who indorsed on the reversed side of said ticket the following: "Good for passage of Mrs. Sherwood if accompanying Mrs. Randolph. T. H. Goodman, G. P. & T. A." That on June 17, 1887, one August G. Rommel was the owner of a similar ticket, of which a copy is also given, and applied to said agent for the same and like privilege granted to said Mrs. Randolph, but said Company through said agent refused it. It is further stated that said Rommel desires to sell his said ticket, and his affidavit in support of the facts is appended to the petition. The complaint further avers that within two years next last past 175 tickets of similar character, sold by complainant to be used for passage over said railroad, have been, when offered on the cars, seized and destroyed; to his great injury, for which he demands damages.

Mrs. Randolph's ticket, as shown in the complaint, was a ticket good for a return over one specified route if used within thirty days. The return part of Rommel's ticket entitled the purchaser to choose one of four routes, and to have a ticket issued in pursuance of the choice; and it did not appear that the route of return had been selected, nor had the return ticket been obtained when the privilege of transfer was demanded.

Walker, Commissioner, addressing the petitioner's attorney by letter, said:

The complaint in the case of *Adolph Ottinger v. The Southern Pacific Railroad Company* was duly received, and has been considered
INTER 8.

attentively by the Commission. It is returned with the following suggestions:

The allegations commencing with the words "That said plaintiff within the two years next last past" (referring to 175 tickets alleged to have been purchased and sold by complainant, which were seized when presented for passage) should be expunged, as the subject matter thereof does not appear to be within the jurisdiction of the Commission. The Act to Regulate Commerce does not afford a remedy for transactions which occurred before it took effect. And the transaction with Mrs. Randolph is stated as having occurred on June 3, 1887. If the case stated respecting the 175 alleged tickets was the same, there would be no grounds to claim a preference under the Law as to transactions prior to that date. The case stated, however, is not the same; and upon several grounds no *prima facie* case as to those tickets is presented.

As to the Rommel tickets the Commission prefers that if Mr. Rommel has a grievance, he should present it in his own name. His affidavit is annexed to the petition, but the complaint is made by a party having no apparent interest in the transaction. The Commission is given by the Law a certain discretion in reference to its investigations; and it has so many actual controversies pending that it cannot enter upon the investigation of moot cases. A reasonable evidence of good faith in the present case would seem to be the complaint of the party said to be injured.

It is proper to say further that the Randolph ticket is uncanceled, and the time for its use has expired. It does not appear that the transferee, Mrs. Sherwood, was in fact transported on it, but only that Mr. Goodman indorsed it as "good" for her passage "if accompanying Mrs. Randolph." This was apparently an act of courtesy which the party did not see fit to make use of.

Nor are the Rommel tickets similar in form to the Randolph tickets. They have not reached the same stage. As they stand they are good over four routes, and no selection has been made or return ticket issued.

MISSOURI & ILLINOIS RAILROAD TIE
& LUMBER CO.

v.

CAPE GIRARDEAU & SOUTHWEST-
ERN R. CO.

Where it appears that a carrier to whom freight is delivered for transportation from one point to another in the same State has nothing to do with its transportation out of the State, the fact that the ultimate destination of the freight is another State, to the knowledge of such carrier, will not bring the transportation by such carrier within the jurisdiction of the Commission.

COMPLAINT charging unjust discrimination.

The complainant is engaged in getting out ties along the line of the defendant's road, some of which it desires to transport over that

road to Cape Girardeau, on the Mississippi River, where it has a contract for their delivery. The managing officers of the defendant are informed that the ties are to be taken by boat at Cape Girardeau across the river into Illinois; but such transportation across the river is entirely independent of the transportation requested of the defendant, and it will be by boats not in any respect under the control of the defendant, or forming a continuous line with it, or operated with it under any common arrangement.

The complaint is that the defendant fails to give the complainant cars for the transportation of its ties on request, although at the same time it gives cars to a rival dealer. The road of the defendant is entirely within the State of Missouri.

When the complaint was presented the Commission called attention to the fact that the transportation asked for would be entirely within the State of Missouri and, therefore, apparently not within the jurisdiction of the Commission. Complainant relied upon the fact as giving jurisdiction that the ultimate destination of the ties was another State, and the defendant knew the fact; but as it appeared that the defendant was to be in no way connected with any transportation out of the State, this was held to be unimportant, and the Commission declined to entertain the complaint.

The BOARDS OF TRADE UNION of Farmington, Northfield, Faribault and Owatonna, in the State of Minnesota,

CHICAGO, MILWAUKEE & ST. PAUL R. Co.
(No. 27.)

*The Chicago, Milwaukee & St. Paul Railway Company owns and operates an extensive system of railroads. One of its lines, used largely for the transportation of wheat, runs from a point in Dakota Territory through Minneapolis and St. Paul, to Milwaukee and Chicago. Between Minneapolis and Milwaukee defendant has two routes, one by way of Red Wing and other towns, called the River Division, and being the shorter route; the other by the way of Northfield, Faribault and other towns, and called the Iowa and Minnesota Division. The through rate on wheat from the western terminus in Dakota to Milwaukee and Chicago is twenty-five cents per 100 pounds, with the privilege of milling in transit on both the above mentioned divisions. The rate on wheat from said western Territory to Minneapolis and St. Paul when consigned there, and most, if not all of which is carried by other roads, is seventeen and a half cents a hundred. The rate on the River Division of defendant's road and other competing roads from Minneapolis to Milwaukee and Chicago, and from all intermediate and connecting points on that route, is seven and a half cents a 100

pounds. The rate on wheat on the Iowa and Minnesota Division from Minneapolis and the intermediate towns on that division is fifteen cents per 100 pounds, except from Farmington, which has thirteen and a half cents. The rate on other commodities is the same by both routes. The fact that the rate of wheat on the Iowa and Minnesota Division is double the rate enjoyed by neighboring towns on the other division works practically to their disadvantage and prejudice.

On complaint of millers and others on the Iowa and Minnesota Division of unjust discrimination, *held*:

(a) That the complaint is well founded; that the rate on wheat on that division is relatively too high; that while a reasonable differential may be allowed on that division, on account of greater distance and probable larger expense of transportation and the greater stringency of the competitive forces on the River Division, the difference above the present rate on the River Division should not exceed two and a half cents a hundred.

(b) That it is not a sufficient compliance with the Law that rates are reasonable in themselves, but they should be so relatively reasonable as to protect communities and business against unjust discrimination.

(c) That when the same carrier operates parallel lines, and for any cause accepts low rates on one line, it should furnish sufficient corresponding advantages to the patrons of the other line to prevent undue prejudice and disadvantage, and to preserve the substantial equality contemplated by the statute.

(Decided November 2, 1897.)

COMPLAINT charging unreasonable rates and discrimination in the transportation of wheat.

The facts are stated by the Commission.

Mr. A. D. Keyes, for complainant.

Mr. Burton Hansour, for defendant.

REPORT AND OPINION OF THE COMMISSION.

Schoonmaker, Commissioner:

The complaint in this case sets forth that the charges made by the defendant railroad company for services rendered in the transportation of wheat, flour, and mill stuffs, from the Towns of Farmington, Northfield, Dundas, Faribault, and Owatonna, in the State of Minnesota, to points on the defendant's road in the States of Iowa, Wisconsin and Illinois, are unjust and unreasonable; and also that the defendant company, contrary to the Act of Congress, charges and collects from persons living and doing business at Farmington, Northfield, Dundas, Faribault and Owatonna a greater compensation for services rendered in the transportation of wheat, flour and mill stuffs to points on its road in the States of Wisconsin, Iowa and Illinois, than it charges and collects from persons living and doing business at St. Paul, Minneapolis, Stillwater, Menomonee,

* Syllabus by SCHOONMAKER, Commissioner.

Eau Claire and Chippewa Falls, for a like and contemporaneous service in the transportation to the same points of a like kind of traffic, under substantially similar circumstances and conditions, thus subjecting the complainants to undue and unreasonable prejudice and disadvantage.

The facts found in this case are as follows:

The complainants are engaged in the milling business and have flouring mills at the places named in the petition. Their main supplies are procured from Western Minnesota and from Dakota; but they also purchase and grind wheat produced locally in the vicinity of their mills; and in case of the failure of the local supply they purchase what additional wheat they need in the Minneapolis market.

The Chicago, Milwaukee & St. Paul Railway Company controls and operates an extensive railway system, extending westerly, by different lines, to Iowa, Nebraska, Minnesota, Dakota, and leading to Chicago as the eastern terminus. One portion of the system, which is in question in this case, is operated from the vicinity of Aberdeen, in Dakota, to Minneapolis and St. Paul; thence, by two routes, to Milwaukee, and thence, on the same tracks, to Chicago. The more direct route from Minneapolis and St. Paul runs on the west side of the Mississippi River, in Minnesota, through Hastings, Red Wing, Wabasha, and La Crosse, to La Crosse, in Wisconsin, to which point it is known as the River Division; and from La Crosse, through Portage, to Milwaukee, which is known as the La Crosse Division; and thence to Chicago, known as the Chicago Division.

The other route from Minneapolis and St. Paul diverges to the west and south until it reaches Milwaukee, and extends through Farmington, Northfield, Dundas, Faribault, Owatonna and Austin, in Minnesota, and Calmar, in Iowa, to McGregor, in the same State, known to that point as the Iowa and Minnesota Division; from McGregor through Prairie du Chien and Madison to Milwaukee, and thence on the same tracks as the first route to Chicago, being known as the Prairie du Chien & Chicago Divisions.

Both branches are under the same management, and for a distance of eighty-five miles from Milwaukee to Chicago constitute one line of road.

The defendant also owns and operates, as parts of its general system, lines of road from Stillwater to Hastings, and from Northfield to Red Wing, all in Minnesota; also a line from Menomonee, Wisconsin, to Wabasha, Minnesota; another from Chippewa Falls, Wisconsin, to Wabasha; and a line from La Crosse, on the River Division of the direct route from St. Paul through McGregor, Iowa, to Sabula, Iowa, and from thence through Savannah and Davis Junction to Chicago.

The distance from Minneapolis to Chicago via Red Wing and La Crosse is 420 miles; via Faribault and Prairie du Chien, 496 miles; via Faribault and Sabula, 458 miles; via Red Wing and Sabula, 441 miles. Farmington, Northfield, Faribault, and Owatonna can reach Chicago by three different routes over defendant's road, one via Red Wing and La Crosse; another via McGregor and Prairie du Chien; and

a third via McGregor and Sabula, the distances varying only slightly. The route by way of Prairie du Chien is a few miles in excess of the direct route from Minneapolis, and the other two a little less than that route.

The original points of shipment of wheat by defendant are mainly localities in Western Minnesota and in Dakota Territory, and it is billed to Milwaukee or Chicago by a method known as the milling in transit system, by which the through rate is paid at the place of shipment, with the privilege of converting it into flour *en route*, and then sending forward the flour, without further charge to the point of destination.

In addition to the transit wheat thus transported, considerable quantities of wheat are consigned to Minneapolis and delivered there by other roads, and milled, or sold and shipped to other points. This is called free wheat, to distinguish it from the transit wheat.

The transportation rate charged by the defendant on through shipments of wheat from Dakota and Western Minnesota to Milwaukee and Chicago, with the privilege of milling in transit at Minneapolis and other points on the River Division of its road (and also at Farmington, Northfield, Faribault, Dundas, and Owatonna on the Iowa and Minnesota Division), is twenty-five cents per 100 pounds. This rate is divided into a charge of seventeen and a half cents per hundred from the points of original shipment to Minneapolis and St. Paul, and seven and a half cents per hundred from Minneapolis and St. Paul and from all points south of those cities on the River Division to Milwaukee and Chicago.

Free wheat and flour and mill stuffs transported from Minneapolis and St. Paul by the River Division to Chicago or Milwaukee are charged seven and a half cents per hundred, being the proportion of the through, or milling in transit rate from Dakota to the same destinations.

The rates charged by defendants for transporting wheat, flour and mill stuffs from April 5, 1887, to May 26, 1887, from all the petitioning towns to Milwaukee and Chicago was eighteen cents per 100 pounds. On May 26, the rates were reduced from Faribault to fifteen and a half cents per hundred, and from Farmington to thirteen and a half cents per hundred. On June 1, 1887, the rates were reduced from Northfield, Faribault, Dundas and Owatonna to fifteen cents, and were left at thirteen and a half cents per hundred from Farmington, at which sums they have since been maintained. The rate from Minneapolis to Milwaukee and Chicago, over the line through the petitioning towns, is also fifteen cents per hundred. Prior to and until April 5, 1887, a milling in transit rate of nine and a half cents per hundred was given the petitioning towns to Milwaukee and Chicago.

The tariff rates for other freight from Minneapolis to Chicago are the same over both routes.

On these facts the petitioners claim that they are discriminated against and suffer undue prejudice and disadvantage. They urge that they are required to pay fifteen cents per hundred on the Iowa and Minnesota Division of defendant's road for the transporta-

tion of the same kind of property that is charged only seven and a half cents per hundred on the River Division of the defendant's road, and that their business suffers seriously in consequence.

They concede that some difference in the rates on the two divisions may reasonably exist under the conditions affecting traffic on the River Division, and on account of the longer distance to Milwaukee and Chicago by the other division, but claim that a rate one third higher, or ten cents per hundred, should be the extent of the difference, and is all that the business will bear.

The defendant insists that the rates from the petitioning towns are reasonable and are in fact a large reduction on former rates; and that the seven and a half cent rate from Minneapolis by the River Division is too low, but is forced upon the Railroad Company by the competition of other lines of road running to Chicago, and by lines running from Minneapolis and St. Paul to Duluth for shipment by way of the Lakes to Buffalo, which latter roads charge only five cents per hundred from Minneapolis to Duluth. The rates from Duluth to eastern points being only two and a half cents a hundred higher than from Milwaukee and Chicago to the same eastern points, the defendant contends that it has no option except to conform to the Duluth rates or abandon the business.

The conditions of competition that exercise controlling influence on the rates for wheat transportation over defendant's lines from Minneapolis doubtless exist. They are not dependent upon the volition or action of the defendant. The defendant has yielded to their force in establishing its wheat rate upon its River Division, and all the towns upon that division enjoy the low rate that the defendant is willing to give from Minneapolis. Upon the Iowa and Minnesota Division, however, which is coterminous at Minneapolis and Milwaukee with the River Division, a similar rate is refused, and a rate double in amount is charged for the same kind of traffic. This division is apparently regarded as a separate and independent line, and for that reason at liberty to charge rates deemed suitable for the traffic without reference to the rates on the River Division, or to their effect upon business along the respective routes. This principle is not admissible. The carrier by both routes is the same. The rates for other traffic besides wheat are alike upon both divisions. The same reasons that give equality of rates to other traffic upon the two routes apply with equal, if not greater force, to the article of wheat. Although the low rate on the River Division may result from circumstances apparently beyond the control of the carrier, and may be necessary to enable the carrier to participate in the business, yet, being willing to carry for that rate, the carrier should not, by a relatively unjust rate on the other division, impose a burden that renders business in wheat and flour practically impossible along that division.

A fair statement of the existing disparity demonstrates its indefensible injustice. A Minneapolis or St. Paul miller purchasing free wheat in those cities which has paid a rate of seventeen and a half cents a hundred ships its

products to Milwaukee or Chicago at seven and a half cents a hundred. A miller in the complaining towns purchasing free wheat in the same cities or local wheat is required to pay fifteen cents a hundred to reach the same destinations with its products. The capacity of one of the mills in Dundas is 600 barrels a day. It is computed by complainant's counsel that if its proprietor should purchase wheat in his own vicinity to operate his mill for a year, or should purchase it at Minneapolis, it would cost him to deliver his flour at Chicago \$28,170 more than the cost to a Minneapolis miller for the same quantity of wheat ground and flour shipped over the favored line. That would probably exceed the profits of the business, and the loss would fall upon the producer of the local wheat and the miller.

In a State where the wheat product is so large as in Minnesota, and the chief agricultural staple, inequalities of rates that affect industries so materially are of vital importance.

If the different rates on the two routes worked no hardship or injustice to anyone, there would be no occasion for corrective remedies; but when, as the fact was shown in this case, the producers and millers located in the petitioning towns and along that division are seriously injured, and their business disastrously affected by the double flat rates charged them, the public interests are concerned, and a case is presented demanding redress. These rates obviously preclude competition with the Minneapolis and St. Paul mills and those on the River Division.

The two branches of the defendant's road from Minneapolis to Milwaukee, the one through Hastings, Red Wing and La Crosse, and the other through the petitioning towns, cannot, on the facts of this case, be deemed the same line within the meaning of the fourth section of the statute. But both branches belong to and are operated by the defendant, and are under the same management, and trains may be run from Minneapolis over either branch.

While the inhibition of the fourth section of the Statute, against charging more for a shorter than for a longer distance over the same line, does not literally apply, the defendant under the circumstances of the case is required to make its rates reasonable on both branches of its road. If the two lines were separately owned and operated, competition might substantially equalize the rates. And the fact that one company controls parallel lines affords no warrant for giving superior advantages to the patrons of one line and denying similar advantages to those of the other line. It may not be essential that the rates on the two lines should be identical. Some difference on account of greater distance and increased operating expenses and the conditions affecting the traffic may be reasonably permissible. Nor is it enough that, independently considered, as if the parallel line did not exist, the higher rates might be deemed reasonable. They should be relatively reasonable, in view of their relations to each other and their effect upon the public, in order to prevent undue and unreasonable prejudice and disadvantage, and thus in their results become unjust and unreasonable. Under the present rates the apparently low charges on the route embracing the River and La Crosse

Defendant alleges in its answer, "That for the purpose of facilitating such sales it has established land offices; that to enable parties negotiating with it for the purchase of its lands to personally inspect the same, it has established the rates mentioned in said petition, and has sold, and is now selling, tickets to said parties at such rates; that it has established said rates and is selling said tickets solely to facilitate the sale of said land, and to induce the intending purchasers to purchase the same by offering them such rates of transportation as will enable them to personally inspect its said lands before purchasing, without subjecting them to any great expense if, after inspection, they should be dissatisfied with said land, or should determine not to purchase the same."

Further, the answer is as follows: "Defendant denies that it has ever sold or will sell said tickets to any person merely upon representation or statement of said party that he is a land explorer or settler. On the contrary it avers the fact to be that it has always intended and has always instructed its emigrant and ticket agents not to sell said tickets to any person, unless satisfied that such person in good faith desires to personally inspect defendant's land with a view to making purchases thereof, and procures such tickets for that purpose."

Other owners, especially the government, have land for sale in the same market, and which land adjoins in many instances the land of defendant.

When the defendant owns lands and is in the same market as a vendor, does it not act, in selling the same, as a private individual?

The question is this: When the defendant is a competitor in selling land with the government and with others, all in the same market; the same class of lands; and the same class of purchasers; in the same locality, and at substantially the same prices, can it use its powers as a public carrier to its own private advantage for the sole purpose of promoting the sale of its own lands for its own benefit?

Where, in such case, other owners present a person who desires to inspect their lands, can the defendant charge such person \$10 for a ticket to a station, and those expressing a desire to inspect its own lands a ticket for \$5, or a mere nominal sum for passage to the same station?

Two parties desire to purchase, one from the defendant, one from another owner. The circumstances are the same, that is, the intending purchasers both desire to locate upon the land and cultivate it; they both desire to use the land for the same purpose; the price is substantially the same; then perhaps comes in a third purchaser who intends to enter upon government land as a pre-emptor or homesteader. Here then are three persons at a station on the line of defendant's road desiring to procure tickets to another station upon the line of its road. All of them are farmers, and, as above stated, desire to enter upon land of the same character, which they desire to cultivate; but the defendant discriminates in favor of the one desiring to inspect its own land as against those desiring to enter upon, inspect or purchase the other lands.

The only reason for this discrimination is that thereby the defendant may possibly be benefited by a sale of its own land.

The benefits which will be derived to the country and the public at large will be the same in the three cases; and all the advantages which are set forth in the defendant's brief in this proceeding as a reason for inducing the settlement of their lands would apply equally to a settlement upon land of other parties and upon government land.

If the Railroad Company can sell return tickets at reduced rates, so it can for the same reason sell tickets for a nominal sum.

The argument that the defendant may make such discrimination for its own advantage is without force. All discriminating rates are made with a view of promoting the interest of the party making them. The circumstance that it owns land cannot be held to justify it in discriminating by its rates as against other land owners and as between parties desiring to purchase similar lands in the same market.

That the defendant may obtain some advantage from the sale of its land is true; so it would obtain the advantage from the location of a large mill in a town upon its line where no mill exists, and where grain in consequence of there being no mill is diverted into other channels; and the reason for the location of such mill is to prevent the diversion of such grain to other points.

Again; such a mill if it were large enough might form the nucleus of a new town. The location of such a mill might afford as much, if not a greater, advantage and benefit to the defendant than the sale of a large quantity of its land; and yet it will not be contended that a discrimination in passenger rates and freights to aid in the location and erection of such a mill can be made.

The counsel for defendant contends that the selling of tickets to land explorers, that is, to those who represent that they desire to inspect its land with a view of purchasing the same, is not in contravention of the Statute, because the defendant is willing to sell tickets to all parties desiring to inspect its land, at the same price.

But its interest is not alone to be considered in determining what are substantially similar circumstances and conditions. Under the facts of this case others have similar land to sell; and parties desiring to inspect or purchase are refused the same rates and facilities, for a like and contemporaneous service, that are granted to those desiring to inspect the lands of this defendant; and the provisions of the fourth section are likewise violated for the same reason.

Now, the defendant may have but a few quarter sections in one locality, while on the other hand the government may have a large number of sections open to settlement under the preemption and homestead laws.

To repeat what has been said: If these parties desiring to locate upon government land should apply to the defendant for land explorers' tickets, the defendant would refuse them, because there could be no honest claim made that the parties asking for such tickets desired to inspect the lands of the defendant with a view to purchase. The discrimination then is made to those who represent and satisfy the servants of the defendant that they desire to inspect its lands with a view to purchase, and for that reason alone.

Again; a comparison of the published tariff rates, a copy of which is on file with this Commission, and the rates for land explorers' tickets as per circular Number 496 attached to the petition, will show that the defendant does not offer such rates to and from all stations on its line between given points, but only to the stations named in its circular, so that there is a clear discrimination in its own interest and as to certain localities where in its view its best interest will be promoted. There are presumably many stations on its line to which such tickets are not sold where there is land for sale.

It is urged by the defendant that parties desiring to inspect and purchase land are often parties of small means, who can ill afford to pay the expense of the journey at the regular tariff rates, and this is offered as a reason for issuing land explorers' tickets; but this reason holds good only to those who desire to inspect and purchase the land of the defendant and not the land of others.

When sifted down the answer of defendant is: If you will agree to inspect our lands with a view of purchasing from us, we will reduce your transportation to lands owned by us, but not to the lands of others or to the land of the government open to settlement.

Again; the defendant does not pretend that it offers land explorers' tickets to those who claim that they desire to inspect with a view of purchasing such land as may be found along or in the vicinity of its road. The sale of land explorers' tickets to such persons would be clearly an unjust discrimination.

Twenty persons desire to purchase tickets from St. Paul to a station upon the line of defendant's road. Some travel for pleasure, others to sell goods, and others to inspect land with a view of purchasing. The last are sold tickets at a reduced rate. Can this be justified? Why should men pursuing one object be favored as against those in pursuit of another object?

Again; who is to determine whether parties applying for land explorers' tickets are acting in good faith or not?

The circular reads: "No tickets at rates named herein are to be sold, except on order of Mr. P. B. Groat, General Emigration Agent."

If the sale of such tickets is justifiable in a case where the purchaser in good faith proposes to inspect with a view of purchasing the lands of defendant, the danger of deception is so great, and the means of determining the good faith of such party so uncertain, and the chances of a sale so remote, that the defendant should not prevail in its defense in this proceeding.

As To Settlers' Tickets.

The reason urged for the rebate as to settlers' tickets is substantially the same as urged for the settlement of lands belonging to the defendant; and the reasons are equally applicable to cases of settlement upon lands of the government or other owners.

Of course we do not intend to controvert the position of the defendant that the settlement of the land is of great advantage to the general public and to the defendant.

The question is whether, under the Interstate Commerce Law, the defendant can make

discrimination for that reason, an dividing its passengers into various classes, apportioning the cost of transportation to the classes in proportion to the benefit assumed will be derived to the railroad in the various vocations and employments which they may become engaged in. The view the defendant might, on account of supposed advantages to be gained by the public and itself, give to settlers upon near its line, which the settler is to special rates, which it would refuse a mechanic desiring to locate in a town line.

A physician who proposes to settle near a community of farmers, although services are absolutely necessary to the community, cannot procure the special rate.

A purchaser of land is entitled to a rebate; but the laborer who desires to go to the land to cultivate it is not entitled to a rebate; yet the services of the laborer results of his labor are what it is claimed the defendant.

Under the argument of the defendant should be discovered in a particular country along the line of its railroad, on account of the benefit it would therefrom, sell tickets at a reduced rate to parties who would give assurances intended to engage in boring for oil. A particular township should desire the establishment of a mill, then the Company could reduce the rates to those who intended to locate in the township. If a town was without a merchant dealing in a particular stock of goods, it could grant a special rate to a merchant who desired to locate in such a town.

Finally.

The discrimination being admitted, it is incumbent upon defendant to show that it is justifiable under the provisions of the law.

In the case *Re Southern Railroad Ship Assn.* 1 Inters. Com. Rep. 291, the Commission has decided that the existence of actual competition may make up the circumstances and conditions entitling a carrier to charge less for a longer than a shorter haul, etc., in certain cases.

The decision in that case and in the *Union Case* meets the contention of the defendant as to the right to sell settlers' tickets at reduced rates.

In the case at bar the discrimination is in favor of one passenger as against another, the same train and from and to the same place and possibly traveling for the same purpose.

It is difficult to name a state of facts which will justify any such discrimination, quite apparent that the interest which the defendant has in the business or the personage of one of those passengers to deal with will justify such discrimination.

Messrs. James McNaught and Bullitt, Jr., for defendant:

The petition charges the defendant with a violation of sections 2 and 4 of the Interstate Commerce Act.

It appears that the defendant's regular rate for the transportation of passengers from St. Paul to Fargo, Dakota Territory is \$1.00, and that the rate for the round trip is \$1.50.

the rate from St. Paul to Jamestown, one way, is \$18, round trip, \$20.65, and that the rate to Dawson is \$15.05.

It also appears from the petition, answer and evidence, that the defendant has two kinds of tickets, denominated respectively "settlers' tickets" and "land explorers' tickets," which it sells at rates, between the above-mentioned points, less than it charges for the regular tariff tickets, and which it sells only to two particular classes of passengers, viz.: "settlers" and "land explorers."

The complainant contends: first, that the refusal of defendant to sell these tickets to the public generally, and the limitation of their sale to "settlers" and "land explorers" exclusively, are an unjust discrimination against the public generally, and in contravention of section 2 of the Act; and second, that the selling of such tickets as practiced by the defendant violates the fourth section of the Act.

The phrase "under substantially similar circumstances and conditions" has identically the same meaning in both sections. If a common carrier, under circumstances and conditions that are not substantially similar, charges or receives from any person a greater or less compensation for his transportation than it charges or receives from any other person for doing for him a like and contemporaneous service, it is not guilty of unjust discrimination; and so, if that greater or less compensation happens to be for carriage over a longer distance, less than is charged for carriage over a shorter distance, the shorter distance being included in the longer, still the carrier does not violate section 4, because the dissimilarity in the circumstances and conditions, which protect it from the charge of unjust discrimination also protect it from the charge of violating the "long and short haul" clause. In other words, the dissimilarity of circumstances and conditions which authorize a carrier to discriminate, also authorize it to charge more for a shorter than a longer haul. If, in the case at bar, the defendant is warranted in discriminating between "settlers" and "land explorers" on the one side, and the public generally on the other, on account of dissimilar circumstances and conditions, then, for the same reason, it is warranted in charging for the transportation of such persons for a longer distance less than it charges the public generally for a like and contemporaneous transportation for a shorter distance.

It follows, therefore, that if the circumstances and conditions of the service rendered to "settlers" and "land explorers" by defendant are not similar to the circumstances and conditions of the contemporaneous service rendered by it to the public generally, the defendant has violated neither section 2 nor section 4. Are they similar? This is the sole question, and will be discussed, first with respect to the "settlers'" tickets, and then with respect to the "land explorers'" tickets.

I. Settlers' Tickets.

We contend that the circumstances and conditions surrounding this class of passenger traffic differ radically from the circumstances

and conditions surrounding the passenger traffic with the public generally.

Generally speaking, all passengers occupy exactly the same relation to the carrier. The latter has invested a certain sum in its road bed, rolling stock, depots, platforms and other appurtenances, and is at a certain fixed expense to move every train. It is interested in getting the public to travel over its line only to the extent of the fares which it receives for such travel. A traveler, desiring to go to a certain point, pays the carrier a fixed sum to carry him to that point. The interest of the carrier begins with the application of the passenger for carriage, and ends when it has deposited him safely on its platform at the end of his journey. For performing the carriage the carrier receives a certain sum, proportioned to the distance traveled, the risk assumed, the amount invested in road bed, rolling stock and appliances, the expense of operation and all the circumstances of the case, so as to give to the carrier a reasonable and fair compensation or remuneration for the service performed. The carrier is interested in the transaction only to the extent of receiving its reward or hire, and carrying the passenger safely to the end of the journey, for which the reward or hire is given. Its interest and its duty both terminate when it has deposited the passenger on its platform at his place of destination. The reasons which induce the passenger to make the journey, the length of time the passenger will remain at his destination, the business he will engage in while there, in short everything connected therewith, except the actual carriage itself, and the fare received therefor, are matters of utter indifference to the carrier. Hence, it follows that all passengers should, as a general rule, be treated alike by common carriers. They stand upon the same footing, and are objects of the carrier's solicitude and interest, only because they are the pledges or assurances of so much revenue and so much pecuniary profit to the carrier.

The defendant's interest in "settlers" to whom it sells "settlers'" tickets, is of an entirely different nature. It appears that these tickets are sold to actual settlers only, to various points along the line of defendant's railroad. They are intended to, and do, enable persons of small means (as most settlers are) to locate permanently in the comparatively sparsely populated regions of Northern Dakota at a minimum expense for moving the settler's family, household goods and effects. That these cheap rates are advantageous to the settlers goes without saying; that they are a material factor in inducing persons in the older communities who contemplate a change, to seek their homes along the line of defendant's railroad, appears incontrovertibly from the evidence. The pecuniary saving to the settler which they effect is not, perhaps, a circumstance which takes them out of the operation of the Act to Regulate Commerce, but the effect which they have on the settlement of the country contiguous to defendant's railroad is a circumstance entirely dissimilar from the circumstances surrounding the passenger traffic generally, and warrants the de-

defendant in offering and selling these tickets to actual settlers.

It will be conceded that the defendant is interested to no small degree in the settlement of its territory. At the present time that territory has a very sparse population, scattered, by reason of the vastness of the country, over immense distances. A small population yields a small freight and passenger traffic; and hence the settlement of its tributary country is a matter of vital importance to defendant. With the increase of population of that country the revenues of the defendant will be proportionately increased; and every settler added to the number of its inhabitants means just so many dollars in defendant's pocket. For the purpose of encouraging settlement and inducing settlers to locate along its line, the defendant has adopted and published the rates mentioned in complainant's petition. If these rates were not offered intending settlers, it appears from the evidence that the settlement of the country through which defendant's road runs would be materially retarded.

We contend, therefore, that these rates are a necessity to the rapid development and settlement of Northern Dakota; and as a common carrier, dependent on its traffic for a revenue, the defendant is deeply interested in that development and settlement, because they directly produce an increase in its earnings in two ways:

First. The settlement of the country produces an increased tonnage of articles of commerce carried from the older communities of the East into such country. The settler does not and cannot produce, by his own labor, everything which he consumes. In order to supply the wants of himself and his family, he must, to a greater or less extent, draw upon distant markets. The supplies thus necessarily brought from the outside must pass over defendant's road as freight, and the defendant must receive a certain sum as a reward for their carriage. Suppose, for instance, that the present tonnage from the East, of articles of prime necessity to the base of supplies of any given section of country on defendant's road, is 20,000 tons per month, and within the next year the number of inhabitants of that section should be double, is it not certain that, after this increase in population has taken place, the tonnage from the East to the base of supplies will be increased correspondingly, say from 20,000 tons per month to 40,000 tons per month?

Second. The settler who locates along the line of defendant's road produces, by his labor, more than he consumes. He must get rid of his surplus products in some way, and he does it by shipping them over defendant's road to eastern points, receiving from such points those commodities in exchange which he cannot himself produce, and which are necessary to the comfort of his family. The defendant receives a reward for carrying this surplus out of the country, and thus its revenues are decidedly increased by the settlement.

This increase can be estimated with almost mathematical certainty in those cases where the settler engages in agriculture. The great and almost exclusive crop of Northern Da-

kota is wheat. The farms generally consist of 160 acres. Suppose, now, that a settler goes out to Jamestown, one of the points mentioned in the petition, and locates on a 160 acre tract to farm. He will usually sow at least 120 acres in wheat, and the yield, estimated at fifteen bushels per acre (a low estimate for Dakota), will be 1800 bushels. One fourth of this quantity will be required, say, for home consumption, and the remaining 1350 bushels will be surplus, to be sent to outside markets. The great wheat depots of the Northwest are Duluth and Minneapolis, and the farmer will send his surplus to one or the other of these two places. The tariff of defendant from Jamestown to either city is twenty-two cents per 100 pounds; and it will receive for its reward for the carriage, the sum of \$156.20. As nine settlers out of every ten who locate in Northern Dakota, engage in farming, it is safe to say that every man in 90 per cent of the whole number which settles along the line of defendant's road is worth, in additional freights, \$156 per annum to the defendant.

A third circumstance distinguishing the case of settlers from the general public arises from the fact that the defendant is a land grant railroad. By the Act which incorporated it, the United States granted to it twenty sections of land, designated by odd numbers, on each side of every mile of road in the Territories.

18 U. S. Stat. at L.

By virtue of this grant, the defendant has acquired 11,500,000 acres of land in the Territory of Dakota; and at the present time owns about 7,500,000 acres, having heretofore sold, in round numbers, 4,000,000 acres. The average value of these lands, at the present time, is estimated to be \$2.50 per acre.

Now the present value of these lands will increase in exact proportion to the increase of the population of Northern Dakota, where they are situated. If the population of that region can be increased so as to be as dense, in comparison to area, as the population of, say, Kansas, it is reasonable to assume that the value per acre of these lands will be \$15 or \$20 at the least, an appreciation which represents to the defendant the enormous sum of \$97,500,000, in round numbers. This estimate is, of course, an exaggerated one, for the increase in population must necessarily be gradual, and by the time it reaches the density supposed, the defendant will have disposed of a large part of its lands, and will not obtain the full benefit of their appreciation in value. But it illustrates the importance to the defendant of the settlement of the country. For every settler who locates along its line of road, a certain quantity of land, hitherto unoccupied, is withdrawn from the market. The effect of this withdrawal upon the value of adjacent lands will be inappreciable in the case of a single settler, or even a small number of settlers. But the pioneer in time attracts others around him in considerable numbers. The number of withdrawals becomes greater; fewer and fewer acres of good lands are left for the new comers to select from, and then the values of real estate begin to advance. The defendant, as a land owner, will reap the benefit of this advance, and should therefore be permitted to encourage settlement by every means in its power. Every settler

which it can induce to locate along its line adds so much to the present and future value of its lands in the vicinity of the settlement.

Are not these facts conclusive upon the question of defendant's right to discriminate in favor of actual settlers? If the advantage resulting to defendant from that discrimination were remote, and merely conjectural and hypothetical, the practice could not be sustained. But it is direct, positive, certain and almost capable of mathematical computation in dollars and cents. The case is precisely one of dissimilar circumstances and conditions which was contemplated by Congress when it inserted the phrase in the Act.

The case of *Larrison v. Chicago etc. R. Co.* 1 Inters. Com. Rep. 869, is clearly distinguishable from the case at bar. It was held in that case that a carrier cannot sell mileage tickets to commercial travelers for a less sum than to the public generally. The company contended that the circumstances and conditions of that class of travelers known as "drummers" were not similar to the circumstances and conditions of the public generally, for these reasons:

1. The company argued that the form of mileage ticket sold by it to drummers contained a clause which relieved it of a part of the liability under and subject to which it transported all other passengers. This contention was overruled by the Commission, upon the ground that any and every passenger might enter into such an agreement restricting the carrier's liability, as well and to the same extent as a drummer. The remarks of *Mr. Commissioner Morrison* upon this point of the case would be applicable to the case at bar, if every person who applies for passage could become an actual settler along the line of defendant's road. A contract limiting the carrier's liability can be entered into by any passenger whatsoever, whether he be a minister, a drummer, a doctor, a lawyer, a merchant or a gentleman of leisure. An arbitrary classification of passengers, according to occupation, permitting those of one class to make the contract, and refusing a like privilege to all others, is objectionable because the classification is purely arbitrary and artificial, and rests upon no peculiar circumstances of its own, not common to the other classes.

But the classification made by the defendant in the case at bar rests upon substantial and actual differences of circumstances in the case of settlers on the one hand, and the public generally on the other. We have already indicated those differences, and need not dwell upon them here. If every passenger who applies for carriage will agree to become a settler along defendant's road, the latter will give him a "settler's ticket" at the reduced rates. According to the decision of the Commission in the *Larrison Case*, a carrier must sell mileage tickets to every person who asks for them, and who is willing to enter into the contract limiting liability. And we understand that decision to mean that the carrier need not sell mileage tickets to any person who refuses to enter into the contract. The defendant here is ready, and has at all times been willing, to come within the letter and the spirit of that decision, by selling "settlers' tickets" to every passenger who will become a *bona fide* settler, and by refusing

to sell them to every passenger who will not become such settler.

2. The company argued in the second place that the placing of commercial travelers in a separate class was justified, because they generally rode short distances at a time, and traveled very much more than other people. It is apparent that this argument bears no resemblance whatever to the argument above given in support of defendant's practice with respect to "settlers' tickets."

3. It was lastly claimed that commercial travelers, as salesmen, represent wholesale merchants and manufacturers, for whom they sell goods, thereby creating a large freight traffic for the roads over which they ride. Upon this point *Mr. Commissioner Morrison* said:

"To increase the quantity of railroad business in the manner alleged, traveling salesmen must stimulate consumption, and add to the demand for the necessities and comforts of life. Commercial travelers are usually men of such energy and superior intelligence that they introduce into some communities articles useful and desirable earlier than such articles might otherwise reach them. Yet the general intelligence of the people is equal to providing themselves with such luxuries and comforts as their means will justify. And the representatives of merchants are not likely to sell, nor railroads to carry, more goods than customers can pay for."

It is apparent, from this language, that the Commission overruled this claim purely upon a question of fact. The base of supplies of any given section of country supplies the wants of that section; and the quantities of commodities necessary to supply those wants depend altogether upon the number of inhabitants of such section. Increase the number of inhabitants, and the quantity of goods necessary to supply their wants increases. Decrease the number, and the quantity decreases. Now, a drummer who visits a base of supplies for the purpose of selling goods to its merchants cannot, by any possibility, sell a greater quantity than is required by the section drawing upon that base. The inhabitants require a certain fixed quantity for their wants, and will procure this quantity at all events, even if the drummer does not visit the merchants. Any quantity over and above this fixed quantity is a surplus which they cannot consume and which they do not want. The merchants, being experienced in their business, know exactly what is necessary to suit their trade, and the quantity required, and are not in the habit of purchasing more than they can dispose of.

Hence, the drummer does not, and in the nature of things cannot, add one pound to the freight traffic of the railroad over which he travels to make his visit; and there can be no just ground for discriminating in his favor in the passenger rates charged for his carriage.

The case at bar, however, differs from the case considered by the Commission, because here every actual settler along the line of defendant's road, causes a certain increase in defendant's business; and adds a certain number of pounds to the freight carried both into and out of the country. The value of defendant's land is also enhanced; and it would seem clear

that the defendant was justified in discriminating in favor of so valuable a passenger.

II. *Land Exploring Rebate Ticket.*

That defendant is warranted in pursuing its practice with respect to the sale of these tickets

the purposes of the grant, viz.: of aiding in the construction of its railroad and telegraph line, by being placed upon the market and sold to persons desiring to purchase. It has therefore established a "Land Department" for the sale of its lands, with principal offices at St.

cial rates were not prohibited by that Act. It was, however, believed that Congress, in passing the Act, intended only to prohibit unjust discrimination practiced by common carriers without regard to the circumstances of any particular case, but granted purely as a matter of favoritism for the purpose of building up particular localities at the expense of other localities, or of giving some particular individual an undue advantage over his competitors. It seemed that the case of settlers had such a peculiar character of its own as to warrant an exception being made in their favor, as not coming within the purview of the Act and as not included within its scope liberally construed. It was also considered that unless special rates to settlers was given, the development of the Northwest would be greatly retarded.

Governed by these considerations the defendant, a short time after the Act went into effect, determined to renew the sale of these tickets, which sale had been discontinued for a short time after the Act went into effect; it has continued their sale up to the present time.

The sole question is whether the defendant is correct in its belief that these special rates are necessary, in order to secure speedy settlement of the territory through which its railroad runs. If it is, then we claim that the continuance of the practice should be permitted.

The question is purely one of fact; and the only testimony before the Commission is that of Mr. P. B. Groat, defendant's general emigration agent. The long experience which Mr. Groat has had in this kind of business entitled his testimony to be received with great consideration, and gives to it great weight.

What are the facts which Mr. Groat's testimony reasonably tends to prove? They are in substance that settlers, as a rule, are persons of small means; that unless they can secure reduced rates of transportation from the point of removal to their destination, they are unable to move, as their means do not permit them to pay the regular tariff rates; and that, unless such reduced rates were permitted, the settlement of the thinly populated regions of Northern Dakota would receive a blow, the full seriousness of which it would be impossible to calculate.

In considering this case, therefore, we urge upon the Commission the importance to the material prosperity and development of the Northwest, of permitting the defendant to continue the sale of these tickets to settlers. We firmly believe that they are an important factor in the settlement of the country through which the defendant's road runs, and that if they are prohibited, an incalculable injury will be inflicted upon that region. For this reason, if for no other, their sale should be allowed unless clearly and incontrovertibly prohibited by the Statute.

We respectfully submit that the petition should be dismissed.

Supplemental Brief.

In addition to the brief submitted herewith, which said brief was prepared before the trial and submission of the case, we make the following points:

I. That the petition of the complainant ought to be dismissed for want of prosecution. In section 18 of the Interstate Commerce Act it is provided that no complaint shall, at any time, be dismissed because of absence of direct damage to the plaintiff. This provision is the only statutory limitation upon the power of the Commission to dismiss. We know of no justifiable practice or rule warranting the Commission in investigating a petition involving purely local questions, when neither the petitioner, nor anyone for him, appears to prosecute, and especially where the discrimination, if such it is, is in the interest of the general public and the company, and injures no one. As incidental to this question we suggest that there is no proof that the complainant or other person has sustained direct or indirect damage.

II. Section 8 of the Interstate Commerce Act is an re-enactment of section 2 of an Act "For the Better Regulation of the Traffic on Railways and Canals," 17 and 18 Vict. chap. 81; enacted July 10, 1854. See Supplement, Vol. 27, Am. & Eng. R. R. Cas. p. 82. Said section 8 expressly prohibits undue and unreasonable discrimination. This express prohibition is a statutory recognition of just and reasonable discrimination; and is a restriction of the power of the Commission to the regulation of undue and unreasonable discrimination. *Chicago etc. R. Co. v. Peter*, 64 Ill. 11; *Houston etc. R. Co. v. Rust*, and *Rogan v. Aiken*, 9 Am. & Eng. R. R. Cas. 123, 201.

The construction by the Courts of Great Britain, of the English Statute before referred to, must have an influence in construing said section 8. The Courts of Great Britain have uniformly held that said section 2 did not prevent the carrying of car loads, or large quantities of freight, for less rate per hundred than it did parts of car loads or smaller quantities. 27 Fed. Rep. p. 526; 23 Am. & Eng. R. R. Cas. p. 650, and the English authorities there cited by Judge Wallace.

It is also said by the English Courts, in construing said section, regard should be had for the benefit and convenience of the public and the convenience of the railroad companies with regard to their general traffic; and that was not undue and unjust discrimination which benefited the public and the traffic of the company, and did not materially interfere with or damage any other class of business; that in such a case fancied and imaginary rights were not to be considered. *Lees v. Lancashire & Yorkshire R. R. Co.* 1 Nev. & McN. 852; *Ransom v. Eastern C. R. Co.* 1 Nev. & McN. 68; *Orlaid v. Northeastern R. R. Co.* 1 Nev. & McN. 72.

The Supreme Court of Mississippi said: "We think that regulating rates for the transportation of persons and property does not fall within the class of matter requiring or demanding uniformity. Perhaps no subject admits or demands greater diversity with varying localities and circumstances justly affecting the value of the services." 21 Am. & Eng. R. R. Cas. 18.

The admitted averments in the answer and the testimony of Messrs. Groat and Postlewaite and the conditions and limitations contained in the land explorer and settler's tickets

which was refused him. The answer attempts to justify the sale of such tickets at reduced rates to persons desiring to explore and settle upon the lands embraced in defendant's governmental land grants, and denies all knowledge or information of the complainant's alleged application for a ticket.

There being no proof before the Commission that the complainant was in fact refused an explorer's or settler's ticket on application therefor, or was refused transportation at the rates at which such tickets were sold, it is obvious that no personal grievance of the complainant is established. So far as his interests are concerned, there are no facts before the Commission upon which action can be taken.

Section 15 of the Act to Regulate Commerce provides, however, that if, in any case in which an investigation shall be made by the said Commission, it shall be made to appear to the satisfaction of the Commission, either by testimony of witnesses or other evidence, that anything has been done, or omitted to be done, in violation of the provisions of said Act, by any common carrier, it shall be the duty of the Commission to take proper proceedings to put an end to such violation of law. The answer filed by defendant admitted and attempted to justify a course of dealing which the Commission regards as in certain respects illegal, and a report thereon is made a statutory duty. The defendant was heard by its officers at Minneapolis on September 14, and briefs have since been filed by both parties.

The facts found are as follows: the Northern Pacific Railroad Company owns and operates a railroad extending from Ashland, in the State of Wisconsin, and from St. Paul, in the State of Minnesota, westerly through the States of Wisconsin and Minnesota, and the Territories of Dakota, Montana, Idaho, and Washington, to Tacoma, in the latter Territory. In connection with its charter this Company received from the General Government extensive land grants in each of the said States and Territories; and it is continually engaged in offering said lands to purchasers and in making sales of the same. It has established various land offices, and has a land commissioner at St. Paul in charge of such sales. The sale of said lands is of great importance to the Company, not only on account of the income arising therefrom, but also for the reason that the settlement and development of the country along its line tends to permanently increase the business of the road, and to insure its future prosperity.

The defendant company issues first and second class tickets, including first class round trip tickets, which are advertised upon its published schedules, and are sold at its usual ticket offices, together with such excursion and mileage tickets as are from time to time announced and sold to the public generally.

Besides these regular tickets it issues two special classes of tickets, called respectively, "Round Trip Land Exploring Rebate Tickets" and "Settlers' One Way Land Tickets," which are used to induce possible purchasers to go and inspect said lands, and buy and settle upon the same. Purchasers of these tickets are carried upon the regular trains of the Company, and in the same cars with pur-

chasers of the Company's regular issues of tickets.

The above described special tickets are not found at the ticket offices, but can only be procured upon personal application to said land commissioner at St. Paul. They are issued at his discretion and are intended to be sold only to "*bona fide* land seekers, examining with a view of securing lands, and to actual settlers." The rates are very low as compared with the regular first and second class tariffs; for example: to Medora, in Dakota Territory, the first class fare is \$23.50, second class, \$19.35; explorer's round trip ticket out and back, \$26.90; settler's ticket, \$14.80; to Jamestown, first class round trip out and back, \$21.10; explorer's round trip ticket, \$11, etc.

In addition to these greatly reduced rates, the "explorer's ticket" bears a rebate coupon to be retained by the passenger, agreeing that in case he shall within forty days purchase not less than 160 acres of the Company's land, he will be allowed one half of the amount paid for such ticket to be applied upon his first payment for the land; and the "settler's ticket" bears a like coupon entitling the passenger to an allowance on his first payment for lands purchased from the Company, equal to the whole amount paid by him for such ticket. "Explorers' tickets" are sold to persons who represent themselves as intending to go out and inspect defendant's lands, with a view to subsequent purchase after returning to St. Paul, and are not transferable. "Settlers' tickets" are sold to actual settlers upon the Company's lands or upon the publiclands, no rebates being available, of course, in the latter case. To secure settlers' one way fares, passengers must be accompanied with emigrant effects. Only a portion of the Company's road can be reached upon these special tickets, namely: from Milnor, in Minnesota, 305 miles from St. Paul, to Little Missouri, in Dakota, 626 miles from St. Paul. Explorers desiring to go further West than this are accommodated by special excursion rates open to the public and regularly advertised, made to points west of the Missouri River during the fall season of the year.

No objection has occurred to the Commission in respect to the plan pursued by the defendant in issuing these special tickets whereby an allowance is made, in the one case of one half and in the other case of the entire price of the ticket, to purchasers of the Company's lands. The Company may sell its lands at such price as it may see fit to establish therefor, and may accept whatever it sees fit in payment; and when it makes a discount from the selling price of an amount equal to the whole or to any part of the fare paid by the purchaser in inspecting or emigrating to said lands, it does not appear to violate any of the provisions of the Act to Regulate Commerce.

But when the defendant puts on sale in an emigration office special tickets at reduced rates, which are not open to the public at large, but which are used by passengers upon its ordinary trains, justification for which is claimed in the fact that they are a valuable auxiliary to the Company's sales of real estate, it certainly demands and receives from its or-

inary passengers more for the same service, than it collects from persons who, truthfully or otherwise, represent themselves to be prospective purchasers of land or settlers. This course of dealing is in direct contravention of the second section of the Act to Regulate Commerce. The fact that the custom tends to stimulate the sales of the Company's land or its future business, cannot be regarded as an excuse for its continuance. Many companies would very likely be glad to stimulate their freight business by offering special rates or even free transportation to shippers or to traveling salesmen; and other companies which are engaged incidentally in the sale of coal or any other outside enterprise, could largely increase their revenues by judiciously employing the facilities of transportation at their disposal; but all these methods are in direct opposition to the spirit and letter of the Act to Regulate Commerce, and are illustrations of the evils which the Act was designed to remedy. In the transportation of passengers carriers are performing a public duty under franchises granted by the State, and are subject to the rules of law which require absolute impartiality to all, when the circumstances and conditions are substantially similar. The fact that their own interests may be promoted to some extent by swerving from this rule cannot be regarded as sufficient to warrant a departure from the obvious language of the Statute.

It is further suggested that the "settlement of the country" should be encouraged; that the interest of the community is promoted by the taking up and settling of new lands in the far West, and the development of the wonderful capabilities of the Territories across which defendant's line extends. This consideration, if entitled to weight, should be addressed to the legislative department. The law, as framed by Congress, admits of no exception upon any such ground; and in any event it may fairly be questionable whether the inducements which may properly be given to purchasers of railroad lands by way of discounts in settlement for the price thereof, and by way of excursion tickets open to the public at large, and apparently regarded as adequate in respect to defendant's territory west of the Missouri River, are not sufficient to bring their lands upon the market as rapidly as the interest of the country fairly requires.

It is further urged by the defendant that the transportation of that class of the public which it denominates as "settlers" is performed under different circumstances and conditions from those attending the transportation of the residue of the public. The reasons given are found in the facts that settlers are usually persons of small means who are about to locate permanently in the sparsely populated regions of the Northwest; and that the settlement of that territory will yield a largely increased revenue to the defendant in the future, on both its freight and passenger traffic, so that it is largely for the interest of the defendant to stimulate the movement of settlers toward the Territories contiguous to its line. This is merely stating the same proposition in another form. A car load of passengers leaving St. Paul, some of whom are tourists, some bus-

iness men, some insurance agents, some settlers, are all in fact transported under precisely the same "circumstances and conditions" until they respectively leave the car, whatever may be their calling or their intention as to future residence. It is not claimed that the rates in question are forced upon the defendant by competition, or by any external conditions whatever. They are made or refused at defendant's pleasure! The circumstances and conditions referred to by defendant's counsel do not pertain to the transportation of the passengers, but are connected with their varying pecuniary ability and their possible future home. These considerations are not proper to be admitted in considering the propriety of discrimination between passengers who are patrons of common carriers.

Moreover, "settlers," so-called, are not confined to the great Northwest, but are found throughout the entire United States; upon almost every passenger train a constant movement of population is going on between the States, which if once recognized as forming a ground for a discrimination in railroad charges, would make an opening extremely difficult to regulate. Professional and business men are frequently "settlers" in fact. Travelers coming through from eastern points, who have purchased tickets to their ultimate destination, may not be informed of the opportunity to obtain a special rate at the St. Paul land office; the same train may, and no doubt often does contain "settlers," some of whom are charged much more than others. And again it is quite possible for the defendant to be imposed upon by persons who claim to be explorers or settlers, when in fact their actual intention is very different. These considerations illustrate the practical impossibility as well as the inevitable unfairness of attempts to discriminate among passengers enjoying the same accommodations, by reason of any special classification founded upon means, occupation, or purpose.

It will be very difficult to find any principle upon which the transportation of passengers in our country can be impartially and fairly carried on short of maintaining the rule of absolute equality of payment from all persons enjoying the same accommodations.

The defendant must, therefore, be notified to immediately cease and desist from selling either of said special classes of tickets at lower rates than those established by it for the sale of tickets to the public generally.

David F. ALLEN and Edward A. ALLEN
v.
LOUISVILLE, NEW ALBANY & CHICAGO R. CO.
(No. 44.)

*In this case the complaint is that the defendant violates the fourth section of the Interstate Commerce Law by charging more for a shorter than for a longer distance over the same line in the same direction. The facts are that defendant has a line of railroad extending from New Albany, Indiana, to Mich-

igan City, passing through India and Frankfort. At Indianapolis road is crossed by east and west which give a rate on wheat to New of twenty-three cents a hundred. At Frankfort it is crossed by a road which makes a rate to New of twenty-five cents. At South W defendant's road is crossed by the York, Chicago & St. Louis; and at Michigan City it intersects the Michigan Central. Defendant wishes to participate in the grain carrying trade to New and the Michigan Central will take from it at Michigan City grain to Indianapolis, and prorate with twenty-three cent rate on a mileage basis. The New York, Chicago & St. Louis will receive from it at South W the grain taken up at Frankfort at a rate with it the twenty-five cent a mileage basis. Defendant has the practice of taking wheat at Indianapolis on these terms; and it receives a load from complainants at Frankfort and charged the twenty-five cent. The Indianapolis shipments are through Frankfort on their line to Michigan City, and the whole haul from Indianapolis to New York by Michigan City is greater than from Frankfort to New York by South W. It appeared by the evidence, however, that by the direct line Indianapolis is nearer to New York than Frankfort is by its direct line, and is given rates for that reason;

II. That defendant receives a compensation for its haul from Indianapolis to Michigan City than it receives for its haul from Frankfort to South W, and consequently does not charge more for the haul;

III. That defendant does not, and cannot, control the fixing of rates crossing and intersecting lines, and has no option but to accept those rates which are fixed and prorate upon them; and cease to take grain altogether.

(a) These facts show no violation of the defendant of the long and short haul clause of the Act. Its own charge for the longer distance is not greater than for the shorter distance, because the Michigan Central charges less on its own line than does the New York, Chicago & St. Louis—defendant having no control of either.

(b) If it is desired to test the reasonableness of the through rate from Frankfort to New York, all the complainants are responsible for it should be maintained. It is not enough that the initial road defendant, which the road has authority to make the terms all.

(c) The conclusion is that the complaint is not sustained.

(Decided November 1, 1887.)

*Syllabus by COOLEY, Chairman.

COMPLAINT for violations of section 4 of the Interstate Commerce Act, in charging more for a short than for the long haul.

The complaint and answer are given on page 586, *ante*.

At the hearing before the Commission, at Chicago, on September 20, 1887, the following testimony was received:

William H. McDoel, having been duly sworn, was examined as follows, by **Mr. Friedley**, of counsel for defendant:

Q. Mr. McDoel, what position do you hold with the respondent railway company?

A. Traffic Manager.

Q. Were you occupying that position at the time this controversy arose with the complainants at Frankfort?

A. Yes sir.

Q. Will you state to the Commission what line is the shorter or more direct line from Indianapolis to New York for the purpose of making shipments of freights of the sixth class of the joint classification now in force?

A. I think it is based on the mileage of the Pennsylvania Company.

Q. Will you state now what is the line making the rate from Frankfort, Indiana, to New York?

A. The rates are made by the Lake Erie & Western. That is not the shortest route, but it is the route, I think, on which the rates are based.

Q. Is it, or is it not, the shortest practical route in operation?

A. I think it is.

Q. Will you state now, if you please, over what line the Lackawanna Fast Freight Line operates with you?

A. It leaves our line at South Wanaiah, running over the New York, Chicago & St. Louis Railway.

Q. Have you examined one of these maps?

A. Yes sir.

Q. Does the red line correctly represent the Lackawanna Line?

A. Yes sir.

Q. What does the blue line represent?

A. It represents the line upon which the fast freight line known as the "Blue Line" operates over the Michigan Central and connections.

Q. Mr. McDoel, taking into consideration the bulk and volume of your traffic between Indianapolis and Michigan City, state to the Commission if you are deprived of the east bound business heretofore procured by you at Indianapolis, how it would affect the operation of your road as to giving you full train loads between those points.

Mr. Suit: What is that?

Mr. Friedley: I asked him to state, taking into consideration the volume of the traffic between Indianapolis and Michigan City and intermediate points, how the operation of his line would be affected if he were deprived of the Indianapolis east bound traffic, with reference to whether he would have full train loads or not.

Mr. Suit: The Commission can see.

By the **Chairman:** Let him give the answer.

The **Witness:** We would be deprived of just that much business, and, as a rule, be compelled to haul the cars that are now loaded

with seaboard business, back over our line empty.

By **Mr. Friedley:**

Q. State why that is. If it is in connection with the lumber trade at Michigan City.

A. That is caused from the fact that we haul more load, as it now is, into Indianapolis than we haul out.

Q. Now, taking those facts into consideration, and the element of the reduction of the cost of train service on that line, state whether or not in your judgment, the traffic you procure at the twenty-three cent rate out of Indianapolis gives you any margin of profit?

A. Yes, it does undoubtedly.

Q. Mr. McDoel, what rule, if any, or custom, exists among the transportation companies operating in that section of the Union, as to the reception of traffic from a line on which it originates at less sums than the short line rate from the initial to the terminal point?

A. The connecting lines would decline to receive it, unless it was charged at the agreed rate from the initial point.

Q. When you speak of the agreed rate, how has that been determined, and what is it based upon? Upon the mileage of what line?

A. Chicago, for instance, is taken as a unit, and the short line mileage from the crossing is used as a basis. For instance, take Chicago at 100 per cent; Indianapolis is 93 per cent, either based on the actual mileage or as near that as may be, taking into consideration the surrounding circumstances. The short line mileage would be the lowest rate that would be received by our connections; it may be a trifle higher by agreement by all lines in interest.

Q. Have you, since your connection with this Railway Company, had any regular patrons in grain shipments to the seaboard points from Indianapolis?

A. Yes sir.

Q. Name some of your customers.

A. Well, William Scott & Company, Mack-mer Milling Company, and several others that I cannot recall now.

Q. Why do you make this twenty-three cent rate out of Indianapolis?

A. Because it was the rate established by the short line.

Q. What difference did that make to you? Did you make it for the purpose of securing the traffic of your former customers?

A. We could not secure any traffic unless we made the same rate made by all lines, naturally.

Mr. Friedley: Mr. Suit, it may be conceded that the map shows the various crossings?

Mr. Suit: That is described in your answer, is it?

Mr. Friedley: Yes sir.

Mr. Suit: That's all right. I suppose it is correct of course.

By **Mr. Friedley:**

Q. Mr. McDoel, will you examine the table of distances on the third page of the answer, and state whether it is correct, in substance, giving the relative distance between these junction points?

By the **Chairman:** Do you raise any question about that?

Mr. Suit: I raise no question about that.

Mr. Friedley: That's conceded then. Then the map is correct too?

Mr. Suit: Yes sir; that's correct.

By Mr. Suit:

Q. Mr. McDoel, will you be kind enough to state to the Commission what you mean by saying you would be obliged to haul your cars back empty any more over one route than over another?

A. I stated that we would have to bring more cars back empty if we did not take east bound business.

Q. Yes, sir. Now will you please explain to the Commission in what respect the shipment of a car load of grain from Frankfort over the Lackawanna route would differ from the shipment of a car load of grain from Indianapolis over the Lackawanna route, so far as compelling you to bring back empty cars? In other words, a car taken from Frankfort to New York over the Lackawanna would go precisely the same way that a car taken from Indianapolis over the Lackawanna, would it not?

A. Yes sir.

Q. And Frankfort is forty-seven miles nearer New York via that route than Indianapolis?

A. Yes sir.

Q. And this car did go over that route? Then this car was not shaded with blue, it was shaded with red?

A. It went over the Lackawanna Line.

Q. One other question, I believe, is all I care to ask and occupy the time of the Commission with. You speak something of the connecting line declining to receive cars from you unless they should be taken at an agreed rate. The rate you have agreed upon with these connecting lines, do you mean?

A. Yes sir.

Q. I will ask you to state to this Commission if the rate is not determined by the initial route, and the connecting lines simply get their percentage of what you have determined to ship this car for?

A. No sir.

Q. You may explain that to the gentlemen.

A. The initial road, for instance, could not name the rate except by agreement with its connections, and by agreement of the first line with its competitors at competing points.

Q. Then will you state whether or not, at the time this car was received from Mr. Allen at Frankfort, your road had any deal or arrangement with the Lake Erie & Western or Vandalia or the Terre Haute & Logansport Branch of it, by which you were not to take anything out of Frankfort at less than twenty-five cents?

A. Yes sir.

Q. You may state now whether any freight can be shipped over your road to New York without going through Frankfort?

A. Not from points between Indianapolis.

By Commissioner Walker:

Q. What percentage of the Chicago rate does Frankfort take?

A. Ninety-six per cent.

Q. Practically?

A. Yes sir. At the time this shipment was made it was twenty-five cents, or the same as Chicago.

Q. That was 100 per cent.

INTER 8.

A. Yes sir. It has been changed since and put back to ninety-six by all lines except the New Albany.

By the Chairman:

Q. Do you still maintain that?

A. We still maintain it.

By Mr. Suit:

Q. And was that change made since the institution of this proceeding?

A. Yes sir. I may explain that 96 per cent of the Chicago rate would be the lowest possible rate that could be made by any line out of Frankfort. If it was made less than that, our eastern connection would decline to receive the property. The rule is such, and there is an agreement to that effect, but lines at a competing point may, by agreement, make a higher rate than the percentage. For instance, we agreed, on account of contiguous territory and rates, that we would make it the same as Chicago at Frankfort, but I don't know what brought about this reduction back to ninety-six. It was not by agreement with all the lines; it was made, I think, by the Lake Erie & Western Road arbitrarily.

By Commissioner Walker:

Q. This shipment in question was made in a Blue Line car, was it not?

A. No sir.

Mr. Suit: We asked for it, but they shipped it over a different route.

Commissioner Walker: Your petition says it was shipped in a Blue Line car.

Mr. Suit: We have an understanding and agreement on that.

Mr. Friedley: I do not know as it makes any difference. I will rest my case with that showing.

By the Chairman: If you are through with the evidence, you can proceed with any questions.

Mr. Suit: I have made a *prima facie* case. I will waive anything I may have to say.

Messrs. Joseph C. Suit and Joseph Combs, for petitioners:

Section 8 of the Interstate Commerce Act prohibits common carriers from giving unreasonable preference or advantage to any person, firm or locality, or to any particular traffic. The petitioners insist that the conduct of the defendant is obnoxious to the above section. A tariff which gives shippers a shorter distance and higher rates, than it gives shippers for a greater distance over the same line of travel, is an undue preference and advantage within the meaning of this section. It prefers and gives an advantage to one person, firm or particular traffic, by which he, they or it are able to give a greater price for a like kind of commodity in a given locality, than other persons can give for the same article under similar conditions.

The giving of more favorable rates to persons engaged in shipping bran from Indianapolis, which comes within the sixth clause as classified by the said tariff rate, than are given to persons engaged in the same trade at Frankfort, is in effect to give the traffic at the former place an undue and unreasonable advantage over the latter. If the advantage is unreasonable "in any respect whatsoever" it is prohibited. It is unreasonable in so far as it gives shippers at Indianapolis an unreasonable ad-

vantage over shippers of the same class of goods at Frankfort. It is unreasonable in so far as it forces the agricultural interests of Frankfort to part with their products and property at a less value than do like interests at the City of Indianapolis. It is unreasonable in so far as it compels the country merchant to pay a greater rate for transportation, and the farmer to receive less value for his products and labor; all of which come within the inhibition of section 3 and are pronounced unlawful.

The fourth section in substance provides that it shall be unlawful for any common carrier to charge or receive a greater sum of money for transportation of goods for a shorter distance than is received for a longer distance of like kind of freight under similar circumstances, over the same line of railway. The evidence shows, and it is admitted, that Frankfort is forty-seven miles nearer New York over defendant's line of railway than Indianapolis, and that to reach New York, cars going from Indianapolis must necessarily pass through Frankfort. It is further admitted that respondent charges twenty-three cents per 100 pounds for carrying freight over said line from and to terminal points; and it was proven that such rate was denied by petitioners, and that said respondent demanded and received twenty-five cents per 100 pounds for transporting bran for petitioners from said City of Frankfort to said City of New York. The answer to this violation of section 4 is that as there are many lines of railways from Indianapolis engaged in the carrying trade to Atlantic ports, respondent is forced to meet the rates of said other carriers and give equal or better rates and facilities for transporting merchandise, or abandon the field of traffic to others. If respondent can carry such goods from Indianapolis to the seaboard at the rate above given, why should it be permitted to charge a carrying rate for such carriage on confessedly a shorter route and for a shorter distance, over the same line in the same direction? The practice sought to be justified by this argument must so reduce the earning capacity and power of a carrier, transporting merchandise to and from trade centers, that bankruptcy must follow; or if it may successfully compete with rival carriers, the tariff must be so increased at points of lesser non-competitive commercial importance, and on country shippers, that they may be able to continue in the carrying trade at all. Thus will trade centers become richer on the substance and labor of men less fortunately situated. Localities remote from trade centers are by such devices forced to pay for carrying products of more fortunate men to a healthful market—a state or condition which the Act in question did not intend should be permitted to follow or continue.

Dissimilarity is said to exist in the facts that Frankfort is north of Indianapolis; that connecting lines will not reduce their tariff, and will not receive respondent's cars at a smaller tariff rate, and respondent should not be compelled to carry freight from Indianapolis at the same tariff for which it is carried from Frankfort. The petitioners do not seek

to force the same rate from both points, but they do insist that Frankfort is entitled to as favorable a rate as Indianapolis, for a like kind of service, over the same route, in the same direction, and over a less number of miles.

Messrs. Haynes & Easley and Geo. W. Friedley, for defendant:

1. The fact of the direction in which the defendant's road leads from Indianapolis to Michigan City with reference to the Atlantic seaboard traffic, and that to raise the Indianapolis rate to the Frankfort rate would deprive Indianapolis of legitimate competition, and result in defendant getting no business from Indianapolis, in connection with the fact that if the Indianapolis rate was put in force at Frankfort the traffic would not be taken by defendant's connections, and if it were would inaugurate a war of rates disastrous alike to the defendant and the public, puts the defendant in the predicament of either doing the Indianapolis business at the short line rate or abandoning that traffic altogether. These facts justify the taking of Indianapolis traffic at a lower rate than the Frankfort traffic.

Re Louisville & Nashville R. R. Co. 1 Inters. Com. Rep. 279.

The views expressed by Judge Cooley are well sustained by the decision of *Mr. Commissioner Rogers* in the *Complaint of R. J. Richardson & Co. 1 N. Y. R. R. Comrs. Rep. 101, 105; Rand Lumber Co. v. C. B. & Q. R. R. Co. Comrs. Rep. Iowa, 550-553; Ex parte Koehler, 1 Inters. Com. Rep. 28, 817; S. C. 21 Am. & Eng. R. R. Cas. 53, 58; Greenhood, Public Policy, pp. 639, 640; Hadley, R. R. Transportation, pp. 116, 117. See Report of Simon Sterns, Senate Min. Doc. 66, pp. 18, 19.*

If the competition is legitimate and the discrimination between localities is made in good faith for the purposes of securing advantages to the carrier not otherwise attainable, it is permissible. But if the competition is illegitimate and made to meet cut or war rates, and not founded upon the ordinary laws of trade, the discrimination cannot be upheld.

Illinois Central R. R. Co. v. People, 10 West. Rep. 588.

2. It must be determined from the bill of lading, schedules, tariffs and map offered in evidence that the shipments from Indianapolis to New York by way of Michigan City and the Blue Line are not over the same line in the same direction as the shipments from Frankfort by way of South Waukegan over the Lackawanna Line.

The word "line" in the fourth section of the Commerce Act should receive the same construction as the word "route" in the Regulation of Railways Act, 1873, section II, subsection 5, and means a route of carriage "from the station on the sending line where the traffic arises to the station on the forwarding line where the traffic is delivered."

East & West R. v. Great Western Railway, 1 Ry. & Canal Traffic Cases, 844.

The expression "over the same line in the same direction," should be given substantially the same construction as the expression in the Railway Clauses Consolidation Act, 1845, section 90, "passing only over the same portion of the line of railway under the same circum-

stances," and held to mean passing between the same points of departure and arrival; passing over no other part of any other line.

Manchester, S. & L. R. Co. v. Denaby Main Colliery Co. L. R. 14 Q. B. Div. 223; *Finney v. Glasgow R. Co.* 2 Macq. 183; *Murray v. Glasgow etc. R. Co.* 11 Ct. Ses. Cas. (4th series) 205; *Commonwealth v. Worcester etc. R. R. Co.* 124 Mass. 561.

8. But if the line used from Indianapolis and the line used from Frankfort are held to be the same line, there being no evidence offered in the case to show the proportion of the defendant's part of the through rate, there is no evidence in the case from which it can be determined whether the defendant has charged a greater sum for the shorter haul. It must be held under the Commerce Act, and especially under that provision which provides that no common carrier party to a joint tariff shall be liable for the failure of any other common carrier to observe and adhere to the rates or charges made and published, that the respondent can only be liable for such part of the overcharge as was received by it.

Streeter v. Chicago etc. R. Co. 40 Wis. 294; *S. C.* 13 Am. & Eng. R. R. Cas. 439.

REPORT AND OPINION OF THE COMMISSION.

Cooley, Chairman:

The complaint in this case is that the defendant violates the fourth section of the Act to Regulate Commerce by charging more for the transportation of a like kind of property for a shorter than for a longer distance over the same line in the same direction, the shorter being included in the longer distance.

The facts as we find them to be on the evidence are the following: the defendant has a line of railroad extending in a direction west of north from New Albany to Chicago, with a branch line from Monon to Michigan City. The line is crossed at many points by roads which form lines to New York and other Atlantic seaboard cities. Among the points where there are such crossings are Indianapolis, Frankfort and South Wanatah, in the State of Indiana. The branch from Monon intersects the Michigan Central Railroad at Michigan City. Defendant's road is through a grain growing region, from which wheat and products of wheat are taken to the seaboard. The direct roads from the points on defendant's line to the Atlantic cities determine the rates that shall be charged for the transportation, and other roads that participate with them in the business accept the rates so fixed, apportioning it on some agreed basis.

The complainants are dealers in grain and grain products at Frankfort, and buy for the eastern market. The current rate from Frankfort to New York is twenty-five cents per 100 pounds. From Indianapolis to New York, the distance by direct lines being somewhat less, the rate is only twenty-three cents per 100 pounds. The management of the defendant is desirous of participating in the grain carrying trade, but to have any part in the east bound traffic it must carry at such rates that the whole charge to the seaboard over all the roads forming a line of transportation shall be the

current rate at the point at which the traffic is received. The roads crossing the defendant's road are willing to receive the traffic from it and divide the compensation by prorating on a mileage basis. Defendant has an arrangement with the Michigan Central Railroad Company whereby it receives grain at Indianapolis at the twenty-three cent rate and delivers it to the Michigan Central at Michigan City, prorating the compensation, and another with the New York, Chicago & St. Louis Railroad Company whereby it receives grain at Frankfort at the twenty-five cent rate and delivers it to the last named road at South Wanatah, prorating the compensation. The result is that the rate given by defendant to shippers at Indianapolis by the Michigan Central Line is less than the rate given at Frankfort by the other line, although the distance by the former line is greater.

This proceeding is instituted to compel reduction in the rate at Frankfort to the level of the Indianapolis rate. The complainants do not usually send grain by defendant's road, but they sent a consignment of grain product by it and paid the twenty-five cent rate under protest, with a view to this proceeding. It is not claimed that the direct line from Frankfort to New York violates the Law by charging the twenty-five cent rate; but it is supposed that if defendant is compelled to reduce its rate by the order of the Commission, the direct line will have no alternative and must make the like reduction. In fact since this proceeding was begun, a reduction to twenty-four cents has been made.

The distance from Indianapolis to New York by the shortest railroad line is 825 miles. From Frankfort the shortest railroad route is 846 miles. From Indianapolis to Michigan City is 154 miles, and from Indianapolis to New York, by way of Michigan City and the Michigan Central Railroad, is 1,055 miles. From Frankfort to South Wanatah is eighty-four miles; and from Frankfort to New York, by way of South Wanatah and the New York, Chicago & St. Louis Railroad, is 1,008 miles. These figures give a basis for such calculations as are necessary to an understanding of the legal propositions.

On the hearing the general question was discussed, whether the transportation of grain to the seaboard through the agency of the defendant is under circumstances and conditions so different at Frankfort from what they are at Indianapolis as to justify the greater charge on the shorter haul. For the defendant it was contended that they were—Indianapolis being not only a point of greater railroad concentration and competition, but also nearer New York by the direct lines and therefore justly entitled to the lower rates; while for the complainants it was insisted that business over the line of the defendant is alone in question, and by that line Frankfort, being nearer the points of freight destination, is entitled by the Law to rates not higher than those accepted by the defendant at Indianapolis.

On the facts found, however, it is very evident that the general question the complainants have desired to present does not arise. The defendant transports grain from Indianapolis to Michigan City, but no further, and receives

INTER S.

for the transportation a proportion of twenty-three cents per 100 pounds, measured by the distance it carries it, 154 miles, as compared with the whole distance, 1,055 miles. It also transports grain from Frankfort to South Wanatah, and receives for the transportation a proportion of twenty-five cents per 100 pounds measured by the distance it carries it, eighty-four miles, as compared to the whole distance, 1,008 miles. An arithmetical calculation will readily show that while defendant receives somewhat more per mile upon the grain taken up at Frankfort, it receives more in the aggregate for that which it carries from Indianapolis to Michigan City than for that it carries from Frankfort to South Wanatah, and therefore does not violate the statute which prohibits receiving more for the shorter than for the longer haul. If the calculation were made on the Indianapolis shipment for the distance between that place and South Wanatah only, the fact would still be that more is received upon that than upon a like consignment from Frankfort; the distance being forty-eight miles greater. Since, therefore, the distance between Frankfort and South Wanatah is all that is included in the longer line, it is plain that on no calculation is it made to appear that the defendant receives more for the transportation of a like kind of property over the same line in the same direction, the shorter being included within the longer distance; and this without regard to the question raised on the argument, whether the line from Indianapolis by way of Michigan City to New York on which the twenty-three cent rate is charged is or is not in a legal sense the same line as that from Frankfort by way of South Wanatah to New York on which the twenty-five cent rate is charged. We say nothing upon that question because the case does not call for its consideration, and also because only one of the several parties interested in the question has been brought in as defendant and given the opportunity for a hearing.

But it is argued for the complainants that defendant unites with the other carriers in making the through rate, and is therefore responsible for the whole as much as if the whole was for a transportation over its own line. On this point we are necessarily governed by the evidence, and the evidence is distinct and positive that while the defendant names the through rate to shippers when it is called for, the rate from the intersecting points is not controlled by defendant, but is fixed by the crossing roads. The Michigan Central Railroad, it appears, will accept Indianapolis grain from defendant at Michigan City and prorate the twenty-three cent charge, on a mileage basis, and the New York, Chicago & St. Louis Railroad will accept Frankfort grain from defendant at South Wanatah and prorate at twenty-five cent charge on a mileage basis. If defendant consents to receive the proportions from the two roads, respectively, it can name a through rate to shippers when they ask for it; but in doing so it does not make the through rate any more than it would if it named its own proportion and that of the other roads in figures separately, and then received, as it now does, the whole; for in receiving what goes to the other road, it receives it as agent merely.

The charge from Frankfort to New York by the defendant's line is greater than the charge from Indianapolis, not because the defendant exacts more for its own service—for the contrary is the fact—but because the Michigan Central Railroad carries from Michigan City at a lower compensation than the New York, Chicago & St. Louis Railroad charges for the transportation from South Wanatah.

There are cases in which a carrier may be bound for some purposes by the rates established over connecting lines, even though it has not directly united with such connecting lines in making them. Such a case was before the Commission in the *Vermont State Grange v. Boston & Lowell R. R. Co.* ante, 500, in which one of the defendants shared long haul rates which were lower than the short haul rates which it charged on its own road constituting a part of the long haul line. The legality of the short haul rates was all that was in controversy in that case; and the Commission held that the carrier exclusively responsible for them was not entitled when fixing them to make them greater than the long haul rates in which it participated with others, unless a case was made out of dissimilar circumstances and conditions. Participating in the long haul rates, it was held, made them under the statute a maximum limit for short haul rates to be imposed on its own line, and made the short haul rates illegal when the limit was exceeded. But in that case there was no question of responsibility for the rates which were found to be illegal, nor could there have been, for they were made at pleasure by the local road. In this case the rates which defendant makes exclusively are not complained of; and as no one can be convicted of illegality in respect to action of others which he could not control, it obviously becomes necessary, before defendant can be charged in this proceeding, to show that at least it had the power to make the through rates different. But all the showing made is to the contrary.

The conclusion is that a violation of law by the defendant in the particular charged is not made out.

A further difficulty with complainants' case is that its purpose is to compel a change of the through rate from Frankfort to New York. But when it is shown that defendant, instead of controlling the whole line to the seaboard on which freight is transported from Frankfort, controls only the small fragment thereof from Frankfort to South Wanatah, it then becomes impossible, on any view that may be taken of the law of the case, to give, in a proceeding to which the defendant is alone made a party, the relief which the complainants seek. An order requiring defendant to cease charging more on the Frankfort than on Indianapolis shipments to the seaboard would be quite futile. It could not be enforced against any carriers which are not parties to the proceeding, and the defendant would not violate it if, when called upon to give the rates, it gave those on its own line only. If in giving its own rates it did not antagonize the long and short clause of the statute, it would be guilty of no violation of law under the fourth section, which is the section on which this complaint proceeds.

iness men, some insurance agents, some settlers, are all in fact transported under precisely the same "circumstances and conditions" until they respectively leave the car, whatever may be their calling or their intention as to future residence. It is not claimed that the rates in question are forced upon the defendant by competition, or by any external conditions whatever. They are made or refused at defendant's pleasure! The circumstances and conditions referred to by defendant's counsel do not pertain to the transportation of the passengers, but are connected with their varying pecuniary ability and their possible future home. These considerations are not proper to be admitted in considering the propriety of discrimination between passengers who are patrons of common carriers.

Moreover "settlers," so-called, are not confined to the great Northwest, but are found throughout the entire United States; upon almost every passenger train a constant movement of population is going on between the States, which if once recognized as forming a ground for a discrimination in railroad charges, would make an opening extremely difficult to regulate. Professional and business men are frequently "settlers" in fact. Travelers coming through from eastern points, who have purchased tickets to their ultimate destination, may not be informed of the opportunity to obtain a special rate at the St. Paul land office; the same train may, and no doubt often does contain "settlers," some of whom are charged much more than others. And again it is quite possible for the defendant to be imposed upon by persons who claim to be explorers or settlers, when in fact their actual intention is very different. These considerations illustrate the practical impossibility as well as the inevitable unfairness of attempts to discriminate among passengers enjoying the same accommodations, by reason of any special classification founded upon means, occupation, or purpose.

It will be very difficult to find any principle upon which the transportation of passengers in our country can be impartially and fairly carried on short of maintaining the rule of absolute equality of payment from all persons enjoying the same accommodations.

The defendant must, therefore, be notified to immediately cease and desist from selling either of said special classes of tickets at lower rates than those established by it for the sale of tickets to the public generally.

David F. ALLEN and Edward A. ALLEN
v.

LOUISVILLE, NEW ALBANY & CHICAGO R. CO.

(No. 44.)

"In this case the complaint is that the defendant violates the fourth section of the Interstate Commerce Law by charging more for a shorter than for a longer distance over the same line in the same direction. The facts are that defendant has a line of railroad extending from New Albany, Indiana, to Mich-

igan City, passing through Indianapolis and Frankfort. At Indianapolis the road is crossed by east and west lines which give a rate on wheat to New York of twenty-three cents a hundred pounds. At Frankfort it is crossed by another road which makes a rate to New York of twenty-five cents. At South Wanatah defendant's road is crossed by the New York, Chicago & St. Louis; and at Michigan City it intersects the Michigan Central. Defendant wishes to participate in the grain carrying trade to New York; and the Michigan Central will receive from it at Michigan City grain taken up at Indianapolis, and prorate with it the twenty-three cent rate on a mileage basis. The New York, Chicago & St. Louis will receive from it at South Wanatah the grain taken up at Frankfort and prorate with it the twenty-five cent rate on a mileage basis. Defendant has been in the practice of taking wheat at Indianapolis on these terms; and it received a car load from complainants at Frankfort and charged the twenty-five cent rate. The Indianapolis shipments are carried through Frankfort on their way to Michigan City, and the whole distance from Indianapolis to New York by Michigan City is greater than from Frankfort to New York by South Wanatah. It appeared by the evidence, however, I. That by the direct line Indianapolis is nearer to New York than Frankfort is by its direct line, and is given lower rates for that reason;

II. That defendant receives a greater compensation for its haul from Indianapolis to Michigan City than it does for its haul from Frankfort to South Wanatah, and consequently does not on its own line charge more for the shorter haul;

III. That defendant does not, and cannot, control the fixing of rates by the crossing and intersecting lines, and has no option but to accept those rates which are fixed and prorate upon them, or to cease to take grain altogether. *Held,*

(a) These facts show no violation by defendant of the long and short haul clause of the Act. Its own charges are the greater for the longer distance; and if the whole charge to New York is the greater for the shorter distance, it is only because the Michigan Central charges less on its own line than does the New York, Chicago & St. Louis—defendant having no control of either.

(b) If it is desired to test the reasonableness of the through rate from Frankfort to New York, all the roads responsible for it should be made defendants. It is not enough to make the initial road defendant, unless that road has authority to make the rate for them all.

(c) The conclusion is that the complaint is not sustained.

*Syllabus by COOLEY, Chairman.

INTER 8.

(Decided November 1, 1887.)

now 12½ cents, is unreasonable, is afforded by comparison of this and other rates on the branch line with the Red Wing, Lake City and other rates on the River Division of the main line, the Commission declined to declare 12½ cents an unreasonable charge for the services rendered, or that a rate nearly a third lower than it had ever been previous to the Act to Regulate Commerce is unjust and unlawful of itself, or within the meaning of the first section of the said Act.

2. But rates and charges not unreasonably high of themselves, can be so adjusted in their relations to each other as to give the undue preference and produce the unreasonable disadvantage which the third section of the Act to Regulate Commerce makes unlawful, and if the railway company in establishing its charges on the different divisions and branches of its road, so adjusts them as to divert trade and business to one locality, which naturally under an equitable adjustment of charges would go to another, such unreasonable preference for one place and disadvantage to another, are not excused or made lawful by the fact that some of such rates are not entirely voluntary, but the result of competition with other carriers. If an advantage is given to competing towns on the main line, the advantage must not be unreasonable. The difference in the rates at Mazeppa, compared with the rates at Red Wing and Lake City, should neither exceed 2 1-2 cents on 100 pounds, nor one third part of the rates made in the adjustment of charges from said competing towns.

(Decided Nov. 21, 1887.)

COMPLAINT charging that the discriminations made by the defendant against the locality of Mazeppa are unjust and sufficient to divert largely its grain business.

The pleadings are reported *ante*, p. 474.

The facts are stated in the opinion.

Mr. Burton Hansom, for defendant.

REPORT AND OPINION OF COMMISSION.

Morrison, Commissioner :

It appears from the statement of E. B. Raymond, by way of complaint against the Chicago, Milwaukee & St. Paul Railway Company, that he is a resident of the Town of Mazeppa, County of Wabasha, State of Minnesota, and interested there in buying and selling wheat and other farm products for shipment over the defendant's road to more eastern markets.

The defendant railway company owns and operates two lines of railroad through from Chicago, Illinois, by way of Milwaukee, Wisconsin, to Minneapolis, Minnesota, with branch lines or roads to and from various points on each of said through lines. Both through lines run over the same track from Chicago to Milwaukee. The through and the branch roads are divided into parts designated divisions.

By the most direct of said through lines of

defendant's road, herein treated as the main line, the distance from Chicago to Minneapolis is 420 miles. The part of this main line between La Crosse and Minneapolis, with stations at Wabasha, Lake City, and Red Wing, is the "River Division."

The branch line of defendant's road, sixty miles long from Wabasha on the main line to Zumbrota, with stations at Mazeppa and McCracken, is narrow gauge and is the "Wabasha Division."

From Wabasha, the junction of the "narrow gauge" branch with the main line, the distance over the main line northwest to Lake City is twelve miles, and to Red Wing twenty-nine miles. Over the branch line the distance west (from Wabasha) to McCracken is eighteen and to Mazeppa fifty-two miles. The distance north from Mazeppa to Red Wing by wagon road is twenty-two miles and nearly the same to Lake City, and both are competitors with Mazeppa for the grain and other trade of the territory intervening. The distance to Chicago from Mazeppa is 392, from Red Wing 369, from Lake City 352 miles. To Milwaukee the distance is less than to Chicago by 107 miles.

From August 15, 1886, to April 5, 1887, when the Act to Regulate Commerce took effect, the published rate of defendant for carrying wheat and other grain to Chicago from Lake City, Red Wing, Minneapolis, and other points on the River Division of defendant's road was fifteen cents; on the Wabasha Division it was fifteen cents from McCracken, and from Mazeppa seventeen cents on the 100 pounds. On April 5, 1887, this rate from Mazeppa to Chicago was increased to eighteen cents, the rate from Minneapolis, Red Wing, and Lake City remaining at fifteen cents until May 18, 1887, when it was reduced to ten cents, the rate from McCracken then still remaining at fifteen cents per 100 pounds.

On this statement of facts, which is not contested by defendant, the complainant alleged that the discriminations made by the defendant against the locality of Mazeppa were unjust and sufficient to divert largely its grain business; that the excess of eight cents in the Mazeppa rates over Lake City and Red Wing rates was, and any difference or excess in such rates above two cents, would be an undue preference in favor of Lake City and Red Wing, and an unreasonable prejudice against Mazeppa in respect of the grain and other trade in which complainant was and is interested.

On the 20th of May, 1887, when the defendant railway company had notice of complainant's petition for relief, the defendant reduced its rates to Chicago from Lake City, Red Wing, and stations on the River Division of its road, including Minneapolis, to 7½ cents. Six days later, May 26, 1887, it made a reduction in rates on the Wabasha Division, the rates from Mazeppa to 12½ cents and from McCracken, distance eighteen miles from the main line, to eight cents per 100 pounds.

The defendant railway company, answering, admits many and contests none of the facts stated above, but asserts that the Mazeppa rates are, and have been since April 5, 1887,

When complainants desire to test the justice or legality of the through rates from Frankfort to New York, the necessity of bringing in the parties who make the rates, not for forty-six miles merely but for the whole distance, is obvious. They must be brought in, *first*, because they have a right to be heard, and *second*, because an order made and purporting to control their action when they were not parties would be improper on its face, and in a legal sense ineffectual. If such an order could have any effect as against the initial road, it would only be to prevent its agents naming to shippers when they called for it an aggregate through rate; it would not prevent its making the same rate as now to South Wanatah, nor preclude the connecting road from making rates independently from South Wanatah eastward.

On this finding an order will be entered that the complaint is not sustained.

NOTE.

According to the evidence the compensation of defendant for transporting one ton of grain from Indianapolis to Michigan City in connection with the Michigan Central is - 67.0 x
Proportion to South Wanatah - 53.6 x
Compensation per ton from Frankfort to South Wanatah in connection with the N. Y. Chicago & St. Louis - 41.6 x

Leverett LEONARD

v.

UNION PACIFIC R. CO.

(No. 10.)

1. Where the pleadings present **issues of fact** which cannot be disposed of by a decision which shall reach the merits without some evidence, and **no evidence is presented**, the case must be **dismissed**.
2. The complaint charged **unjust discrimination** in exacting an **extra rate** for transporting cattle in a **Burton stock car**; the answer denied the fact of unjust discrimination, and **no proof** was given by either side. *Held*, that it is impossible for the Commission to say that if all the facts were before it, the greater charge could not be justified; and hence, as it is not suggested that further proceedings are desired, the **case must stand dismissed**, but without prejudice.

(Dismissed October 18, 1887.)

COMPLAINT charging the exaction of an unreasonable and discriminating rate for the transportation of cattle in a Burton stock car.

The case having been assigned for hearing on October 18, 1887, it then came before the Commission on the complaint and answer, which are given at page 472, *ante*, no proof being offered by either side.

Mr. M. J. Foote, for complainant.

Messrs. J. S. Blair and Shellabarger & Wilson, for defendant.

INTER S.

By the *Commission*:

The pleadings in this case present clear issues of fact. It is impossible to dispose of these issues by a decision which shall reach the merits without some evidence upon which to base it. We cannot assume that the higher rates charged for transporting the Burton cars constitute unjust discrimination when the fact is denied in the pleadings, and is not proved.

Whatever doubts we may have on the subject in the absence of proofs, it is impossible for us to say that if all the facts were before us the greater charge could not be justified. In the case brought by the Burton Stock Car Company against the Chicago, Burlington and Quincy Railroad Company and others, and heretofore heard by us, considerable evidence was put in by the defendants in justification of the greater charge; and while we could not say it was entirely convincing, neither on the other hand could we say that unjust discrimination was fairly made out. The case was therefore retained for further proceedings in case the parties should see fit to take them. In this case, however, no evidence whatever is presented; and as it is not suggested that further proceedings are desired, *the case must stand dismissed, but without prejudice.*

E. B. RAYMOND

v.

CHICAGO, MILWAUKEE & ST. PAUL RAILWAY CO.

(No. 20.)

1. Where from Wabasha, the junction of the "narrow gauge" branch with the main line of defendant's railway, the distance over the main line northwest to Lake City is twelve miles, and to Red Wing twenty-nine miles, and over the branch line the distance west from Wabasha to McCracken is eighteen and to Mazeppa fifty-two miles, and the distance north from Mazeppa to Red Wing by wagon road is twenty-two miles, and nearly the same to Lake City, and both are competitors with Mazeppa for the grain and other trade with the territory intervening; the distance from Chicago to Mazeppa being 392, from Red Wing 369, from Lake City 352 miles, and to Milwaukee the distance is less than to Chicago by 107 miles and the complainant alleged that the discriminations made by the defendant against the locality of Mazeppa were unjust and sufficient to divert largely its grain business; that the excess charged of eight cents in the Mazeppa rates over Lake City and Red Wing rates was and, any difference or excess in such rates above two cents, would be an undue preference in favor of Lake City and Red Wing and an unreasonable prejudice against Mazeppa in respect of the grain and other trade in which complainant was and is interested, and the only evidence in support of complainant's statement that the Mazeppa rate,

charge more "for a shorter than for a longer distance over the same line in the same direction, the shorter being included within the longer distance." The longer distance from Minneapolis to Chicago over the main line is 420 miles. It would seem to require some extension to include the shorter distance from Mazeppa to Chicago, fifty-two miles of which is on the narrow gauge branch line; and any experiment in running the same cars over all of the alleged same line of said Railway Company would most likely upset the cars, if not the argument of counsel.

These questions, first raised in the argument, are not presented in the complaint or answer. They are not before us for adjudication and no opinion is expressed as to them.

It is therefore ordered by the Commission that the Chicago, Milwaukee & St. Paul Railway Company so readjust its rates and charges to Milwaukee and Chicago from Mazeppa, on the Wabasha Division, and Lake City and Red Wing, on the River Division of its road, that the difference in favor of the points named on the River Division shall neither exceed $2\frac{1}{2}$ cents nor one third part of its own rates; and while the rates and charges on flour, grain, and other like products are $7\frac{1}{2}$ cents on the 100 pounds from Lake City and Red Wing to Milwaukee and Chicago the rates from Mazeppa to Milwaukee and Chicago shall not exceed ten cents on the 100 pounds on the like kind of property.

MANUFACTURERS & JOBBERS UNION OF MANKATO, *Petitioner,*

v.

MINNEAPOLIS & ST. LOUIS RAILWAY CO. *et al.*

(No. 76.)

Where, after the examination of witnesses and documentary evidence upon a petition to require the respondent to so adjust its tariffs on freights from the City of Chicago, that its rate to the City of Mankato, Minnesota, and to all other points west of Waterville and between Waterville and Mankato, on its line of railroad on all classes of freight, shall hereafter be no higher than the rates established by said Company from the City of Chicago to said Village of Waterville and points east on said line of railroad between Waterville and the City of Red Wing and points north on said main line, between Waterville and the City of Minneapolis, and after submissions upon the petition, answer and evidence and full consideration of the matters involved, but before the announcement of the report and opinion, the respondent railroad company conceded the relief sought and made, and published a tariff of rates in accordance with the prayer of the petition, the Commission only deemed it necessary to make the report to complete the record of the case.

(Report filed Nov. 21, 1887.)

COMPLAINT charging violation of section 4 of the Act, in making unjust discriminations and unlawful preferences in tariff of rates.

The facts are stated in the opinion.

See also *ante*, 483.

REPORT OF THE INTERSTATE COMMERCE COMMISSION.

Bragg, Commissioner :

The complaint in this proceeding was made by the Manufacturers & Jobbers Union of Mankato, in the State of Minnesota, against the Minneapolis & St. Louis Railway Company, the Chicago, Rock Island & Pacific Railroad Company, the Burlington, Cedar Rapids & Northern Railway Company, and the Kankakee & Seneca Railroad Company. It alleges that the Minneapolis & St. Louis Railway Company is a corporation created, organized, and existing under the laws of the State of Minnesota, and as a railroad company was, at the time of the filing of the petition and for more than two years last past had been, doing business as a common carrier in the State of Minnesota and elsewhere. It avers that petitioner is an association of business men of the City of Mankato, in Minnesota, whose object is to promote the business interests of that city. It states that the Minneapolis & St. Louis Railway Company, in connection with the Chicago, Rock Island & Pacific Railroad Company, the Kankakee & Seneca Railroad Company, and the Burlington, Cedar Rapids & Northern Railway Company, have established traffic arrangements for the transportation of passengers and freights for hire from the City of Chicago, in the State of Illinois, to the various stations on the line of the Minneapolis & St. Louis Railway, in the State of Minnesota, including the City of Red Wing, the City of Minneapolis, the Village of Waterville, and the City of Mankato, in said last named State. It states that the direct line of the Minneapolis & St. Louis Railway Company, operated within the State of Minnesota for such traffic, extends from Albert Lea northerly through Waterville to Minneapolis. It states that the Wisconsin, Minnesota & Pacific Railway is controlled and operated by the Minneapolis & St. Louis Railway Company under the said traffic arrangement, and extends from the City of Red Wing westward through said Village of Waterville to the City of Mankato, running in a general direction at right angles with said railroad, extending from Albert Lea to Minneapolis, as aforesaid. It states that the rates of freight established and published and at the date of the filing of the petition enforced by the Minneapolis & St. Louis Railway under said traffic arrangement from Chicago to Minneapolis were as follows per 100 pounds:

Class.	-	-	-	1	2	3	4	5	A	B	C	D	E
Rate in cents.	50	40	30	20	12½	17½	15	13	10	8			

It states that the rates of freight established by the Minneapolis & St. Louis Railway Company from Chicago to Waterville were the same as were established by that Company from Chicago to Minneapolis by reason of the operation of section 4 of the Interstate Commerce Law, the distance from Chicago to

reasonable and just, and avers that the lower rate, 7½ cents, on the River Division is "exceedingly low and unprofitable," is not voluntary, but the result of competition, and only indirectly affects the rates at Mazeppa.

This answer of the defendant was supported by the testimony of witnesses tending to show that the Mazeppa rates of 12½ cents are reasonable within themselves and without relation to the 7½ cent rates on the main line, and that by reason of competition defendant was and is compelled to accept the latter rates to get any share of the main line grain traffic.

This testimony, intelligent in theory, is based in part on comparison of these rates with rates for like distances in the States of Iowa and Illinois under state regulation, with no explanation of surrounding circumstances, and partly on the estimate of the cost of the service dependent upon conditions so numerous and variable as not to be convincing.

The only evidence before us in support of complainant's statement that the Mazeppa rate, now 12½ cents, is unreasonable, is afforded by comparison of this and other rates on the branch line with the Red Wing, Lake City, and other rates on the River Division of the main line. It already appears that the rate complained of, now 12½ cents, was eighteen cents when the complaint was made. Before the Act to Regulate Commerce was passed it had been as high as thirty and never lower than seventeen cents. We do not feel authorized to declare 12½ cents an unreasonable charge for the service rendered, or that a rate nearly a third lower than it had ever been previous to the Act to Regulate Commerce, is unjust and unlawful of itself, or within the meaning of the first section of said Act.

The averment of defendant's answer that 7½ cents, the River Division grain rates, were and are exceedingly low and unprofitable, is qualified by the statement of the defendant's general manager that low as they are they yield something more than the cost of moving the grain. So qualified, the averment means only that if all freight was carried over defendant's road at rates no more profitable the earnings might not equal the cost of the service, including a reasonable return on the capital invested. Thus qualified, the averment is not without support in the facts presented.

The surplus products of northwestern grain fields go largely to Eastern States for consumption or for export. Conceding that it may be true, as claimed by defendant's answer, that to share in the grain traffic from Minneapolis it must accept rates made by its competitors, and assuming that under the fourth section of the Act to Regulate Commerce the rates for the shorter distance from Lake City and Red Wing cannot be greater than the Minneapolis rate, and it can yet be true that these rates give an undue preference to these places as against Mazeppa in the grain and other "produce" trade.

Rates and charges, not unreasonably high of themselves, can be so adjusted in their relations to each other as to give the undue preference and produce the unreasonable disadvantage which the third section of the Act to Regulate Commerce makes unlawful; and if

the defendant railway company in establishing its charges on the different divisions and branches of its road so adjusts them as to divert trade and business to one locality, which naturally, under an equitable adjustment of charges, would go to another, such unreasonable preference for one place and disadvantage to another are not excused or made lawful by the fact that some of such rates are not entirely voluntary, but the result of competition with other carriers.

The complaint does not insist that no advantage shall be given to competing towns on the main line, but that the advantage shall not be unreasonable, and so the Law provides.

It is said in behalf of the defendant that the Wabasha Division being a narrow gauge road, the volume of traffic small and requiring transfer to the main line at Wabasha, five cents is not an unreasonable charge for the additional service resulting from these conditions. This reasoning loses some of its force in connection with the fact that the rate from McCracken, on the Wabasha Division, is but eight cents per 100 pounds, or one half cent above the main line rate, for the haul to and transfer at Wabasha.

The traffic over the road being small its cost of movement is not believed to be greater than if the road were of the standard gauge.

The difference now complained of in the rates at Mazeppa compared with the rates at Red Wing and Lake City is five cents per 100 pounds, a difference equal to two thirds of the rate of the last named two places.

For eight months next before the Act to Regulate Commerce was in force this difference was but two cents, or less than one seventh of the then rates from Lake City and Red Wing.

Any difference in the rates named so large as that now existing, five cents, cannot fail to so divert a part of the grain trade as to subject Mazeppa to unreasonable disadvantage and give undue preference to Red Wing and Lake City, its rivals in that business. This difference should neither exceed 2½ cents on the 100 pounds nor one third part of the rates made in the adjustment of charges from said competing towns. Such a difference or discrimination in the rate will compensate the defendant railway company for any additional cost of transportation from Mazeppa over the cost from the competing towns.

The complaint asks the Commission to cause to be refunded to shippers from Mazeppa over defendant's road any charges in excess of reasonable charges paid by them since the Act to Regulate Commerce took effect. The amount claimed to have been so paid and the names of the persons paying the same are not stated, nor is there evidence before us to authorize consideration of the subject.

In the argument, both parties debated, in connection with or as part of this proceeding, the system of transportation known as "milling in transit;" also the fourth section or long and short haul clause of the Act to Regulate Commerce. Under the milling in transit system grain billed through is stopped on the way, ground into and forwarded as flour, and the two shipments treated as one. The fourth section of said Act declares it unlawful to

law, would involve a readjustment so general that other interests and localities are entitled to be first heard and their respective claims considered.

3. Where relief granted in the form desired by petitioners might be understood as deciding that the circumstances prevailing in the district about Opelika are such as to justify making that town an exception under the fourth section of the Act to Regulate Commerce, as against the local stations about it, the Commission declined to enter such an order, because the question of the exceptional circumstances and conditions authorizing such an order was not presented by the petition or proofs, and the points that would be injuriously affected by such an order are not before the Commission, and have had no opportunity to be heard. Permission was granted to amend the petition so as to set out the facts on which complainants claim for themselves lower rates than are given to towns nearer Atlanta, Montgomery and Columbus. If such an amendment is made, notice will be given to the localities to be affected and a further hearing granted. If the general subject of freight rates from points in other States to the various points on the line of defendant's roads, including Opelika, is to be brought before the Commission, the petition may be so amended as to distinctly so state, that towns interested may be advised of the relief sought affecting their interests, but if complainants shall see fit to ask for a strict enforcement of the long and short haul clause as against Columbus and Montgomery, or either, an amendment of the petition must be made, and the towns now favored with the lower charges on the shorter hauls, given an opportunity for a hearing.

4. Where the rate from Opelika to Savannah via Columbus & Georgia Central is fifty-two cents per 100, while the rate to the same point by the same system from both Montgomery and Columbus is but forty-five cents, and Opelika can obtain no other rate to New Orleans at all on cotton, although it has good and ample facilities for the handling of cotton, and the rate on cotton from Montgomery to New Orleans is forty-five cents per 100, and the local rate charged Opelika, on cotton, to Montgomery is twenty-seven cents, making seventy-two cents to New Orleans, thus cutting off that market, leaving Savannah as the only outlet—an order was made requiring defendants to cease and desist from such denial, the Commission finding from the evidence that through rates and through bills of lading on cotton offered for shipment at Opelika for New Orleans are unjustly and unreasonably refused by the defendant, the Western Railway of Alabama, while given by said road on other com-

modities, and at other points similarly situated, and while said defendant's connecting lines making the route to New Orleans are ready and willing to unite therein, and finding also, that Opelika is by such action of the defendant subjected to undue and unreasonable prejudice and disadvantage in violation of the provisions of the third section of the Act to Regulate Commerce. It is no defense against the issuing of such an order that some undisclosed connection of the defendant once made an offer of rebates to the merchants of Opelika for the purpose of getting the business away from what the defendant considered, its "ordinary and proper channel to New Orleans," it not being averred that the lines to New Orleans will not now unite in making the usual through rates and no reason whatever being stated why through rates and through bills of lading on cotton are not given over the line which forms the aforesaid "ordinary and proper channel."

(Decided December 3, 1887.)

COMPLAINT charging discrimination in freight rates against Opelika and in favor of Montgomery and Columbus, and that the Western Railway of Alabama refuses a through rate and through bills of lading from Opelika to New Orleans on cotton. *Relief denied in the matter of discrimination until the complaint is amended, and granted as to the through rate and through bills of lading.*

The facts are stated in the opinion of the Commissioner.

Plaintiffs appeared in person.

No appearance for defendant on the final hearing.

REPORT AND OPINION OF THE COMMISSION.

Walker, Commissioner:

Complaint under section 8 of the Act to Regulate Commerce for alleged unjust discrimination against Opelika in favor of Montgomery, Alabama, and Columbus, Georgia.

Answers were filed by both defendants. The answer of the Western Railway of Alabama, by Cecil Gabbett, general manager, is quite full, in substance alleging that rates at Opelika are the result of considerable negotiation and compromise, and although less favorable than at Montgomery and Columbus are more favorable than at Cusseta, Youngsboro', Gold Hill, and other points in the immediate vicinity of Opelika, claiming "that there is more ground for complaint against the railroads for discriminating in favor of Opelika against Auburn, Cusseta, Youngsboro', and Gold Hill than there is for Opelika to complain of discrimination in favor of Montgomery and Columbus. The circumstances and conditions which cause the difference in the rates between Opelika and the Cities of Montgomery and Columbus are more potent and forcible than any that could be shown in favor of Opelika as against its neighboring towns."

The answer of the Columbus & Western

Waterville being sixty-five miles less than from Chicago to Minneapolis.

It states that the Minneapolis & St. Louis Railway Company has established and put in force a tariff on its line from Red Wing to Mankato, the rates of which from Chicago, through Waterville, to all points east of Waterville on said line, for the distance of sixty-seven miles to the City of Red Wing, were the same as established by said Company to Waterville, while to all points on said line west of Waterville, including the City of Mankato, a distance of twenty-nine miles, were unreasonably and unjustly in excess of said rates to said Village of Waterville, and from Chicago were as follows per 100 pounds:

Class.	-	-	1	2	3	4	5	A	B	C	D	E
Rate in cents.	60	50	35	25	17½	22½	18	16	13	10		

It states that said rates from Chicago to points west of Waterville on said line, including said City of Mankato, were from 20 to 40 per cent in excess of the rates established and in force by said Minneapolis & St. Louis Railway Company from Chicago to said Village of Waterville and points on said line east of Waterville to the City of Red Wing, although the distance is much less, and the City of Mankato is the most important shipping point on said line of railroad in the State of Minnesota, excepting St. Paul and Minneapolis.

The prayer of the petition is that the Minneapolis & St. Louis Railway Company shall be directed and required to so adjust its said tariffs on freights from the City of Chicago, in the State of Illinois, that its rates to the City of Mankato, in the State of Minnesota, and to all other points west of Waterville and between Waterville and Mankato, on said line of railroad, on all classes of freight, shall hereafter be no higher than the rates established by said Company from the City of Chicago to said Village of Waterville and points east on said line of railroad between Waterville and the City of Red Wing and points north on said main line between Waterville and the City of Minneapolis.

At the hearing, which occurred in St. Paul, Minnesota, it was admitted by the defendants that the above facts, as set forth in the petition, were, in substance; true, but, while admitting this, the defendants did not admit that petitioner was entitled to the relief sought. On the contrary, they denied that petitioner was entitled to any relief whatever. They relied in their defense upon two grounds: *first*, that each of these rates were fair and reasonable in themselves; *second*, that these rates between Waterville and Red Wing were caused by the competition of the water lines of Lake Superior, in connection with rail lines operating from the lake points into the interior. And upon these grounds they insisted that in no sense was there any unjust discrimination or unlawful preference in any of these rates.

Several witnesses were examined before us by the respective parties at the hearing, and documentary evidence was also submitted on behalf of the petitioner. The matter was then submitted for our report and opinion. At a subsequent day, after we had fully considered the matters involved, but before the announcement of our report and opinion, we

INTER 8.

received notice that the respondent railway company had conceded the relief sought, and on the 20th day of October, 1887, had made and published a tariff of rates to take effect October 28, 1887, by which the rates are reduced and made the same at Mankato and points between Waterville and Mankato that the rates are at Waterville and at points between Waterville and Red Wing over the defendant's said lines on freights from Chicago to these points, as above set forth.

This disposes of this complaint, and under the circumstances we have only deemed it necessary to make the report of it here stated to complete the record of the case.

W. O. HARWELL, H. B. T. Montgomery
and J. W. Ponder, Committee on Transportation of the Board of Trade of Opelika,
Alabama,

2.

COLUMBUS & WESTERN R. R. CO. and
the Western Railway of Alabama.*

(No. 47.)

1. **Dissimilar circumstances and conditions may be made out by the existence of actual competition which is of controlling force in respect to traffic important in amount;** and the limitations suggested by this rule are applicable, when the controlling force of water competition is invoked in respect to the second and third sections of the Act, as well as in respect to the fourth. The exceptional circumstance to be proved is "actual competition"—not possible competition likely to arise if rates are raised—"of controlling force"—not when the rail line is the controlling force, but when the competing water line is able to dictate rates which will control the traffic, unless met by the railroad—"in respect to traffic important in amount"—not when competition in a single direction or for the transportation of a single article or class of articles exists, but general competition of the character stated, controlling the carriage of the traffic on which the discrimination is made. That "railroads have water competition and are compelled to meet it," without more, is not sufficient to justify the lesser charge for the greater distance, much less to justify the making of such tariffs as the petitioners seek relief from.

2. **Where the petitioners ask that the discrimination against their Town of Opelika, which it appears unjustly exists in favor of the Cities of Montgomery and Columbus, be corrected, that is, that the rates at Opelika be reduced, but when the order which they seek would increase the existing discrimination under the "Ball Arbitraries" in favor of Opelika as against the local points on each side of it, the relief was refused, as to grant it in a form in which no injustice would be done to other points, and yet conforming to the**

*See pleadings, ante, 494.

to La Grange, Georgia, through Opelika, is sixty-four cents, which, added to fifty-nine cents, makes a charge of \$1.23 as the rate a Montgomery jobber can handle flour at La Grange. The rate from Opelika to La Grange is forty-two cents, making \$1.32 as the rate the Opelika jobber can handle flour at La Grange, with 132 miles shorter haul. The present rate from New York to Opelika, is \$1.65, first class; to Montgomery, sixty-six miles further, through Opelika, \$1. The rate on cotton is fifty-two cents per 100 pounds from Opelika to Savannah, Georgia; from Montgomery and Columbus to Savannah the rate is forty-five cents per 100 pounds. No through rate is stated and no through bills of lading are issued on cotton from Opelika to New Orleans. In order to ship cotton to New Orleans, a local rate of twenty-seven cents to Montgomery is charged, and the cotton has to be rebilled from that point.

The foregoing illustrations are examples of the rates made on every class of merchandise from and to all northern and western points and to the seaboard. Upon the foregoing facts there seems to be no question but that the charge of discrimination against Opelika and in favor of Columbus and Montgomery is substantiated. Indeed, this is not denied by the defendants, who, however, claim that the discrimination is founded upon grounds which render it not unjust. The practical result in this case is the natural one, namely: that the Opelika merchants have been unable to successfully compete with the merchants of the rival towns in their efforts to make Opelika a distributing point. The value of real estate has largely decreased. The business of handling cotton for sales abroad has been diverted to other towns to a great extent, and the town, although the most important in population and location on the line between Atlanta and Montgomery, has not held its own in the progress of the last decade, but has been outstripped by its competitors and practically left behind.

The considerations upon which the defendants attempt to justify their treatment of this community involve broader questions than those presented by the present rates between two or three neighboring towns and cities. The question from the standpoint of the defendants cannot be considered without entering to some extent upon the method under which freight rates are made in the Southern States, as related to the requirements of the fourth section of the Act to Regulate Commerce. Their position amounts, in substance, to this: That they admit that the rates to Montgomery and Columbus are made less for the longer haul than to intermediate points on the same line of road, but that they are justified in so making them by reason of the water competition which exists at those points and which compels the establishment of very much lower rates than naturally would be made, while they claim that the rates to intermediate points are reasonable and just; but they say, in substance, that what the merchants of Opelika desire is the establishment in their favor of another competing point or "trade center" at which the rate shall be materially lower than to intermediate points on

the same line, thus inviting them to commit a still further breach of the letter of the fourth section without the justification of water competition, which exists in respect to the other places named. This they say they are not willing to do, insisting that Opelika cannot be properly treated otherwise than as a local station on the line of the Western Railway of Alabama; and, not having the advantages of water competition, cannot ask the railroads arbitrarily to give them such advantages as they would have if located upon a navigable stream.

Another complication is found in a circumstance referred to in Mr. Gabbett's answer, namely: that this controversy is one of long standing, which, in 1884, was made the subject of investigation by the State Railroad Commissioners of Alabama, who were of the opinion that the law under which they were acting required more liberal treatment of Opelika on the part of the roads. The arrangement which was then made was not satisfactory to Opelika, although a concession to some extent was instituted. It appears that a system of arbitrary figures, called the "Ball Arbitraries," was then established, whereby the Opelika rate was made by adding these arbitrary figures to the rates to Montgomery or Columbus, the result being that, although the Opelika rates were considerably higher than the rates at those points, nevertheless they were somewhat lower than the rates at the adjoining points in its vicinity. Thus, for example, the rates furnished the Commission by the Louisville & Nashville Railroad Company from Louisville, Kentucky, in effect from August 20, 1887, show the following on flour per barrel:

To		
Montgomery, Ala.,	52 cts.	
Columbus, Ga.,	58 "	
Eufaula, Ala.,	58 "	
Atlanta, Ga.,	54 "	
Opelika, Ala.,	72 "	
Auburn, "	90 "	Seven miles west of Opelika.
Salem, "	82 "	Ten miles southwest of Opelika, towards Columbus.
Cusseta, "	91 "	Nine miles northeast of Opelika, towards Atlanta.
Dadeville, "	110 "	Thirty miles northwest of Opelika, on the Columbus & Western Extension.
Buffalo, "	97 "	Twenty-two miles north of Opelika, on the East Alabama Railroad.

From these examples, which illustrate the rates on every commodity to all points similarly situated, it is apparent that while the rates to Opelika are considerably higher than the rates to Montgomery, Columbus, and Eufaula, they are, nevertheless, considerably lower than the rates to the neighboring points in every direction. In other words, Opelika is now treated by the railroad companies to some extent as a competing point or trade center as against the surrounding towns, but does not receive this treatment to a sufficient extent to enable it to compete with other distributing points, or to satisfy the desires of its citizens; and while the railroad companies say that they cannot properly give Opelika further concessions in rates, by reason of the unfairness to the neighboring points which such concessions

Railroad Company, by E. P. Alexander, president, contains the following:

"Montgomery, situated on the Alabama River, and Columbus, situated on the Chattahoochee River, have lower rates than Opelika. The reason is very plain; the railroads there have water competition and are compelled to meet it. The rates to Opelika are made by adding to the rates from Montgomery or Columbus a line of rates we call the 'Ball Arbitraries,' as they were suggested by Colonel Ball, one of the State Railroad Commissioners of Alabama. They are less than the local rates which generally prevail on the railroads in that State.

"Opelika wishes them still further reduced. I am prepared to say that I am not unwilling to reduce them so far as Opelika is concerned, if I may be allowed to reduce them to Opelika without making the reduction general to all other stations upon the line of the Columbus & Western Railroad."

The case was assigned for hearing by the Commission on October 19, 1887, at which time the complainants were present and were heard. The defendants were not present, but had admitted receipt of notice of the assignment of the case for that date. The general subject of the rates at Opelika had been previously brought before the Commission at its session in Atlanta, Georgia, on April 28, 1887, when Mr. Harwell, one of the present complainants, testified at considerable length and was cross examined by Mr. Alexander. The latter gentleman also referred to the subject in the argument which he made before the Commission at that time as President of the Central Railroad Company of Georgia. The proceedings at Atlanta are referred to in the petition in the pending case. The Commission understand that the defendants are content to submit the controversy upon the proofs and arguments laid before the Commission at Atlanta and appearing in the record of the present proceedings.

The facts found are as follows: Opelika is a town of about 8,500 inhabitants, located in the eastern part of the State of Alabama, 109 miles from Atlanta and sixty-six miles from Montgomery. The road from Atlanta to Montgomery, through Opelika, is composed of the Atlanta & West Point Railroad, and the Western Railway of Alabama, which connect at West Point, on the state line, and are operated as a continuous line from Atlanta to Montgomery by the same management. Columbus, Georgia, is situated twenty-nine miles southeast of Opelika on the Columbus & Western Railroad, which is a part of the Central Railroad of Georgia system, extending from Savannah westerly across Georgia into Alabama. The Columbus & Western Railroad is prolonged through Opelika (where it crosses the Western Railway of Alabama) in a northwesterly direction towards Birmingham, being operated at a distance of sixty miles to Goodwater. Another railroad, called the East Alabama Railway, extends directly north from Opelika, a distance of twenty-two miles, to Buffalo, in Alabama.

Opelika is surrounded by a territory producing cotton and consuming provisions and other products of the Western and Northern States.

INTER S.

Columbus is surrounded by a similar territory and is upon the east bank of the Chattahoochee River, which at that point is the boundary between the States of Georgia and Alabama. This river is navigable except in the dry season of the year.

Montgomery, in the center of Alabama, is on the main line of the Louisville & Nashville Railroad, extending from Cincinnati to New Orleans. It is also reached by the Central Railroad of Georgia, via Eufaula, and by the Western Railway of Alabama, as above stated, extending through Montgomery to Selma on the west; it is also situated on a navigable stream. The rates from the Northern and Western States to Montgomery by the Louisville & Nashville, via Birmingham, and by the Western Railway of Alabama, via Atlanta, are the same; and are considerably less than the rates from the Northern and Western States to Opelika. The rates from the Northern and Western States to Columbus, by way of the Louisville & Nashville Railroad, and Montgomery, and also by way of Atlanta, in both cases passing over the Western Railway of Alabama to Opelika, thence twenty-nine miles over the Columbus & Western to Columbus, are also considerably less than the rates to Opelika. The Central Railroad of Georgia also has another more southerly route from Montgomery, to Columbus, via Union Springs, on the Montgomery & Eufaula line. The Central Railroad Company of Georgia also controls the Western Railway of Alabama as part of its general system, so that the rates to both Opelika and Columbus are practically established by that Company, of which Mr. Alexander is president; and at Montgomery by that Company acting in harmony with the Louisville & Nashville Railroad Company.

For example, it appears that the rates from Cincinnati are as follows:

To	1	2	3	4	5	6	A	B	C	D	E	H	F
Montgomery.....	108	102	88	71	59	47	32	33	32	28	52	57	56
Columbus.....	117	112	91	76	63	52	32	40	35	31	54	59	62
Opelika.....	156	120	107	90	75	62	40	28	42	37	68	82	90

Cusseta is a station on the Western Railway of Alabama, eleven miles northeast of Opelika. A Montgomery jobber can purchase first class goods in Cincinnati, have them shipped to Montgomery for \$1.08, then back to Cusseta for fifty-three cents—total, \$1.61—passing through Opelika twice in so doing. An Opelika jobber would pay on the same goods \$1.50 from Cincinnati to Opelika and twenty-two cents from Opelika back to Cusseta, making a total of \$1.72. Dadeville is a station on the Columbus & Western Extension, thirty miles northwest from Opelika. A Columbus jobber can purchase first class goods at Cincinnati, paying to Columbus \$1.17; thence to Dadeville sixty-six cents; total, \$1.83, passing through Opelika in both directions. The Opelika jobber would pay on the same goods: Cincinnati to Opelika, \$1.50; Opelika to Dadeville, fifty-nine cents; total, \$2.09. The rate on flour from St. Louis to Montgomery is fifty-nine cents per barrel by way of Birmingham or by way of Atlanta, while the Opelika rate is ninety cents and the Columbus rate seventy-six cents. The rate from Montgomery

pany of Georgia, in making a rate from Savannah to the West wholly on its own road—for instance, to Salem, Alabama—charges the established "competitive" rate to Columbus, 292 miles, and adds thereto the local rate for nineteen miles, Columbus to Salem: thus, on fertilizers, per ton, \$3 plus \$1.40—\$4.40, Savannah to Salem; being \$3 for 292 miles, to which is added \$1.40 for the last nineteen miles of the haul, making \$4.40 total rate.

Under the use of this system the railroads have to a very large extent absorbed the business which in the past was done by steamboats at competitive points, and this is true at Columbus, one of the points in question, as to which it is said in the answer "the water competition on western products by steamboats has practically ceased during the past three or four years, owing to the reduction of rates by rail lines to that point from the West; but should the rates be raised from the West to Columbus, competition would again ensue similar to what it was prior to 1881." Thus it is claimed generally that rates to these competing points cannot be raised without endangering the business of the roads, while rates at intermediate points cannot be lowered without serious embarrassment to their revenue. As has been seen above, Opelika is "neither fish nor fowl." Its treatment has not been consistent, nor has it been satisfactory either to the railroads or its citizens. It does not receive the low rates of the trade centers, nor are the high rates charged at intermediate points exacted. It urgently desires to become a trade center, and insists that its situation as a branching point for several railroads is one that entitles it to such consideration, even at the expense of the neighboring communities; while railroads have been unwilling to concede to it any other position than that conceded to local points between competitive points, using the fact of the injustice to neighboring communities as an excuse in this behalf.

It was the hope of the Commission after the announcement of its decision upon the subject of the application of the fourth section on June 15, 1887, in the *Louisville and Nashville Case*, that the railroads in the South, as well as in other parts of the Union, would endeavor to reform their tariff schedules so as to bring them gradually into conformity with the general provision of the Law. It was said in that opinion that "Our observation and investigations so far made lead to the conclusion that strict conformity to the general rule is possible in large sections of the country without material injury to either public or private interests; and that in other sections the exceptions can be made and ought to be made much less numerous than they have been hitherto, and that when exceptions are admitted the charges should be less disproportionate." [See *ante*, 290.]

Since the promulgation of that opinion and the full announcement of the views of the Commission therein made concerning the construction of the fourth section, the tariffs which are being daily received show that a reconstruction of the rates has been going on continually, with more or less effort to bring the same into harmony with the views then expressed. This effort has been observable upon many of the roads of the Southern

States, as well as in other portions of the country.

The Commission has failed to observe upon the lines controlled by the Central Railroad Company of Georgia any decided effort towards a reconstruction of its rates in the directions suggested by its former opinion as required in order to conform to the provisions of the Act to Regulate Commerce. So far as the observation of the Commission goes, the system in force prior to April 5, 1887, is still substantially maintained upon that line. The old trade center rates are made to "competing points," and the local rates to interior points are added as before.

It is possible that the irregularities and inequalities in existing tariffs cannot be made entirely to disappear without a general readjustment of the arrangements under which traffic is interchanged, involving the adoption of a new system of the division of earnings between connecting lines, and a new system of making rates; but the Commission is satisfied that very extensive improvements are possible at once, and that very material changes in the present methods are required by the Law.

These suggestions arise directly from the position taken by the defendants in their answers. It is not the intention of the Commission to dispose of such questions hastily, nor in the absence of a distinct understanding that they are presented for consideration and adjudication.

In disposing of the present petition it must be borne in mind that the complainants charge a violation only of the second and third sections of the Act to Regulate Commerce; but in attempting to justify the discriminations adopted and enforced in the Opelika rates the defendants claim that what are styled competitive rates are too low upon any view, except that they are forced upon the roads by water competition; that the roads would raise them and equalize their rates generally but for that fact, which prevents their doing so, and that it is not unjust discrimination or undue or unreasonable prejudice, which is based upon physical facts and which recognizes only natural diversities of situation.

The weight of these claims has been conceded by the Commission in the case above referred to. Dissimilar circumstances and conditions, it was said, may be made out by "the existence of actual competition, which is of controlling force in respect to traffic important in amount." Those words were chosen with care, and the limitations which they suggest are applicable when the controlling force of water competition is invoked in respect to the second and third sections of the Act, as well as in respect to the fourth. The Commission, in expressing the result reached, named as an exceptional circumstance, to be proved if existent, the fact of "actual competition"—not possible competition likely to arise if rates are raised—"of controlling force"—not when the rail line is the controlling force, but when the competing water line is able to dictate rates which will control the traffic unless met by the railroad—"in respect to traffic important in amount"—not when competition in a single direction or for the transportation of a single article or class of articles exists, but genera

would involve, nevertheless, they admit that they are making such concessions at the present time to a considerable extent. Mr. Alexander's answer is very explicit in its statement that he is not unwilling to reduce the Opelika rates, provided he may do so without making the reduction general to all other stations, while Mr. Gabbett's answer is equally explicit in showing that Opelika already enjoys large advantages over Gold Hill, Youngsboro', Auburn, Cusseta, and its neighboring towns generally.

That this result is the natural outcome of that system of rate making which the Interstate Commerce Law found in force upon most of the railroads in the Southern States is admitted by Mr. Gabbett, who, in his answer, says: "Samples can be found all throughout the South similar to that of Opelika, where rival roads have not reduced the rates to an undesirable figure. None of such points can get freight from the West and sell to any station beyond them at as low an aggregate as Montgomery, Columbus, and Selma can; nor can the rates be constructed to allow this without making the rates to all railroad stations in the State the same, which would destroy the railroad property in this State."

It was in view of cases like the present that the opinion of the Commission, in deciding upon the application of the Louisville & Nashville Railroad Company for relief under the fourth section of the Act, discussed the subject of "trade centers" in the South, using, among other things, the following language: "The prevalence of such ideas and the acting upon them in making freight tariffs give to railroad managers a power of determining within certain limits what towns shall be trade centers and what their relative advantages; and while it may be, as they assert it is, that, in deciding upon rates under the pressure of the competition of trade centers, they endeavor to do justice between them, yet, as they do not, at the same time, feel a like pressure from noncompetitive points, it is obvious that justice to such points is in great danger of being overlooked, and it is altogether likely that it is to some extent."

"One result is that towns recognized by railroad managers as trade centers come to be looked upon as towns with special advantages, and other towns strive for recognition as such, and complain, perhaps, of injustice when they fail." [See *ante*, 289, 290.]

The system of rate making in the Southern States, which was quite generally operative when the Act to Regulate Commerce took effect, and which is still employed upon the roads here in question, is this: Certain large cities and towns situated on the coast at interior river points and at railroad junctions are called competitive, and receive quite low rates on all interstate traffic; all other stations are called local, and are charged much higher rates. The rates to local points are made by adding to the competitive rate at the nearest competitive point the local rate from that point. These local rates are ascertained upon a short distance mileage basis, frequently by using the table established or approved by State Railroad Commissioners. The intermediate or local stations are "given the benefit" of what is

called the lowest combination—that is, if the rate to the competitive point, plus the local rate to the given point beyond, exceeds the rate to the next competitive point, plus the local rate back to the given point, the latter rate is taken.

Thus between every two competitive points the graphic representation of the rates upon paper would show a rise, increasing rapidly until the highest point is reached at some station intermediate, and then descending as rapidly to the other end of the line. Under this system the rates on first class freight from Louisville to the various stations on the road between Atlanta and Montgomery are as follows (Louisville & Nashville Railroad Company Tariff, August 20, 1887; distance Louisville to Atlanta, 476 miles; Louisville to Montgomery, 490 miles):

Station.	Rate.	Distance from Atlanta.
		Miles.
Atlanta - - - - -	\$1 07	
East Point - - - - -	1 23	6
Fairburn - - - - -	1 31	18
Palmetto - - - - -	1 36	25
Newman - - - - -	1 39	30
Grantville - - - - -	1 47	51
Hogansville - - - - -	1 47	58
La Grange - - - - -	1 54	71
Gabbettville - - - - -	1 54	80
West Point - - - - -	1 53	87
Cusseta - - - - -	1 51	98
Opelika - - - - -	1 30	109
Auburn - - - - -	1 45	116
Loachapoka - - - - -	1 43	123
Notasulga - - - - -	1 41	129
Chehaw - - - - -	1 36	136
Cowles - - - - -	1 30	145
Shorter's - - - - -	1 26	152
Mount Meigs - - - - -	1 20	161
Montgomery - - - - -	98	

It will be seen that the rates to points between Montgomery and Atlanta (except Opelika, which is treated exceptionally) are made by adding the local rates to the rate of one of said special points or "trade centers;" and that the rates are highest at La Grange and Gabbettville, about midway of the total distance, where they are 59 per cent higher than at Montgomery. The evidence before us shows that business from Louisville for these local points is about as likely to go through Montgomery as through Atlanta. The rate either way is the same, and so of all other northern and western points. The disproportion of the charges made to the above enumerated local points in the last few miles of a 500 mile haul is obvious.

It is true that in this instance the freight is received at Atlanta or at Montgomery by a new carrier, but the same system is applied in case a so-called competitive point is passed on the line of the same carrier.

In the distance tariff furnished by the Railroad Commission of Georgia the increase in the tariff on first class freight between 400 and 420 miles is three cents, while the charge for a single haul of twenty miles is twenty cents; yet on freight from Cincinnati, Ohio, to East Point, the Atlanta & West Point Railroad Company adds to the Atlanta rate as much as it charges upon freight to East Point which originates in Atlanta, and so of all other stations on its line, and the Central Railroad Com-

and formerly shipped 26,000 bales per year, now reduced to from 12,000 to 15,000 bales. The rate on cotton from Montgomery to New Orleans is forty-five cents per 100, and the local rate charged Opelika on cotton to Montgomery is twenty-seven cents, making seventy-two cents to New Orleans, which shuts the door against that market, leaving it only the Savannah outlet.

These facts are not denied by the defendants. All that we have upon this subject from them is contained in the following paragraph from the answer filed by Mr. Gabbett for the Western Railway of Alabama:

"As to the charge that no through bills of lading are being issued by this road from Opelika to New Orleans, Louisiana, we would say that they were issued on the same basis that freights between Opelika and other places were charged, until a promise of rebates or secret rates to some of the merchants of Opelika by certain officers or agents of competing lines from Montgomery, an attempt was made to divert cotton from its ordinary and proper channel to New Orleans, was communicated to this company.

"With this information before us we ceased to give any through bills over the lines that we had reason to believe were seeking in an improper and underhanded way to draw freight from the roads over which it would naturally pass. We did this, as we were informed, in strict conformity to our legal right, to become responsible only beyond our own line for such roads, as our own judgment and experience taught us to be safe, and to our interest."

This averment is not supported by any proof, and, if true, it amounts simply to this: that some undisclosed connection of the defendant once made an offer of rebates to the merchants of Opelika for the purpose of getting the business away from what defendant considered its "ordinary and proper channel to New Orleans." It is not averred that the lines to New Orleans will not now unite in making the usual through rates, and no reason whatever is stated why through rates and through bills of lading on cotton are not given over the line which forms the aforesaid "ordinary and proper channel."

It appears from the papers in the case and from statements made on the hearing that through rates on cotton were formerly made from Opelika to New Orleans on the same basis that other freights were treated, as above described; also that after Opelika was punished in the manner stated by Mr. Gabbett for the efforts of competing lines to divert the traffic, through rates were given to New Orleans on cotton passing directly through Opelika from other points. It is not stated that the alleged "rebates or secret rates" have been offered since the passage of the Act to Regulate Commerce, and it is understood that the through rates to New Orleans were taken away from Opelika some time before that date and have not been restored, although such rebates would be now illegal. It is not even said that any Opelika dealer ever received such a rebate, but only that a "promise" of that nature was "communicated to this company."

Through bills of lading on cotton are an im-

portant facility in its transportation as now conducted; drafts drawn with such bills of lading attached are a basis of credit throughout the South. They ought not, therefore, to be refused without some substantial reason, and none is shown here.

From all the evidence before the Commission it finds the facts to be that through rates and through bills of lading on cotton offered for shipment at Opelika for New Orleans are unjustly and unreasonably refused by the defendant, the Western Railway of Alabama, while given by said road on other commodities and at other points similarly situated, and while said defendant's connecting lines making the route to New Orleans are ready and willing to unite therein, and also that Opelika is thereby subjected to undue and unreasonable prejudice and disadvantage, in violation of the provisions of the third section of the Act to Regulate Commerce.

An order will be made requiring said defendant to cease and desist from such violation within ten days after receiving a copy of the same.

The petition in other respects is retained, with leave to complainants to file amendments or an amended petition in accordance with the views above expressed.

William H. COUNCILL

v.

WESTERN & ATLANTIC R. R. CO.*

1. There is no undue prejudice or unjust preference shown by railroad companies in separating their white and colored passengers by providing cars for each, if the cars so provided are equally safe and comfortable. But fair dealing and common honesty require that a colored passenger should have the security and conveniences of travel for which his money has been accepted. Where a colored passenger had purchased a first class ticket, and there was but one car on the train furnishing the accommodation for which he had paid and was entitled to have, and after he had entered this car, he was forcibly removed to a car assigned to passengers of his race, which was a half car, half lighted, in which men and women were huddled together and where men, white and black, smoked at pleasure, the car being designated as a "second class" car, being dismal, less clean and less comfortable than the car in which he was first seated, the railroad company was held to have subjected him to undue prejudice, and unreasonable disadvantage in violation of section 3 of the Act to Regulate Commerce; and these unlawful acts and all unjust discriminations were ordered to be discontinued.
2. The complainant having offered evidence of pecuniary damages as a basis for an award for injuries done in his violent removal from the car and for reasonable fees of attorneys he has

* See ante, 232, 255.

demand was made upon any other of the passengers to vacate their seats, but it alleges that no others were there in violation of the rules. It admits that complainant left the train at Dalton, Georgia, as it avers, for no other reason than that he chose to do so.

It admits "its obligation to furnish to all passengers who pay the same fare equal or like accommodations, and that it has no right to discriminate between classes on account of color, sex, or otherwise, by offering one better accommodations and another inferior accommodations for the same money."

Further answering, the defendant railroad company avers that it has the right to promote good government of its trains and the convenience and comfort of passengers by classifying and requiring those of one color or sex to ride in one car and those of another in a different car, and to avoid confusion and trouble which might result from "crowding persons of the two races together in the same car." It had established a permanent rule or regulation of the Company. By this rule a car was and is set apart, called the ladies' car, which no one but a lady, or a gentleman accompanied by a lady, or a lady and children can enter and occupy until these are seated. If there are vacant seats after the persons entitled to occupy the car are seated white male persons can occupy them until required for ladies who may come on the car. Another car is provided for colored people which white persons are not permitted to occupy without consent of the colored passengers. It is part of this rule that colored persons going into the ladies' car shall be notified by the conductor or brakeman to go into the car provided for them.

Defendant denies that complainant had a right to occupy a seat in the ladies' car and avers that he was aware of defendant's rule, and that he had taken and was occupying a seat in violation thereof; that he was notified that a car on the train had been set apart for colored persons, which he was requested to occupy and which he refused to occupy, insisting that, having paid full fare, he was entitled to ride where he was seated. Defendant further avers that it was the duty of its conductor to have removed complainant to the car provided for colored persons, using as little violence as possible, but that the passengers, offended by his presence in the ladies' car and by his refusal on request to leave it, took the matter in hand, used violence, and ejected complainant from the car, and that no conductor, brakeman, or other of its officers or employees, or anyone having any control over the train took any part in the chastisement that was administered to the complainant; "that, on the contrary, they were not aware of any intention to inflict the punishment and did not in any manner countenance or justify the violence to which complainant was subjected."

Defendant, further answering, says that the car provided for the accommodation of colored persons on said train was first class and denies that it subjected complainant or permitted him to be subjected, as far as it was able to prevent it, to any undue or unreasonable prejudice or disadvantage because of his being a colored person or for any reason whatsoever; and defendant insists that whatever injury, preju-

dice, or disadvantage complainant suffered, it was the result of his own conduct and not the fault of defendant.

On investigation the following facts are found from the depositions and oral testimony of witnesses, which are, in addition to the facts found in the statements of the complaint, not denied in the answer :

1. Regulations setting apart cars for separate use of white and colored persons had been established for said Railroad Company substantially as stated in its answer. Similar regulations are customary on the railroads of Georgia, Tennessee, and neighboring States. On defendant's road these regulations are not well defined and are seldom enforced, except as to colored persons.

2. The passenger cars in the train were the colored people's car, first after the baggage car; next, the ladies' car, from which the complainant was ejected, and last the sleeping car. The ladies' and colored people's car were of the same pattern and of like substantial build. The one designated the colored people's car was divided by a partition into two nearly equal apartments, with a door between them opening either way by slight pressure and without a fastening when closed. The rear half end or apartment was the smoking car for white and colored men by the rules, but for white men in practice. The front half end or apartment, in which smoking was frequent, was the colored car for both sexes. It was badly lighted by a single burner, and contained, for the use of the passengers of both divisions, the one necessity of railroad travel which adds to the convenience without contributing to the cleanliness of the car.

3. If the officers, agents, and employees of the Railroad Company in control of the train did not plan and participate in the assault on complainant, and in his removal from the car, they omitted to discourage or discountenance it. At least two of them—the brakeman and baggage master—were present in the car and made no effort to protect complainant from the violence done him.

The complainant alleges that he has been subjected to unreasonable prejudice and unjust discrimination, and claims large money damages for injuries done him and for reasonable fees of attorneys he has been compelled to employ. Under the Seventh Amendment to the Constitution of the United States the defendant, in any case at common law, is entitled to a trial by jury. This claim is, in its nature, an action of trespass, and, therefore, presents such a case; and when, on the hearing, the complainant offered evidence of pecuniary damages as a basis for an award, the Commission, because it could not give such a trial, declined to go into that question. The complainant is, therefore, left to his appropriate remedy in the courts for the alleged trespass and assault upon him. In such a proceeding the defendant may be held liable for counsel or attorneys' fees, "to be fixed by the court," as provided in section 8 of the Act to Regulate Commerce, and which this Commission is not authorized to award. The claim for damages and attorneys' fees being thus disposed of, it remains to be considered whether railroad companies may lawfully separate their white

been compelled to employ and the defendant railroad company under the Seventh Amendment of the Constitution of the United States being entitled to a trial by jury, the Commission, because it could not give such a trial, declined to go into that question leaving the complainant to his appropriate remedy in the courts for the alleged trespass and assault upon him, in which, under section 8 of the Act to Regulate Commerce, the defendant may be held liable for counsel or attorneys' fees "to be fixed by the court."

(Decided December 8, 1887.)

COMPLAINT that the petitioner has been subjected to unreasonable prejudice and unjust discrimination by the refusal of the defendant to furnish the accommodations for which he had paid, and claiming large money damages for injuries done him and for reasonable fees of attorneys he had been compelled to employ. The Commission declined to proceed upon the claim so far as it was in its nature an action of trespass, but entered an order requiring that such unlawful acts and all unjust discriminations should be discontinued.

The facts are stated in the opinion of the Commission.

Messrs. Brandon & Hundly, for plaintiff.

Mr. Julius L. Browne, for defendant.

REPORT AND OPINION OF THE COMMISSION.

Morrison, Commissioner:

The complaint of William H. Council against the Western & Atlantic Railroad Company states that he is a minister of the Gospel of the African Methodist Church, a school teacher, a citizen of the United States, a resident of Huntsville, in the State of Alabama, where he is principal of the State Colored Normal and Industrial School; and that said Railroad Company is a common carrier of passengers and property from Chattanooga, in the State of Tennessee, to Atlanta, in the State of Georgia; that, having occasion to visit some of the States east of Alabama in the interest of said school, he had, on April 7, 1887, proceeded as far as Chattanooga, where he purchased of said Railroad Company a first class ticket over its road from Chattanooga to Atlanta, and, shortly before the train started, entered a car and seated himself without direction from anyone as to the car he should take or the seat he should occupy. Soon after he went aboard and the train had started, and before his ticket had been asked for, he was told by a man to go into another car. The person making this request did not announce his official character, and the same being unknown to complainant the request was not heeded. And complainant avers that, whether or not such person was an officer, agent, or employee of said company, he had no right or authority to require complainant to change his seat.

The complainant was soon again told to go into another car, this time by a brakeman or person in railroad garb, to whom complainant answered that when the conductor came for

his ticket he, complainant, would go into another car if the conductor so directed. Soon after the second direction to go into another car, the brakeman or employee by whom it was given, returned with two other persons, one carrying a railroad lantern, who again told complainant to go into another car, to which he responded as before, that he would go if told to do so by the conductor. The person holding the lantern, without provocation, struck the complainant with it several blows, cut and bruised his face, and the three together forcibly ejected him from the car and compelled him to go into and occupy another car, in which he rode until the train reached Dalton, Georgia, at which place, in consequence of the injuries and bruises inflicted on him, he left the train. His ticket over the road to Atlanta had been surrendered. These injuries and wrongs were done to complainant in the presence of the passengers seated in the car which he was compelled to vacate, and none of said passengers were told to change their seats nor were they otherwise molested; that the conductor witnessed the violence and had information that it was intended and made no effort to prevent it, and when requested by complainant to protect him and see that his rights as a passenger on said train was respected, his reasonable request was answered by the conductor with harsh and abusive language.

That defendant did, on April 7, 1887, in respect of the matter stated by complainant, subject him to unreasonable prejudice and disadvantage in violation of the Act to Regulate Commerce, and especially of the third section of said Act; that, being a colored man, he was in consequence thereof not allowed a seat in said car, while white passengers who had purchased tickets at the same price paid by complainant were allowed to ride in said car, and that, because of his color, he was unreasonably discriminated against and subjected to unreasonable prejudice and disadvantage; that, by reason of the public manner of the assault, ejection from the car, bruises received, pain endured, mental anxiety and humiliation, delay in making his journey, and the unjust discrimination against him, he had been damaged in the sum of \$35,000, which he asks may be awarded to him, together with \$1,500 for the reasonable pay of counsel he has been compelled to employ.

The answer of the defendant railroad company admits, or does not contest, the occupation, citizenship, and residence of the complainant as stated in his complaint. It admits that defendant is a common carrier of passengers, that complainant is a colored man and purchased a ticket over its road as stated by him, and does not contest his statement that he, on April 7, 1887, entered the car and seated himself without direction from anyone as to the car he might take or the seat he might occupy. Defendant admits that complainant was twice told by employees, its agents, or, as it claims, was politely requested, once by the conductor and once by the brakeman, to go into another car, and that complainant was removed from that car to another by violence, but, as it alleges, not by its agents. It admits that the violence was used in the presence of the passengers in the ladies' car, and that no

jectures. They have to deal with business as they find it. Where, from the very sparsely settled country through which the defendant railroad company operates its lines, outside of the through business which is furnished to it at Wallula by the Northern Pacific Railway, and by the Oregon short line at Umatilla, one of the chief articles of freight on which it must depend is the transportation of wheat to Portland; where, as compared with other roads transporting wheat which pass through more populous communities, in addition to the through freights furnished by their connections, they have a greater variety of local and way freights, and are not compelled to depend, as is the defendant, so largely upon what they receive for the transportation of any one local commodity, such as wheat, and can for this reason alone safely make their rates less on wheat than the defendant; where the wheat hauled by the defendant is transported in sacks—a more expensive mode of shipping and delivering than that usually adopted by other roads with which it has been compared, which is in car loads of solid wheat received from and delivered to elevators along their lines; where the volume of through freights forming a large proportion of the business of the defendant fluctuates very greatly, influenced by causes beyond the control of a remote carrier like the defendant; where the expense of frequently hauling empty cars to reach wheat before it can be received for carriage back to Portland, largely affects the question of the reasonableness of the rate upon wheat shipped from Walla Walla to Portland, Oregon, where shortly after the petitions were filed the defendant, as it had a right to do under the statute, reduced its rate on wheat from Walla Walla to Portland from \$6 per ton to \$5 per ton or twenty-five cents per 100 weight, and made since April, 1887, large and general reductions on a fine line of freight; and as rates are to a considerable extent so related to each other in the manner in which they are laid for the revenue of a railroad, that the instances are very frequent, the present being one, where a change of rate upon one important article of commerce involves a consideration of the relative rates on other articles, and where the defendant's lines are phenomenally well situated in their relation to through transportation facilities, and the large field of growing commerce and agriculture, and upon the statement in the answer of the defendant that further reductions on wheat rates are intended to be made by defendant as soon as this can be done, and upon the general course of dealing of defendant, as shown in the proofs, that the rate for the next season on wheat will doubtless be further modified—it is ordered that on and after the

15th day of December, 1887, the defendant must cease to charge more than 23 1-2 cents per 100 pounds, or \$4.70 per ton, on wheat transported by it over its lines from Walla Walla, in Washington Territory, to Portland, in the State of Oregon, during the present grain season.

(Heard Oct. 12, Decided Dec. 3, 1887.)

COMPLAINT charging the exaction of an unreasonable and extortionate charge of thirty cents per 100 pounds upon the transportation of wheat from Walla Walla to Portland by the defendant, and asking that it be reduced to fifteen cents per 100 pounds. For complaint and answer in *Reed, Petitioner*, see ante, 314, 328. For complaint and answer in *Evans, Petitioner*, see ante, 314, 326. *Reduction of freight charges ordered.*

Messrs. B. L. & J. L. Sharpstein, for plaintiff Evans, and *Reed pro se*.

Messrs. C. B. Bellinger, and McDonald, Bright & Fay, for defendant.

REPORT AND OPINION OF THE INTERSTATE COMMERCE COMMISSION.

Bragg, Commissioner:

These complaints involve the same question as to the reasonableness of the freight rates of the Oregon Railway and Navigation Company on wheat shipped from Walla Walla, in Washington Territory, over its line to Portland, Oregon. By consent of the parties they were heard together and will be disposed of by us in the same manner.

The complaint of the petitioner, Milton Evans, is that on the 26th day of April, 1887, the defendant charged and collected from him \$31 for transporting 27,000 pounds of wheat from Walla Walla City to the City of Portland, which he claims was an unreasonable and extortionate charge.

The complaint of William H. Reed alleges that on the 26th day of May, 1887, the defendant charged him \$72 on a shipment of 24,000 pounds of wheat from Walla Walla City to Portland, Oregon, which he alleges was an unreasonable and extortionate charge. The charge in each instance was thirty cents per 100 pounds. The prayer of each petition is that the rates of defendant on wheat from Walla Walla to Portland shall be reduced to \$3 per ton or fifteen cents per 100 pounds.

The defendant admits the making of each of these charges, and insists that they are reasonable and just. The grounds upon which the defendant in its answer justifies these charges are substantially the same as to each complaint, and may be briefly stated as follows:

That its road extends from the City of Portland, in the State of Oregon, to the City of Walla Walla, in Washington Territory, a distance of 246 miles, and is necessarily constructed and operated for the most part through a rugged and mountainous country, with extraordinary grades and curves, and, being so constructed, is operated at exceptionally great expense.

That between the City of Portland and Dalles City, a distance of eighty-eight miles, its road

and colored passengers by providing cars for each, and if the car for colored people on the defendant's road was as safe and comfortable as that provided for white people.

It is both the right and the duty of railroad companies to make such reasonable regulations as will secure order and promote the comfort of their passengers. In the exercise of this right and the performance of this duty, carriers have established rules providing separate cars for ladies, and for gentlemen accompanied by ladies; and their right to make such rules as to sexes is nowhere questioned. A man, white or colored, excluded from the ladies' car by such a rule could hardly claim successfully under the Act to Regulate Commerce that he had been subjected to unjust discrimination and unreasonable prejudice or disadvantage. It is a custom of the railroad companies in the States where the defendant's road is located, and in all the States where the colored population is considerable, to provide separate cars for the exclusive use of colored and of white people.

In Pennsylvania, where, by regulation, separate seats were provided, a colored woman refused to occupy the seat assigned to her; she was put off the train, and the supreme court of the State in that case declared the separation of white and colored passengers in a public conveyance to be a subject of "sound regulation to secure order, promote comfort, preserve peace, and maintain the rights of both carriers and passengers." In a later case in Illinois the supreme court held that public carriers have no right to discriminate between passengers on account of color "until they do furnish separate seats equal in comfort and safety to those furnished to other travelers," the obvious meaning of which is that to furnish separate seats equal in comfort and safety is not unjust discrimination.

These interpretations of the law are in conformity with the decision of *Justice Woods*, late of the United States Supreme Court, denying to the children of colored parents in Louisiana, under the laws of that State, the right to "attend the same public schools as those in which white children are educated." In this case *Justice Woods* said "equality of rights does not necessarily imply identity of rights."

The people of the United States, by the votes of their representatives in Congress, support the public schools of the country's capital city, and here white and colored children are educated in separate schools. Congress votes public moneys to separate charities; men, black and white, pitch their tents at the base of Washington's Monument to compete in the arts of war in separate organizations. Trades unions, assemblies, and industrial associations maintain and march in separate organizations of white and colored persons.

Public sentiment, wherever the colored population is large, sanctions and requires this separation of races, and this was recognized by counsel representing both complainant and defendant at the hearing. We cannot, therefore, say that there is any undue prejudice or unjust preferences in recognizing and acting upon this general sentiment, provided it is done on fair and equal terms. This separation may be carried out on railroad trains without

INTER 8.

disadvantage to either race and with increased comfort to both.

But the right of the carrier to assign a white man to another car than the ladies' car, or a colored man to a car for his own race, takes nothing from the right of either to have accommodations substantially equal to those of other passengers paying the same fare. The complainant had paid the same fare with other "first class," passengers. It was no more than fair dealing and common honesty that he should have the security and conveniences of travel for which his money had been accepted. This was denied to him. He was told to go, and then forcibly removed to the car assigned to passengers of his race. This was a half car, half lighted, in which men and women were huddled together, and where men, white and black, smoked at pleasure. The defendant's witness, who testified that he struck the complainant several blows and removed him, designated the car into which he forced complainant a "second class" car; and such it was, being dismal, less clean, and less comfortable than the car in which he was first seated and not permitted to ride.

The manner of his removal need not be discussed here, since the alleged assault and trespass is not to be here considered.

There was in the train no car furnishing the accommodations for which the complainant had paid and was entitled to have, other than the one from which he was removed because he was a colored man. In denying to complainant equal accommodations furnished the other passengers paying the same fare the Railroad Company subjected him to undue prejudice and unreasonable disadvantage, in violation of the Act to Regulate Commerce; and these unlawful acts and all unjust discriminations must be discontinued.

The Western & Atlantic Railroad Company will be notified to cease and desist from subjecting colored persons to undue and unreasonable prejudice and disadvantage in violation of section 8 of the Act to Regulate Commerce, and from furnishing to colored persons purchasing first class tickets on its road accommodations which are not equally safe and comfortable with those furnished other first class passengers.

Milton EVANS, *Petitioner*,

v.

THE OREGON RAILWAY & NAVIGATION CO., *Def.*

William H. REED, *Petitioner*,

v.

THE OREGON RAILWAY & NAVIGATION CO., *Def.*

1. A variety of practical considerations must enter into the making of freight rates by a railroad company, and determine to a great extent in every instance the question whether such rates are reasonable or not. Railroad companies cannot be required to make freight rates upon mere theories or con-

struction of branch lines into sections of the country which are without transportation facilities.

The defendant alleges that the adoption of a rate of freight charges for its road as low as that prayed for in these complaints would make it impossible to operate its road and pay operating expenses and cost of repairs, to say nothing of dividends or interest; and that such rate would prevent the construction of the new lines now under way and in contemplation by defendant, and would, in effect, destroy its entire property as an investment.

The evidence in these cases, by deposition, orally, and submitted in the shape of documentary evidence, has taken a wide range, not more so, perhaps, than is usual and permissible in cases of this description, where the question involved is one of the reasonableness of rates and which must always be determined from a variety of circumstances, conditions, and considerations. On the part of the petitioners it relates to the topography of the country over which the road bed of the defendant is constructed; the value of the wheat in the market at Portland and Walla Walla; the freight rates charged on wheat by railroads in Dakota, Minnesota, Iowa, Wisconsin, and Illinois; the recommendations of the State Railroad Commissioners of Oregon in cases that it is claimed are similar, and to the receipts and expenditures and income derived by the defendant from the business of its lines from which it is claimed by the petitioners that the net earnings, after deducting the interest paid on the bonded indebtedness, would leave to be paid on the capital stock of the defendant an amount of between 10 and 11 per cent per annum. On the part of the defendant the evidence taken is directed to maintaining the points of defense made in its answers above enumerated.

Without reciting the details of this mass of evidence, which, for the purposes of this report and opinion, would be wholly unnecessary, but all of which we have carefully considered, we content ourselves with stating, in substance, the facts we find from it material to the inquiry involved. Exclusive of the Columbia and Palouse Railroad, the Oregon Railway & Navigation Company operates a main track of 576 miles. That portion of its system which extends from Portland to Walla Walla is 246 miles in length, and is constructed along the Columbia River a distance of 187 miles to Umatilla Junction. From Umatilla Junction one branch of this railroad is constructed southeasterly through the Counties of Umatilla, Union, and Baker, in the State of Oregon, to Huntington, where it connects with the Oregon Short Line, and with that and the Union Pacific forms a through line from the Missouri River to Portland. The other line of this railroad extends from Umatilla Junction up the Columbia River about twenty-seven miles to Wallula, where it connects with the Northern Pacific, the two forming a through line from St. Paul to Portland. From Wallula Junction there is a branch of this road easterly about thirty-two miles to Walla Walla City, at which point it connects with the Pendleton Branch of defendant's system from the South. From

Walla Walla the road runs northeasterly twenty-three miles to Bolles' Junction, at which point it branches, one branch running easterly thirteen miles to Dayton, the other extending northerly twenty-three miles to Starbuck, where it branches again, one branch going easterly about thirty miles to Pomeroy, the other branch continuing northerly about nine miles to Snake River. The maximum up grade per mile on said road from the City of Portland easterly to Walla Walla is fifty-nine feet. The highest altitude above mean low tide at Astoria of said road, where it crosses the Cascade Mountains between Portland and Dalles, is 134 feet, and the highest elevation of the road bed of said road above high water mark of the Columbia River between said points is 119 feet.

During the year 1884-'5 the removal of snow blockades between Portland and Dalles cost this Company \$190,005.66; during the year 1885-'6, \$19,207.06; during the year 1886-'7, \$10,702.07. During the year 1886 the defendant employed a force of sand shovellers to prevent this road from being obstructed by sand drifts, for which it paid \$11,205.93; and in the year 1887, for the same service, \$15,565.25. Between Portland and Dalles City, a distance of eighty-eight miles, the defendant's railroad runs for most of the distance along the Columbia River, and the defendant owns and runs a daily line of steamers between said cities, carrying both way and through freights and passengers. The amount of wheat shipped over this road from stations between Wallula Junction and Dalles City, including Wallula Junction, during the fall of 1886 and the winter of 1886-'87 was 8,340 tons. The time of this shipment extends from September to March, inclusive, a period during which the great bulk of wheat shipments are made, though occasionally small shipments are made in April, May, and June, and the wheat shipped is the product of both sides of the Columbia River. There has been a steady and large increase in shipments of wheat over defendant's road every year during the last four or five years. Since the defendant began the operation of this road through from Portland to Walla Walla it has reduced freights on wheat shipments between these points from \$12 per ton to \$6 per ton, and this without any competition which forced it. The bulk of defendant's traffic is received from the Northern Pacific at Wallula Junction, from the Mountain Division of defendant's road at Umatilla Junction and from the eastern extension of defendant's road from Snake River, Walla Walla being an intermediate point on this last named road between its eastern terminus and Portland, and this freight is transported to Portland. The greater portion of this business passes over this line or a portion of this line between Walla Walla and Portland. The freight received from Walla Walla, although that amounts to about 15,000 tons of wheat annually, is small compared with its receipts from the other lines named, its entire receipts of wheat for the year 1886-'7, being about 121,000 tons. The wheat industry of Oregon and Washington Territory on the valley of the Columbia River is very large and is rapidly growing from year to year, the crop of the

competition of the character stated, controlling the carriage of the traffic on which the discrimination is made.

As has been said, the answer of the Columbus & Western Railroad Company, speaking of the lower rates now enjoyed by Montgomery and Columbus, says: "The reason is very plain; the railroads have water competition and are compelled to meet it." But that fact, without more, has not been held sufficient to justify the lesser charge for the greater distance, much less to justify the making of such tariffs as have been applied on the roads in question. The results are abnormal, not only at Opelika, but all along the line. They are simply less disproportionate at Opelika than at other points in its vicinity. There is no proof now before the Commission of actual competition, of controlling force, at Columbus. The evidence is to the contrary. Were it not for the knowledge heretofore acquired by the Commission respecting the competitive factors at Montgomery, it could hardly be claimed that anything in the nature of a justification is shown. The Commission is aware that an independent and active line of river steamers connects that point with the Atlantic seaboard via Mobile. How the defendants would attempt to justify such a disparity of rates as exists, for example, between Cowles and La Grange, or even between Opelika and La Grange, has not yet been made manifest.

As the case is now presented it seems clear that Opelika and other places in its vicinity are unjustly discriminated against, under the system of rate making now in force; but it is not so clear that any relief can be given to Opelika upon the present petition.

It would tend to a correction of the discrimination if the interstate rates to Columbus and Montgomery should be raised, leaving intermediate rates as they are; but we do not understand that this is asked or expected by the petitioners; and we should not be willing to entertain such a suggestion without awarding to the communities to be affected the opportunity of being heard thereon.

It is evident that the petitioners, in their evidence and in their proposed relief are proceeding upon an assumption that the existing system is founded in the nature of things and is to be perpetuated. Under that system there are trade centers which enjoy special privileges, and Opelika deserves to be entitled to be placed in that class and to enjoy like privileges. It does not explicitly ask to have the long and short haul clause of the Statute enforced, and it is doubtful whether its enforcement would be for the interest of the merchants of Opelika.

What the petitioners ask is that the discrimination against their town in favor of Montgomery and Columbus be stopped. What they mean is that the rates at Opelika be reduced; but the order which they seek would increase the existing discrimination under the Ball Arbitraries in favor of Opelika, as against the local points on each side of it; this the Commission cannot now consent to direct. The relief of Opelika, in order to do no injustice to other points and to involve no violation of law in granting it, must be attended with a readjustment so general that other in-

terests and localities should be first heard and their respective claims considered.

If the Commission were to grant such an order as the petitioners desire, it might be understood, in view of existing conditions and of the position taken in defendant's answer, to decide that the circumstances prevailing in the district about Opelika are such as to justify making that city an exception under the fourth section of the Act to Regulate Commerce, as against the local stations about it; but no order can be made in this case at the present time which shall authorize such an exception for two very obvious reasons: first, the question whether the circumstances and conditions are exceptional in fact to an extent that would warrant an order was not presented by the petition in the case, and no proofs upon that subject are before us showing any ground for such exception; second, the points that would be injuriously affected by such an order are not before the Commission and have had no opportunity to be heard.

In view of what has been above said, it may be that the defendants will recognize the necessity of making a revision of their rates with a view to lessen the discrepancy between the rates at Montgomery and Columbus and those at intermediate points. Should they do so to the satisfaction of the complainants no further proceedings upon this petition will be necessary.

But if that is not done and complainants desire to proceed further they should be allowed to amend their petition so as to set out the facts on which they claim for themselves lower rates than are given to towns nearer Atlanta, Montgomery, and Columbus. The Commission will then make an order for notifying the localities to be affected and for further hearing upon the questions so presented. If the general subject of freight rates from points in other States to the various points on the line of defendants' roads, including Opelika, is to be brought before the Commission, the petition may be so amended as to distinctly state, for defendants' action would be materially influenced by the nature of the relief asked, and the other towns could also be advised of the matters pending affecting their interests; and if, on the other hand, complainants shall see fit to ask for a strict enforcement of the long and short haul clause as against Columbus and Montgomery, or either, they will still need an amendment to their petition, and in that case the towns which are now favored with the lower charges on the shorter hauls could be given an opportunity for a hearing.

The complaint makes an independent point of the treatment to which Opelika is subjected by the carriers in respect to the article of cotton. It is said that the rate from Opelika to Savannah, via Columbus and the Georgia Central is fifty-two cents per 100 while the rate to the same point by the same system from both Montgomery and Columbus is but forty-five cents. The causes and methods operating to produce this result are the same above described and commented on. It is further said that Opelika has no through rate to New Orleans at all on cotton, and can get none from the railroad authorities, although it has good and ample facilities for the handling of cotton.

estimated wheat crop along the defendant's railroad division is about one third greater the present year than ever before. We speak of the defendant's "railroad division" because it also owns a river division operated by steamboats on the Columbia River, and an ocean division operated by steamships on the Pacific Ocean, besides other properties. We also find that the defendant transports wheat in sacks from Walla Walla to Portland, and that this is a more expensive mode to the carrier of transporting wheat than in car load quantities of solid wheat received from and delivered to elevators located along railroad lines.

Having considered the evidence and arguments of counsel and parties, we are of opinion that the rate of thirty cents per 100 pounds charged each of the petitioners was too high. We are also of opinion that a rate of 23½ cents per 100 pounds from Walla Walla to Portland, under all the circumstances, would be reasonable. Further than this we are not prepared to say that this wheat rate should now be reduced.

A variety of considerations of a very practical nature must always enter into the making of freight rates by a railroad company, and these also go very far in every instance to determine the question of whether such rates are reasonable or unreasonable. It would be very dan-
